

Integrating Cisco Unified MeetingPlace with Cisco Unified Personal Communicator

Release 7.1

Revised: April 3, 2011 10:21 pm

When Cisco Unified MeetingPlace is integrated with Cisco Unified Personal Communicator, users who are in a Cisco Unified Personal Communicator conversation can quickly share data through a private, reservationless, and web-only meeting that is provided by Cisco Unified MeetingPlace.

Web-Only Meetings that are Initiated from Cisco Unified Personal Communicator

The following information applies to Cisco Unified MeetingPlace web-only meetings that are initiated from a Cisco Unified Personal Communicator conversation:

- The person who *initiates* the Cisco Unified MeetingPlace web-only meeting must have an active user profile in the Cisco Unified MeetingPlace database.
- Meeting passwords and e-mail notifications are not supported for web-only meetings.
- The web-only meeting can only be accessed in the following ways:
 - (For users who are currently using Cisco Unified Personal Communicator) Cisco Unified Personal Communicator automatically opens a browser for all conversation participants when anyone initiates a web-only meeting.

- (For users who are not using Cisco Unified Personal Communicator) The person who initiates the web-only meeting must provide the URL to anyone who is not currently using Cisco Unified Personal Communicator.

These web-only meetings cannot be accessed by any other means, such as through the Find or Attend pages in the Cisco Unified MeetingPlace end-user web interface or through a Cisco Unified IP Phone screen when subscribed to the Cisco Unified MeetingPlace PhoneView.

- The meeting subject that appears in reports is *userid_WEBONLY_MEETING*, where *userid* is the [User ID](#) in the Cisco Unified MeetingPlace user profile of the meeting initiator.

Participant Privileges in Web-Only Meetings that are Initiated from Cisco Unified Personal Communicator

- All participants are treated as guest users with presenter privileges in the web meeting room. Therefore, all participants can share data, and only the meeting initiator must have a Cisco Unified MeetingPlace user profile.
- Only one pod, the share pod, is available in the web meeting room. The participant list, chat, and note pods that appear in other types of Cisco Unified MeetingPlace web meeting rooms are not available for web-only meetings.
- Except for the ability to share data, meeting participants do not have in-session controls, such as the ability to lock, record, or end the meeting from within the web meeting room.
- User profile settings do not affect the behavior of these web-only meetings. For example:
 - Even if the [Meeting password required](#) field in the user profile is set to Yes, no passwords are required to attend web meetings that are initiated from Cisco Unified Personal Communicator.
 - Even though Cisco Unified MeetingPlace treats the meetings that are initiated from Cisco Unified Personal Communicator as private reservationless web meetings, the [Use reservationless](#) field may be set to No in the Cisco Unified MeetingPlace user profile of the meeting initiator.
 - Even if the user profile [Host web meetings with](#) field is set to Participant list only, the user may still share data in web meetings that are initiated from Cisco Unified Personal Communicator.

Integrating with Cisco Unified Personal Communicator

Complete these tasks to enable web meetings to be initiated from Cisco Unified Personal Communicator conversations.

Procedure

	High-Level Task	Where to Find Instructions
Step 1	<p>Install the appropriate licenses on the Cisco Unified MeetingPlace Application Server.</p> <p>For example, install webconf and maxweb licenses that provide enough web ports for both the full web meetings that are initiated from Cisco Unified MeetingPlace and the web-only meetings that are initiated from Cisco Unified Personal Communicator.</p>	Installing and Managing Licenses for Cisco Unified MeetingPlace module
Step 2	Enable SSL on the Cisco Unified MeetingPlace Application Server.	Configuring SSL for the Cisco Unified MeetingPlace Application Server module
Step 3	<p>Make sure that a Cisco Unified MeetingPlace user profile exists for each Cisco Unified Personal Communicator user who might initiate web-only meetings from Cisco Unified Personal Communicator.</p> <p>Typically, both Cisco Unified MeetingPlace and Cisco Unified Personal Communicator are integrated with Cisco Unified Communications Manager, which handles the user authentication.</p>	Configuring Cisco Unified MeetingPlace Directory Service module
Step 4	Install and deploy Cisco Unified Personal Communicator.	<i>Installation Guide for Cisco Unified Personal Communicator</i> at http://www.cisco.com/en/US/products/sw/ps5664/ps5669/prod_installation_guides_list.html
