

Cisco Collaboration Systems Release Summary Matrix for IP Telephony

Note From Release 10.0 onward, Cisco Unified Communications System is re-branded to Cisco Collaboration Systems to better reflect the Collaboration products included in the solution.

This table identifies the software release versions of the system components that are used in each Cisco Collaboration Systems release for IP Telephony.

Note For maintenance releases, this table may not be updated. Go to specific product documents for more information on maintenance releases.

To learn more about the components’ features, functions, and interaction with other system components, click the technical information site for any release from the following URL:

http://www.cisco.com/en/US/docs/voice_ip_comm/uc_system/unified/communications/system/ucstart.htm

Note For maintenance releases, the technical information sites may not be updated. Go to specific product documents for more information on maintenance releases.

- Table cells with dashes indicate products that either were not available for that release, or are not supported.
- Test beds for a release set may contain multiple Cisco IOS and CatOS versions. The predominant Cisco IOS versions are listed below, but click the column headings to get complete details.
- For information on compatible software versions in a Collaboration Systems release set that you can use as a baseline and a known starting point, see the following:
 - Cisco Unified Communications Compatibility Tool
<http://tools.cisco.com/ITDIT/vtgsc>
 - Cisco Interoperability Portal
<http://www.cisco.com/go/interoperability>

Note Product specific compatibility documents provide complete compatibility information between components listed in the summary matrix.

- For a list of supported servers, see the following:
 - Cisco Unified Communications Manager Server Support¹ Matrix:
http://www.cisco.com/en/US/prod/collateral/voicesw/ps6790/ps5748/ps378/prod_brochure0900aecd8062a4f9.html
 - Cisco Unified Contact Center Express supported platform list:
http://www.cisco.com/en/US/products/sw/custcosw/ps1846/products_device_support_tables_list.html
 - Cisco Unified Communications Manager IM and Presence Server supported platform list:
http://www.cisco.com/en/US/products/ps6837/products_device_support_tables_list.html
- You can set up a virtualized environment by running Unified Communications applications on a virtual machine on a Unified Computing System (UCS). For additional details, including UCS hardware information and third-party requirements, see:
<http://www.cisco.com/go/uc-virtualized>

For information on supported applications in a virtualized environment, see http://docwiki.cisco.com/wiki/Unified_Communications_Virtualization_Supported_Applications

For information on supported VMware versions, see http://docwiki.cisco.com/wiki/Unified_Communications_VMware_Requirements#Supported_Versions_of_VMware_vSphere_ESXi

¹. Beginning with Cisco Collaboration Systems Release 10.0, Cisco is migrating from non-virtualized hardware servers to virtualized servers only. Cisco 7800 Series Media Convergence Servers are end of sale as of October 30, 2013, and are not supported for new installations of 10.0 or upgrades/migrations to 10.0. Virtual Machines are the only supported platform for Cisco Unified Communications Manager 10.0, running on either Cisco Unified Computing System or 3rd-party server. For information about best practices to setup virtualization and Cisco UCS hardware for Cisco Collaboration 10.0 applications, see http://www.cisco.com/en/US/docs/voice_ip_comm/cucm/virtual/CUCM_BK_CA526319_00_cucm-on-virtualized-servers_chapter_00.html For information about best practices to migrate from Cisco 7800 series Media Convergence Servers to virtualization on Unified Computing System Virtual Machines, see "Replace a Single Server or Cluster for Cisco Unified Communications Manager Release 9.1(1)": http://www.cisco.com/en/US/partner/docs/voice_ip_comm/cucm/install/9_1_1/replace/CUCM_BK_R1B1A464_00_replace-server-cluster-cucm-91.html For information about the Cisco 7800 Series Media Convergence Server end-of-life (EOL) notice, see: <http://www.cisco.com/en/US/products/hw/voiceapp/ps378/index.html>

1. This is a maintenance or minor release and no new Technical Information Site was created for this release. Refer to the release notes and system test results for information on this release.
2. For software running on a MCS 7825-H2 server, an additional patch file is recommended; see the *System Release Notes for IP Telephony: Cisco Unified Communications System, Release 6.1(1)* for more information.
3. See Cisco Business Edition 3000 documentation.
4. For ISR-G2 devices
5. For ISR-G1 devices.
6. Unified IP Phone models 6921, 6941, and 6961 were tested with Unified Communications Manager Express and Unified SRST Release 8.0 and IOS 15.0(1)XA; all other phone models were tested with Unified Communications Manager Express and Unified SRST Release 7.2 and IOS 15.0(1)M.
7. Tested on all ISR platforms except Unified Communications 500 Series for Small Business and ISR 1861. The Unified Communications 500 Series for Small Business and ISR 1861 platforms were tested on Cisco IOS version 12.4(11)XW2.
8. Cisco IOS Firewall version is 12.4(20)T1.
9. Secure SRST deployments require advipservicesk9 image 4.2/IOS 12.4(11)XW5.
10. Multi-stage upgrade testing was performed with Unified Presence Release 8.0(1) and feature and interoperability testing was performed with Unified Presence 8.0(2).
11. Adhoc conferencing feature in Unified MeetingPlace Releases 8.0/8.5 is not supported with Unified Communications Manager Release 8.5(1) and 8.6(1).
12. A hot fix is available to fix a defect in this release; see the *System Release Notes for IP Telephony: Cisco Unified Communications System, Release 6.1(1)* for more information.
13. Unity Connection Release 7.0(1) ES3 contains a fix for a defect in this release; see the *System Release Notes for IP Telephony: Cisco Unified Communications System, Release 7.0(1)* for more information.
14. Component does not support CTI OS based silent monitoring.
15. In Collaboration Systems Release 10.0(1), Cisco Prime License Manager replaced Cisco Enterprise License Manager.
16. For ISR-G1 devices only.
17. For ISR-G2 devices.
18. Cisco IOS Mainline software was used for additional basic PSTN functionality and load testing as part of regression testing conducted in IP telephony environments.
19. You can install third-party antivirus agents on Windows-based servers such as Unified Operations Manager and Unified Provisioning Manager, but not on non-Windows appliances such as Unified Communications Manager and Business Edition.
