

Cisco Collaboration Preferred Architectures

Revised: January 14, 2022

Cisco is a leading innovator of collaboration technologies and solutions. To provide our partners and customers with expert design guidance and best practices for deploying collaboration solutions, we have developed and tested Preferred Architectures (PAs) for the following deployment scenarios:

- **On-premises deployment** — All collaboration services are deployed and managed on the customer's premises.
- **Hybrid deployment** — Some collaboration services are deployed on-premises, while others are hosted in the cloud.
- **Cloud deployment** — All collaboration services are deployed and managed in the Cloud

Cisco Preferred Architectures (PAs) provide tested and recommended deployment models for the Enterprise market segment based on common use cases. They incorporate a subset of products from the Cisco Collaboration portfolio that are best suited for the Enterprise and defined use cases. These deployment models are prescriptive and built to scale with an organization as its business needs change. This prescriptive approach simplifies the integration of multiple system-level components.

The PAs service the **Enterprise**, large deployments with 1,000 or more users. The mid-market or Small to medium deployments with up to 1,000 users is no longer differentiated from the Enterprise market segment in the Preferred Architectures.

To help partners and customers decide which Preferred Architecture to choose, and to provide guidance on how best to deploy each PA, we have written the following types of documentation, as represented in [Figure 1](#):

- **Design Overview Guides** — Describe the main components and their roles within the Preferred Architectures. They are pre-sales documents intended to help customers and sales teams select the Preferred Architecture that best fits their requirements.
- **Cisco Validated Design (CVD) Guides** — Are post-sales documents that describe the Preferred Architectures in detail, provide design and deployment recommendations and best practices, and outline the PA deployment procedures and steps at a high level.
- **Alternative Design Guides** — Are post-sales documents that describe optional designs that can be deployed as alternatives to the Preferred Architectures described in the PA overview guides and CVDs. The alternative design may start with the main PA as a foundation and build upon it; therefore, each alternative design guide may be used in conjunction with its corresponding PA overview guide and CVD. In some cases the Alternative Design Guides can be used as standalone guides.

Figure 1 Preferred Architecture Documentation

Current Documents

The following documents describe the current Preferred Architecture.

PA for Enterprise Deployments

On-Premises Deployments

- Overview (pre-sales): [Preferred Architecture for Cisco Collaboration 14 On-Premises Deployments, Design Overview \(New - May 21, 2021\)](#)
- CVD (post-sales): [Preferred Architecture for Cisco Collaboration 14 Enterprise On-Premises Deployments, CVD \(New - May 21, 2021\)](#)

Hybrid Deployments

- Overview (pre-sales): [Preferred Architecture for Cisco Webex Hybrid Services, Design Overview \(New - Updated - October 22, 2021\)](#)
- CVD (post-sales): [Preferred Architecture for Cisco Webex Hybrid Services, CVD \(New - Updated - October 22, 2021\)](#)

Cloud Deployments

- Whitepaper (post-sales): [Improving Quality of Experience for Webex in Work from Home Environments \(New - December 17, 2020\)](#)

Alternative Design Guides

Are post-sales documents that describe optional designs that can be deployed as alternatives to the Preferred Architectures described in the PA overview guides and CVDs. The alternative design may start with the main PA as a foundation and build upon it; therefore, each alternative design guide may be used in conjunction with its corresponding PA overview guide and CVD. In some cases the Alternative Design Guides can be used as standalone guides:

Webex Edge

- [Cisco Preferred Architecture for Webex Edge Connect \(July 2021\)](#)
- [Cisco Preferred Architecture for Webex Edge Video Mesh \(July 2021\)](#)
- [Cisco Preferred Architecture for Webex Edge Audio \(July 2021\)](#)

Miscellaneous

- [Private Network Connect for Webex Calling Multi-Tenant \(January 2022\)](#)
- [Media Optimization with ICE Enablement in Cisco Enterprise Collaboration Preferred Architecture 12.5 \(May 2019\)](#)
- [Cisco Preferred Architecture for Webex Calling Overview \(October 2021\)](#)

Foundational Design Guides

- [Cisco Collaboration System 12.x Solution Reference Network Designs \(SRND\)](#)

Archive Documents

The following documents describe earlier versions of the Preferred Architectures.

Enterprise Deployments

Cisco Collaboration System Release (CSR) 12.x
