

Cisco Unity Express Virtual Feature Roadmap

This roadmap lists the features documented in the Cisco Unity Express Virtual Installation Guide 9.0.x and maps them to the chapters in which they appear.

For the latest feature information and caveats, see [Release Notes for Cisco Unity Express Virtual Release 9.0](#).

- [Feature and Release Support](#) , on page 1

Feature and Release Support

The below table lists the Cisco Unity Express Virtual version that introduced support for a given feature or enhancement. Unless noted otherwise, subsequent versions of Cisco Unity Express Virtual software also support that feature. Only features that were introduced or modified in Cisco Unity Express Virtual 9.0 or a later version appear in the table.

Table 1: Supported Cisco Unity Express Virtual Features

Version	Feature Name	Feature Description	Where Documented
Cisco Unity Express Virtual 9.0.5			
9.0.5	Support for Cisco Smart Software Licensing	Provides support for Cisco Smart Software Licensing. CSL licensing is no longer supported.	Cisco Unity Express Virtual Licensing
Cisco Unity Express Virtual 9.0.3			
9.0.3	Support for Cisco Unified Communications Manager 11.5	Provides support for Cisco Unified Communications Manager 11.5 and later versions.	Cisco Unity Express Virtual Compatibility Matrix
9.0.3	Initial Setup Wizard Bypass	Provides support to bypass the initial setup wizard during post installation configuration process.	Configure Cisco Unity Express Virtual after Deployment

Version	Feature Name	Feature Description	Where Documented
9.0.3	End of Support for License Activation Commands	The commands license activate voicemail mailboxes , and license activate ports are not supported from Cisco Unity Express Virtual 9.0.3 onwards. The license for mailboxes and ports are enabled by default.	Cisco Unity Express Virtual Licensing
Cisco Unity Express Virtual 9.0.2			
9.0.2	Support of Second Interface	Provides support of second interface for IP configuration on Cisco 4000 Series Integrated Services Routers KVM Service Containers.	Install and Configure the Cisco Unity Express Virtual OVA on KVM Service Containers
9.0.2	License Enforcement Removal	The requirement to install permanent license is removed. Cisco Unity Express Virtual continues to function normally even after the evaluation license expires.	Activate Evaluation Licenses
Cisco Unity Express Virtual 9.0			
9.0	Configure Cisco Unity Express Virtual using CLI	Provides support to configure Cisco Unity Express Virtual using the Command Line Interface (CLI), with your SSH user credentials. For example: ssh adminUser@CUE-IP.	Install and Configure the Cisco Unity Express Virtual OVA on KVM Service Containers
9.0	New Hardware Supported in Cisco Unity Express Virtual 9.0	Provides Cisco Unity Express Virtual Software support for ESXi on Cisco Unified Computing System (Cisco UCS) and Cisco UCS E-Series Server modules.	Overview of Installation Steps

Version	Feature Name	Feature Description	Where Documented
9.0	New Software Supported in Cisco Unity Express Virtual 9.0	Provides support for installing Cisco Unity Express Virtual software on the Cisco 4000 Series Integrated Services Routers KVM Service Containers.	Overview of OVA Installation Steps on KVM Service Container
