Release Notes for Cisco Business Mobile iOS app, Version 1.4.3

First Published: 2022-08-15

Last Modified: 2023-01-10

Introduction

These release notes describe the recommended practices and known issues that apply to software version 1.4.2 of the Cisco Business Mobile app.

What's New in Cisco Business Mobile iOS app Version 1.4.3

Cisco Business Mobile app version 1.4.3 introduces the following new features and changes.

- Improved switch port display & configurations.
- Delete single or multiple sites.
- Support for additional Wi-Fi options.
- Enhanced password error message.
- Get notified about scanned devices pending deployment.

System Requirements for Cisco Business Mobile app

The Cisco Business Mobile app is supported for Apple iOS-based devices running iOS version 13.0 and above. The following devices may be managed by the Cisco Business Mobile app:

- Cisco Business 220 Series Smart Switches
- Cisco Business 250 Series Smart Switches
- Cisco Business 350 Series Managed Switches
- Cisco Business 100 Series Access Points
- Cisco Business 100 Series Mesh Extenders
- Cisco Business 200 Series Access Points

Note Cisco Business 350 Series switches with 10Gb Ethernet switch ports and a dedicated out of band (OOB) management port are not able to be installed and configured using the app. Affected models include: CBS350-8XT, CBS350-12XT, CBS350-24XT, CBS350-48XT-4X, CBS350-12XS, CBS350-24XS, CBS350-16XTS, and CBS350-24XTS.

Limitations and Restrictions

The Cisco Business Mobile app is subject to the following limitations and restrictions:

- For devices to be managed by the Cisco Business Mobile app, they must be in an unconfigured state before being added to the site and configured by the app. If a device has been previously configured by any means, it should be reset back to an unconfigured state (factory default) before it is configured by the app.

- Cisco Business switches need to connect to an existing Wi-Fi network to be managed by Cisco Business mobile app. Please refer to the quick start guide that comes with the switches for detailed instructions.

- The Cisco Business Mobile app is not currently optimized for the iPad. The app may be used with an iPad, but will operate in iPhone compatibility mode.

Caveats for Release 1.4.3

Release Date: December 2022

Table 1: Resolved Caveats

Caveat ID Number	Headline
CSCwc63099	A precise failure info was displayed when the password didn't comply with the complexity rules.
