

# Peer-to-Peer Protocol and Application Detection Support

This appendix lists all the protocols and applications currently supported by Cisco ASR 5500 ADC.

- [Supported Protocols and Applications, on page 1](#)

## Supported Protocols and Applications

This section lists all the supported P2P protocols, sub-protocols, and the applications using these protocols.

### Important

Please note that various client versions are supported for the protocols. The client versions listed in the table below are the latest supported version(s).

### Important

Please note that the release version in the **Supported from Release** column has changed for protocols/applications that are new since the ADC plugin release in August 2015. This will now be the ADC Plugin Build number in the *x.xxx.xxx* format. The previous releases were versioned as 1.1 (ADC plugin release for December 2012 ), 1.2 (ADC plugin release for April 2013), and so on for consecutive releases.

## New in this Release

This section lists the supported P2P protocols, sub-protocols and applications introduced in the ADC Plugin release for January 31, 2019.

Protocol / Application	Client	Client Version	Group	Classification	Supported from Release
Ohio FM	Ohio FM(Android)	—	Streaming	Unclassified Streaming-audio Streaming-video	ADC Plugin 2.31.1033
	Ohio FM (iOS)	—			
	Ohio FM (Web)	—			

Protocol / Application	Client	Client Version	Group	Classification	Supported from Release
Radio.com	Radio.com (Android)	7.16.3	Streaming	Unclassified	ADC Plugin 2.31.1033
	Radio.com (iOS)	7.16.10		Streaming-audio	
	Radio.com (Web)	—		Streaming-video	
Soma FM	Soma FM (Android)	—	Streaming	Streaming-audio	ADC Plugin 2.31.1033
	Soma FM (iOS)	—		Unclassified	
	Soma FM (Web)	—			
My Mixtapez	My Mixtapez (Android)	7.8.5	Streaming	Streaming-audio	ADC Plugin 2.31.1033
	My Mixtapez (iOS)	7.5.6		Streaming-video	
	My Mixtapez (Web)	—		Unclassified	
Jango	Jango (Android)	6.3.5	Streaming	Streaming-audio	ADC Plugin 2.31.1033
	Jango (iOS)	5.4.4		Unclassified	
	Jango (Web)	—			

## All Supported Protocols and Applications

This section lists all the supported P2P protocols, sub-protocols and applications supported until ADC Plugin release on December 3, 2018.

Protocol / Application	Client	Client Version	Group	Classification	Supported from Release
120Sports	120Sports (Android)	1.6	Streaming	Streaming-video	ADC Plugin 2.21.912
	120Sports (iOS)	1.8.9		Unclassified	
	120Sports (Windows)	—			

Protocol / Application	Client	Client Version	Group	Classification	Supported from Release

## Port-based Protocols

This section lists the port-based protocols currently supported by Cisco ADC. These are TCP and UDP protocols that are classified according to their well-known ports. The default TCP and UDP ports of each of the protocols are listed. As part of IP Protocol and Transport Port Mapping, a static mapping of transport port to strings is provided in EDRs.

Protocol Name	TCP Ports	UDP Ports
3COM-AMP3	629	629
3COM-TSMUX	106	106
914C/G	211	211

## IP Protocols

This chapter lists the IP protocols supported by Cisco ADC. These are protocols (such as ICMP), other than TCP and UDP protocols that are identified according to the IP protocol number of the transaction. For each protocol, the protocol index number in the IP header is provided. As part of IP Protocol and Transport Port Mapping, a static mapping of IP protocol to strings is provided in EDRs.

IP Protocol Number	Protocol Name
0	HOPOPT
1	ICMP
2	IGMP
3	GGP
4	IP-v4
5	ST
