## show module

**Table 1: show module Command Output Descriptions**

| Field                | Description                                                                                                       |
|----------------------|-------------------------------------------------------------------------------------------------------------------|
| Priority             | Displays the module priority number.                                                                              |
| Version              | Displays the version number of the plugin.                                                                        |
| Loaded               | Displays the status of the plugin, if loaded or not (yes/no).                                                     |
| Location             | Displays the location where the patch is copied.                                                                  |
| Update/Rollback Time | Displays the timestamp when the plugin was updated or rolled back.                                                |
| Status               | Displays the status of plugin installation (success/failed). An error message is displayed if installation fails. |
