ACS Subscriber Base Configuration Mode Commands

The ACS Subscriber Base Configuration Mode is used to configure Active Charging Service subscriber base.

Command Modes
Exec > ACS Configuration > ACS Subscriber Base Configuration

active-charging service *service_name* **> subscriber-base** *subs_base_name*

Entering the above command sequence results in the following prompt:

```
[local]host_name(config-subscriber-base)#
```

👉

Important
The commands or keywords/variables that are available are dependent on platform type, product version, and installed license(s).

end

Exits the current configuration mode and returns to the Exec mode.

Product
All

Privilege
Security Administrator, Administrator

Syntax Description
end

Usage Guidelines
Use this command to return to the Exec mode.

exit

Exits the current mode and returns to the parent configuration mode.

Product	All
Privilege	Security Administrator, Administrator
Syntax Description	`exit`
Usage Guidelines	Use this command to return to the parent configuration mode.

priority

This command allows you to assign priority to the service-scheme association within a subscriber base.

Product	ACS
Privilege	Security Administrator, Administrator
Command Modes	Exec > ACS Configuration > ACS Subscriber Base Configuration
	active-charging service *service_name* **> subscriber-base** *subs_base_name*
	Entering the above command sequence results in the following prompt:
	`[local]`*host_name*`(config-subscriber-base)#`
Syntax Description	`priority` *priority* `subs-class` *subs_class_name* `bind service-scheme` *serv_scheme_name* `no priority` *priority*

no

If previously configured, deletes the specified configuration.

priority

Specifies the priority to be assigned to service-scheme.

priority must be an integer from 1 through 127.

subs-class *subs_class_name*

Specifies the subscriber class definition to a subscriber base.

subs_class_name must be an alphanumeric string of 1 through 63 characters.

bind

Specifies the association of service-scheme within subscriber class.

service-scheme *serv_scheme_name*

Specifies the service scheme definition.

serv_scheme_name must be an alphanumeric string of 1 through 63 characters.

Usage Guidelines Use this command to assign priority to the service-scheme association within a subscriber base. This priority has to be unique within a subscriber base.

Example

The following command is configured to set priority as *5* to associate service-scheme named *ss1*:

```
priority 5 subs-class sc1 bind service-scheme ss1
```
