

# Gateway Selection Profile Configuration Mode Commands

---

## Command Modes

Exec > Global Configuration > Gateway Selection Profile Configuration

**configure** > **gateway-selection-profile** *profile\_name*

Entering the above command sequence results in the following prompt:

```
[local]host_name(gw-profile-profile_name)#
```

## Important

Available commands or keywords/variables vary based on platform type, product version, and installed license(s).

- [description](#), on page 2
- [do show](#), on page 3
- [end](#), on page 4
- [exit](#), on page 5
- [zone](#), on page 6

# description

---

**Product** ePDG

---

**Privilege** Security Administrator, Administrator

---

**Command Modes** Exec > Global Configuration > Gateway Selection Profile Configuration

**configure > gateway-selection-profile** *profile\_name*

Entering the above command sequence results in the following prompt:

```
[local]host_name(gw-profile-profile_name) #
```

---

**Syntax Description** **description** *descriptive\_string*

**remove description**

**remove**

***descriptive\_string***

*descriptive\_string* must be an alphanumeric string from 1 to 100 characters.

---

**Usage Guidelines** Use this command to

## Example

Use the following command to

# do show

Executes all **show** commands while in Configuration mode.

---

**Product**

All

---

**Privilege**

Security Administrator, Administrator

---

**Syntax Description**

**do show**

---

**Usage Guidelines**

Use this command to run all Exec mode **show** commands while in Configuration mode. It is not necessary to exit the Config mode to run a **show** command.

The pipe character | is only available if the command is valid in the Exec mode.

---

**Caution**

There are some Exec mode **show** commands which are too resource intensive to run from Config mode. These include: **do show support collection**, **do show support details**, **do show support record** and **do show support summary**. If there is a restriction on a specific **show** command, the following error message is displayed:

```
Failure: Cannot execute 'do show support' command from Config mode.
```

---

**end**

# end

Exits the current configuration mode and returns to the Exec mode.

---

**Product** All

---

**Privilege** Security Administrator, Administrator

---

**Syntax Description** **end**

---

**Usage Guidelines** Use this command to return to the Exec mode.

# exit

Exits the current mode and returns to the parent configuration mode.

---

**Product**

All

---

**Privilege**

Security Administrator, Administrator

---

**Syntax Description**

**exit**

---

**Usage Guidelines**

Use this command to return to the parent configuration mode.
