

# ACS Service Scheme Trigger Configuration Mode Commands

---

The ACS Service Scheme Trigger Configuration Mode is used to configure the set of triggers to be handled under the associated service-scheme.

---

## Command Modes

Exec > ACS Configuration > ACS Service Scheme Configuration > ACS Service Scheme Trigger Configuration  
**active-charging service** *service\_name* > **service-scheme** *service\_scheme\_name* > **trigger** { **flow-create** | **loc-update** | **sess-setup** }

Entering the above command sequence results in the following prompt:

```
[local] host_name(config-servscheme-trigger) #
```

---

## Important

The commands or keywords/variables that are available are dependent on platform type, product version, and installed license(s).

---

- [end, on page 1](#)
- [exit, on page 2](#)
- [priority, on page 2](#)

## end

Exits the current configuration mode and returns to the Exec mode.

---

## Product

All

---

## Privilege

Security Administrator, Administrator

---

## Syntax Description

**end**

---

## Usage Guidelines

Use this command to return to the Exec mode.

## exit

Exits the current mode and returns to the parent configuration mode.

---

**Product**

All

---

**Privilege**

Security Administrator, Administrator

---

**Syntax Description**

**exit**

---

**Usage Guidelines**

Use this command to return to the parent configuration mode.

## priority

This command allows you to assign priority to the trigger events in service-scheme.

---

**Product**

ACS

---

**Privilege**

Security Administrator, Administrator

---

**Command Modes**

Exec> ACS Configuration> ACS Service Scheme Configuration> ACS Service Scheme Trigger Configuration  
**active-charging service** *service\_name* > **service-scheme** *service\_scheme\_name* > **trigger** { **flow-create** | **loc-update** | **sess-setup** }

Entering the above command sequence results in the following prompt:

```
[local]host_name(config-servscheme-trigger)#
```

---

**Syntax Description**

**priority** *priority* **trigger-condition** *trigger\_condn\_name* **trigger-action** *trigger\_action\_name*  
**no priority** *priority*

**no**

If previously configured, deletes the specified configuration.

**priority**

Specifies the priority to be assigned to the trigger events.

*priority* must be an integer from 1 through 127.

**trigger-condition** *trigger\_condn\_name*

Specifies the trigger condition definition.

*trigger\_condn\_name* must be an alphanumeric string of 1 through 63 characters.

**trigger-action** *trigger\_action\_name*

Specifies the trigger action definition.

*trigger\_action\_name* must be an alphanumeric string of 1 through 63 characters.

---

**Usage Guidelines**

Use this command to assign priority to the trigger events configured in service-scheme. The priority must be unique within a trigger.

**Example**

The following command is configured to set priority as *10* with respective trigger condition *tc1* and trigger action *tal*:

```
priority 10 trigger-condition tc1 trigger-action tal
```

■ priority
