

MME Manager Configuration Mode Commands

 The MME Manager Configuration Mode is used to configure the MME Manager(s).

 Command Modes
 Exec > Global Configuration > MME Manager Configuration

 configure > mme-manager
 Entering the above command sequence results in the following prompt:

 [context_name]host_name(mme-manager)#
 Important

 Important
 The commands or keywords/variables that are available are dependent on platform type, product version, and installed license(s).

 • congestion-control, on page 1
 • do show, on page 2

 • end, on page 3
 • exit, on page 3

congestion-control

This command enables or disables CPU Usage based congestion control for MME Manager(s), and configures congestion parameters (CPU Threshold and Tolerance values).

Product	MME	
Privilege	Administrator	
Command Modes	Exec > Global Configuration > MME Manager Configuration	
	configure > mme-manager	
	Entering the above command sequence results in the following prompt:	
	<pre>[local]host_name(mme-manager)#</pre>	
Syntax Description	<pre>congestion-control cpu-utilization [threshold threshold_value tolerance tolerance_value] no congestion-control [cpu-utilization]</pre>	

I

	no
	Enables or disables congestion control.
	cpu-utilization
	Specifies the average CPU utilization in %.
	threshold <i>threshold_value</i>
	Specifies the thresholds for various resources. <i>threshold_value</i> must be an integer from 1 to 100.
	Default: 90%
	tolerance <i>tolerance_value</i>
	Specifies the tolerance limit. <i>tolerance_value</i> must be an integer from 1 to 100.
	Default: 10
Usage Guidelines	Use this command to enable or disable CPU Usage based congestion control for MME Manager(s), and configure congestion parameters (CPU Threshold and Tolerance values). This command is enabled by default.
	See the Auto Disabling of eNodeB Paging chapter in the MME Administration Guide for more information.
	Example
	The following command enables congestion control with threshold value in % set to 90 and tolerance value set to 10 :
	congestion-control cpu-utilization threshold 90 tolerance 10

do show

Executes all **show** commands while in Configuration mode.

Product	All
Privilege	Security Administrator, Administrator
Syntax Description	do show
Usage Guidelines	Use this command to run all Exec mode show commands while in Configuration mode. It is not necessary to exit the Config mode to run a show command.
	The pipe character is only available if the command is valid in the Exec mode.

Â

Caution There are some Exec mode **show** commands which are too resource intensive to run from Config mode. These include: **do show support collection**, **do show support details**, **do show support record** and **do show support summary**. If there is a restriction on a specific **show** command, the following error message is displayed:

Failure: Cannot execute 'do show support' command from Config mode.

end

	Exits the current configuration mode and returns to the Exec mode.
Product	All
Privilege	Security Administrator, Administrator
Syntax Description	end
Usage Guidelines	Use this command to return to the Exec mode.

exit

Exits the current mode and returns to the parent configuration mode.

Product	- All
Privilege	Security Administrator, Administrator
Syntax Description	exit
Usage Guidelines	Use this command to return to the parent configuration mode.
