

About this Guide

This preface describes the IPSG Administration Guide, how it is organized, and its document conventions.

The IP Services Gateway (IPSG) is a StarOSTM application that runs on Cisco[®] ASR 5500 and virtualized platforms.

- Conventions Used, on page i
- Supported Documents and Resources, on page iii

Conventions Used

The following tables describe the conventions used throughout this documentation.

| Notice Type | Description |
|------------------|--|
| Information Note | Provides information about important features or instructions. |
| Caution | Alerts you of potential damage to a program, device, or system. |
| Warning | Alerts you of potential personal injury or fatality. May also alert you of potential electrical hazards. |

| Typeface Conventions | Description |
|--------------------------------------|--|
| Text represented as a screen display | This typeface represents displays that appear on your terminal screen, for example: |
| | Login: |
| Text represented as commands | This typeface represents commands that you enter, for example: |
| | show ip access-list |
| | This document always gives the full form of a command in lowercase letters. Commands are not case sensitive. |

| Typeface Conventions | Description |
|---|--|
| Text represented as a command variable | This typeface represents a variable that is part of a command, for example: |
| | show card slot_number |
| | slot_number is a variable representing the desired chassis slot number. |
| Text represented as menu or sub-menu names | This typeface represents menus and sub-menus that you access within a software application, for example: |
| | Click the File menu, then click New |

| Command Syntax Conventions | Description |
|----------------------------|---|
| { keyword or variable } | Required keyword options and variables are those components that are required to be entered as part of the command syntax. |
| | Required keyword options and variables are surrounded by grouped braces { }. For example: |
| | <pre>sctp-max-data-chunks { limit max_chunks mtu-limit }</pre> |
| | If a keyword or variable is not enclosed in braces or brackets, it is mandatory. For example: |
| | snmp trap link-status |
| [keyword or variable] | Optional keywords or variables, or those that a user may or may not choose to use, are surrounded by brackets. |
| | Some commands support multiple options. These are documented within braces or brackets by separating each option with a vertical bar. |
| | These options can be used in conjunction with required or optional keywords or variables. For example: |
| | action activate-flow-detection { intitiation termination } |
| | or |
| | <pre>ip address [count number_of_packets size number_of_bytes]</pre> |

Supported Documents and Resources

Related Common Documentation

The most up-to-date information for this product is available in the product Release Notes provided with each product release.

The following common documents are available:

- AAA Interface Administration and Reference
- Command Line Interface Reference
- GTPP Interface Administration and Reference
- Installation Guide (hardware dependent)
- VPC-SI System Administration Guide
- Release Change Reference
- SNMP MIB Reference
- Statistics and Counters Reference
- System Administration Guide (hardware dependent)
- Thresholding Configuration Guide

Related Product Documentation

The following product documents are also available and work in conjunction with IPSG:

- ADC Administration Guide
- ECS Administration Guide
- GGSN Administration Guide
- HA Administration Guide
- PDSN Administration Guide
- P-GW Administration Guide

Obtaining Documentation

The most current Cisco documentation is available on the following website:

http://www.cisco.com/cisco/web/psa/default.html

Use the following path selections to access the IPSG documentation:

Products > Wireless > Mobile Internet> Network Functions > Cisco IPSG IP Services

Contacting Customer Support

Use the information in this section to contact customer support.

Refer to the support area of http://www.cisco.com for up-to-date product documentation or to submit a service request. A valid username and password are required to access this site. Please contact your Cisco sales or service representative for additional information.
