Applicable Platform(s)	<ul style="list-style-type: none">• ASR 5500• VPC-DI• VPC-SI
Feature Default	Enabled - Always-on
Related Changes in This Release	Not Applicable
Related Documentation	<i>Ultra IoT C-SGN Administration Guide</i>

Revision History

Revision Details	Release
First Introduced	21.20.26

Feature Changes

Previous Behavior: In MME, when UE is in Idle mode, Connection Release (CMR - Connection Management Request) received from SCEF was not supported.

New Behavior: In this StarOS 21.20.26 release, MME supports the Connection Release (CMR - Connection Management Request) received from SCEF when UE in the Idle mode.

Without PDN support, if Connection Release is requested from SCEF for the last PDN in the UE Idle mode, MME initiates:

- Paging when ppf flag was TRUE
- Detach with Re-Attach required towards UE after successful completion of paging.
