

# WSG Lookup Priority List Configuration Mode Commands

#### **Command Modes**

The Wireless Security Gateway Lookup Priority List Configuration Mode is used to set the priority of subnet components for site-to-site tunnels. This is a Security Gateway (SecGW) feature [VPC-VSM only].

Exec > Global Configuration > WSG-Lookup Priority List Configuration

#### configure > wsg-lookup

Entering the above command sequence results in the following prompt:

host\_name(config-wsg-lookup)#

#### **Important**

The commands or keywords/variables that are available are dependent on platform type, product version, and installed license(s).

- do show, on page 2
- end, on page 3
- exit, on page 4
- priority, on page 5

### do show

Executes all **show** commands while in Configuration mode.

**Product** 

All

**Privilege** 

Security Administrator, Administrator

**Syntax Description** 

do show

**Usage Guidelines** 

Use this command to run all Exec mode **show** commands while in Configuration mode. It is not necessary to exit the Config mode to run a **show** command.

The pipe character | is only available if the command is valid in the Exec mode.

#### Caution

There are some Exec mode **show** commands which are too resource intensive to run from Config mode. These include: **do show support collection**, **do show support details**, **do show support record** and **do show support summary**. If there is a restriction on a specific **show** command, the following error message is displayed:

Failure: Cannot execute 'do show support' command from Config mode.

## end

Product

Privilege

	Exits the current configuration mode and returns to the Exec mode.
_	All
_	Security Administrator, Administrator

Syntax Description	end
Oyntax Description	

Use this command to return to the Exec mode.

## exit

Exits the current mode and returns to the parent configuration mode.

Product All

Privilege Security Administrator, Administrator

Syntax Description exit

**Usage Guidelines** Use this command to return to the parent configuration mode.

## priority

Sets the priority level for a WSG subnet combination (source and destination netmasks). It also disables an existing priority for a specified subnet combination. (VPC-VSM only).

#### **Product**

SecGW

#### **Privilege**

Security Administrator

#### **Command Modes**

Exec > Global Configuration > WSG-Lookup Priority List Configuration

#### configure > wsg-lookup

Entering the above command sequence results in the following prompt:

#### **Syntax Description**

[ no ] priority\_level source-netmask subnet\_size destination netmask subnet\_size

#### no

Disables the priority for the specified subnet combination.

#### priority priority\_level

Specifies the priority level for the subnet combination as an integer from 1 through 6.

#### source-netmask subnet\_size

Specifies the subnet size for the source netmask as an integer from 1 through 128.

#### destination netmask subnet\_size

Specifies the subnet size for the destination netmask as an integer from 1 through 128.

#### **Usage Guidelines**

Use this command to set the priority level for a WSG subnet combination (source and destination netmasks). It can also be used to disable an existing priority for a specified subnet combination.

#### **Example**

The following command sets a priority of 2 for a subnet combination with a /32 subnet size.

priority 2 source-netmask 32 destination netmask 32

priority
