

# Security Configuration Mode Commands

The Security configuration mode is a sub-mode of the Global Configuration mode. This sub-mode enables you to define or modify the connection with the Talos Intelligence content-filtering server and configure URL categorization parameters.

**Command Modes** Exec > Global Configuration > Security Configuration  
**configure > security**

Entering the above command sequence results in the following prompt:

```
[local]host_name(config-security) #
```

**Important** The commands or keywords/variables that are available are dependent on platform type, product version, and installed license(s).

- [category, on page 1](#)
- [end, on page 2](#)
- [exit, on page 2](#)
- [server, on page 2](#)

## category

Adds or removes a URL categorization server.

**Important** This is a license-controlled feature. For more information, contact your Cisco account or support representative.

**Product** All

**Privilege** Security Administrator, Administrator

**Command Modes** Exec > Global Configuration > Security Configuration  
**configure > security**

Entering the above command sequence results in the following prompt:

end

```
[local]host_name(config-security)#
```

---

**Syntax Description**    **[ no ] category server** *server\_name*
**no**

Removes the specified URL categorization server.

***server\_name***Specifies the name of the URL categorization server. *server\_name* must be an alpha and/or numeric string from 1 through 31 characters that is case sensitive.

---

**Usage Guidelines**    Use this command to create or remove a URL categorization server from the Security configuration mode.

## end

Exits the current configuration mode and returns to the Exec mode.

---

**Product**    All

---

**Privilege**    Security Administrator, Administrator

---

**Syntax Description**    **end**

---

**Usage Guidelines**    Use this command to return to the Exec mode.

## exit

Exits the current mode and returns to the parent configuration mode.

---

**Product**    All

---

**Privilege**    Security Administrator, Administrator

---

**Syntax Description**    **exit**

---

**Usage Guidelines**    Use this command to return to the parent configuration mode.

## server

This command creates or specifies a Talos Security Intelligence (TSI) server entry and enters the TSI Server Configuration mode.

---

**Important**    This is a license-controlled feature. For more information, contact your Cisco account or support representative.
