Related Changes in This Release	Not Applicable
Related Documentation	Not Applicable

#### **Revision History**

Revision Details	Release
ePDG skips the unsupported container and continue parsing the next container in APCO.	21.28.m0

### **Feature Changes**

**Previous Behavior**: ePDG stops parsing when it encounters an unknown container ID in Additional Protocol Configuration Options (APCO) in Create Session Response.

I

**New Behavior**: ePDG allows you to skip the unsupported container and continue parsing the next container in APCO.
