FlexConnect AP Easy Admin

FlexConnect AP Easy Admin

The FlexConnect AP Easy Admin enables unified AP GUI access and configure the following parameters to connect to the controller:

- AP IP address: Static or DHCP IP address.

- WLC IP address priming: Ablity to configure the primary, secondary, and tertiary WLC, and their IP addresses.

- CAPWAP preferred DNS configuration.

- PPPoE: Enabling of FlexConnect submode and configuring the username and password for PPPoE server authentication.

- TFTP: AP image upgrade through TFTP.

Configuring FlexConnect AP Easy Admin on the Controller (GUI)

Procedure

Step 1 Choose **Wireless** > **Access Points** > **Global Configuration**.

The **Global Configuration** page is displayed.

Step 2 In the **AP Easy Configuration** section, check the **Enable Global AP Easy Configuration** check box.

Note   Easy Configuration is only applicable to the following Cisco Wave 1 (IOS-based) APs: 702, 1530, 1700, 2700, and 3700.

Step 3 Click **Apply**.
