

Read Me First—CiscoWorks2000 for Mobile Wireless Release 1.1

This purpose of this document is:

- To introduce the CiscoWorks2000 for Mobile Wireless product.
- To list and describe the product components that are included in the product package.
- To list and describe the product components that are not included in the package but that might be prerequisites for installation and use of this product.
- To provide procedures and guidelines for installing all components of CiscoWorks2000 for Mobile Wireless 1.1 on a Solaris 2.7 platform.
- To provide a list of related product documentation and instructions on where to access the documentation.

Overview of CiscoWorks2000 for Mobile Wireless

CiscoWorks2000 for Mobile Wireless (CW4MW) is a suite of EMS applications that enhances the delivery of new mobile wireless services leveraging Cisco Mobility Platforms.

Table 1 describes the CW4MW components.

Table 1 CW4MW Applications and Functions

Application	CW4MW Component	Function
LAN Management	CiscoWorks2000 LMS bundle, April 2001 refresh Not included in this package.	The LMS Bundle provides operationally focused applications for configuration, fault monitoring, and troubleshooting local networks. A browser interface provides easy-to-use access to topology maps, configuration services, and important system, device, and performance information. Because these applications are browser-accessible, administrators now have the freedom to access network tools anywhere from within the network. Additional detail about the CiscoWorks2000 LMS bundle and the RWAN bundle is provided at the following URL: http://www.cisco.com/warp/public/44/jump/ciscoverks.shtml
Routed WAN Management	CiscoWorks2000 RWAN bundle, April 2001 refresh Not included in this package.	The Routed WAN Management Solution Bundle provides a collection of powerful applications to configure, administer, monitor, and troubleshoot routed wide-area networks, thereby dramatically reducing their complexity. This suite of solution applications provides increased visibility into network behavior and quickly identifies performance bottlenecks and long-term performance trends. It also provides sophisticated configuration tools to optimize bandwidth and utilization across expensive and critical WAN links in the network. Additional detail about the CiscoWorks2000 LMS bundle and the RWAN bundle is provided at the following URL: http://www.cisco.com/warp/public/44/jump/ciscoverks.shtml
Access Point Name Management	Cisco Access Point Name Manager 1.1 (For GPRS networks only) Included in ApnMan package.	The Cisco APN Manager is a carrier-class provisioning solution that automates the configuration process of APNs within a GPRS network to support centralized GGSN access. The Cisco APN Manager provides flow-through management of APNs within the GPRS Support Node (GSN) complex to support centralized Public Data Network (PDN) access. It provides a CORBA interface to view and configure APN profiles in the GGSN and Domain Name Server (DNS) resource record from Network Management Systems (NMS) and other 3rd party Operations Support Systems (OSS).
Fault Mediation	Cisco Mobile Wireless Fault Mediator (MWFM) 2.1: Included in MWFM Package.	The Mobile Wireless Fault Mediator provides alarm filtering and correlation to the Gateway GPRS Support Node (GGSN) routers in GPRS networks or Packet Data Serving Node routers in CDMA2000 networks and their neighboring Catalyst switches. In addition, it seamlessly integrates with Network and Service-layer Fault OSS to provide a complete network monitoring solution.

What Your Cisco APN Manager and MWFM Product Package Contains

The Cisco APN Manager Package contains:

- Read Me First—CiscoWorks2000 for Mobile Wireless Release 1.1 (this document)
- Warranty and Software License
- 1 CD:

The APN Manager CD contains the CSCOapnman package. The components for ApnMan are JRE1.2 and Visigenics 4.1 for Java, which are shared from CD-ONE. The process manager of CD-One will control the ApnMan

The MWFM product package contains:

- Read Me First—CiscoWorks2000 for Mobile Wireless Release 1.1 (this document)
- Release Notes for CiscoWorks2000 for Mobile Wireless Release 1.1
- Warranty and Software License
- 1 CD

The Mobile Wireless Fault Mediator CD contains the CSCOmwmfm package, which includes the third party components JRE1.2 for MWFM 2.1

If you have not yet received the MWFM license contact TAC. You can contact TAC by sending an email to tac@cisco.com with the following information:

- IP Address/Subnet mask of the workstation on which MWFM will be installed
- MWFM version you are planning to install
- Contact Person
- Name of the company
- Other Contact details (email address/telephone number)

Related Documentation

The CiscoWorks2000 for Mobile Wireless documentation set is available online at:

Installation Prerequisites

Table 2 lists the minimum server requirements for installing and running CiscoWorks2000 for Mobile Wireless.

Table 2 System Configuration Requirements

Requirement	Solaris Server
Hardware	Sun Ultra 60 workstations
Operating system	Solaris 2.7
Memory (RAM)	2 GB RAM
Available disk drive space	18 GB hard disk
Processor	2 x 450 MHz
Swap space	2 x RAM
Operating environment	CDE

CD-One from either the LMS or RWAN solution must be installed prior to MWFM and/or APN Manager installation.

CNR installation and configuration is also required for APN Manager. It is recommended to install the CNR Server on a different server.

License requirement for Mobile Wireless Fault Mediator 1.2

If you have not yet received the MWFM license contact TAC. You can contact TAC by sending an email to tac@cisco.com with the following information:

- IP Address/Subnet mask of the workstation on which MWFM will be installed
- MWFM version you are planning to install
- Contact Person
- Name of the company
- Other Contact details (email address/telephone number)

Table 3 shows the recommended order in which you should install CW4MW and related applications.

Table 3 Order of Installation

Task	For Detailed and Custom Installation, Refer To
1. Install CiscoWorks2000 CD One, 4th Edition. This typically takes about 40 minutes.	• <i>Installing and Setting Up CiscoWorks2000 CD One, 4th Edition.</i> • Release Notes for CiscoWorks2000 CD One, 4th Edition (for any last-minute updates).
2. Install CW4MW Components a. APN Manager - Installation takes 5 to 15 minutes. b. MWFM2.1 - Installation takes 5 to 15 minutes.	• This document, “Installing CiscoWorks2000 for Mobile Wireless” section on page 5.

Installing CiscoWorks2000 for Mobile Wireless

This section includes installation procedures for

- [Installing APN Manager, page 5](#)
- [Installing Mobile Wireless Fault Mediator 2.1, page 7](#)
- [Obtaining Documentation, page 45](#)

Installing APN Manager

Step 1 Insert the CD named APN Manager into the Solaris 2.7 machine.

Step 2 From the user prompt, enter the following command to change to the cdrom0 directory:

```
cd /cdrom/cdrom0
```

Step 3 Enter the following command to launch the install script:

```
./setup.sh
```

As the installation begins, the screen will display a welcome banner similar to the following and the installation process will scroll on the monitor:

```
=====
Started : Tue Jan 29 08:57:16 PST 2002

=====

```

Step 6 Enter the following command to change to the cdrom directory:

```
cd /cdrom
```

Step 7 Eject the APN Manager CD.

Configuring APN Manager

CNR Server (DNS) related information in APN Man Server:

-
- Step 1** Stop APN Man Server
- ```
/opt/CSCOpX/bin/pdterm ApnManServer
```
- Step 2** Enter CNR server (DNS) IP Address, CNR Admin User and CNR Admin Password in
- ```
/opt/CSCOpX/lib/classpath/config/ApnMan.cfg
```
- Step 3** Start Apn Man server
- ```
/opt/CSCOpX/bin/pdexec ApnManServer
```
- 

## Installing Mobile Wireless Fault Mediator 2.1

- 
- Step 1** Insert the Mobile Wireless Fault Mediator CD into the Solaris 2.7 machine.
- Step 2** From the user prompt, enter the following command to change to the cdrom0 directory:

```
cd /cdrom/cdrom0
```

- Step 3** Enter the following command to launch the install script:

```
./setup.sh
```

As the installation begins, the screen will display a welcome banner similar to the following and the installation process will scroll on the monitor:

```

=====
Finished: Wed Jan 23 14:13:36 PST 2002
=====
----- Software Install Tool Completed. -----
=====

```

- Step 5** The installation continues, and the progress is displayed on the screen.

If you have installed RTM or DFM, on the machine where you install MWFM, you will see a message similar to the following:

```

=====
----- Software Install Tool Completed. -----
=====
----- Possible Errors Encountered -----
WARNING: a datasource with the name cmf was already present. It will be replaced
WARNING: a datasource with the name ani was already present. It will be replaced

```

WARNING: Installation has detected Cisco DeviceFaultManager in the same machine. There are known SNMP trap reception issues when DFM and MWFM are in the same machine. To resolve this issue, Refer to Read Me First - CW4MW Bundle document.

When the installation is successfully completed, a message such as the following is displayed:

```
Installation of <CSCOmwmf> was successful.
application CSCOmwmf Mobile Wireless Fault Mediator
INFO: Configuring JRun properties...
syslog service starting.
INFO: Testing syslog: sending a msg to local0.debug...
INFO: waiting for 12 seconds for syslog to process a test message...
Opening /tmp/cscotmp/CmfAppPostInstall.log for logging
=====
Finished: Wed Jan 23 14:13:36 PST 2002
=====
----- Software Install Tool Completed. -----
=====
```

**Step 6** Enter the following command to change to the cdrom directory:

```
cd /cdrom
```

**Step 7** Eject the MWFM2.1 CD.

## Installing MWFM License

Copy the license file to `/opt/CSCOpX/objects/mwfm/license` directory. Make sure that the file is named as "RiverSoft.lic"

### Note

Store a backup copy of this License to reuse during instal/uninstall.

## MWFM Configuration Script

In previous release of MWFM, to get MWFM up and running, the user had to manually add SQL like configuration statements to eight different configuration files. Because of the SQL like syntax, it was bit difficult for the user to comprehend the MWFM configuration process. Manual editing of the configuration file caused numerous errors and failed attempts at configuring MWFM.

To alleviate the user of the cumbersome configuration process, a Configuration Script will be included. The Configuration script will provide an interactive interface to the user to accomplish MWFM configuration.

The user will be prompted to enter all the configuration data. The configuration script will take over the burden of modifying the configuration files.

The user will be able to start the configuration script by issuing the following commands:

```
cd /opt/CSCOpX/objects/mwfm
./configure_mwfm
```

The user will be interactively prompted to enter all the information needed to get MWFM up and running.

Here is a sample scenario where the user is trying to configure MWFM. The user input has been shown here in bold text.

```
mw-nms#./configure_mwfm

=====
==- Welcome to the Mobile Wireless Fault Mediator 2.1 Configurator .==
=====
You will need the following information to configure MWFM:
[1] Network Address(es)/Netmask(s) for all the networks that MWFM
will manage.
[2] Read Only SNMP Community strings on the devices.
[3] IP Address/Netmask,Telnet Username/Password,Login/Console Prompt
of your Catalyst switches.
[4] IP Address of the DNS Server (optional).
[5] Location of Syslog file.
[6] IP Addresses of the Host SNMP Managers set to receive SNMP Traps
from MWFM.
Please enter '?' at the prompt to get more info.
Please enter 'q' at the prompt to exit.
=====
Please enter the Network Address: 12.12.12.0
Please enter the Subnet mask for the above network : 255.255.255.0
Do you want to add more Networks? (y/n): n
The following SNMP Community Strings have been currently configured.
public
Do you want to change this config?(y/n): n
Do you want to add more Community Strings? (y/n): n
The following Syslog Files have been currently configured.
/var/adm/messages
Do you want to change this config?(y/n): n
Do you want to specify more Syslog Files? (y/n): n
Please enter the IP Address of the Network Management Station(NMS) that
will receive correlated SNMP Traps from MWFM: 172.19.26.19
Please enter port on which the NMS will be listening for traps: 162
Please enter the starting Sequence Id: 1
Please enter the Last Sequence Id: 100
Do you want to add more SNMP Trap receivers? (y/n): n
Do you wish to add Catalyst Switch Host Addresses to the configuration
? (y/n): y
Please enter the IP address of the Catalyst Switch: 12.12.12.4
Please enter the NetMask: 255.255.255.255
Please enter the Username: jdoe
Please enter the Password: secret
Please enter the Login Prompt: Login:
Please enter the Password Prompt: Password:
Please enter the Console Prompt: cat5k
Do you wish to add more Catalyst Switch Host Addresses to the
configuration ? (y/n): n
Please enter the IP address of the DNS Server: 172.19.25.200
The configuration script has gathered all the information needed to
completely configure MWFM.
```

```

Do you want to go ahead and update the configuration files (y/n): y
=====
INFO: MWFM Config Files Successfully updated !!!
INFO: Please use start_mwfm to start MWFM.
=====
----- Thank You for using MWFM 2.x Config Script.-----
=====

```

**Note**

All the user input will be validated. For example, at the Network Address prompt, the configuration script will verify that the user is indeed inputting network address and not some free form text string.

The user can enter “?” to get context sensitive help.

```

Please enter the Network Address: ?
Examples:
12.0.0.0
172.19.0.0
202.54.80.0
Please enter the Network Address:

```

The user can enter “q” to quit out of the Configuration Script. If the user quits out of the configuration process in the middle then all of the configuration data that user entered up to that point will be discarded.

```

Please enter the Subnet Mask: q
=====
Exiting MWFM Config Script ...
=====
----- Thank You for using MWFM 2.x Config Script.-----
=====

```

**Note**

All the current configuration will be imported from the various configuration files. Once imported, it will be presented to user for modification. The user may or may not modify the configuration. The user will also be presented with prompts to enter new configuration information.

## Starting MWFM

Source the shell file mwfm.kshrc

```

cd $RIV_HOME
. ./mwfm.kshrc

```

Copyright (c) 2001 by Cisco Systems Inc. All rights reserved.

INFO: Starting MWFM Processes ...

```

01/23/02 15:00:25 -> MWFM Watchdog Process started ...
01/23/02 15:00:26 -> MWFM Authentication Process started ...
01/23/02 15:00:27 -> MWFM Persistent Store started ...
01/23/02 15:00:28 -> MWFM Active Class Server started ...
Reading Active Object Classes ...
#####
#####
01/23/02 15:04:44 -> MWFM Model Server started ...
01/23/02 15:08:25 -> MWFM Discovery Process Started ...
#
01/23/02 15:08:42 -> MWFM Discovery Phase 1 of 4 started ...

```

```
#####
01/23/02 15:15:44 -> MWFM Discovery Phase 2 of 4 started ...

###
01/23/02 15:16:48 -> MWFM Discovery Phase 4 of 4 started (Final)...
#####
01/23/02 15:20:54 -> MWFM Discovery completed !!!
The following Devices and their Interfaces will be monitored by MWFM:
12.12.12.10
12.12.12.150
12.12.12.2
12.12.12.205
12.12.12.3
12.12.12.4
12.12.12.5
12.12.12.6
12.12.12.7
12.12.12.8

01/23/02 15:20:55 -> MWFM Distribution Process Started ...
01/23/02 15:20:55 -> MWFM Monitor Server Started ...

01/23/02 15:20:55 -> MWFM Successfully started.

```

The following procedure can be used to change the MWFM Domain:

```
#cd $RIV_HOME
#./change_mwfm_domain<NEW_DOMAIN_NAME>
```

To start MWFM enter the following commands:

```
#cd $RIV_HOME
#./start_mwfm
```

## Robust Trap Transport Mechanism

MWFM now supports the Robust Trap Transport mechanism between MWFM and the NMS. Every MWFM Trap includes a MIB variable viz rivSequentialID which contains the MWFM Trap sequence number.

For understanding purpose, here is sample MWFM trap sent out of MWFM:  
received trap from [172.19.26.14].39173

```
community: public
enterprise: 1.3.6.1.4.1.2517
agent addr: 172.19.26.14
generic ID: 6
specific ID: 2
uptime: 116 days, 23:14:40
bindings: rivSequentialID => 1
 rivEntityName => 12.12.12.7[0 [0]].WIRELESS
 rivCreateTime => 1010603807
 rivDescription => Ping fail on device 12.12.12.7[0 [0]]
 rivCauseType => 2 (root)
 rivEventId => 8
 rivLocation =>
 rivSeverity => 5 (critical)
 rivExtraInfo =>
 rivClassName => Interface
 rivEventName => pingFail
 rivEventType => 2 (alert)
```

```

rivContact =>
rivAssignedTo =>
rivAcknowledged => 0
rivCorrelatedId => []
rivEventGroupId => 0
rivActionGlyph => none
rivOccurred => 4
rivFaultActionType => 1 (update)
rivAgentAddress => mw-nms-u10
rivInternalAction => 0

```

Range of the rivSequential ID can be configured by the user. For example, if the user has configured the range as 1 to 100, then MWFM will send traps with rivSequentialID= 1 up to 100. And then it will roll over to 1.

The NMS can determine if it has lost some MWFM traps by looking at the sequence number of MWFM Trap. Under no loss conditions, all the MWFM traps will be received sequentially one after the other i.e. rivSequenceID=1,2,3...10. If the NMS loses some MWFM Traps, then it can request MWFM to re-send the traps using the Java API.

## Configuring the Devices in your network

### Enabling Traps on your devices

Configure all your devices to send SNMP Version1 traps to MWFM. Check out the following web site for details on this

[http://www.cisco.com/warp/public/477/SNMP/snmp\\_traps.html](http://www.cisco.com/warp/public/477/SNMP/snmp_traps.html)

The following example enables the Router to send all the traps to the host myhost.com using the community string public

```

snmp-server enable traps
snmp-server host myhost.cisco.com public

```

### Enabling SNMP access to the devices

The following example enables SNMP access to the router using community string public

```

snmp-server community public RO

```

### Enabling GGSN to send out GPRS syslogs

The following example enables GGSN router to send out the GPRS syslogs to the MWFM host myhost.cisco.com

```

logging host myhost.cisco.com

```

## Installing the Java Development Kit

If you plan to develop Java client applications using the MWFM Java API package, you must install the Java Development Kit.

## Post Installation Verification

After installing the Java Development kit on Client machine bring up the MWFM GUI as described in the *Cisco Mobile Wireless Fault Mediator 2.1 - GUI User Guide*.

# Obtaining Documentation

The following sections explain how to obtain documentation from Cisco Systems.

## World Wide Web

You can access the most current Cisco documentation on the World Wide Web at the following URL:

<http://www.cisco.com>

Translated documentation is available at the following URL:

[http://www.cisco.com/public/countries\\_languages.shtml](http://www.cisco.com/public/countries_languages.shtml)

## Documentation CD-ROM

Cisco documentation and additional literature are available in a Cisco Documentation CD-ROM package, which is shipped with your product. The Documentation CD-ROM is updated monthly and may be more current than printed documentation. The CD-ROM package is available as a single unit or through an annual subscription.

## Ordering Documentation

Cisco documentation is available in the following ways:

- Registered Cisco Direct Customers can order Cisco product documentation from the Networking Products MarketPlace:  
[http://www.cisco.com/cgi-bin/order/order\\_root.pl](http://www.cisco.com/cgi-bin/order/order_root.pl)
- Registered Cisco.com users can order the Documentation CD-ROM through the online Subscription Store:  
<http://www.cisco.com/go/subscription>
- Nonregistered Cisco.com users can order documentation through a local account representative by calling Cisco corporate headquarters (California, USA) at 408 526-7208 or, elsewhere in North America, by calling 800 553-NETS (6387).

## Documentation Feedback

If you are reading Cisco product documentation on Cisco.com, you can submit technical comments electronically. Click **Leave Feedback** at the bottom of the Cisco Documentation home page. After you complete the form, print it out and fax it to Cisco at 408 527-0730.

You can e-mail your comments to [bug-doc@cisco.com](mailto:bug-doc@cisco.com).

To submit your comments by mail, use the response card behind the front cover of your document, or write to the following address:

Cisco Systems  
Attn: Document Resource Connection  
170 West Tasman Drive  
San Jose, CA 95134-9883

We appreciate your comments.

## Obtaining Technical Assistance

Cisco provides Cisco.com as a starting point for all technical assistance. Customers and partners can obtain documentation, troubleshooting tips, and sample configurations from online tools by using the Cisco Technical Assistance Center (TAC) Web Site. Cisco.com registered users have complete access to the technical support resources on the Cisco TAC Web Site.

### Cisco.com

Cisco.com is the foundation of a suite of interactive, networked services that provides immediate, open access to Cisco information, networking solutions, services, programs, and resources at any time, from anywhere in the world.

Cisco.com is a highly integrated Internet application and a powerful, easy-to-use tool that provides a broad range of features and services to help you to

- Streamline business processes and improve productivity
- Resolve technical issues with online support
- Download and test software packages
- Order Cisco learning materials and merchandise
- Register for online skill assessment, training, and certification programs

You can self-register on Cisco.com to obtain customized information and service. To access Cisco.com, go to the following URL:

<http://www.cisco.com>

### Technical Assistance Center

The Cisco TAC is available to all customers who need technical assistance with a Cisco product, technology, or solution. Two types of support are available through the Cisco TAC: the Cisco TAC Web Site and the Cisco TAC Escalation Center.

Inquiries to Cisco TAC are categorized according to the urgency of the issue:

- Priority level 4 (P4)—You need information or assistance concerning Cisco product capabilities, product installation, or basic product configuration.
- Priority level 3 (P3)—Your network performance is degraded. Network functionality is noticeably impaired, but most business operations continue.

- Priority level 2 (P2)—Your production network is severely degraded, affecting significant aspects of business operations. No workaround is available.
- Priority level 1 (P1)—Your production network is down, and a critical impact to business operations will occur if service is not restored quickly. No workaround is available.

Which Cisco TAC resource you choose is based on the priority of the problem and the conditions of service contracts, when applicable.

## Cisco TAC Web Site

The Cisco TAC Web Site allows you to resolve P3 and P4 issues yourself, saving both cost and time. The site provides around-the-clock access to online tools, knowledge bases, and software. To access the Cisco TAC Web Site, go to the following URL:

<http://www.cisco.com/tac>

All customers, partners, and resellers who have a valid Cisco services contract have complete access to the technical support resources on the Cisco TAC Web Site. The Cisco TAC Web Site requires a Cisco.com login ID and password. If you have a valid service contract but do not have a login ID or password, go to the following URL to register:

<http://www.cisco.com/register/>

If you cannot resolve your technical issues by using the Cisco TAC Web Site, and you are a Cisco.com registered user, you can open a case online by using the TAC Case Open tool at the following URL:

<http://www.cisco.com/tac/caseopen>

If you have Internet access, it is recommended that you open P3 and P4 cases through the Cisco TAC Web Site.

## Cisco TAC Escalation Center

The Cisco TAC Escalation Center addresses issues that are classified as priority level 1 or priority level 2; these classifications are assigned when severe network degradation significantly impacts business operations. When you contact the TAC Escalation Center with a P1 or P2 problem, a Cisco TAC engineer will automatically open a case.

To obtain a directory of toll-free Cisco TAC telephone numbers for your country, go to the following URL:

<http://www.cisco.com/warp/public/687/Directory/DirTAC.shtml>

Before calling, check with your network operations center to determine the level of Cisco support services to which your company is entitled; for example, SMARTnet, SMARTnet Onsite, or Network Supported Accounts (NSA). In addition, have available your service agreement number and your product serial number.
