

Licensing Requirement for CMX Analytics Service

Advanced Location service is introduced in Release 7.4 and it includes CMX analytics service and Mobile Concierge service. From Release 7.4, AP based licensing is supported for location and advanced location services. To accommodate this, new L-LS-licenses are introduced in Release 7.4.

Cisco MSE 3355 supports up to 500 access points for Cisco MSE Location Services or Advanced Location Services. The Cisco MSE virtual appliance supports up to 1,000 access points, depending on the server resources.

There is no change to endpoint support and MSE 3355 supports 25,000 and high end virtual appliance supports 50000. All licenses are additive.
