

Configuring and Deploying wIPS Solution

This section describes how to configure and deploy the wIPS solution using the Lifecycle theme in the Prime Infrastructure UI.

Choose **Design > Wireless Security** from the Lifecycle theme in the Prime Infrastructure UI. The Wireless Security wizard page appears and allows you to perform the following wIPS related configurations:

- Allows rogue policy to detect and report ad hoc networks.
- Allows rogue rules to define rules to automatically classify rogue access points.
- Allows you to add new wIPS profiles.

This section contains the following topics:
