

Post Installation Process

Change SSH Keys, on page 1

Change SSH Keys

Before you begin

Before changing SSH keys, make sure diagnostics is clean and there is no alarm/warning.

Note It's important to change SSH keys at least once.

- Step 1
 To generate new keys execute the following command on installer VM (Cluster Manager).

 /var/qps/install/current/scripts/bin/support/manage_sshkey.sh
 -create
- Step 2
 Update keys on CPS VMs and installer VM (Cluster Manager).

 /var/qps/install/current/scripts/bin/support/manage_sshkey.sh --update

I
