

## Post Installation Process

---

- [Change SSH Keys, on page 1](#)

### Change SSH Keys

#### Before you begin

Before changing SSH keys, make sure diagnostics is clean and there is no alarm/warning.

---

**Note** It's important to change SSH keys at least once.

---

---

**Step 1** To generate new keys execute the following command on installer VM (Cluster Manager).

```
/var/qps/install/current/scripts/bin/support/manage_sshkey.sh --create
```

**Step 2** Update keys on CPS VMs and installer VM (Cluster Manager).

```
/var/qps/install/current/scripts/bin/support/manage_sshkey.sh --update
```

---
