User Management

The **User Management** section in Cisco Spaces allows administrators to centrally manage user access, roles, and location permissions within the Space Utilization App. The feature provides capabilities to view all existing users, monitor their invitation status, assign appropriate roles, and invite new users into the app.

Key features

- Search functionality: Use the **Search** bar for quick search and filtering.
- New User Invitation workflow with email entry, role selection, and location assignment.
- User attributes: Displays the user details such as **Name**, **Email**, **Role** (Read Only User, Dashboard Admin Role), **Location**, and **Invitation Status**.
- Pagination controls

Figure 1: User management

The screenshot shows the 'User Management' interface. At the top, there is a search bar with the placeholder text 'Search' and a blue button labeled '+ Invite User'. Below this is a table with the following columns: 'User', 'Email address', 'Role', 'Location', and 'Invitation Status'. The table contains several rows of user data, including roles like 'Dashboard Admin Role' and 'Read-Only', and locations like 'All Locations'. The 'Invitation Status' column shows green checkmarks and the word 'Accepted'. At the bottom right of the table, there is a pagination control showing 'Rows per page' set to 10, and '1-10 of 304' items, with page numbers 1, 2, and 31 visible.

Send a user invitation

Add a new user to Space Utilization App by sending an invitation with the appropriate role and location permissions.

Use this procedure when you need to add a new users to Space Utilization App and provide then appropriate access permissions.

Procedure

Step 1 In the Space Utilization App, navigate to the **User Management** section from the left-navigation menu.

Step 2 In the **User Management** window, click **Invite User**.

The **Invite User** window is displayed.

Step 3 In the **Email** field, enter the user's email address.

Step 4 From the **Role** drop-down list, choose the appropriate role for the new user. The options are: **Read Write User** and **Read Only User**.

Read Only users cannot access **Deployment Status** or **User Management** features, while **Read Write** users have access to all sections.

- Step 5** Click **Select Locations** to choose which locations the user will have access to from the **Choose Locations** pop-up window.
- Check the check boxes corresponding to the location you want to give access to.
 - Verify the selected location details in the **Select Locations** area.
 - Click **Select Locations**.
- Step 6** Click **Send Invitation**.

The new user invitation is sent successfully, and the recipient will receive an email with instructions to accept.

What to do next

The newly invited user details are displayed in the **User Management** list with the status **Pending** until they accept the invitation.
