Feature Description

With this feature, the Operators can support Mobility Services Platform (MSP) functional use cases.

This feature covers the following requirements:

- Support of 64 rules is for:
 - Dynamic rules on default bearer with flow descriptions.
 - ADC rules with and without flow descriptions.
- Up to 174 PDRs, and it’s corresponding FARs, URRs and QERs, are supported for static rules, predefined rules, dynamic rules, and ADC rules.
 - Up to 206 URRs are supported for static rules, predefined rules, dynamic rules, and ADC rules.
- All rules information is communicated to User Plane using Create PDR, Create URR, Create FAR and Create QER.
- All Sx messages supports the required number of PDR, URR, FAR, QER and Usage report, Query URR.
- Monitor protocol displays all Sx messages.

- Monitor subscriber displays all Sx messages.
