

## **Standard QCI Support**

- Revision History, on page 1
- Feature Description, on page 1

## **Revision History**

Note

Revision history details are not provided for features introduced before release 21.24.

Revision Details	Release
First introduced.	Pre 21.24

## **Feature Description**

**Important** 

Standard QCI is not supported and qualified in the CUPS architecture.

The standardized QCI values—65, 66, 69, and 70 support Mission Critical and Push-to-Talk (MC/PTT) applications. The standard QCIs are based on 3GPP TS 23.203 Release 12.

This feature supports the following functionality:

- Creates, deletes, and updates default and dedicated bearers.
- All applicable charging records include the standard QCI values.
- All features related to QCIs work with the standard QCI values.

## **Limitations**

The following are the known limitations of this feature:

• Does not support S2a/S2b/GGSN.

• Does not support the overall eMPS functionality.
