Audience and Scope

This publication is for system and IT administrators responsible for configuring and deploying a derived, end-user version of Cisco Secure Services Clients (SSCs) in multiple end-user machines used by your various enterprise departments/organizations. By using the information supplied in this document, you will be able to fully define and customize the following for the end-user machines that you support:

- **Policy**—Defines the capabilities and user experience of the deployed SSC.
- **Networks**—Defines the configuration of all enterprise network connections that you control.

Organization

This guide contains the following sections:

[Chapter 1, “Enterprise Deployment”](#) provides instructions for deploying a preconfigured end-user SSC.

[Chapter 2, “Schema Elements”](#) describes the usage and properties of each of the configurable entities found in the SSC’s distribution package XML schema.

[Appendix A, “Network Decision Tree Flow Diagram”](#) contains a high level flow diagram of the decision tree for configuring a network.

[Appendix B, “Distribution Package Examples”](#) contains examples of valid distribution package (configuration) .xml files for different enterprise environments.

Appendix C, “Postprocessing Verification Errors” contains a listing of error types and error messages used with the postprocessing utility.

Conventions

This publication uses the following conventions to convey instructions and information:

- For utility commands
 - Commands are in **boldface** type.
 - Variables are in *italic* type.
- For schema objects.
 - Element and attribute names when used in the text are in *italic* type.
- Notes use the following conventions and symbols:

Note

Means *reader take note*. Notes contain addition information for the subject at hand or references to materials not contained in this manual.

Tip

Tips contain helpful suggestions.
