Introducción

Este documento provee una configuración de ejemplo para routers con claves RSA. Ambos routers están configurados para claves RSA y el túnel IPSec/Generic Routing Encapsulation (GRE) con Routing Information Protocol (RIP).

Requisitos

No hay requisitos específicos para este documento.

Componentes Utilizados

La información que contiene este documento se basa en las siguientes versiones de software y hardware.

- Router Cisco que funciona con el Software Release 12.2 de Cisco IOS®

La información que contiene este documento se creó a partir de los dispositivos en un ambiente de laboratorio específico. Todos los dispositivos que se utilizan en este documento se pusieron en funcionamiento con una configuración verificada (predeterminada). Si la red está funcionando,

asegúrese de haber comprendido el impacto que puede tener cualquier comando.

[Convenciones](#)

Para obtener más información sobre las convenciones del documento, consulte [Convenciones de Consejos Técnicos de Cisco](#).

[Configurar](#)

En esta sección encontrará la información para configurar las funciones descritas en este documento.

Nota: Para obtener información adicional sobre los comandos que se utilizan en este documento, use la Command Lookup Tool (solo para clientes [registrados](#)).

Verificación

En esta sección encontrará información que puede utilizar para confirmar que su configuración esté funcionando correctamente.

La herramienta [Output Interpreter](#) (sólo para clientes [registrados](#)) permite utilizar algunos comandos “show” y ver un análisis del resultado de estos comandos.

- **muestre el detalle crypto isakmp sa** — Visualiza todas las asociaciones de seguridad actuales del Internet Key Exchange (IKE) (SA) en un par.
- **show crypto ipsec sa** — Muestra la configuración actual utilizada por las SA actuales
- **active del show crypto engine connections** — Visualiza un resumen de la información de la configuración para los motores de criptografía.
- **show ip route** – Muestra el estado actual de la tabla de ruteo.

Troubleshooting

En esta sección encontrará información que puede utilizar para solucionar problemas de

configuración. Para más información sobre el troubleshooting, vea por favor el [Troubleshooting de IP Security - Entendiendo y con los comandos debug](#).

[Procedimiento de Troubleshooting](#)

Sigue estas instrucciones de resolver problemas su configuración.

1. Genere las claves RSA en el router 101.
