[¿Cómo hacen las encabezados de mensaje del registro I?](#)

[Información Relacionada](#)

Introducción

Este documento describe cómo registrar las encabezados de mensajes procesadas a través del dispositivo de seguridad del correo electrónico de Cisco (ESA).

¿Cómo hacen las encabezados de mensaje del registro I?

En algunos casos, es útil registrar la presencia y el contenido de las encabezados de un mensaje pues pasan a través del dispositivo. Usted especifica las encabezados para registrar vía el **logconfig > los logheaders**. El ESA registrará los encabezados del mensaje especificados en los registros del correo de texto de IronPort, los registros de la salida de IronPort, y los registros de la despedida de IronPort. Si la encabezado está presente, el sistema registra el nombre de la encabezado y del valor. La información de encabezado recored después de la información de entrega.

Abajo está un ejemplo de cómo permitir al registro para registrar cualquier mensaje con el X-IPA-resultado de las encabezados y el X-IronPort-AV:

```
my_esa.local> logconfig
```

```
Currently configured logs:
```

```
Log Name Log Type Retrieval Interval
```

```
-----  
1. amp AMP Engine Logs Manual Download None  
2. amparchive AMP Archive Manual Download None  
3. antispam Anti-Spam Logs Manual Download None  
4. antivirus Anti-Virus Logs Manual Download None  
5. asarchive Anti-Spam Archive Manual Download None  
6. authentication Authentication Logs Manual Download None  
7. avarchive Anti-Virus Archive Manual Download None  
8. bounces Bounce Logs Manual Download None  
9. cli_logs CLI Audit Logs Manual Download None  
10. encryption Encryption Logs Manual Download None  
11. error_logs IronPort Text Mail Logs Manual Download None  
12. euq_logs Spam Quarantine Logs Manual Download None  
13. euqgui_logs Spam Quarantine GUI Logs Manual Download None  
14. ftpd_logs FTP Server Logs Manual Download None
```

15. gui_logs HTTP Logs Manual Download None
16. mail_logs IronPort Text Mail Logs Manual Download None
17. mail_logs_copy IronPort Text Mail Logs SCP Push - Host 192.168.0.200: Port 22None
18. repeng Reputation Engine Logs Manual Download None
19. reportd_logs Reporting Logs Manual Download None
20. reportqueryd_logs Reporting Query Logs Manual Download None
21. scanning Scanning Logs Manual Download None
22. slbld_logs Safe/Block Lists Logs Manual Download None
23. snmp_logs SNMP Logs Manual Download None
24. sntpd_logs NTP logs Manual Download None
25. status Status Logs Manual Download None
26. system_logs System Logs Manual Download None
27. trackerd_logs Tracking Logs Manual Download None
28. updater_logs Updater Logs Manual Download None
29. upgrade_logs Upgrade Logs Manual Download None

Choose the operation you want to perform:

- NEW - Create a new log.
- EDIT - Modify a log subscription.
- DELETE - Remove a log subscription.
- SETUP - General settings.
- LOGHEADERS - Configure headers to log.
- HOSTKEYCONFIG - Configure SSH host keys.

[> **logheaders**

Please enter the list of headers you wish to record in the log files.

Separate multiple headers with commas.

[> **X-IPAS-Result, X-IronPort-AV**

Vuelva al prompt principal CLI, y **confie** ningunos/todos los cambios.

Cuando usted revisa los mail_logs, usted verá el resultado de las encabezados ahora inyectadas en los registros según lo configurado:

my_esa.local> **logconfig**

Currently configured logs:

Log Name	Log Type	Retrieval Interval
1. amp	AMP Engine Logs	Manual Download None
2. amparchive	AMP Archive	Manual Download None
3. antispam	Anti-Spam Logs	Manual Download None
4. antivirus	Anti-Virus Logs	Manual Download None
5. asarchive	Anti-Spam Archive	Manual Download None
6. authentication	Authentication Logs	Manual Download None
7. aarchive	Anti-Virus Archive	Manual Download None
8. bounces	Bounce Logs	Manual Download None
9. cli_logs	CLI Audit Logs	Manual Download None
10. encryption	Encryption Logs	Manual Download None
11. error_logs	IronPort Text Mail Logs	Manual Download None

22. slbld_logs Safe/Block Lists Logs Manual Download None
23. snmp_logs SNMP Logs Manual Download None
24. sntpd_logs NTP logs Manual Download None
25. status Status Logs Manual Download None
26. system_logs System Logs Manual Download None
27. trackerd_logs Tracking Logs Manual Download None
28. updater_logs Updater Logs Manual Download None
29. upgrade_logs Upgrade Logs Manual Download None

Choose the operation you want to perform:

- NEW - Create a new log.
- EDIT - Modify a log subscription.
- DELETE - Remove a log subscription.
- SETUP - General settings.
- LOGHEADERS - Configure headers to log.
- HOSTKEYCONFIG - Configure SSH host keys.

[]> **logheaders**

Please enter the list of headers you wish to record in the log files.

Separate multiple headers with commas.

[]> **X-IPAS-Result, X-IronPort-AV**

Del correo electrónico recibido, si usted mirara las encabezados en ese correo electrónico directamente, usted verá el X-IPA-resultado y las encabezados resaltados X-IronPort-AV en los encabezados originales antes del primer salto recibido:

my_esa.local> **logconfig**

Currently configured logs:
