# Instalación y actualización de Firepower Threat Defense en dispositivos ASA 55xx-X

## Contenido

Introducción **Prerequisites** Requirements **Componentes Utilizados Antecedentes** Configurar Diagrama de la red Descarga de software FTD Tarea 2. Actualización del ROMMON ASA5508-X Tarea 3. Instale la imagen de inicio de FTD en ASA55xx-X Tarea 4. Instale la imagen del sistema FTD en ASA55xx-X Tarea 5. Registre el FTD en FMC Tarea 6. Actualización del FTD Tarea 7. Conexión y desconexión del modo CLI del motor LINA Tarea 8. Recrear imagen de una instalación FTD existente Información Relacionada

## Introducción

Este documento describe los procedimientos de instalación, actualización y registro de Firepower Threat Defense (FTD) en dispositivos ASA55xx-X.

## Prerequisites

## Requirements

No hay requisitos específicos para este documento.

## **Componentes Utilizados**

La información que contiene este documento se basa en las siguientes versiones de software y hardware.

- ASA5508-X
- ASA5512-X
- FireSIGHT Management Center (FMC), ejecución 6.0.1 (compilación 1213)

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. Si tiene una red en vivo, asegúrese de entender el posible impacto de cualquier comando.

## Antecedentes

FTD es una imagen de software unificada que se puede instalar en estas plataformas:

- ASA5506-X, ASA5506W-X, ASA5506H-X, ASA5508-X, ASA5516-X
- ASA5512-X, ASA5515-X, ASA5525-X, ASA5545-X, ASA5555-X
- FPR4100, FPR9300
- VMware (ESXi)
- Amazon Web Services (AWS)
- KVM
- Módulo de router ISR

El objetivo de este documento es demostrar:

- La instalación de la versión 6.0.0 de FTD en las plataformas ASA5508-X y ASA5512-X
- El procedimiento de actualización de FTD de la versión 6.0.0 a 6.0.1
- Registro en Firepower Management Center (FMC) y licencias básicas

## Configurar

## Diagrama de la red

## Descarga de software FTD

Vaya a Firewalls de última generación (NGFW) > ASA con FirePOWER Services > ASA 5508-X con FirePOWER Services y seleccione Firepower Threat Defense Software:

Del mismo modo para el software ASA5512-X.

## Tarea 1. Verificar los requisitos previos

Verifique los requisitos previos antes de la instalación de FTD.

Solución:

Para la instalación de FTD utiliza dos imágenes:

- Imagen de sistema operativo (también conocida como imagen de inicio): para Firepower Threat Defense en ASA5506-X, ASA5506H-X, ASA5506W-X, ASA5508-X y ASA5516-X es un archivo \*.lfbff. Para Firepower Threat Defense en Saleen (ASA5512-X, ASA5515-X, ASA5525-X, ASA5545-X, ASA555-X) es un archivo \*.cdisk.
- 2. Imagen del sistema: es un archivo .pkg.

Antes de continuar con la instalación de FTD, verifique lo siguiente:

- La memoria flash ASA debe tener al menos 3,1 GBytes (3 GBytes + tamaño de la imagen de inicio) de espacio libre
- La imagen de inicio se carga en un servidor TFTP
- La imagen del sistema se carga en un servidor HTTP o FTP
- OnASA5506/08/16 el ROMMON es al menos 1.1.8 versión

Verifique el espacio libre:

FTD5508X# show flash | i free 7859437568 bytes total (4273819648 bytes free) Verifique estas imágenes:

Nombre del archivo	Descripción
	imagen de inicio de Firepower Threat Defense v6.0.1 para
ftd-boot-9610 lfbff	5506/5508/5516.
	Esta es la imagen de inicio para la instalación limpia en
	5506/5508/5516
	Imagen de inicio de Firepower Threat Defense v6.0.1 para
ftd boot 0.6.1.0 odiek	ASA 5512/5515/5525/5545/5555.
110-D001-9.0.1.0.Cuisk	Esta es la imagen de inicio para la instalación limpia en
	5512/5515/5525/5545/5555
	Firepower Threat Defense v6.0.0 para todos los ASA
ftd-6.0.0-1005.pkg	compatibles: 5506/5508/5512/5515/5516/5525/5545/5555.

## Tarea 2. Actualización del ROMMON ASA5508-X

Como se menciona en los requisitos previos, los dispositivos ASA5506-X, ASA5508-X y ASA5516-X deben estar en ROMMON v1.1.8. Si no, instale asa5500-firmware-1108.SPA (disponible en la página de descarga de Cisco ASA).

Requisito de tarea:

Actualice ASA5508 ROMMON de 1.1.1 a 1.1.8.

Solución:

El procedimiento se describe en la Guía de actualización de ASA ROMMON.

Paso 1. Verifique la versión ROMMON existente:

FTD55	08X# show module			
Mod	Card Type		Model	Serial No.
1	ASA 5508-X with FirePOWER services	s, 8GE, AC,	ASA5508	JAD192100SZ
sfr	FirePOWER Services Software Module	e	ASA5508	JAD192100SZ
Mod	MAC Address Range	Hw Version	Fw Version	Sw Version
1	188b.9dle.ca7c to 188b.9dle.ca84	1.0	1.1.1	9.5(2)
sfr	188b.9d1e.ca7b to 188b.9d1e.ca7b	N/A	N/A	5.4.1-211

Paso 2.Descargue el firmware ROMMON en la memoria flash del ASA:

Writing file disk0:/asa5500-firmware-1108.SPA... !!!!!!!!! 9241408 bytes copied in 18.890 secs (513411 bytes/sec)

Digital signature successfully validated

Paso 3. Actualización de la imagen ROMMON de ASA:

#### FTD5508X# upgrade rommon disk0:asa5500-firmware-1108.SPA Verifying file integrity of disk0:/asa5500-firmware-1108.SPA

Computed	Hash	SHA2:	d824bdeecee1308fc64427367fa559e9 eefe8f182491652ee4c05e6e751f7a4f 5cdea28540cf60acde3ab9b65ff55a9f 4e0cfb84b9e2317a856580576612f4af
Embedded	Hash	SHA2:	d824bdeecee1308fc64427367fa559e9 eefe8f182491652ee4c05e6e751f7a4f 5cdea28540cf60acde3ab9b65ff55a9f 4e0cfb84b9e2317a856580576612f4af

#### Digital signature successfully validated

File Name	:	disk0:/asa5500-firmware-1108.SPA
Image type	:	Release
Signer Information		
Common Name	:	abraxas
Organization Unit	:	NCS_Kenton_ASA
Organization Name	:	CiscoSystems
Certificate Serial Number	:	55831CF6

• • •

Controle lo siguiente:

Puede utilizar el comando show module para verificar la versión del software ROMMON:

FTD55	508X>	enable			
Passv	vord:				
FTD55	508X#	show module			
Mod	Card	Туре		Model	Serial No.
1 sfr	ASA S Firel	5508-X with FirePOWER services POWER Services Software Module	s, 8GE, AC, e	ASA5508 ASA5508	JAD192100SZ JAD192100SZ
Mod	MAC A	Address Range	Hw Version	Fw Version	Sw Version
1 sfr	188b 188b	.9dle.ca7c to 188b.9dle.ca84 .9dle.ca7b to 188b.9dle.ca7b	1.0 N/A	<b>1.1.8</b> N/A	9.5(2) 5.4.1-211

## Tarea 3. Instale la imagen de inicio de FTD en ASA55xx-X

Requisito de tarea:

Instale la imagen de inicio FTD ftd-boot-9.6.1.0.lfbff en ASA5508-X.

Solución:

Hay más de un método para hacerlo. He aquí el primero:

Método 1. De ROMMON

Paso 1. Recargue el ASA e ingrese al modo ROMMON:

```
FTD5508X# reload
Proceed with reload? [confirm]
FTD5508X#
***
*** --- START GRACEFUL SHUTDOWN ---
Shutting down isakmp
Shutting down webvpn
Shutting down sw-module
Shutting down License Controller
Shutting down File system
***
*** --- SHUTDOWN NOW ---
Process shutdown finished
```

Rebooting.... INIT: Sending processes the TERM signal Deconfiguring network interfaces... done. Sending all processes the TERM signal... Sending all processes the KILL signal... Deactivating swap... Unmounting local filesystems... Rebooting... ÿ Rom image verified correctly

```
Cisco FTD Boot 6.0.0 (9.6.1.)
```

```
Type ? for list of commands
```

firepower-boot>

En ASA5512/15/25/45/55 el procedimiento es el mismo con la única diferencia en el nombre de la imagen de inicio:

rommon #0> ADDRESS=10.62.148.10
rommon #1> SERVER=10.229.22.42
rommon #2> GATEWAY=10.62.148.1
rommon #3> IMAGE=ftd-boot-9.6.1.0.cdisk

Método 2. Desde el modo ASA

### memoria flash ASA:

ciscoasa# copy ftp://10.48.40.70/ANG/mzafeiro/ftd-boot-9.6.1.0.1fbff flash Paso 2. Elimine cualquier imagen ASA del disco:

ciscoasa# delete flash:asa\*

El contenido de la memoria flash después de eliminar imágenes ASA:

ciscoa	sa# <b>show fla</b>	sh			
#	length		date/t	ime	path
131	33	May 2	0 2016	09:27:28	.boot_string
11	4096	Mar O	3 2016	11:48:34	log
154	16767	May 2	0 2016	09:23:48	log/asa-appagent.log
155	465	Mar O	3 2016	11:54:58	log/asa-ssp_ntp.log
21	4096	Jun 1	0 2015	06:45:42	crypto_archive
22	4096	Jun 1	0 2015	06:46:00	coredumpinfo
23	59	Jun 1	0 2015	06:46:00	coredumpinfo/coredump.cfg

firepower login: admin Password: <-- Admin123 You must accept the EULA to continue. Press

... EULA is displayed - output is omitted END USER LICENSE AGREEMENT Please enter 'YES' or press to AGREE to the EULA:

System initialization in progress. Please stand by. You must change the password for 'admin' to continue. Enter new password: Confirm new password: You must configure the network to continue. You must configure at least one of IPv4 or IPv6. Do you want to configure IPv4? (y/n) [y]: Do you want to configure IPv6? (y/n) [n]: Configure IPv4 via DHCP or manually? (dhcp/manual) [manual]: Enter an IPv4 address for the management interface [192.168.45.45]: 10.62.148.29 Enter an IPv4 netmask for the management interface [255.255.255.0]: 255.255.128 Enter the IPv4 default gateway for the management interface []: 10.62.148.1 Enter a fully qualified hostname for this system [firepower]: FTD5508 Enter a comma-separated list of DNS servers or 'none' []: 173.38.200.100,144.254.71.184 Enter a comma-separated list of search domains or 'none' []: If your networking information has changed, you will need to reconnect. For HTTP Proxy configuration, run 'configure network http-proxy'

#### Configure firewall mode? (routed/transparent) [routed]:

Configuring firewall mode ...

Update policy deployment information - add device configuration

You can register the sensor to a Firepower Management Center and use the Firepower Management Center to manage it. Note that registering the sensor to a Firepower Management Center disables on-sensor Firepower Services management capabilities.

When registering the sensor to a Firepower Management Center, a unique alphanumeric registration key is always required. In most cases, to register a sensor to a Firepower Management Center, you must provide the hostname or the IP address along with the registration key. 'configure manager add [hostname | ip address ] [registration key ]'

However, if the sensor and the Firepower Management Center are separated by a NAT device, you must enter a unique NAT ID, along with the unique registration key.

'configure manager add DONTRESOLVE [registration key ] [ NAT ID ]'

Later, using the web interface on the Firepower Management Center, you must use the same registration key and, if necessary, the same NAT ID when you add this sensor to the Firepower Management Center.

>

**Consejo:** Puede utilizar la opción **noconfirm** para instalar la imagen. En ese caso, no se le solicitará durante la instalación.

firepower-boot>system install noconfirm ftp://10.229.22.42/ftd-6.0.0-1005.pkg

En FTD 6.1.x y superiores, se le solicita el modo de administración (local frente a remoto).

For HTTP Proxy configuration, run 'configure network http-proxy'

Manage the device locally? (yes/no) [yes]: no
Configure firewall mode? (routed/transparent) [routed]:

Modo local = Aplicable sólo en dispositivos ASA55xx-X. Gestiona el FTD desde Firepower Device Manager (FDM).

Modo remoto = Gestiona el FTD desde FMC

Verificación

>

La instalación de la imagen del sistema en ASA5512/15/25/45/55 es la misma que la anterior.

## Tarea 5. Registre el FTD en FMC

Registrar FTD en el servidor FMC utilizando la siguiente configuración:

Host	10.62.148.29
Mostrar nombre:	FTD5508
Clave de registro	Cisco
Grupo Ninguno	
Política de control de acceso	FTD5508
Política de base de políticas de control de acceso	Ninguno
Acción predeterminada de la política de control de acceso	Bloquear todo el tráfico

## Solución

Paso 1.En FTD, especifique el servidor FMC:

```
> configure manager add 10.62.148.73 cisco
Manager successfully configured.
Please make note of reg_key as this will be required while adding Device in FMC.
> show managers
Host : 10.62.148.73
Registration Key : ****
Registration & pending
RPC Status :
Type : Manager
Host : 10.62.148.73
Registration : Pending
```

>

Paso 2.Antes de agregar el FTD, debe registrar el FMC con Smart Licensing Server. Si intenta agregar un dispositivo FTD sin tener una licencia inteligente, se producirá el siguiente error:

Puede elegir el modo de evaluación. Esto le permite utilizar FTD durante 90 días sin funciones que requieran un cifrado seguro (por ejemplo, VPN).

Overview Analysis	Policies	Devices	Objects	AMP					Deploy	/ O S	ystem Help 🔻	admin v
		с	onfiguration	Users	Domains	Integration	Updates	Licenses +	Smart Licenses	Health •	Monitoring *	Tools •

License Type/Device Name				License S	tatus	Device Type			Dom	ain	Gr	oup	
Base (0)													
Malware (0)													
Threat (0)													
URL Filtering (0)													

Paso 3. En FMC, cree primero la política de control de acceso que utilizará FTD. Navegue hasta **Políticas > Control de acceso** y seleccione **Nueva política**:

Overview A	Analysis Policies	
Access Contro	ol   Network Disco	
Access Contro	l	
	Deploy 🥝 System Help 🔻 admin 🔻	
Object Managem	ment Intrusion Network Analysis Policy DNS Import/Export	
	New Policy	
New Policy		? ×
Name:	FTD5508	
Description:		
Select Base Policy:	None	
Default Action:	Block all traffic     O Intrusion Prevention     O Network Discovery	
Targeted Devices		

A continuación, agregue el dispositivo FTD:

Overview Analysis	Policies Devices Obj	ects AMP			Deploy 0, 5	ystem Help 🔻 admin 🔻
Device Management	NAT VPN Platform S	Settings				
					By Group	▼ 🗿 Add •
Name			Model	License Type	Access Control Policy	Add Device

						Add Cluster     Add Group

Add Device			?	×			
Host:	10.62.148.29						
Display Name:	FTD5508						
Registration Key:	cisco	1					
Group:	None		*				
Access Control Policy:	FTD5508		~				
Access Control Policy: FTD5508 Smart Licensing Malware: Threat: URL Filtering: Advanced On version 5.4 devices or earlier, the licensing options will need to be							
	2	Register	el				
	J						

Al final de la adición de FTD se implementa una política:

Para comprobar lo que está sucediendo en segundo plano mientras se agrega el dispositivo FTD, active **pigtail** tanto en FMC como en FTD.

En FMC:

### En FTD:

> pigtail

**Nota:** Si el estado de la Interfaz de administración de FTD está inactivo, asegúrese de que el valor de la conferencia sea 0x1.

## Tarea 6. Actualización del FTD

En esta tarea, actualice FTD de 6.0.0 a 6.0.1.

	Versión	Nombre del archivo		
Imagan inicial do ETD	Versión 6.0.0	ftd 6 0 0 1005 pkg		
	(Compilación 1005)	10-0.0.0-1003.pkg		
Imagan ETD abiativa	Versión 6.0.1	Ciaco ETD Upgrado 6.0.1.1212 ab		
inagen FID objeuvo	(Compilación 1213)	CISCO_FTD_Opgrade-0.0.1-1213.SIT		

### Solución

Paso 1. Cargue la imagen FTD en FMC:

Product Updates	Rule Updates	Geolocation Updates	
		Cu	rrently running software version: 6.0.1
		Updates	1
		Upload sof	tware updates and patches here.
		Package	Browse No file selected.

## Paso 2. Instale la imagen FTD:

Overview	Analysis	Policies	Devices	Objects	AMP			Depk	ру 📀	System	Help 🔻	admin 🔻
		Confi	iguration	Users	Domains	Integration	Updates	Licenses •	Health	n.▼ Mo	nitoring 🔻	Tools •

1 total 0 waiting 0 running	0 retrying 1 success	0 failures			
✓ Remote Install			35	m 22s	×
Apply to 5508x.cisco.com. Please reapply policies to you					

## Implemente las políticas:

De	ploy Policies Version: 2016-03-23 06:43 PM		×
V	Device	Group	Current Version
<b>V</b> 8	FTD5508		2016-03-23 06:43 PM
	Selected devices: 1		Deploy Cancel

Verificación

>

## Tarea 7. Conexión y desconexión del modo CLI del motor LINA

Entre en el modo CLI de LINA y desconéctese de él.

### Solución

Desde el modo FTD CLISH, escriba el siguiente comando:

> system support diagnostic-cli
Attaching to ASA console ... Press 'Ctrl+a then d' to detach.
Type help or '?' for a list of available commands.

firepower>
firepower> enable
Password: <-- by default empty (null)
firepower#</pre>

Como se menciona en el mensaje anterior, para desconectar (desconectar) de la consola de FTD LINA, escriba CTRL + a y, a continuación, presione d:

```
firepower# <- 'Ctrl+a then d' Console connection detached.
admin@FTD5508:~$
```

## Tarea 8. Recrear imagen de una instalación FTD existente

Requisito

Vuelva a crear una imagen FTD existente e instale la versión 6.1.0-330

### Solución

Esta tarea supone que hay un dispositivo FTD que ejecuta código 6.0.1.x y por las razones que sean necesarias para recrear la imagen (por ejemplo, corrupción de la base de datos irrecuperable, defecto catastrófico que no permite la actualización del software, etc.).

## Resumen de pasos

- 1. Comprobación de compatibilidad.
- 2. Anule el registro de FTD de FMC.
- 3. Recargue el dispositivo FTD e ingrese BootCLI.
- 4. Ejecute el asistente de configuración.
- 5. Instale la imagen del sistema FTD.
- 6. Registre FTD en FMC.

## PASOS DETALLADOS

Paso 1. Verifique las notas de la versión de Firepower y asegúrese de que la imagen FTD que desea utilizar sea compatible con el FMC. Si no actualiza primero el FMC.

Paso 2. Anule el registro (eliminación) de FTD de FMC. Este paso es necesario ya que después de la recreación de imágenes de FTD su UUID cambia y no se puede registrar de nuevo, pero se debe agregar desde el principio.

Paso 3. Recargue el dispositivo FTD e ingrese BootCLI. Dado que ya existe una imagen FTD instalada, se puede omitir la instalación de la imagen de inicio FTD:

> reboot			
This command will reboot the system. Continue?

Cisco FTD Boot 6.0.0 (9.6.2.) Type ? for list of commands firepower-boot>

Paso 4. Ejecute el asistente de configuración y establezca los parámetros básicos de red:

firepower-boot>setup

Welcome to Cisco FTD Setup [hit Ctrl-C to abort] Default values are inside []

Enter a hostname [firepower]: FTD5506
Do you want to configure IPv4 address on management interface?(y/n) [Y]: Y
Do you want to enable DHCP for IPv4 address assignment on management interface?(y/n) [Y]: n
Enter an IPv4 address: 10.48.66.83
Enter the netmask: 255.255.255.128
Enter the gateway: 10.48.66.1
Do you want to configure static IPv6 address on management interface?(y/n) [N]: N
Stateless autoconfiguration will be enabled for IPv6 addresses.

Enter the primary DNS server IP address: 192.168.0.1 Do you want to configure Secondary DNS Server? (y/n) [n]: n Do you want to configure Local Domain Name? (y/n) [n]: n Do you want to configure Search domains? (y/n) [n]: n Do you want to enable the NTP service? [Y]: n Please review the final configuration: Hostname: FTD5506 Management Interface Configuration IPv4 Configuration: static IP Address: 10.48.66.83

Netmask:	255.255.255.128
Gateway:	10.48.66.1

IPv6 Configuration: Stateless autoconfiguration

DNS Configuration: DNS Server: 192.168.0.1

NTP configuration: Disabled

#### CAUTION:

You have selected IPv6 stateless autoconfiguration, which assigns a global address based on network prefix and a device identifier. Although this address is unlikely to change, if it does change, the system will stop functioning correctly. We suggest you use static addressing instead.

```
Apply the changes?(y,n) [Y]: Y
Configuration saved successfully!
Applying...
Restarting network services...
Done.
Press ENTER to continue...
firepower-boot>
```

**Paso 5.**Verifique la conectividad con el servidor (FTP, HTTP, etc.) que contiene la imagen del sistema FTD e inicie la instalación:

firepower-boot>ping 10.48.40.70

For HTTP Proxy configuration, run 'configure network http-proxy'

Manage the device locally? (yes/no) [yes]: **no** Configure firewall mode? (routed/transparent) [routed]: Configuring firewall mode ...

Update policy deployment information

- add device configuration
- add network discovery
- add system policy

You can register the sensor to a Firepower Management Center and use the Firepower Management Center to manage it. Note that registering the sensor to a Firepower Management Center disables on-sensor Firepower Services management capabilities.

When registering the sensor to a Firepower Management Center, a unique alphanumeric registration key is always required. In most cases, to register a sensor to a Firepower Management Center, you must provide the hostname or the IP address along with the registration key. 'configure manager add [hostname | ip address ] [registration key ]'

However, if the sensor and the Firepower Management Center are separated by a NAT device, you must enter a unique NAT ID, along with the unique registration key.

'configure manager add DONTRESOLVE [registration key ] [ NAT ID ]'

Later, using the web interface on the Firepower Management Center, you must use the same registration key and, if necessary, the same NAT ID when you add this sensor to the Firepower Management Center.

#### Paso 6. Registrar FTD en FMC

#### > configure manager add 10.62.148.50 cisco

Manager successfully configured. Please make note of reg\_key as this will be required while adding Device in FMC.

> show managers		
Host	:	10.62.148.50
Registration Key	:	* * * *
Registration	:	pending
RPC Status	:	

En FMC navegue a **Dispositivos > Administración de dispositivos** para agregar el dispositivo FTD.

### Después de agregar FTD a FMC, debe:

Reconfigure la configuración del dispositivo, como las interfaces y el enrutamiento

- Reconfigure políticas como VPN y QoS
- Vuelva a aplicar las políticas y configuraciones aplicadas anteriormente, como la política de control de acceso, NAT y configuración de plataforma
