[Introduction](#)

Ce document fournit à une configuration d'échantillon pour des Routeurs des clés RSA. Les deux Routeurs sont configurés pour le tunnel de clés RSA et d'IPSec/Encapsulation de routage générique (GRE) avec le Protocole RIP (Routing Information Protocol).

[Conditions préalables](#)

[Conditions requises](#)

Aucune spécification déterminée n'est requise pour ce document.

[Composants utilisés](#)

Les informations contenues dans ce document sont basées sur les versions de matériel et de logiciel suivantes :

- Version de logiciel 12.2 courante de Cisco IOS® de routeur de Cisco

Les informations contenues dans ce document ont été créées à partir des périphériques d'un environnement de laboratoire spécifique. Tous les périphériques utilisés dans ce document ont démarré avec une configuration effacée (par défaut). Si votre réseau est opérationnel, assurez-vous que vous comprenez l'effet potentiel de toute commande.

Conventions

Pour plus d'informations sur les conventions utilisées dans ce document, reportez-vous aux [Conventions relatives aux conseils techniques Cisco](#).

Configurez

Cette section vous fournit des informations pour configurer les fonctionnalités décrites dans ce document.

Remarque: Pour obtenir des informations supplémentaires sur les commandes utilisées dans ce document, utilisez l'[Outil de recherche de commande](#) (clients enregistrés seulement).

Vérifiez

Cette section présente des informations que vous pouvez utiliser pour vous assurer que votre configuration fonctionne correctement.

Certaines commandes **show** sont prises en charge par l'[Output Interpreter Tool](#) ([clients enregistrés](#) uniquement), qui vous permet de voir une analyse de la sortie de la commande show.

- **show crypto isakmp sa detail** — Affiche toutes les associations de sécurité en cours d'Échange de clés Internet (IKE) (SAs) à un pair.
- **show crypto ipsec sa**—Affiche les paramètres utilisés par les SA.
- **active de connexions de show crypto engine** — Affiche un résumé des informations de configuration pour les moteurs de chiffrement.
- **show ip route** — Affiche l'état actuel de la table de routage.
