Introduction

Ce document fournit un exemple de configuration pour IPsec entre le routeur Cisco 871 et un routeur Cisco 7200VXR utilisant Easy VPN (EzVPN). Le routeur 7200 agit en tant que serveur Easy VPN, tandis que le routeur 871 agit en tant que client distant Easy VPN. Dans cet exemple, les interfaces de bouclage sont utilisées sur les deux routeurs en tant que réseaux privés. Elles peuvent être remplacées par d'autres interfaces telles que des interfaces FastEthernet ou série, au besoin.

Afin de configurer IPsec entre un PIX/ASA 7.x et un routeur de Cisco 871 utilisant l'Easy VPN, référez-vous à l'[Easy VPN PIX/ASA 7.x avec une ASA 5500 en tant que le serveur et Cisco 871 comme exemple de configuration d'Easy VPN distant](#).

Afin de configurer IPsec entre le client matériel d'Easy VPN Remote de Cisco IOS® et le serveur PIX Easy VPN, référez-vous au [client matériel d'IOS Easy VPN Remote à un exemple de configuration de serveur PIX Easy VPN](#).

Afin de configurer un routeur Cisco IOS comme EzVPN dans le [mode d'extension réseau \(PAS MENTIONNÉ AILLEURS\)](#) qui se connecte à un concentrateur de Cisco VPN 3000, référez-vous à [configurer le client d'EzVPN de Cisco sur le Cisco IOS avec le concentrateur VPN 3000](#).

Conditions préalables

Conditions requises

Assurez-vous que vous avez une compréhension de base d'IPsec et de Cisco 7200/871 système d'exploitation avant que vous tentiez cette configuration.

Composants utilisés

Les informations contenues dans ce document sont basées sur les versions de matériel et de logiciel suivantes :

- Le serveur de Solution Cisco Easy VPN est un routeur 7200 (VXR) cette version de logiciel 12.4(4)T1 de Cisco IOS® de passages
- Le distant de Solution Cisco Easy VPN est un routeur 871W qui exécute la version du logiciel Cisco IOS 12.4(2)T1

Les informations contenues dans ce document ont été créées à partir des périphériques d'un environnement de laboratoire spécifique. Tous les périphériques utilisés dans ce document ont démarré avec une configuration effacée (par défaut). Si votre réseau est opérationnel, assurez-vous que vous comprenez l'effet potentiel de toute commande.

Conventions

Pour plus d'informations sur les conventions utilisées dans ce document, reportez-vous à [Conventions relatives aux conseils techniques Cisco](#).

Configurez

Cette section vous fournit des informations pour configurer les fonctionnalités décrites dans ce document.

Remarque: Utilisez l'outil [Command Lookup Tool](#) (clients [enregistrés](#) seulement) pour trouver plus d'informations sur les commandes utilisées dans ce document.

Diagramme du réseau

Ce document utilise la configuration réseau suivante :

Remarque: Les interfaces de bouclage simulent les PC intérieurs.

Configurations

Ce document utilise les configurations suivantes :

- [Serveur Easy VPN \(routeur de Cisco 7200VXR\)](#)
- [Easy VPN Remote \(routeur de Cisco 871W\)](#)

Serveur Easy VPN (routeur de Cisco 7200VXR)
