[Introduction](#)

Ce document fournit un exemple de configuration pour le tunnel IPsec de LAN à LAN (site à site) entre les appliances de sécurité de Cisco (ASA/PIX) et l'appliance de sécurité adaptable (ASA) 5505.

[Conditions préalables](#)

[Conditions requises](#)

Aucune spécification déterminée n'est requise pour ce document.

[Composants utilisés](#)

Les informations contenues dans ce document sont basées sur les versions de matériel et de logiciel suivantes :

- Gamme ASA de Cisco 5500 qui exécute les versions du logiciel 7.x et ultérieures
- ASA de Cisco 5505 qui exécute les versions 7.x du logiciel et ultérieures

Les informations contenues dans ce document ont été créées à partir des périphériques d'un environnement de laboratoire spécifique. Tous les périphériques utilisés dans ce document ont démarré avec une configuration effacée (par défaut). Si votre réseau est opérationnel, assurez-vous que vous comprenez l'effet potentiel de toute commande.

Produits connexes

Cette configuration peut également être utilisée avec les versions de matériel et de logiciel suivantes :

- Appliance de sécurité de la gamme PIX de Cisco 500 qui exécute les versions 7.x du logiciel et ultérieures
- ASA de Cisco 5505 qui exécute les versions 7.x du logiciel et ultérieures

Conventions

Pour plus d'informations sur les conventions utilisées dans ce document, reportez-vous à [Conventions relatives aux conseils techniques Cisco](#).

Configurer

Cette section vous fournit des informations pour configurer les fonctionnalités décrites dans ce document.

Remarque: Utilisez l'outil [Command Lookup Tool](#) (clients [enregistrés](#) seulement) pour obtenir plus d'informations sur les commandes utilisées dans cette section.

Diagramme du réseau

Ce document utilise la configuration réseau suivante :

Configurations

Vérifier

Référez-vous à cette section pour vous assurer du bon fonctionnement de votre configuration.

L'[Outil Interpréteur de sortie](#) (clients [enregistrés](#) uniquement) (OIT) prend en charge certaines commandes **show**. Utilisez l'OIT pour afficher une analyse de la sortie de la commande **show**.

- **show crypto isakmp sa** - Affiche toutes les associations de sécurité actuelles d'IKE (SA) sur un pair.
- **show crypto ipsec sa** - Affiche tous les IPsec SA actuels.

Cette section montre des configurations de vérification d'exemple pour :

- [Cisco 5505 ASA](#)
- [Cisco 5510 ASA](#)

Dépanner

Cette section fournit des informations que vous pouvez utiliser pour dépanner votre configuration.

Servez-vous de ces commandes comme montré :

- **clear crypto isakmp sa** - Efface la Phase 1 SAS. **Attention** : La commande **clear crypto isakmp sa** est intrusive et effacera tous les tunnels VPN actifs. Commençant par la version 8.0(3) du logiciel PIX/ASA, un IKE SA individuel peut être effacé en utilisant la commande **clear crypto isakmp sa <peer ip address>** . Avant la version 8.0(3) du logiciel, la commande [vpn-sessiondb](#)

[logoff tunnel-group <tunnel-group-name>](#) peut être utilisée pour effacer l'IKE et IPsec SA pour un tunnel simple.

```
ASA5505#vpn-sessiondb logoff tunnel-group 192.168.1.1
```

```
Do you want to logoff the VPN session(s)? [confirm] Y
```

```
