Introduzione

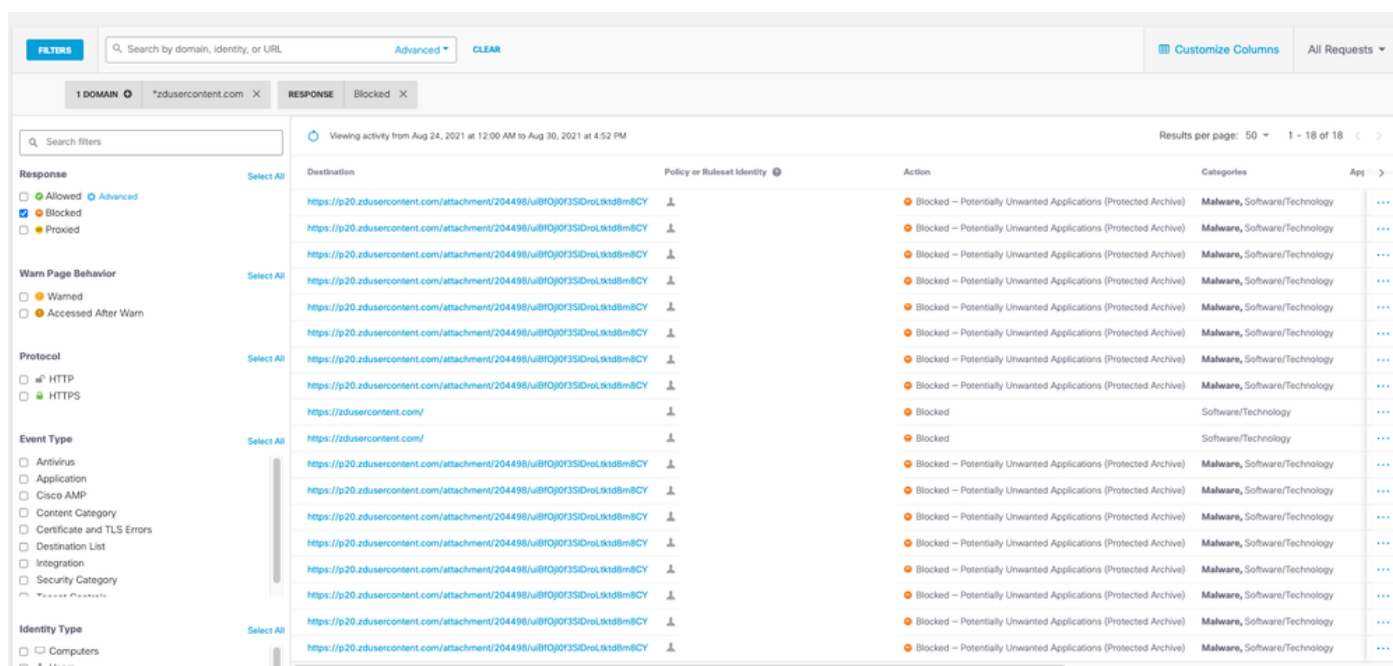

In questo documento viene descritto come utilizzare la ricerca con caratteri jolly nel Cisco Umbrella Activity Report.

Panoramica

È possibile utilizzare la funzione wildcard in Ricerca attività per analizzare le azioni intraprese su un dominio e sui relativi sottodomini. La posizione dell'asterisco nel dominio in cui viene eseguita la ricerca può produrre risultati diversi.

Usa asterisco (*) per la ricerca con caratteri jolly

Utilizzando *domain.com è possibile cercare tutti i domini e i sottodomini nella ricerca delle attività:

The screenshot displays the Cisco Umbrella Activity Report interface. At the top, there is a search bar with the text "Search by domain, identity, or URL" and a filter set to "Advanced". Below the search bar, the filter "1 DOMAIN" is selected, and the search criteria is "*zusercontent.com". The interface shows a list of activity records with columns for Destination, Policy or Ruleset Identity, Action, Categories, and App. The records show various blocked requests to "https://p20.zusercontent.com/attachment/204498/ulBFOJ0F3SDroL9k1d8m8CY" and "https://zusercontent.com/". The Action column indicates "Blocked - Potentially Unwanted Applications (Protected Archive)". The Categories column lists "Malware, Software/Technology". The App column shows "..." for each record.

Usando *.domain.com (notare "." dopo l'asterisco) può cercare solo tutti i sottodomini:

Se si utilizza domain.com (senza l'asterisco), è possibile cercare solo il dominio:
