[Introduzione](#)

Cisco VPN 3000 Concentrator può essere configurato per autenticare i client VPN Cisco tramite un server Security Dynamics International (SDI). Il concentratore VPN 3000 agisce come client SDI, comunicando con il server SDI sulla porta UDP (User Datagram Protocol) 5500. Nel documento seguente viene illustrato come verificare che il server SDI, VPN 3000 Concentrator e Cisco VPN Client funzionino correttamente e come combinare i componenti. Se il concentratore VPN 3000 non è stato ancora configurato, seguire la procedura descritta in [Installazione e configurazione di VPN 3000 Concentrator senza SDI](#) utilizzando l'interfaccia della riga di comando (CLI) per l'installazione e la configurazione iniziali. Se VPN 3000 Concentrator è stato configurato in precedenza, seguire la procedura per [modificare la configurazione esistente \(senza SDI\)](#).

[Prerequisiti](#)

[Requisiti](#)

Non sono previsti prerequisiti specifici per questo documento.

Componenti usati

Questa configurazione è stata sviluppata e testata utilizzando le versioni software e hardware riportate di seguito.

- Server SDI 3.3 (UNIX e NT)
- VPN 3000 Concentrator (2.5.2)
- VPN Client 2.5.2.A

Le informazioni discusse in questo documento fanno riferimento a dispositivi usati in uno specifico ambiente di emulazione. Su tutti i dispositivi menzionati nel documento la configurazione è stata ripristinata ai valori predefiniti. Se la rete è operativa, valutare attentamente eventuali conseguenze derivanti dall'uso dei comandi.

Convenzioni

Per ulteriori informazioni sulle convenzioni usate, consultare il documento [Cisco sulle convenzioni nei suggerimenti tecnici](#).

Premesse

Questo documento è relativo sia al client Cisco VPN 3000 (2.5.x) sia al client Cisco VPN (3.x). Con la versione 3.0 e successive è ora possibile configurare singoli server SDI per singoli gruppi anziché un server SDI definito a livello globale e utilizzato da tutti i gruppi. I gruppi per i quali non sono configurati server SDI singoli utilizzeranno il server SDI definito a livello globale.

Esistono tre tipi di nuove modalità PIN in SDI. VPN 3000 Concentrator supporta le prime due opzioni come mostrato di seguito.

- L'utente sceglie il nuovo PIN.
- Il server sceglie il nuovo PIN e ne informa gli utenti.
- Il server sceglie il nuovo PIN e ne informa gli utenti; gli utenti possono modificare il PIN.

Configurazione

In questa sezione vengono presentate le informazioni necessarie per configurare le funzionalità descritte più avanti nel documento.

Nota: per ulteriori informazioni sui comandi menzionati in questo documento, usare lo [strumento di ricerca dei comandi](#) (solo utenti [registrati](#)).

Esempio di rete

Questo documento utilizza le impostazioni di rete mostrate nel diagramma sottostante.

Configurazioni

Installazione e configurazione di VPN 3000 Concentrator senza SDI

Abbiamo configurato VPN 3000 Concentrator per autenticare localmente un utente in un gruppo; eseguendo questa operazione prima di aggiungere l'interfaccia SDI, è possibile verificare il corretto funzionamento di IPSec tra Cisco VPN Client e VPN 3000 Concentrator. La configurazione di VPN 3000 Concentrator è stata cancellata sulla porta della console passando a **Amministrazione > Riavvio del sistema > Pianifica riavvio > Riavvia con la configurazione di fabbrica/predefinita**.

Dopo il riavvio, è stata eseguita la seguente configurazione iniziale:

```

Configurazione VPN 3000 Concentrator

[Modifica configurazione esistente \(senza SDI\)](#)

Se VPN 3000 Concentrator è stato precedentemente configurato, per verificare le impostazioni di gruppo, utente e IPsec/IKE vengono utilizzate le schermate seguenti:

1. Utilizzare questa schermata per aggiungere un gruppo con autenticazione locale:

Configuration | User Management | Groups | Modify vpn3000

Check the **Inherit?** box to set a field that you want to default to the base group value. Uncheck the **Inherit?** box and enter a new value to override base group values.

Identity Parameters		
Attribute	Value	Description
Group Name	vpn3000	Enter a unique name for the group.
Password	*****	Enter the password for the group.
Verify	*****	Verify the group's password.
Type	Internal ▾	<i>External</i> groups are configured on an external authentication server (e.g. RADIUS). <i>Internal</i> groups are configured on the VPN 3000 Concentrator Series's Internal Database.

Apply Cancel

- Utilizzare questa schermata per aggiungere un utente al gruppo con autenticazione locale:

Check the **Inherit?** box to set a field that you want to default to the group value. Uncheck the **Inherit?** box and enter a new value to override group values.

Identity Parameters		
Attribute	Value	Description
User Name	<input type="text" value="37297304"/>	Enter a unique user name.
Password	<input type="password" value="*****"/>	Enter the user's password. The password must satisfy the group password requirements.
Verify	<input type="password" value="*****"/>	Verify the user's password.
Group	<input type="text" value="vpn3000"/>	Enter the group to which this user belongs.
IP Address	<input type="text"/>	Enter the IP address assigned to this user.
Subnet Mask	<input type="text"/>	Enter the subnet mask assigned to this user.

- Utilizzare la schermata di proposta IPsec > IKE per aggiungere le impostazioni IKE (le impostazioni visualizzate sono quelle predefinite del sistema):

Select an **Active Proposal** and click **Deactivate** to make it **Inactive**, or click **Move Up** or **Move Down** to change its priority.

Click **Add** or **Copy** to add a new **Inactive Proposal**. IKE Proposals are used by [Security Associations](#) to specify IKE parameters.

Active Proposals	Actions	Inactive Proposals
IKE-3DES-MD5 IKE-3DES-MD5-DH1 IKE-DES-MD5	<input type="button" value=" << Activate"/> <input type="button" value=" Deactivate >>"/> <input type="button" value=" Move Up"/> <input type="button" value=" Move Down"/> <input type="button" value=" Add"/> <input type="button" value=" Modify"/> <input type="button" value=" Copy"/> <input type="button" value=" Delete"/>	IKE-3DES-MD5-RSA IKE-3DES-SHA-DSA IKE-3DES-MD5-RSA-DH1

[Test di Cisco VPN Client e VPN 3000 Concentrator senza SDI](#)

Dopo aver modificato la configurazione esistente sul concentratore VPN 3000, si installa il client VPN Cisco e si configura una nuova connessione che terminerà a 172.18.124.134 (l'interfaccia pubblica del concentratore). Le informazioni di accesso al nostro gruppo erano "vpn3000" (il nome del gruppo) e la password del gruppo era la password del gruppo. Quando abbiamo fatto clic su **Connect**, il nome utente era "37297304" (nome utente) e la password utente era la password per l'utente (memorizzata localmente sul VPN 3000 Concentrator; non è ancora presente nessun SDI). Per il debug IKE, IKEDBG, IKEDECODE, IPSEC, IPSECDBG, IPSECDECODE, vedere [Buon debug IPsec con autenticazione locale](#).

[Test funzionamento server SDI senza concentratore VPN 3000](#)

UNIX (Solaris)

1. Sul server SDI, creare un account sditest usando lo strumento di amministrazione di Solaris. La voce /etc/passwd dovrebbe avere il seguente aspetto:

```
sditest:x:76:10:://local/0/sditest://local/0/opt/ace/prog/sdshell
```

Nota: i valori e i percorsi della home directory dell'utente e di "sdshell" dipendono dal sistema.
2. Assegnare un token a sditest.
3. Provare a collegarsi in modalità Telnet all'host UNIX come sditest. L'host richiede una password UNIX e il passcode. Dopo l'autenticazione, consente di accedere come host.

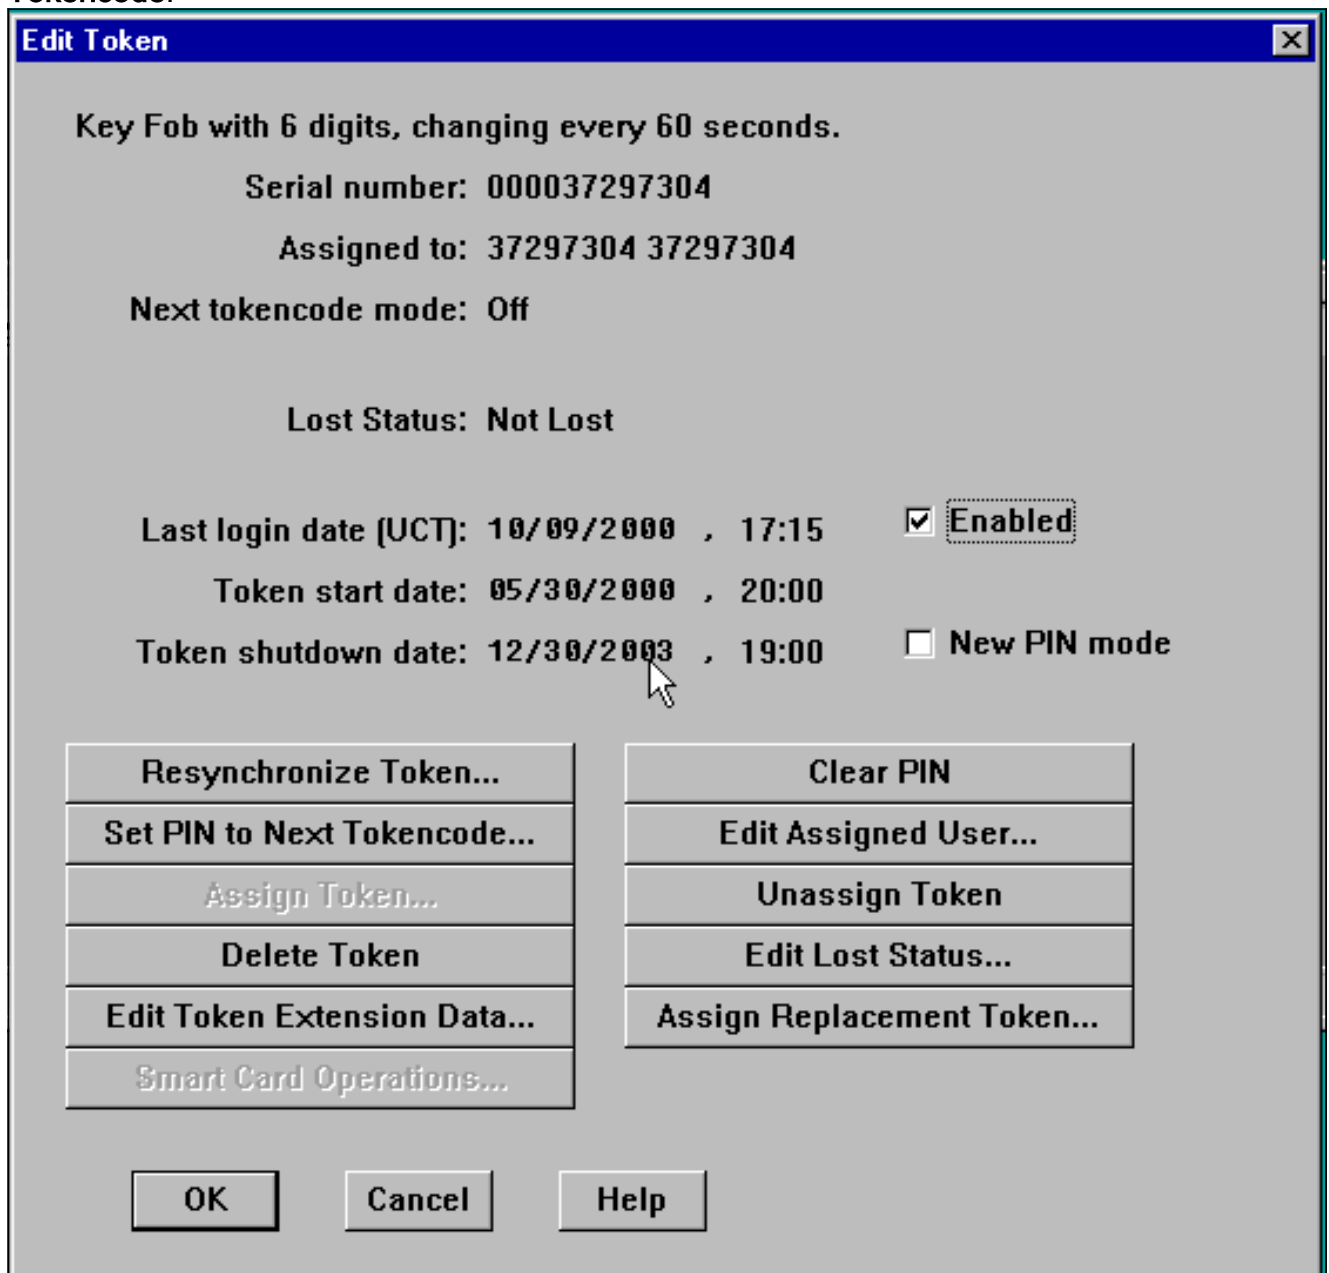

Microsoft Windows NT

1. Installare l'agente SecurSight.
2. Selezionare **Programmi > SecurSight > Test di autenticazione**.

Configurazione di SDI/User per la comunicazione con il concentratore VPN 3000

Per configurare SDI/User per la comunicazione con VPN 3000 Concentrator, attenersi alla procedura descritta di seguito.

1. Nella schermata SDI Server Edit Token, verificare che il token sia "Enabled" (Attivato) e non in modalità New PIN (Nuovo PIN).
2. Fare clic su **Resynchronize Token** e su **Set PIN to Next Tokencode**.

3. Nella schermata Modifica utente, assegnare un token all'utente e verificare che l'opzione "Consenti creazione PIN" non sia selezionata.
4. Fare clic su Attivazioni client e verificare che VPN 3000 Concentrator sia incluso.

Edit User

First and last name:

Default login:

Default shell:

Group Memberships...	Client Activations...	Edit User Extension Data...
Set/Change User Password...	Remove User Password	Edit Access Times...
Assign Profile...	Remove Profile Assignment	Delete User

OK Cancel Apply L/S Changes Set All L/S Help

Nota: il concentratore VPN 3000 è considerato un client del server SDI; la schermata seguente è quella relativa al server SDI Add/Edit Client. Poiché si tratta di un nuovo client, la casella Segreto nodo inviato è disattivata. Il server SDI non ha avuto la possibilità di inviare il file "node secret" al concentratore (questo file sarebbe visualizzato nella sezione **Amministrazione > Gestione file > File come "SECURID"**). Una volta completata l'autenticazione dalla VPN 3000, il file "node secret" viene visualizzato in VPN 3000 Concentrator e viene selezionata la casella "Sent Node Secret".

5. Fare clic su **Attivazioni utente** e verificare che l'utente sia incluso.

[Configurazione e test di VPN 3000 Concentrator su SDI](#)

Per configurare e provare VPN 3000 Concentrator su SDI, attenersi alla procedura descritta di seguito.

1. Utilizzare la schermata seguente per configurare VPN 3000 Concentrator per l'autenticazione a SDI:

Change a configured user authentication server.

Server Type

Selecting *Internal Server* will let you add users to the internal user database.

Authentication Server

Enter IP address or hostname.

Server Port

Enter 0 for default port (5500).

Timeout

Enter the timeout for this server (seconds).

Retries

Enter the number of retries for this server.

Apply

Cancel

2. Da SDI, selezionare Report > Log Monitor > Activity Monitor e fare clic su OK per osservare le richieste in arrivo.

3. Su VPN 3000 Concentrator, fare clic su **Test** per verificare la connessione.

This section lets you configure parameters for servers that authenticate users.

You should have a properly configured RADIUS, NT Domain, or SDI server to access, or you can configure the internal server and [add users to the internal database](#).

Click the **Add** button to add a server, or select a server and click **Modify**, **Delete**, **Move**, or **Test**.

Authentication Servers	Actions
<p>Internal (Internal) 172.18.124.99 (SDI)</p>	<p>Add Modify Delete Move Up Move Down Test</p>

4. Se l'autenticazione è valida, VPN 3000 Concentrator visualizza: **Autenticazione riuscita**
Nell'esempio precedente è stato definito un server SDI globale. È inoltre possibile scegliere di definire i singoli server SDI per ciascun gruppo andando a **Configurazione > Gestione utente > Gruppi**, evidenziando il rispettivo gruppo e scegliendo **Modifica server di autenticazione**.

Per informazioni sul debug, fare riferimento alle seguenti sezioni di questo documento:

- [Attivazione del debug sul concentratore VPN 3000](#)
- [Buon debug con SDI](#)
- [Debug non validi](#)

Verifica

Le informazioni contenute in questa sezione permettono di verificare che la configurazione funzioni correttamente.

Test di Cisco VPN Client su VPN 3000 Concentrator con SDI

Se tutto funziona fino a questo punto, è il momento di combinare Cisco VPN Client, VPN 3000

Concentrator e server SDI. È necessario apportare una modifica al VPN 3000 Concentrator modificando il gruppo di lavoro denominato "vpn3000" per inviare le richieste al server SDI.

Configuration | User Management | Groups | Modify vpn3000

Check the **Inherit?** box to set a field that you want to default to the base group value. Uncheck the **Inherit?** box and enter a new value to override base group values.

Identity General **IPSec** PPTP/L2TP

10/06/2000 12:33:07L ACCESS DENIED, PASSCODE Incorrect zekie.cisco.com

debug VPN 3000

249 10/06/2000 14:22:52.160 SEV=3 AUTH/5 RPT=6
Authentication rejected: Reason = Unspecified
handle = 16, server = 172.18.124.99, user = 37297304

Server SDI irraggiungibile o daemon non attivo

Debug SDI

Non visualizza nulla (non ha ricevuto richiesta)

debug VPN 3000

```
77 10/06/2000 14:28:55.600 SEV=4 AUTH/9 RPT=7
Authentication failed: Reason = Network error
handle = 17, server = 172.18.124.99, user = 37297304
```

[VPN 3000 non configurata come client sulla scatola SDI](#)

Debug SDI

```
10/06/2000 17:37:42U --/172.18.124.134 -->/
10/06/2000 13:36:42L Client Not Found zekie.cisco.com
```

debug VPN 3000

```
113 10/06/2000 15:26:27.440 SEV=3 AUTH/5 RPT=8
Authentication rejected: Reason = Unspecified
handle = 21, server = 172.18.124.99, user = 37297304
```

[VPN 3000 Concentrator rimosso come client dal server SDI, quindi riaggiunto](#)

Il server SDI ha tentato di inviare il file SECURID per sostituire quello precedente, ma VPN 3000 aveva già questo file.

Messaggio su SDI

```
10/06/2000 13:42:18L Node Verification Failed zekie.cisco.com
```

debug VPN 3000

```
21 10/06/2000 15:32:03.030 SEV=3 AUTH/5 RPT=9
Authentication rejected: Reason = Unspecified
handle = 22, server = 172.18.124.99, user = 37297304
```

Per risolvere il problema, eliminare il file SECURID sul concentratore VPN 3000 scegliendo **Amministrazione > Gestione file > File > SECURID > Elimina**. Al successivo test, VPN 3000 Concentrator accetta il nuovo file dal server SDI. Se la casella di controllo **Modifica client > Segreto nodo inviato** è disattivata sull'interfaccia SDI, il server SDI non è in grado di completare lo scambio. Quando VPN 3000 Concentrator ha il file SECURID, la casella di controllo **Segreto nodo inviato** è selezionata/non disattivata.
