Updated : 2023-05-30 14:22

Version : [1.2](#) : Final

CVSS Score : [6.1](#)

Workarounds : No workarounds available

Cisco ID : [CSCwc84104](#)

Summary

Details

Cisco Unified Intelligence

Center (CUIC) Web API XSS Vulnerability

The vulnerability exists in the Web API of the Cisco Unified Intelligence Center (CUIC) version 1.2.0.0. An attacker can exploit this vulnerability to execute arbitrary JavaScript code on the victim's browser.

The vulnerability is caused by a cross-site scripting (XSS) attack. An attacker can inject malicious JavaScript code into the web page through the Web API.

The severity of this vulnerability is Medium (CVSS Score: 6.1). There are no workarounds available for this vulnerability.
