

## APPENDIX **A**

# サポートされていないコマンド

Cisco ASR 1000 シリーズ ルータには、**platform** キーワードが指定された一連のコマンドがありますが、これらのコマンドとキーワードを入力しても、出力が生成されないか、またはお客様へのサービスには不要な出力が表示されます。**platform** キーワードを含むコマンドの中には、お客様へのサービスに有用な出力を表示するコマンドも存在し、そのようなコマンドは Cisco IOS XE コマンドリファレンスにも記載されていますが、大部分はお客様へのサービスにとって有用ではないため、サポート対象外として扱われます。

これらのコマンドはサポート対象外として扱われるため、シスコのマニュアルには情報を掲載していません。

次に、Cisco ASR 1000 シリーズ ルータでサポートされていないコマンドの一覧を示します。

- **clear platform hardware cpp**
- **clear platform software access-list**
- **clear platform software adjacency**
- **clear platform software cce**
- **clear platform software cef**
- **clear platform software cman**
- **clear platform software dpidb**
- **clear platform software ess**
- **clear platform software icmp**
- **clear platform software infrastructure**
- **clear platform software inspect**
- **clear platform software mlp**
- **clear platform software mpls**
- **clear platform software multicast**
- **clear platform software nat**
- **clear platform software nbar**
- **clear platform software netflow**
- **clear platform software pam**
- **clear platform software qos**
- **clear platform software route-map**
- **clear platform software shell**

- `clear platform software wecp`
- `clear platform software zone`
- `clear platform software zone-pair`
- `debug platform all`
- `debug platform hardware cpp`
- `debug platform software acl`
- `debug platform software adjacency`
- `debug platform software cce`
- `debug platform software cef`
- `debug platform software cman`
- `debug platform software configuration`
- `debug platform software dpidb`
- `debug platform software entity`
- `debug platform software ess`
- `debug platform software FPM`
- `debug platform software icmp`
- `debug platform software infrastructure`
- `debug platform software inspect`
- `debug platform software iphc`
- `debug platform software ipsec`
- `debug platform software issu`
- `debug platform software kernel`
- `debug platform software liin`
- `debug platform software marmot`
- `debug platform software mlp`
- `debug platform software mpls`
- `debug platform software multicast`
- `debug platform software nat`
- `debug platform software nbar`
- `debug platform software netflow`
- `debug platform software pam`
- `debug platform software qos`
- `debug platform software route-map`
- `debug platform software shell`
- `debug platform software urpf`
- `debug platform software vty`
- `debug platform software wecp`
- `debug platform software zone`

- `set platform software trace`
- `show crypto engine`
- `show platform hardware cpp` (すべてのコマンド)
- `show platform software access-list`
- `show platform software adjacency`
- `show platform software bound-uds`
- `show platform software cce statistics`
- `show platform software cef counters`
- `show platform software cman statistics`
- `show platform software common-classification`
- `show platform software debug`
- `show platform software diagnostic`
- `show platform software dpidb`
- `show platform software erspan`
- `show platform software ess`
- `show platform software firewall`
- `show platform software flow-control identifier`
- `show platform software fpm`
- `show platform software icmp`
- `show platform software icmp6`
- `show platform software infrastructure`
- `show platform software inspect statistics`
- `show platform software interface`
- `show platform software ip`
- `show platform software ipc`
- `show platform software iphc`
- `show platform software ipsec`
- `show platform software ipv6`
- `show platform software loadinfo`
- `show platform software mlist`
- `show platform software mlp`
- `show platform software mlppp`
- `show platform software module`
- `show platform software mpls`
- `show platform software multicast`
- `show platform software nat`
- `show platform software nbar`
- `show platform software netflow`

- **show platform software object-manager**
- **show platform software os-interface**
- **show platform software pam**
- **show platform software peer**
- **show platform software punt**
- **show platform software push-counter**
- **show platform software qos**
- **show platform software route-map**
- **show platform software sbc tables**
- **show platform software shell**
- **show platform software slot**
- **show platform software spi4**
- **show platform software urpf**
- **show platform software vlans**
- **show platform software vty**
- **show platform software wccp**
- **show platform software zone statistics**
- **test platform hardware eobc**
- **test platform hardware port**
- **test platform hardware slot**
- **test platform hardware subslot**
- **test platform software cef**
- **test platform software chassis**
- **test platform software debug**
- **test platform software forwarding-manager**
- **test platform software infrastructure**
- **test platform software inject**
- **test platform software process**
- **test platform software shell**
- **test platform software tdl**
- **test platform software trace**
