vraag

Hoe doe je Whitelist een Trusted Sender?

Antwoord

Voeg op de Cisco Email Security Appliance (ESA) zenders toe die u vertrouwt op de WHITELISTverzendgroep, omdat deze verzendgroep het beleid voor \$TRUSTED Mail Flow gebruikt. Leden van de verzendgroep WHITELIST zijn niet onderworpen aan snelheidsbeperking, en de inhoud van die zenders wordt niet gescand door Cisco IronPort AntiSpam-motor, maar wordt nog steeds gescand door de software van Sofobie tegen het virus.

Opmerking: standaard is het scannen tegen het virus ingeschakeld maar anti-Spam is uitgeschakeld.

Aan whitelist een zender, voegt u de zender toe aan de WHITELIST sender group in de Host Access Table (HAT). U kunt de HAT configureren via de GUI of de CLI.

Via de GUI

- 1. Klik op het tabblad Mail Policy.
- 2. Selecteer onder het gedeelte Host Access Tabel de optie HAT Overzicht,
- 3. Zorg er rechts voor dat de luisteraar van de inkomendeMail is geselecteerd,
- 4. Klik in de kolom Sender Group hieronder op WHITELIST,
- 5. Klik op de knop *Add Sender* onder in de helft van de pagina.
- 6. Voer de IP- of hostnaam in die u in het eerste veld wilt weergeven.

Klik op de knop *Indienen* als u klaar bent met het toevoegen van items. Denk eraan om op de knop *Aanpassen* aan *het* opdracht *wijzigen* te klikken om de wijzigingen op te slaan.

Van de CLI

```
example.com> listenerconfig
