[Introdução](#)

Este documento fornece uma configuração de exemplo de túnel de IPsec LAN para LAN (site para site) entre Cisco Security Appliances (ASA/PIX) e o Adaptive Security Appliance (ASA) 5505.

[Pré-requisitos](#)

[Requisitos](#)

Não existem requisitos específicos para este documento.

[Componentes Utilizados](#)

As informações neste documento são baseadas nestas versões de software e hardware:

- Cisco 5500 Series ASA com versão de software 7.x ou superior
- Cisco 5505 ASA com versão versão de software 7.x ou superior

As informações neste documento foram criadas a partir de dispositivos em um ambiente de laboratório específico. Todos os dispositivos utilizados neste documento foram iniciados com uma configuração (padrão) inicial. Se a sua rede estiver ativa, certifique-se de que entende o impacto potencial de qualquer comando.

[Produtos Relacionados](#)

Esta configuração também pode ser utilizada com estas versões de hardware e software:

- Cisco 500 Series PIX Security Appliance com versão de software 7.x ou posterior
- Cisco 5505 ASA com versão versão de software 7.x ou superior

Convenções

Consulte as [Convenções de Dicas Técnicas da Cisco](#) para obter mais informações sobre convenções de documentos.

Configurar

Nesta seção, você encontrará informações para configurar os recursos descritos neste documento.

Nota: Use a [Command Lookup Tool](#) ([somente clientes registrados](#)) para obter mais informações sobre os comandos usados nesta seção.

Diagrama de Rede

Este documento utiliza a seguinte configuração de rede:

Configurações

Este documento utiliza as seguintes configurações:

- [Configuração do Cisco 5505 ASA](#)
- [Configuração do Cisco 5510 ASA](#)

Verificar

Use esta seção para confirmar se a sua configuração funciona corretamente.

A [Output Interpreter Tool \(apenas para clientes registrados\)](#) (OIT) suporta determinados comandos show. Use a OIT para exibir uma análise da saída do comando show.

- **show crypto isakmp sa** — Exibe todas as associações de segurança atuais (SAs) de IKE em um peer.
- **show crypto ipsec sa** — Exibe todas as SAs IPsec atuais.

Esta seção mostra configurações de verificação do exemplo para:

- [Cisco 5505 ASA](#)
- [Cisco 5510 ASA](#)

```

Troubleshooting

Esta seção fornece informações que podem ser usadas para o troubleshooting da sua configuração.

Use estes comandos da forma mostrada:

- **clear crypto isakmp sa** — Cancela as SAs da fase 1. **Cuidado:** O comando **clear crypto isakmp sa** é intrusivo, o que significa que ele cancelará todos os túneis VPN ativos. A partir da versão 8.0(3) do software PIX/ASA, uma SA IKE pode ser cancelada com o comando **clear crypto isakmp sa <endereço IP do peer>**. Nas versões de software anteriores à 8.0(3), o comando [vpn-sessiondb logoff tunnel-group <nome do grupo de túneis>](#) pode ser usado para cancelar

```
