Introdução

Este documento descreve como remover usuários do painel do Secure Access fornecido pelo Microsoft Azure.

Pré-requisitos

Requisitos

A Cisco recomenda que você tenha conhecimento destes tópicos:

- Acesso seguro
- Microsoft Azure
- · Provisionamento de usuário usando Aplicativos Empresariais no Azure

Componentes Utilizados

As informações neste documento são baseadas nestas versões de software e hardware:

- Acesso seguro
- Microsoft Azure

As informações neste documento foram criadas a partir de dispositivos em um ambiente de laboratório específico. Todos os dispositivos utilizados neste documento foram iniciados com uma configuração (padrão) inicial. Se a rede estiver ativa, certifique-se de que você entenda o impacto potencial de qualquer comando.

Configurar

1. Identificar os usuários que precisam ser removidos

Identifique o usuário que precisa ser removido do painel.

- Navegue para a <u>IU do Secure Access</u>
- Connect > Users and Groups
- Neste exemplo, você verá como remover user2

-ili-ili- cisco	Secure Access										
::	Overview	Users and User Grou	ps								
**	Connect	Manage your organization's users and Once added, users and user groups c	ge your organization's users and user groups. To add new users and user groups, provision them through a supported identity provider. added, users and user groups can then be added to an access rule. Help C								
i	Resources	Users Groups					0				
U	Secure	lleare									
k	Monitor	Manage your organization's users	Manage your organization's users and their devices connections and enrollments. To add new users, click Provision Users. At anytime, you can disconnect or unenroll a user's device. HelpC								
2o	Admin	can disconnect or unenroll a user's									
A	Workflows	d Search by Oser Hanne	2103013								
		Name	Email	Source	Connected(VPN)	Enrolled(ZTNA) ①					
		user1	user1@conmicrosoft.com	Azure	0	0					
		user2	user2@onmicrosoft.com	Azure	0	0					

2. Remova os usuários desejados

Navegar para o portal do Azure

- Enterprise Applications
- Selecione seu provisionamento Enterprise Application
- Users and Groups, em seguida, escolha os usuários que deseja excluir
- Clique em Remove

	Microsoft Azure	𝒫 Search resources, services, and docs (G+/)	\geq	Ŗ	Q		?	ন্দ

Verificar a partir dos logs no Portal do Azure

Navegue até o Portal do Azure.

- Enterprise Applications
- Selecione seu provisionamento Enterprise Application
- Users and Groups
- Clique em View Provisioning logs

	~	Start provisioning Stop provision	sioning 🤇	Restart provisioning 🖉 Edit provisioning
(i) Overview				
$eta_{\!$		Current cycle status		Statistics to date
Manage		Incremental cycle completed.		
Provisioning		1009	% complete	 View provisioning details
Users and groups				\checkmark View technical information
Expression builder		Users		
Monitor		View provisioning logs		
Provisioning logs		then providenting logs		

• O registro indica Action asDisableWithStatus Successas, o que confirma a remoção do provisionamento do usuário no sistema de destino do Secure Access
