## [Introdução](#)

Este documento ilustra como configurar o cliente VPN 3.5 para Solaris 2.6 para conectar a um VPN 3000 concentrator.

## [Pré-requisitos](#)

### [Requisitos](#)

Antes de tentar utilizar esta configuração, verifique se os seguintes pré-requisitos são atendidos.

- Este exemplo usa a chave pré-compartilhada para a autenticação do grupo. O nome de usuário e senha (autenticação estendida) é verificado contra o base de dados interno do concentrador VPN.
- O cliente VPN deve corretamente ser instalado. Refira a [instalação do cliente VPN para Solaris](#) para detalhes na instalação.
- A conectividade IP deve existir entre o cliente VPN e a interface pública do concentrador VPN. A máscara de sub-rede e a informação de gateway devem ser ajustadas corretamente.

### [Componentes Utilizados](#)

As informações neste documento são baseadas nestas versões de software e hardware.

- Cisco VPN Client para a versão 3.5 de Solaris 2.6, imagem 3DES. (nome da imagem: vpnclient-solaris5.6-3.5.Rel-k9.tar.Z)
- Tipo do Cisco VPN concentrator: Rev do código de inicialização 3005: Altiga Networks/VPN versão do concentrador 2.2.int\_9 Rev do software do 19 de janeiro de 2000 05:36:41: Cisco Systems, Inc. /VPN 3000 Concentrator Series versão 3.1.Rel do 6 de agosto de 2001 13:47:37

As informações neste documento foram criadas a partir de dispositivos em um ambiente de laboratório específico. Todos os dispositivos utilizados neste documento foram iniciados com uma configuração (padrão) inicial. Se você estiver trabalhando em uma rede ativa, certifique-se de que entende o impacto potencial de qualquer comando antes de utilizá-lo.

## Convenções

Para obter mais informações sobre convenções de documento, consulte as [Convenções de dicas técnicas Cisco](#).

## Configurar

Nesta seção, você encontrará informações para configurar os recursos descritos neste documento.

**Nota:** Para localizar informações adicionais sobre os comandos usados neste documento, utilize a Ferramenta Command Lookup (somente clientes [registrados](#)).

## Diagrama de Rede

Este documento utiliza a instalação de rede mostrada no diagrama abaixo.

**Nota:** Para o cliente VPN 3.5 a conectar ao concentrador VPN, você precisa a versão 3.0 ou mais tarde o concentrador.

## Configurações

### Criando um perfil de usuário para a conexão

Os perfis de usuário são armazenados no diretório de /etc/CiscoSystemsVPNClient/Profiles. Estes arquivos de texto têm uma extensão do .pcf e contêm os parâmetros necessários

estabeleceram uma conexão a um concentrador VPN. Você pode criar um arquivo novo ou editar existente. Você deve encontrar um exemplo de perfil, `sample.pcf`, no diretório do perfil. Este exemplo segue o uso desse arquivo criar um perfil novo nomeado `toCORPORATE.pcf`.

```
[cholera]: ~ > cd /etc/CiscoSystemsVPNClient/Profiles/  
[cholera]: /etc/CiscoSystemsVPNClient/Profiles > cp sample.pcf toCORPORATE.pcf
```

Você pode usar seu editor de texto favorito para editar este arquivo novo, `toCORPORATE.pcf`. Antes de todas as alterações, o arquivo olha como o seguinte.

**Nota:** Se você quer usar o IPsec sobre o Network Address Translation (NAT), a entrada `EnableNat` na configuração abaixo deve dizer "`EnableNat=1`" em vez de "`EnableNat=0`."

```
[main]  
Description=sample user profile  
Host=10.7.44.1  
AuthType=1  
GroupName=monkeys  
EnableISPCConnect=0  
ISPCConnectType=0  
ISPCConnect=  
ISPCCommand=  
Username=chimchim  
SaveUserPassword=0  
EnableBackup=0  
BackupServer=  
EnableNat=0  
CertStore=0  
CertName=  
CertPath=  
CertSubjectName=  
CertSerialHash=00000000000000000000000000000000  
DHGroup=2  
ForceKeepAlives=0
```

Consulte [perfis do toUser](#) para uma descrição das palavras-chaves do perfil de usuário.

Para configurar com sucesso seu perfil, você precisa de conhecer, como um mínimo, seus valores equivalentes para a informação seguinte.

- O nome de host ou o endereço IP público do concentrador VPN (10.48.66.109)
- O nome do grupo (RemoteClient)
- O group password (Cisco)
- O username (Joe)

Edite o arquivo com sua informação de modo que seja similar ao seguinte.

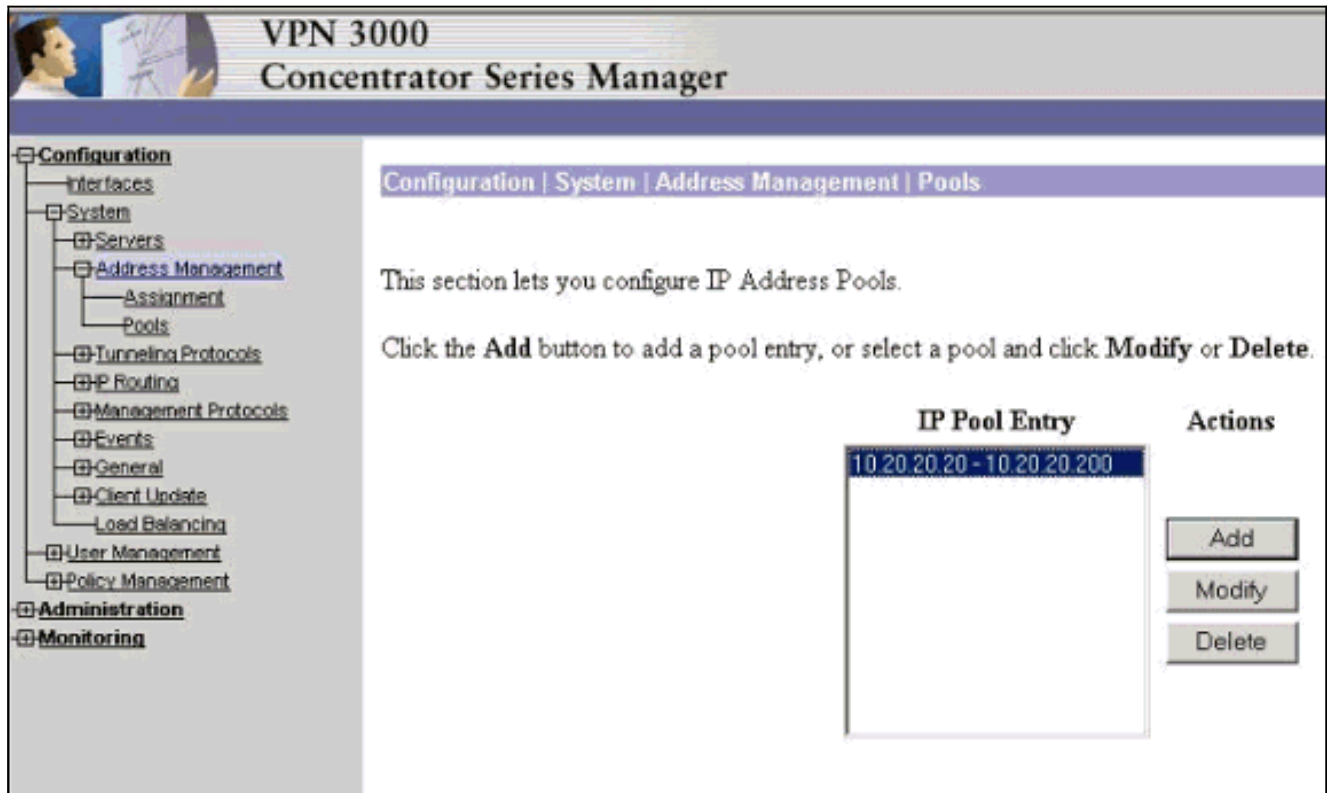

```
[main]  
Description=Connection to the corporate  
Host=10.48.66.109 AuthType=1 GroupName=RemoteClient GroupPwd=cisco EnableISPCConnect=0  
ISPCConnectType=0 ISPCConnect= ISPCCommand= Username=joe SaveUserPassword=0 EnableBackup=0  
BackupServer= EnableNat=0 CertStore=0 CertName= CertPath= CertSubjectName=  
CertSerialHash=00000000000000000000000000000000 DHGroup=2 ForceKeepAlives=0
```

## [Configurando o concentrador de VPN](#)

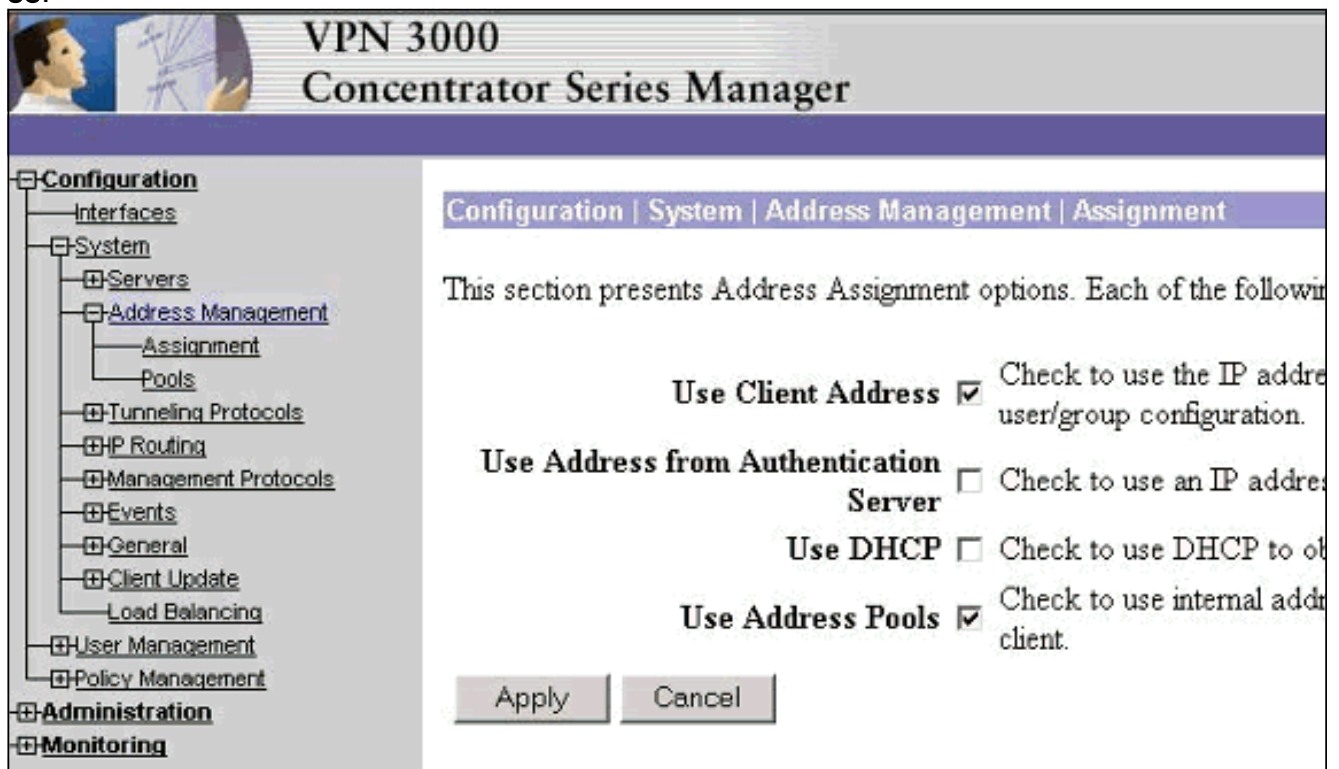

Use as seguintes etapas para configurar o concentrador VPN.

**Nota:** Devido às limitações de espaço, as capturas de tela mostram somente parcial ou áreas relevantes.

1. Atribua o conjunto de endereço. Para atribuir uma escala disponível dos endereços IP de Um ou Mais Servidores Cisco ICM NT, aponte um navegador à interface interna do concentrador VPN e selecione >Pools do configuração > sistema > gerenciamento de endereço. Clique em Add. Especifique uma faixa de endereços IP que não entrem em conflito com nenhum outro dispositivo na rede interna.

2. Para dizer o concentrador VPN para usar o pool, o configuração > sistema > gerenciamento de endereço > atribuição seletor, verifica a caixa dos conjuntos de endereços do uso, e clica então aplica-se.

3. Adicionar um grupo e uma senha. Selecione o configuration > user management > os

grupos, e clique-os então **adicionam o grupo**. Incorpore a informação correta, e clique-a então **adicionam** para submeter a informação. Este exemplo usa um grupo nomeado “RemoteClient” com uma senha de “Cisco.”

Configuration | User Management | Groups | Add

This section lets you add a group. Check the **Inherit?** box to set a field that you want to default to the base group value to override base group values.

Identity General IPsec Client FW PPTP/L2TP

Identity Parameters		
Attribute	Value	Description
Group Name	RemoteClient	Enter a unique name for the group.
Password	****	Enter the password for the group.
Verify	****	Verify the group's password.
Type	Internal <input type="checkbox"/>	External groups are configured on an external authentication server and are configured on the VPN 3000 Concentrator Series's Internal Data

Add Cancel

4. Na aba do IPsec do grupo, verifica que a autenticação está ajustada a **interno**.

Configuration | User Management | Groups | Modify RemoteClient

Check the **Inherit?** box to set a field that you want to default to the base group value to override base group values.

Identity General IPsec Client FW PPTP/L2TP

IPsec Parameters		
Attribute	Value	Inherit?
IPsec SA	ESP-3DES-MD5	<input checked="" type="checkbox"/>
IKE Peer Identity Validation	If supported by certificate	<input checked="" type="checkbox"/>
IKE Keepalives	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Reauthentication on Rekey	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Tunnel Type	Remote Access	<input checked="" type="checkbox"/>
Remote Access Parameter		
Group Lock	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Authentication	Internal	<input checked="" type="checkbox"/>

5. No tab geral do grupo, verifique que o **IPsec** está selecionado como os protocolos de tunelamento.

General Parameters			
Attribute	Value	Inherit?	
Access Hours	-No Restrictions-	<input checked="" type="checkbox"/>	Select the
Simultaneous Logins	3	<input checked="" type="checkbox"/>	Enter the t
Minimum Password Length	8	<input checked="" type="checkbox"/>	Enter the t
Allow Alphabetic-Only Passwords	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Enter whe be added
Idle Timeout	30	<input checked="" type="checkbox"/>	(minutes) I
Maximum Connect Time	0	<input checked="" type="checkbox"/>	(minutes) I

Tunneling Protocols	<input type="checkbox"/> PPTP <input type="checkbox"/> L2TP <input checked="" type="checkbox"/> IPsec <input type="checkbox"/> L2TP over IPsec	<input type="checkbox"/>	Select the
			Check to

6. Para adicionar o usuário ao concentrador VPN, o **configuration > user management** seletor > **os usuários**, e clicá-lo então **adicionam**.

- [-] Configuration
  - [-] Interfaces
  - [-] System
  - [-] User Management
    - [-] Base Group
    - [-] Groups
    - [-] Users
  - [-] Policy Management
- [-] Administration
- [-] Monitoring

Configuration | User Management | Users

This section lets you configure users.

Click the **Add** button to add a user, or select a user and click **Modify** or **Delete**.

Current Users	Actions
Bredford-3002 itmcs-800	<input type="button" value="Add"/> <input type="button" value="Modify"/> <input type="button" value="Delete"/>

7. Incorpore a informação correta para o grupo, e clique-a então **aplica-se** para submeter a informação.

Configuration | User Management | Users | Modify joe

Check the **Inherit?** box to set a field that you want to default to the group value. Uncheck the **Inherit?** box to set a field that you want to default to the group values.

Identity General IPSec PPTP/L2TP

Identity Parameters		
Attribute	Value	Description
User Name	joe	Enter a unique user name.
Password	*****	Enter the user's password. The password must satisfy the
Verify	*****	Verify the user's password.
Group	RemoteClient <input type="checkbox"/>	Enter the group to which this user belongs.
IP Address	<input type="text"/>	Enter the IP address assigned to this user.
Subnet Mask	<input type="text"/>	Enter the subnet mask assigned to this user.

Apply Cancel

## [Verificar](#)

## [Conectando ao concentrador de VPN](#)

Agora que o cliente VPN e o concentrador são configurados, o perfil novo deve trabalhar para conectar ao concentrador VPN.

```
91 [cholera]: /etc/CiscoSystemsVPNClient > vpnclient connect toCORPORATE Cisco Systems VPN

## [Troubleshooting](#)

Esta seção fornece informações que podem ser usadas para o troubleshooting da sua configuração.

## [Debugs](#)

Para permitir debuga, usam o **comando ipseclog**. Um exemplo é mostrado abaixo.

[cholera]: /etc/CiscoSystemsVPNClient > ipseclog /tmp/clientlog

## Debugar no cliente ao conectar ao concentrador

```

## [Debuga no concentrador VPN](#)

O configuração > sistema > eventos > classes seletor para girar sobre o seguinte debuga se há umas falhas da conexão dos eventos.

- **AUTH** - Severidade para registrar 1-13
- **IKE** - Severidade para registrar 1-6
- **IPSEC** - Severidade para registrar 1-6

The screenshot shows the configuration interface for the 'Classes' section. On the left is a navigation tree with 'Events' > 'Classes' selected. The main content area has a breadcrumb 'Configuration | System | Events | Classes' and introductory text: 'This section lets you configure special handling of specific event classes. Click the **Add** button to add an event class, or select an event class and click **Mod**. [Click here to configure general event parameters.](#)'

Configured Event Classes	Actions
AUTH	<input type="button" value="Add"/> <input type="button" value="Modify"/> <input type="button" value="Delete"/>
IKE	
IPSEC	

Você pode ver o log selecionando a **monitoração > o log de eventos**.
