简介

本文描述如何解决没有显示为单站点，然而为未分配设备NetFlow数据的问题。

背景信息

如果规则没有适当地被宣称在**Services>应用程序可见性&控制>终端关联**那么您面对此问题。

在宣称同样以后我们能发现流量分类到对应的站点。

为站点没显示的NetFlow数据。

http://www.cisco.com/c/en/us/td/docs/net_mgmt/prime/infrastructure/3-0/administrator/guide/PIAdminBook/metrics.html

步骤

如镜像所显示，遵从步骤：

Step 1 Create a site structure for your organization and assign your principal routers to the appropriate sites:

- a. Choose **Maps > Site Maps**.
- b. Add one or more campuses, buildings, and floors (for details, see "Working With Maps").

Step 2 Associate your sites with authorized data sources:

- a. Choose **Services > Application Visibility & Control > Data Deduplication**.
- b. Click **Enable Data Deduplication**, then click **Apply**. You can then assign authoritative sources for ART, Traffic Analysis and Voice/Video data (see "Enabling Data Deduplication").

Step 3 Associate your sites with endpoint subnets:

- a. Choose **Services > Application Visibility & Control > Endpoint Association**.
- b. Associate subnets with your sites (see "Associating Endpoints With Sites").

If you fail to do this, by default the data collected for these endpoints will have their sites set to **Unassigned**.

Step 4 Configure your compatible routers for Cisco Medianet Performance Monitor (see "Configuring Mediatrace on Routers and Switches").

Step 5 Configure your routers for Mediatrace and WSMA (see "Using Mediatrace").
