

在PI3.0- NetFlow数据数据显示的问题各自的站点的

目录

[简介](#)

[背景信息](#)

[步骤](#)

简介

本文描述如何解决没有显示为单站点，然而为未分配设备NetFlow数据的问题。

背景信息

如果规则没有适当地被宣称在**Services>应用程序可见性&控制>终端关联**那么您面对此问题。

在宣称同样以后我们能发现流量分类到对应的站点。

为站点没显示的NetFlow数据。

http://www.cisco.com/c/en/us/td/docs/net_mgmt/prime/infrastructure/3-0/administrator/guide/PIAdminBook/metrics.html

步骤

如镜像所显示，遵从步骤：

Step 1 Create a site structure for your organization and assign your principal routers to the appropriate sites:

- a. Choose **Maps > Site Maps**.
- b. Add one or more campuses, buildings, and floors (for details, see "Working With Maps").

Step 2 Associate your sites with authorized data sources:

- a. Choose **Services > Application Visibility & Control > Data Deduplication**.
- b. Click **Enable Data Deduplication**, then click **Apply**. You can then assign authoritative sources for ART, Traffic Analysis and Voice/Video data (see "Enabling Data Deduplication").

Step 3 Associate your sites with endpoint subnets:

- a. Choose **Services > Application Visibility & Control > Endpoint Association**.
- b. Associate subnets with your sites (see "Associating Endpoints With Sites").

If you fail to do this, by default the data collected for these endpoints will have their sites set to "Unassigned".

Step 4 Configure your compatible routers for Cisco Medianet Performance Monitor (see "Configuring Mediatrace on Routers and Switches").

Step 5 Configure your routers for Mediatrace and WSMA (see "Using Mediatrace").
