6.在本示例中，已建立WLAN且已配置身份驗證設定。

現在，導航到要在其上使用SGT的策略配置檔案。

i.在CTS Policy下，啟用Inline Tagging和SGACL Enforcement，您還可以指定Default SGT。本實驗使用預設SGT 2作為示例：

ISE 組態

1.定位至管理>網路資源>網路裝置。

i.在此處新增WLC資訊：

The screenshot shows the Cisco ISE Administration console. The top navigation bar includes 'Cisco ISE' and 'Administration - Network Resources'. The left sidebar has 'Network Devices' selected. The main content area is titled 'Network Devices' and shows a form for adding a new device. The 'Name' field is filled with '9800labWLC'. The 'Description' field is empty. The 'IP Address' field is filled with '10.48.38.67' and the 'Subnet' field is filled with '32'. There is a 'Set To Default' link next to the IP address field.

「ISE網路裝置」頁面

The screenshot shows the 'RADIUS Authentication Settings' for the '9800labWLC' device. The 'Device Profile' is set to 'Cisco'. The 'Model Name' and 'Software Version' fields are empty. The 'Network Device Group' is set to 'All Locations'. The 'Location' is set to 'All Locations'. The 'IPSEC' is set to 'No'. The 'Device Type' is set to 'All Device Types'. The 'RADIUS Authentication Settings' section is expanded, showing 'RADIUS UDP Settings'. The 'Protocol' is set to 'RADIUS'. The 'Shared Secret' is masked with '*****'. There is a 'Show' link next to the 'Shared Secret' field. The 'Use Second Shared Secret' checkbox is unchecked. The 'Second Shared Secret' field is empty.

ISE新增WLC RADIUS資訊

二。向下滾動並配置Advanced TrustSec Settings，啟用Use Device ID for TrustSec Identification覈取方塊並配置密碼：

The screenshot shows the Cisco ISE Administration console. The top navigation bar includes the Cisco ISE logo and the path "Administration > Network Resources". Below this, a horizontal menu contains "Network Devices", "Network Device Groups", "Network Device Profiles", "External RADIUS Servers", and "RADIUS Server Sequences". The "Network Devices" section is expanded on the left, showing "Network Devices", "Default Device", and "Device Security Settings". The main content area displays the "Advanced TrustSec Settings" configuration page. It features a checked checkbox for "Advanced TrustSec Settings" and a checked checkbox for "Device Authentication Settings". Under "Device Authentication Settings", the "Use Device ID for TrustSec Identification" checkbox is checked. The "Device Id" field is populated with "9800labWLC". The "Password" field is masked with dots, and a "Show" link is visible to the right.

高級TrustSec設定

此專案必須與WLC組態步驟6中WLC一端的組態相符。

三。向下滾動到TrustSec通知和更新，並配置是否要使用CoA或SSH進行配置更新。選擇所需的ISE節點：

The screenshot shows the Cisco ISE Administration console. The top navigation bar includes the Cisco ISE logo and the path "Administration > Network Resources". Below this, a horizontal menu contains "Network Devices", "Network Device Groups", "Network Device Profiles", "External RADIUS Servers", "RADIUS Server Sequences", and "NAC Managers". The "Network Devices" section is expanded on the left, showing "Network Devices", "Default Device", and "Device Security Settings". The main content area displays the "TrustSec Notifications and Updates" configuration page. It features several configuration options: "Download environment data every" set to 10 seconds, "Download peer authorization policy every" set to 10 seconds, "Reauthentication every" set to 1 day, and "Download SGACL lists every" set to 10 seconds. There are two checked checkboxes: "Other TrustSec devices to trust this device" and "Send configuration changes to device". Under "Send configuration changes to device", the "CoA" radio button is selected, and the "CLI (SSH)" radio button is unselected. The "Send from" dropdown menu is set to "varusrin-ise", and a "Test connection" link is visible to the right. The "Ssh Key" field is empty.

2.按Test connection以確保已建立連線。當它成功時，它將顯示綠色勾選標籤：

☒ Send configuration changes to device

二。儲存組態。

3.在「工作中心」>「TrustSec」>「概觀」中，您有TrustSec配置選項。選擇TrustSec AAA Server以檢視正在使用的ISE例項。如果有多個例項，請參閱[Cisco Catalyst無線基於組的策略](#)，瞭解有關使用哪個例項的詳細資訊。

TrustSec Overview

1. Prepare

Plan Security Groups
Identify resources that require different levels of protection
Classify the users or clients that will access those resources
Objective is to identify the minimum required number of Security Groups, as this will simplify management of the matrix

Preliminary Setup
Set up the **TrustSec AAA server**.
Set up TrustSec **network devices**
Check default TrustSec **settings** to make sure they are acceptable.
If relevant, set up **TrustSec-ACI** policy group exchange to enable consistent policy across your network.
Consider activating the **workflow process** to prepare staging policy with an approval process.

2. Define

Create Components
Create **security groups** for resources, user groups and Network Devices as defined in the preparation phase. Also, examine if default SGTs can be used to match the roles defined.
Define the **network device authorization policy** by assigning SGTs to network devices.

Policy
Define **SGACLs** to specify egress policy.
Assign SGACLs to cells within the **matrix** to enforce security.

Exchange Policy
Configure **SXP** to allow distribution of IP to SGT mappings directly to TrustSec enforcement devices.

3. Go Live & Monitor

Push Policy
Push the **matrix** policy live.
Push the **SGTs, SGACLs** and the **matrix** to the network devices

Real-time Monitoring
Check **dashboards** to monitor current access.

Auditing
Examine **reports** to check access and authorization is as intended.

ISE TrustSec概述

4. (可選) 導航到Settings頁籤，啟用Automatic verification after every deploy (如果可取)。

您可以保留預設值，但在本實驗中，我們使用以下配置作為示例：

網路裝置授權

7.在Components頁籤下建立SGACL，然後建立Security Group ACL:

安全群組ACL

8.在TrustSec Policy頁籤下指定矩陣條目，然後在Matrix下指定。您可以通過按一下兩個SGT的交匯點來編輯許可權：

ISE TrustSec矩陣

舉例來說：

Edit Permissions...

附註：在允許清單模式的情況下，您需要明確允許客戶端裝置的DHCP協定來獲取DHCP IP地址，然後請求控制器執行SGACL策略。

附註：當TrustSec策略「未知到未知」在TrustSec矩陣中被拒絕時，客戶端接收零SGT值，DHCP客戶端接收自動私有IP定址(APIPA)地址。

當TrustSec矩陣中允許TrustSec策略「未知到未知」時，客戶端接收正確的SGT值，DHCP客戶端接收IP地址。

9.按一下Deploy。這將產生以下消息和通知：

Completed sending 2 TrustSec CoA notifications to 2 relevant network devices.

Ok

There are TrustSec configuration changes that has not been notified to network devices. To notify the relevant network devices about these changes click the push button.

10. 導航到Policy > Policy Sets下的Policy Set for the WLAN:
