

LISP Delegate Database Tree (DDT)

- [Finding Feature Information, on page 1](#)
- [Information About Delegate Database Tree \(DDT\), on page 1](#)

Finding Feature Information

Your software release may not support all the features documented in this module. For the latest caveats and feature information, see [Bug Search Tool](#) and the release notes for your platform and software release. To find information about the features documented in this module, and to see a list of the releases in which each feature is supported, see the feature information table.

Use Cisco Feature Navigator to find information about platform support and Cisco software image support. To access Cisco Feature Navigator, go to www.cisco.com/go/cfn. An account on Cisco.com is not required.

Information About Delegate Database Tree (DDT)

Overview of LISP Delegate Database Tree (DDT)

You can use LISP Delegate Database Tree (DDT) commands to deploy a distributed LISP Mapping System. A detailed configuration guide and examples are under development and will appear here soon. Meanwhile, please refer to the *LISP Command Reference*.
