

# **IPv6 Neighbor Discovery Cache**

The IPv6 neighbor discovery cache feature allows static entries to be made in the IPv6 neighbor cache.

The per-interface neighbor discovery cache limit function can be used to prevent any particular customer attached to an interface from overloading the neighbor discovery cache, whether intentionally or unintentionally.

### **Finding Feature Information**

Your software release may not support all the features documented in this module. For the latest caveats and feature information, see Bug Search Tool and the release notes for your platform and software release. To find information about the features documented in this module, and to see a list of the releases in which each feature is supported, see the feature information table.

Use Cisco Feature Navigator to find information about platform support and Cisco software image support. To access Cisco Feature Navigator, go to <a href="https://www.cisco.com/go/cfn">www.cisco.com/go/cfn</a>. An account on Cisco.com is not required.

# Information About IPv6 Static Cache Entry for Neighbor Discovery

### **IPv6 Neighbor Discovery**

The IPv6 neighbor discovery process uses ICMP messages and solicited-node multicast addresses to determine the link-layer address of a neighbor on the same network (local link), verify the reachability of a neighbor, and track neighboring devices.

The IPv6 static cache entry for neighbor discovery feature allows static entries to be made in the IPv6 neighbor cache. Static routing requires an administrator to manually enter IPv6 addresses, subnet masks, gateways, and corresponding Media Access Control (MAC) addresses for each interface of each device into a table. Static

routing enables more control but requires more work to maintain the table. The table must be updated each time routes are added or changed.

### **Per-Interface Neighbor Discovery Cache Limit**

The number of entries in the Neighbor Discovery cache can be limited by interface. Once the limit is reached, no new entries are allowed. The per-interface Neighbor Discovery cache limit function can be used to prevent any particular customer attached to an interface from overloading the Neighbor Discovery cache, whether intentionally or unintentionally.

When this feature is enabled globally, a common per-interface cache size limit is configured on all interfaces on the device. When this feature is enabled per interface, a cache size limit is configured on the associated interface. The per-interface limit overrides any globally configured limit.

# **How to Configure IPv6 Neighbor Discovery Cache**

### Configuring a Neighbor Discovery Cache Limit on a Specified Interface

#### **SUMMARY STEPS**

- 1. enable
- 2. configure terminal
- **3. interface** *type number*
- 4. ipv6 nd cache interface-limit size [log rate]

#### **DETAILED STEPS**

	Command or Action	Purpose	
Step 1	enable	Enables privileged EXEC mode.	
	Example:	• Enter your password if prompted.	
	Device> enable		
Step 2	configure terminal	Enters global configuration mode.	
	Example:		
	Device# configure terminal		
Step 3	interface type number	Specifies an interface type and number, and places the device in interface configuration mode.	
	Example:		
	Device(config)# interface GigabitEthernet 1/0/0		
Step 4	ipv6 nd cache interface-limit size [log rate]	Configures a Neighbor Discovery cache limit on a specified interface on the device.	
	Example:		

Command or Action	Purpose
Device(config-if)# ipv6 nd cache interface-limit 1	<ul> <li>Issuing this command overrides any configuration that may have been created by issuing the ipv6 nd cache interface-limit in global configuration mode.</li> </ul>

### **Configuring a Neighbor Discovery Cache Limit on All Device Interfaces**

#### **SUMMARY STEPS**

- 1. enable
- 2. configure terminal
- 3. ipv6 nd cache interface-limit size [log rate]

#### **DETAILED STEPS**

	Command or Action	Purpose
Step 1	enable	Enables privileged EXEC mode.
	Example:	• Enter your password if prompted.
	Device> enable	
Step 2	configure terminal	Enters global configuration mode.
	Example:	
	Device# configure terminal	
Step 3	ipv6 nd cache interface-limit size [log rate]  Example:	Configures a neighbor discovery cache limit on all interfaces on the device.
	Device(config)# ipv6 nd cache interface-limit 4	

# **Configuration Examples for IPv6 Neighbor Discovery Cache**

### **Example: Configuring a Neighbor Discovery Cache Limit**

Device# show ipv6 interface GigabitEthernet2/0/0

Interface GigabitEthernet2/0/0, entries 2, static 0, limit 4

The Cisco Support and Documentation website provides online resources to download documentation, software, and tools. Use these resources to install and configure the software and to troubleshoot and resolve technical issues with Cisco products and technologies. Access to most tools on the Cisco Support and Documentation website requires a Cisco.com user ID and password.	

# Feature Information for IPv6 Neighbor Discovery Cache

The following table provides release information about the feature or features described in this module. This table lists only the software release that introduced support for a given feature in a given software release train. Unless noted otherwise, subsequent releases of that software release train also support that feature.

Use Cisco Feature Navigator to find information about platform support and Cisco software image support. To access Cisco Feature Navigator, go to www.cisco.com/go/cfn. An account on Cisco.com is not required.

Table 1: Feature Information for IPv6 Neighbor Discovery Cache

Feature Name	Releases	Feature Information
IPv6: Per-Interface Neighbor	15.1(1)SY	The per-interface neighbor
Discovery Cache Limit		discovery cache limit function can be used to prevent any particular
	Cisco IOS XE Release 2.6	customer attached to an interface from overloading the neighbor discovery cache, whether intentionally or unintentionally.
		The following commands were introduced or modified: ipv6 nd cache interface-limit, show ipv6 interface.
IPv6 Static Cache Entry for	12.2(8)T	The IPv6 static cache entry for Neighbor Discovery feature allows static entries to be made in the IPv6 neighbor cache.
Neighbor Discovery	12.2(17)SX1	
	12.2(25)SEA	
	12.2(25)SG	The following commands were introduced or modified: ipv6 nd cache interface-limit, show ipv6 interface.
	12.2(33)SRA	
	15.3(1)S	
	Cisco IOS XE Release 2.1	
	15.0(2)SG
