

## New and Changed Information

[Table 1](#) summarizes the new and changed features for the Cisco MDS 9000 Family Command Reference, and tells you where they are documented. If a feature has changed in Release 1.2(2a), a brief description of the change appears in the “Description” column, and that release is shown in the “Changed in Release” column.

**Table 1 Documented Features for the Cisco MDS 9000 Family Command Reference**

Feature	Description	Changed in Release	Where Documented
ASM-specific configuration	The <b>attach module</b> commands, the <b>attachpriv module</b> command, the <b>asm mgmt-vsan</b> command, the <b>interface cpp command</b> , and the <b>show asm</b> command.	1.2(2a)	Advanced Services Module Commands
Line console configuration	The <b>line console</b> command.	1.2(2a)	L Commands
Modem connection	The <b>modem connect line</b> command.	1.2(2a)	M Commands
Deleting directories	The <b>delete</b> command	All	D Commands

[Table 2](#) contains the history of the changes to the Cisco MDS 9000 Family Command Reference, Release 1.2(2a). When the document is updated for the next release, these changes are incorporated into the new revision and will no longer appear in this table.

**Table 2 Documentation Changes for Cisco MDS 9000 Family Command Reference, Release 1.2(2a)**

Date	Description of Change	Where Changed
10/21/2003	Document created	---
01/30/2004	The <b>tcp sack-enable</b> command	<i>T Commands</i>
