Guest Internet and Conference Center Infrastructure

&

Using Virtualization as value added service over the existing infrastructure

Cisco Systems Itinerary

Router 2800

Router 1800

x 9 * Router 1800

X 2

Wireless LAN Controllers

Wireless Control System
(WCS)

X 8

Catalyst 2960

X 110

AP 1242

Why all this in a single Hotel Property ?

- Because of best signal “delivery”
- Spotless **roaming**, in the Conference areas
- Flawless management of all components
- **PROOF TO THE CLIENT**

My classic phrase

The Internet Bandwidth utilization and WiFi services are invisible to the client

What needs to be made visible is:

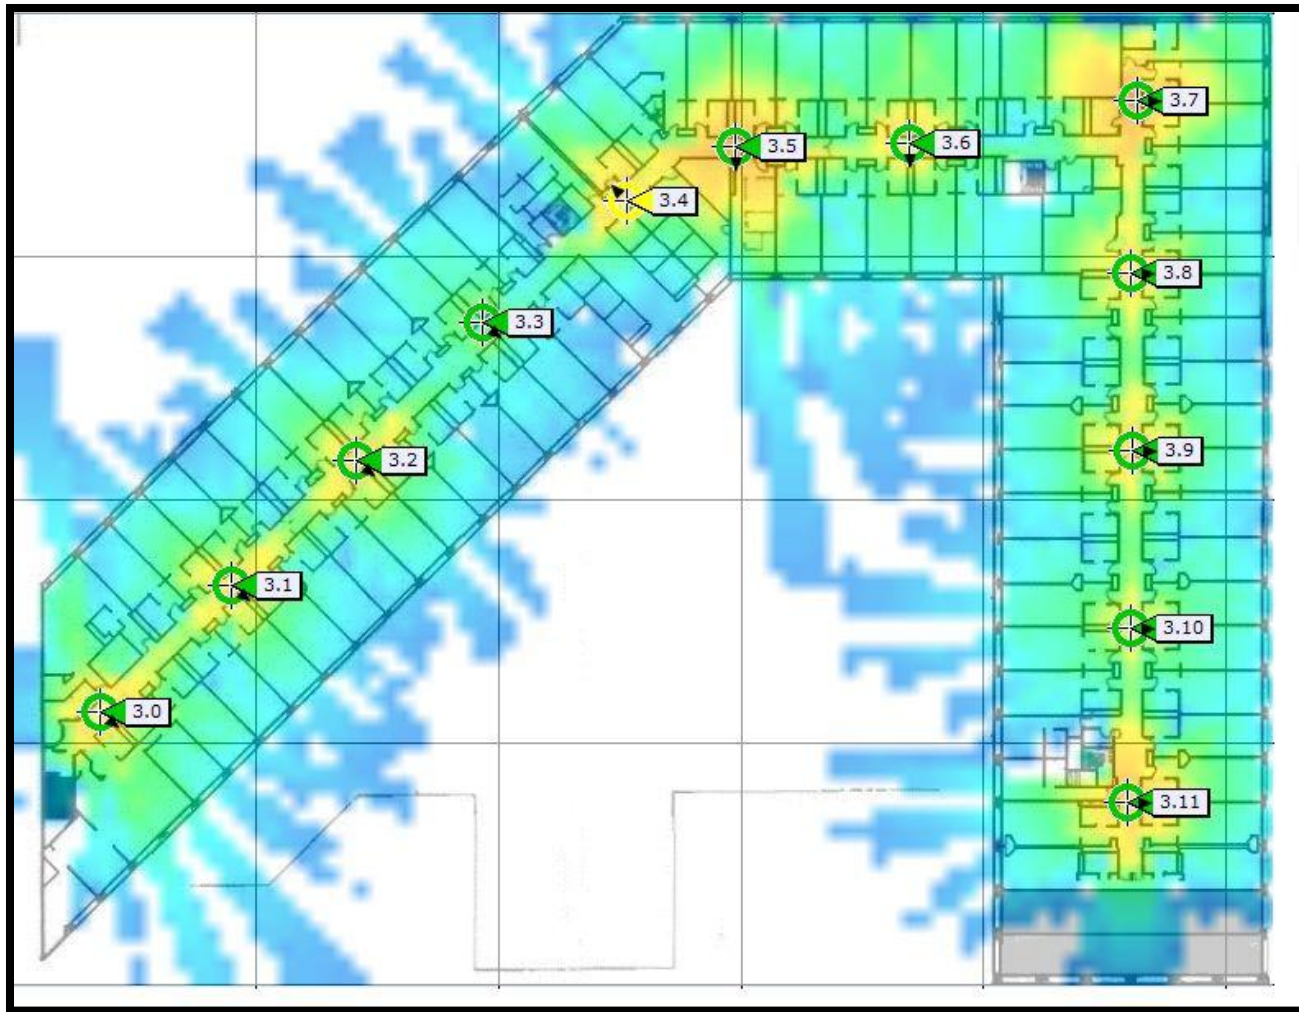

1. The Signal Coverage
2. Concurrent WiFi Connections
3. Bandwidth

Conference are – 2 level

Client Count

Generated: Mon Sep 29 13:50:15 EEST 2008

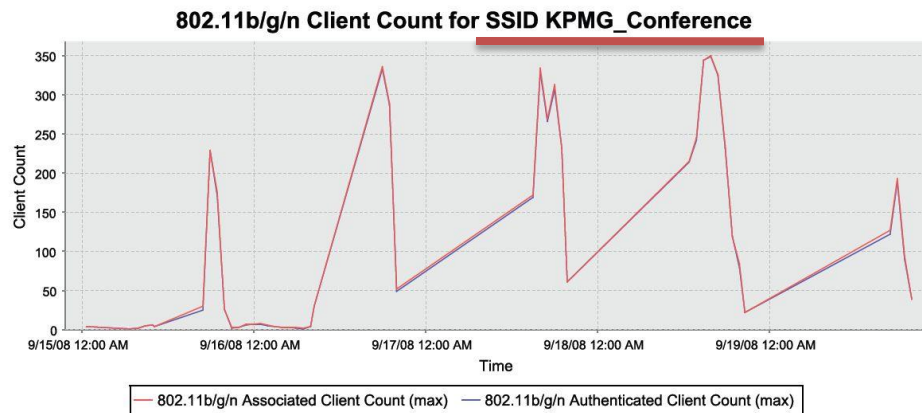

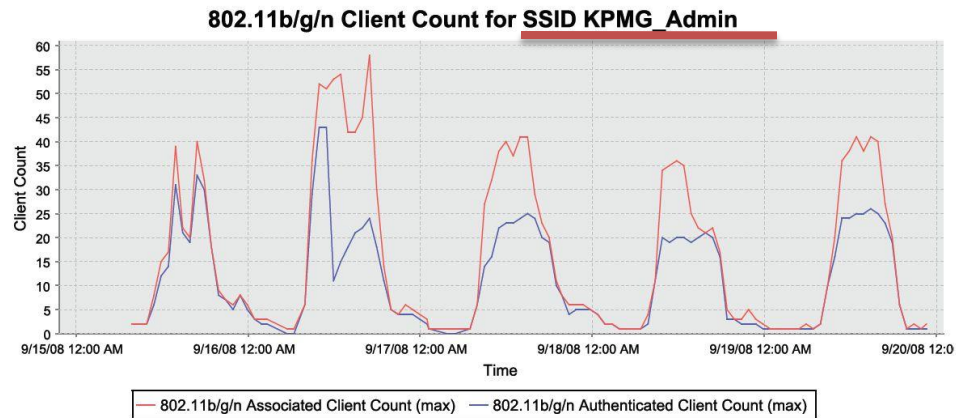

Report By: SSID

Protocol: 802.11b/g/n

Reporting Period: 9/15/08 12:00 AM to 9/20/08 12:00 AM

Aggregation Frequency: Hourly

Wireless Control System 

September 22th to 26th

Client Count

Generated: Mon Sep 29 13:51:32 EEST 2008

Report By: SSID

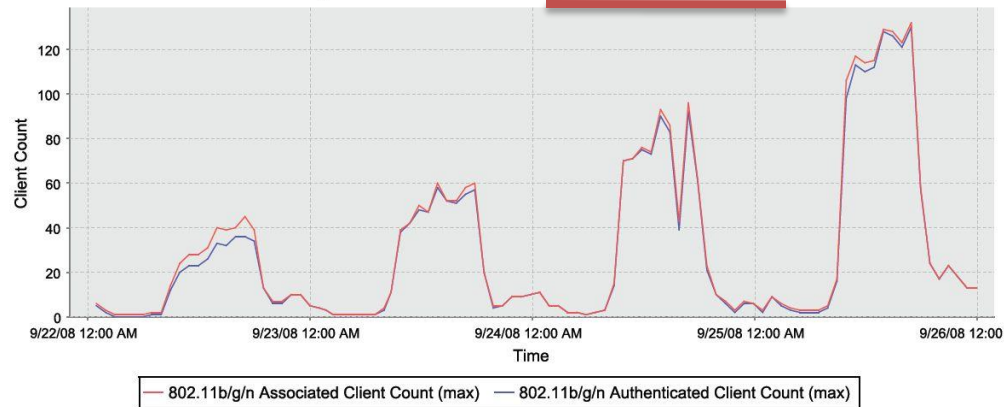

Protocol: 802.11b/g/n

Reporting Period: 9/22/08 12:00 AM to 9/26/08 12:00 AM

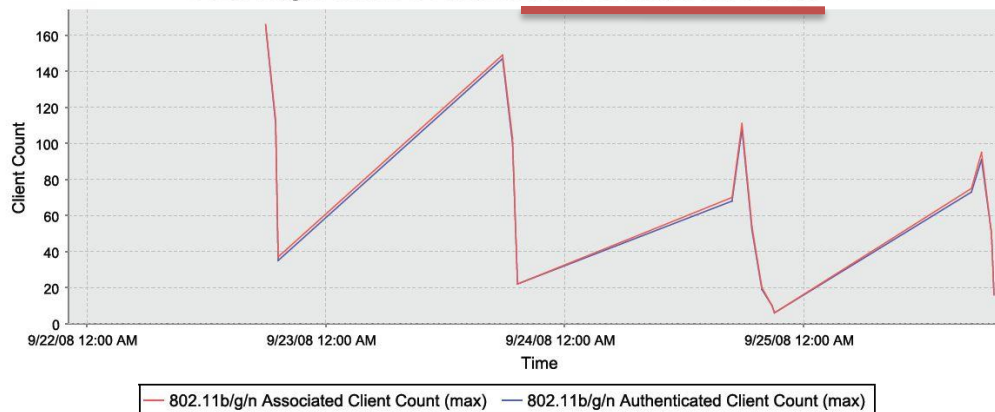

Aggregation Frequency: Hourly

Wireless Control System 

802.11b/g/n Client Count for SSID KPMG_Admin

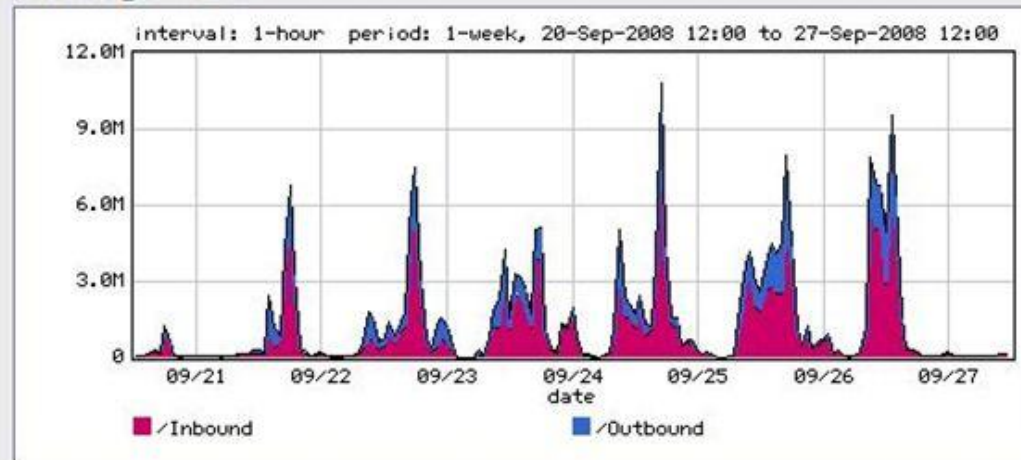

802.11b/g/n Client Count for SSID KPMG_Conference

Bandwidth Usage

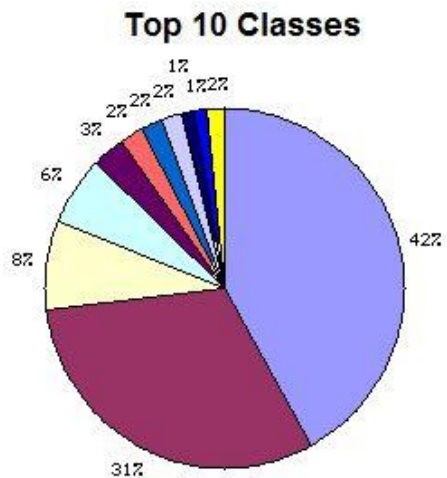

Average Rate

Peak Rate

Use of Protocols

Class Name	Average Rate (bps)	(%)
1. /Inbound/FlashVideo	263k	42
2. /Inbound/HTTP	201k	31
3. /Inbound/Default	49k	8
4. /Inbound/BitTorrent	40k	6
5. /Inbound/Apple-iTunes	21k	3
6. /Inbound/MPEG-Video	16k	2
7. /Inbound/Skype	12k	2
8. /Inbound/WorldOfWarcraft	9714	2
9. /Inbound/SSL	9079	1
10. /Inbound/BITS	4894	1
All other classes	12k	2

period: 1-week, 14-Apr-2009 13:06 to 21-Apr-2009 13:06

(not related to the KPMG conference)

Hotels are “DATA CENTERS”

DATA = information exchange, information storage

Center = meeting place, social, human networking

THANK YOU !
