Cisco (formerly Tandberg) Videoconferencing Solutions ►

Cisco® Telepresence Solutions enable collaboration so that organizations can quickly adapt to market changes while increasing productivity, improving competitive advantage through speed and innovation, and delivering a rich-media experience across any workspace, securely and with optimal quality. Cisco Telepresence is a flexible, high-definition (HD) video conferencing solution that lets organizations easily conduct face-to-face discussions in multiparty virtual meetings. The solution supports a broad range of video endpoints from high-definition (HD) and Cisco TelePresence™ systems to standard-definition (SD) clients and Cisco WebEx™ meetings. Cisco Telepresence includes multipoint control units (MCUs), management software, desktop video capabilities, and ISDN gateways so you can efficiently manage and scale video resources and extend the reach of your video environment. Cisco Telepresence helps organizations promote effective communication and collaboration by allowing people to meet at anytime from anywhere without the expense and inefficiencies of travel. Organizations can conduct efficient education and training programs that extend beyond the campus environment. Doctors can consult specialists from any part of the world to provide the best care for their patients. Organizations can build trust and stronger relationships with remote staff and customers through more frequent face-to-face communications while lowering expenses and enabling carbon-reduction initiatives.
