Remove crufty reference to /usr/lib/nls/src

That file is nowhere to be found

Marko Myllynen

Clarify LC_TIME/am_pm and LC_NAME keywords usage

am_pm should be defined only if AM/PM convention is used to signal
applications they should not try to print them when using them in
unwanted.

Same for all LC_NAME keywords expect for name_fmt which should be
always defined.

Marko Myllynen

Clarify lang_term / lang_lib

As noted by Keld Simonsen in the lib-locales@sourceware mailing
list:

<https://sourceware.org/ml/libc-locales/2014-q2/msg00008.html>

From: Keld Simonsen <keld at rap dot rap dot dk>

To: Marko Myllynen <myllynen at redhat dot com>

Date: Tue, 29 Apr 2014 17:02:09 +0200

lang_term reflects ISO 639-2/T (terminology) codes, while
lang_lib reflects ISO 639-2/B (bibliographic) codes.
lang_term is preferred over lang_lib codes for locale names.
There are 20 specific ISO 639-2/B codes.

Marko Myllynen

Correct the FILES section

proc.5

Michael Kerrisk

'pid_max' is a system-wide limit on number of threads and processes
Since PIDs > /proc/sys/kernel/pid_max are not allocated, this
file thus also imposes a system-wide limit on the number of
threads and processes.

capabilities.7

Michael Kerrisk

CAP_SYS_ADMIN allows overriding RLIMIT_NPROC

Michael Kerrisk

CAP_SYS_PTRACE allows process_vm_readv(2) and process_vm_writev(2)

charsets.7

Michael Kerrisk [Marko Myllynen]

Remove crufty statement that Romanian may be switching to ISO 8859-16

Michael Kerrisk

Remove ancient paragraph on charsets supported in glibc 2.3.2
That test is rather ancient, and probably of little use.

fanotify.7

Heinrich Schuchardt

Fix to example program: fanotify read() should use aligned buffer

inotify.7

Heinrich Schuchardt

Add example program

This example of the usage of the inotify API shows the
usage of inotify_init1(2) and inotify_add_watch(2) as well
as polling and reading from the inotify file descriptor.

Heinrich Schuchardt

munmap() does not generate inotify events

locale.7

Marko Myllynen [Michael Kerrisk]

Document the LOCPATH environment variable

Michael Kerrisk

Add further details on various categories

===== Changes in man-pages-3.69 =====

Released: 2014-06-14, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Cyril Hrubis <chrubis@suse.cz>
Jan Chaloupka <jchaloup@redhat.com>
Jeff Layton <jlayton@poochiereds.net>
Kirill A. Shutemov <kirill.shutemov@linux.intel.com>
KOSAKI Motohiro <kosaki.motohiro@jp.fujitsu.com>
Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
NeilBrown <neilb@suse.de>
Peng Haitao <penght@cn.fujitsu.com>
Petr Gajdos <pgajdos@suse.cz>
Qian Lei <qianl.fnst@cn.fujitsu.com>
Rasmus Villemoes <rv@rasmusvillemoes.dk>
Vasiliy Kulikov <segoon@openwall.com>
Walter Harms <wharms@bfs.de>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages

iconv.1

Marko Myllynen [Michael Kerrisk]
New page for the iconv(1) command

iconvconfig.8

Marko Myllynen
New page for iconvconfig(8)

Newly documented interfaces in existing pages

fcntl.2

Jeff Layton, Michael Kerrisk

Document open file description locks

As provided by the fcntl() operations F_OFD_SETLK,
F_OFD_SETLKW, and F_OFD_GETLK

Changes to individual pages

locale.1

Marko Myllynen

Add FILES section, add charmap(5) reference

Marko Myllynen

Align with recent charmap(5) / repertoiremap(5) changes

execve.2

Michael Kerrisk [NeilBrown]

Before kernel 2.6.0, RLIMIT_NPROC had no effect for set*uid()

Michael Kerrisk [Vasiliy Kulikov]

RLIMIT_NPROC is checked only if preceded by set*uid()

Michael Kerrisk [Vasiliy Kulikov, NeilBrown, KOSAKI Motohiro]

Document EAGAIN error

See also https://bugzilla.kernel.org/show_bug.cgi?id=42704

fcntl.2

Michael Kerrisk

Detail the limitations of traditional (process-associated) locks

Michael Kerrisk [Jeff Layton]

Describe how to check whether the kernel supports a particular command

Michael Kerrisk

ERRORS: add EINVAL for invalid 'cmd'

Michael Kerrisk

Add para introducing advisory locks and noting existence of OFD locks

Michael Kerrisk [Jeff Layton]

Add notes on F_SETLKW deadlock detection and its limitations

Michael Kerrisk

Add an explicit note that mandatory locking is not in POSIX

Michael Kerrisk

Rewrite introductory paragraphs on mandatory locking

Make the structure more logical, and also explicitly mention
OFD locks.

Michael Kerrisk [Jeff Layton]

Reword discussion of mandatory lock bug a little

Jeff Layton confirmed that the bug remains even in modern kernels.

Michael Kerrisk

Explain POSIX background to EACCES/EAGAIN error for F_GETLK

Michael Kerrisk

Add NOTES subhead for record locking and NFS

Michael Kerrisk [NeilBrown]

Note treatment of locks when an NFS client loses contact with the server

Michael Kerrisk [Jeff Layton]

nfsv4leasetime controls the "contact lost" interval for NFSv4

flock.2

Michael Kerrisk

In some modern BSDs, fcntl() and flock() locks do interact

So, reword and extend the discussion of this topic in NOTES.

Michael Kerrisk

Move NOTES text describing implementation of flock()

Michael Kerrisk [NeilBrown]

Add more details on NFS, including Linux 2.6.37 changes

Also: move NOTES text describing interaction of fcntl()
and flock() locks.

fork.2

Michael Kerrisk

Add notes on inheritance of flock() and OFD locks across fork()

lseek.2

Michael Kerrisk

Add reference to open(2) for discussion of file descriptors and OFDs

open.2

Michael Kerrisk

Rework and extend the discussion of open file descriptions

open_by_handle_at.2

Rasmus Villemoes

Add reference to feature_test_macros(7)

recvmsg.2

Rasmus Villemoes

Add reference to feature_test_macros(7)

remap_file_pages.2

Michael Kerrisk [Kirill A. Shutemov]

Note that remap_file_pages() is deprecated

sendmsg.2

Rasmus Villemoes

Add reference to feature_test_macros(7)

setuid.2

Michael Kerrisk

setuid() and setegid() are implemented as library functions

Michael Kerrisk

Error checking should always be performed, even when caller is UID 0

setresuid.2

Michael Kerrisk

Document EAGAIN error that can occur after kernel alloc_uid() failure

Michael Kerrisk

Since Linux 3.1, the EAGAIN case for RLIMIT_NPROC no longer occurs

Michael Kerrisk

Correct the description of the EAGAIN error

Michael Kerrisk

Error checking should always be performed, even when caller is UID 0

setreuid.2

Michael Kerrisk

Document EAGAIN error that can occur after kernel alloc_uid() failure

Michael Kerrisk

Error checking should always be performed, even when caller is UID 0

Michael Kerrisk

Add EAGAIN error for hitting RLIMIT_NPROC limit

Michael Kerrisk

Since Linux 3.1, the EAGAIN case for RLIMIT_NPROC no longer occurs

setuid.2

Michael Kerrisk

Document EAGAIN error that can occur after kernel alloc_uid() failure

Michael Kerrisk

Correct the description of the EAGAIN error

Michael Kerrisk

Error checking should always be performed, even when caller is UID 0

Michael Kerrisk

Since Linux 3.1, the EAGAIN case for RLIMIT_NPROC no longer occurs

statfs.2

Cyril Hrubis

Update MAGIC constants

Most of the updates are taken from /usr/include/linux/magic.h,
some were found by grepping the Linux source code.

Cyril Hrubis [Michael Kerrisk]

fstatfs(2) was broken on file descriptors from pipe(2)

syscalls.2

Michael Kerrisk

Note that remap_file_pages() is deprecated

basename.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `basename()` and `dirname()` are thread safe.

catgets.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `catgets()` is thread safe.

getdate.3

Rasmus Villemoes

Use blank definition of `_GNU_SOURCE` in example program

getdirentries.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `getdirentries()` is thread safe.

getdtablesize.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `getdtablesize()` is thread safe.

iconv.3

Qian Lei [Peng Haitao]

ATTRIBUTES: Note function that is thread-safe

The function `iconv()` is thread safe.

Michael Kerrisk

SEE ALSO: `add iconvconfig(8)`

lockf.3

Qian Lei [Peng Haitao]

ATTRIBUTES: Note function that is thread-safe

The function `lockf()` is thread safe.

malloc_get_state.3

Rasmus Villemoes

SYNOPSIS: use correct header

The nonstandard functions `malloc_set_state()` and `malloc_get_state()` are provided by `<malloc.h>` not `<stdlib.h>`.

malloc_usable_size.3

Qian Lei

ATTRIBUTES: Note function that is thread-safe

The function `malloc_usable_size()` is thread safe.

matherr.3

Qian Lei [Peng Haitao]

ATTRIBUTES: Note function that is thread-safe

The function `matherr()` is thread safe.

mkdtemp.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function mkdtemp() is thread safe.

mkstemp.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions mkstemp(), mkostemp(), mkstemps() and mkostemps() are thread safe.

mq_close.3

Qian Lei

ATTRIBUTES: Note function that is thread-safe

The function mq_close() is thread safe.

mq_getattr.3

Qian Lei

ATTRIBUTES: Note function that is thread-safe

The functions mq_getattr() and mq_setattr() are thread safe.

mq_open.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function mq_open() is thread safe.

mq_receive.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions mq_receive() and mq_timedreceive() are thread safe.

mq_send.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions mq_send() and mq_timedsend() are thread safe.

mq_unlink.3

Qian Lei

ATTRIBUTES: Note function that is thread-safe

The function mq_unlink() is thread safe.

posix_fallocate.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function posix_fallocate() is thread safe.

posix_openpt.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `posix_openpt()` is thread safe.

siginterrupt.3

Peng Haitao

ATTRIBUTES: Note function that is not thread-safe

The function `siginterrupt()` is not thread safe.

system.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `system()` is thread safe.

charmap.5

Marko Myllynen

Update to match current glibc

`charmap(5)` was outdated, bring it to closer to reality by fixing syntax descriptions to match current glibc code and practices, adding missing options, removing obsolete comments and references, and removing now incorrect examples.

locale.5

Marko Myllynen

Clarify AM/PM settings a bit

`localedef(1)` complains if really undefined, should be empty instead.

Also: add some SEE ALSO references.

Marko Myllynen

Document glibc conventions regarding days and week

Based on existing practice and glibc community wiki page at

<https://sourceware.org/glibc/wiki/Locales>

proc.5

Michael Kerrisk [Jan Chaloupka, Walter Harms]

Add a brief description of `/proc/fs`

repertoiremap.5

Marko Myllynen

New page for `repertoiremap(5)`

Rather obsolete feature but `localedef(1)` refers to `repertoiremaps`.

bootparam.7

Petr Gajdos

Describe 'rootflags' and 'rootdelay' kernel parameters

Patch based on text from `Documentation/kernel-parameters.txt`

charsets.7

Marko Myllynen

Update to reflect past developments

Rewrite the introduction to make Unicode's prominence more obvious.

Reformulate parts of the text to reflect current Unicode world.

Minor clarification for ASCII/ISO sections, some other minor fixes.

Marko Myllynen

List CJK encodings in the order of C, J, K

environ.7

Michael Kerrisk

SEE ALSO: add env(1), printenv(1), ld.so(8)

locale.7

Marko Myllynen

Add some SEE ALSO references

man-pages.7

Michael Kerrisk

Note that .TH 'date' field is nowadays automatically updated by scripts

signal.7

Michael Kerrisk

Describe EINTR semantics for recvmsg(2)

Michael Kerrisk

Clarify text describing EINTR semantics for socket interfaces

unicode.7

Marko Myllynen

Update to reflect past developments

The unicode(7) page will look more modern with few small changes:

- drop old BUGS section, editors cope with UTF-8 ok these days, and perhaps the state-of-the-art is better described elsewhere anyway than in a man page
- drop old suggestion about avoiding combined characters
- refer to LANANA for Linux zone, add registry file reference
- drop a reference to an inactive/dead mailing list
- update some reference URLs

utf-8.7

Marko Myllynen

Drop an old comment about UTF-8 replacing ISO 8859

And add locale(1) under SEE ALSO.

==== Changes in man-pages-3.70 =====

Released: 2014-07-08, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Carlos O'Donnell <carlos@redhat.com>
Elie De Brauwier <eliedebrauwier@gmail.com>
Florian Weimer <fweimer@redhat.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Nadav Har'El <nyh@math.technion.ac.il>
NeilBrown <neilb@suse.de>
Rich Felker <dalias@libc.org>
Robert P. J. Day <rpjday@crashcourse.ca>
Simon Paillard <spaillard@debian.org>
Tomi Salminen <tsalmin@gmail.com>
Walter Harms <wharms@bfs.de>
Yuri Kozlov <yuray@komyakino.ru>
<kirillnow@gmail.com>

Apologies if I missed anyone!

New and rewritten pages

sprof.1

Michael Kerrisk [Marko Myllynen]
New page for the glibc sprof(1) command

Newly documented interfaces in existing pages

epoll_ctl.2

NeilBrown
Document EPOLLWAKEUP

epoll.7

NeilBrown
Document EPOLLWAKEUP

Changes to individual pages

iconv.1

iconvconfig.8

Marko Myllynen

Clarify gconv file terminology a bit

ldd.1

Michael Kerrisk

SEE ALSO: add sprof(1)

connect.2

Michael Kerrisk

ERRORS: add EPROTOTYPE

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=708394>

dup.2

Michael Kerrisk [Rich Felker]

Fix erroneous discussion regarding closing 'newfd' before calling dup2()

And propose a workaround if the caller cares about catching
close() time errors.

See http://stackoverflow.com/questions/23440216/race-condition-when-using-dup2#comment36888604_23444465

and <http://austingroupbugs.net/view.php?id=411>

Michael Kerrisk

Rework and enhance discussion of dup2()

In particular, note that dup2() performs the steps of closing
and reusing 'newfd' atomically.

Michael Kerrisk

Add subhead for dup3()

epoll_ctl.2

Michael Kerrisk

BUGS: EPOLLWAKEUP is silently ignored without CAP_BLOCK_SUSPEND

If the caller does not have CAP_BLOCK_SUSPEND, then EPOLLWAKEUP
is silently ignored.

fcntl.2

Michael Kerrisk [Tomi Salminen]

The return value for F_SETPPIPE_SZ is the pipe capacity

Michael Kerrisk

ERRORS: Document ENOTDIR error for F_NOTIFY

Michael Kerrisk

Use proper page cross-references in F_NOTIFY discussion

Michael Kerrisk

Suggest the use of real-time signals with F_NOTIFY

getitimer.2

Michael Kerrisk

Rewrite a few pieces to clarify some details

inotify_add_watch.2

Michael Kerrisk

Clarify that the target of a watch is an i-node

The target of a watch is an i-node, not a pathname. Clarify the text to prevent the reader possibly misunderstanding that establishing watches by two different links to the same file might create different watch descriptors.

open.2

Michael Kerrisk []

O_CLOEXEC is also one the flags not ignored when O_PATH is specified

pipe.2

Elie De Brauwier

PIPE_BUF is defined in limits.h

To make use of PIPE_BUF in an application one should include <limits.h>. Adding a reference to this inclusion.

poll.2

Michael Kerrisk [Nadav Har'El]

The negate-fd-to-ignore technique does not work for file descriptor 0

See https://bugzilla.kernel.org/show_bug.cgi?id=79411

set_tid_address.2

Michael Kerrisk [Rich Felker]

Use "thread" rather than "process" in DESCRIPTION

Michael Kerrisk

SEE ALSO: add gettid(2)

shmop.2

Michael Kerrisk

Explain SHMLBA in much more detail

splice.2

Michael Kerrisk

Document EAGAIN error

See https://bugzilla.kernel.org/show_bug.cgi?id=48641

syscalls.2

Carlos O'Donell

Add prlimit64(2)

While trying to reconcile the new features in glibc with the documented entries in the linux kernel man pages I noticed that glibc exports prlimit64 for use by 32-bit applications (as does

the linux kernel), but that prlimit64 was not defined in the syscalls list or in the prlimit-related page.

This is not the complete fix for this, but I don't have the time to explain why and when prlimit64 should be used (or how it should be used safely). Therefore I'm just patching the syscalls.2 list to show that prlimit64 exists and was added in 2.6.36 (verified with git by checking out the tags before and after).

syslog.2

Michael Kerrisk

Rework introductory paragraph

Michael Kerrisk [Robert P. J. Day]

Rework text describing loglevels

The kernel header file mentioned in the discussion of the KERN_* constants has morphed and is no longer exported inside glibc. And the definitions of the constants themselves changed subtly with kernel commit 04d2c8c83d0e3ac5f78aeede51babb3236200112. So, rewrite the description of the constants to be a bit more abstract.

Michael Kerrisk

Rewrite parts of the page, and import /proc/sys/kernel/printk

- * Move /proc/sys/kernel/printk from proc(5) to this page, and correct various details in the discussion of that file.
- * Rewrite and correct various other details on the page.
- * Clean out some crufty text.
- * Miscellaneous minor fixes.

Michael Kerrisk

Update SYSLOG_ACTION_CONSOLE_OFF + SYSLOG_ACTION_CONSOLE_ON description
Details changed in Linux 2.6.32

tee.2

Michael Kerrisk

Document EAGAIN error

See https://bugzilla.kernel.org/show_bug.cgi?id=48641

vmsplice.2

Michael Kerrisk

Document EAGAIN error

See https://bugzilla.kernel.org/show_bug.cgi?id=48641

ether_aton.3

Michael Kerrisk

Make description of ether_line() bug a little more informative

mallopt.3

Michael Kerrisk [Florian Weimer]

MALLOC_MMAP_THRESHOLD_ and MALLOC_MMAP_MAX_ *do* work in setgid programs

My testing on this point was bogus, overlooking details of strace(1)'s behavior with setuid programs.

See https://sourceware.org/bugzilla/show_bug.cgi?id=12155

printf.3

Michael Kerrisk [Rich Felker]

Remove libc4 and libc5 details

Rich Felker noted that "scare text" in the man page warned about the use of snprintf() on libc, and that some people had cited this as a reason not to use snprintf(). Linux libc is now ancient history, so there is no real need to keep that text. But, while we're at it, we may as well clear out all of the other ancient libc4 and libc5 pieces in the page. They are nowadays more clutter than help.

Michael Kerrisk

SUSv3 and later agree with C99 for the snprintf() return value

Determined by inspection of the SUSv3 and SUSv4 specifications.

Michael Kerrisk

Remove some old text about glibc 2.0 changes

We probably don't now need such ancient info.

Michael Kerrisk

Update references to standards for C and S conversion specifiers

profil.3

Michael Kerrisk

SEE ALSO: add sprofl(1)

charmap.5

Marko Myllynen

Various minor updates and improvements

- more precise title
- extend description a bit
- document previously omitted WIDTH_DEFAULT

Marko Myllynen

Remove accidental ISO C compliance reference

glibc refers in locale/programs/charmap.c to ISO C 99 section 7.17.(2) and ISO C 99 section 5.2.1.(3) that if a character map is not ASCII compatible then the locale using it is not ISO C compliant. This does not state anything about the character set itself.

proc.5

Michael Kerrisk

Replace /proc/sys/kernel/printk discussion with reference to syslog(2)

It makes more sense to have the /proc/sys/kernel/printk with the related material in syslog(2).

Michael Kerrisk

Rewrite /proc/sys/kernel/printk description

inotify.7

Michael Kerrisk

Clarify which events are generated for watched directories

Really, with respect to watched directories, events fall into three classes (not two, as was shown):

- * Events that can be generated only for the watched directory.
- * Events that can be generated only for objects that are inside the watched directory.
- * Events that can be generated both for the watched directory and for objects inside the directory.

So, mark these three classes more clearly in the list of inotify events.

Heinrich Schuchardt [Michael Kerrisk]

BUGS: Note possible bug triggered by watch descriptor reuse

Watch descriptor IDs are returned by inotify_add_watch().

When calling inotify_rm_watch() an IN_IGNORED is placed on the inotify queue pointing to the ID of the removed watch.

inotify_add_watch() should not return a watch descriptor ID for which events are still on the queue but should return an unused ID.

Unfortunately, the existing Kernel code does not provide such a guarantee.

Actually, in rare cases watch descriptor IDs are returned by inotify_add_watch() for which events are still on the inotify queue.

See https://bugzilla.kernel.org/show_bug.cgi?id=77111

Michael Kerrisk

Add further detail to the watch descriptor reuse bug

As well as inotify_rm_watch(), file deletion and unmounting a filesystem can also cause a watch descriptor to be deleted.

Michael Kerrisk

The watch descriptor reuse bug may be hard to hit in practice

Explain the circumstances in detail, indicating that the bug may be very unlikely to occur in practice.

Michael Kerrisk

Clarify description of IN_EXCL_UNLINK

Clarify the text a little, in particular making it clearer that the target of a watch is an i-node (not a pathname).

Michael Kerrisk

Clarify IN_ONESHOT explanation

Make it clearer that the target of monitoring is an i-node,
not a pathname.

Michael Kerrisk

Make comment on 'mask' field more accurate

libc.7

Michael Kerrisk

Clarify man-pages policy on documenting C libraries other than glibc

Michael Kerrisk

Use absolute dates in discussion of libc vs glibc

pipe.7

Elie De Brauer

Add reference that the pipe capacity can be changed

In `fcntl(2)` `F_SETPIPE_SZ`, `F_GETPIPE_SZ` and
`/proc/sys/fs/pipe-max-size` are defined, however
`pipe(7)` still defines the pipe capacity as being
a static entity. Adding a reference to `fcntl(2)`.

Michael Kerrisk [Walter Harms]

Clarify that since 2.6.35, 65535 bytes is the default pipe capacity

ld.so.8

Michael Kerrisk

Clarify that `LD_PROFILE` can specify just a single shared object

Michael Kerrisk

Clarify that `LD_PROFILE` output is appended to target file

The `LD_PROFILE` output is appended to any existing
contents of the target file.

Michael Kerrisk

SEE ALSO: add `sprof(1)`

==== Changes in man-pages-3.71 =====

Released: 2014-08-17, Chicago

Michael Kerrisk

New page documenting isfdtype(3)

Newly documented interfaces in existing pages

perf_event_open.2

Vince Weaver

Document new comm_exec flag

Linux 3.16 (more specifically, commit 82b897782d10fcc4)
added support for differentiating between process renames
caused by exec versus those caused by other methods.

Vince Weaver

Document new mmap2 record type

Linux 3.16 (more specifically, commit a5a5ba72843dd05f9)
enabled the enhanced mmap2 record support.
The interface was added in Linux 3.12 but disabled until
Linux 3.16.

Vince Weaver

Document PERF_SAMPLE_BRANCH_COND

Linux 3.16 (more specifically, commit bac52139f0b7ab31330)
adds support for gathering PERF_SAMPLE_BRANCH_COND
conditional branch values when doing PERF_SAMPLE_BRANCH_STACK
sampling.

Change "sync(1)" to "sync(8)"

bind.2

Michael Kerrisk [Ryan Hammonds]

Correct EINVAL error description

As pointed out by Ryan:

My application is trying to bind an IPv4 UDP socket to an address. I've found that passing an invalid address length to bind() causes bind to return EINVAL. According to the bind(2) manpage, this should only occur when using unix domain sockets (which I am not).

chmod.2

Michael Kerrisk

Glibc falls back to chmod() on kernels that don't support fchmodat()

Michael Kerrisk

Glibc falls back to chown()/lchown() on kernels that lack fchownat()

epoll_wait.2

Michael Kerrisk

NOTES: describe raw epoll_pwait() system call differences

getgroups.2

Michael Kerrisk

SEE ALSO: add group_member(3)

getpriority.2

Michael Kerrisk

Enhance discussion of kernel nice range versus user-space nice range

Michael Kerrisk

Move text describing nice range on other systems

getrlimit.2

Michael Kerrisk

Add cross reference to core(5) in discussion of RLIMIT_CORE

Michael Kerrisk

Describe the "large" resource limit bug on 32-bit platforms

See https://bugzilla.kernel.org/show_bug.cgi?id=5042.

Michael Kerrisk

Glibc's setrlimit() and getrlimit() are implemented using prlimit()

kexec_load.2

Michael Kerrisk

Note limit of 16 for 'nr_segments'

Michael Kerrisk

Clarify the 'flags' bits that contain the architecture

Michael Kerrisk

Add KEXEC_ARCH_68K to list of architectures for 'flags'

Michael Kerrisk

Reword description of 'flags' a little

link.2

Michael Kerrisk

Glibc falls back to link() on kernels that lack linkat()

Unless 'flags' contains AT_SYMLINK_FOLLOW.

mkdir.2

Michael Kerrisk

Glibc falls back to mkdir() on kernels that don't support mkdirat()

perf_event_open.2

Vince Weaver

Clarify PERF_SAMPLE_STACK_USER usage

This clarifies the PERF_SAMPLE_STACK_USER section.

I found these issue while implementing some code that uses

the option. The important change is fixing the name of the

sample_stack_user parameter, the rest is just some wording fixes and minor clarifications.

Vince Weaver

Clarify PERF_SAMPLE_DATA_SRC usage

When checking the fields in the PERF_SAMPLE_DATA_SRC type samples you need to shift the masks before doing the compare.

Although the value you are checking (perf_mem_data_src) is specified as a bitfield so this might all fall apart if trying to access the field in a cross-endian way. The Power people were working on this issue, not sure if they resolved it.

poll.2

Michael Kerrisk

Describe fifth argument (sigsetsize) of raw ppoll() system call

process_vm_readv.2

Michael Kerrisk [Ville Ylenius]

Fix typo in example program

readlink.2

Michael Kerrisk

Glibc falls back to readlink() on kernels that lack readlinkat()

recv.2

Michael Kerrisk

'addrlen' should be NULL (not 0) if we don't need sender address

rename.2

Michael Kerrisk

Glibc falls back to rename() when the kernel doesn't have renameat()

sigwaitinfo.2

Michael Kerrisk

The raw sigtimedwait() system call has a fifth argument

symlink.2

Michael Kerrisk

Glibc falls back to symlink() on kernels that lack symlinkat()

sysinfo.2

Michael Kerrisk

Add VERSIONS section

unlink.2

Michael Kerrisk

Glibc falls back to unlink() or rmdir() on kernels that lack unlinkat()

atoi.3

Michael Kerrisk

Downgrade discussion of atoaq()

Remove most references to atoaq() in this page, since this function was present only in Linux libc (not glibc).

cerf.3

cexp2.3

clog2.3

Michael Kerrisk

Update version number on "Not yet in glibc" sentence

fgetgrent.3

getgrent.3

getgrent_r.3

getgrnam.3

Michael Kerrisk [Rob Landley]

Clarify that 'gr_mem' is a NULL-terminated array of pointers

fseeko.3

Michael Kerrisk

Add VERSIONS section

ftw.3

Michael Kerrisk

Add VERSIONS section

getauxval.3

Michael Kerrisk

Document ENOENT error

And add an entry to BUGS explaining the ambiguity that was present before the addition of this error.

getgrouplist.3

Michael Kerrisk

SEE ALSO: add group_member(3)

getline.3

Rahul Bedarkar

Close opened file at end of example program

memmem.3

Michael Kerrisk

Rewrite text of glibc 2.0 bug

printf.3

Michael Kerrisk [Jakub Wilk]

Clarify details of the %n conversion specifier

See <http://bugs.debian.org/756602>

Michael Kerrisk [Jakub Wilk]

Note use of 'j', 'z', and 't' length modifiers for '%n'

See <http://bugs.debian.org/756602>

Michael Kerrisk

Update with some SUSv3 details

setbuf.3

Michael Kerrisk

Remove ancient Linux libc and 4.x BSD details

strstr.3

Michael Kerrisk

Remove discussion of Linux libc bugs

Linux libc is old enough that we needn't care any longer.

strtod.3

Michael Kerrisk

Explain NAN(n-char-sequence)

strtod.3

Michael Kerrisk

SEE ALSO: add nan(3), nanf(3), NANL(3)

updwtmp.3

Michael Kerrisk

Replace AVAILABILITY section with note to link logwtmp() using -lutil

Linux libc details are no longer needed these days.

core.5

Rahul Bedarkar

Close opened file in example program

proc.5

Michael Kerrisk

Fix kernel version numbers for /proc/PID/stat fields

proc.5

Jan Chaloupka

Add missing proc stats fields

Adding missing proc stats fields from

<https://www.kernel.org/doc/Documentation/filesystems/proc.txt>

Michael Kerrisk [Simon Paillard]

Remove crufty text under 'timer_stats'

Michael Kerrisk

Update /proc/PID/stat 'state' field documentation

Michael Kerrisk

Improve description of /proc/PID/stat fields added in Linux 3.3 and 3.5

Michael Kerrisk

Refer to getauxval(3) in discussion of /proc/PID/auxv

Michael Kerrisk

Rework formatting of /proc/PID/stat list

Make the field numbers more prominent.

Michael Kerrisk

Note that /proc/PID/cmdline is read-only

Michael Kerrisk

Rework discussion of CommitLimit and /proc/sys/vm/overcommit_memory

Michael Kerrisk

Improve discussion of /proc/sys/vm/overcommit_ratio

charsets.7

David Prévot [Marko Myllynen]

Tidy up list

Remove German from main list, to be consistent with earlier removal of Dutch and French (in commit a8ed5f7430e0d1).

inotify.7

Michael Kerrisk

Note that IN_ONLY_DIR can be used to avoid races

Michael Kerrisk

Note that insertion of IN_MOVED_FROM+IN_MOVED_TO pair is not atomic

Michael Kerrisk

Mention use of timeout when reading IN_MOVED_TO after IN_MOVED_FROM

man-pages.7

Michael Kerrisk

Add description of "C library/kernel ABI differences" subsection

Michael Kerrisk

Rework text describing sections (stylistic improvements)

vdso.7

Mike Frysinger

Add new i386 vdso symbols in Linux 3.15

Michael Kerrisk

Note kernel version that exports new i386 symbols (Linux 3.15)

==== Changes in man-pages-3.72 =====

Released: 2014-09-07, Mountain View

Contributors

The following people contributed patches/fixes or (noted in brackets

in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Christian von Roques <roques@mti.ag>
Holger Hans Peter Freyther <holger@moiji-mobile.com>
Michael Haardt <michael@morja.de>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Peter Schiffer <pschiffe@redhat.com>
Rusty Russell <rusty@rustcorp.com.au>
Sorin Dumitru <sdumitru@ixiacom.com>

Apologies if I missed anyone!

New and rewritten pages

memusage.1

Peter Schiffer, Michael Kerrisk [Jan Chaloupka]
New page for glibc memusage(1) command

memusagestat.1

Peter Schiffer [Jan Chaloupka, Michael Kerrisk]
New page for glibc memusagestat(1) command

mtrace.1

Peter Schiffer [Jan Chaloupka]
New page describing the glibc mtrace(1) command

Changes to individual pages

connect.2

Michael Haardt
Note that a new socket should be used if connect() fails

fcntl.2

Michael Kerrisk
One must define `_GNU_SOURCE` to get the `F_OFD_*` definitions

poll.2, select.2

Rusty Russell
Fix erroneous description of "available for write".
POSIX says: "POLLOUT Normal data may be written without blocking.". This "may" is misleading, see the POSIX write page:

Write requests to a pipe or FIFO shall be handled in the same way as a regular file with the following exceptions:

...

If the `O_NONBLOCK` flag is clear, a write request may cause the thread to block, but on normal completion it shall return `nbyte`.

...

When attempting to write to a file descriptor (other than a pipe or FIFO) that supports non-blocking writes and cannot accept the data immediately:

If the `O_NONBLOCK` flag is clear, `write()` shall block the calling thread until the data can be accepted.

If the `O_NONBLOCK` flag is set, `write()` shall not block the thread. If some data can be written without blocking the thread, `write()` shall write what it can and return the number of bytes written. Otherwise, it shall return `-1` and set `errno` to `[EAGAIN]`.

The net result is that `write()` of more than 1 byte on a socket, pipe or FIFO which is "ready" may block: `write()` (unlike `read!`) will attempt to write the entire buffer and only return a short write under exceptional circumstances.

Indeed, this is the behaviour we see in Linux:

<https://github.com/rustyruessell/ccan/commit/897626152d12d7fd13a8feb36989eb5c8c1f3485>
<https://plus.google.com/103188246877163594460/posts/BkTGTMHDFgZ>

errno.3

Michael Kerrisk

SEE ALSO: `add_errno(1)`

rtnetlink.3

Holger Hans Peter Freyther

Fix parameters for the `send()` call in the example

inotify.7

Michael Kerrisk

`IN_OPEN` and `IN_CLOSE_NOWRITE` can also occur for directories

Michael Kerrisk

`IN_CLOSE_WRITE` occurs only for files (not monitored directory)

Michael Kerrisk

`IN_MODIFY` is generated for files only (not monitored directories)

Michael Kerrisk

`IN_ACCESS` occurs only for files inside directories

IN_ACCESS does not occur for monitored directory.

packet.7

Sorin Dumitru

Fix include file

It looks like most of the socket options from this man pages are not defined in <netpacket/packet.h>. They are defined in <linux/if_packet.h> so we should include that one.

===== Changes in man-pages-3.73 =====

Released: 2014-09-21, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

David Prévot <taffit@debian.org>
Eric W. Biederman <ebiederm@xmission.com>
J. Bruce Fields <bfields@fieldses.org>
Justin Cormack <justin@street-vision.com>
Lorenzo Beretta <lory.fulgi@infinito.it>
Michael Kerrisk <mtk.manpages@gmail.com>
Rob Landley <rob@landley.net>
Serge E. Hallyn <serge@hallyn.com>
Serge Hallyn <serge.hallyn@ubuntu.com>
Vasily Kulikov <segoon@openwall.com>
Vincent Lefevre <vincent@vinc17.net>
Vitaly Rybnikov <frodox@zoho.com>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages

namespaces.7

Michael Kerrisk [Eric W. Biederman]

New page providing overview of Linux namespaces

pid_namespaces.7

Michael Kerrisk [Eric W. Biederman, Vasily Kulikov, Rob Landley,

Serge Hallyn]

New page describing PID namespaces

user_namespaces.7

Michael Kerrisk [Eric W. Biederman, Andy Lutomirski, Serge Hallyn]

New page describing user namespaces.

Newly documented interfaces in existing pages

clone.2

Eric W. Biederman [Michael Kerrisk]

Document CLONE_NEWUSER for creating a new user namespace

setns.2

Eric W. Biederman, Michael Kerrisk

Document the PID, user, and mount namespace support

Document CLONE_NEWPID, CLONE_NEWUSER, and CLONE_NEWNS flags.

unshare.2

Michael Kerrisk [Eric W. Biederman]

Document CLONE_NEWPID

Michael Kerrisk [Eric W. Biederman]

Document CLONE_NEWUSER

Michael Kerrisk

Document CLONE_THREAD, CLONE_SIGHAND, and CLONE_VM

Changes to individual pages

clone.2

Michael Kerrisk

Move some CLONE_NEWNET text to namespaces.7

Michael Kerrisk

Move some CLONE_NEWUTS text 2 to namespaces.7

Michael Kerrisk

Move some CLONE_NEWIPC text to namespaces.7

Michael Kerrisk

Reword discussion of CLONE_NEWNS, removing text also in namespaces(7)

Michael Kerrisk

Standardize text on CLONE_NEW* flags and CAP_SYS_ADMIN

Michael Kerrisk

EINVAL if (CLONE_NEWUSER|CLONE_NEWPID) && (CLONE_THREAD|CLONE_PARENT)

Michael Kerrisk

Add more detail on the meaning of CLONE_SYSVSEM

flock.2

Michael Kerrisk [J. Bruce Fields]

Don't mention "classical BSD" in discussion of fcntl()/flock interaction

The noninteraction of flock(2) and fcntl(2) locks does not seem to be classical BSD semantics (at least, checking the 4.4BSD sources suggest that the lock types do interact, although there have been other systems also where fcntl() and flock() locks do not interact). So, fix the text discussing "classical BSD" lock semantics.

getunwind.2

Michael Kerrisk [Yuri Kozlov]

Fix description of return value

s/size of unwind table/size of the unwind data/

mount.2

Eric W. Biederman

Clarify use of 'mountflags' and 'data' for MS_REMOUNT

reboot.2

Michael Kerrisk [Justin Cormack, Eric W. Biederman]

Document effect of reboot() inside PID namespaces

semop.2

Michael Kerrisk

Refer to clone(2) for semantics of CLONE_SYSVSEM and semadj lists

seteuid.2

setgid.2

setresuid.2

setreuid.2

setuid.2

Michael Kerrisk

EINVAL can occur if UID/GID is not valid in caller's user namespace

setns.2

Michael Kerrisk [Eric W. Biederman]

Clarify capabilities required for reassociating with a mount namespace

Michael Kerrisk

Specify kernel version on each CLONE_NEW* flag

And remove text on flags from VERSIONS.

unshare.2

Michael Kerrisk

Add an example program

Michael Kerrisk

Clarify semantics of CLONE_SYSVSEM

Michael Kerrisk

CLONE_SYSVSEM does not require CAP_SYS_ADMIN

Michael Kerrisk

Note flags implied by CLONE_THREAD and CLONE_VM

clock.3

Michael Kerrisk [Vincent Lefevre]

The implementation uses clock_gettime() was to improve *accuracy*

(The man page text mistakenly used the word "precision".)

drand48.3

Michael Kerrisk [Lorenzo Beretta]

Remove crufty text about SVID 3 marking drand48() obsolete

See <http://bugs.debian.org/758293>

proc.5

Michael Kerrisk

Move /proc/[pid]/mounts text to namespaces.7

Michael Kerrisk

Move /proc/[pid]/mountstats text to namespaces.7

capabilities.7

Michael Kerrisk

Refer reader to user_namespaces(7) for a discussion of capabilities

Michael Kerrisk

Document CAP_SETUID and CAP_SETGID for user namespace mappings

Michael Kerrisk

setns() needs CAP_SYS_ADMIN in the *target* namespace

Michael Kerrisk

Since Linux 3.8, user namespaces no longer require CAP_SYS_ADMIN

mq_overview.7

Michael Kerrisk

Refer to namespaces(7) for info on POSIX MQs and IPC namespaces

svipc.7

Michael Kerrisk

Refer to namespaces(7) for info on System V IPC and IPC namespaces

==== Changes in man-pages-3.74 =====

Released: 2014-10-03, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets)

in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Arto Bendiken <arto@bendiken.net>
Ben Hutchings <ben@decadent.org.uk>
Benjamin Herr <ben@0x539.de>
C. Alex North-Keys <erlkonig@talisman.org>
Carlos O'Donnell <carlos@redhat.com>
Cyril Hrubis <chrubis@suse.cz>
Davidlohr Bueso <dave@stgolabs.net>
Doug Ledford <dledford@redhat.com>
Elie De Brauwier <eliedebrauwier@gmail.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Jonny Grant <jg@jguk.org>
Lanchon <lanchon@gmail.com>
Manfred Spraul <manfred@colorfullife.com>
Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Shriramana Sharma <samjnaa@gmail.com>
Thomas Mack <mack@ifis.cs.tu-bs.de>
Wieland Hoffmann <themineo@gmail.com>

Apologies if I missed anyone!

New and rewritten pages

pldd.1

Michael Kerrisk

New page for pldd(1) command added to glibc in version 2.15

cp1252.7

Marko Myllynen

New page documenting CP 1252

CP 1252 is probably one of the most used Windows Code Pages so let's add a page for it alongside with the already provided CP 1251 page.

Table generated from /usr/share/i18n/charmaps/CP1252.

Newly documented interfaces in existing pages

mq_overview.7

Michael Kerrisk

Document /proc/sys/fs/mqueue/msgsize_default

Michael Kerrisk

Document /proc/sys/fs/mqueue/msg_default

Changes to individual pages

ldd.1

Michael Kerrisk

SEE ALSO: add pldd(1)

execve.2

Michael Kerrisk [C. Alex North-Keys]

Remove unneeded ".sh" extension in interpreter script example

See https://bugzilla.kernel.org/show_bug.cgi?id=84701

fanotify_init.2

Heinrich Schuchardt

BUGS: O_CLOEXEC is ignored

Michael Kerrisk [Heinrich Schuchardt]

The 'event_f_flags' failure to check invalid flags was fixed in 3.15

fanotify_mark.2

Michael Kerrisk

Note that various bugs were fixed in Linux 3.16

getrlimit.2

Michael Kerrisk [Doug Ledford]

Since Linux 3.5, the accounting formula for RLIMIT_MSGQUEUE has changed

open.2

Michael Kerrisk [Shriramana Sharma]

Fix number and formula in description of EOVERFLOW error

readlink.2

Michael Kerrisk [Ben Hutchings]

Fix description of readlinkat() with empty 'pathname'

Michael Kerrisk

SEE ALSO: add realpath(3)

sched_setattr.2

sched_setscheduler.2

Michael Kerrisk

SEE ALSO: add chrt(1)

shmget.2

Manfred Spraul [Michael Kerrisk, Davidlohr Bueso]

Update for increase of SHMALL and SHMMAX

The default values of SHMALL and SHMMAX have been increased.

syscalls.2

Michael Kerrisk

Add 3 new system calls added in Linux 3.17

vmsplice.2

Cyril Hrubis

vmsplice() does not fail when nr_segs==0

This nr_segs==0 case is no-op; the call succeeds and no EINVAL error is returned.

dlopen.3

Michael Kerrisk

SEE ALSO: add pldd(1)

fseeko.3

Michael Kerrisk [Thomas Mack]

_FILE_OFFSET_BITS must be defined before including any header file

getgrent.3

Carlos O'Donell

Add ENOENT and EAGAIN to error list

mq_getattr.3

Michael Kerrisk

Add an example program

The example program can be used to discover the default 'mq_maxmsg' and 'mq_msgsize' values used to create a queue with a mq_open(3) call in which 'attr' is NULL.

mq_open.3

Michael Kerrisk

Two /proc files control the defaults for the attr==NULL case

Refer the reader to the discussion in mq_overview(7) for a discussion of these files, which exist since Linux 3.5.

realpath.3

Michael Kerrisk

SEE ALSO: add realpath(1)

proc.5

Elie De Brauer

Document /proc/buddyinfo

This patch adds a short description about the contents of /proc/buddyinfo and how this file can be used to assist in checking for memory fragmentation issues.

Michael Kerrisk

Mention pmap(1) in discussion of /proc/PID/smaps

armscii-8.7

Marko Myllynen

Charset pages unification, minor cleanups

ascii.7

Marko Myllynen

Charset pages unification, minor cleanups

This and [the related *.7] patches will provide unification of charset pages, minor cleanups, and some unifying cosmetic changes. References are adjusted so that all pages include a reference to charsets(7), which contains a description of these sets, stray comments are removed, some obsolete statements (like ISO 8859-1 being the de-facto ASCII replacement) are removed, and some minor reformatting to minimize diff's between the pages are done.

The actual substance, the character tables, remain unchanged.

This series changes the following pages (under man7): ascii, armSCII, cp1251, koi8-r, koi8-u, and all of iso_8859-.*.

cp1251.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-10.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-11.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-13.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-14.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-15.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-16.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-1.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-2.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-3.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-4.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-5.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-6.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-7.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-8.7

Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-9.7

Marko Myllynen

Charset pages unification, minor cleanups

koi8-r.7

Marko Myllynen

Charset pages unification, minor cleanups

- remove stray comments, streamline description (charsets(7) and Wikipedia provide more detailed and up-to-date description)
- list differences between koi8-r.7 vs koi8-u.7

koi8-u.7

Marko Myllynen

Charset pages unification, minor cleanups

- remove stray comments, streamline description (charsets(7) and Wikipedia provide more detailed and up-to-date description)
- list differences between koi8-r.7 vs koi8-u.7

mq_overview.7

Michael Kerrisk

Update queues_max details for Linux 3.14

And in general rework the text a little.

Michael Kerrisk

Update discussion of HARD_MSGMAX

The limit has changed in 2.6.33 and then again in 3.5.

Michael Kerrisk [Arto Bendiken]

Update details for 'queues_max' limit

Things changed in Linux 3.5.

See <https://bugs.launchpad.net/bugs/1155695>

Michael Kerrisk

Update details on defaults and ceiling for 'msgsize_max' limit

Michael Kerrisk

Rework discussion of HARD_MSGMAX

Michael Kerrisk [Davidlohr Bueso]

Various fixes after review from Davidlohr Bueso

sched.7

Michael Kerrisk

SEE ALSO: add taskset(1)

ld.so.8

Michael Kerrisk

SEE ALSO: add pldd(1)

Michael Kerrisk

SEE ALSO: add dlopen(3)

Michael Kerrisk

SEE ALSO: add ld(1)

==== Changes in man-pages-3.75 =====

Released: 2014-10-15, Düsseldorf

Contributors

The following people contributed patches/fixes or (noted in brackets

in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Jonny Grant <jg@jguk.org>

Michael Kerrisk <mtk.manpages@gmail.com>

Robert Schweikert <rjschwei@suse.com>

Tetsuo Handa <penguin-kernel@i-love.sakura.ne.jp>

Walter Harms <wharms@bfs.de>

Apologies if I missed anyone!

New and rewritten pages

pthread_rwlockattr_setkind_np.3

Robert Schweikert [Michael Kerrisk]

New page documenting pthread_rwlockattr_[sg]etkind_np(3)

Documents pthread_rwlockattr_setkind_np(3) and

pthread_rwlockattr_getkind_np(3).

New and changed links

pthread_rwlockattr_getkind_np.3

Robert Schweikert

New link to pthread_rwlockattr_setkind_np(3)

Changes to individual pages

readlink.2

Michael Kerrisk [Jonny Grant]

Add free() call to example program

readv.2

Michael Kerrisk

The raw preadv() and pwritev() syscalls split 'offset' into 2 arguments

signal.7

Michael Kerrisk

pthread_mutex_lock() and pthread_cond_wait() are restartable

pthread_mutex_lock(), pthread_cond_wait(), and related APIs are

automatically restarted if interrupted by a signal handler.

unix.7

Michael Kerrisk [Carlos O'Donnell, David Miller, Tetsuo Handa]

Various additions and rewordings

Notable changes:

- * Clarify some details for pathname sockets.
- * Add some advice on portably coding with pathname sockets.
- * Note the "buggy" behavior for pathname sockets when the supplied pathname is 108 bytes (after a report by Tetsuo Handa).

New and rewritten pages

adjtimex.2

Laurent Georget

Add fields in struct timex description

This patch updates the man page with the new fields added in struct timex since last edition of the man page.

Laurent Georget [Michael Kerrisk]

Document ADJ_TAI

Michael Kerrisk

Improve description of ADJ_OFFSET_SINGLESHOT

Michael Kerrisk

Add brief documentation of ADJ_MICRO and ADJ_NANO

Michael Kerrisk

Reformat return value list

And remove numeric values, since they're not needed

Michael Kerrisk

Other 'modes' bits are ignored on ADJ_OFFSET_*

Other bits in 'modes' are ignored if modes contains

ADJ_OFFSET_SINGLESHOT or ADJ_OFFSET_SS_READ.

Michael Kerrisk

Add nanosecond details

Fixes https://bugzilla.kernel.org/show_bug.cgi?id=61171.

Michael Kerrisk

Document ADJ_OFFSET_SS_READ

Michael Kerrisk

Reformat 'times' flags as list

And remove numeric values, since they're not needed.

Michael Kerrisk

Note effect of ADJ_NANO for ADJ_SETOFFSET

Michael Kerrisk

Add comment noting that timex structure contains padding bytes

Michael Kerrisk

Add more details to description of 'tai' field

Michael Kerrisk

Note meaning of "PLL" abbreviation

Michael Kerrisk

Clarify which 'timex' field is used by each 'modes' bit

Michael Kerrisk

Document timex 'status' bits

Michael Kerrisk

Clarify treatment of other 'modes' bits for ADJ_OFFSET_*

Michael Kerrisk

Update RFC number: RFC 5905 obsoletes RFC 1305

Michael Kerrisk

Briefly document ADJ_SETOFFSET

Michael Kerrisk

Note PPS (pulse per second) fields in timex structure

sigreturn.2

Michael Kerrisk

Add (a lot) more detail on the signal trampoline

And rewrite much of the page.

Newly documented interfaces in existing pages

proc.5

Bernhard Walle

Document /proc/thread-self

/proc/thread-self has been introduced in Linux 3.17 with
commit 0097875bd41528922fb3bb5f348c53f17e00e2fd.

Sven Hoexter [Michael Kerrisk, Kamezawa Hiroyuki]

Document "VmSwap" field of /proc/[pid]/status

Florian Westphal

Document /proc/net/netfilter/nfnetlink_queue

Changes to individual pages

localedef.1

Marko Myllynen

Mention default path for compiled files

clock_nanosleep.2

Michael Kerrisk

Note that 'clock_id' can also be a CPU clock ID

epoll_ctl.2

Michael Kerrisk

Regular files and directories can't be monitored with `epoll_ctl()`

ioctl.2

Heinrich Schuchardt

Rename 'd' argument to 'fd' in text

In most other manpages file descriptors are called 'fd'.

This patches renames attribute 'd' to 'fd'.

madvise.2

Michael Kerrisk

VERSIONS: Support for `madvise()` is now configurable

Support for this system call now depends on the

`CONFIG_ADVISE_SYSCALLS` configuration option.

open.2

Michael Kerrisk

Enhance rationale discussion for `openat()` and friends

posix_fadvise.2

Mel Gorman

Document the behavior of partial page discard requests

It is not obvious from the interface that "partial page discard" requests are ignored. It should be spelled out.

Michael Kerrisk [Weijie Yang]

ERRORS: Since 2.6.16, the kernel correctly deals with the `ESPIPE` case

Michael Kerrisk

Support for `fadvise64()` is now configurable

Support for this system call now depends on the

`CONFIG_ADVISE_SYSCALLS` configuration option.

prctl.2

Andreas Schwab

Correct description of null-termination in `PR_GET_NAME` and `PR_SET_NAME`

The size of the process name has always been at most 16 byte

`_including_` the null terminator. This also means that the name returned by `PR_GET_NAME` is always null-terminated.

Michael Kerrisk

`PR_SET_NAME` silently truncates strings that exceed 16 bytes

restart_syscall.2

Michael Kerrisk

Add some text explaining why `restart_syscall()` exists

sched_setaffinity.2

Michael Kerrisk

NOTES: Add paragraph on how to discover set of CPUs available on system

Michael Kerrisk

SEE ALSO: add nproc(1) and lscpu(1)

select.2

Michael Kerrisk

SEE ALSO: add restart_syscall(2)

semop.2

Michael Kerrisk

Add note that interrupted semtimedop() returns 'timeout' unchanged

Michael Kerrisk

Remove information about semtimedop() EAGAIN that is repeated elsewhere

Michael Kerrisk

Add subsection head for semtimedop()

setsid.2

Michael Kerrisk

Rewrite some pieces and add some details

Among other changes, add an explanation of why setsid() can't be called from a process group leader

sgetmask.2

Michael Kerrisk

Since 3.16, support for these system calls is configurable

Support for these calls is now dependent on the setting of the CONFIG_SGETMASK_SYSCALL option.

sigaction.2

Michael Kerrisk

Document SA_RESTORER

Michael Kerrisk

Add some detail on the sa_restorer field

Michael Kerrisk

SEE ALSO: add sigreturn(2)

splice.2

Michael Kerrisk

Reformat description of 'fd_in' and 'off_in' to improve readability

syscall.2

Michael Kerrisk

SEE ALSO: add errno(3)

syscalls.2

Michael Kerrisk

SEE ALSO: add errno(3)

Michael Kerrisk

3.19 adds execveat()

Michael Kerrisk

Add bpf(2) to list

tee.2

Michael Kerrisk

Add shell session demonstrating use of the example program

tkill.2

Michael Kerrisk [Rich Felker]

Remove bogus text saying `tgid==-1` makes `tgkill()` equivalent to `tkill()`

abort.3

Michael Kerrisk

Note that `SIGABRT` is raised as though `raise(3)` is called

Also note that `abort()` is POSIX.1-2008 compliant.

msg.3

David Wragg

Ensure `buf` is suitably aligned in sending example

Inspection of the definition of `CMSG_FIRSTHDR` (both in `glibc` and the suggested definition in `RFC3542`) shows that it yields the `msg_control` field. So when sending, the pointer placed in `msg_control` should be suitably aligned as a `struct cmsghdr`.

In the sending example, `buf` was declared as a bare char array, and so is not necessarily suitably aligned.

The solution here involves placing `buf` inside a union, and is based on the `sockets/scm_rights_send.c` sample from *The Linux Programming Interface* "dist" source code collection.

exp10.3

Michael Kerrisk

Before `glibc 2.19`, `exp()` did not give `ERANGE` error on underflow

http://sources.redhat.com/bugzilla/show_bug.cgi?id=6787

ftw.3

Michael Kerrisk

`FTW_CHDIR` has no effect on the `'fpath'` argument passed to `fn()`

getopt.3

Michael Kerrisk [Jonny Grant]

Ensure that `'nsecs'` is used

ilogb.3

Michael Kerrisk [Will Newton]

Since `glibc 2.16`, `ilogb()` does correctly diagnose domain errors

memcmp.3

Michael Haardt

Document return value for `n==0` case

Michael Haardt

Warn against use of `memcmp()` for comparing security-critical data

`mq_open.3`

Michael Kerrisk

Document the `O_CLOEXEC` flag

Michael Kerrisk

Place 'flags' constants in alphabetical order

`pow.3`

Manuel López-Ibáñez

Add note on performance characteristics of `pow()`

`pthread_setschedparam.3`

Simon Newton

Fix logic error in example program

The example program will crash if `-A` is used, since 'attr' is uninitialized.

```
$ ./a.out -A
*** Error in `./a.out': free(): invalid pointer: 0xb779c3c4 ***
Aborted (core dumped)
```

Small fixes to example program

`sigvec.3`

Michael Kerrisk

Starting with version 2.21, `glibc` no longer exports `sigvec()`

`sysconf.3`

Josh Triplett

Document `_SC_NGROUPS_MAX`

Already documented in `getgroups(2)`, but not in `sysconf(3)`.

`termios.3`

Michael Kerrisk

SEE ALSO: add `tset(1)`

`tgamma.3`

Michael Kerrisk

Since `glibc 2.18`, `errno` is correctly set to `EDOM` when `(x == -infinity)`

`wordexp.3`

Carlos O'Donell

Make it clear that `WRDE_NOCMD` prevents command substitution

The use of `WRDE_NOCMD` prevents command substitution. If the flag

WRDE_NOCMD is set then no command substitution shall occur and the error WRDE_CMDSUB will be returned if such substitution is requested when processing the words.

The manual page as-is makes it seem like the command substitution occurs, and an error is returned *after* the substitution.

This patch clarifies that.

locale.5

Marko Myllynen

Describe the formats of values

locale(5) describes what a locale should define but doesn't spell out how (in what format). The patch attempts to address this, it also has few trivial additional enhancements.

* Reference to locale(7) for category descriptions.

* Clarify first_workday in NOTES a bit.

* Add upstream BZ reference for two missing LC_ADDRESS fields.

Marko Myllynen

Fix miscoded character

resolv.conf.5

Jan Chaloupka

Add missing no-tld-query option

Based on commit [1], the no-tld-query option exists for resolv.conf configuration file. Description of this option is provided in [2]. This patch just copies this option into resolv.conf.5 man page. Plus changes 'a' member into 'an' before 'unqualified name as if it ...' on the third line of [2]. Based on [3], this option was added in glibc 2.14 as solving [4] bug.

[1] <https://sourceware.org/git/?p=glibc.git;a=commitdiff;h=f87dfb1f11c01f2ccdc40d81e134cd06b32e28e8>

[2] <http://www.daemon-systems.org/man/resolv.conf.5.html> man page.

[3]

<https://sourceware.org/git/?p=glibc.git;a=blob;f=NEWS;h=952f32af17e7fb49c4c1a305de673a13075bfaf5;hb=f87dfb1f11c01f2ccdc40d81e134cd06b32e28e8>

[4] https://sourceware.org/bugzilla/show_bug.cgi?id=12734

credentials.7

Josh Triplett

Cross-reference getgroups(2)

Since credentials.7 discusses supplementary GIDs, it should reference getgroups(2).

fanotify.7

Heinrich Schuchardt

Allow relative paths in example

The current example code requires passing an absolute path to the mount to be watched.

By passing `AT_FDCWD` to `fanotify_mark` it can use both absolute and relative paths.

Heinrich Schuchardt

`fallocate(2)` creates no events

`fallocate(2)` should create `FAN_MODIFY` events but does not.

Heinrich Schuchardt [Michael Kerrisk]

`fanotify` notifies only events generated on the same mount

Unfortunately, `fanotify` does not inform listeners for all paths under which a touched filesystem object is visible, but only the listener using the same path as the process touching the filesystem object.

Heinrich Schuchardt

Update `BUGS` to note bugs still not fixed in 3.17

I bumped the Linux version number in the `BUGS` section to 3.17.

`inotify.7`

Heinrich Schuchardt

`fallocate(2)` does not trigger `inotify` events

Calling `fallocate(2)` does not result in `inotify` events.

`locale.7`

Marko Myllynen

Improve `LOCPATH` description

`LOCPATH` is ignored by privileged programs.

Add locale archive references.

Add `FILES` section.

`man-pages.7`

Michael Kerrisk [Laurent Georget]

Clarify that `SEE ALSO` entries may refer to pages from other projects

`signal.7`

Michael Kerrisk

Mention other "slow devices"

Reads from `eventfd(2)`, `signalfd(2)`, `timerfd(2)`, `inotify(7)`, and `fanotify(7)` file descriptors are also slow operations that are restartable.

Michael Kerrisk

Fix `SO_RECVTIMEO/ SO_SENDFDTIMEO` confusion in text

Michael Kerrisk

Since Linux 3.8, reads on `inotify(7)` file descriptors are restartable

Michael Kerrisk

`inotify(7)` reads no longer show the odd `EINTR` error after `SIGCONT`

Since kernel 3.7, reads from inotify(7) file descriptors no longer show the (Linux oddity) behavior of failing with EINTR when the process resumes after a stop signal + SIGCONT.

Michael Kerrisk

SEE ALSO: add sigreturn(2)

unix.7

Michael Kerrisk [Scott Harvey]

Fix buglet in code snippet in BUGS section

ld.so.8

Carlos O'Donell

Add --inhibit-cache option

The dynamic loader has 6 options, only 5 are documented.

This patch documents the sixth option i.e. `--inhibit-cache`.

Jonathan Wakely [Siddhesh Poyarekar]

Correct documentation of \$ORIGIN

As noted by Siddhesh:

The ld.so man page says:

\$ORIGIN (or equivalently \${ORIGIN})

This expands to the directory containing the application executable. Thus, an application located in somedir/app could be compiled with

This is incorrect since it expands to the directory containing the DSO and not the application executable. This seems like deliberate behaviour in dl-object.c, so it needs to be fixed in the man page.

See <http://stackoverflow.com/questions/26280738/what-is-the-equivalent-of-loader-path-for-rpath-specification-on-linux/26281226#26281226>

==== Changes in man-pages-3.77 =====

Released: 2015-01-10, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Akihiro Motoki <amotoki@gmail.com>
Alexandre Bique <bique.alexandre@gmail.com>
Andre Majorel <aym-xunil@teaser.fr>
Andy Lutomirski <luto@amacapital.net>
Daniel Borkmann <dborkman@redhat.com>
Dave Hansen <dave.hansen@intel.com>
Elie De Brauwer <eliedebrauwer@gmail.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Ignat Loskutov <ignat.loskutov@gmail.com>
Jeff Epler <jepler@unpythonic.net>
J r me Pouiller <jezz@sysmic.org>
Kees Cook <keescook@chromium.org>
Laurent Georget <laurent.georget@supelec.fr>
Masanari Iida <standby24x7@gmail.com>
Michael Haardt <michael@moriam.de>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Richard Cochran <richardcochran@gmail.com>
Stephan Mueller <stephan.mueller@atsec.com>
Troy Davis <troy@yort.com>
Vince Weaver <vincent.weaver@maine.edu>
Will Drewry <wad@chromium.org>

Apologies if I missed anyone!

New and rewritten pages

seccomp.2

Kees Cook, Michael Kerrisk, Will Drewry [Andy Lutomirski]

New page documenting seccomp(2)

Combines documentation from prctl, in-kernel seccomp_filter.txt
and dropper.c, along with details specific to the new system call.

Newly documented interfaces in existing pages

netlink.7

Stephan Mueller [Michael Kerrisk]

Add NETLINK_CRYPTO

Changes to individual pages

adjtimex.2

Laurent Georget [Richard Cochran, Jeff Epler]

Clarify the 'ppm scaling' used in struct timex

This patch makes explicit and clarifies the unit used for the fields "freq", "ppsfreq" and "stabil" in struct timex.

Michael Kerrisk [Masanari Iida]

Note that TIME_ERROR is the modern synonym for TIME_BAD

perf_event_open.2

Vince Weaver

Clarify the PERF_FLAG_FD_* flags

This change clarifies the behavior of the PERF_FLAG_FD_OUTPUT and PERF_FLAG_FD_NO_GROUP flags to perf_event_open(), and removes the related FIXME comments.

While writing tests to validate the behavior of these flags I discovered that PERF_FLAG_FD_OUTPUT has been broken since the 2.6.35 kernel release.

prctl.2

Dave Hansen [Michael Kerrisk]

Add description of Intel MPX calls

The 3.19 kernel will have support for Intel MPX, including a pair of new prctl() calls (PR_MPX_ENABLE_MANAGEMENT and PR_MPX_DISABLE_MANAGEMENT) for enabling and disabling the kernel's management of the "bounds tables". Add a descriptions of the interface.

Michael Kerrisk

Add mention of seccomp(2) under PR_SET_SECCOMP

Michael Kerrisk

Suggest /proc/PID/status "Seccomp" as alternative to PR_GET_SECCOMP

Michael Kerrisk

SIGKILL can also occur PR_GET_SECCOMP in SECCOMP_MODE_FILTER mode

Kees Cook [Andy Lutomirski]

Document SECCOMP_MODE_FILTER vs EFAULT

This notes the distinction made between EINVAL and EFAULT when attempting to use SECCOMP_MODE_FILTER with PR_SET_SECCOMP.

setns.2

pid_namespaces.7

Mike Frysiner

Elaborate discussion of the PID namespace descendant limitation

The setns(2) man page already mentions that CLONE_NEWPID may only be used with descendant namespaces, but this nuance could be listed in a few more places so it is not missed.

shmget.2

Michael Kerrisk [Akihiro Motoki]

Make wording of SHMALL description a little clearer

sigaction.2

Michael Kerrisk

Add siginfo_t fields for SECCOMP_RET_TRAP

memchr.3

strchr.3

Alexandre Bique

Reference memmem(3) in SEE ALSO section

memcmp.3

Michael Kerrisk [Michael Haardt]

NOTES: add some detail on avoiding memcmp() of cryptographic data

Wording largely based on comments from Michael Haardt.

pthread_tryjoin_np.3

Jérôme Pouiller [Michael Kerrisk]

Document EINVAL error for pthread_timedjoin_np()

mem.4

Elie De Brauer

/dev/kmem depends on CONFIG_DEVKMEM

Elie De Brauer

Correct /dev/port group in example

mem.4 mentions that group for /dev/port should be set to 'mem'

However, all other files (/dev/mem and /dev/kmem) use the kmem

group in their examples and on my system /dev/port belongs to

kmem. Hence the 'mem' group was probably a typo:

Elie De Brauer

Add CONFIG_STRICT_DEVMEM

Since 2.6.26 the CONFIG_NONPROMISC_DEVMEM options limits the physical addresses which can be accessed through /dev/mem.

random.4

Heinrich Schuchardt

Describe handling of O_NONBLOCK

/dev/random and /dev/urandom treat O_NONBLOCK differently.

This should be described in the manpage.

Heinrich Schuchardt

Mention PRNG used by urandom

/dev/urandom uses a pseudo-random number generator to replace missing entropy.

proc.5

Michael Kerrisk

Document "Seccomp" field of /proc/PID/status

epoll.7

Michael Kerrisk [Ignat Loskutov]

Use `epoll_create1()` rather than `epoll_create()` in the code example
`epoll_create1()` is more or less the preferred API for new applications, since it allows for some flags and avoids the misdesigned `epoll_create()` argument, and so it seems sensible to use that in the example, rather than `epoll_create()`.

tcp.7

Troy Davis

Clarify `tcp_tw_recycle` on Internet-facing hosts

Clarify that `tcp_tw_recycle` will break communication with many general-purpose remote Internet hosts (namely, remote NAT devices) even when the Linux device itself is not behind NAT.

==== Changes in man-pages-3.78 =====

Released: 2015-01-22, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Akihiro Motoki <amotoki@gmail.com>

Alexey Ishchuk <aishchuk@linux.vnet.ibm.com>

Carlos O'Donnell <carlos@redhat.com>

Christian Seiler <christian@iwakd.de>

Daniel J Blueman <daniel@quora.org>

David Drysdale <drysdale@google.com>

David Herrmann <dh.herrmann@gmail.com>

Elie De Brauwere <eliedebrauwere@gmail.com>

Elliot Hughes <enh@google.com>

Jessica McKellar <jessica.mckellar@gmail.com>

Kees Cook <keescook@chromium.org>

Michael Hayes <mike@aiinc.ca>

Michael Kerrisk <mtk.manpages@gmail.com>

Rich Felker <dalias@aerifal.cx>

Vince Weaver <vincent.weaver@maine.edu>

Apologies if I missed anyone!

New and rewritten pages

execveat.2

David Drysdale, Michael Kerrisk [Rich Felker]

New page for execveat(2)

memfd_create.2

Michael Kerrisk, David Herrmann

New page for memfd_create() system call

Including notes about file sealing

s390_pci_mmio_write.2

Alexey Ishchuk

New page for s390 s390_pci_mmio_write() and s390_pci_mmio_read()

New manual page for the new PCI MMIO memory access system calls, s390_pci_mmio_write() and s390_pci_mmio_read(), added for the s390 platform.

Newly documented interfaces in existing pages

fcntl.2

David Herrmann [Michael Kerrisk]

Document F_ADD_SEALS and F_GET_SEALS commands

proc.5

Elie De Brauer

Document /proc/sys/vm/compact_memory

Michael Kerrisk

Document /proc/sys/fs/nr_open

New and changed links

s390_pci_mmio_read.2

Michael Kerrisk

New link to new s390_pci_mmio_write(2) page

Changes to individual pages

dup.2

Michael Kerrisk

Add reference to RLIMIT_NOFILE for EMFILE error

Michael Kerrisk

Add reference to RLIMIT_NOFILE for EBADF error on 'newfd'.

execve.2

fexecve.3

Michael Kerrisk

SEE ALSO: add execveat(2)

fallocate.2

mmap.2

open.2

truncate.2

write.2

Michael Kerrisk

ERRORS: add EPERM for operation denied by file seal

fcntl.2

Michael Kerrisk

ERRORS: add EBUSY case for F_SETPIPE_SZ

Michael Kerrisk

Add reference to RLIMIT_NOFILE for F_DUPFD EINVAL error on 'arg'.

Michael Kerrisk

ERRORS: add open file description lock error cases

getrlimit.2

Michael Kerrisk

Update text on RLIMIT_NOFILE ceiling to refer to /proc/sys/fs/file-max

mbind.2

Michael Kerrisk [Daniel J Blueman]

Clarify EFAULT text

mmap.2

shmget.2

shm_open.3

Michael Kerrisk

SEE ALSO: add memfd_create(2)

open.2

Michael Kerrisk

Refer to RLIMIT_NOFILE for explanation of EMFILE error

Michael Kerrisk

Add execveat(2) in system call list under "Rationale for openat()"

perf_event_open.2

Vince Weaver

Clarify description of overflow events

Update the perf_event_open manpage to be more consistent when discussing overflow events. It merges the discussion of poll-type notifications with those generated by SIGIO

signal handlers.

This addresses the remaining FIXMEs in the document.

Vince Weaver

Remove inaccurate paragraph describing attr.config

Remove an inaccurate paragraph about values in the attr.config field. This information was never true in any released kernel; it somehow snuck into the manpage because it is still described this way in tools/perf/design.txt in the kernel source tree.

Michael Kerrisk

Correct the kernel version number for PERF_COUNT_HW_CACHE_NODE

Michael Kerrisk

Add some kernel version numbers to various fields and constants

ptrace.2

sigaction.2

seccomp.2

Kees Cook

Ptrace and signinfo details

While writing some additional seccomp tests, I realized PTRACE_EVENT_SECCOMP wasn't documented yet. Fixed this, and added additional notes related to ptrace events SIGTRAP details.

readv.2

Michael Kerrisk

Update details on glibc readv()/writev() wrapper behavior
And add a historical detail about Linux 2.0.

select.2

Michael Kerrisk

Mention RLIMIT_NOFILE as a possible cause of EINVAL error

syscall.2

Kees Cook

Add arm64 and mips
Add mips and arm64 to tables, along with some further details on these architectures,

syscalls.2

Michael Kerrisk

Add s390_pci_mmio_read(2) and s390_pci_mmio_write(2)

Michael Kerrisk

Note kernel() version that introduced get_kernel_syms()
Note kernel version that introduced ppc_rtas()
Note kernel version that introduced create_module()
Note kernel version that added setup()

Michael Kerrisk

Remove some details for sync_file_range2()
Make the table a bit simpler. The details can anyway be

found in the system call man page.

utimensat.2

Michael Kerrisk [Elliot Hughes]

If both tv_sec fields are UTIME_OMIT, the file need not exist

As noted by Elliot, if both tv_sec fields are UTIME_OMIT, utimensat() will return success even if the file does not exist.

errno.3

Michael Kerrisk

The RLIMIT_NOFILE resource limit is a common cause of EMFILE

exec.3

Michael Kerrisk

SEE ALSO: add execveat(2)

fclose.3

Carlos O'Donell

Consistency fix: use "stream" as name for "FILE *" argument

Harmonize all the manual pages to use "stream" for FILE* instead of randomly using "fp" or "stream." Choosing something and being consistent helps users scan the man pages quickly and understand what they are looking at.

fexecve.3

Michael Kerrisk

Rewrite the script+close-on-exec problem as a BUG

Also, add one or two details about this scenario.

Michael Kerrisk

The natural idiom when using fexecve() is to use the close-on-exec flag

fmemopen.3

Michael Kerrisk

Consistency fix: use "stream" as name for "FILE *" argument

fopencookie.3

Michael Kerrisk

Consistency fix: use "stream" as name for "FILE *" argument

getgrent_r.3

Carlos O'Donell

Consistency fix: use "stream" as name for "FILE *" argument

getline.3

Michael Kerrisk

Consistency fix: use "stream" as name for "FILE *" argument

getmntent.3

Carlos O'Donell

Consistency fix: use "stream" as name for "FILE *" argument

getpw.3

Michael Kerrisk [Carlos O'Donell]

Describe return value when 'uid' is not found

getpwent_r.3

Carlos O'Donell

Consistency fix: use "stream" as name for "FILE *" argument

getspnam.3

Carlos O'Donell

Consistency fix: use "stream" as name for "FILE *" argument

malloc_info.3

Carlos O'Donell

Consistency fix: use "stream" as name for "FILE *" argument

posix_fallocate.3

Michael Kerrisk

Note that posix_fallocate() is implemented using fallocate(2)

putgrent.3

Carlos O'Donell

Consistency fix: use "stream" as name for "FILE *" argument

Harmonize all the manual pages to use "stream" for FILE* instead of randomly using "fp" or "stream." Choosing something and being consistent helps users scan the man pages quickly and understand what they are looking at.

locale.5

Akihiro Motoki

Correct variable name

proc.5

Michael Kerrisk

Remove bogus statement about NR_OPEN being a ceiling for file-max

==== Changes in man-pages-3.79 =====

Released: 2015-02-01, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Akihiro Motoki <amotoki@gmail.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>
J William Piggott <elseifthen@gmx.com>
Masanari Iida <standby24x7@gmail.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Scot Doyle <lkml14@scotdoyle.com>
Sergey V. Zubkov <cubbi@cubbi.com>
Stephan Mueller <stephan.mueller@atsec.com>
Vince Weaver <vincent.weaver@maine.edu>
Vivek Goyal <vgoyal@redhat.com>

Apologies if I missed anyone!

New and rewritten pages

getrandom.2

Heinrich Schuchardt, Theodore T'so, Michael Kerrisk
New page documenting getrandom(2)
Kernel 3.17 introduces a new system call getrandom(2).

kexec_load.2

Vivek Goyal, Michael Kerrisk
Add documentation of kexec_file_load(2)
Michael Kerrisk, Vivek Goyal
Rewrite and extend documentation of kexec_load().

New and changed links

kexec_file_load.2

Michael Kerrisk
New link to kexec_load.2

Changes to individual pages

personality.2

Michael Kerrisk
SEE ALSO: add setarch(8)

prctl.2

Michael Kerrisk

Unused arguments of PR_MPX_(EN,DIS)ABLE_MANAGEMENT must be zero

reboot.2

Michael Kerrisk

SEE ALSO: add kexec_load(2)

socket.2

Stephan Mueller

document AF_ALG

Add a reference to the AF_ALG protocol accessible via socket(2).

fflush.3

Michael Kerrisk [Sergey V. Zubkov]

Clarify that flushing of input streams occurs only for seekable files

See https://bugzilla.kernel.org/show_bug.cgi?id=91931

Michael Kerrisk [Sergey V. Zubkov]

POSIX.1-2008 specifies the behavior when flushing input streams

POSIX.1-2001 did not have a specification for input streams,

but POSIX.1-2008 added one.

getopt.3

Michael Kerrisk

SEE ALSO: add getopt(1)

random.3

Heinrich Schuchardt

SEE ALSO: add getrandom(2)

termios.3

Michael Kerrisk

SEE ALSO: add reset(1), setterm(1), tput(1)

tzset.3

J William Piggott

Document behavior when TZ filespec omits the colon

If the TZ filespec omits the leading colon, glibc will parse

it for any valid format, i.e., it will still work.

J William Piggott

Add description for posixrules file

J William Piggott

Correct system timezone file path

J William Piggott

There are only two TZ formats

tzset(3) currently states that there are three TZ formats. The

first two it lists are actually variations of the POSIX-style

TZ format, of which there are at least five variations.

This patch corrects this to match the POSIX specification of TZ having only two formats.

J William Piggott

Filespec omitted incorrect

Paragraph three of the DESCRIPTION section says that when TZ is set, but empty, then UTC is used.

Later it says if the TZ filespec is omitted then the file /usr/share/zoneinfo/localtime is used. This is incorrect, it will use UTC in that case as well.

J William Piggott

Fix incorrect TZ string representation

The TZ string representation indicates that the start/end rules are required; this is incorrect.

J William Piggott

Add ENVIRONMENT section + other rearrangements

FILES section was overly verbose and included environment variables. Added ENVIRONMENT section, removing ENV VARS from the FILES section.

Apologies if I missed anyone!

New and rewritten pages

ioctl_fat.2

Heinrich Schuchardt [Michael Kerrisk]

New man page for the ioctl(2) FAT API

The `ioctl(2)` system call may be used to retrieve information about the FAT file system and to set file attributes.

madvise.2

Michael Kerrisk

Summary: this page has been significantly reorganised and rewritten

Michael Kerrisk

Recast discussion of 'advice' into two groups of values

`madvise()` is one of those system calls that has congealed over time, as has the man page. It's helpful to split the discussion of 'advice' into those flags into two groups:

- * Those flags that are (1) widespread across implementations; (2) have counterparts in `posix_madvise(3)`; and (3) were present in the initial Linux `madvise` implementation.
- * The rest, which are values that (1) may not have counterparts in other implementations; (2) have no counterparts in `posix_madvise(3)`; and (3) were added to Linux in more recent times.

Michael Kerrisk

Explicitly list the five flags provided by `posix_fadvise()`

Over time, bit rot has afflicted this page. Since the original text was written many new Linux-specific flags have been added.

So, now it's better to explicitly list the flags that correspond to the POSIX analog of `madvise()`.

Jan Chaloupka [Hugh Dickins, Michael Kerrisk]

Starting with Linux 3.5, more file systems support `MADV_REMOVE`

Michael Kerrisk

Split `EINVAL` error into separate cases

Michael Kerrisk

Explain `MADV_REMOVE` in terms of file hole punching

Michael Kerrisk

`MADV_REMOVE` can be applied only to shared writable mappings

Michael Kerrisk

`MADV_REMOVE` cannot be applied to locked or Huge TLB pages

Michael Kerrisk [Vlastimil Babka]

Clarify that `MADV_DONTNEED` has effect on pages only if it succeeds

Michael Kerrisk [Vlastimil Babka]

Clarifications for `MADV_DONTNEED`

Michael Kerrisk [Michal Hocko]

Improve `MADV_DONTNEED` description

Michael Kerrisk

`MADV_DONTNEED` cannot be applied to Huge TLB or locked pages

Michael Kerrisk [Vlastimil Babka]

Remove mention of "shared pages" as a cause of `EINVAL` for `MADV_DONTNEED`

Michael Kerrisk [Vlastimil Babka]

Note Huge TLB as a cause of `EINVAL` for `MADV_DONTNEED`

Michael Kerrisk [Minchan Kim]

Add mention of VM_PFNMAP in discussion of MADV_DONTNEED and MADV_REMOVE

Michael Kerrisk

Drop sentence saying that kernel may ignore 'advice'

The sentence creates misunderstandings, and does not really add information.

Michael Kerrisk

Note that some Linux-specific 'advice' change memory-access semantics

Michael Kerrisk

NOTES: Remove crufty text about "command" versus "advice"

The point made in this fairly ancient text is more or less evident from the DESCRIPTION, and it's not clear what "standard" is being referred to.

Michael Kerrisk

Mention POSIX.1-2008 addition of POSIX_MADV_NOREUSE

Michael Kerrisk

Remove "POSIX.1b" from CONFORMING TO

Michael Kerrisk

Move mention of posix_fadvise() from CONFORMING TO to SEE ALSO

Michael Kerrisk

ERRORS: add EPERM error case for MADV_HWPOISON

Michael Kerrisk

Note that madvise() is nonstandard, but widespread

Newly documented interfaces in existing pages

proc.5

Michael Kerrisk

(Briefly) document /proc/PID/attr/socketcreate

Michael Kerrisk

(Briefly) document /proc/PID/attr/keycreate

Michael Kerrisk [Stephen Smalley]

Document /proc/PID/attr/{current,exec,fscreate,prev }

Heavily based on Stephen Smalley's text in

<https://lwn.net/Articles/28222/>

From: Stephen Smalley <sds@epoch.ncsc.mil>

To: LKML and others

Subject: [RFC][PATCH] Process Attribute API for Security Modules

Date: 08 Apr 2003 16:17:52 -0400

Michael Kerrisk

Document /proc/sys/kernel/auto_msgmni

socket.7

David Wilson [Michael Kerrisk]

Document SO_REUSEPORT socket option

New and changed links

get_thread_area.2

Andy Lutomirski

Make [get_thread_area.2](#) a link to rewritten [set_thread_area.2](#) page

Changes to individual pages

time.1

Michael Kerrisk

Make option argument formatting consistent with other pages

access.2

Denys Vlasenko

Explain how `access()` check treats capabilities

We have users who are terribly confused why their binaries with `CAP_DAC_OVERRIDE` capability see `EACCESS` from `access()` calls, but are able to read the file.

The reason is `access()` isn't the "can I read/write/execute this file?" question, it is the "(assuming that I'm a setuid binary,) can *the user who invoked me* read/write/execute this file?" question.

That's why it uses real UIDs as documented, and why it ignores capabilities when capability-endorsed binaries are run by non-root (this patch adds this information).

To make users more likely to notice this less-known detail, the patch expands the explanation with rationale for this logic into a separate paragraph.

arch_prctl.2

set_thread_area.2

get_thread_area.2

Andy Lutomirski

Improve TLS documentation

The documentation for `set_thread_area` was very vague. This improves it, accounts for recent kernel changes, and merges it with `get_thread_area.2`.

`get_thread_area.2` now becomes a link.

While I'm at it, clarify the related `arch_prctl.2` man page.

cacheflush.2

Ralf Baechle

Update some portability details and bugs

Michael Kerrisk

Refer reader to BUGS in discussion of EINVAL error

capget.2

Michael Kerrisk

Document V3 capabilities constants

Michael Kerrisk

Rewrite discussion of kernel versions that support file capabilities

File capabilities ceased to be optional in Linux 2.6.33.

clone.2

Peng Haitao

Fix description of CLONE_PARENT_SETTID

CLONE_PARENT_SETTID only stores child thread ID in parent memory.

clone.2

execve.2

Kevin Easton

Document interaction of execve(2) with CLONE_FILES

This patch the fact that a successful execve(2) in a process that is sharing a file descriptor table results in unsharing the table.

I discovered this through testing and verified it by source inspection - there is a call to unshare_files() early in do_execve_common().

fcntl.2

Michael Kerrisk [Jeff Layton]

Clarify cases of conflict between traditional record and OFD locks

Verified by experiment on Linux 3.15 and 3.19rc4.

fork.2

Michal Hocko

EAGAIN is not reported when task allocation fails

I am not sure why we have:

"EAGAIN fork() cannot allocate sufficient memory to copy the parent's page tables and allocate a task structure or the child."

The text seems to be there from the time when man-pages were moved to git so there is no history for it.

And it doesn't reflect reality: the kernel reports both dup_task_struct and dup_mm failures as ENOMEM to the

userspace. This seems to be the case from early 2.x times
so let's simply remove this part.

Heinrich Schuchardt

Child and parent run in separate memory spaces
fork.2 should clearly point out that child and parent
process run in separate memory spaces.

Michael Kerrisk

NOTES: add "C library/kernel ABI differences" subheading

getpid.2

Michael Kerrisk

NOTES: add "C library/kernel ABI differences" subheading

getxattr.2

Michael Kerrisk

Various rewordings plus one or two details clarified

Michael Kerrisk

Add pointer to example in listxattr(2)

killpg.2

Michael Kerrisk

NOTES: add "C library/kernel ABI differences" subheading

listxattr.2

Heinrich Schuchardt

Provide example program

Michael Kerrisk

Reword discussion of size==0 case

Michael Kerrisk

Add note on handling increases in sizes of keys or values

Michael Kerrisk

Remove mention of which filesystems implement ACLs

Such a list will only become outdated (as it already was).

migrate_pages.2

Jan Stancek

Document EFAULT and EINVAL errors

I encountered these errors while writing testcase for migrate_pages
syscall for LTP (Linux test project).

I checked stable kernel tree 3.5 to see which paths return these.

Both can be returned from get_nodes(), which is called from:

```
SYSCALL_DEFINE4(migrate_pages, pid_t, pid, unsigned long, maxnode,  
                const unsigned long __user *, old_nodes,  
                const unsigned long __user *, new_nodes)
```

The testcase does following:

EFAULT

- a) old_nodes/new_nodes is area mmaped with PROT_NONE
- b) old_nodes/new_nodes is area not mmaped in process address space, -1 or area that has been just munmmaped

EINVAL

- a) maxnodes overflows kernel limit
- b) new_nodes contain node, which has no memory or does not exist or is not returned for get_mempolicy(MPOL_F_MEMS_ALLOWED).

modify_ldt.2

Andy Lutomirski

Overhaul the documentation

This clarifies the behavior and documents all four functions.

Andy Lutomirski

Clarify the lm bit's behavior

The lm bit should never have existed in the first place. Sigh.

mprotect.2

Mark Seaborn

Mention effect of READ_IMPLIES_EXEC personality flag

I puzzled over mprotect()'s effect on /proc/*/maps for a while yesterday -- it was setting "x" without PROT_EXEC being specified.

Here is a patch to add some explanation.

msgget.2

Michael Kerrisk

Add details of MSGMNI default value

msgop.2

Michael Kerrisk

Clarify wording of MSGMAX and MSGMNB limits

perf_event_open.2

Vince Weaver

Clarify PERF_EVENT_IOC_REFRESH behavior

Currently the PERF_EVENT_IOC_REFRESH ioctl, when applied to a group leader, will refresh all children. Also if a refresh value of 0 is chosen then the refresh becomes infinite (never runs out).

Back in 2011 PAPI was relying on these behaviors but I was told that both were unsupported and subject to being removed at any time.

(See <https://lkml.org/lkml/2011/5/24/337>)

However the behavior has not been changed.

This patch updates the manpage to still list the behavior as unsupported, but removes the inaccurate description of it only being a problem with 2.6 kernels.

prctl.2

Michael Kerrisk [Bill McConnaughey]

Mention file capabilities in discussion of PR_SET_DUMPABLE

Michael Kerrisk

Greatly expand discussion of "dumpable" flag

In particular, detail the interactions with

/proc/sys/fs/suid_dumpable.

Michael Kerrisk

Reorder paragraphs describing PR_SET_DUMPABLE

Michael Kerrisk

Mention SUID_DUMP_DISABLE and SUID_DUMP_USER under PR_SET_DUMPABLE

Michael Kerrisk

Executing a file with capabilities also resets the parent death signal

ptrace.2

James Hunt

Explain behaviour should ptrace tracer call execve(2)

This behaviour was verified by reading the kernel source and

confirming the behaviour using a test program.

Denys Vlasenko

Add information on PTRACE_SEIZE versus PTRACE_ATTACH differences

Extend description of PTRACE_SEIZE with the short summary of its differences from PTRACE_ATTACH.

The following paragraph:

PTRACE_EVENT_STOP

Stop induced by PTRACE_INTERRUPT command, or group-stop, or initial ptrace-stop when a new child is attached (only if attached using PTRACE_SEIZE), or PTRACE_EVENT_STOP if PTRACE_SEIZE was used.

has an editing error (the part after last comma makes no sense).

Removing it.

Mention that legacy post-execve SIGTRAP is disabled by PTRACE_SEIZE.

sched_setattr.2

Michael Kerrisk [Christophe Blaess]

SYNOPSIS: remove 'const' from 'attr' sched_getattr() argument

semget.2

Michael Kerrisk

Note default value for SEMMNI and SEMMSL

semop.2

Michael Kerrisk

Note defaults for SEMOPM and warn against increasing > 1000

sendfile.2

Eric Wong

Caution against modifying sent pages

setxattr.2

Michael Kerrisk

ERRORS: add ENOTSUP for invalid namespace prefix

Michael Kerrisk

Remove redundant text under ENOTSUP error

Michael Kerrisk

Note that zero-length attribute values are permitted

Michael Kerrisk

Rework text describing 'flags' argument

stat.2

Michael Kerrisk

NOTES: add "C library/kernel ABI differences" subheading

statfs.2

Michael Kerrisk [Jan Chaloupka]

Document the 'f_flags' field added in Linux 2.6.36

Michael Kerrisk

Clarify that 'statfs' structure has some padding bytes

The number of padding bytes has changed over time, as some bytes are used, so describe this aspect of the structure less explicitly.

Tao Ma

Add OCFS2_SUPER_MAGIC

Michael Kerrisk

Use __fsword_t in statfs structure definition

This more closely matches modern glibc reality.

Michael Kerrisk

Add a note on the __fsword_t type

Michael Kerrisk

Document 'f_spare' more vaguely

wait.2

Michael Kerrisk

Note that waitpid() is a wrapper for wait4()

Michael Kerrisk

Note that wait() is a library function implemented via wait4()

wait4.2

Michael Kerrisk

NOTES: add "C library/kernel ABI differences" subheading

encrypt.3

Rob Somers

Improve code example

I (and some others) found that the original example code did not seem to work as advertised. The new code (used by permission of the original author, Jens Thoms Toerring) was found on comp.os.linux.development.

mktemp.3

Luke Faraone

DESCRIPTION reference to BUGS corrected

mktemp(3)'s DESCRIPTION referenced NOTES, but no such section exists. Corrected to refer to BUGS.

pthread_attr_setschedparam.3

Tobias Herzke

Describe EINVAL in ERRORS

resolver.3

host.conf.5

Simon Paillard

host.conf 'order' option deprecated, replaced by nsswitch.conf(5)

http://www.sourceware.org/bugzilla/show_bug.cgi?id=2389

<http://repo.or.cz/w/glibc.git/commit/b9c65d0902e5890c4f025b574725154032f8120a>

Reported at <http://bugs.debian.org/270368>,

<http://bugs.debian.org/396633>, and <http://bugs.debian.org/344233>.

statvfs.3

Michael Kerrisk

Document missing 'f_flag' bit values

And reorganize information relating to which flags are in POSIX.1.

Michael Kerrisk [Jan Chaloupka]

statvfs() now populates 'f_flag' from statfs()'s f_flag field

These changes came with glibc 2.13, and the kernel's addition of a 'f_flags' field in Linux 2.6.36.

syslog.3

Michael Kerrisk [Doug Goldstein]

Remove unneeded <stdarg.h>

vsyslog() does not need this.

tzset.3

J William Piggott

Add offset format

tzset.3 does not illustrate the POSIX offset format.

Specifically, there is no indication in the manual what the optional components of it are.

random.4

Michael Kerrisk

Note maximum number of bytes returned by read(2) on /dev/random

Michael Kerrisk [Mathieu Malaterre]

Since Linux 3.16, reads from /dev/urandom return at most 32 MB

See <https://bugs.debian.org/775328> and

https://bugzilla.kernel.org/show_bug.cgi?id=80981#c9

core.5

Michael Kerrisk [Bill McConnaughey]

Executing a file that has capabilities also prevents core dumps

Michael Kerrisk

Document "%i" and "%I" core_pattern specifiers

intro.5

Michael Kerrisk

Remove words "and protocols"

There are no protocol descriptions in Section 5. Protocols are in Section 7.

proc.5

Michael Kerrisk

Add reference to prctl(2) in discussion of /proc/sys/fs/suid_dumpable

And note that /proc/sys/fs/suid_dumpable defines the value assigned to the process "dumpable" flag in certain circumstances.

Michael Kerrisk

Note that CAP_SYS_ADMIN is required to list /proc/PID/map_files

This might however change in the future; see the Jan 2015 LKML thread:

Re: [RFC][PATCH v2] procfs: Always expose /proc/<pid>/map_files/
and make it readable

resolv.conf.5

Michael Kerrisk

SEE ALSO: add nsswitch.conf(5)

capabilities.7

Michael Kerrisk

Mention SECBIT_KEEP_CAPS as an alternative to prctl() PR_SET_KEEPCAPS

Chris Mayo

NOTES: add last kernel versions for obsolete options

The CONFIG_SECURITY_CAPABILITIES option was removed by
commit 5915eb53861c5776cfec33ca4fcc1fd20d66dd27

The CONFIG_SECURITY_FILE_CAPABILITIES option removed in
Linux 2.6.33 as already mentioned in DESCRIPTION.

pthread.7

Michael Kerrisk

SEE ALSO: add fork(2)

unix.7

Jan Chaloupka

Mention SOCK_STREAM socket for ioctl_type of ioctl()
from https://bugzilla.redhat.com/show_bug.cgi?id=1110401.

unix.7 is not clear about socket type of ioctl_type argument of
ioctl() function. The description of SIOCINQ is applicable only
for SOCK_STREAM socket. For SOCK_DGRAM, udp(7) man page gives
correct description of SIOCINQ

ldconfig.8

Michael Kerrisk

Place options in alphabetical order

Michael Kerrisk

Note glibc version number for '-l' option

Michael Kerrisk

Document -c/--format option

Michael Kerrisk

Add long form of some options

Michael Kerrisk [Patrick Horgan]

ld.so.conf uses only newlines as delimiters
mtk: confirmed by reading source of parse_conf() in
elf/ldconfig.c.

Michael Kerrisk

Document -V/--version option

Michael Kerrisk

Document -i/--ignore-aux-cache option

ld.so.8

Michael Kerrisk

Relocate "Hardware capabilities" to be a subsection under notes
This is more consistent with standard man-pages headings
and layout.

Michael Kerrisk

(Briefly) document LD_TRACE_PRELINKING

Michael Kerrisk

Remove duplicate description of LD_BIND_NOT

==== Changes in man-pages-3.81 =====

Released: 2015-03-02, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Alexandre Oliva <aoliva@redhat.com>
Carlos O'Donell <carlos@redhat.com>
Ma Shimiao <mashimiao.fnst@cn.fujitsu.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Peng Haitao <penght@cn.fujitsu.com>

Apologies if I missed anyone!

New and rewritten pages

attributes.7

Alexandre Oliva, Michael Kerrisk [Carlos O'Donell]
New page describing POSIX safety concepts

Global changes

Many pages

Peng Haitao, Michael Kerrisk
Reformat existing thread-safety information to use a tabular format, rather than plain text.

Changes to individual pages

mmap.2

Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function mmap() and munmap() are thread safe.

a64l.3

Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

acos.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The function acos(), acosf() and acosl() are thread safe.

acosh.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function atan2(), atan2f() and atan2l() are thread safe.

atanh.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function atanh(), atanhf() and atanhl() are thread safe.

backtrace.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The markings match glibc markings.

btowc.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The function btowc() in glibc is thread safe.

Its marking matches glibc marking.

cabs.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function cabs(), cabsf() and cabsl() are thread safe.

acos.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function acos(), acosf() and acosl() are thread safe.

cacosh.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The functions cacosh(), cacoshf() and cacoshl() in glibc are thread safe. Its markings match glibc markings.

canonicalize_file_name.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The functions canonicalize_file_name() in glibc is thread safe.
Its marking matches glibc marking.

carg.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The function carg(), cargf() and cargl() are thread safe.

casin.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The functions casin(), casinl() and casinl() are thread safe.
Their markings match glibc markings.

casinh.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The functions casinh(), casinhf() and casinhl() in glibc are
thread safe. Its markings match glibc markings.

catan.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The functions catan(), catanf() and catanl() are thread safe.
Their markings match glibc markings.

catanh.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The functions catanh(), catanhf() and catanhl() in glibc are
thread safe. Its markings match glibc markings.

catopen.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions catopen() and catclose() are thread safe.

cfree.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The function cfree() in glibc is thread safe.
Its marking matches glibc marking.

clog10.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The functions clog10(), clog10f() and clog10l() in glibc are

thread safe. Its markings match glibc markings.

clog.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function clog(), clogf() and clogl() are thread safe.

closedir.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The function closedir() in glibc is thread safe.

Its marking matches glibc marking.

confstr.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The function confstr() is thread safe.

cosh.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The functions cosh(), coshf() and coshl() in glibc are thread safe.

Its markings match glibc markings.

cpow.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The functions cpow(), cpowf() and cpowl() in glibc are thread safe.

Its markings match glibc markings.

crypt.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

ctermid.3

Ma Shimiao

Modify thread-safety information

According to the change of source code, ctermid's level has been changed from MT-Unsafe to MT-Safe. After modifying, the marking matches the glibc marking.

drand48.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

drand48_r.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

ecvt.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be same as glibc manual.

ecvt_r.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The markings match glibc markings.

encrypt.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

envz_add.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The markings match glibc markings.

exec.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions execl(), execlp(), execl(), execv(), execvp() and execvpe() are thread safe.

exit.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

exp10.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

exp2.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function `exp2()`, `exp2f()` and `exp2l()` are thread safe.

`exp.3`

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function `exp()`, `expf()` and `expl()` are thread safe.

`fclose.3`

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The function `fclose()` is thread safe.

Its marking matches glibc marking.

`fcloseall.3`

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

`fgetc.3`

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The markings match glibc markings.

`fgetwc.3`

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The markings match glibc markings.

`fgetws.3`

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The marking matches glibc marking.

`fmod.3`

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function `fmod()`, `fmodf()` and `fmodl()` are thread safe.

`fnmatch.3`

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `fnmatch()` is thread safe with exceptions.

`fopen.3`

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The markings match glibc markings.

fopencookie.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

fread.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions fread() and fwrite() are thread safe.

gamma.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe
The functions gamma(), gammaf() and gammal() are not thread safe.

Ma Shimiao

Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

getcontext.3

Ma Shimiao

Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

getcwd.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions getcwd(), getwd() and get_current_dir_name() are
thread safe.

getdate.3

Ma Shimiao

Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

getenv.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions getenv() and secure_getenv() are thread safe.

getfsent.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe
The functions setfsent(), getfsent(), endfsent(), getfsspec()
and getfsfile() are not thread safe.

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getgrent.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

Its marking matches glibc marking.

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getgrnam.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getgrouplist.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function getgrouplist() is thread safe with exceptions.

getlogin.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getopt.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

The functions getopt(), getopt_long() and getopt_long_only() are not thread safe.

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getpass.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getpwent.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getpwnam.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

gets.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

Its marking matches glibc marking.

getw.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions getw() and putw() are thread safe.

gnu_get_libc_version.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions gnu_get_libc_version() and gnu_get_libc_release() are thread safe.

hsearch.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

iconv.3

Peng Haitao

Modify thread-safety information

inet.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions

The functions inet_aton() and inet_addr() are thread safe with exceptions.

The functions inet_network(), inet_ntoa(), inet_makeaddr(), inet_lnaof() and inet_netof() are thread safe.

Modify thread-safety information

After researching and talking, we think inet_network() and inet_ntoa() should be marked with locale.

After changing, the markings match glibc markings.

inet_pton.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions
The function inet_pton() is thread safe with exceptions.

iswdigit.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions
The function iswdigit() is thread safe with exceptions.

iswgraph.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions
The function iswgraph() is thread safe with exceptions.

iswlower.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions
The function iswlower() is thread safe with exceptions.

iswprint.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions
The function iswprint() is thread safe with exceptions.

iswpunct.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions
The function iswpunct() is thread safe with exceptions.

iswspace.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions
The function iswspace() is thread safe with exceptions.

iswupper.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions
The function iswupper() is thread safe with exceptions.

iswxdigit.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions
The function iswxdigit() is thread safe with exceptions.

j0.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The function j0(), j1f() jnl() and so on are thread safe.

lio_listio.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
Its marking matches glibc marking.

log10.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The function log10(), log10f() and log10l() are thread safe.

log2.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The function log2(), log2f() and log2l() are thread safe.

log.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The function log(), logf() and logl() are thread safe.

makecontext.3

Ma Shimiao

Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

makedev.3

Peng Haitao

ATTRIBUTES: Note macros that are thread-safe
The macros makedev(), major() and minor() are thread safe.

malloc.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The function malloc(), free(), calloc() and realloc() are
thread safe.

mblen.3

Ma Shimiao

Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

mbstowcs.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

mbtowc.3

Peng Haitao

ATTRIBUTES: Note function that is not thread-safe
The function mbtowc() is not thread safe.

Ma Shimiao

Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

mktemp.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function mktemp() is thread safe.

mtrace.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe
The functions mtrace() and muntrace() are not thread safe.

nan.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

nl_langinfo.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions
The function nl_langinfo() is thread safe with exceptions.

opendir.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The markings match glibc markings.

pow10.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The function pow10(), pow10f() and pow10l() are thread safe.

pow.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The function pow(), powf() and powl() are thread safe.

pthread_setcancelstate.3

Michael Kerrisk

Add async-signal-safety information

ptsname.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

putenv.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-unsafe

The function putenv() is thread unsafe.

puts.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions fputs(), fputc(), putc(), putchar() and puts() are thread safe.

putwchar.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The marking matches glibc marking.

qecvt.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be same as glibc manual.

rand.3

Peng Haitao

ATTRIBUTES: Note macros that are thread-safe

The functions rand(), rand_r() and srand() are thread safe.

random_r.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

readdir.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be same as glibc manual.

realpath.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

regex.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions
The functions regcomp() and regexec() are thread safe with exceptions.
The functions regerror() and regfree() are thread safe.

remainder.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The markings match glibc markings.

scalb.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The function scalb(), scalbf() and scalbl() are thread safe.

setenv.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-unsafe
The function setenv() and unsetenv() are thread unsafe.

siginterrupt.3

Ma Shimiao

Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

sigset.3

Peng Haitao

ATTRIBUTES: Note macros that are thread-safe
The functions sigset(), sighold(), sigrelse() and sigignore() are thread safe.

sinh.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The function sinh(), sinh() and sinhl() are thread safe.

sqrt.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The function sqrt(), sqrtf() and sqrtl() are thread safe.

stdarg.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

stdio_ext.3

Ma Shimiao

Modify thread-safety information

Change the thread safety information to be the same as glibc.

strcasecmp.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions

The functions strcasecmp() and strncasecmp() are thread safe with exceptions.

strerror.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

strfmon.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

Its marking matches glibc marking.

strfry.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function strfry() is thread safe.

strftime.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function strftime() is thread safe with exceptions.

strptime.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function strptime() is thread safe with exceptions.

strtok.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the

thread-safety information to be the same as glibc manual.

strverscmp.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function strverscmp() is thread safe.

strxfrm.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The marking matches glibc marking.

syslog.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions

The functions openlog() and closelog() are thread safe.

The functions syslog() and vsyslog() are thread safe with exceptions.

tempnam.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function tempnam() is thread safe.

termios.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

Ma Shimiao

Modify thread-safety information

As this is man page for Linux, we don't need thread safety information for BSD

tgamma.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The functions tgamma(), tgammaf() and tgammal() in glibc are thread safe. Its markings match glibc markings.

timegm.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions

The functions timelocal() and timegm() are thread safe with exceptions.

tmpfile.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

Its markings match glibc markings.

tmpnam.3

Peng Haitao

Modify thread-safety information

When the argument `s` is `NULL`, `tmpnam()` should be `MT-Unsafe`.

toupper.3

Ma Shimiao

Modify thread-safety information

After researching and talking, we think `toupper()` and `tolower()` should not be marked with `locale`.

After changing, the markings match glibc markings.

tsearch.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The functions' markings match glibc markings.

ttynam.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be same as glibc manual.

tzset.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `tzset()` is thread safe with exceptions.

wcsdup.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

Its marking matches glibc marking.

wctomb.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

y0.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The function `y0()`, `y1f()` `ynl()` and so on are thread safe.

Apologies if I missed anyone!

New and rewritten pages

nptl.7

Michael Kerrisk

New page with details of the NPTL POSIX threads implementation

Newly documented interfaces in existing pages

user_namespaces.7

Eric W. Biederman [Michael Kerrisk]

Document /proc/[pid]/setgroups

Changes to individual pages

intro.1

Stéphane Aulery

Prompt is not % but \$

Stéphane Aulery

Various improvements

- Add reference to other common shells dash(1), ksh(1)
- Add a reference to stdout(3)
- Separate cp and mv descriptions
- Add examples of special cases of cd
- Add su(1) and shutdown(8) references for section Logout and poweroff
- Move Control-D to section Logout and poweroff
- Fix some little formatting errors

Stéphane Aulery

Add cross references cited

Stéphane Aulery

Order SEE ALSO section

clone.2

Josh Triplett

Document that clone() silently ignores CLONE_PID and CLONE_STOPPED

Normally, system calls return EINVAL for flags they don't support.

Explicitly document that clone does **not** produce an error for these two obsolete flags.

Michael Kerrisk

Small rewording of explanation of clone() wrt threads

Clone has so many effects that it's an oversimplification to say that the **main** use of clone is to create a thread. (In fact, the use of clone() to create new processes may well be more common, since glibc's fork() is a wrapper that calls clone().)

getgroups.2

Michael Kerrisk [Shawn Landden]

Add discussion of NPTL credential-changing mechanism

At the kernel level, credentials (UIDs and GIDs) are a per-thread attribute. NPTL uses a signal-based mechanism to ensure that when one thread changes its credentials, all other threads change credentials to the same values. By this means, the NPTL implementation conforms to the POSIX requirement that the threads in a process share credentials.

Michael Kerrisk

ERRORS: add EPERM for the case where /proc/PID/setgroups is "deny"

Michael Kerrisk

Note capability associated with EPERM error for setgroups(2)

Michael Kerrisk

Refer reader to user_namespaces(7) for discussion of /proc/PID/setgroups

The discussion of /proc/PID/setgroups has moved from proc(5) to user_namespaces(7).

getpid.2

Michael Kerrisk

Note that getpid() returns 0 if parent is in different PID namespace

getsockopt.2

Konstantin Shemyak

Note RETURN VALUE details when netfilter is involved

ioctl_list.2

Heinrich Schuchardt

SEE ALSO ioctl_fat.2

Add FAT_IOCTL_GET_VOLUME_ID

SEE ALSO `ioctl_fat.2`

Heinrich Schuchardt

`include/linux/ext2_fs.h`

Include `linux/ext2_fs.h` does not contain any `ioctl` definitions anymore.

Request codes `EXT2_IOC*` have been replaced by `FS_IOC*` in `linux/fs.h`.

Some definitions of `FS_IOC_*` use `long*` but the actual code expects `int*` (see `fs/ext2/ioctl.c`).

`msgop.2`

Bill Pemberton

Remove `EAGAIN` as `msgrcv()` `errno`

The list of `errno`s for `msgrcv()` lists both `EAGAIN` and `ENOMSG` as the `errno` for no message available with the `IPC_NOWAIT` flag.

`ENOMSG` is the `errno` that will be set.

Bill Pemberton

Add an example program

`open.2`

Michael Kerrisk [Jason Vas Dias]

Mention blocking semantics for FIFO opens

See https://bugzilla.kernel.org/show_bug.cgi?id=95191

`seccomp.2`

Jann Horn [Kees Cook, Mikael Pettersson, Andy Lutomirski]

Add note about `alarm(2)` not being sufficient to limit runtime

Jann Horn

Explain blacklisting problems, expand example

Michael Kerrisk [Kees Cook]

Add mention of `libseccomp`

`setgid.2`

Michael Kerrisk

Clarify that `setgid()` changes all GIDs when caller has `CAP_SETGID`

Michael Kerrisk [Shawn Landden]

Add discussion of NPTL credential-changing mechanism

At the kernel level, credentials (UIDs and GIDs) are a per-thread attribute. NPTL uses a signal-based mechanism to ensure that when one thread changes its credentials, all other threads change credentials to the same values. By this means, the NPTL implementation conforms to the POSIX requirement that the threads in a process share credentials.

`setresuid.2`

Michael Kerrisk [Shawn Landden]

Add discussion of NPTL credential-changing mechanism

At the kernel level, credentials (UIDs and GIDs) are a per-thread attribute. NPTL uses a signal-based mechanism to ensure that when one thread changes its credentials, all other threads change credentials to the same values. By this means, the NPTL implementation conforms to the POSIX requirement that the threads in a process share credentials.

setreuid.2

Michael Kerrisk [Shawn Landden]

Add discussion of NPTL credential-changing mechanism

At the kernel level, credentials (UIDs and GIDs) are a per-thread attribute. NPTL uses a signal-based mechanism to ensure that when one thread changes its credentials, all other threads change credentials to the same values. By this means, the NPTL implementation conforms to the POSIX requirement that the threads in a process share credentials.

Michael Kerrisk

SEE ALSO: add_credentials(7)

setuid.2

Michael Kerrisk

Clarify that setuid() changes all UIDs when caller has CAP_SETUID

Michael Kerrisk [Shawn Landden]

Add discussion of NPTL credential-changing mechanism

At the kernel level, credentials (UIDs and GIDs) are a per-thread attribute. NPTL uses a signal-based mechanism to ensure that when one thread changes its credentials, all other threads change credentials to the same values. By this means, the NPTL implementation conforms to the POSIX requirement that the threads in a process share credentials.

sigaction.2

Michael Kerrisk

Add discussion of rt_sigaction(2)

Michael Kerrisk

Note treatment of signals used internally by NPTL

The glibc wrapper gives an EINVAL error on attempts to change the disposition of either of the two real-time signals used by NPTL.

sigpending.2

Michael Kerrisk

Add discussion of rt_sigpending(2)

sigprocmask.2

Michael Kerrisk

Add discussion of rt_sigprocmask(2)

Michael Kerrisk

Note treatment of signals used internally by NPTL

The glibc wrapper silently ignores attempts to block the two real-time signals used by NPTL.

sigreturn.2

Michael Kerrisk

Add discussion of `rt_sigreturn(2)`

sigsuspend.2

Michael Kerrisk

Add discussion of `rt_sigsuspend(2)`

sigwaitinfo.2

Michael Kerrisk

Note treatment of signals used internally by NPTL

The glibc wrappers silently ignore attempts to wait for signals used by NPTL.

Michael Kerrisk

Add discussion of `rt_sigtimedwait(2)`

socket.2

Heinrich Schuchardt

SEE ALSO `close(2)`

The description mentions `close(2)`. Hence it should also be referenced in the SEE ALSO section.

syscall.2

Jann Horn

Add x32 ABI

umount.2

Eric W. Biederman

Document the effect of shared subtrees on `umount(2)`

Eric W. Biederman

Correct the description of `MNT_DETACH`

I recently realized that I had been reasoning improperly about what `umount(MNT_DETACH)` did based on an insufficient description in the `umount.2` man page, that matched my intuition but not the implementation.

When there are no submounts, `MNT_DETACH` is essentially harmless to applications. Where there are submounts, `MNT_DETACH` changes what is visible to applications using the `detach` directories.

Michael Kerrisk

Move "shared mount + `umount`" text to a subsection in NOTES

aio_return.3

Stéphane Aulery

Document the return value on error

Reported by Alexander Holler <holler@ahsoftware.de>

clock.3

Stéphane Aulery

CLOCKS_PER_SEC = 1000000 is required by XSI, not POSIX

Debian Bug #728213 reported by Tanaka Akira <akr@fsij.org>

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=728213>

dlopen.3

Michael Kerrisk

Amend error in description of dlclose() behavior

The current text says that unloading depends on whether the reference count falls to zero *and no other libraries are using symbols in this library*. That latter text has been there since man-pages-1.29, but it seems rather dubious. How could the implementation know whether other libraries are still using symbols in this library? Furthermore, no other implementation's man page mentions this point. Seems best to drop this point.

Michael Kerrisk

Add some details for RTLD_DEFAULT

Michael Kerrisk

Add some details on RTLD_NEXT and preloading

Michael Kerrisk

RTLD_NEXT works for symbols generally, not just functions

The common use case is for functions, but RTLD_NEXT also applies to variable symbols.

Michael Kerrisk

dlclose() recursively closes dependent libraries

Note that dlclose() recursively closes dependent libraries that were loaded by dlopen()

Michael Kerrisk

Rename second dlopen() argument from "flag" to "flags"

This is more consistent with other such arguments

Michael Kerrisk

Reformat text on RTLD_DEFAULT and RTLD_NEXT

fmemopen.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The markings match glibc markings.

fpathconf.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The marking matches glibc marking.

fputc.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The marking matches glibc marking.

fputws.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

fseek.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

fseeko.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

gcvt.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

getline.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The marking matches glibc marking.

getwchar.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

hypot.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

iconv_open.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

if_nameindex.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

initgroups.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The markings match glibc markings.

mq_open.3

Torvald Riegel

Add EINVAL error case for invalid name

This behavior is implementation-defined by POSIX. If the name doesn't start with a '/', glibc returns EINVAL without attempting the syscall.

popen.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The marking matches glibc marking.

pthread_kill.3

Michael Kerrisk

Note treatment of signals used internally by NPTL

The glibc pthread_kill() function gives an error on attempts to send either of the real-time signals used by NPTL.

pthread_sigmask.3

Michael Kerrisk

Note treatment of signals used internally by NPTL

The glibc implementation silently ignores attempts to block the two real-time signals used by NPTL.

pthread_sigqueue.3

Michael Kerrisk

Note treatment of signals used internally by NPTL

The glibc pthread_sigqueue() function gives an error on attempts to send either of the real-time signals used by NPTL.

resolver.3

Stéphane Aulery [Jakub Wilk]

Document missing options used by _res structure indicate defaults

Missing options: RES_INSECURE1, RES_INSECURE2, RES_NOALIASES, USE_INET6, ROTATE, NOCHECKNAME, RES_KEEPTSIG, BLAST, USEBSTRING, NOIP6DOTINT, USE_EDNS0, SNGLKUP, SNGLKUPREOP, RES_USE_DNSSEC, NOTLDQUERY, DEFAULT

Written from the glibc source and resolv.conf.5.

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=527136>

Stéphane Aulery

RES_IGNTC is implemented

rint.3

Matt Turner

Document that halfway cases are rounded to even

Per IEEE-754 rounding rules.

The round(3) page describes the behavior of rint and nearbyint in the halfway cases by saying:

These functions round x to the nearest integer, but round halfway cases away from zero [...], instead of to the nearest even integer like rint(3)

sigqueue.3

Michael Kerrisk

NOTES: add "C library/kernel ABI differences" subheading

Michael Kerrisk

Clarify version info (mention rt_sigqueueinfo())

sigsetops.3

Michael Kerrisk

Note treatment of signals used internally by NPTL

The glibc sigfillset() function excludes the two real-time signals used by NPTL.

sigwait.3

Michael Kerrisk

Note treatment of signals used internally by NPTL

The glibc sigwait() silently ignore attempts to wait for signals used by NPTL.

strcoll.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

The markings match glibc markings.

strdup.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

The marking matches glibc marking.

tzset.3

J William Piggott

Add 'std' quoting information

ulimit.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

wcstombs.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

wctob.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

xdr.3

Taisuke Yamada

Clarified incompatibility and correct usage of XDR API
See <http://bugs.debian.org/628099>

console_codes.4

Scot Doyle

Add Console Private CSI sequence 15
An undocumented escape sequence in drivers/tty/vt/vt.c brings the
previously accessed virtual terminal to the foreground.
mtk: Patch misattributed to Taisuke Yamada in Git commit
because of a muck up on my part.

Michael Kerrisk

Add kernel version number for CSI sequence 15

random.4

Michael Kerrisk

Fix permissions shown for the devices
These days, the devices are RW for everyone.

filesystems.5

Michael Kerrisk

Remove dubious claim about comparative performance of ext2
Perhaps it was the best filesystem performance-wise in
the 20th century, when that text was written. That probably
ceased to be true quite a long time ago, though.

Stéphane Aulery

Add cross references for ext filesystems

Stéphane Aulery

Specifies the scope of this list and its limits.

host.conf.5

hosts.5

resolv.conf.5

Stéphane Aulery [Paul E Condon]

Cross references of these pages.

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=298259>

host.conf.5

Stéphane Aulery

Rework discussion of nospoof, spoofalert, spoof and RESOLV_SPOOF_CHECK

The keywords and environment variables "nospoof", "spoofalert", "spoof" and RESOLV_SPOOF_CHECK were added to glibc 2.0.7 but never implemented

Move descriptions to historical section and reorder it for clarity

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=773443>

hosts.5

Stéphane Aulery [Vincent Lefevre]

Mention 127.0.1.1 for FQDN and IPv6 examples

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=562890>

proc.5

Taisuke Yamada

Document /proc/PID/status VmPin field

See <https://bugs.launchpad.net/bugs/1071746>

Michael Kerrisk

Document (the obsolete) /proc/PID/seccomp

Michael Kerrisk

Replace description of 'uid_map' with a reference to user_namespaces(7)

All of the information in proc(5) was also present in user_namespaces(7), but the latter was more detailed and up to date.

Taisuke Yamada

Fix SELinux /proc/pid/attr/current example

Since the /proc/pid/attr API was added to the kernel, there have been a couple of changes to the SELinux handling of /proc/pid/attr/current. Fix the SELinux /proc/pid/attr/current example text to reflect these changes and note which kernel versions first included the changes.

securetty.5

Stéphane Aulery [Nicolas FRANCOIS]

Note that the pam_securetty module also uses this file

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=528015>

This patch is a modified version of the one proposed without parts specific to Debian.

boot.7

Michael Witten

Copy edit

While a lot of the changes are issues of presentation, there are also issues of grammar and punctuation.

Michael Witten

Mention `systemd(1)` and its related `bootup(7)`

It's important that the reader receive contemporary information.

credentials.7

Michael Kerrisk

SEE ALSO: add pthreads(7)

Michael Kerrisk

Add reference to nptl(7)

feature_test_macros.7

Michael Kerrisk

Update discussion of `_FORTIFY_SOURCE`

Since the initial implementation a lot more checks were added.

Describe all the checks would be too verbose (and would soon fall out of date as more checks are added). So instead, describe the kinds of checks that are done more generally.

Also a few other minor edits to the text.

hier.7

Stéphane Aulery

First patch of a series to achieve compliance with FHS 2.3

Stéphane Aulery

SGML and XML directories are separated in FHS 2.3

Stéphane Aulery

Add missing directories defined by FHS 2.3

Stéphane Aulery

Identify which directories are optional

Stéphane Aulery

Document `/initrd`, `/lost+found` and `/sys`

Ubuntu Bug #70094 reported by Brian Beck

<https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/70094>

Stéphane Aulery

Explain YP, which is not obvious

ipv6.7

Stéphane Aulery [David Madore]

`SOL_IPV6` and other `SOL_*` options socket are not portable

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=472447>

man-pages.7

Michael Kerrisk [Bill Pemberton]

Add `indent(1)` command that produces desired formatting for example code

Stéphane Aulery

Improve description of sections in accordance with intro pages

packet.7

Michael Kerrisk

Rework description of fanout algorithms as list

Michael Kerrisk

Remove mention of needing UID 0 to create packet socket

The existing text makes no sense. The check is based purely on a capability check. (Kernel function `net/packet/af_packet.c::packet_create()`)

Michael Kerrisk

Remove text about ancient glibc not defining SOL_PACKET

This was fixed in glibc 2.1.1, which is a long while ago. And in any case, there is nothing special about this case; it's just one of those times when glibc lags.

Michael Kerrisk

Rework description of 'sockaddr_ll' fields as a list

Michael Kerrisk

Various minor edits

pthread.7

Michael Kerrisk

Add references to `nptl(7)`

raw.7

Michael Kerrisk

Rephrase "Linux 2.2" language to "Linux 2.2 or later"

The man page was written in the Linux 2.2 timeframe, and some phrasing was not future-proof.

signal.7

Michael Kerrisk

Note when Linux added realtime signals

Michael Kerrisk

Correct the range of realtime signals

Michael Kerrisk

Summarize 2.2 system call changes that resulted from larger signal sets

Michael Kerrisk

SEE ALSO: add `nptl(7)`

tcp.7

Peter Adkins

Document removal of `TCP_SYNQ_HSIZE`

Looking over the man page for 'tcp' I came across a reference to tuning the '`TCP_SYNQ_HSIZE`' parameter when increasing '`tcp_max_syn_backlog`' above 1024. However, this static sizing was removed back in Linux 2.6.20 in favor of dynamic scaling - as

part of commit 72a3effaf633bcae9034b7e176bdbc78d64a71db.

user_namespaces.7

Eric W. Biederman

Update the documentation to reflect the fixes for negative groups

Files with access permissions such as rwx---rwx give fewer permissions to their group than they do to everyone else. Which means dropping groups with `setgroups(0, NULL)` actually grants a process privileges.

The unprivileged setting of `gid_map` turned out not to be safe after this change. Privileged setting of `gid_map` can be interpreted as meaning yes it is ok to drop groups. [Eric additionally noted: Setting of `gid_map` with `privilege` has been clarified to mean that dropping groups is ok. This allows existing programs that set `gid_map` with `privilege` to work without changes. That is, `newgidmap(1)` continues to work unchanged.]

To prevent this problem and future problems, user namespaces were changed in such a way as to guarantee a user can not obtain credentials without privilege that they could not obtain without the help of user namespaces.

This meant testing the effective user ID and not the filesystem user ID, as `setresuid(2)` and `setregid(2)` allow setting any process UID or GID (except the supplementary groups) to the effective ID.

Furthermore, to preserve in some form the useful applications that have been setting `gid_map` without privilege, the file `/proc/[pid]/setgroups` was added to allow disabling `setgroups(2)`. With `setgroups(2)` permanently disabled in a user namespace, it again becomes safe to allow writes to `gid_map` without privilege.

Michael Kerrisk

Rework some text describing permission rules for updating map files

No (intentional) change to the facts, but this restructuring should make the meaning easier to grasp.

Michael Kerrisk

Update kernel version associated with 5-line limit for map files

As at Linux 3.18, the limit is still five lines, so mention the more recent kernel version in the text.

Michael Kerrisk [Alban Crequy]

Handle `/proc/PID/setgroups` in the example program

Michael Kerrisk

Rework text describing restrictions on updating `/proc/PID/setgroups`

No (intentional) changes to factual description, but the restructured text is hopefully easier to grasp.

Michael Kerrisk

Explain why the /proc/PID/setgroups file was added

ldconfig.8

Michael Kerrisk

Note use of /lib64 and /usr/lib64 on some 64-bit architectures

ld.so.8

Michael Kerrisk

Note the use of /lib64 and /usr/lib64 on some 64-bit architectures

===== Changes in man-pages-3.83 =====

Released: 2015-04-19, Munich

Describe /proc/PID/fdinfo eventfd format

Michael Kerrisk

Document /proc/PID/fdinfo signalfd format

New and changed links

newfstatat.2

Michael Kerrisk

New link to fstatat64.2

prlimit64.2

Michael Kerrisk

New link to getrlimit.2

Global changes

Various section 3 math pages

Michael Kerrisk

Note that these functions are also in POSIX.1-2001 and POSIX.1-2008

Changes to individual pages

getent.1

Robin H. Johnson

Document options

The options to getent are now documented, after being around for nearly a decade without changes.

Michael Kerrisk

Document help and version options

fallocate.2

Michael Kerrisk

Fix kernel version number for FALLOC_FL_ZERO_RANGE

FALLOC_FL_ZERO_RANGE was added in 3.15, not 3.14.

Michael Kerrisk

Note that SMB3 added FALLOC_FL_ZERO_RANGE support in Linux 3.17

getrlimit.2

Michael Kerrisk

Note that the underlying system call for prlimit() is prlimit64()

Michael Kerrisk

Remove "_FILE_OFFSET_BITS == 64" from prlimit() FTM requirements

"_FILE_OFFSET_BITS == 64" is not needed to get the prlimit() declaration.

ioctl_list.2

Nikos Mavrogiannopoulos

SIOCADDRT accepts in6_rtmsg in INET6 protocol

Heinrich Schuchardt

TFD_IOC_SET_TICKS

timerfd_create.2 mentions TFD_IOC_SET_TICKS. We should add it to ioctl_list.2, too.

lseek.2

Michael Kerrisk

Advise reader to use lseek(2) instead

Michael Kerrisk

lseek() exists on 32-bit platforms to support seeking to large offsets

madvise.2

David Rientjes

Specify MADV_REMOVE returns EINVAL for hugetlbf

madvise(2) actually returns with error EINVAL for MADV_REMOVE when used for hugetlb VMAs, not EOPNOTSUPP, and this has been the case since MADV_REMOVE was introduced in commit f6b3ec238d12 ("madvise(MADV_REMOVE): remove pages from tmpfs shm backing store"). Specify the exact behavior.

Michael Kerrisk

SEE ALSO: add posix_madvise(2)

poll.2

Michael Kerrisk [Andreas Baak]

SEE ALSO: add epoll(7)

posix_fadvise.2

Michael Kerrisk

Add "C library/kernel ABI differences" subsection

pread.2

Michael Kerrisk

Add "C library/kernel ABI differences" subsection

seccomp.2

Michael Kerrisk [Pierre Chifflier, Kees Cook]

Note that seccomp_data is read-only

stat.2

Michael Kerrisk

Add some details on various "stat" versions

Three versions of "stat" appeared on 32-bit systems, dealing with structures of different (increasing) sizes. Explain some of the details, and also note that the situation is simpler on modern 64-bit architectures.

Michael Kerrisk

Add mention of newfstatat()

The underlying system call for fstatat() is newfstatat() on some architectures.

symlink.2

Michael Kerrisk [Jonny Grant]

ERRORS: add linkpath="" case for ENOENT

syscalls.2

Michael Kerrisk

Remove prlimit()

There really is only the prlimit64() system call.

Michael Kerrisk

Add some details about the "multiple versions of system calls"

The multiple-system-call-version phenomenon is particularly a feature of older 32-bit platforms. Hint at that fact in the text.

timerfd_create.2

Cyrill Gorcunov [Michael Kerrisk]

Document TFD_IOC_SET_TICKS ioctl() operation

Michael Kerrisk

Add some details to C library/kernel ABI differences

unshare.2

Michael Kerrisk [Fabien Pichot]

Remove mention of "System V" from discussion of CLONE_NEWIPC

These days, CLONE_NEWIPC also affects POSIX message queues.

asprintf.3

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

carg.3

Michael Kerrisk

Add introductory sentence explaining what these functions calculate

ccos.3

ctanh.3

Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe

Michael Kerrisk

Add introductory sentence explaining what these functions calculate

ctime.3

Zeng Linggang

ATTRIBUTES: Note functions that aren't thread-safe

exec.3

Michael Kerrisk

SYNOPSIS: Clarify calling signature for execl() and execlp()

Michael Kerrisk [Andreas Baak]

Correct prototype for execlp()

Make the prototype shown into correct C.

ftw.3

Michael Kerrisk [Felix Sedlmeier]

ftw() and nftw() differ for the non-stat-able symlink case

The POSIX specification of ftw() says that an un-stat-able symlink may yield either FTW_NS or FTW_SL. The specification of nftw() does not carry this statement.

Michael Kerrisk

CONFORMING TO: add POSIX.1-2008

Michael Kerrisk

Update POSIX version references in NOTES

getcwd.3

Jann Horn [Michael Kerrisk]

Note behavior for unreachable current working directory

Michael Kerrisk

Add ENOMEM error

gethostbyname.3

Michael Kerrisk [Jonny Grant]

Clarify that NO_ADDRESS and NO_DATA are synonyms

Michael Kerrisk

Add some detail for NO_DATA

Text consistent with POSIX and FreeBSD's gethostbyname() man page.

Zeng Linggang

ATTRIBUTES: Note functions that aren't thread-safe

getnetent.3

lseek64.3

Michael Kerrisk

Clarify details with respect to 32-bit and 64-bit systems

malloc.3

Michael Kerrisk

Add ENOMEM error

mbsnrtowcs.3

Zeng Linggang

ATTRIBUTES: Note function that isn't thread-safe

mbsrtowcs.3

Zeng Linggang

ATTRIBUTES: Note function that isn't thread-safe

mq_notify.3

Michael Kerrisk

Add "C library/kernel ABI differences" subsection

mq_open.3

Michael Kerrisk [Fabien Pichot]

NOTES: explain differences from the underlying system call

The check for the slash at the start of a pathname is done in glibc

openpty.3

Zeng Linggang

ATTRIBUTES: Note functions that aren't thread-safe

perror.3

Zeng Linggang

ATTRIBUTES: Note function that is thread-safe

posix_memalign.3

Zeng Linggang

ATTRIBUTES: Note functions that aren't thread-safe

printf.3

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

Walter Harms [Michael Kerrisk]

Simplify the example code

qsort.3

Michael Kerrisk [Rob Landley]

alphasort() and versionsort() are not suitable for 'compar'

In glibc 2.10, the prototypes of `alphasort()` and `versionsort()` were changed so that the arguments switched from `'const void *'` to `'const struct dirent **'`, to match the POSIX.1-2008 specification of `alphasort()`. As such, compiler warnings will result if these functions are used as the arguments of `qsort()`.

```
warning: passing argument 4 of 'qsort' from incompatible
pointer type
expected '__compar_fn_t' but argument is of type
'int (*)(const struct dirent **, const struct dirent **)'
```

Therefore, remove the ancient NOTES text suggesting that `alphasort()` and `versionsort()` can be used as suitable `'compar'` arguments for `qsort()`.

realpath.3

Michael Kerrisk [Jon Grant]
Add ENOMEM error

scandir.3

Michael Kerrisk
glibc 2.10 changed the argument types for `alphasort()` and `versionsort()`
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe

scanf.3

New and rewritten pages

get_phys_pages.3

William Woodruff

Document get_phys_pages() and get_avphys_pages()

loop.4

Urs Thuermann, Michael Kerrisk

New page documenting the loop device

xattr.7

Andreas Gruenbacher

Import attr(5) man page from the 'attr' project

After discussions with Andreas Gruenbacher, it makes sense to move this page into man-pages, since it mostly relates to kernel details. Since this is an overview page, we'll move it to Section 7.

Michael Kerrisk

Rename page

"xattr" is a more meaningful name than "attr" (it resonates with the names of the system calls), so as long as we are moving the page to a new section, we'll change the name as well,

and retain an `acl(5)` link so that old references remain valid.

Newly documented interfaces in existing pages

`mmap.2`

Michael Kerrisk [Andi Kleen]

Document `MAP_HUGE_2MB`, `MAP_HUGE_1GB`, and `MAP_HUGE_SHIFT`

removexattr.2

setxattr.2

capabilities.7

Michael Kerrisk

Adjust "attr(5)" references to "xattr(7)"

ioctl.2

Michael Kerrisk

SEE ALSO: add console_ioctl(2) and tty_ioctl(2)

listxattr.2

xattr.7

Michael Kerrisk

Describe listxattr(2) E2BIG error and document it as a BUG

mkdir.2

Michael Kerrisk

Wording fixes + point reader at stat(2) for explanation of file mode

Michael Kerrisk [Andreas Grünbacher]

Further tweaks to text on S_ISVTX and 'mode' argument

mknod.2

Michael Kerrisk

Rewordings + point reader at stat(2) for details of mode bits

mmap.2

Michael Kerrisk

Remove text that implies that `munmap()` syncs `MAP_SHARED` mapping to file

The existing text in this page:

`MAP_SHARED` Share this mapping. Updates to the mapping are visible to other processes that map this file, and are carried through to the underlying file. The file may not actually be updated until `msync(2)` or `munmap()` is called.

implies that `munmap()` will sync the mapping to the underlying file. POSIX doesn't require this, and some light reading of the code and some light testing (`fsync()` after `munmap()` of a large file) also indicates that Linux doesn't do this.

`msync.2`

Michael Kerrisk

Rework text of DESCRIPTION

Rewrite the text somewhat, for easier comprehension.

No (intentional) changes to factual content

`nfsservctl.2`

Michael Kerrisk [J. Bruce Fields]

Note that `nfsservctl()` was replaced by files in `nfsd` filesystem

`open.2`

Michael Kerrisk [Andreas Gruenbacher]

`open()` honors the `S_ISVTX`, `S_ISUID`, and `S_ISGID` bits in 'mode'

Michael Kerrisk

Tighten wording: use 'mode bit' rather than 'permission bit'

Michael Kerrisk [NeilBrown]

BUGS: `O_CREAT` | `O_DIRECTORY` succeeds if pathname does not exist

`poll.2`

Michael Kerrisk [Ian Pilcher]

Clarify that signal mask treatment in `ppoll()` is per-thread

`s/sigprocmask()/pthread_sigmask()/`

Michael Kerrisk [Sam Varshavchik]

After `POLLHUP`, EOF will be seen only after all data has been consumed

Michael Kerrisk

Make it clearer which bits are ignored in 'events'

`prctl.2`

Michael Kerrisk [David Wilcox, Filipe Brandeburger]

Note that "parent" for purposes of `PR_SET_DEATHSIG` is a `*thread*`

See https://bugzilla.kernel.org/show_bug.cgi?id=43300

`sendfile.2`

Michael Kerrisk [Jason Newton]

Note that sendfile does not support O_APPEND for 'out_fd'

See https://bugzilla.kernel.org/show_bug.cgi?id=82841

Michael Kerrisk [Gregor Jasny]

RETURN VALUE: note the possibility of "short sends"

See https://bugzilla.kernel.org/show_bug.cgi?id=97491

Michael Kerrisk [Askar Safin]

Clarify text on 'out_fd' and regular files in Linux 2.4

See https://bugzilla.kernel.org/show_bug.cgi?id=86001

shutdown.2

Michael Kerrisk [Stéphane Aulery]

BUGS: UNIX domain sockets now detect invalid 'how' values

Bug fixed in Linux 3.7.

See https://bugzilla.kernel.org/show_bug.cgi?id=47111

sigaction.2

Michael Kerrisk

Refer the reader to fcntl(2) F_SETSIG for further details on si_fd

stat.2

Jann Horn

Add note about stat() being racy

Andreas Gruenbacher

Improve description of some mode constants

Michael Kerrisk [Andreas Grünbacher]

Remove excessive leading zeros on some constants

Michael Kerrisk

Add text on POSIX terms "file mode bits" and "file permission bits"

Recent changes to various pages employ this distinction.

Michael Kerrisk

Tighten wording: use 'mode bit' rather than 'permission bit'

According to POSIX, the 9 UGO*RWX bits are permissions, and

'mode' is used to refer to collectively to those bits plus sticky,

set-UID, and set_GID bits.

syslog.2

Michael Kerrisk

SEE ALSO: add dmesg(1)

umask.2

open.2

mknod.2

mkdir.2

Andreas Gruenbacher

Explain what default ACLs do

Explain the effect that default ACLs have (instead of the umask)

in umask.2. Mention that default ACLs can have an affect in

open.2, mknod.2, and mkdir.2.

unshare.2

Michael Kerrisk [Florian Weimer]

Give the reader a hint that unshare() works on processes or threads

cmmsg.3

Michael Kerrisk [Christopher Head]

Fix error in SCM_RIGHTS code sample

Remove erroneous second initialization of msg.msg_controllen in the example code for SCM_RIGHTS.

See https://bugzilla.kernel.org/show_bug.cgi?id=15952

CPU_SET.3

Chris Metcalf

Clarify language about "available" cpus

The CPU_SET.3 man page uses the adjective "available" when explaining what the argument to CPU_SET() means. This is confusing, since "available" isn't well-defined. The kernel has a set of adjectives (possible, present, online, and active) that qualify cpus, but normally none of these are what the cpu_set_t bit index means: it's just "which cpu", using the kernel's internal numbering system, even if that cpu isn't possible or present.

This change removes the word "available" and adds a sentence warning that cpu sets may not be contiguous due to dynamic cpu hotplug, etc.

Add various details on version 2 format

aio.7

Michael Kerrisk

Add details and update URL for OLS 2003 paper on AIO

bootparam.7

Michael Kerrisk [Alain Kalker]

Update discussion of 'debug' option

See https://bugzilla.kernel.org/show_bug.cgi?id=97161

Michael Kerrisk

Summary of multiple changes: remove cruft from this page.

Much of the detail on hardware specifics in this page dates from the 20th century. (The last major update to this page was in man-pages-1.14!) It's hugely out of date now (many of these devices disappeared from the kernel years ago.) So, I've taken a large scythe to the page to remove anything that looks seriously dated. In the process, the page has shrunk to less than 50% of its previous size.

Michael Kerrisk

Remove "buff=" details

This seems to have gone away in Linux 2.2.

Michael Kerrisk

Remove crufty "Mouse drivers" options

Michael Kerrisk

Remove crufty "General non-device-specific boot arguments" options

Michael Kerrisk

Remove crufty "Hard disks" options

Michael Kerrisk

Remove crufty "mem=" details

Michael Kerrisk

Remove crufty details on IBM MCA bus devices

Michael Kerrisk

Remove 'swap=" details

This seems to have gone away in Linux 2.2,

Michael Kerrisk

Remove crufty floppy disk driver options

In the specific case of floppy drives: the drivers still exist, but it's been a while since most of saw these devices in the wild. So, just refer the reader to the kernel source file for details. (The detail in this man page was after all originally drawn from that file.)

Remove crufty "ISDN drivers" options

Michael Kerrisk

Remove crufty "line printer driver" options

Michael Kerrisk

Remove crufty "Serial port drivers" options

Michael Kerrisk

Remove crufty reference to CONFIG_BUGi386

That option disappeared in Linux 2.4.

Michael Kerrisk

Remove crufty text

"bootsetups array" dates from Linux 2.0.

Michael Kerrisk

Remove crufty "Video hardware" options

Michael Kerrisk

Remove crufty SCSI device driver options

fanotify.7

Michael Kerrisk [Heinrich Schuchardt]

Since Linux 3.19, `fallocate(2)` generates `FAN_MODIFY` events

inotify.7

Michael Kerrisk [Heinrich Schuchardt]

Since Linux 3.19, `fallocate(2)` generates `IN_MODIFY` events

ip.7

Michael Kerrisk

Explain how `IP_ADD_MEMBERSHIP` determines its argument type

Michael Kerrisk [Jiri Pirko, Magnus REFTEL]

Clarify details of the `IP_MULTICAST_IF` socket option

Michael Kerrisk [Advait Dixi]

Remove dubious text that says that `SO_PRIORITY` sets IP TOS

See https://bugzilla.kernel.org/show_bug.cgi?id=35852

Michael Kerrisk

Relocate misplaced text describing `ENOPROTOOPT` error

packet.7

Graham Shaw

Add `sll_protocol` to list of required fields for outbound packets

pthread.7

Michael Kerrisk [KOSAKI Motohiro]

Using thread IDs whose lifetime has expired gives undefined behavior

See https://bugzilla.kernel.org/show_bug.cgi?id=53061

raw.7

Michael Kerrisk [Tetsuo Handa]

For incoming datagrams, `sin_port` is set to zero

Michael Kerrisk

Mention `sendto()`, `recvfrom()`, and so on when discussing address format

This gives the reader a little context for the following discussion of `'sin_port'`.

Michael Kerrisk

Remove crufty reference to `<netinet/in.h>`

Michael Kerrisk

Replace reference to RFC 1700 with pointer to IANA protocol number list

signal.7

Michael Kerrisk [Steinar H. Gunderson]

Clarify that I/O operations on disks are not interrupted by signals

See https://bugzilla.kernel.org/show_bug.cgi?id=97721

unix.7

Michael Kerrisk [Christophe Lohr]

Remove mention of `UNIX_PATH_MAX`

This kernel constant is not exposed to user space.

Michael Kerrisk

Note the 108 bytes for sun_path is how things are done on Linux
And refer the reader to NOTES for discussion of portability.

xattr.7

Michael Kerrisk

Document EA limits for Btrfs

Michael Kerrisk

Document VFS-imposed limits on EAs

VFS imposes a 255-byte limit on EA names, and a 64kB limit on EA values.

Michael Kerrisk

The ext[234] block limitation applies to sum of all EAs

It is not a per-EA limit.

Michael Kerrisk

Clarify permissions required to work with 'user' EAs

Michael Kerrisk

ext2 and ext3 no longer need mounting with 'user_xattr' for user EAs

Michael Kerrisk

Add various relevant pages to SEE ALSO

Michael Kerrisk

Add CONFORMING TO section

Michael Kerrisk

Modify headings to man-pages norms

Michael Kerrisk

Btrfs also supports extended attributes

Michael Kerrisk

File capabilities are implemented using *security* attributes

Not *system* attributes

Michael Kerrisk

Describe limit on EA values for JFS, XFS, and Reiserfs

Michael Kerrisk

Explicitly mention some of the xattr system calls in DESCRIPTION

Naming the system calls helps to orient the reader

nscd.8

Michael Kerrisk

Add mention of 'services' and 'netgroup' databases

This makes the page consistent with nscd.conf(5).

==== Changes in man-pages-4.01 =====

Released: 2015-07-23, Munich

Apologies if I missed anyone!

New and rewritten pages

bpf.2

Alexei Starovoitov, Michael Kerrisk [Daniel Borkmann]

New page documenting bpf(2)

__ppc_get_timebase.3

Tulio Magno Quites Machado Filho

New page documenting __ppc_get_timebase() and __ppc_get_timebase_freq()

Glibc 2.16 was released with a new function for the Power architecture that can read its Time Base Register.

Glibc 2.17 adds a function to read the frequency at which the Time Base Register of Power processors is updated.

queue.3

Michael Kerrisk [David Leppik, Doug Klima]

Reimport from latest FreeBSD page

Long ago, Doug Klima noted that many macros were not documented in the queue(3) page. Fix by reimporting from latest [1] FreeBSD man page.

[1] Revision 263142, Modified Fri Mar 14 03:07:51 2014 UTC

This also fixes https://sourceware.org/bugzilla/show_bug.cgi?id=1506

This time, I'll learn from past mistakes and not convert from 'mdoc' to 'man' macros.

Michael Kerrisk

Use subsections in DESCRIPTION

Global changes

Various pages

Michael Kerrisk [Andries E. Brouwer]

Remove "ABI" from "C library/kernel ABI differences" subheadings

The "ABI" doesn't really convey anything significant in the title. These subsections are about describing differences between the kernel and (g)libc interfaces.

Changes to individual pages

intro.1

Michael Kerrisk [Andries E. Brouwer]

Drop intro paragraph on '\$?' shell variable

As Andries notes, this piece of text is rather out of place in a page that was intended to provide a tutorial introduction for beginners logging in on a Linux system.

locale.1

Marko Myllynen

A minor output format clarification

A minor clarification for the locale output format which was brought up at https://sourceware.org/bugzilla/show_bug.cgi?id=18516.

For reference, see

https://sourceware.org/bugzilla/show_bug.cgi?id=18516

<http://pubs.opengroup.org/onlinepubs/9699919799/utilities/locale.html>

Add CONFORMING TO section

capget.2

Julian Orth

Clarify that `hdrp->pid==0` is equivalent `gettid()` not `getpid()`

chroot.2

Jann Horn

`chroot()` is not intended for security; document attack

It is unfortunate that this discourages this use of `chroot(2)` without pointing out alternative solutions - for example, OpenSSH and `vsftpd` both still rely on `chroot(2)` for security.

Bind mounts should theoretically be usable as a replacement, but currently, they have a similar problem (CVE-2015-2925) that hasn't been fixed in ~6 months, so I'd rather not add it to the manpage as a solution before a fix lands.

clock_getres.2

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

eventfd.2

Zeng Linggang

ATTRIBUTES: Note function that is thread-safe

execve.2

Michael Kerrisk

Elaborate on `envp/argv` as NULL behavior

_exit.2

Michael Kerrisk

Open `stdio` frames are not flushed, temporary files are deleted

Many years ago, text was added to the page saying that it is implementation-dependent whether `stdio` streams are flushed and whether temporary are removed. In part, this change appears to be because POSIX.1-2001 added text related to this point.

However, that seems to have been an error in POSIX, and the text was subsequently removed for POSIX.1-2008. See

<https://collaboration.opengroup.org/austin/interps/documents/9984/AI-085.txt>

Austin Group Interpretation reference 1003.1-2001 #085

fallocate.2

Namjae Jeon [Michael Kerrisk]

Document `FALLOC_FL_INSERT_RANGE`

Michael Kerrisk

Since Linux 4.2, `ext4` supports `FALLOC_FL_INSERT_RANGE`

fcntl.2

Michael Kerrisk

OFD locks are proposed for inclusion in the next POSIX revision

getrlimit.2

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

getrusage.2

Zeng Linggang

ATTRIBUTES: Note function that is thread-safe

gettid.2

Michael Kerrisk

Note that for a thread group leader, `gettid() == getpid()`

iopl.2

Michael Kerrisk

Remove some historical `libc5` and `glibc 1` details

These details are ancient, and long ago ceased to be relevant.

ioprio_set.2

Michael Kerrisk [Jens Axboe]

Document meaning of `ioprio==0`

mlock.2

Michael Kerrisk [Mehdi Aqadjani Memar]

Document another `ENOMEM` error case

`ENOMEM` can occur if locking/unlocking in the middle of a region would increase the number of VMAs beyond the system limit (64k).

mmap.2

Michal Hocko [Eric B Munson]

Clarify `MAP_POPULATE`

David Rientjes has noticed that `MAP_POPULATE` wording might promise much more than the kernel actually provides and intends to provide.

The primary usage of the flag is to pre-fault the range. There is no guarantee that no major faults will happen later on. The pages might have been reclaimed by the time the process tries to access them.

Michal Hocko [Eric B Munson]

Clarify `MAP_LOCKED` semantics

`MAP_LOCKED` had a subtly different semantic from `mmap(2)+mlock(2)` since it has been introduced.

`mlock(2)` fails if the memory range cannot get populated to guarantee that no future major faults will happen on the range.

`mmap(MAP_LOCKED)` on the other hand silently succeeds even if the range was populated only partially.

Fixing this subtle difference in the kernel is rather awkward

because the memory population happens after mm locks have been dropped and so the cleanup before returning failure (munlock) could operate on something else than the originally mapped area.

E.g. speculative userspace page fault handler catching SEGV and doing `mmap(fault_addr, MAP_FIXED|MAP_LOCKED)` might discard portion of a racing mmap and lead to lost data. Although it is not clear whether such a usage would be valid, mmap page doesn't explicitly describe requirements for threaded applications so we cannot exclude this possibility.

This patch makes the semantic of `MAP_LOCKED` explicit and suggests using `mmap + mlock` as the only way to guarantee no later major page faults.

Michael Kerrisk

ERRORS: point out that `ENOMEM` can occur even for `munmap()`

`mprotect.2`

Michael Kerrisk

Note `ENOMEM` error that can occur when we reach limit on maximum VMAs

`open.2`

`read.2`

`write.2`

Michael Kerrisk [Mike Hayward]

Clarify that `O_NONBLOCK` is a no-op for regular files and block devices

`perf_event_open.2`

Vince Weaver [Joerg Roedel]

`Exclude_host/exclude_guest` clarification

This patch relates to the `exclude_host` and `exclude_guest` bits added by the following commit:

```
exclude_host, exclude_guest; Linux 3.2
commit a240f76165e6255384d4bdb8139895fac7988799
Author: Joerg Roedel <joerg.roedel@amd.com>
Date: Wed Oct 5 14:01:16 2011 +0200
```

perf, core: Introduce attrs to count in either host or guest mode

The updated manpage text clarifies that the "exclude_host" and "exclude_guest" `perf_event_open()` attr bits only apply in the context of a KVM environment and are currently x86 only.

Vince Weaver

Document `PERF_SAMPLE_REGS_INTR`

This patch relates to the addition of `PERF_SAMPLE_REGS_INTR` support added in the following commit:

perf_sample_regs_intr; Linux 3.19
commit 60e2364e60e86e81bc6377f49779779e6120977f
Author: Stephane Eranian <eranian@google.com>

perf: Add ability to sample machine state on interrupt

The primary difference between PERF_SAMPLE_REGS_INTR and the existing PERF_SAMPLE_REGS_USER is that the new support will return kernel register values. Also if precise_ip is set higher than 0 then the PEBS register state will be returned rather than the saved interrupt state.

This patch incorporates feedback from Stephane Eranian and Andi Kleen.

prctl.2

seccomp.2

Michael Kerrisk

Clarify that SECCOMP_SET_MODE_STRICT disallows exit_group(2)

These days, glibc implements _exit() as a wrapper around exit_group(2). (When seccomp was originally introduced, this was not the case.) Give the reader a clue that, despite what glibc is doing, what SECCOMP_SET_MODE_STRICT permits is the true _exit(2) system call, and not exit_group(2).

pread.2

read.2

readv.2

sendfile.2

write.2

Michael Kerrisk

Clarify that Linux limits transfers to a maximum of 0x7ffff000 bytes

See <https://bugs.debian.org/629994> and
<https://bugs.debian.org/630029>.

pread.2

Michael Kerrisk

Rewrite RETURN VALUE section

(Also drop the text on pwrite() returning zero; that seems bogus.)

ptrace.2

Michael Kerrisk [Vegard Nossum]

PTRACE_O_TRACEEXIT clarification

readv.2

Michael Kerrisk

Remove BUGS heading

The text on mixing I/O syscalls and stdio is a general point

of behavior. It's not a bug as such.

recv.2

send.2

Michael Kerrisk

Explain some subtleties of MSG_DONTWAIT versus O_NONBLOCK

rename.2

Michael Kerrisk

Michael Kerrisk

Note that RENAME_NOREPLACE can't be employed with RENAME_EXCHANGE

sched_setaffinity.2

Michael Kerrisk

Add an example program

Michael Kerrisk [Florian Weimer]

Explain how to deal with 1024-CPU limitation of glibc's cpu_set_t type

Michael Kerrisk

Mention the use of the 'isolcpus' kernel boot option

sched_setattr.2

Julian Orth

Remove a const attribute

The attr argument of sched_setattr was documented as const but the kernel will modify the size field of this struct if it contains an invalid value. See the documentation of the size field for details.

seccomp.2

Michael Kerrisk

SEE ALSO: add bpf(2)

send.2

Michael Kerrisk

Expand on subtleties of MSG_NOSIGNAL versus ignoring SIGPIPE

sigaltstack.2

Zeng Linggang

ATTRIBUTES: Note function that is thread-safe

socket.2

Stephan Mueller

Update documentation reference for AF_ALG

truncate.2

Michael Kerrisk

ERRORS: ftruncate() can fail if the file descriptor is not writable

utimensat.2

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

After research, We think utimensat() and futimens() are thread-safe.

But, there are not markings of utimensat() and futimens() in glibc document.

clearenv.3

Zeng Linggang

ATTRIBUTES: Note function that is not thread-safe

Zeng Linggang

ATTRIBUTES: Note functions that are/aren't thread-safe

gethostbyname.3

Michael Kerrisk [Laszlo Ersek]

Remove mention of IPv6 addresses, which are not supported

As reported by Laszlo Ersek:

gethostbyname(3) fails to resolve the IPv6 address "::1",
but the manual page says: "If name is an IPv4 or IPv6 address,
no lookup is performed and gethostbyname() simply copies name
into the h_name field [...]".

Debian bug report:

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=455762>

glibc bug report:

http://sourceware.org/bugzilla/show_bug.cgi?id=5479

SUSv3 link for gethostbyname(3):

<http://www.opengroup.org/onlinepubs/000095399/functions/gethostbyname.html>

It seems that the glibc behavior is conformant, and the manual
page is in error.

ATTRIBUTES: Note functions that are thread-safe

strfmon.3

Marko Myllynen

Document strfmon_l(3)

Describe strfmon_l(3).

<http://pubs.opengroup.org/onlinepubs/9699919799/functions/strfmon.html>

Marko Myllynen

Fix CONFORMING TO

AFAICS strfmon(3) is now defined in POSIX and the glibc implementation is as specified there.

<http://pubs.opengroup.org/onlinepubs/9699919799/functions/strfmon.html>

Marko Myllynen

Rewrite the example

I think the example is more accurate when we use the exact locale names and also the Euro sign where appropriate.

xcrypt.3

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

xdr.3

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

console_codes.4

Scot Doyle [Pavel Machek, Michael Kerrisk]

Add CSI sequence for cursor blink interval

Add a Console Private CSI sequence to specify the current console's cursor blink interval. The interval is specified as a number of milliseconds until the next cursor display state toggle, from 50 to 65535.

null.4

Michael Kerrisk

Note that reads from /dev/zero are interruptible since Linux 2.6.31

core.5

Michael Kerrisk

Mention 'coredump_filter' boot option

host.conf.5

Michael Kerrisk

Wording fix: s/resolv+/the resolver library/

The term "resolv+" seems to be historical cruft.

hosts.equiv.5

Carlos O'Donell

Fix format, clarify IdM needs, and provide examples.

In some recent work with a Red Hat customer I had the opportunity to discuss the fine nuances of the ruserok() function and related API which are used to implement rlogin and rsh.

It came to my attention after working with QE on some automated internal testing that there were no good examples in the hosts.equiv manual page showing how the format was supposed to work for this file and for ~/.rhosts, worse the "format" line showed that there should be spaces between arguments when that would clearly lead to incorrect behaviour. In addition some things that the format allows you to write are just wrong like "-host -user" which makes no sense since the host is already rejected, and should be written as "host -user" instead. I added notes in the example to make it

clear that "-host -user" is invalid.

I fixed three things:

(a) The format line.

- Either +, or [-]hostname, or +@netgrp or -@netgrp.
- Either +, or [-]username, or +@netgrp or -@netgrp.
- You must specify something in the hostname portion so remove optional brackets.

(b) Clarify language around credentials

- If the host is not trusted you must provide credentials to the login system and that could be anything really and it depends on your configuration e.g. PAM or whatever IdM you have.

(c) Provide real-world examples

- Provide several real world examples and some corner case examples for how you would write something. Hopefully others can add examples as they see fit.

Michael Kerrisk [Carlos O'Donnell, Arjun Shankar]

Improve explanation in EXAMPLE

locale.5

Marko Myllynen

Document map to_inpunct, map to_outpunct

See e.g. fa_IR for reference.

Marko Myllynen

Document class in LC_CTYPE

See e.g. the locale zh_CN and

<http://en.cppreference.com/w/cpp/string/wide/towctrans>

<http://en.cppreference.com/w/cpp/string/wide/wctrans>

Marko Myllynen

Add iconv(1) reference

Marko Myllynen

Document character transliteration

See e.g. da_DK for reference.

(Not sure should we actually provide an example here?)

Marko Myllynen

Document era keywords

This patch completes the LC_TIME section - since these era keywords are so tightly coupled, I'm providing them as a single patch.

Based on

http://pubs.opengroup.org/onlinepubs/009695399/basedefs/xbd_chap07.html

<http://www.open-std.org/jtc1/SC22/WG20/docs/n972-14652ft.pdf>

Marko Myllynen

Document default_missing

Marko Myllynen

Document outdigit and alt_digits

See e.g. fa_IR for reference.

Marko Myllynen

Refer to locale(7) more prominently

It's probably a good idea to refer to locale(7) so that a reader can check what a category is about before describing them in detail.

Marko Myllynen

Document charclass and charconv

See e.g. the locales ja_JP and ko_KR and

<http://en.cppreference.com/w/cpp/string/wide/towctrans>

<http://en.cppreference.com/w/cpp/string/wide/wctrans>

Marko Myllynen

Copy is not exclusive in LC_CTYPE and LC_COLLATE

See e.g. da_DK for reference.

Marko Myllynen

Remove the FIXME for timezone

The timezone of LC_TIME is not in POSIX, only 6 (out of ~300) glibc locales define it, the glibc code comment below from [glibc.git/programs/ld-time.c](https://github.com/glibc/glibc/blob/master/programs/ld-time.c) seems to suggest it's not a good idea, and there's been a proposal in upstream [1] to remove the existing timezone definitions from glibc locales so I think it's actually better to leave this one undocumented:

```
/* XXX We don't perform any tests on the timezone value since this is  
   simply useless, stupid $&$!@... */
```

1) <https://sourceware.org/ml/libc-alpha/2015-06/msg00098.html>

Move the remaining LC_COLLATE FIXMEs together while at it.

Marko Myllynen

Fix country_isbn format

Both plain numbers and Unicode code points are used in glibc locales but checking the code reveals that country_isbn is handled like the rest of its category expect for country_num which was clarified earlier.

Marko Myllynen

Sort according to the standard

Sort the options so that those defined in POSIX are listed first, then followed by those defined in ISO/IEC TR 14652 in the order of common convention in many widely used glibc locales.

Actual descriptions are unchanged.

http://pubs.opengroup.org/onlinepubs/9699919799/basedefs/V1_chap07.html

Marko Myllynen

Refer to `strftime(3)` where appropriate

The relationship between the locale time format syntax and `strftime()` cannot be considered as obvious.

Marko Myllynen

Document map "totitle"

See e.g. `locales/i18n` for reference.

Michael Kerrisk [Marko Myllynen]

Remove BUGS section saying man page is not complete

To some degree, this is true of many pages. And anyway, this page is much better after recent work by Marko.

proc.5

Michael Kerrisk

List `/proc/vmstat` fields

Michael Kerrisk

Tweak `/proc/vmstat` text

Michael Kerrisk

Add `/proc/crypto` entry with a pointer to further information

Michael Kerrisk [Kees Cook]

Document `/proc/sys/kernel/sysctl_writes_strict`

Based on text in `Documentation/sysctl/kernel.txt`.

Michael Kerrisk

Move misordered `/proc/[pid]/timers` entry

Michael Kerrisk

Refer to `bpf(2)` for explanation of `/proc/sys/net/core/bpf_jit_enable`

repertoiremap.5

Marko Myllynen

Symbolic names AKA mnemonics

A long time ago in `glibc`, repertoire maps were used (but they were removed already in 2000), those mapping files were named as mnemonics, so "mnemonic" is a term that would almost certainly come up if somebody studies `glibc` side (perhaps even the related standards like ISO 9945 [which I don't have access to]) so I thought it's worth to mention to term in the man page to make sure we're talking about the same thing, otherwise someone might wonder is that something different or not.

IOW, symbolic names and mnemonics are often used interchangeably, let's mention the other often used term in the page, too.

capabilities.7

Michael Kerrisk

`CAP_SYS_ADMIN` allows calling `bpf(2)`

locale.7

Marko Myllynen

LC_CTYPE determines transliteration rules on glibc systems

packet.7

[Cortland Setlow]

Fix description of binding a packet socket to an interface

pty.7

NeilBrown [Peter Hurley]

Clarify asynchronous nature of PTY I/O

A PTY is not like a pipe - there may be delayed between data being written at one end and it being available at the other.

This became particularly apparent after

commit f95499c3030f

("n_tty: Don't wait for buffer work in read() loop")

in Linux 3.12

See also the mail thread at <https://lkml.org/lkml/2015/5/1/35>

Date Mon, 04 May 2015 12:32:04 -0400

From Peter Hurley <>

Subject Re: [PATCH bisected regression] input_available_p()
sometimes says 'no' when it should say 'yes'

rtld-audit.7

Ben Woodard

Use correct printf() specifier for pointer types

In the example code you used %x rather than %p in the example code for an audit library. The problem is that it truncates the pointers on 64b platforms. So you get something like:

```
la_symbind64(): symname = strchr sym->st_value = 0x7f4b8a3f8960  
ndx = 222 flags = 0x0 refcook = 8b53e5c8 defcook = 8b537e30
```

rather than:

```
la_symbind64(): symname = fclose sym->st_value = 0x7fa452dd49b0  
ndx = 1135 flags = 0x0 refcook = 0x7fa453f395c8 defcook = 0x7fa453f32e30
```

This has bitten me a handful of times when playing around with audit test libraries to investigate its behavior.

sched.7

Michael Kerrisk

Remove ancient, wildly optimistic prediction about future of RT patches

It seems the patches were not merged by 2.6.30...

socket.7

Michael Kerrisk

SEE ALSO: add bpf(2)

vdso.7

Nathan Lynch [Mike Frysinger]

Update for ARM

The 32-bit ARM architecture in Linux has gained a vDSO as of the 4.1 release. (I was the primary author.)

Document the symbols exported by the ARM VDSO.

Accepted kernel submission:

<http://lists.infradead.org/pipermail/linux-arm-kernel/2015-March/332573.html>

==== Changes in man-pages-4.02 =====

Released: 2015-08-08, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Carlos O'Donell <carlos@redhat.com>
Daniel Borkmann <daniel@iogearbox.net>
David Rientjes <rientjes@google.com>
Dilyan Palauzov <dilyan.palauzov@aegee.org>

Yaarit <yaarit@gmail.com>
Zeng Linggang <zenglj.jy@cn.fujitsu.com>

Apologies if I missed anyone!

New and rewritten pages

dladdr.3

Michael Kerrisk

New page documenting dladdr() and dladdr1()

Relocate/rewrite dladdr() text formerly contained in dlopen(3).

Add documentation of dladdr1().

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

dlerror.3

Michael Kerrisk

Migrate dlerror(3) to new separate man page

Michael Kerrisk

Note that the returned message may be in a statically allocated buffer

Michael Kerrisk

Note that the returned string does not include a trailing newline

Zeng Linggang

ATTRIBUTES: Note function that is thread-safe

dlinfo.3

Michael Kerrisk

New page describing dlinfo(3)

Zeng Linggang

ATTRIBUTES: Note function that is thread-safe

dlopen.3

Michael Kerrisk

This page was substantially rewritten and enhanced. Notably:

- * the dladdr(), dlsym, dlvsym(), and dlerror() content were moved to separate new pages;
- * documentation for dlmopen was added;
- * and other changes as noted below.

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

Michael Kerrisk

Move atexit() discussion under "Initialization and Finalization"

Michael Kerrisk

Move discussion of _init() and _fini() to NOTES

Michael Kerrisk

Rework the discussion of initialization and finalization functions

Deemphasize the obsolete _init/_fini and give more prominence to gcc constructors/destructors.

Michael Kerrisk

dlclose() will unload the object when all references have been released

Michael Kerrisk

EXAMPLE: Remove mention of "-rdynamic"

That option isn't needed for compiling and running this program.

Michael Kerrisk

Remove reference to ld.so info page

The command "info ld.so" simply shows the man page...

Michael Kerrisk

Add VERSIONS section

Michael Kerrisk

Reorganize conformance information for 'flags'

dlsym.3

Michael Kerrisk

Move dlsym() and dlvsym() content to new separate page

Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

Newly documented interfaces in existing pages

dlopen.3

Michael Kerrisk, Carlos O'Donnell

Document dlmopen(3)

nl_langinfo.3

Sam Varshavchik, Michael Kerrisk

Add documentation for nl_langinfo_l(3)

__ppc_set_ppr_med.3

Gabriel F. T. Gomes

Document PPC functions providing access to PPR

GNU C Library 2.18 adds functions (__ppc_set_ppr_low(3),
__ppc_set_ppr_med(3), __ppc_set_ppr_med_low(3)) that provide
access to the Program Priority Register (PPR).

__ppc_yield.3

Gabriel F. T. Gomes

Document PPC performance-hint functions

GNU C Library 2.18 adds functions __ppc_yield(3), __ppc_mdoio(3),
and __ppc_mdooom(3) that can be used provide a hint that
performance could be improved if shared resources are released
for use by other processors.

New and changed links

dladdr1.3

Michael Kerrisk

New link to (new) dladdr(3) page

dlmopen.3

Michael Kerrisk

New link to dlopen.3

dlvsym.3

Michael Kerrisk

Adjust link to point to new self-contained dlvsym(3) page

nl_langinfo.1.3

Michael Kerrisk

New link to nl_langinfo.3

__ppc_mdoio.3

Gabriel F. T. Gomes

New link to __ppc_yield.3

__ppc_mdoom.3

Gabriel F. T. Gomes

New link to __ppc_yield.3

__ppc_set_ppr_low.3

Gabriel F. T. Gomes

New link to __ppc_set_ppr_med.3

__ppc_set_ppr_med_low.3

Gabriel F. T. Gomes

New link to __ppc_set_ppr_med.3

Global changes

Very many pages

Michael Kerrisk

Update CONFORMING TO section to reflect POSIX.1-2001 and POSIX.1-2008 details. (By now, I believe all pages should be up to date with respect to appropriately mentioning POSIX.1-2001 and POSIX.1-2008.)

ldd.1

sprof.1

execve.2

dlopen.3

ld.so.8

Michael Kerrisk

Prefer "shared object" over "shared library"

The man pages variously use "shared library" or "shared object".
Try to more consistently use one term ("shared object"), while
also pointing out on a few pages that the terms are synonymous.

Changes to individual pages

accept.2

Michael Kerrisk

Add mention of POSIX.1-2008 regarding EAGAIN vs EWOULDBLOCK

bpf.2

Daniel Borkmann

Various updates/follow-ups to address some fixmes

A couple of follow-ups to the bpf(2) man-page, besides others:

- * Description of map data types
- * Explanation on eBPF tail calls and program arrays
- * Paragraph on tc holding ref of the eBPF program in the kernel
- * Updated ASCII image with tc ingress and egress invocations
- * __sync_fetch_and_add() and example usage mentioned on arrays
- * minor reword on the licensing and other minor fixups

execve.2

Michael Kerrisk

Reword text on POSIX and #!

io_getevents.2

Michael Kerrisk

Note return value on interruption by a signal handler

Michael Kerrisk

Clarify details of return value for timeout-expired case

Michael Kerrisk

Clarify and extend discussion of 'timeout' argument

mmap.2

Michael Kerrisk

Note that 'length' need not be a page-size multiple for munmap()

Michael Kerrisk [David Rientjes, David Rientjes, Mike Kravetz]

Describe mmap()/munmap() argument requirements for huge-page mappings

Michael Kerrisk

Move discussion of timestamps to NOTES

A straight move; no changes to the content.

This content is better placed in NOTES.

seccomp.2

Michael Kerrisk

SEE ALSO: mention libseccomp pages

SEE ALSO: add scmp_sys_resolver(1)

sigaction.2

Michael Kerrisk

Correct the list of flags that were added in POSIX.1-2001

socketpair.2

Michael Kerrisk [Goswin von Brederlow]

Clarify use of SOCK_* flags in 'type' argument

See <http://bugs.debian.org/794217>

atexit.3

Michael Kerrisk

SEE ALSO: add dlopen(3)

clock_getcpuclockid.3

Michael Kerrisk

Improve wording of EPERM error

It's imprecise to say that this is an "optional" error
in POSIX.1.

dl_iterate_phdr.3

Michael Kerrisk

Note that 'size' allows callback() to discover structure extensions

Michael Kerrisk

SEE ALSO: add dladdr(3)

Michael Kerrisk

CONFORMING TO: note that this function appears on some other systems

fseeko.3

Michael Kerrisk

Remove crufty NOTES section

This ancient System V detail is unneeded.

getutent.3

Michael Kerrisk

Mention POSIX.1-2008 for the "utmpx" functions

iconv_close.3

iconv_open.3

Michael Kerrisk

CONFORMING TO: change "UNIX98" to "SUSv2"

malloc.3

Michael Kerrisk

Change "UNIX 98" to "SUSv2"

mktemp.3

Gleb Fotengauer-Malinovskiy

Reference mkdtemp(3) in addition to mkstemp(3)

Mention mkdtemp(3) as another secure alternative to mktemp(3).

See also https://sourceware.org/bugzilla/show_bug.cgi?id=2898.

mq_receive.3

mq_send.3

Michael Kerrisk

Clarify discussion of 'timeout'

In particular, remove the word 'ceiling', which falsely suggests that the call might return prematurely.

nl_langinfo.3

Michael Kerrisk

Explicitly describe the return value on success

Michael Kerrisk

POSIX specifies that the caller may not modify the returned string

Michael Kerrisk

Enhance RETURN VALUE description

Note some further cases where returned string may be invalidated or overwritten.

perror.3

Michael Kerrisk

Reformat CONFORMING to information

Michael Kerrisk

Note that 'sys_errlist' and 'sys_nerr' are not in POSIX.1

posix_openpt.3

Michael Kerrisk

Reword text regarding systems that don't have posix_openpt()

printf.3

Michael Kerrisk

CONFORMING TO: update details for dprintf() and vdprintf()

setlogmask.3

Michael Kerrisk

Remove useless statement in CONFORMING TO

Saying that the description in POSIX.1-2001 is flawed, without saying what the flaw is, is not helpful.

(And no, I don't know what the flaw is.)

shm_open.3

Michael Kerrisk

Add POSIX.1-2008 details regarding group ID of new shared memory object

strfmon.3

Michael Kerrisk

Fix erroneous CONFORMING to
strfmon() is in POSIX.1.

fanotify.7

Heinrich Schuchardt

Clarify effects of file moves
If files or directories are moved to other mounts, the inode is
deleted. Fanotify marks are lost.

mq_overview.7

Michael Kerrisk

Remove unneeded CONFORMING TO section

nptl.7

Michael Kerrisk [Nicholas Miell]

Note that i386 and x86-64 binaries can't share mutexes

sched.7

Nikola Forró

Fix descriptions of sched_get_priority_max() / sched_get_priority_min()

sem_overview.7

Michael Kerrisk

Remove unneeded CONFORMING TO section

shm_overview.7

Michael Kerrisk

Remove unneeded CONFORMING TO section

sigevent.7

Michael Kerrisk

Remove unneeded CONFORMING TO section

symlink.7

Michael Kerrisk

Update with POSIX.1-2008 details for link(2)

ld.so.8

Michael Kerrisk [Jonathan David Amery]

Items in LD_LIBRARY_PATH can also be delimited by semicolons

See <http://bugs.debian.org/794559>.

==== Changes in man-pages-4.03 =====

Released: 2015-12-05, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Alexander Shishkin <alexander.shishkin@linux.intel.com>
Alexei Starovoitov <ast@plumgrid.com>
Andy Lutomirski <luto@kernel.org>
Arto Bendiken <arto@bendiken.net>
Carlos O'Donnell <carlos@redhat.com>
Casper Ti. Vector <caspervector@gmail.com>
Daniel Borkmann <daniel@iogearbox.net>
David Drysdale <drysdale@google.com>
Eric B Munson <emunson@akamai.com>
Florian Weimer <fweimer@redhat.com>
Gabriel F. T. Gomes <gftg@linux.vnet.ibm.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>

Tobias Stoeckmann <tobias@stoeckmann.org>
Tycho Andersen <tycho.andersen@canonical.com>
Ville Skyttä <ville.skytta@iki.fi>
Vince Weaver <vincent.weaver@maine.edu>

Zeng Linggang <zenglg.jy@cn.fujitsu.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages

perf_event_open.2

Vince Weaver

4.1 adds AUX sample support

Vince Weaver

4.1 data_offset and data_size fields

Vince Weaver [Alexander Shishkin]

Document aux_{head,tail,offset,size} support

Vince Weaver

4.0 update rdpmc documentation

Vince Weaver

4.1 adds PERF_RECORD_ITRACE_START

Vince Weaver

Document 4.1 clockid support

Vince Weaver [Steven Rostedt, Masami Hiramatsu]

4.1 PERF_EVENT_IOC_SET_BPF support

Vince Weaver

4.1 adds AUX_FLAG_OVERWRITE support

Vince Weaver

4.1 PERF_SAMPLE_BRANCH_CALL_STACK

Vince Weaver

4.1 adds aux_watermark

Vince Weaver

Add possibility of EBUSY error

prctl.2

Andy Lutomirski [Kees Cook, Serge Hallyn]

Document operations for ambient capabilities

Michael Kerrisk

Rework PR_CAP_AMBIENT text

Note that arg4 and arg5 must be zero for CAP_AMBIENT

RETURN VALUE: Add PR_CAP_AMBIENT + PR_CAP_AMBIENT_IS_SET case

ERRORS: document PR_CAP_AMBIENT error cases

__ppc_set_ppr_med.3

Gabriel F. T. Gomes

Document PPC functions providing access to PPR

GNU C Library commit 1747fcda4902a3b46183d93fb16ed9b436b2608b

extends the priorities that can be set to the Program Priority

Register (PPR), with the functions: __ppc_set_ppr_very_low(3)

and __ppc_set_ppr_med_high(3).

capabilities.7

Andy Lutomirski [Kees Cook, Serge Hallyn]

Document ambient capabilities

Michael Kerrisk

Various additions and reworkings for ambient capability text

New and changed links

__ppc_set_ppr_med_high.3

Gabriel F. T. Gomes

New link to __ppc_set_ppr_med.3

__ppc_set_ppr_very_low.3

Gabriel F. T. Gomes

New link to __ppc_set_ppr_med.3

Changes to individual pages

mremap.2

Eric B Munson [Michal Hocko]

Add note about mremap() with locked areas

When mremap() is used to move or expand a mapping that is locked with mlock() or equivalent it will attempt to populate the new area. However, like mmap(MAP_LOCKED), mremap() will not fail if the area cannot be populated. Also like mmap(MAP_LOCKED) this might come as a surprise to users and should be noted.

open.2

Michael Kerrisk [David Drysdale]

Remove accidental mention of O_TTY_INIT

An earlier edit mentioned O_TTY_INIT as a file creation flag.

That's true, according POSIX, but Linux does not implement this flag, so remove mention of it.

pipe.2

Michael Kerrisk

SEE ALSO: add splice(2)

prctl.2

Michael Kerrisk

Reorder options alphabetically

Employ a pseudo-alphabetical order, ordering options after removal of any "PR_", "PR_SET_", or "PR_GET" prefix.

Michael Kerrisk

Fix alphabetical misplacements in ERRORS

ptrace.2

Tycho Andersen

Document PTRACE_O_SUSPEND_SECCOMP flag

Michael Kerrisk

Document /proc/sys/kernel/yama/ptrace_scope

Michael Kerrisk

Note that PTRACE_ATTACH cannot be applied to nondumpable processes

Michael Kerrisk

SEE ALSO: add prctl(2)

reboot.2

Casper Ti. Vector

1-argument reboot() is also provided by alternative libc

seccomp.2

Michael Kerrisk

Describe use of 'instruction_pointer' data field

Michael Kerrisk [Kees Cook]

Note why all filters in a set are executed even after SECCOMP_RET_KILL

signalfd.2

Michael Kerrisk

Describe semantics with respect to SCM_RIGHTS

syscalls.2

Michael Kerrisk

Add mlock(2)

Michael Kerrisk

Add userfaultfd()

daemon.3

Michael Kerrisk [Johannes Stüttgen]

Note that daemon() is buggy with respect to controlling tty acquisition

dirfd.3

Jonathan Wakely

Remove outdated NOTES

As stated in the SYNOPSIS, since glibc 2.10 this function is also declared by the relevant X/Open and POSIX macros.

dlopen.3

Michael Kerrisk

Make it more explicit that LD_BIND_NOW overrides RTLD_LAZY

Michael Kerrisk [Florian Weimer]

Correct the pathname used in EXAMPLE

Quoting Florian:

This does not work because libm.so can be a linker script:

```
handle = dlopen("libm.so", RTLD_LAZY);
```

The proper way to do this is to include `<gnu/lib-names.h>` and use `LIBM_SO`.

See https://bugzilla.kernel.org/show_bug.cgi?id=108821

Michael Kerrisk

Include a shell session showing build/run in EXAMPLE

Michael Kerrisk

Change arguments to `main()` to "void" in EXAMPLE

`fgetgrent.3`

Zeng Linggang

ATTRIBUTES: Note function that is not thread-safe

`fgetpwent.3`

Zeng Linggang

ATTRIBUTES: Note function that is not thread-safe

`getauxval.3`

Michael Kerrisk

Add some details for `AT_SECURE`

`getspnam.3`

Zeng Linggang

ATTRIBUTES: Note functions that are/aren't thread-safe

`mallinfo.3`

Zeng Linggang

ATTRIBUTES: Note function that is not thread-safe

`mallopt.3`

Carlos O'Donell

Document `M_ARENA_TEST` and `M_ARENA_MAX`

`posix_fallocate.3`

Michael Kerrisk

Clarify text relating to MT-safety

Carlos O'Donell

Mention `glibc` emulation caveats

`termios.3`

Olivier TARTROU

Add missing details on behaviour of `PARMRK`

For a serial terminal, with a specific configuration, input bytes

with value 0377 are passed to the program as two bytes, 0377 0377.

tty_ioctl.4

Michael Kerrisk [Peter Hurley]

Note that TIOCTTYGSTRUCT went away in Linux 2.5.67

core.5

Ross Zwisler

Add info about DAX coredump filtering flags

Kernel 4.4 added two new core dump filtering flags,
MMF_DUMP_DAX_PRIVATE and MMF_DUMP_DAX_SHARED.

These flags allow us to explicitly filter DAX mappings.
This is desirable because DAX mappings, like hugetlb
mappings, have the potential to be very large.

nsswitch.conf.5

Nikola Forró

Add list of files being read when "files" service is used

This is not mentioned anywhere. Users can assume that the file
being read is something like /etc/\$DATABASE, but that's not
always the case. It's better to explicitly specify which
file is read for each respective database. The list of
files was acquired from glibc source code.

proc.5

Heinrich Schuchardt [Michael Kerrisk]

Add details for threads-max

Add detail information for threads-max.

The checks for minimum and maximum values exist since kernel 4.1.

<https://lkml.org/lkml/2015/3/15/96>

Heinrich Schuchardt

/proc/sys: Describe whitespace characters

Michael Kerrisk

Document 'CapAmb' in /proc/PID/status

Michael Kerrisk

Add reference to ptrace(2) for /proc/sys/kernel/yama/ptrace_scope

aio.7

Michael Kerrisk [Meikun Wang]

Add missing include file, <fcntl.h>, to example program

mq_overview.7

Michael Kerrisk [Arto Bendiken]

Document QSIZE bug that appeared in 3.5 and was fixed in 4.2

path_resolution.7

Michael Kerrisk

Clarify recursive resolution of symlinks and note limits

pipe.7

Michael Kerrisk

SEE ALSO: add splice(2)

rtld-audit.7

Namhyung Kim

Fix (typo) error in la_pltenter() description

s/la_pltenter()/la_pltexit()/

la_pltenter() is called regardless of the value of framesizep but la_pltexit() is called only if la_pltenter() returns with non-zero framesizep set. I spent long time to figure out why la_pltexit() is not called at all.

signal.7

Michael Kerrisk [Michael Hocko]

Note async-signal-safe functions added by POSIX.1-2008 TC1

tcp.7

Daniel Borkmann [Michael Kerrisk]

Improve paragraphs on tcp_ecn and add tcp_ecn_fallback bullet

Improve description of tcp_ecn, fix the RFC number and it's not a boolean anymore since long time, and add a description for tcp_ecn_fallback.

See also kernel doc under Documentation/networking/ip-sysctl.txt on tcp_ecn and tcp_ecn_fallback.

ld.so.8

Michael Kerrisk

LD_POINTER_GUARD has been removed in glibc 2.23

Michael Kerrisk

Describe secure-execution mode

Michael Kerrisk [Maria Guseva]

Replace mentions of set-UID/set-GID programs with secure-execution mode

Inspired by a patch from Maria Guseva.

Maria Guseva [Silvan Jegen]

LD_DEBUG is effective in secure-execution mode if /etc/suid-debug exists

==== Changes in man-pages-4.04 =====

Released: 2015-12-29, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Apologies if I missed anyone!

New and rewritten pages

futex.2

Michael Kerrisk, Thomas Gleixner, Torvald Riegel [Davidlohr Bueso, Heinrich Schuchardt, Darren Hart, Rusty Russell, Pavel Machek, Rich Felker]

Rewrite and massively expand page

membarrier.2

Mathieu Desnoyers [Michael Kerrisk]

New page documenting membarrier() system call

Newly documented interfaces in existing pages

mlock.2

Eric B Munson [Michal Hocko, Vlastimil Babka, Michael Kerrisk]

Document mlock2(2) and MCL_ONFAULT

New and changed links

mlock2.2

Eric B Munson

New link to mlock.2

Global changes

Various pages

Michael Kerrisk

ERRORS: standardize text for EMFILE error

Various pages

Michael Kerrisk

ERRORS: standardize error text for ENOTSOCK error

Various pages

Michael Kerrisk

ERRORS: standardize text for ENFILE error

Changes to individual pages

clock_getres.2

Michael Kerrisk

SEE ALSO: add vdso(7)

epoll_create.2

Michael Kerrisk

ERRORS: add another EMFILE error case

fanotify_init.2

Michael Kerrisk

ERRORS: add an EMFILE error case

fork.2

Michael Kerrisk

Child of MT-process is restricted to async-signal-safe functions

getcpu.2

Michael Kerrisk

SEE ALSO: add vdso(7)

getrlimit.2

Michael Kerrisk [Lennart Poettering]

The init of measurement for RLIMIT_RSS is bytes, not pages

get_robust_list.2

Michael Kerrisk

Reword EINVAL error text

gettimeofday.2

Carlos O'Donell

Expand on the historical meaning of tz_dsttime

Michael Kerrisk

SEE ALSO: add vdso(7)

inotify_init.2

Michael Kerrisk

ERRORS: add an EMFILE error case

personality.2

Dmitry V. Levin

Note kernel and glibc versions that introduced this system call

poll.2

Richard Voigt

timeout_ts is a pointer, so use -> not . for member access

Michael Kerrisk

Shorten name of timeout argument for ppoll()

The name is overly long, and does not hint at the fact that this argument is a pointer. Fix this by renaming:

s/timeout_ts/tmo_p/

sendfile.2

Laurent Georget

Document more ERRORS

sigreturn.2

Michael Kerrisk

SEE ALSO: add vdso(7)

socketcall.2

Michael Kerrisk

Since Linux 4.3, x86-32 provides direct system calls for the sockets API

time.2

Zack Weinberg

Explain why the glibc time() wrapper never sets 'errno'

Michael Kerrisk [H.J. Lu]

Where time() is provided by vDSO, an invalid address may give SIGSEGV

Michael Kerrisk [Paul Eggert]

Describe EOVERFLOW details

Michael Kerrisk

SEE ALSO: add vdso(7)

Michael Kerrisk

Rename 't' argument to 'tloc'

dlerror.3

Michael Kerrisk [Jonny Grant]

Clarify that the string returned by dlerror() is null terminated

dlopen.3

Michael Kerrisk

Include a shell session showing build/run in EXAMPLE

Michael Kerrisk

Change arguments to main() to "void" in EXAMPLE

drand48.3

Michael Kerrisk [Vincent Lefevre]

Correct descriptions of ranges returned by these functions

See <http://bugs.debian.org/803459>

errno.3

Michael Kerrisk

Note probable cause of ENFILE error

fnmatch.3

Pádraig Brady

Describe the FNM_EXTMATCH flag and pattern syntax

iconv.3

Andries E. Brouwer

NOTES: describe correct usage for flushing partially buffered input

random_r.3

Michael Kerrisk [Archie Cobbs]

Clarify need to use `initstate_r()`

tzset.3

Carlos O'Donell

Clarify "daylight" and remove erroneous note

random.4

Michael Kerrisk [Tom Gundersen]

Rework example scripts to assume 'poolsize' unit is bits, not bytes

Michael Kerrisk [Walter Harms]

Use modern command substitution syntax in shell session log

proc.5

Michael Kerrisk

Reaching `/proc/sys/fs/file-max` limit normally produces an ENFILE error

futex.7

Heinrich Schuchardt

SEE ALSO updates

Michael Kerrisk

Note some other locking primitives that are built with futexes

Heinrich Schuchardt

NPTL, avoid abbreviation

Michael Kerrisk

Note that a futex is 4 bytes on all platforms

vdso.7

Michael Kerrisk

Add note on `strace(1)` and vDSO

ld.so.8

H.J. Lu [Michael Kerrisk]

Document `LD_PREFER_MAP_32BIT_EXEC`

Michael Kerrisk

Clarify setting of `LD_BIND_NOT`

Michael Kerrisk

Clarify setting of `LD_DYNAMIC_WEAK`

Michael Kerrisk

Clarify setting of `LD_TRACE_PRELINKING`

Michael Kerrisk

Clarify some details for `LD_SHOW_AUXV`

Released: 2016-03-15, Christchurch

Zefram <zefram@fysh.org>

Apologies if I missed anyone!

New and rewritten pages

copy_file_range.2

Anna Schumaker [Darrick J. Wong, Christoph Hellwig, Michael Kerrisk]

New page documenting copy_file_range()

copy_file_range() is a new system call for copying ranges of data completely in the kernel. This gives filesystems an opportunity to implement some kind of "copy acceleration", such as reflinks or server-side-copy (in the case of NFS).

personality.2

Michael Kerrisk

This page has been greatly expanded, to add descriptions of personality domains.

fmemopen.3

Michael Kerrisk [Adhemerval Zanella]

Significant reworking of this page:

- * Rework discussion of the (obsolete) binary mode
- * Split open_memstream(3) description into a separate page.
- * Note various fmemopen() bugs that were fixed in glibc 2.22
- * Greatly expand description of 'mode' argument
- * Rework description of 'buf' and 'len' arguments
- * Expand discussion of "current position" for fmemopen() stream

ntp_gettime.3

Michael Kerrisk

New page describing ntp_gettime(3) and ntp_gettimex(3)

open_memstream.3

Michael Kerrisk

New page created by split of fmemopen(3).

At the same time, add and rework a few details in the text.

posix_spawn.3

Bill O. Gallmeister, Michael Kerrisk

New man page documenting posix_spawn(3) and posix_spawnnp(3)

readdir.3

Michael Kerrisk [Florian Weimer]

Split readdir_r() content into separate page

As suggested by Florian Weimer:

It may make sense to move this documentation to a separate manual page, specific to readdir_r. This will keep the readdir() documentation nice and crisp. Most programmers will never have to consult all these details.

Michael Kerrisk

Near complete restructuring of the page and add some further details

Michael Kerrisk [Florian Weimer, Rich Felker, Paul Eggert]

Add a lot more detail on portable use of the 'd_name' field

readdir_r.3

Michael Kerrisk [Florian Weimer]

New page created after split of readdir(3).

Michael Kerrisk [Florian Weimer]

Explain why readdir_r() is deprecated and readdir() is preferred

Michael Kerrisk [Florian Weimer]
Remove misleading code example using pathconf()

lirc.4
Alec Leamas
New page documenting lirc device driver

Newly documented interfaces in existing pages

adjtimex.2
Michael Kerrisk
Document ntp_adjtime(3)

epoll_ctl.2
Michael Kerrisk [Jason Baron]
Document EPOLLEXCLUSIVE

madvise.2
Minchan Kim [Michael Kerrisk]
Document MADV_FREE
Document the MADV_FREE flag added to madvise() in Linux 4.5.

proc.5
Michael Kerrisk
Document CmaTotal and CmaFree fields of /proc/meminfo
Michael Kerrisk
Document additional /proc/meminfo fields
Document DirectMap4k, DirectMap4M, DirectMap2M, DirectMap1G
Michael Kerrisk
Document MemAvailable /proc/meminfo field
Michael Kerrisk
Document inotify /proc/PID/fdinfo entries
Michael Kerrisk
Document fanotify /proc/PID/fdinfo entries
Michael Kerrisk
Add some kernel version numbers for /proc/PID/fdinfo entries
Michael Kerrisk [Patrick Donnelly]
/proc/PID/fdinfo displays the setting of the close-on-exec flag
Note also the pre-3.1 bug in the display of this info.

socket.7
Craig Gallek [Michael Kerrisk, Vincent Bernat]
Document some BPF-related socket options
Document the behavior and the first kernel version for each of the
following socket options:

SO_ATTACH_FILTER
SO_ATTACH_BPF
SO_ATTACH_REUSEPORT_CBPF
SO_ATTACH_REUSEPORT_EBPF
SO_DETACH_FILTER
SO_DETACH_BPF
SO_LOCK_FILTER

New and changed links

isalpha.1.3

Michael Kerrisk

New link to isalpha.3

longjmp.3

Michael Kerrisk

Replace page with link to setjmp(3), which now incorporates longjmp()

ntp_adjtime.3

Michael Kerrisk

New link to adjtimex(2)

ntp_gettimex.3

Michael Kerrisk

New link to ntp_gettime.3

open_wmemstream.3

Michael Kerrisk

Update link to point to new open_memstream(2) page

posix_spawn.3

Michael Kerrisk

New link to new posix_spawn.3 page

siglongjmp.3

Michael Kerrisk

Rewire link to point to setjmp(3)

strerror.1.3

Michael Kerrisk

New link to strerror.3

Fix missing link

Global changes

Various pages

Michael Kerrisk

Update FTM requirements (`_DEFAULT_SOURCE`)

Michael Kerrisk

Update feature test macro requirements

Update to use `_DEFAULT_SOURCE`, and also changes brought by glibc commit 266865c0e7b79d4196e2cc393693463f03c90bd8.

Various pages

Michael Kerrisk

Simplify FTM requirements

Looking at `<features.h>` (or `feature_test_macros(7)`), one can see that when `_XOPEN_SOURCE` is defined with the value 700 (or greater), then `_POSIX_C_SOURCE` is defined with the value 200809L (or greater). Therefore, terms in the man pages such as

```
_XOPEN_SOURCE\ >=\ 700 || _POSIX_C_SOURCE\ >=\ 200809L
```

can be simplified to:

```
_POSIX_C_SOURCE\ >=\ 200809L
```

Various pages

Michael Kerrisk

Simplify FTM requirements

Looking at `<features.h>` (or `feature_test_macros(7)`), one can see that when `_XOPEN_SOURCE` is defined with the value 600 (or greater), then `_POSIX_C_SOURCE` is defined with the value 200112L (or greater). Therefore, terms in the man pages such as

```
_XOPEN_SOURCE\ >=\ 600 || _POSIX_C_SOURCE\ >=\ 200112L
```

can be simplified to:

```
_POSIX_C_SOURCE\ >=\ 200112L
```

Various pages

Michael Kerrisk

Simplify FTM requirements

`_XOPEN_SOURCE` implies `_POSIX_C_SOURCE >=2`, so simplify FTM requirements in various pages.

Various pages

Michael Kerrisk

Remove "or 'cc -std=c99'" from SYNOPSIS

Under the FTM requirements all of these pages document the requirement for `_ISOC99_SOURCE`. And `feature_test_macros(7)` now

documents that "cc -std=c99" produces the same effect as defining `_ISOC99_SOURCE`. So, all of these pages don't additionally need to specify "or 'cc -std=c99'" under the FTM requirements in the SYNOPSIS. Removing that redundant text also simplifies the SYNOPSIS a little.

Various pages

Michael Kerrisk

Simplify FTM requirements

Looking at `<features.h>` (or `feature_test_macros(7)`), one can see that when `_XOPEN_SOURCE` is defined with the value 600 (or greater), then `_POSIX_C_SOURCE` is defined with the value 200112L (or greater). Therefore, terms in the man pages such as

```
_XOPEN_SOURCE\ >=\ 600 || _POSIX_C_SOURCE\ >=\ 200112L
```

can be simplified to:

```
_POSIX_C_SOURCE\ >=\ 200112L
```

Various pages

Michael Kerrisk

Remove references to `_XOPEN_SOURCE_EXTENDED` in SYNOPSIS

`_XOPEN_SOURCE_EXTENDED` is obsolete (it existed in SUSv1, but not subsequent standards). `_XOPEN_SOURCE >= 500` produces the same effects as `(_XOPEN_SOURCE && _XOPEN_SOURCE_EXTENDED)`. Modifying the SYNOPSIS of various pages that contain:

```
_XOPEN_SOURCE\ >=\ 500 ||  
_XOPEN_SOURCE\ &&\ _XOPEN_SOURCE_EXTENDED
```

to just:

```
_XOPEN_SOURCE\ >=\ 500
```

This has the following benefits:

- a) Simplifying the SYNOPSIS by removing ancient historical information.
- b) Preventing users from being misled into using `_XOPEN_SOURCE_EXTENDED` in new source code.

Various pages

Michael Kerrisk

Remove mention of the obsolete `_POSIX_SOURCE` macro from SYNOPSIS

`_POSIX_SOURCE` was a POSIX.1-1990 creation that was soon made obsolete by `_POSIX_C_SOURCE`. Retaining mention of it

in the feature test macro requirements section of the SYNOPSIS doesn't contain important information, and may mislead readers into actually trying to use this macro. A few mentions of it are maintained in a some pages where defining `_POSIX_SOURCE` inhibits some behavior.

Various sockets-related pages

Michael Kerrisk [Carlos O'Donnell]

Use consistent argument/variable names for socket addresses and lengths

As noted by Carlos, there's quite a bit of inconsistency across pages. Use 'addr' and 'addrlen' consistently in variables and function arguments.

Various pages

Michael Kerrisk

Wording fix: "current file offset" ==> "file offset"

"File offset" is the preferred POSIX terminology.

Various pages

Michael Kerrisk

Word "descriptor" more precisely

Use either "file descriptor" or "message queue descriptor".

Various pages

Michael Kerrisk

ERRORS: add reference to `signal(7)` in description of `EINTR`

Changes to individual pages

locale.1

Marko Myllynen

Add "locale -c charmap" as an example

Addresses https://bugzilla.kernel.org/show_bug.cgi?id=104511.

localedef.1

Marko Myllynen

Add hint on purpose of `--no-archive`

Indicate why using `--no-archive` might be a good idea. The issue is that if you create a custom locale with `localedef(1)` and put it to the locale archive then during the next glibc upgrade the locale archive is updated as well and your custom locale is gone.)

accept.2

Michael Kerrisk

ERRORS: improve description for `EBADF`

adjtimex.2

Michael Kerrisk [John Stultz]

Various improvements after feedback from John Stultz

Michael Kerrisk

Remove FTM requirements

It seems that adjtimex() never needed `_BSD_SOURCE` (and my earlier commit 5918743bc8b02b was simply a blunder).

Michael Kerrisk

Split EINTR error cases

Michael Kerrisk

Note treatment of out-of-range `buf.offset`

Michael Kerrisk

Don't refer reader to `adjtime(3)`

Probably, it's not wise to suggest `adjtime(3)` as the more portable API. Rather, `ntp_adjtime(3)` should be used.

Michael Kerrisk [Naresh Kamboju]

Update details of `buf.offset` EINTR error

Michael Kerrisk

SEE ALSO: add `ntp_gettime(3)`

Michael Kerrisk

Improve description of some PPS timex fields

Michael Kerrisk

Add ATTRIBUTES section

William Preston [Petr Gajdos]

Update a detail in `adjtimex` return value description

Michael Kerrisk

Note range constraints and clamping for `ADJ_FREQUENCY`

bdflush.2

Michael Kerrisk

Note that glibc support for this system call went away in version 2.23

bind.2

Michael Kerrisk

Improve description of ENOENT error

bpf.2

Michael Kerrisk

Document close-on-exec semantics

The close-on-exec file descriptor flag is automatically enabled for FDs returned by `bpf()`.

chmod.2

Michael Kerrisk

Clarify terminology (file mode versus file permission bits)

chown.2

Michael Kerrisk

ERRORS: improve EBADF description

clone.2

unshare.2

Michael Kerrisk

Remove mention of `_BSD_SOURCE` and `_SVID_SOURCE`

The right way to expose declarations for these Linux-specific system calls was always `_GNU_SOURCE`. Mentioning the historical use of `_BSD_SOURCE` and `_SVID_SOURCE` just clouds the issue.

connect.2

Michael Kerrisk

ERRORS: improve EBADF description

create_module.2

Michael Kerrisk

Glibc 2.23 removed last vestiges of support for this system call

delete_module.2

Michael Kerrisk

Glibc 2.23 removed last vestiges of support for this system call

epoll_ctl.2

Michael Kerrisk

Document ELOOP error for circular monitoring loops

eventfd.2

Michael Kerrisk

Note that eventfd info is available in `/proc/PID/fdinfo`

execve.2

Michael Kerrisk [Krzysztof Adamski]

Add EPERM error for capabilities check of capability-dumb binaries

Michael Kerrisk

Add reference to `ld-linux.so(8)`

Michael Kerrisk

SEE ALSO: add `system(3)`

fanotify_init.2

Michael Kerrisk

Note kernel version that allowed `O_CLOEXEC` for `event_f_flags`

fcntl.2

flock.2

Michael Kerrisk

SEE ALSO: add `llocks(8)`

fcntl.2

Michael Kerrisk [Jason Vas Dias]

Rework description of F_SETOWN

As suggested by Jason, make it clearer that I/O signalling requires the use of both F_SETOWN and O_ASYNC. While we're at, make a few other cleanups to the text.

Michael Kerrisk

Remove mention of _BSD_SOURCE to get definition of F_SETOWN/F_GETOWN

This usage went away in glibc 2.20, and the simplest remedy is just to omit mention of it.

futex.2

Michael Kerrisk

FUTEX_CLOCK_REALTIME can now be used with FUTEX_WAIT

get_kernel_syms.2

Michael Kerrisk

Note that glibc does not support this system call

init_module.2

Michael Kerrisk

Glibc 2.23 removed last vestiges of support for this system call

ioctl_list.2

Heinrich Schuchardt

Include uapi/linux/wireless.h

Add the list of wireless IOCTLs.

Heinrich Schuchardt

Path to sockios.h

sockios.h is now in include/uapi

Heinrich Schuchardt

Add reference to netdevice.7

netdevice.7 describes most of the IOCTLs of sockios.h

Heinrich Schuchardt

Transfer structure (wireless.h IOCTLs)

The sole parameter to be passed to the wireless.h IOCTLs is of type struct iwreq*.

ioperm.2

Michael Kerrisk [Alex Henrie]

ioperm.2: Permissions are inherited across fork(2)

See https://bugzilla.kernel.org/show_bug.cgi?id=99911

iopl.2

Michael Kerrisk [Alex Henrie]

Permissions are not inherited across fork(2) or preserved on execve(2)

See https://bugzilla.kernel.org/show_bug.cgi?id=99901

lseek.2

Michael Kerrisk

FUSE now supports SEEK_HOLE and SEEK_DATA

Michael Kerrisk

NFS supports SEEK_HOLE and SEEK_DATA

Michael Kerrisk

SEE ALSO: add open(2)

madvise.2

Michael Kerrisk

Clarify MADV_HWPOISON wording to say that it applies to a page range

mknod.2

Michael Kerrisk

SEE ALSO: add mknod(1)

mount.2

Michael Kerrisk

SEE ALSO: add findmnt(8)

open.2

Michael Kerrisk

NOTES: mention existence of proc/PID/fd and /proc/PID/fdinfo

Mark Post [Petr Gajdos]

O_TMPFILE support is now provided by Btrfs

pipe.2

Michael Kerrisk [Eric Blake]

Note treatment of 'pipefd' on error

poll.2

Michael Kerrisk [Josh Triplett]

Document spurious EAGAIN error that can occur on other systems

Light reworking of text proposed by Josh Triplett.

readlink.2

Michael Kerrisk

Clarify EINVAL error description

recv.2

Heinrich Schuchardt

Equivalence to read()

Describe the recv(2)-read(2) and the recvfrom(2)-recv(2)

equivalences for zero-valued arguments.

Michael Kerrisk

MSG_WAITALL has no effect for datagram sockets

recv.2

cmsg.3

Nikola Forró

Fix type of `cmsg_len` member of `cmsghdr` structure

The type shown for `cmsg_len` member of `cmsghdr` structure is `socklen_t`, but the actual type used by `glibc` and the kernel is `size_t`.

The information was obtained from `glibc` source code:

<http://bit.ly/21m1RMp>

Michael Kerrisk

Note that `cmsg_len` is typed as `socklen_t` in POSIX.1

sched_setaffinity.2

Michael Kerrisk [Florian Weimer, Florian Weimer]

Warn that `CPU_ALLOC()` may allocate a slightly CPU set than requested

Michael Kerrisk [Florian Weimer]

Add reference to `CPU_ALLOC(3)`

sched_setattr.2

Michael Kerrisk [Akihiro Suda]

`EPERM` depends on affinity mask of target thread, not calling thread

select.2

Michael Kerrisk [Josh Triplett]

Document spurious `EAGAIN` error that can occur on other systems

Light reworking of text proposed by Josh Triplett.

Nikos Mavrogiannopoulos

Mention the `'fd_set'` size limitation early and refer to `poll(2)`

Change this because of the serious limitation of `select()` imposing a limit on the range of file descriptors that can be monitored. This is currently mentioned too late in the documentation (in the `NOTES` section). The man page should warn early and refer to `poll(2)` as soon as possible.

Michael Kerrisk

Add details on the `glibc` fixed-size `fd_set` limitation

No modern application should use `select()` on Linux.

select_tut.2

Michael Kerrisk

Some readability fixes to example program

Michael Kerrisk

Better variable names in example program

Michael Kerrisk

Simplify `'if'` logic in example program

Michael Kerrisk

Use correct type (`socklen_t`) for `addrlen`

semctl.2

Michael Kerrisk [Davidlohr Bueso, Manfred Spraul, Philip Semanchuk]

NOTES: note when 'sempid' is set on various implementations

See https://bugzilla.kernel.org/show_bug.cgi?id=112271 and

<http://thread.gmane.org/gmane.linux.kernel/2162754/>

Subject: [PATCH] Don't set sempid in semctl syscall.

Date: 2016-02-26 12:21:38 GMT

semop.2

Michael Kerrisk

Tweak comment describing 'sempid'

sendfile.2

Askar Safin

Fix incorrect description in text referring to splice(2)

Michael Kerrisk

SEE ALSO: add copy_file_range(2)

setpgid.2

Michael Kerrisk

Correct/simplify FTM requirements for BSD setpgrp() and getpgrp()

signalfd.2

Michael Kerrisk

Note that signalfd info is available in /proc/PID/fdinfo

sigprocmask.2

Michael Kerrisk [Mike Frylinger]

Explicitly refer the reader to sigsetops(3)

This man page did not make it obvious which functions should be used for manipulating signals sets, nor where those functions were documented.

socketpair.2

Michael Kerrisk [Eric Blake]

Note treatment of 'sv' on error

splice.2

Askar Safin

Improve description of 0 return value.

See https://bugzilla.kernel.org/show_bug.cgi?id=90911

statfs.2

Michael Kerrisk [Jakub Wilk]

Use consistent case for hex constants

sync.2

Christoph Hellwig

Clarify description and document the Linux data integrity guarantees

syscall.2

Mike Frysinger

Add more architectures and improve error documentation

Move the error register documentation into the main table rather than listing them in sentences after the fact.

Add sparc error return details.

Add details for alpha/arc/m68k/microblaze/nios2/powerpc/superh/tile/xtensa.

syscalls.2

Michael Kerrisk

Add copy_file_range(2)

times.2

Kondo, Naoya

Fix an incorrect description in NOTES

The text has an incorrect description in NOTES, it says that $(2^{32}/\text{HZ}) - 300$ is about 429 million. It is correct only if $\text{HZ}=10$ which does not look common today. So just removing "(i.e., about 429 million)" is good enough.

truncate.2

Michael Kerrisk

SEE ALSO: add truncate(1)

uselib.2

Michael Kerrisk

Mention CONFIG_USELIB

Michael Kerrisk

Note that glibc does not support this (obsolete) system call

wait.2

wait4.2

Michael Kerrisk

Rename the "status" argument to "wstatus"

The fact that `exit(3)/_exit(2)` has an argument called "status" and the same name is used in the arguments to the `wait*()` calls can a little too easily lead the user into thinking that the two arguments hold the same information, when of course they don't. So, use a different name for the argument of the `wait*()` functions, to reduce the chances of such confusion.

backtrace.3

Michael Kerrisk [Martin Gebert]

Small fixes to example program

clearenv.3

Michael Kerrisk [Matt Zimmerman]

Clarify the use and effect of clearenv()

See <http://bugs.debian.org/679323>

Michael Kerrisk

Variables can be added to the environment after calling clearenv()

clog10.3

Michael Kerrisk

Show an alternative equivalence for clog10()

Michael Kerrisk

Update CONFORMING TO

Fix grammar error and add C11.

dl_iterate_phdr.3

Michael Kerrisk [Paul Pluzhnikov]

Describe 'struct dl_phdr_info' fields added in glibc 2.4

See https://bugzilla.kernel.org/show_bug.cgi?id=103011

Michael Kerrisk [Simon Que]

Note that first object visited by 'callback' is the main program

See https://bugzilla.kernel.org/show_bug.cgi?id=94141

errno.3

Michael Kerrisk

Add some explanation of ENOENT error

exec.3

Michael Kerrisk

SEE ALSO: add system(3)

exp.3

Michael Kerrisk [Joachim Wuttke]

SEE ALSO: add expm1(3)

fopen.3

Michael Kerrisk

SEE ALSO: add open_memstream(3)

fts.3

Michael Kerrisk

BUGS: glibc-2.23 now has LFS support for the fts functions

gamma.3

Michael Kerrisk [Alan Cox]

gamma() was documented in SVID 2

getaddrinfo.3

Michael Kerrisk [Andreas Schwab, Orion Poplawski]

Update FTM requirements for glibc 2.22

Since glibc 2.22 getaddrinfo() etc. are only declared for POSIX.1-2001 or later.

getcwd.3

Michael Kerrisk

SEE ALSO: add pwd(1)

opendir.3

Michael Kerrisk

Help the reader by explicitly mentioning the use of readdir(3)

perror.3

Michael Kerrisk

Suggest use of strerror(3) in place of deprecated 'sys_errlist'

posix_fallocate.3

J r mie Galarneau

ERRORS: add EINTR

The glibc implementation of posix_fallocate(), which calls fallocate(), may be interrupted. The fallocate() emulation also makes use of pread()/pwrite(), which may also be interrupted.

posix_memalign.3

Michael Kerrisk [Eric Blake]

Note posix_memalign()'s treatment of 'memptr' on error

pthread_setaffinity_np.3

Michael Kerrisk

SEE ALSO: add CPU_SET(3)

queue.3

Dr. Tobias Quathamer

Remove double CONFORMING TO section

rcmd.3

Nikola Forr 

Add missing condition concerning .rhosts file

The list of conditions determining if iruserok() and ruserok() functions automatically fail is incomplete. According to glibc source code, the functions also fail if the .rhosts file is hard linked anywhere.

setbuf.3

Michael Kerrisk

SEE ALSO: add stdbuf(1)

setjmp.3

Michael Kerrisk

Rewrite and merge `longjmp()/siglongjmp()` discussion into this page

The discussion of nonlocal gotos is much easier to read if `setjmp()` and `longjmp()` are discussed in the same page. While we're at it, rework almost the entire text and add several more details.

Michael Kerrisk

Note the interactions of `longjmp()` and non-async-signal-safe functions
POSIX.1-2008 TC2 adds explicit text on this point.

See <http://austingroupbugs.net/view.php?id=516#c1195>

Michael Kerrisk

Explain why nonlocal gotos make code harder to maintain

Michael Kerrisk

Reword warning on `longjmp()` to function that has already returned

Michael Kerrisk

Remove reference to obsolete `_XOPEN_SOURCE_EXTENDED`

sleep.3

Michael Kerrisk

SEE ALSO: add `sleep(1)`

strftime.3

Michael Kerrisk [Jeremy Harris]

Note which 'tm' fields are used to calculate each output string

See https://bugzilla.redhat.com/show_bug.cgi?id=1162218

strlen.3

Michael Kerrisk [Alan Aversa]

CONFORMING TO: add C11

system.3

Michael Kerrisk

SEE ALSO: add `execve(2)`

termios.3

Dr. Tobias Quathamer

Document line length in canonical mode

See https://git.kernel.org/cgit/linux/kernel/git/torvalds/linux.git/tree/drivers/tty/n_tty.c#n1673

See <https://bugs.debian.org/797479>

Michael Kerrisk

SEE ALSO: add `tty(1)`

Michael Kerrisk [Peter Hurley]

Further improvements to recent tweaks of canonical mode 4096 char limit

timegm.3

Michael Kerrisk [Stephen Hurd, Mats Wichmann]

Remove sample implementation of timegm()

Stephen and Mats both question the wisdom of showing a portable *non-thread-safe* implementation of timegm(), and I find it hard to disagree. So, remove this code.

See https://bugzilla.kernel.org/show_bug.cgi?id=103701

Michael Kerrisk

Expand DESCRIPTION a little

st4.4

Dr. Tobias Quathamer

Remove spurious copyright section

tty_ioctl.4

Michael Kerrisk

SEE ALSO: add ldattach(1)

elf.5

Michael Kerrisk [Gabriel Corona, Mike Frysinger]

Fix description of STV_PROTECTED

Michael Kerrisk

Improve description of STV_DEFAULT

Michael Kerrisk

Improve description of STV_HIDDEN

Chris Pick

Remove erroneous, duplicate SHN_* section

Michael Kerrisk [Chris Pick]

Reword discussion of range values a little

gai.conf.5

Michael Kerrisk

Add VERSIONS section

group.5

Michael Kerrisk

SEE ALSO: add groups(2)

SEE ALSO: add gpasswd(1)

SEE ALSO: add sg(1)

SE ALSO: add gshadow(5)

SEE ALSO: add chgrp(1)

locale.5

Marko Myllynen [Mike Frysinger]

tel + fax are deprecated

nsswitch.conf.5

Nikola Forró

Update NSS compatibility mode description

utmp.5

Michael Kerrisk

SEE ALSO: add lslogins(1)

aio.7

Andreas Gruenbacher

Improve example

When aio_sigevent.sigev_notify is set to SIGEV_SIGNAL, signal handlers called for asynchronous I/O operations will have si->si_code set to SI_ASYNCIO. Check to make sure that si->si_value.sival_ptr is defined.

capabilities.7

Michael Kerrisk

Explain safety check for capability-dumb binaries

Michael Kerrisk

SEE ALSO: add sg(1), su(1)

SEE ALSO: add id(1), group(5), passwd(5)

credentials.7

Michael Kerrisk

SEE ALSO: add groups(2)

environ.7

Michael Kerrisk

Describe the Bourne "NAME=value command" syntax

Michael Kerrisk

Add some details describing how shell's environment is initialized

Michael Kerrisk

Note that child of fork(2) inherits copy of parent's environment

Michael Kerrisk

SEE ALSO: add pam_env(3)

epoll.7

Michael Kerrisk

Mention that epoll info is available via /proc/PID/fdinfo

fanotify.7

Michael Kerrisk

Refer reader to proc(5) for info on /proc/PID/fdinfo fanotify entries

feature_test_macros.7

Michael Kerrisk

Add a summary of some FTM key points

Michael Kerrisk

Give an early hint about some macros being defined by default

Michael Kerrisk

Clarify relation between `_XOPEN_SOURCE >=500` and `_XOPEN_SOURCE_EXTENDED`
Emphasize that defining `_XOPEN_SOURCE >=500` produces same effects as defining `_XOPEN_SOURCE_EXTENDED`.

Michael Kerrisk

Note that man pages don't mention `_XOPEN_SOURCE_EXTENDED`
As per previous commit, mention of `_XOPEN_SOURCE_EXTENDED` has generally been removed from the man pages.

Michael Kerrisk

Note effects of `"cc -std=c99"` and `"cc -std=c11"`

Michael Kerrisk

Clarify some `_ISOC99_SOURCE` / `_DEFAULT_SOURCE` details

Michael Kerrisk

Clarify that `_XOPEN_SOURCE_EXTENDED` is obsolete
Since SUSv2, `_XOPEN_SOURCE_EXTENDED` is no longer specified in the standard.

inotify.7

Michael Kerrisk

Refer reader to `proc(5)` for info on `/proc/PID/fdinfo` inotify entries

ip.7

Eric Dumazet

Document `IP_BIND_ADDRESS_NO_PORT` socket option

mq_overview.7

Michael Kerrisk

Note that the close-on-exec flag is automatically set on MQ descriptors

namespaces.7

Michael Kerrisk

SEE ALSO: `add lsns(1)`

`lsns(1)` was recently added in `util-linux`, probably to appear in next release (2.28?).

pipe.7

Michael Kerrisk [Jason Vas Dias]

Clarify that I/O signalling requires use of both `F_SETOWN` and `O_ASYNC`

Michael Kerrisk

SEE ALSO: `add mkfifo(1)`

signal.7

Michael Kerrisk

Note the interactions of `longjmp()` and non-async-signal-safe functions
See <http://austingroupbugs.net/view.php?id=516#c1195>.

socket.7

Michael Kerrisk

SEE ALSO: add pcap(3)
SEE ALSO: add wireshark(1) and tcpdump(8)

standards.7

Michael Kerrisk
Add POSIX.1-2008 TC2 (POSIX.1-2016)

svipc.7

Michael Kerrisk
Tweak description of 'sempid'
Michael Kerrisk
SEE ALSO: add lsipc(1)

symlink.7

Michael Kerrisk [Zefram]
Some "magic" symlinks have permissions other than 0777
See <https://bugs.debian.org/743525>

time.7

Michael Kerrisk
SEE ALSO: add timeout(1)
SEE ALSO: add ntp_adjtime(3) and ntp_gettime(3)

unicode.7

Dr. Tobias Quathamer
Document private use areas
See <https://bugs.debian.org/285444>

unix.7

Heinrich Schuchardt
Add example
A complete example demonstrating the usage of sockets for local interprocess communication is added.
Michael Kerrisk
Introduce term "sequenced-packet" for SOCK_SEQPACKET
Michael Kerrisk
Some wording improvements

==== Changes in man-pages-4.06 =====

Released: 2016-05-09, Oslo

Contributors

The following people contributed patches/fixes or (noted in brackets

in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

ioctl_fat.2
Heinrich Schuchardt
Use %04x to print volume ID
Leading zeroes should be used when display a FAT volume ID.

ioprio_set.2

Michael Kerrisk

SEE ALSO: add cgroups(7)

lseek.2

Michael Kerrisk

Note that 'off_t' is an integer data type defined by POSIX

memfd_create.2

Michael Kerrisk

Note that memfd_create() does not have a glibc wrapper

mount.2

Michael Kerrisk

MS_MANDLOCK requires CAP_SYS_ADMIN (since Linux 4.5)

quotactl.2

Michael Kerrisk

Document Q_GETNEXTQUOTA and Q_XGETNEXTQUOTA

Michael Kerrisk

Rework/reorder ERRORS list

Make into a single alphabetically ordered list

Michael Kerrisk

Note kernel version that removed Q_GETSTATS

Michael Kerrisk

Add kernel version for G_GETINFO, Q_SETINFO, and Q_GETFMT

readv.2

Michael Kerrisk

Clarify that 'size_t' and 'ssize_t' are integer types specified in POSIX

semctl.2

Michael Kerrisk

From kernel 4.6, Linux now updates 'sempid' on SETALL operations

sigaction.2

Michael Kerrisk

Document SEGV_BNDERR

Michael Kerrisk

Document SEGV_PKUERR

syscalls.2

Michael Kerrisk

Add preadv2() and pwritev2()

write.2

Michael Kerrisk

Clarify that 'size_t' and 'ssize_t' are integer types specified in POSIX

makedev.3

Mike Frysinger

Use `<sys/sysmacros.h>` in SYNOPSIS

Defining these functions via `<sys/types.h>` causes problems for some folk. As noted by Zack Wein:

libstdc++ force-enables `_GNU_SOURCE`, which means people writing in C++ `_can't_` avoid these nonstandard macros by using a strict conformance mode.

Since glibc has basically always used `<sys/sysmacros.h>`, update the docs to have people include that instead.

Michael Kerrisk

NOTES: mention that `<sys/types.h>` may also define these macros

popen.3

Nikola Forró

RETURN VALUE: describe successful case

Reference:

<http://pubs.opengroup.org/onlinepubs/9699919799/functions/popen.html>

<http://pubs.opengroup.org/onlinepubs/9699919799/functions/pclose.html>

strtod.3

Michael Kerrisk [Ed Avis]

Improve a detail in RETURN VALUE

core.5

Michael Kerrisk

Document `/proc/sys/kernel/core_pipe_limit`

locale.5

Marko Myllynen

Adjust `LC_IDENTIFICATION` / abbreviation

Tiny tweak to locale.5 based on the on ISO/IEC TR 14652:

<http://www.open-std.org/jtc1/SC22/WG20/docs/n972-14652ft.pdf>

Marko Myllynen

Update `LC_ADDRESS` after glibc change

This patch updates locale.5 to match the recent glibc change in commit `a837257199ffab76237385b830cc7b6179fc2f18`

Marko Myllynen

Complete `LC_COLLATE`

Here's the first attempt to (almost) complete the locale.5 manual page by documenting all (but perhaps one) of the missing `LC_COLLATE` keywords.

Mike Frysinger

`country_car`: Add a better description

nsswitch.conf.5

Marko Myllynen

Document group merging

Document the recently merged glibc group merge support.

Glibc commit ced8f8933673f4efda1d666d26a1a949602035ed

<https://sourceware.org/glibc/wiki/Proposals/GroupMerging>

proc.5

Michael Kerrisk

Move /proc/PID/cgroup discussion to cgroups(7) page

Michael Kerrisk

Add some background on why /proc/PID/mountinfo was added

Michael Kerrisk

Improve description of /proc/PID/mountinfo 'root' field

Michael Kerrisk

Add pointer to cgroups(7) for documentation of /proc/cgroups

Michael Kerrisk

Add reference to core(5) for info on /proc/sys/kernel/core_pipe_limit

cpuset.7

Michael Kerrisk

SEE ALSO: add cgroups(7)

ip.7

Benjamin Poirier

Fix incorrect sockopt name

"IP_LEAVE_GROUP" does not exist. It was perhaps a confusion with MCAST_LEAVE_GROUP. Change the text to IP_DROP_MEMBERSHIP which has the same function as MCAST_LEAVE_GROUP and is documented in the ip.7 man page.

Reference:

Linux kernel net/ipv4/ip_sockglue.c do_ip_setsockopt()

namespaces.7

Michael Kerrisk

SEE ALSO: add cgroups(7), cgroup_namespaces(7)

vdso.7

Zubair Lutfullah Kakakhel [Mike Frysinger]

Update for MIPS

Document the symbols exported by the MIPS VDSO.

VDSO support was added from kernel 4.4 onwards.

See <https://git.kernel.org/cgit/linux/kernel/git/torvalds/linux.git/log/arch/mips/vdso>

Michael Kerrisk [Rasmus Villemoes]

The `__kernel_clock_*` interfaces don't support `*_COARSE` clocks on PowerPC

ld.so.8

Michael Kerrisk [Alon Bar-Lev]

Document use of \$ORIGIN, \$LIB, and \$PLATFORM in environment variables

These strings are meaningful in LD_LIBRARY_PATH and LD_PRELOAD.

==== Changes in man-pages-4.07 =====

Released: 2016-07-17, Ulm

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

"Yuming Ma()" <mayuming@le.com>

Apologies if I missed anyone!

New and rewritten pages

ioctl_fideduperange.2

Darrick J. Wong [Christoph Hellwig, Michael Kerrisk]

New page documenting the FIDEDUPERANGE ioctl

Document the FIDEDUPERANGE ioctl, formerly known as
BTRFS_IOC_EXTENT_SAME.

ioctl_ficlonerange.2

Darrick J. Wong [Christoph Hellwig, Michael Kerrisk]

New page documenting FICLONE and FICLONERANGE ioctls

Document the FICLONE and FICLONERANGE ioctls, formerly known as
the BTRFS_IOC_CLONE and BTRFS_IOC_CLONE_RANGE ioctls.

nextup.3

Michael Kerrisk

New page documenting nextup(), nextdown(), and related functions

mount_namespaces.7

Michael Kerrisk [Michael Kerrisk]

New page describing mount namespaces

Newly documented interfaces in existing pages

mount.2

Michael Kerrisk

Document flags used to set propagation type

Document MS_SHARED, MS_PRIVATE, MS_SLAVE, and MS_UNBINDABLE.

Michael Kerrisk

Document the MS_REC flag

ptrace.2

Michael Kerrisk [Kees Cook, Jann Horn, Eric W. Biederman, Stephen Smalley]

Document ptrace access modes

proc.5

Michael Kerrisk

Document /proc/[pid]/timerslack_ns

Michael Kerrisk

Document /proc/PID/status 'Ngid' field

Michael Kerrisk

Document /proc/PID/status fields: 'NStgid', 'NSpid', 'NSpgid', 'NSsid'

Michael Kerrisk

Document /proc/PID/status 'Umask' field

New and changed links

preadv2.2

pwritev2.2

Michael Kerrisk

New links to readv(2)

nextdown.3

nextdownf.3

nextdownl.3

nextupf.3

nextupl.3

Michael Kerrisk

New links to nextup(3)

Changes to individual pages

ldd.1

Michael Kerrisk

Add a little more detail on why ldd is unsafe with untrusted executables

Michael Kerrisk

Add more detail on the output of ldd

localedef.1

Marko Myllynen

Drop --old-style description

The glibc upstream decided to drop localedef(1) --old-style option [1] altogether, I think we can do the same with localedef(1), the option hasn't done anything in over 16 years and I doubt anyone uses it.

add_key.2

Mitch Walker

Empty payloads are not allowed in user-defined keys

chroot.2

Michael Kerrisk

SEE ALSO: add pivot_root(2)

clone.2

Michael Kerrisk

Add reference to mount_namespaces(7) under CLONE_NEWNS description

fork.2

Michael Kerrisk

Add ENOMEM error for PID namespace where "init" has died

futex.2

Michael Kerrisk

Correct an ENOSYS error description

Since Linux 4.5, FUTEX_CLOCK_REALTIME is allowed with FUTEX_WAIT.

Michael Kerrisk [Darren Hart]

Remove crufty text about FUTEX_WAIT_BITSET interpretation of timeout

Since Linux 4.5, FUTEX_WAIT also understands

FUTEX_CLOCK_REALTIME.

Michael Kerrisk [Thomas Gleixner]

Explain how to get equivalent of FUTEX_WAIT with an absolute timeout

Michael Kerrisk

Describe FUTEX_BITSET_MATCH_ANY

Describe FUTEX_BITSET_MATCH_ANY and FUTEX_WAIT and FUTEX_WAKE equivalences.

Michael Kerrisk

Note that at least one bit must be set in mask for BITSET operations

At least one bit must be set in the 'val3' mask supplied for the

FUTEX_WAIT_BITSET and FUTEX_WAKE_BITSET operations.

Michael Kerrisk [Thomas Gleixner, Darren Hart]

Fix descriptions of various timeouts

Michael Kerrisk

Clarify clock default and choices for FUTEX_WAIT

getitimer.2

Michael Kerrisk

Substantial rewrites to various parts of the page

Michael Kerrisk [Tom Callaway]

Change license to note that page may be modified

The page as originally written carried text that said the page may be freely distributed but made no statement about modification. In the 20+ years since it was first written, the page has in fact seen repeated, sometimes substantial, modifications, and only a small portion of the original text remains. One could I suppose rewrite the last few pieces that remain from the original, but as the largest contributor to the pages existing text, I'm just going to relicense it to explicitly note that modification is permitted. (I presume the failure by the original author to grant permission to modify was simply an oversight; certainly, the large number of people who have changed the page have taken that to be the case.)

See also https://bugzilla.kernel.org/show_bug.cgi?id=118311

get_mempolicy.2

Michael Kerrisk [Jörn Engel]

Correct rounding to 'maxnodes' (bits, not bytes)

Michael Kerrisk [Jörn Engel]

Fix prototype for get_mempolicy()

In numaif.h, 'addr' is typed as 'void *'

getpriority.2

Michael Kerrisk

Make discussion of RLIMIT_NICE more prominent

The discussion of RLIMIT_NICE was hidden under the EPERM error, where it was difficult to find. Place some relevant text in DESCRIPTION.

Michael Kerrisk

Note that getpriority()/setpriority deal with same attribute as nice(2)

Michael Kerrisk [Robin Kuzmin]

Clarify equivalence between lower nice value and higher priority

get_robust_list.2

Michael Kerrisk

get_robust_list() is governed by PTRACE_MODE_READ_REALCREDS

ioctl.2

Michael Kerrisk

SEE ALSO: add ioctl_fideduperange(2) and ioctl_ficlonerange(2)

kcmp.2

Michael Kerrisk

kcmp() is governed by PTRACE_MODE_READ_REALCREDS

Shawn Landden

Note about SECURITY_YAMA

kill.2

Michael Kerrisk [John Wiersba]

Clarify the meaning if sig==0

lookup_dcookie.2

Michael Kerrisk

SEE ALSO: add oprofile(1)

mmap.2

Michael Kerrisk [Rahul Bedarkar]

EXAMPLE: for completeness, add munmap() and close() calls

mount.2

Michael Kerrisk

Restructure discussion of 'mountflags' into functional groups

The existing text makes no differentiation between different "classes" of mount flags. However, certain flags such as MS_REMOUNT, MS_BIND, MS_MOVE, etc. determine the general type of operation that mount() performs. Furthermore, the choice of which class of operation to perform is performed in a certain order, and that order is significant if multiple flags are specified. Restructure and extend the text to reflect these details.

Michael Kerrisk

Relocate text on multimounting and mount stacking to NOTES

The text was somewhat out of place in its previous location; NOTES is a better location.

Michael Kerrisk

Remove version numbers attached to flags that are modifiable on remount

This information was simply bogus. Mea culpa.

Michael Kerrisk

Refer reader to mount_namespaces(7) for details on propagation types

Michael Kerrisk

SEE ALSO: s/namespaces(7)/mount_namespaces(7)/

Omar Sandoval

MS_BIND still ignores mountflags

This is clear from the do_mount() function in the kernel as of v4.6.

Michael Kerrisk

Note the default treatment of ATIME flags during MS_REMOUNT

The behavior changed in Linux 3.17.

Michael Kerrisk

Clarify that MS_MOVE ignores remaining bits in 'mountflags'

Michael Kerrisk

Note kernel version that added MS_MOVE

Michael Kerrisk

MS_NOSUID also disables file capabilities

Michael Kerrisk

Relocate/demote/rework text on MS_MGC_VAL

The use of this constant has not been needed for 15 years now.

Michael Kerrisk

Clarify that 'source' and 'target' are pathnames, and can refer to files

Michael Kerrisk

Update example list of filesystem types

Put more modern examples in; remove many older examples.

Michael Kerrisk

MS_LAZYTIME and MS_RELATIME can be changed on remount

Michael Kerrisk

Explicitly note that MS_DIRSYNC setting cannot be changed on remount

Michael Kerrisk

Move text describing 'data' argument higher up in page

In preparation for other reworking.

Michael Kerrisk

Since Linux 2.6.26, bind mounts can be made read-only

open.2

Eric Biggers

Refer to correct functions in description of O_TMPFILE

pciconfig_read.2

Michael Kerrisk [Tom Callaway]

Change license to note that page may be modified

Niki Rahimi, the author of this page, has agreed that it's okay to change the license to note that the page can be modified.

See https://bugzilla.kernel.org/show_bug.cgi?id=118311

perf_event_open.2

Michael Kerrisk

If pid > 0, the operation is governed by PTRACE_MODE_READ_REALCREDS

Jann Horn

Document new perf_event_paranoid default

Keno Fischer [Vince Weaver]

Add a note that dyn_size is omitted if size == 0

The perf_output_sample_ustack in kernel/events/core.c only writes a single 64 bit word if it can't dump the user registers. From the current version of the man page, I would have expected two 64 bit words (one for size, one for dyn_size). Change the man page to make this behavior explicit.

prctl.2

Michael Kerrisk

Some wording improvements in timer slack description

Michael Kerrisk

Refer reader to discussion of `/proc/[pid]/timerslack_ns`

Under discussion of `PR_SET_TIMERSLACK`, refer the reader to the `/proc/[pid]/timerslack_ns` file, documented in `proc(5)`.

`process_vm_readv.2`

Michael Kerrisk

Rephrase permission rules in terms of a `ptrace` access mode check

`ptrace.2`

Michael Kerrisk [Jann Horn]

Update Yama `ptrace_scope` documentation

Reframe the discussion in terms of `PTRACE_MODE_ATTACH` checks, and make a few other minor tweaks and additions.

Michael Kerrisk, Jann Horn

Note that user namespaces can be used to bypass Yama protections

Michael Kerrisk

Note that `PTRACE_SEIZE` is subject to a `ptrace` access mode check

Michael Kerrisk

Rephrase `PTRACE_ATTACH` permissions in terms of `ptrace` access mode check

`quotactl.2`

Michael Kerrisk [Jacob Willoughby]

'`dqb_curspace`' is in bytes, not blocks

This error appears to have been injected into `glibc` when copying some headers from BSD.

See <https://bugs.debian.org/825548>

`recv.2`

Michael Kerrisk [Tom Gundersen]

With pending 0-length datagram `read()` and `recv()` with `flags == 0` differ

`setfsuid.2`

`setfsuid.2`

Jann Horn [Michael Kerrisk]

Fix note about errors from the syscall wrapper

See `sysdeps/unix/sysv/linux/i386/setfsuid.c` in `glibc-2.2.1`.

(This code is not present in modern `glibc` anymore.)

Michael Kerrisk

Move `glibc` wrapper notes to "C library/kernel differences" subsection

`sysinfo.2`

Michael Kerrisk

Rewrite and update various pieces

`umask.2`

Michael Kerrisk

NOTES: Mention /proc/PID/status 'Umask' field

umount.2

Michael Kerrisk

SEE ALSO: add mount_namespaces(7)

unshare.2

Michael Kerrisk

Add reference to mount_namespaces(7) under CLONE_NEWNS description

utimensat.2

Michael Kerrisk [Rob Landley]

Note that the glibc wrapper disallows pathname==NULL

wait.2

Michael Kerrisk

Since Linux 4.7, __WALL is implied if child being ptraced

Michael Kerrisk

waitid() now (since Linux 4.7) also supports __WNOTHREAD/__WCLONE/__WALL

assert.3

Nikos Mavrogiannopoulos

Improved description

Removed text referring to text not being helpful to users. Provide the error text instead to allow the reader to determine whether it is helpful. Recommend against using NDEBUB for programs to exhibit deterministic behavior. Moved description ahead of recommendations.

Michael Kerrisk

Clarify details of message printed by assert()

fmax.3

fmin.3

Michael Kerrisk

SEE ALSO: add fdim(3)

getauxval.3

Cownie, James H

Correct AT_HWCAP result description

inet_pton.3

Stefan Puiu

Mention byte order

malloc_hook.3

Michael Kerrisk

glibc 2.24 removes __malloc_initialize_hook

memmem.3

Michael Kerrisk [Shawn Landden]

Note that memmem() is present on some other systems

mkdtemp.3

mktemp.3

Michael Kerrisk

SEE ALSO: add mktemp(1)

printf.3

Michael Kerrisk [Shawn Landden]

Note support in other C libraries for %m and %n

strcasecmp.3

Michael Kerrisk [Ori Avtalion]

Make details of strncasecmp() comparison clearer

strcat.3

Michael Kerrisk

Add a program that shows the performance characteristics of strcat()

In honor of Joel Spolsky's visit to Munich, let's start educating Schlemiel The Painter.

strtol.3

Michael Kerrisk

SEE ALSO: add a64l(3)

strxfrm.3

Michael Kerrisk [Florian Weimer]

Remove NOTES section

strxfrm() and strncpy() are not precisely equivalent in the POSIX locale, so this NOTES section was not really correct.

See https://bugzilla.kernel.org/show_bug.cgi?id=104221

console_codes.4

console_ioctl.4

tty.4

vcs.4

charsets.7

Marko Myllynen

Remove console(4) references

0f9e647 removed the obsolete console(4) page but we still have few references to it. The patch below removes them or converts to refs to console_ioctl(4) where appropriate.

console_ioctl.4

Michael Kerrisk [Chris Gassib]

The argument to KDGETMODE is an 'int'

lirc.4

Alec Leamas

Update after upstreamed lirc.h, bugfixes.

st.4

Kai Mäkisara

Fix description of read() when block is larger than request

Kai Mäkisara

Update MTMKPART for kernels ≥ 4.6

Update the description of the MTMKPART operation of MTIOCTOP to match the changes in kernel version 4.6.

charmap.5

Marko Myllynen

Clarify keyword syntax

Updates charmap(5) to match the syntax all the glibc charmap files are using currently.

elf.5

Michael Kerrisk

SEE ALSO: add readelf(1)

locale.5

Marko Myllynen

Document missing keywords, minor updates

Marko Myllynen

Clarify keyword syntax

Marko Myllynen

Adjust conformance

proc.5

namespaces.7

Michael Kerrisk

Move /proc/PID/mounts information to proc(5)

There was partial duplication, and some extra information in namespaces(7). Move everything to proc(5).

proc.5

Michael Kerrisk

/proc/PID/fd/* are governed by PTRACE_MODE_READ_FSCREDS

Permission to dereference/readlink /proc/PID/fd/* symlinks is governed by a PTRACE_MODE_READ_FSCREDS ptrace access mode check.

Michael Kerrisk

/proc/PID/timerslack_ns is governed by PTRACE_MODE_ATTACH_FSCREDS

Permission to access /proc/PID/timerslack_ns is governed by

a `PTRACE_MODE_ATTACH_FSCREDS` ptrace access mode check.

Michael Kerrisk

Document `/proc/PID/{maps,mem,pagemap}` access mode checks

Permission to access `/proc/PID/{maps,pagemap}` is governed by a `PTRACE_MODE_READ_FSCREDS` ptrace access mode check.

Permission to access `/proc/PID/mem` is governed by a

`PTRACE_MODE_ATTACH_FSCREDS` ptrace access mode check.

Michael Kerrisk

Note `/proc/PID/stat` fields that are governed by `PTRACE_MODE_READ_FSCREDS`

Michael Kerrisk

`/proc/PID/{cwd,exe,root}` are governed by `PTRACE_MODE_READ_FSCREDS`

Permission to dereference/readlink `/proc/PID/{cwd,exe,root}` is governed by a `PTRACE_MODE_READ_FSCREDS` ptrace access mode check.

Michael Kerrisk

`/proc/PID/io` is governed by `PTRACE_MODE_READ_FSCREDS`

Permission to access `/proc/PID/io` is governed by a `PTRACE_MODE_READ_FSCREDS` ptrace access mode check.

Michael Kerrisk

`/proc/PID/{personality,stack,syscall}` are governed by `PTRACE_MODE_ATTACH_FSCREDS`

Permission to access `/proc/PID/{personality,stack,syscall}` is governed by a `PTRACE_MODE_ATTACH_FSCREDS` ptrace access mode check.

Michael Kerrisk

`/proc/PID/{auxv,environ,wchan}` are governed by `PTRACE_MODE_READ_FSCREDS`

Permission to access `/proc/PID/{auxv,environ,wchan}` is governed by a `PTRACE_MODE_READ_FSCREDS` ptrace access mode check.

Michael Kerrisk

Move shared subtree `/proc/PID/mountinfo` fields to `mount_namespaces(7)`

Move information on shared subtree fields in `/proc/PID/mountinfo` to `mount_namespaces(7)`.

Michael Kerrisk ["Yuming Ma()"]

Note that `/proc/net` is now virtualized per network namespace

Michael Kerrisk

Add references to `mount_namespaces(7)`

repertoiremap.5

Marko Myllynen

Clarify keyword syntax

utmp.5

Michael Kerrisk

SEE ALSO: `add_logname(1)`

capabilities.7

Michael Kerrisk [Andy Lutomirski]

Note on `SECURE_NO_CAP_AMBIENT_RAISE` for capabilities-only environment

Michael Kerrisk

Add a detail on use of `securebits`

cgroup_namespaces.7

Michael Kerrisk

SEE ALSO: add namespaces(7)

cgroups.7

Michael Kerrisk

ERRORS: add mount(2) EBUSY error

cp1251.7

cp1252.7

iso_8859-1.7

iso_8859-15.7

iso_8859-5.7

koi8-r.7

koi8-u.7

Marko Myllynen

Add some charset references

Add some references to related charsets here and there.

credentials.7

Michael Kerrisk

SEE ALSO: add runuser(1)

SEE ALSO: add newgrp(1)

SEE ALSO: add sudo(8)

feature_test_macros.7

Michael Kerrisk

Emphasize that applications should not directly include <features.h>

man-pages.7

Michael Kerrisk

Clarify which sections man-pages provides man pages for

Michael Kerrisk [Josh Triplett]

Add a few more details on formatting conventions

Add some more details for Section 1 and 8 formatting.

Separate out formatting discussion into commands, functions,
and "general".

namespaces.7

Michael Kerrisk

/proc/PID/ns/* are governed by PTRACE_MODE_READ_FSCREDS

Permission to dereference/readlink /proc/PID/ns/* symlinks is

governed by a PTRACE_MODE_READ_FSCREDS ptrace access mode check.

Michael Kerrisk

Nowadays, file changes in /proc/PID/mounts are notified differently

Exceptional condition for select(), (E)POLLPRI for (e)poll

Michael Kerrisk

Remove /proc/PID/mountstats description

This is a duplicate of information in proc(5).

Michael Kerrisk

Refer to new mount_namespaces(7) for information on mount namespaces

netlink.7

Andrey Vagin

Describe netlink socket options

Michael Kerrisk

Rework version information

(No changes in technical details.)

pid_namespaces.7

Michael Kerrisk

SEE ALSO: add namespaces(7)

unix.7

Michael Kerrisk

Move discussion on pathname socket permissions to DESCRIPTION

Michael Kerrisk

Expand discussion of socket permissions

Michael Kerrisk

Fix statement about permissions needed to connect to a UNIX domain socket

Read permission is not required (verified by experiment).

Michael Kerrisk

Clarify ownership and permissions assigned during socket creation

Michael Kerrisk [Carsten Grohmann]

Update text on socket permissions on other systems

At least some of the modern BSDs seem to check for write permission on a socket. (I tested OpenBSD 5.9.) On Solaris 10, some light testing suggested that write permission is still not checked on that system.

Michael Kerrisk

Note that umask / permissions have no effect for abstract sockets

W. Trevor King

Fix example code: 'ret' check after accept populates 'data_socket'

Michael Kerrisk

Move some abstract socket details to a separate subsection

Michael Kerrisk

Note that abstract sockets automatically disappear when FDs are closed

user_namespaces.7

Michael Kerrisk [Micha Zegan]

Clarify meaning of privilege in a user namespace

Having privilege in a user NS only allows privileged operations on resources governed by that user NS. Many privileged operations relate to resources that have no association with any namespace type, and only processes

with privilege in the initial user NS can perform those operations.

See https://bugzilla.kernel.org/show_bug.cgi?id=120671

Michael Kerrisk [Micha Zegan]

List the mount operations permitted by CAP_SYS_ADMIN

List the mount operations permitted by CAP_SYS_ADMIN in a noninitial users.

See https://bugzilla.kernel.org/show_bug.cgi?id=120671

Michael Kerrisk [Micha Zegan]

CAP_SYS_ADMIN allows mounting cgroup filesystems

See https://bugzilla.kernel.org/show_bug.cgi?id=120671

Michael Kerrisk

Clarify details of CAP_SYS_ADMIN and cgroup v1 mounts

With respect to cgroups version 1, CAP_SYS_ADMIN in the user namespace allows only *named* hierarchies to be mounted (and not hierarchies that have a controller).

Michael Kerrisk

Clarify CAP_SYS_ADMIN details for mounting FS_USERNS_MOUNT filesystems

Michael Kerrisk

Correct user namespace rules for mounting /proc

Michael Kerrisk

Describe a concrete example of capability checking

Add a concrete example of how the kernel checks capabilities in an associated user namespace when a process attempts a privileged operation.

Michael Kerrisk

Correct kernel version where XFS added support for user namespaces

Linux 3.12, not 3.11.

Michael Kerrisk

SEE ALSO: add ptrace(2)

SEE ALSO: add cgroup_namespaces(7)

utf-8.7:

Shawn Landden

Include RFC 3629 and clarify endianness which is left ambiguous

The endianness is suggested by the order the bytes are displayed, but the text is ambiguous.

==== Changes in man-pages-4.08 =====

Released: 2016-10-08, Munich

<wangshouyan@gmail.com>

Apologies if I missed anyone!

New and rewritten pages

quotactl.2

Eugene Syromyatnikov [Michael Kerrisk]

Updated information regarding disk quota flags

Added information regarding DQF_SYS_FILE flag; updated definition of V1_DQF_RSQUASH, which has been defined privately and defined publicly as DQF_ROOT_SQUASH.

Eugene Syromyatnikov

Updated information regarding XFS-specific quotactl subcommands

Added information regarding structure definitions used for XFS-specific subcommands, updated flag constants, added information regarding ignored syscall arguments, added notes on usage of kernel UAPI header.

Eugene Syromyatnikov

Additions regarding project quotas

Added information regarding presence of project quotas.

bswap.3

Michael Kerrisk

New page documenting bswap_16(), bswap_32(), and bswap_64()

cgroups.7

Michael Kerrisk

Substantial rewrites, additions, and corrections.

Newly documented interfaces in existing pages

readv.2

Michael Kerrisk

Document the pwritev2() RWF_SYNC and RWF_DSYNC flags

proc.5

Michael Kerrisk

Document /proc/PID/seccomp

Jann Horn

Document /proc/[pid]/task/[tid]/children

Document the /proc/[pid]/task/[tid]/children interface from CRIU, and more importantly, document why it's usually not a good interface.

New and changed links

bswap_16.3

bswap_32.3

bswap_64.3

New link to new bswap.3

Global changes

Various pages

Michael Kerrisk

Fix section ordering

Various pages had sections in an order different from that prescribed in man-pages(7).

Various pages

Michael Kerrisk [Mike Frysinger]

Consistently use /proc/[pid] (not /proc/PID)

Various pages

Michael Kerrisk

Fix order of SEE ALSO entries

Entries should be ordered first by section, and then alphabetically within the section.

Various pages

Michael Kerrisk

Order ERRORS alphabetically

Various pages

Michael Kerrisk

Remove section number from page self reference

Fix places where pages refer to the function that they describe and include a section number in that reference. Such references cause some HTML-rendering tools to create self-references in the page.

A few pages

Michael Kerrisk

Eliminate groff "cannot adjust line" warnings

Changes to individual pages

pldd.1

Michael Kerrisk [Carlos O'Donnell]

Note gdb(1) command that can be used as a replacement for pldd

Taken from Carlos O'Donnell's suggestion in

https://sourceware.org/bugzilla/show_bug.cgi?id=18035#c2

Michael Kerrisk

BUGS: pldd has not worked since glibc 2.19

accept.2

Michael Kerrisk

Mention epoll(7) alongside poll()/select()

Michael Kerrisk

Demote discussion of DECNet to NOTES

DECNet ceased to be important long ago...

adjtimex.2

Nikola Forró

Fix kernel version references

chroot.2

Michael Kerrisk

Note user namespace requirements for CAP_SYS_CHROOT

clone.2

Keno Fischer [Josh Triplett]

Adjust syscall prototype and expand CLONE_SETTLS description

Michael Kerrisk [Josh Triplett, Josh Triplett]

Document raw syscall interfaces on various other architectures

Michael Kerrisk

Change types for 'ptid' and 'ctid' in syscall prototypes

These types changed from 'void *' to 'int *' back in Linux 3.8.

Michael Kerrisk

EINVAL is generated by glibc wrapper for NULL 'fn' or 'child_stack'

Clarify that this error is produced by the wrapper function, not

the underlying system call. In particular, the point is that the

raw system call can accommodate a NULL pointer for 'child_stack'.

Michael Kerrisk [Elliott Hughes]

Make the implications of CLONE_FILES more explicit

If CLONE_FILES is not set, the duplicated FDs nevertheless share

file offset and status flags via the open file description.

Michael Kerrisk

Mention kcmp() under notes

close.2

Michael Kerrisk

Add mention of the close-on-exec flag

Michael Kerrisk

Clarify discussion noting that close() does not flush buffer cache

epoll_wait.2

Mike Crowe

Clarify that the timeout is measured against CLOCK_MONOTONIC

execve.2

Michael Kerrisk

Mention use of 'environ' to access environment list

Michael Kerrisk

Note that real UID, real GID, and supplementary GIDs are unchanged

fanotify_init.2

Heinrich Schuchardt

Update BUGS information

fcntl.2

Michael Kerrisk

Note an important detail of F_SETOWN permission rules for signals

F_SETOWN records the caller's credentials at the time of the fcntl() call, and it is these saved credentials that are used for subsequent permission checks.

Michael Kerrisk

Make the description of the effect of close-on-exec a little clearer

Michael Kerrisk

Clarify that F_GETFD and F_GETFL return flags via the function result

fork.2

Michael Kerrisk

PID of new process also does not match any existing session ID

fsync.2

Michael Kerrisk

SEE ALSO: add pwritev(2)

Since Linux 4.7, pwritev() has flags related to I/O integrity completion.

getdomainname.2

Michael Kerrisk

Note user namespace requirements for CAP_SYS_ADMIN

getgroups.2

Michael Kerrisk

Note user namespace requirements for CAP_SETGID

gethostname.2

Michael Kerrisk

Note user namespace requirements for CAP_SYS_ADMIN

getrlimit.2

Michael Kerrisk

Note user namespace semantics for CAP_SYS_RESOURCE

getsid.2

Michael Kerrisk

Rework description to be somewhat clearer

Michael Kerrisk

Correct the definition of "session ID"

getunwind.2

Michael Kerrisk

Simplify text referring to vdso(7)

The detail given here is redundant, since this info is also in vdso(7).

kcmp.2

Michael Kerrisk

Add an example program

kill.2

Michael Kerrisk

Note the user namespace requirement for CAP_KILL

killpg.2

Michael Kerrisk

Refer reader to kill(2) for signal permission rules

mlock.2

Sebastian Andrzej Siewior

Document that fork() after mlock() may be a bad idea in a RT process

mmap.2

Jann Horn

Describe treatment of 'offset' for MAP_ANONYMOUS

Michael Kerrisk [Siward de Groot]

Small improvement to description of MAP_SHARED

See https://sourceware.org/bugzilla/show_bug.cgi?id=6887

msgctl.2

msgget.2

msgop.2

semctl.2

semget.2

semop.2

shmctl.2

shmget.2

shmop.2

Michael Kerrisk

Note the user namespace requirements for CAP_IPC_OWNER

open.2

Michael Kerrisk

Clarify user namespace capability requirements for O_NOATIME

Michael Kerrisk

NOTES: kcmp() can be used to test if two FDs refer to the same OFD

Michael Kerrisk

F2FS support for O_TMPFILE was added in Linux 3.16

Michael Kerrisk

Clarify the rules about how the group ID of a new file is determined

prctl.2

Michael Kerrisk

Refer to proc(5) for effects of dumpability on ownership of /proc/PID/*

Michael Kerrisk

ERRORS: Add EACCES error for PR_SET_SECCOMP-SECCOMP_MODE_FILTER

Michael Kerrisk

Simplify list of cases where "dumpable" attribute is reset

Michael Kerrisk

Note user namespace requirements for PR_CAPBSET_DROP CAP_SETPCAP

readlink.2

Michael Kerrisk [Ursache Vladimir]

Make example program handle links that report a size of zero

Some "magic" symlinks created by the kernel (e.g., those under /proc and /sys) report 'st_size' as zero. Modify the example program to handle that possibility.

Michael Kerrisk

Emphasize that truncation of returned buffer generates no error

readv.2

Michael Kerrisk [Christoph Hellwig]

Clarify that RWF_DSYNC and RWF_SYNC apply only to data being written

Michael Kerrisk

Add preadv2() and pwritev2() to NAME line

reboot.2

Michael Kerrisk

Note user namespace requirements around CAP_SYS_BOOT

rename.2

Michael Kerrisk [Tim Savannah]

Clarify that ERRORS may cause rename to fail (not to be nonatomic)

sched_setaffinity.2

Michael Kerrisk

Note user namespace requirements for CAP_SYS_NICE

seccomp.2

Michael Kerrisk

CAP_SYS_ADMIN is required only in caller's user namespace

select_tut.2

Peter Wu

Fix various issues in example program

seteuid.2

Michael Kerrisk

Note user namespace requirements for CAP_SETUID and CAP_SETGID

setgid.2

Michael Kerrisk

Note user namespace requirements for CAP_SETGID

setpgid.2

Michael Kerrisk

Add a reference to credentials(7)

setpgid.2

setsid.2

Michael Kerrisk

Relocate some text on sessions and sessions leaders

Some text that was in setpgid(2) is better placed in setsid(2).

setresuid.2

Michael Kerrisk

Note user namespace requirements for CAP_SETUID

setreuid.2

Michael Kerrisk

Note user namespace requirements for CAP_SETUID and CAP_SETGID

setsid.2

Michael Kerrisk

Refer to credentials(7) for details for details on controlling terminal

Refer to credentials(7) for details of how a session obtains a controlling terminal.

set_thread_area.2

Michael Kerrisk

Add get_thread_area() to NAME

setuid.2

Michael Kerrisk

Note user namespace requirements for CAP_SETUID

sigprocmask.2

Keno Fischer

Expand/clarify libc/kernel sigset_t difference

stat.2

Michael Kerrisk [Ursache Vladimir, Mats Wichmann]

Improve discussion of 'st_size' for /proc and /sys files

Michael Kerrisk

_BSD_SOURCE and _SVID_SOURCE no longer expose nanosecond timestamps

umask.2

Michael Kerrisk

Provide a rationale for the existence of /proc/PID/status 'Umask' field

wait.2

Michael Kerrisk

Remove erroneous statement that waitpid() is implemented via wait4()

There is a fallback to wait4(), but only if the kernel does
not provide a waitpid() system call.

bindresvport.3

rcmd.3

ip.7

Michael Kerrisk

Note user namespace requirements for CAP_NET_BIND_SERVICE

byteorder.3

Michael Kerrisk

SEE ALSO: add bswap(3)

dlopen.3

Michael Kerrisk

dlmopen() is still broken in glibc 2.24

endian.3

Michael Kerrisk

SEE ALSO: add bswap(3)

ffs.3

Michael Kerrisk [Stefan Tauner]

Correct feature test macro requirements

fmemopen.3

Michael Kerrisk [Rich Felker]

Remove bogus suggestion to use setbuffer()

getlogin.3

Michael Kerrisk

Update feature test macro requirements for cuserid()

getumask.3

Michael Kerrisk

Note that getumask() is still unavailable in glibc 2.24

Michael Kerrisk

Point to umask(2) for a thread-safe way to discover process's umask

mkstemp.3

Quentin Rameau

Fix `_POSIX_C_SOURCE` value for mkstemp()

The correct `_POSIX_C_SOURCE` value has always been 200809L,
not 200112L.

pthread_join.3

Michael Kerrisk [Mats Wichmann]

Note that the caller might do clean up after joining with a thread

Michael Kerrisk []

Clarify use of 'retval' pointer

resolver.3

Ray Bellis

Correct arguments to `res_ninit(res_state statep)`

strverscmp.3

Michael Kerrisk

Add an example program

wcstombs.3

Michael Kerrisk [Igor Liferenko]

`wcrtombs()` does not provide thread-safe interface to same functionality

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=741360>

core.5

Mike Frysinger [Michael Kerrisk]

Add more details for output paths and the crash handler

People sometimes assume that the crash handler runs in the same
context as the crashing process. They would be incorrect :).

proc.5

Mike Frysinger

Clarify the root symlink and mount namespaces

If the target process is in a different mount namespace, the root
symlink actually shows that view of the filesystem.

Michael Kerrisk [Mike Frysinger]

Expand discussion of `/proc/[pid]/root`

Add a shell example showing that `/proc/[pid]/root` is more
than a symlink. Based on an example provided by Mike Frysinger

in an earlier commit message.

Michael Kerrisk

Explain rules determining ownership of `/proc/PID/*` files
Describe the effect of the "dumpable" attribute on ownership
of `/proc/PID` files.

Michael Kerrisk

Note effect of 'suid_dumpable' on ownership of `/proc/PID` files

Michael Kerrisk

Refer to `ptrace(2)` for info on effect of `suid_dumpable` on ptraceability

Michael Kerrisk

Add reference to `core(5)` in discussion of 'suid_dumpable'

Michael Kerrisk

Note that 'suid_dumpable' mode 1 is insecure

Michael Kerrisk

Document `/proc/meminfo` '+ShmemHugePages' and 'ShmemPmdMapped' fields

Michael Kerrisk

Document `/proc/PID/status` 'RssAnon', 'RssFile', and 'RssShmem' fields

Michael Kerrisk

Document `/proc/PID/status` 'HugetlbPages' field

Michael Kerrisk [Zefram]

Clarify that `/proc/PID/statm` 'shared' field counts *resident* pages
See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=741360>

Michael Kerrisk

Add reference to `umask(2)` in discussion of `/proc/PID/status` 'Umask'

Michael Kerrisk

Clarify user namespace requirements for `/proc/sys/fs/protected_hardlinks`

Michael Kerrisk

Note changes to config option governing `/proc/[pid]/task/[tid]/children`

Michael Kerrisk

Clarify description of `/proc/PID/statm` 'lib' and 'dt' fields
These fields are always zero since Linux 2.6.

Namhyung Kim [Petr Cermak]

Add description of `CLEAR_REFS_MM_HIWATER_RSS`

Michael Kerrisk

Update example VM values in `/proc/PID/status`

capabilities.7

Michael Kerrisk

Add note about nosuid to file capabilities section

Michael Kerrisk

SEE ALSO: add `proc(5)`

Michael Kerrisk

SEE ALSO: add `setsid(2)` and `setpgid(2)`

glob.7

Michael Kerrisk [Arnaud Gaillard]

Clarify that syntactically incorrect patterns are left unchanged

packet.7

Michael Kerrisk

Clarify user namespace requirements for CAP_NET_RAW

pipe.7

Michael Kerrisk [Patrick McLean]

Document FIONREAD

raw.7

Michael Kerrisk

Clarify user namespace requirements for CAP_NET_RAW

Also remove mention of UID 0 as a method of creating a raw socket. As far as I can tell from reading the kernel source (net/ipv4/af_inet.c), this is not true.

socket.7

Michael Kerrisk

SIOCSPGRP: refer to fcntl(2) F_SETOWN for correct permission rules

The permission rules described for SIOCCPGRP are wrong. Rather than repeat the rules here, just refer the reader to fcntl(2), where the rules are described for F_SETOWN.

unix.7

Michael Kerrisk [Laurent Georget, Ivan Kharpalev]

Remove mention of recvmsg() from discussion of EPIPE error

See https://bugzilla.kernel.org/show_bug.cgi?id=137351

ld.so.8

Michael Kerrisk

Expand description of LD_DEBUG

Provide a list of the categories, and note that multiple categories can be specified.

Michael Kerrisk

Add glibc version for LD_USE_LOAD_BIAS

Michael Kerrisk

Clarify text describing whether secure-mode programs preload libraries

Michael Kerrisk

Remove discussion of environment variables understood by libc5

libc5 disappeared long ago, so cease cluttering up this page with those ancient details. Thus, remove discussion of the following environment variables: LD_AOUT_LIBRARY_PATH, LD_AOUT_PRELOAD, LD_KEEPPDIR, LD_NOWARN, and LDD_ARGV0.

Michael Kerrisk

Remove text with ancient libc4 and Linux libc details

Michael Kerrisk

Remove mention of "ELF only"

Drawing a distinction between ELF-only features versus a,out ceased to be relevant long ago, so cluttering the page

with "ELF-only" serves no purpose.

===== Changes in man-pages-4.09 =====

Released: 2016-12-12, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Zack Weinberg <zackw@panix.com>

Apologies if I missed anyone!

New and rewritten pages

pkey_alloc.2

Dave Hansen [Michael Kerrisk]

New page documenting pkey_alloc(2) and pkey_free(2)

pthread_getattr_default_np.3

Michael Kerrisk

New page documenting pthread_getattr_default_np(3) and pthread_setattr_default_np(3)

strfromd.3

Wainer dos Santos Moschetta

New page documenting strfromd(3), strfromf(3), and strfroml(3)

The ISO/IEC TS 18661-1 specifies the strfrom() class
of functions that convert a float-point value to string.

fuse.4

Keno Fischer [Michael Kerrisk]

New page describing /dev/fuse

This is my writeup of a basic description of /dev/fuse after
playing with it for a few hours today. It is of course woefully
incomplete, and since I neither have a use case nor am working
on this code, I will not be in a position to expand it in the
near future. However, I'm hoping this could still serve as a
handy reference for others looking at this interface.

[mtk: Notwithstanding the incompleteness of this page,
it's a good base for future extension.]

tmpfs.5

Michael Kerrisk

New page documenting the tmpfs filesystem

pkeys.7

Dave Hansen [Michael Kerrisk]

New page with overview of Memory Protection Keys

random.7

Michael Kerrisk [Theodore Ts'o, Nikos Mavrogiannopoulos, Laurent Georget]

New page providing an overview of interfaces for obtaining randomness

Contains material extracted from getrandom(2) and random(4),
as well as new material.

sock_diag.7

Pavel Emelyanov, Dmitry V. Levin

New page documenting NETLINK_SOCK_DIAG interface

close.2

getpriority.2

nice.2

timer_create.2

timerfd_create.2

random.4

elf.5

proc.5

sched.7

Various authors

These pages also saw substantial updates, as described under
"Changes to individual pages".

Newly documented interfaces in existing pages

mmap.2

Michael Kerrisk

Add (much) more detail on MAP_GROWSDOWN

mprotect.2

Dave Hansen

Document the new pkey_mprotect() system call

Eugene Syromyatnikov

Document PROT_SEM, PROT_SAO, PROT_GROWSUP, and PROT_GROWSDOWN

prctl.2

Eugene Syromyatnikov

Document PR_SET_FP_MODE and PR_GET_FP_MODE

perf_event_open.2

Vince Weaver

PERF_RECORD_SWITCH support

Linux 4.3 introduced two new record types for recording context

switches: PERF_RECORD_SWITCH and PERF_RECORD_SWITCH_CPU_WIDE.

Vince Weaver

Add PERF_SAMPLE_BRANCH_CALL branch sample type

Vince Weaver

PERF_SAMPLE_BRANCH_IND_JUMP branch_sample_type

Linux 4.2 added a new branch_sample_type: PERF_SAMPLE_BRANCH_IND_JUMP

Vince Weaver

Document PERF_RECORD_MISC_PROC_MAP_PARSE_TIMEOUT

Vince Weaver

Document sample_max_stack and /proc/sys/kernel/perf_event_max_stack

Linux 4.8 added a new sample_max_stack parameter, as well as

/proc/sys/kernel/perf_event_max_stack which limits it and a new

E_OVERFLOW error return.

Dave Hansen

PERF_RECORD_LOST_SAMPLES record type

Linux 4.2 added a new record type: PERF_RECORD_LOST_SAMPLES

It is generated when hardware samples (currently only Intel PEBS)

are lost.

ptrace.2

Michael Kerrisk

Document PTRACE_SECCOMP_GET_FILTER

Michael Kerrisk

Document PTRACE_GET_THREAD_AREA and PTRACE_SET_THREAD_AREA

namespaces.7

Michael Kerrisk [Eric W. Biederman]

Document the NS_GET_USERNS and NS_GET_PARENT ioctl() operations

sched.7

Michael Kerrisk [Mike Galbraith]

Document the autogroup feature

Includes documenting autogroup nice value

Michael Kerrisk

Autogrouping breaks traditional semantics of nice in many cases

When autogrouping is enabled (the default in many distros)

there are many traditional use cases where the nice value

ceases to have any effect.

Michael Kerrisk

Add a subsection on nice value and group scheduling

New and changed links

killpg.2

Michael Kerrisk

New link to relocated killpg(3) page

pkey_free.2

Michael Kerrisk

New link to new pkey_alloc(2) page

pkey_mprotect.2

Michael Kerrisk

New link to mprotect(2)

pthread_setattr_default_np.3

Michael Kerrisk

New link to new pthread_getattr_default_np.3

strfromf.3

Wainer dos Santos Moschetta

New link to strfromd(3)

strfroml.3

Wainer dos Santos Moschetta

New link to strfromd(3)

Global changes

Various pages

Michael Kerrisk

Remove ancient libc4 and libc5 details

It's nearly 20 years now since Linux libc went away.

Remove some ancient details from the pages.

Various pages

Michael Kerrisk

Add cross references to new tmpfs(5) page

Various pages

Michael Kerrisk

Change section number from 2 to 3 in killpg() references

Changes to individual pages

accept.2

Michael Kerrisk

Remove editorializing comments about 'socklen_t'

Michael Kerrisk

Simplify the discussion of 'socklen_t'

We don't really need to list the old OSes in this discussion.

adjtimex.2

clock_getres.2

gettimeofday.2

Michael Kerrisk

SEE ALSO: add hwclock(8)

bind.2

connect.2

getpeername.2

getsockname.2

getsockopt.2

Michael Kerrisk

Replace discussion of 'socklen_t' with reference to accept(2)

The discussion of 'socklen_t' editorializes and is repeated across several pages. Replace it with a reference to accept(2), where some details about this type are provided.

chmod.2

Michael Kerrisk

SEE ALSO: add chmod(1)

chown.2

Michael Kerrisk

SEE ALSO: add chgrp(1) and chown(1)

chroot.2

Michael Kerrisk

SEE ALSO: add chroot(1)

clone.2

Michael Kerrisk

The CLONE_*_SETTID operations store TID before return to user space

CLONE_PARENT_SETTID and CLONE_CHILD_SETTID store the new TID before clone() returns to user space

close.2

Michael Kerrisk [Daniel Wagner]

Rework and greatly extend discussion of error handling

Further clarify that an error return should be used only for diagnostic or remedial purposes.

Michael Kerrisk

Other UNIX implementations also close the FD, even if reporting an error

Looking at some historical source code suggests that the "close() always closes regardless of error return"

behavior has a long history, predating even POSIX.1-1990.

Michael Kerrisk

Note that future POSIX plans to require that the FD is closed on error

See <http://austingroupbugs.net/view.php?id=529#c1200>.

Michael Kerrisk

Clarify the variation in EINTR behavior per POSIX and other systems

fallocate.2

Darrick J. Wong

Document behavior with shared blocks

Note that FALLOC_FL_UNSHARE may use CoW to unshare blocks to guarantee that a disk write won't fail with ENOSPC.

fanotify_mark.2

Heinrich Schuchardt

Mention FAN_Q_OVERFLOW

To receive overflow events it is necessary to set this bit in fanotify_mark().

fcntl.2

Michael Kerrisk

F_GETPIPE_SZ allocates next power-of-2 multiple of requested size

Add some detail about current implementation, since this helps the user understand the effect of the user pipe limits added in Linux 4.5 (described in pipe(7)).

Michael Kerrisk

Add EPERM that occurs for F_SETPIPE_SZ when user pipe limit is reached

fideduperange.2

Darrick J. Wong [Omar Sandoval]

Fix the discussion of maximum sizes

Fix the discussion of the limitations on the dest_count and src_length parameters to the fideduperange ioctl() to reflect what's actually in the kernel.

fsync.2

Michael Kerrisk

SEE ALSO: add fileno(3)

fileno(3) is useful if one is combining fflush(3)/fclose(3) and fsync(2).

Michael Kerrisk

SEE ALSO: add fflush(3)

getgroups.2

Andrew Clayton

FTM requirements fix for setgroups(2)

gethostname.2

Michael Kerrisk

SEE ALSO: add hostname(1)

get_mempolicy.2

Michael Kerrisk

Note that 'addr' must be NULL when 'flags' is 0

getpriority.2

Michael Kerrisk

Warn that autogrouping voids the effect of 'nice' in many cases

Refer the reader to sched(7) for the details.

Michael Kerrisk

Expand discussion of getpriority() return value

Michael Kerrisk

The nice value supplied to setpriority() is clamped

Note that the nice value supplied to setpriority() is clamped to the permitted range.

Michael Kerrisk

Improve description of setpriority() return value

getpriority.2

sched.7

Michael Kerrisk

Move nice value details from getpriority(2) to sched(7)

Centralizing these details in sched(7) is more logical.

getrandom.2

random.4

Michael Kerrisk

Consolidate and improve discussion on usage of randomness

Currently, recommendations on how to consume randomness are spread across both getrandom(2) and random(4) and the general opinion seems to be that the text in getrandom(2) does a somewhat better job. Consolidate the discussion to a single page (getrandom(2)) and address some of the concerns expressed about the existing text in random(4).

[Some of this text ultimately made its way into the new random(7) page.]

getrandom.2

Michael Kerrisk

Remove material incorporated into random(7)

Michael Kerrisk

Note advantages of fact that getrandom() doesn't use file descriptors

Michael Kerrisk

Clarify that getrandom() is not "reading" from /dev/{random,urandom}

getrlimit.2

Michael Kerrisk

Refer to sched(7) in discussion of RLIMIT_RTPRIO and RLIMIT_RTTIME

Michael Kerrisk

Describe the range of the RLIMIT_NICE limit

Michael Kerrisk

Refer to sched(7) in the discussion of RLIMIT_NICE

Michael Kerrisk

SEE ALSO: add credentials(7)

ioctl_ficlone.2

ioctl_fideduperange.2

Darrick J. Wong

Clarify the behavior of the FIDEDUPERANGE ioctl

kill.2

Michael Kerrisk

SEE ALSO: add kill(1)

mbind.2

Michael Kerrisk [Christoph Lameter]

Memory policy is a per-thread attribute, not a per-process attribute

mbind.2

set_mempolicy.2

Piotr Kwapulinski [Christoph Lameter, Michael Kerrisk]

Add MPOL_LOCAL NUMA memory policy documentation

mount.2

Michael Kerrisk

SEE ALSO: add mountpoint(1)

mprotect.2

Michael Kerrisk

CONFORMING TO: note that pkey_mprotect() is Linux-specific

nice.2

Michael Kerrisk

Warn that autogrouping voids the effect of 'nice' in many cases

Michael Kerrisk

CONFORMING TO: Remove an ancient SVr4 detail on errno values

Michael Kerrisk

Rework discussion of nice() return value and standards conformance

Make the text a little clearer. In particular, clarify that the raw system call (still) returns 0 on success.

Michael Kerrisk

Clarify the range of the nice value, and note that it is clamped

Michael Kerrisk

Add mention of RLIMIT_NICE

Michael Kerrisk

Move discussion of handling the -1 success return to RETURN VALUE

This detail was rather hidden in NOTES. Also, rework the text a little.

Michael Kerrisk

Clarify that nice() changes the nice value of the calling *thread*

Michael Kerrisk

Add "C library/kernel differences" subsection heading

Michael Kerrisk

Add reference to sched(7) for further details on the nice value

open.2

Michael Kerrisk

ubifs supports O_TMPFILE starting with Linux 4.9

Michael Kerrisk

Document ENOMEM that occurs when opening FIFO because of pipe hard limit

perf_event_open.2

Vince Weaver

Add cycles field in LBR records

Linux 4.3 added a cycles field to the PERF_SAMPLE_BRANCH_STACK last branch records.

Vince Weaver

Update time_shift sample code

Linux 4.3 improved the accuracy of the clock/ns conversion routines.

Michael Kerrisk

Clarify the use of signals for capturing overflow events

pipe.2

Michael Kerrisk

Add ENFILE error for user pipe hard limit reached

prctl.2

Eugene Syromyatnikov

Some additional details regarding the PR_GET_UNALIGNED operation

Eugene Syromyatnikov

Note the output buffer size for PR_GET_TID_ADDRESS operation on x32/n32

Michael Kerrisk

Remove numeric definitions of PR_FP_MODE_FR and PR_FP_MODE_FRE bits

ptrace.2

Keno Fischer

Document the behavior of PTRACE_SYSEMU stops

Keno Fischer

Expand documentation PTRACE_EVENT_SECCOMP traps

In Linux 4.8, the order of PTRACE_EVENT_SECCOMP and syscall-entry-stops was reversed. Document both behaviors and their interaction with the various forms of restart.

quotactl.2

Eugene Syromyatnikov

Describe Q_XQUOTASYNC, which is present but no-op in recent kernels

reboot.2

Wang Long

Note errors for invalid commands inside a PID namespace

sched_setattr.2

Michael Kerrisk

Fix cross reference for further info on the nice value

The information moved from getpriority(2) to sched(7).

sched_setscheduler.2

Michael Kerrisk [Daniel Berrange]

Mention SCHED_DEADLINE

Give the reader a clue that there is another policy

available that can't be set via sched_setscheduler(2).

seccomp.2

Jann Horn

Document changed interaction with ptrace

Before kernel 4.8, the seccomp check will not be run again

after the tracer is notified. Fixed in kernel 4.9.

Michael Kerrisk

NOTES: mention ptrace(PTRACE_SECCOMP_GET_FILTER) to dump seccomp filters

set_mempolicy.2

Michael Kerrisk

Reformat list of modes

setsid.2

Michael Kerrisk

Improve wording of text on calling setsid() after fork()+_exit()

Michael Kerrisk

SEE ALSO: add sched(7)

List sched(7), because setsid(2) is part of the machinery of autogrouping.

sigaction.2

Dave Hansen

Further documentation of SEGV_PKUERR

signalfd.2

Michael Kerrisk

Document ssi_addr_lsb field of signalfd_siginfo

symlink.2

Michael Kerrisk

SEE ALSO: add namei(1)

sync_file_range.2

Michael Kerrisk

Fix description for ESPIPE error

A file descriptor can't refer to a symbolic link.

syscalls.2

Michael Kerrisk

Add pkey_alloc(), pkey_free(), and pkey_mprotect()

New system calls in Linux 4.9.

Michael Kerrisk

Add ppc_swapcontext(2)

timer_create.2

Michael Kerrisk

Document CLOCK_BOOTTIME

Michael Kerrisk

Document CLOCK_REALTIME_ALARM and CLOCK_BOOTTIME_ALARM

timerfd_create.2

Michael Kerrisk

Document CLOCK_BOOTTIME, CLOCK_REALTIME_ALARM, and CLOCK_BOOTTIME_ALARM

Michael Kerrisk

Document TFD_TIMER_CANCEL_ON_SET

Michael Kerrisk

Rework discussion on relative and absolute timers

unlink.2

Michael Kerrisk

SEE ALSO: add unlink(2)

utime.2

utimensat.2

Michael Kerrisk

SEE ALSO: add touch(1)

wait.2

Michael Kerrisk

On some architectures, waitpid() is a wrapper that calls wait4().

atof.3

Wainer dos Santos Moschetta

SEE ALSO: add strfromd(3)

ctime.3

Michael Kerrisk

Add ERRORS section

Michael Kerrisk

RETURN VALUE: describe return values more explicitly

errno.3

Michael Kerrisk [Igor Liferenko]

Add glibc error text for EILSEQ

fclose.3

fflush.3

Michael Kerrisk

SEE ALSO: add fileno(2)

getlogin.3

Michael Kerrisk

Remove deprecated `_REENTRANT` from FTM requirements for `getlogin_r()`

Michael Kerrisk

SEE ALSO: add `logname(1)`

isalpha.3

Michael Kerrisk

Note circumstances where 'c' must be cast to 'unsigned char'

killpg.3

Michael Kerrisk

Move `killpg.2` from section to section 3

mallopt.3

Michael Kerrisk [Siddhesh Poyarekar]

Document 0 as default value of `M_ARENA_MAX` and explain its meaning

Michael Kerrisk

Improve description of `M_ARENA_TEST`

Michael Kerrisk

Document default value for `M_ARENA_TEST`

Michael Kerrisk

Note default value of `M_PERTURB`

mbsnrtowcs.3

Michael Kerrisk [Igor Liferenko]

Note behavior of `mbsnrtowcs()` for an incomplete character

Note the behavior of `mbsnrtowcs()` when an incomplete character is found at end of the input buffer.

mbstowcs.3

wcstombs.3

Michael Kerrisk [Igor Liferenko]

Improve language relating to "initial state"

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=839705>

mbstowcs.3

Michael Kerrisk [Igor Liferenko]

Add missing include to example program

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=845172>

mq_close.3

Michael Kerrisk

DESCRIPTION: add reference to mq_notify(3)

mq_open.3

Eugene Syromyatnikov

Clarification regarding usage of mq_flags attribute in mq_open()

mq_receive.3

mq_send.3

Eugene Syromyatnikov

Clarification regarding reasons behind EBADF

printf.3

Wainer dos Santos Moschetta

SEE ALSO: add strfromd(3)

pthread_attr_init.3

Michael Kerrisk

SEE ALSO: add pthread_setattr_default_np(3)

pthread_create.3

Michael Kerrisk

SEE ALSO: add pthread_setattr_default_np(3)

ptsname.3

Michael Kerrisk

Note that ptsname_r() is proposed for future inclusion in POSIX.1

Michael Kerrisk

CONFORMING TO:: clarify that only ptsname() is standardized (so far)

remainder.3

Michael Kerrisk

Note fix to remainder(nan(""), 0) handling

The bug https://www.sourceware.org/bugzilla/show_bug.cgi?id=6779

has been fixed in glibc 2.15.

Michael Kerrisk

Document fixes for EDOM handling for range errors

The bug http://sources.redhat.com/bugzilla/show_bug.cgi?id=6783

was fixed in glibc 2.15.

setjmp.3

Michael Kerrisk

_BSD_SOURCE must be *explicitly* defined to get BSD setjmp() semantics

strtod.3

Wainer dos Santos Moschetta

SEE ALSO: add strfromd(3)

tgamma.3

Michael Kerrisk

Document fixes to give ERANGE for underflow range error

The bug https://www.sourceware.org/bugzilla/show_bug.cgi?id=6810
was fixed in glibc 2.19.

timegm.3

Michael Kerrisk

Add ERRORS section

Michael Kerrisk [Vincent Lefevre]

Add RETURN VALUE section

tmpnam.3

Michael Kerrisk

Properly document tmpnam_r(3)

toupper.3

Michael Kerrisk

Note circumstances where 'c' must be cast to 'unsigned char'

ttyname.3

Michael Kerrisk

SEE ALSO: add tty(1)

console_ioctl.4

Michael Kerrisk

Add brief descriptive text for KDGKBMODE modes

Miroslav Koskar

Add K_OFF keyboard mode

random.4

Michael Kerrisk

Add reference to new random(7) page

Michael Kerrisk

Rework formatting of /proc interfaces

Make the information easier to parse by formatting the file
descriptions as hanging lists. No significant content changes.

Nikos Mavrogiannopoulos [Laurent Georget]

Provide a more accurate description of /dev/urandom

This documents the "property" of /dev/urandom of being able to

serve numbers prior to pool being initialized, and removes any suggested usages of /dev/random which are disputable (i.e., one-time pad). Document the fact /dev/random is only suitable for applications which can afford indeterminate delays since very few applications can do so. Smooth the alarming language about a theoretical attack, and mention that its security depends on the cryptographic primitives used by the kernel, as well as the total entropy gathered.

Michael Kerrisk [Laurent Georget, Theodore Ts'o]

Improve discussion of /dev/urandom, blocking reads, and signals
The text currently states that O_NONBLOCK has no effect for /dev/urandom, which is true. It also says that reads from /dev/urandom are nonblocking. This is at the least confusing. If one attempts large reads (say 10MB) from /dev/urandom there is an appreciable delay, and interruption by a signal handler will result in a short read. Amend the text to reflect this.

elf.5

Mike Frysinger

Add subsection headers at major points
The current pages dumps all the content into one big DESCRIPTION with no real visual break up between logically independent sections. Add some subsection headers to make it easier to read and scan.

Mike Frysinger

Document notes
Document the Elf{32,64}_Nhdr structure, the sections/segments that contain notes, and how to interpret them. I've been lazy and only included the GNU extensions here, especially as others are not defined in the elf.h header file as shipped by glibc.

filesystems.5

Michael Kerrisk

SEE ALSO: add fuse(4)

proc.5

Dave Hansen

Describe new ProtectionKey 'smaps' field

Michael Kerrisk

Add example ProtectionKey output for 'smaps' file

Michael Kerrisk

Add pointers to sched(7) for autogroup files
sched(7) describes /proc/sys/kernel/sched_autogroup_enabled and /proc/PID/autogroup.

Michael Kerrisk

Add /proc/sys/fs/pipe-user-pages-`{hard,soft}` entries

Michael Kerrisk

Improve description of the KernelPageSize and MMUPageSize 'smaps' fields

Michael Kerrisk

Rework 'smaps' ProtectionKey text and add some details

Michael Kerrisk

Mention lslocks(8) in discussion of /proc/locks

Michael Kerrisk

Describe Shmem field of /proc/meminfo

Michael Kerrisk

Rework 'smaps' VmFlags text, and add kernel version and example output

proc.5

pipe.7

Michael Kerrisk

Move /proc/sys/fs/pipe-max-size content from proc(5) to pipe(7)

resolv.conf.5

Carlos O'Donnell [Florian Weimer]

Timeout does not map to resolver API calls

utmp.5

Michael Kerrisk

SEE ALSO: add users(1)

capabilities.7

Michael Kerrisk

CAP_SYS_ADMIN governs ptrace(2) PTRACE_SECCOMP_GET_FILTER

Michael Kerrisk

CAP_SYS_ADMIN allows privileged ioctl() operations on /dev/random

cgroups.7

Michael Kerrisk

Add details on 'cpu' CFS bandwidth control

credentials.7

Michael Kerrisk

SEE ALSO: add setpriv(1)

Michael Kerrisk

SEE ALSO: add shadow(5)

feature_test_macros.7

Michael Kerrisk [Zack Weinberg]

Note that _REENTRANT and _THREAD_SAFE are now deprecated

Michael Kerrisk

Note that "cc -pthread" defines _REENTRANT

inotify.7

Michael Kerrisk

Note a subtlety of event generation when monitoring a directory

libc.7

Michael Kerrisk

Add a note on why glibc 2.x uses the soname libc.so.6

Michael Kerrisk

Add a few historical details on Linux libc4 and libc5

Just for historical interest. Details taken from

<http://www.linux-m68k.org/faq/glibcinfo.html>.

mdoc.7

Michael Kerrisk

Add a cross-reference to groff_mdoc(7)

mount_namespaces.7

Michael Kerrisk

SEE ALSO: add user_namespaces(7)

mount_namespaces.7

user_namespaces.7

Michael Kerrisk

Migrate subsection on mount restrictions to mount_namespaces(7)

This section material in the user_namespaces(7) page was written before the creation of the mount_namespaces(7) manual page.

Nowadays, this material properly belongs in the newer page.

netlink.7

Dmitry V. Levin

Document NETLINK_INET_DIAG rename to NETLINK_SOCK_DIAG

Dmitry V. Levin

Add references to sock_diag(7)

pid_namespaces.7

Michael Kerrisk

Refer to namespaces(7) for information about NS_GET_PARENT

pipe.7

Michael Kerrisk, Vegard Nossum [Vegard Nossum]

Document /proc files controlling memory usage by pipes

Document /proc/sys/fs/pipe-max-size and /proc/sys/fs/pipe-user-pages-`{soft,hard}`.

Michael Kerrisk

Document pre-Linux 4.9 bugs in pipe limit checking

sched.7

Michael Kerrisk

Add a new introductory paragraph describing the nice value

Michael Kerrisk

Add more precise details on CFS's treatment of the nice value

Michael Kerrisk

Mention RLIMIT_NICE in the discussion of the nice value

Michael Kerrisk

NOTES: mention cgroups CPU controller

Michael Kerrisk

Add introductory sentence mentioning CFS scheduler

Michael Kerrisk

Add nice(2), getpriority(2), and setpriority(2) to API list

Michael Kerrisk

Make it clearer that SCHED_OTHER is always scheduled below real-time

Michael Kerrisk

Give the page a more generic NAME

The page isn't just about APIs.

standards.7

Michael Kerrisk

POSIX.1-2016 (POSIX.1-2008 TC2) has now been released

symlink.7

Michael Kerrisk

SEE ALSO: add namei(1)

uri.7

Jakub Wilk

Use "example.com" as example domain

user_namespaces.7

Michael Kerrisk

Add reference to namespaces(7) for NS_GET_USERNS operation

Michael Kerrisk

Add reference to namespaces(7) for NS_GET_PARENT operation

==== Changes in man-pages-4.10 =====

Released: 2017-03-13, Paris

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Adam Martindale <adam.john.martindale@gmail.com>

Alex <psybin@riseup.net>

Apologies if I missed anyone!

New and rewritten pages

add_key.2

Michael Kerrisk [Eugene Syromyatnikov, David Howells]

Major improvements and additions

The page has doubled in length.

ioctl_iflags.2

Michael Kerrisk

New page describing inode flags and ioctl() operations

ioctl_ns.2

Michael Kerrisk

New page created by splitting ioctl(2) operations out of namespaces(7)

keyctl.2

Michael Kerrisk, Eugene Syromyatnikov [David Howells, Mat Martineau]

A vast number of additions and improvements

The page has gone from somewhat over 100 lines to well over 1000 lines and now more or less documents the complete interface provided by this system call.

getentropy.3

Michael Kerrisk

New page documenting getentropy(3)

getentropy(3) is added to glibc in version 2.25.

keyrings.7

David Howells

New page (written by David Howells) adopted from keyutils

Since this page documents kernel-user-space interfaces, it makes sense to have it as part of man-pages, rather than the keyutils package.

Michael Kerrisk [Eugene Syromyatnikov, David Howells]

Very many additions and improvements

Michael Kerrisk

Document /proc/keys

Michael Kerrisk

Document /proc/sys/kernel/keys/persistent_keyring_expiry

Michael Kerrisk

Document /proc/key-users

Michael Kerrisk

Document /proc/sys/kernel/keys/gc_delay

Michael Kerrisk

Document /proc files that define key quotas

persistent-keyring.7

Michael Kerrisk

New page (written by David Howells) adopted from keyutils

Since this page documents kernel-user-space interfaces, it makes sense to have it as part of man-pages, rather

than the keyutils package.

Michael Kerrisk

Various clean-ups and additions

process-keyring.7

Michael Kerrisk

New page (written by David Howells) adopted from keyutils

Since this page documents kernel-user-space interfaces, it makes sense to have it as part of man-pages, rather than the keyutils package.

Michael Kerrisk

Various additions and improvements

request_key.2

Michael Kerrisk, Eugene Syromyatnikov [David Howells]

Very many additions and improvements

The page is now three times its former length.

session-keyring.7

Michael Kerrisk

New page (written by David Howells) adopted from keyutils

Since this page documents kernel-user-space interfaces, it makes sense to have it as part of man-pages, rather than the keyutils package.

Michael Kerrisk

Various reworking and additions

signal-safety.7

Michael Kerrisk

New page created by migrating the signal-safety discussion from signal(7). Along the way some more details got added.

Michael Kerrisk [KASAKI Motohiro]

Note async-signal-safety problems caused by pthread_atfork()

See https://bugzilla.kernel.org/show_bug.cgi?id=25292

Michael Kerrisk [KASAKI Motohiro]

Note glibc deviations from POSIX requirements

See https://bugzilla.kernel.org/show_bug.cgi?id=25292

thread-keyring.7

Michael Kerrisk

New page (written by David Howells) adopted from keyutils

Since this page documents kernel-user-space interfaces, it makes sense to have it as part of man-pages, rather than the keyutils package.

Michael Kerrisk

Various rewordings and additions

user-keyring.7

Michael Kerrisk

New page (written by David Howells) adopted from keyutils

Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.

Michael Kerrisk

Various reworking and improvements

user-session-keyring.7

Michael Kerrisk

New page (written by David Howells) adopted from keyutils

Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.

Michael Kerrisk

Various rewordings and additions

Newly documented interfaces in existing pages

bzero.3

Michael Kerrisk

Document `explicit_bzero()` (new in glibc 2.25)
Also, reword the description of `bzero` somewhat.

proc.5

Michael Kerrisk

Document `/proc/sys/vm/user_reserve_kbytes`

Michael Kerrisk

Document `/proc/sys/vm/admin_reserve_kbytes`

Michael Kerrisk

Document `/proc/sys/fs/mount-max`

Michael Kerrisk

Document `/proc/PID/status` 'NoNewPrivs' field

New and changed links

explicit_bzero.3

Michael Kerrisk

New link to `bzero.3`

Changes to individual pages

chmod.2

Michael Kerrisk

ERRORS: add EPERM error for immutable/append-only file

chown.2

Michael Kerrisk

ERRORS: add EPERM error for immutable/append-only file

chroot.2

Michael Kerrisk

SEE ALSO: add switch_root(8)

clock_getres.2

Michael Kerrisk

Note POSIX.1 requirements re relative time services and CLOCK_REALTIME

clone.2

Michael Kerrisk

clone() does not execute fork handlers

execve.2

Michael Kerrisk

Rework text describing when effective IDs aren't transformed by execve()

Michael Kerrisk

File capabilities can be ignored for the same reasons as set-UID/set-GID

Michael Kerrisk

The 'no_new_privs' bit inhibits transformations of the effective IDs

fork.2

Michael Kerrisk

cgroup PIDs controller may also be trigger for EAGAIN error

fsync.2

Michael Kerrisk

SEE ALSO: add posix_fadvise(2)

getrandom.2

Michael Kerrisk

Remove getentropy(3) details and defer to new getentropy(3) page

Michael Kerrisk

Starting with glibc 2.25, getrandom() is now declared in <sys/random.h>

Michael Kerrisk

glibc support was added in version 2.25

getrlimit.2

Michael Kerrisk

Document role of RLIMIT_NOFILE for FD passing over UNIX sockets

getxattr.2

listxattr.2

Andreas Gruenbacher

Document E2BIG errors

inotify_add_watch.2

Michael Kerrisk

Note "inode" as a synonym for "filesystem object"

Consistent with clarifications just made in inotify(7).

ioctl.2

Michael Kerrisk

SEE ALSO: add ioctl_ns(2), ioctl_iflags(2)

ioctl_fat.2

Brian Masney

Correctly reference volume ID instead of volume label

kcmp.2

Michael Kerrisk

Mention the clone(2) flags relating to various kcmp() 'type' values

Michael Kerrisk

KCMP_FILE: note reasons why FDs may refer to same open file description

link.2

Michael Kerrisk

When using linkat() AT_EMPTY_PATH, 'olddirfd' must not be a directory

Michael Kerrisk

ERRORS: add EPERM for immutable/append-only files

Michael Kerrisk

Note limits where EMLINK is encountered on ext4 and Btrfs

listxattr.2

Michael Kerrisk

Eliminate extra E2BIG error text

Andreas' patch added a second description of E2BIG that

was (mostly) more detailed than the existing text. Combine

the two texts.

lseek.2

Michael Kerrisk

O_APPEND overrides the effect of lseek() when doing file writes

Michael Kerrisk

Remove ancient info about whence values and return values on old systems

Michael Kerrisk

Remove slightly bogus advice about race conditions

The page already (by now) contains a reference to open(2)

for a discussion of open file descriptions. Leave it at that,

since the reader can then deduce how things work.

madvise.2

Michael Kerrisk

Note that `madvise()` is generally about improving performance

mbind.2

Krzysztof Kulakowski [Michael Kerrisk]

Update `MPOL_BIND` description

The behavior of `MPOL_BIND` changed in Linux 2.6.26.

mincore.2

Michael Kerrisk

SEE ALSO: `add_madvise(2)`, `posix_fadvise(2)`, `posix_madvise(3)`

mlock.2

Michael Kerrisk

Note pre-4.9 bug in `RLIMIT_MEMLOCK` accounting for overlapping locks

Michael Kerrisk

SEE ALSO: `add_mincore(2)`

mmap.2

Michael Kerrisk

`mincore(2)` can be used to discover which pages of a mapping are resident

mount.2

Michael Kerrisk [Rob Landley]

Refer to `mount_namespaces(7)` for details of default propagation type

nanosleep.2

Michael Kerrisk

Describe "creeping sleep" problem

`nanosleep()` has a problem if used in a program that catches signals and those signals are delivered at a very high rate.

Describe the problem, and note that `clock_nanosleep(2)` provides a solution.

Michael Kerrisk

BUGS: explicitly note that the Linux 2.4 bug was fixed in Linux 2.6

open.2

Michael Kerrisk

Make it clear that `O_APPEND` implies atomicity

Michael Kerrisk

Clarify distinction between file creation flags and file status flags

Michael Kerrisk

Note ambiguity of `ELOOP` error when using `O_NOFOLLOW`

Michael Kerrisk

Restructure `O_NOFOLLOW` text for easier parsing

Michael Kerrisk

Clarify that O_NOFOLLOW is now in POSIX

poll.2

select.2

Nicolas Biscos

Add a reference to the sigset discussion in sigprocmask(2)

A little while back, I added a note to sigprocmask.2 that discussed the difference between the libc's and the kernel's sigset_t structures. I added that note, because I saw this being done wrong in a tool tracing system calls (causing subtle bugs). As it turns out, the same bugs existed for ppoll and pselect, for the same reason. I'm hoping by adding the reference here, future writers of similar tools will find that discussion and not make the same mistake.

posix_fadvise.2

Michael Kerrisk

Mention /proc/sys/vm/drop_caches

It may be helpful for the reader of this page to know about /proc/sys/vm/drop_caches.

Michael Kerrisk

Reorganize some text

Details for various flags were hidden under NOTES. Move them to DESCRIPTION, to make the details more obvious.

Michael Kerrisk

One can use open(2) + mmap(2) + mincore(2) as a 'fincore'

Note that open(2) + mmap(2) + mincore(2) can be used to get a view of which pages of a file are currently cached.

Michael Kerrisk [Maik Zumstrull]

Note that POSIX_FADV_DONTNEED *may* try to write back dirty pages

Michael Kerrisk

SEE ALSO: mincore(2)

prctl.2

Michael Kerrisk

Clarify that the ambient capability set is per-thread

Keno Fischer

Be more precise in what causes dumpable to reset

Michael Kerrisk

The no_new_privs setting is per-thread (not per-process)

Michael Kerrisk

Mention /proc/PID/status 'NoNewPrivs' field

Michael Kerrisk

Add reference to seccomp(2) in discussion of PR_SET_NO_NEW_PRIVS

ptrace.2

Omar Sandoval

Clarify description of PTRACE_O_EXITKILL

read.2

Michael Kerrisk [Kai NODA]

Rework text in DESCRIPTION that talks about limits for 'count'

See https://bugzilla.kernel.org/show_bug.cgi?id=86061

Michael Kerrisk [Steven Luo]

Remove crufty text about EINTR and partial read

Remove bogus text saying that POSIX permits partial read to return -1/EINTR on interrupt by a signal handler.

That statement already ceased to be true in SUSv1 (1995)!

See https://bugzilla.kernel.org/show_bug.cgi?id=193111

readv.2

Michael Kerrisk

Remove generic advice about mixing stdio and syscalls on same file

There is nothing specific to readv()/writev() about this advice.

recv.2

Michael Kerrisk [Vincent Bernat]

Remove duplicate paragraph

man-pages-1.34 included changes that duplicated an existing paragraph. Remove that duplicate.

Michael Kerrisk

SEE ALSO: add ip(7), ipv6(7), tcp(7), udp(7), unix(7)

remap_file_pages.2

Michael Kerrisk

remap_file_pages() has been replaced by a slower in-kernel emulation

send.2

Michael Kerrisk

SEE ALSO: add ipv6(7), socket(7), unix(7)

setxattr.2

Michael Kerrisk

ERRORS: add EPERM for immutable/append-only files

signalfd.2

Michael Kerrisk

signalfd() doesn't play well with helper programs spawned by libraries

See <https://lwn.net/Articles/415684/>.

Michael Kerrisk

signalfd can't be used to receive synchronously generated signals

Signals such as the SIGSEGV that results from an invalid

memory access can be caught only with a handler.

stat.2

Michael Kerrisk

EXAMPLE: extend program to also show ID of the containing device

Michael Kerrisk

NOTES: mention fstatat() AT_NO_AUTOMOUNT in discussion of automounting

statfs.2

Namhyung Kim

Add more filesystem types

Add missing magic numbers from /usr/include/linux/magic.h

syscall.2

Mike Frysinger

Add endian details with 64-bit splitting

Architectures that split 64-bit values across register pairs usually do so according to their C ABI calling convention (which means endianness). Add some notes to that effect, and change the readahead example to show a little endian example (since that is way more common than big endian).

Also start a new list of syscalls that this issue does not apply to.

Mike Frysinger

Note parisc handling of aligned register pairs

While parisc would normally have the same behavior as ARM/PowerPC, they decide to write shim syscall stubs to unpack/realign rather than expose the padding to userspace.

tkill.2

Jann Horn

Document EAGAIN error for real-time signals

truncate.2

Michael Kerrisk

Note use of ftruncate() for POSIX shared memory objects

unlink.2

Michael Kerrisk

ERRORS: add EPERM error for immutable/read-only files

vfork.2

Michael Kerrisk

Explain why the child should not call exit(3)

Michael Kerrisk

Another reason to use vfork() is to avoid overcommitting memory

Michael Kerrisk

Note some caveats re the use of vfork()

Inspired by Rich Felker's post at <http://ewontfix.com/7/>.

See also https://sourceware.org/bugzilla/show_bug.cgi?id=14749 and

See also https://sourceware.org/bugzilla/show_bug.cgi?id=14750.

Michael Kerrisk

SEE ALSO: `add _exit(2)`

`write.2`

Michael Kerrisk [Kai NODA]

Alert the reader that there is a limit on 'count'

See https://bugzilla.kernel.org/show_bug.cgi?id=86061

`aio_suspend.3`

Michael Kerrisk

Note that the glibc implementation is not async-signal-safe

See https://sourceware.org/bugzilla/show_bug.cgi?id=13172

`backtrace.3`

Michael Kerrisk

`memset.3`

Michael Kerrisk

SEE ALSO: `add bstring(3)`

`exec.3`

Michael Kerrisk

`execl()` and `execle()` were not async-signal-safe before glibc 2.24

`fopen.3`

Michael Kerrisk [Helmut Eller]

Describe `freopen()` behavior for NULL pathname argument

See https://bugzilla.kernel.org/show_bug.cgi?id=191261

Michael Kerrisk

Note the `open(2)` flags that correspond to the 'mode' argument

Michael Kerrisk

Change argument name: 'path' to 'pathname'

For consistency with `open(2)`.

Michael Kerrisk

Add subsection headings for each function

fts.3

Michael Kerrisk

Use better argument name for `fts_children()` and `fts_set()`

Michael Kerrisk

Fix minor error in `FTSENT` structure definition

Michael Kerrisk

Improve explanation of `'fts_errno'`

Michael Kerrisk

Give a hint that there are further fields in the `FTSENT` structure

Michael Kerrisk

Clarify meaning of zero as `'instr'` value for `fts_set()`

ftw.3

Michael Kerrisk

Correctly handle use of stat info for `FTW_NS` in example program

Michael Kerrisk

Clarify that stat buffer is undefined for `FTW_NS`

getline.3

Michael Kerrisk

EXAMPLE: better error handling

Michael Kerrisk [Kent Fredic]

EXAMPLE: handle null bytes in input

Jann Horn

Document `ENOMEM` error case

see the error handling in `libio/iogetdelim.c`

Michael Kerrisk

EXAMPLE: specify file to be opened as command-line argument

Michael Kerrisk

Use better variable name in example program

getmntent.3

Michael Kerrisk [Anders Thulin]

Prefer `\\` as the escape to get a backslash

See https://bugzilla.kernel.org/show_bug.cgi?id=191611

getopt.3

Michael Kerrisk

Reword discussion of error handling and reporting

The existing description was hard to understand. Break it into a bullet list that separates out the details in a manner that is easier to parse.

Michael Kerrisk

Correct details of use of `<stdio.h>` to get `getopt()` declaration

Michael Kerrisk [John Wiersba]

Remove some redundant text

mq_open.3

Michael Kerrisk [Adam Martindale]

Include definition of the 'mq_attr' structure in this man page
Make the reader's life a little easier by saving them from
having to refer to mq_getattr(3).

mq_send.3

Michael Kerrisk [Adam Martindale]

Refer to mq_overview(7) for details on range of message priority

__ppc_set_ppr_med.3

Wainer dos Santos Moschetta

Note need for _ARCH_PWR8 macro

The _ARCH_PWR8 macro must be defined to get the
__ppc_set_ppr_very_low() and __ppc_set_ppr_med_high()
definitions.

printf.3

Michael Kerrisk

Document nonstandard 'Z' modifier

Michael Kerrisk

Document 'q' length modifier

Michael Kerrisk [Erik Roland van der Meer]

Fix a small bug in example code

Move the second call to va_end(ap) to above the if-block that
precedes it, so that the va_list 'ap' will be cleaned up in
all cases.

Michael Kerrisk [Nadav Har'El]

As a nonstandard extension, GNU treats 'll' and 'L' as synonyms

See https://bugzilla.kernel.org/show_bug.cgi?id=190341.

Michael Kerrisk

Add references to setlocale(3) in discussions of locales

Michael Kerrisk

SEE ALSO: remove bogus self reference (dprintf(3))

random.3

Michael Kerrisk

Relocate information of "optimal" value of initState() 'n' argument
The information was a bit hidden in NOTES.

random_r.3

Michael Kerrisk [Jan Ziak]

'buf.state' must be initialized to NULL before calling initState_r()

See https://bugzilla.kernel.org/show_bug.cgi?id=192801.

Michael Kerrisk

Add some usage notes for setstate_r()

Michael Kerrisk

Note that 'buf' records a pointer to 'statebuf'

See https://sourceware.org/bugzilla/show_bug.cgi?id=3662.

Michael Kerrisk

Add BUGS section pointing out the weirdness of the `initstate_r()` API

resolver.3

Michael Kerrisk

`RES_AAONLY`, `RES_PRIMARY`, `RES_NOCHECKNAME`, `RES_KEEPTSIG` are deprecated

These options were never implemented; since glibc 2.25, they are deprecated.

Michael Kerrisk

The `RES_NOIP6DOTINT` is removed in glibc 2.25

Michael Kerrisk

Note that `RES_BLAZT` was unimplemented and is now deprecated

Michael Kerrisk

`RES_USE_INET6` is deprecated since glibc 2.25

Michael Kerrisk

`RES_USEBSTRING` was removed in glibc 2.25

resolver.3

resolv.conf.5

Michael Kerrisk

Note that `RES_USEBSTRING` defaults to off

scandir.3

Michael Kerrisk [Ian Jackson]

Fix errors in example program

See <http://bugs.debian.org/848231>.

Michael Kerrisk

Improve logic of the example program

scanf.3

Michael Kerrisk

Document the quote (') modifier for decimal conversions

sem_post.3

setjmp.3

Michael Kerrisk

SEE ALSO: `add signal-safety(7)`

sem_wait.3

Michael Kerrisk [Fabjan Sukalia]

Remove statement that `SA_RESTART` does not cause restarting

This has not been true since Linux 2.6.22. The description of `EINTR` maintains a reference to `signal(7)`, which explains the historical details.

See https://bugzilla.kernel.org/show_bug.cgi?id=192071

sleep.3

Michael Kerrisk [Mike Frysiner]

Note that sleep() is implemented via nanosleep(2)

See https://bugzilla.kernel.org/show_bug.cgi?id=73371.

Michael Kerrisk [Mike Frysinger]

Note that sleep() sleeps for a real-time number of seconds

See https://bugzilla.kernel.org/show_bug.cgi?id=73371.

Michael Kerrisk

Convert BUGS text to "Portability notes" subsection

The existing text is not a bug, as such.

Michael Kerrisk

DESCRIPTION: minor reworking

strerror.3

Heinrich Schuchardt

Indicate reasonable buffer size for strerror_r() and strerror_l()

Add a hint which buffer size is needed for
strerror_r() and strerror_l().

strverscmp.3

Michael Kerrisk [Vivencio Pagliari]

Fix comparison error in example program

system.3

Michael Kerrisk

In the glibc implementation, fork handlers are not executed by system()

random.4

Michael Kerrisk [Jon Jensen]

Note that entropy_avail will be a number in the range 0..4096

core.5

Michael Kerrisk

Clarify that dumping program's initial CWD is root directory

Michael Kerrisk

The target of core dump piping can also be a script

filesystems.5

Michael Kerrisk

SEE ALSO: add btrfs(5), nfs(5), tmpfs(5)

intro.5

Michael Kerrisk

Document the reality that by now Section 5 also covers filesystems

There are by now, from various filesystem projects, various
pages in Section 5 that document different filesystems.

Change intro(5) to reflect that.

Documented after following: <http://bugs.debian.org/847998>

proc.5

Mike Frysinger [Michael Kerrisk]

Clarify /proc/pid/environ behavior

/proc/pid/environ reflects process environment at

start of program execution; it is set at time of `execve(2)`

Michael Kerrisk

Add reference to `slabinfo(5)` in discussion of /proc/meminfo 'Slab' field

Michael Kerrisk

Add entries for "keys" files that refer reader to `keyrings(7)`

Michael Kerrisk

Remove duplicate /proc/[pid]/seccomp entry

Michael Kerrisk

Mention other system calls that create 'anon_inode' file descriptors

Mention a few other system calls that create file descriptors

that display an 'anon_inode' symlink in /proc/PID/fd

Michael Kerrisk

Add some detail on `overcommit_memory` value 1

Michael Kerrisk

Add reference to `vdso(7)` in discussion of /proc/PID/maps

resolv.conf.5

Michael Kerrisk

`ip6-bytestring` was removed in glibc 2.25

Michael Kerrisk

The `ipc-dotint` and `no-ip6-dotint` options were removed in glibc 2.25

Michael Kerrisk

The 'inet6' option is deprecated since glibc 2.25

slabinfo.5

Michael Kerrisk

SEE ALSO: add `slabtop(1)`

capabilities.7

Michael Kerrisk [Casey Schaufler]

Add subsection with notes to kernel developers

Provide some notes to kernel developers considering how to choose

which capability should govern a new kernel feature.

Michael Kerrisk

Further enhance the recommendation against new uses of `CAP_SYS_ADMIN`

Michael Kerrisk

Explicitly point from `CAP_SYS_ADMIN` to "Notes for kernel developers"

Michael Kerrisk

Add another case for `CAP_DAC_READ_SEARCH`

Michael Kerrisk

Refer to `execve(2)` for the reasons that file capabilities may be ignored

Michael Kerrisk

Document a new use of CAP_SYS_RESOURCE

Michael Kerrisk

Add some more operations governed by CAP_SYS_ADMIN

Michael Kerrisk

Adjust references to chattr(1) to point to ioctl_iflags(2)

environ.7

Michael Kerrisk

Mention prctl(2) PR_SET_MM_ENV_START and PR_SET_MM_ENV_END operations

inotify.7

Michael Kerrisk

Point out that inotify monitoring is inode based

ip.7

Michael Kerrisk

SEE ALSO: add ip(8)

man.7

uri.7

Jakub Wilk

Use "www.kernel.org" in example URLs

Apparently www.kernelnotes.org is now a spam site.

mount_namespaces.7

Michael Kerrisk [Rob Landley]

Rework the discussion of defaults for mount propagation types

Add rather more detail. In particular, note the cases where the default propagation type is MS_PRIVATE vs MS_SHARED.

namespaces.7

Michael Kerrisk

EXAMPLE: fix an error in shell session

Michael Kerrisk

EXAMPLE: rename the example program

Use a more generic name, since this program may be expanded in various ways in the future.

Michael Kerrisk

SEE ALSO: add ip-netns(8)

Michael Kerrisk

Remove content split out into ioctl_ns(2)

netlink.7

Michael Kerrisk

NETLINK_IP6_FW went away in Linux 3.5

Michael Kerrisk

NETLINK_W1 went away in Linux 2.6.18

Michael Kerrisk

Add NETLINK_SCSITRANSPORT to list

Michael Kerrisk

Add NETLINK_RDMA to list

Michael Kerrisk

NETLINK_FIREWALL was removed in Linux 3.5

Michael Kerrisk

NETLINK_NFLOG was removed in Linux 3.17

Jakub Wilk

Update libnl homepage URL

The original URL is 404.

pid_namespaces.7

user_namespaces.7

Michael Kerrisk

Adjust references to namespaces(7) to ioctl_ns(2)

pid_namespaces.7

Keno Fischer

CLONE_SIGHAND|CLONE_VM|CLONE_NEWPID is no longer disallowed

pipe.7

Michael Kerrisk

Since Linux 4.9, pipe-max-size is ceiling for the default pipe capacity

Michael Kerrisk

Clarify that default pipe capacity is 16 pages

The statement that the default pipe capacity is 65536 bytes is accurate only on systems where the page size is 4096B.

See the use of PIPE_DEF_BUFFERS in the kernel source.

random.7

Michael Kerrisk

Mention getentropy(3)

Michael Kerrisk

SEE ALSO: add getentropy(3)

Michael Kerrisk

SEE ALSO: add getauxval(3)

A small hint to the reader that some random bytes arrive in the auxiliary vector.

signal.7

Michael Kerrisk

SIGSYS: add reference to seccomp(2)

Michael Kerrisk

Change description of SIGSYS to "Bad system call"

This is the more typical definition.

Michael Kerrisk

SIGPIPE: add reference to pipe(7)

Michael Kerrisk

SIGXFSZ: add reference to setrlimit(2)

Michael Kerrisk

Add a name for SIGEMT

Michael Kerrisk

SIGXCPU: add reference to setrlimit(2)

Michael Kerrisk

Migrated signal-safety discussion to new signal-safety(7) page

unix.7

Michael Kerrisk [Sergey Polovko]

Since Linux 3.4, UNIX domain sockets support MSG_TRUNC

This was correctly noted in recv(2), but the unix(7) page

was not correspondingly updated for the Linux 3.4 change.

Michael Kerrisk [Willy Tarreau]

Document ETOOMANYREFS for SCM_RIGHTS send exceeding RLIMIT_NOFILE limit

user_namespaces.7

Michael Kerrisk

Change page cross reference: keyctl(2) ==> keyrings(7)

ld.so.8

Michael Kerrisk

LD_BIND_NOT has effect only for function symbols

Michael Kerrisk

Describe use of LD_DEBUG with LD_BIND_NOT

Michael Kerrisk

In secure mode, LD_AUDIT restricts the libraries that it will load

Michael Kerrisk

LD_AUDIT understands \$ORIGIN, \$LIB, and \$PLATFORM

==== Changes in man-pages-4.11 =====

Released: 2017-05-03, Baden, Switzerland

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Alexander Alemayhu <alexander@alemayhu.com>

Zack Weinberg <zackw@panix.com>
<dingguiqiang@foxmail.com>

Apologies if I missed anyone!

New and rewritten pages

ioctl_userfaultfd.2

Michael Kerrisk, Mike Rapoport

New page describing ioctl(2) operations for userfaultfd

statx.2

David Howells, Michael Kerrisk [Andreas Dilger]

New page describing statx(2) system call added in Linux 4.11

userfaultfd.2

Mike Rapoport, Michael Kerrisk [Andrea Arcangeli]
New page describing userfaultfd(2) system call.

pthread_atfork.3

Michael Kerrisk
New page describing pthread_atfork(3)

slabinfo.5

Michael Kerrisk
Rewrite to try to bring the content close to current reality
There's still gaps to fill in, but the existing page
was in any case hugely out of date.

inode.7

Michael Kerrisk
New page with information about inodes
David Howells provided a statx(2) page that duplicated much of
the information from stat(2). Avoid such duplication
by moving the common information in stat(2) and statx(2)
to a new page.

Renamed pages

ioctl_console.2

Michael Kerrisk
Renamed from console_ioctl.4
Most ioctl() man pages are in section 2, so move this one there
for consistency.

Michael Kerrisk
Note type of 'argp' for a various operations
For some commands, there was no clear statement about the type
of the 'argp' argument.

ioctl_tty.2

Michael Kerrisk
Renamed from tty_ioctl(4)
All other ioctl(2) pages are in section 2. Make this
page consistent.

Michael Kerrisk
Packet mode state change events give POLLPRI events for poll(2)

Newly documented interfaces in existing pages

ioctl_ns.2

Michael Kerrisk

Document the NS_GET_NSTYPE operation added in Linux 4.11

Michael Kerrisk

Document the NS_GET_OWNER_UID operation added in Linux 4.11

proc.5

Michael Kerrisk

Document /proc/sys/kernel/sched_child_runs_first

namespaces.7

Michael Kerrisk

Document the /proc/sys/user/* files added in Linux 4.9

socket.7

Francois Saint-Jacques, Michael Kerrisk

Document SO_INCOMING_CPU

New and changed links

console_ioctl.4

Michael Kerrisk

Link for old name of ioctl_console(2) page

tty_ioctl.4

Michael Kerrisk

Link for old name of ioctl_tty(2) page

Global changes

Various pages

Michael Kerrisk

Change page cross-references from tty_ioctl(4) to ioctl_tty(2)

Michael Kerrisk

Change page cross-references for console_ioctl(4) to ioctl_console(2)

Changes to individual pages

alarm.2

Michael Kerrisk

SEE ALSO: add timer_create(2) and timerfd_create(2)

chmod.2

fsync.2

mkdir.2

mknod.2

open.2

truncate.2

umask.2

utime.2

utimensat.2

Michael Kerrisk

Add/replace references to inode(7)

clone.2

Michael Kerrisk

CLONE_NEWCGROUP by an unprivileged process also causes an EPERM error

clone.2

unshare.2

Michael Kerrisk

Exceeding one of the limits in /proc/sys/user/* can cause ENOSPC

Michael Kerrisk

CLONE_NEWPID yields ENOSPC if nesting limit of PID namespaces is reached

Michael Kerrisk

Exceeding the maximum nested user namespace limit now gives ENOSPC

Formerly, if the limit of 32 nested user namespaces was exceeded, the error EUSERS resulted. Starting with Linux 4.9, the error is ENOSPC.

epoll_ctl.2

Michael Kerrisk

Defer to poll(2) for an explanation of EPOLLIN

Michael Kerrisk [Nicolas Biscos]

EPOLLERR is also set on write end of a pipe when the read end is closed

Michael Kerrisk [Nicolas Biscos]

Give the reader a clue that the 'events' field can be zero

'events' specified as zero still allows EPOLLHUP and EPOLLERR to be reported.

_exit.2

Michael Kerrisk

On exit, child processes may be inherited by a "subreaper"

It is no longer necessarily true that orphaned processes are inherited by PID 1.

Michael Kerrisk

Only the least significant byte of exit status is passed to the parent

fcntl.2

Michael Kerrisk

Mention memfd_create() in the discussion of file seals

Give the reader a clue about what kinds of objects can be employed with file seals.

Michael Kerrisk

File seals are not generally applicable to tmpfs(5) files

As far as I can see, file seals can be applied only to memfd_create(2) file descriptors. This was checked by experiment and by reading mm/shmem.c::shmem_get_inode(), where one finds the following line that applies to all new shmem files:

```
info->seals = F_SEAL_SEAL;
```

Only in the code of the memfd_create() system call is this setting reversed (in mm/shmem.c::memfd_create):

```
if (flags & MFD_ALLOW_SEALING)
    info->seals &= ~F_SEAL_SEAL;
```

fork.2

Michael Kerrisk

SEE ALSO: add pthread_atfork(3)

getdents.2

open.2

stat.2

statx.2

Michael Kerrisk

SEE ALSO: add inode(7)

getdtablesize.2

attr.5

Alexander Miller

Move .so directive to first line

Improves compatibility with the man and other dumb tools that process man page files.

getpid.2

Michael Kerrisk

Mention init(1) and "subreapers" in discussion of parent PID

ioctl_list.2

Cyril Hrubis [Arnd Bergmann]

BLKRASET/BLKRASET take unsigned long

ioctl_ns.2

Michael Kerrisk

ERRORS: document ENOTTY

kexec_load.2

sched_setaffinity.2

bootparam.7

Michael Kerrisk

Documentation/kernel-parameters.txt is now in Documentation/admin-guide/

lseek.2

Michael Kerrisk

SEE ALSO: add fallocate(2)

Both of these pages discuss file holes.

mincore.2

Michael Kerrisk

SEE ALSO: add fincore(1)

mmap.2

Michael Kerrisk

Remove ancient reference to flags that appear on some other systems

MAP_AUTOGROW, MAP_AUTORES RV, MAP_COPY, and MAP_LOCAL may have appeared on some systems many years ago, but the discussion here mentions no details and the systems and flags probably ceased to be relevant long ago. So, remove this text.

Michael Kerrisk

SEE ALSO: add userfaultfd(2)

open.2

Michael Kerrisk

Add statx() to list of "at" calls in rationale discussion

poll.2

Michael Kerrisk

Expand discussion of POLLPRI

Michael Kerrisk [Nicolas Biscos]

POLLERR is also set on write end of a pipe when the read end is closed

posix_fadvise.2

Michael Kerrisk

SEE ALSO: add fincore(1)

prctl.2

Mike Frysinger

PR_SET_MM: Refine CONFIG_CHECKPOINT_RESTORE requirement

The Linux 3.10 release dropped the c/r requirement and opened it up to all users.

Mike Frysinger

PR_SET_MM: Document new PR_SET_MM_MAP{,_SIZE} helpers

Mike Frysinger

PR_SET_MM: Document arg4/arg5 zero behavior

The kernel will immediately reject calls where arg4/arg5 are not

zero. See kernel/sys.c:prctl_set_mm().

Michael Kerrisk

Explain rationale for use of subreaper processes

Michael Kerrisk

Note semantics of child_subreaper setting on fork() and exec()

Michael Kerrisk

Improve description of PR_SET_CHILD_SUBREAPER

rename.2

Michael Kerrisk [Georg Sauthoff]

Note that there is no glibc wrapper for renameat2()

sched_setaffinity.2

Michael Kerrisk

SEE ALSO: add get_nprocs(3)

select.2

Michael Kerrisk [Matthew Wilcox, Carlos O'Donnell]

Linux select() is buggy wrt POSIX in its check for EBADF errors

Michael Kerrisk

Show correspondence between select() and poll() readiness notifications

Michael Kerrisk

Give a hint that sets must be reinitialized if using select() in a loop

Michael Kerrisk

Refer to POLLPRI in poll(2) for info on exceptional conditions

Michael Kerrisk

Move mislocated text describing the self-pipe text from BUGS to NOTES

sigaction.2

Michael Kerrisk

Show the prototype of an SA_SIGINFO signal handler

signalfd.2

Michael Kerrisk

SIGKILL and SIGSTOP are silently ignored in 'mask'

sigprocmask.2

Dmitry V. Levin

Do not specify an exact value of rt_sigprocmask's 4th argument

As sizeof(kernel_sigset_t) is not the same for all architectures,
it would be better not to mention any numbers as its value.

Michael Kerrisk

'set' and 'oldset' can both be NULL

sigwaitinfo.2

Michael Kerrisk

sigwaitinfo() can't be used to accept synchronous signals

socketcall.2

Mike Frysinger

Document call argument

stat.2

Michael Kerrisk

Remove information migrated to inode(7) page

Michael Kerrisk

Restructure field descriptions as a hanging list

Michael Kerrisk

Remove "Other systems" subsection

These details about other systems were added in 1999,
and were probably of limited use then, and even less today.

However, they do clutter the page, so remove them.

Michael Kerrisk

DESCRIPTION: add list entries for 'st_uid' and 'st_gid'

Michael Kerrisk

Add some subsection headings to ease readability

David Howells

ERRORS: correct description of ENOENT

Michael Kerrisk

Give 'struct stat' argument a more meaningful name ('statbuf')

Marcin Iusarz

Tweak description of AT_EMPTY_PATH

Currently it says when dirfd is AT_FDCWD it can be something
other than directory, which doesn't make much sense. Just swap
the order of sentences.

Michael Kerrisk

Add slightly expanded description of 'st_ino' field

Michael Kerrisk

DESCRIPTION: add a list entry for 'st_ino'

Michael Kerrisk

DESCRIPTION: add a list entry for 'st_nlinks' field

syscalls.2

Michael Kerrisk

Add membarrier(2)

Michael Kerrisk

Fix kernel version for userfaultfd(2)

Michael Kerrisk

Linux 4.11 added statx()

Michael Kerrisk

Include deprecated getunwind(2) in list

wait.2

Michael Kerrisk

Orphaned children may be adopted by a "subreaper", rather than PD 1

bzero.3

Michael Kerrisk [Zack Weinberg]

Add correct header file for explicit_bzero()

cfree.3

Michael Kerrisk

cfree() is removed from glibc in version 2.26

exit.3

Michael Kerrisk

Improve discussion of zombie processes

getentropy.3

Nikos Mavrogiannopoulos [Michael Kerrisk, Florian Weimer]

Correct header file

Michael Kerrisk [Frank Theile]

SYNOPSIS: add missing return type for getentropy() declaration

grantpt.3

Michael Kerrisk

Tell a more nuanced story about what grantpt() does or does not do

insque.3

Michael Kerrisk

SEE ALSO: add queue(3)

queue.3

Michael Kerrisk

SEE ALSO: add insque(3)

shm_open.3

Michael Kerrisk

Clarify that POSIX shared memory uses tmpfs(5)

syslog.3

Michael Kerrisk [Ian Abbott, Walter Harms]

Reorganize page text for easier parsing and better readability

Michael Kerrisk

Various rewordings and improvements

Michael Kerrisk

Note default value for 'facility' when calling openlog()

Michael Kerrisk

SEE ALSO: add journalctl(1)

ttyname.3

Dmitry V. Levin

Document ENODEV error code

Christian Brauner

NOTES: warn about a confusing case that may occur with mount namespaces

wcsdup.3

Jan Heberer

RETURN VALUE: fix error in return value description

Return value for failure was accidentally changed from NULL to

-1 in man-pages commit 572acb41c48b6b8e690d50edff367d8b8b01702a.

elf.5

Michael Kerrisk

SEE ALSO: add elfedit(1), nm(1), size(1), strings(1), and strip(1)

nsswitch.conf.5

Florian Weimer

Mention sudoers

It turns out that sudo drops things into nsswitch.conf, too.

proc.5

Michael Kerrisk

Refer to namespaces(7) for discussion of /proc/sys/user/* files

Michael Kerrisk

Simplify /proc/slabinfo entry

Don't repeat (out-of-date) info from slabinfo(5); just defer to that page.

tmpfs.5

Michael Kerrisk

tmpfs supports extended attributes, but not 'user' extended attributes

environ.7

Jakub Wilk

Fix name of function that honors TMPDIR

tempnam() takes the TMPDIR environment variable into account, unlike tmpnam(), which always creates pathnames within /tmp.

hostname.7

Marko Myllynen

Use lower case for hostname example

Marko Myllynen

Use generic names in examples

Marko Myllynen

Describe accepted characters for hostname

inotify.7

Michael Kerrisk [Nicolas Iooss]

Mounting a filesystem on top of a monitored directory causes no event

man-pages.7

Michael Kerrisk

Note preferred approach for 'duplicate' errors

pid_namespaces.7

Michael Kerrisk

The maximum nesting depth for PID namespaces is 32

user_namespaces.7

Stephan Bergmann

Fixes to example

While toying around with the `userns_child_exec` example program on the `user_namespaces(7)` man page, I noticed two things:

* In the EXAMPLE section, we need to mount the new `/proc` before looking at `/proc/$$/status`, otherwise the latter will print information about the outer namespace's PID 1 (i.e., the real init). So the two paragraphs need to be swapped.

* In the program source, make sure to close `pipe_fd[0]` in the child before exec'ing.

pthread.7

Michael Kerrisk

SEE ALSO: add `pthread_rwlockattr_setkind_np(3)`

pty.7

Michael Kerrisk

Mention a couple of other applications of pseudoterminals

sem_overview.7

Michael Kerrisk

SEE ALSO: add `shm_overview(7)`

signal.7

Michael Kerrisk

SEE ALSO: add `sigreturn(2)`

tcp.7

Michael Kerrisk

Note indications for OOB data given by `select(2)` and `poll(2)`

Chema Gonzalez

`tcp_abc` was removed in 3.9

xattr.7

Michael Kerrisk

SEE ALSO: add `ioctl_iflags(2)`

People sometimes confuse `xattrs` and inode flags. Provide a link to the page that describes inode flags to give them a tip.

ld.so.8

Michael Kerrisk

Mention quoting when using "Rpath tokens" in LD_AUDIT and LD_PRELOAD

Michael Kerrisk

Expand description of /etc/ld.so.preload

Michael Kerrisk

Mention ldconfig(8) in discussion of /etc/ld.so.cache

zdump.8

Jakub Wilk

Add OPTIONS section heading

===== Changes in man-pages-4.12 =====

Released: 2017-07-13, London

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Alex Henrie <alexhenrie24@gmail.com>

Andi Kleen <andi-bz@firstfloor.org>

Arjun Shankar <arjun.is@lostca.se>

Apologies if I missed anyone!

New and rewritten pages

ioctl_getfsmap.2

Darrick J. Wong

Document the GETFSMAP ioctl

Document the new GETFSMAP ioctl that returns the physical layout of a
(disk-based) filesystem.

Newly documented interfaces in existing pages

namespaces.7

Kirill Tkhai [Michael Kerrisk]

Document the /proc/[pid]/ns/pid_for_children file

Changes to individual pages

ldd.1

Michael Kerrisk

'objdump -p prog | grep NEEDED' doesn't give quite same info as 'ldd'

chmod.2

Michael Kerrisk

Put fchmod() feature test macro requirements in a more readable format

Michael Kerrisk

Note glibc 2.24 feature test macro requirements changes for fchmod()

chown.2

Michael Kerrisk

When file owner or group is changed, file capabilities are cleared

Michael Kerrisk

Changes to file owner by root also clear set-UID and set-GID bits

clone.2

Michael Kerrisk

Update BUGS to reflect fact that PID caching was removed in glibc 2.25

epoll_wait.2

Michael Kerrisk

Clarify semantics of returned 'data' field

The returned 'data' is the 'data' most recently set via
epoll_ctl().

get_mempolicy.2

Michael Kerrisk [Nadav Har'El, Andi Kleen]

SYNOPSIS: fix return type of get_mempolicy()

See https://bugzilla.kernel.org/show_bug.cgi?id=97051

getpid.2

Carlos O'Donell, Michael Kerrisk

Note that PID caching is removed as of glibc 2.25

Since glibc 2.25 the PID cache is removed.

Rationale given in the release notes:

https://sourceware.org/glibc/wiki/Release/2.25#pid_cache_removal

ioctl.2

Michael Kerrisk

SEE ALSO: add ioctl_getfsmap(2)

ioctl_getfsmap.2

Michael Kerrisk

Fix ordering of sections

Michael Kerrisk

Add VERSIONS section

Michael Kerrisk

ERRORS: order alphabetically

madvise.2

Michael Kerrisk

Remove bogus text re POSIX_MADV_NOREUSE

There is a POSIX_FADV_NOREUSE for posix_fadvise(),
but no POSIX_MADV_NOREUSE for any API in POSIX.

membarrier.2

Michael Kerrisk

Add ENOSYS error for 'nohz_full' CPU setting

mount.2

NeilBrown

Revise description of MS_REMOUNT | MS_BIND

MS_REMOUNT|MS_BIND affects all per-mount-point flag. MS_RDONLY is only special because it, uniquely, is both a per-mount-point flag *and* a per-filesystem flag.

So the sections of per-mount-point flags and MS_REMOUNT can usefully be clarified.

open.2

Michael Kerrisk

Note some further advantages of the *at() APIs

pipe.2

Michael Kerrisk

SEE ALSO: add tee(2) and vmsplice(2)

readv.2

Michael Kerrisk

glibc 2.26 adds library support for preadv2() and pwritev2()

sched_setaffinity.2

Michael Kerrisk

Mention cpuset cgroups as a cause of EINVAL error

seccomp.2

Mike Frysinger

Expand SECCOMP_RET_KILL documentation

sigaction.2

Michael Kerrisk

Note feature test macro requirements for 'si_code' constants

Michael Kerrisk

Add a subheading for the description of 'si_code'

Michael Kerrisk

TRAP_BRANCH and TRAP_HWBKPT are present only on IA64

sigaltstack.2

Michael Kerrisk

Note that specifying SS_ONSTACK in ss.ss_flags decreases portability

In the Illumos source (which presumably mirrors its Solaris ancestry), there is this check in the sigaltstack() implementation:

```
if (ss.ss_flags & ~SS_DISABLE)
    return (set_errno(EINVAL));
```

And in the FreeBSD source we find similar:

```
if ((ss->ss_flags & ~SS_DISABLE) != 0)
    return (EINVAL);
```

Michael Kerrisk

Note buggy addition of `ss.ss_flags==SS_ONSTACK`

Note buggy addition of `ss.ss_flags==SS_ONSTACK` as a synonym for `ss_flags==0`. No other implementation does this, AFAIK.

And it was not needed :-).

Michael Kerrisk

Specifying 'ss' returns the current settings without changing them

Michael Kerrisk

Give 'oss' argument a more meaningful name: 'old_ss'

Michael Kerrisk

Some minor reworking of the text

Michael Kerrisk

ERRORS: update description of EINVAL error

splice.2

tee.2

vmsplice.2

Michael Kerrisk

SEE ALSO: add pipe(7)

splice.2

Michael Kerrisk

ERRORS: split EINVAL error cases

Michael Kerrisk

ERRORS: add EINVAL for case where both descriptors refer to same pipe

timer_create.2

Michael Kerrisk

Document the CONFIG_POSIX_TIMERS option added in Linux 4.10

wait.2

Michael Kerrisk

Note glibc 2.26 changes to feature test macro requirements for waitid()

acosh.3

asinh.3

atanh.3

Alex Henrie

Remove C89 designation.

See https://bugzilla.kernel.org/show_bug.cgi?id=196319

bsd_signal.3

Michael Kerrisk

Note feature test macro requirements changes for glibc 2.26

dl_iterate_phdr.3

Michael Kerrisk

dl_iterate_phdr() shows the order in which objects were loaded
dl_iterate_phdr() tells us not just which objects are
loaded, but also the order in which they are loaded
(the "link-map order"). Since the order is relevant for
understanding symbol resolution, give the reader this clue.

Michael Kerrisk

Expand the code example, and show sample output

Michael Kerrisk

List values for the 'p_type' field

dlsym.3

Michael Kerrisk

_GNU_SOURCE is needed to get RTLD_DEFAULT and RTLD_NEXT definitions

flockfile.3

Michael Kerrisk

Note glibc 2.24 feature test macro requirement changes

fpathconf.3

Michael Kerrisk

Rework RETURN VALUE description to add more detail

Michael Kerrisk

Add an errors section

Michael Kerrisk

Largely rewrite the description of _PC_CHOWN_RESTRICTED

Michael Kerrisk

Rewrite description of _PC_PIPE_BUF

The existing description was not accurate, and lacked details.

ftw.3

Michael Kerrisk

BUGS: document a probable glibc regression in FTW_SLN case

See https://bugzilla.redhat.com/show_bug.cgi?id=1422736

and <http://austingroupbugs.net/view.php?id=1121>.

getaddrinfo.3

Quentin Rameau

Fix _POSIX_C_SOURCE value for getaddrinfo()

The correct _POSIX_C_SOURCE value is 200112L, not 201112L in features.h.

getcontext.3

Carlos O'Donell

Exemplar structure should use 'ucontext_t'.

getgrent.3

Michael Kerrisk

Note glibc 2.22 changes for feature test macro requirements

grantpt.3

ptsname.3

unlockpt.3

Ferdinand Thiessen [Michael Kerrisk]

Update feature test macro-requirements for glibc 2.24

if_nametoindex.3

Douglas Caetano dos Santos

Add ENODEV error for if_nametoindex()

malloc.3

Michael Kerrisk

Document the reallocarray() added in glibc 2.26

nl_langinfo.3

Michael Kerrisk

Note feature test macro requirements for nl_langinfo_l()

posix_madvise.3

Dr. Tobias Quathamer

Remove paragraph about POSIX_FADV_NOREUSE

POSIX_FADV_NOREUSE is documented for posix_fadvise, and a

corresponding POSIX_MADV_NOREUSE flag is not specified by POSIX.

See <https://bugs.debian.org/865699>

ptsname.3

Michael Kerrisk [Arjun Shankar]

Since glibc 2.26, ptsname_r() no longer gives EINVAL for buf==NULL

rand.3

Michael Kerrisk

Note glibc 2.24 feature test macro requirement changes for rand_r()

resolver.3

Michael Kerrisk

Add basic notes on 'op' argument of res_nmkquery() and res_mkquery()

sigpause.3

Michael Kerrisk

Note glibc 2.26 changes to feature test macro requirements

sigwait.3

Michael Kerrisk

Note glibc 2.26 feature test macro changes

strtol.3

Heinrich Schuchardt

Mention 0X prefix

The prefix 0x may be capitalized as 0X.

See ISO/IEC 9899:1999.

sysconf.3

Michael Kerrisk [Pavel Tikhomirov]

Rework RETURN VALUE description to add more detail

Make the discussion clearer, and add a few details.

Also, fix the problem report from Pavel Tikhomirov who noted that the man page falsely said that errno is not changed on a successful return.

Addresses https://bugzilla.kernel.org/show_bug.cgi?id=195955

Michael Kerrisk

Add ERRORS section

ttyslot.3

Michael Kerrisk

Fix error in feature test macro requirements

Michael Kerrisk

Note feature test macro requirements changes in glibc 2.24

Michael Kerrisk

Clarify details of use of <stdlib.h> file

unlocked_stdio.3

Michael Kerrisk

Note glibc 2.24 feature test macro requirement changes

elf.5

Michael Kerrisk

SEE ALSO: add dl_iterate_phdr(3)

nsswitch.conf.5

DJ Delorie

Clarify group merge rules

This minor patch clarifies when merging is not done, and how duplicate entries are merged.

proc.5

Michael Kerrisk

Document that 'iowait' field of /proc/stat is unreliable

Text taken from Chao Fan's kernel commit 9c240d757658a3ae996.

slabinfo.5

Michael Kerrisk [Jorge Nerin]

SEE ALSO: add some references to relevant kernel source files

tmpfs.5

Michael Kerrisk

SEE ALSO: add memfd_create(2), mmap(2), shm_open(3)

capabilities.7

Michael Kerrisk

Clarify the effect on process capabilities when UID 0 does execve(2)

Michael Kerrisk

Note effect on capabilities when a process with UID != 0 does execve(2)

Michael Kerrisk [David Lewis]

Fix reversed descriptions of CAP_MAC_OVERRIDE and CAP_MAC_ADMIN

Michael Kerrisk

SEE ALSO: add filecap(8), netcap(8), pscap(8)

cgroup_namespaces.7

Michael Kerrisk

Add some further explanation of the example shell session

Michael Kerrisk

Fix a bug in shell session example

inode.7

Michael Kerrisk

Note glibc 2.24 feature test macro changes for S_IFSOCK and S_ISSOCK()

man.7

G. Branden Robinson

Undocument "URL" macro in man(7) in favor .UR+.UE

pid_namespaces.7

Michael Kerrisk

Mention /proc/[pid]/ns/pid_for_children

pipe.7

Michael Kerrisk

SEE ALSO: add tee(2) and vmsplice(2)

sigevent.7

Michael Kerrisk

Mention signal.h header file

signal.7

Michael Kerrisk [lilydjwg]

Since Linux 3.8, read(2) on an inotify FD is restartable with SA_RESTART

See https://bugzilla.kernel.org/show_bug.cgi?id=195711

Michael Kerrisk

read() from an inotify FD is no longer interrupted by a stop signal
(Change was in Linux 3.8.)

tcp.7

Michael Kerrisk

Document value '2' for tcp_timestamps

Since Linux 4.10, the value '2' is meaningful for tcp_timestamps

Ruben Kerkhof

Change default value of tcp_frto

The default changed in c96fd3d461fa495400df24be3b3b66f0e0b152f9
(Linux 2.6.24).

ld.so.8

Michael Kerrisk

Greatly expand the explanation of LD_DYNAMIC_WEAK

Carlos O'Donell

Expand DT_RUNPATH details.

ld.so.8: Expand DT_RUNPATH details.

Every 3 years we get asked why DT_RUNPATH doesn't work like DT_RPATH.

The most recent question was here:

<https://www.sourceware.org/ml/libc-help/2017-06/msg00013.html>

We need to expand the description of DT_RUNPATH to cover this situation and explain that the DT_RUNPATH entries apply only to the immediate DT_NEEDED, not that of another, say dlopen'd child object.

Michael Kerrisk

Since glibc 2.2.5, LD_PROFILE is ignored in secure-execution mode

Michael Kerrisk

Make notes on secure-execute mode more prominent

Place each note on secure-execution mode in a separate paragraph, to make it more obvious.

Michael Kerrisk

Note that libraries in standard directories are not normally set-UID

In secure mode, LD_PRELOAD loads only libraries from standard directories that are marked set-UID. Note that it is unusual for a library to be marked in this way.

Michael Kerrisk

SEE ALSO: add elf(5)

Michael Kerrisk

Note version where secure-execution started ignoring LD_USE_LOAD_BIAS

Michael Kerrisk

Correct glibc version that ignores LD_SHOW_AUXV in secure-execution mode

Ignored since 2.3.4 (not 2.3.5).

Michael Kerrisk

Rewrite LD_DEBUG_OUTPUT description and note that .PID is appended

Released: 2017-09-15, Munich

<niya3@mail.ru>

Apologies if I missed anyone!

New and rewritten pages

pthread_mutex_consistent.3

Yubin Ruan, Michael Kerrisk

New page documenting pthread_mutex_consistent(3)

pthread_mutexattr_getpshared.3

Michael Kerrisk

New page for pthread_mutexattr_getpshared(3) and pthread_mutexattr_setpshared(3)

pthread_mutexattr_init.3

Michael Kerrisk

New page for pthread_mutexattr_init(3) and pthread_mutexattr_destroy(3)

pthread_mutexattr_setrobust.3

Yubin Ruan, Michael Kerrisk

New page for pthread_mutexattr_setrobust(3) and pthread_mutexattr_getrobust(3)

sysfs.5

Michael Kerrisk [Mark Wiegaard]

New page documenting the sysfs filesystem

Just a skeleton page so far, but perhaps it will be filled out
over time.

Newly documented interfaces in existing pages

fcntl.2

Jens Axboe, Michael Kerrisk

Describe the set/get write hints commands that are added in Linux 4.13

Document F_GET_RW_HINT, F_SET_RW_HINT, F_GET_FILE_RW_HINT, and
F_SET_FILE_RW_HINT.

ioctl_tty.2

Aleksa Sarai, Michael Kerrisk

Add TIOCGPTPEER documentation

kcmp.2

Cyrill Gorcunov

Add KCMP_EPOLL_TFD description

keyctl.2

Eugene Syromyatnikov

Document the KEYCTL_RESTRICT_KEYRING operation

Eugene Syromyatnikov [Stephan Müller]

Document the ability to provide KDF parameters in KEYCTL_DH_COMPUTE

New and changed links

pthread_mutexattr_destroy.3

Michael Kerrisk

New link to new pthread_mutexattr_init.3 page

pthread_mutexattr_getrobust.3

pthread_mutexattr_getrobust_np.3

pthread_mutexattr_setrobust_np.3

Michael Kerrisk

New links to new pthread_mutexattr_setrobust.3 page

pthread_mutexattr_setpshared.3

Michael Kerrisk

New link to new pthread_mutexattr_getpshared.3 page

Global changes

Various pages

Michael Kerrisk

Use .EX/.EE for EXAMPLE programs

Various pages

Michael Kerrisk

Use consistent markup for code snippets

Change .nf/.fi to .EX/.EE

Various pages

Michael Kerrisk

Use consistent markup for code snippets

The preferred form is

.PP/IP

.in +4n

.EX
<code>
.EE
.in
.PP/.IP

Various pages

Michael Kerrisk

Formatting fix: replace blank lines with .PP/.IP

Blank lines shouldn't generally appear in *roff source (other than in code examples), since they create large vertical spaces between text blocks.

Various pages

Michael Kerrisk [Bjarni Ingi Gislason]

Add a non-breaking space between a number and a unit (prefix)

Based on a patch by Bjarni Ingi Gislason.

Various pages

Michael Kerrisk [Bjarni Ingi Gislason]

Use en-dash for ranges

Based on a patch by Bjarni Ingi Gislason.

A few pages

Michael Kerrisk

Fix misordering of sections

Michael Kerrisk

Fix order of SEE ALSO entries

Changes to individual pages

ldd.1

Michael Kerrisk

Add more detail on ldd security implications, noting glibc 2.27 changes

add_key.2

backtrace.3

syslog.3

Michael Kerrisk

Fix misordered SEE ALSO entries

add_key.2

request_key.2

keyrings.7

Eugene Syromyatnikov

Update Linux documentation pointers

chown.2

Michael Kerrisk

Update kernel version in note on support for grp/nogrp mount options

There has been no change since Linux 2.6.25, so update the kernel version to 4.12.

execve.2

Michael Kerrisk

SEE ALSO: add get_robust_list(2)

getrandom.2

Michael Kerrisk [Fabio Scotoni]

SYNOPSIS: make return type of getrandom() 'ssize_t'

This accords with glibc headers and the Linux kernel source.

getrlimit.2

Thiago Jung Bauermann

Mention unit used by RLIMIT_CORE and RLIMIT_FSIZE

Michael Kerrisk

Note that RLIMIT_AS and RLIMIT_DATA are rounded down to system page size

Michael Kerrisk

Mention unit for RLIMIT_DATA

getrlimit.2

mmap.2

malloc.3

Jonas Grabber

RLIMIT_DATA affects mmap(2) since Linux 4.7

get_robust_list.2

Michael Kerrisk

Detail the operation of robust futex lists

Michael Kerrisk

Since Linux 2.6.28, robust futex lists also have an effect for execve(2)

Michael Kerrisk

Clarify that "thread ID" means "kernel thread ID"

Michael Kerrisk

SEE ALSO: add pthread_mutexattr_setrobust(3)

ioctl_getfsmap.2

Darrick J. Wong

Correct semantics of FMR_OF_LAST flag

ioctl_userfaultfd.2

Mike Rapoport

Document replacement of ENOSPC with ESRCH

Mike Rapoport

Update uffdio_api.features description

There is no requirement that uffdio_api.features must be zero for newer kernels. This field actually defines what features space would like to enable.

io_submit.2

Sage Weil

Acknowledge possibility of short return

Note that the return value may be a value less than 'nr' if not all iocbs were queued at once.

ipc.2

Michael Kerrisk

SEE ALSO: add svipc(7)

keyctl.2

Eugene Syromyatnikov

mention keyctl_dh_compute(3) and keyctl_dh_compute_alloc (3)

These functions have been added in keyutils 1.5.10

Eugene Syromyatnikov

Mention ENOMEM in ERRORS

Eugene Syromyatnikov

Update kernel documentation path reference

move_pages.2

Otto Ebeling [Michael Kerrisk]

Note permission changes that occurred in Linux 4.13

mprotect.2

Michael Kerrisk [Shrikant Giridhar]

Add warning about the use of printf() in the example code

open.2

NeilBrown

Improve O_PATH documentation

- fstatfs is now permitted.

- ioctl isn't, and is worth listing explicitly

- O_PATH allows an automount point to be opened with triggering the mount.

prctl.2

seccomp.2

Eugene Syromyatnikov

Update pointer to in-kernel seccomp documentation

prctl.2

ptrace.2

Eugene Syromyatnikov

Update pointer to in-kernel Yama documentation

prctl.2

Eugene Syromyatnikov

Update pointer to in-kernel no_new_privs flag documentation

readlink.2

Michael Kerrisk [Jason Noakes]

Fix an off-by-one error in example code

seccomp.2

Kees Cook

Clarify SECCOMP_RET_KILL kills tasks not processes

select_tut.2

Michael Kerrisk [Sergey Z.]

Clarify an ambiguity with respect to select() and EAGAIN

See https://bugzilla.kernel.org/show_bug.cgi?id=196345

set_tid_address.2

Elliott Hughes

Note that there's no glibc wrapper for set_tid_address()

socket.2

Michael Kerrisk [Yubin Ruan]

socket() uses the lowest available file descriptor

_syscall.2

Michael Kerrisk

Remove redundant comment from EXAMPLE

A discussion of the nroff source of the manual page isn't very useful...

sysfs.2

Michael Kerrisk

Add a pointer to sysfs(5) to help possibly confused readers

Michael Kerrisk

Make it clearer near the start of the page that sysfs(2) is obsolete

timer_create.2

Michael Kerrisk

Strengthen the warning about use of printf() in the example program

Michael Kerrisk

Update cross reference: signal(7) should be signal-safety(7)

umount.2

NeilBrown

Revise MNT_FORCE description

MNT_FORCE does not allow a busy filesystem to be unmounted. Only MNT_DETACH allows that. MNT_FORCE only tries to abort pending transactions, in the hope that might help unmount not to block,

Also, other filesystems than NFS support MNT_FORCE.

unshare.2

Eugene Syromyatnikov

Update pointer to in-kernel unshare documentation

wait.2

Michael Kerrisk []

POSIX.1-2008 TC1 clarifies treatment of 'si_pid' for waitid() WNOHANG

cmmsg.3

Sukadev Bhattiprolu

Add a scatter/gather buffer to sample code

Michael Kerrisk

Reorganize the text somewhat (no content changes)

crypt.3

Konstantin Shemyak [Michael Kerrisk]

Add description of previously undocumented 'rounds' parameter

Konstantin Shemyak

Encryption isn't done with SHA-xxx, but with a function based on SHA-xxx

Konstantin Shemyak

Clarify that ending of the salt string with '\$' is optional

exit.3

Michael Kerrisk

Mention the prctl(2) PR_SET_PDEATHSIG operation

Michael Kerrisk

SEE ALSO: add get_robust_list(2)

Michael Kerrisk

Add a heading to delimit discussion of signals sent to other processes

exp2.3

Alex Henrie

Remove C89 designation

log1p.3

Alex Henrie

Document fixes to give EDOM or ERANGE on error

matherr.3

Michael Kerrisk

Note that glibc 2.27 removes the 'matherr' mechanism

Michael Kerrisk

Remove crufty feature test macro requirements

pow10.3

Michael Kerrisk

Note that pow10() is now obsolete in favor of exp10()

Also, the pow10() functions are no longer supported by glibc, starting with version 2.27.

sincos.3

Michael Kerrisk

Note that sincos() is intended to be more efficient than sin() + cos()

cciss.4

hpsa.4

Eugene Syromyatnikov [Don Brace, Meelis Roos]

Mention cciss removal in Linux 4.14

During the Linux 4.13 development cycle, the cciss driver has been removed in favor of the hpsa driver, which has been amended with some legacy board support.

initrd.4

proc.5

bootparam.7

Eugene Syromyatnikov

Update pointer to in-kernel initrd documentation

initrd.4

Eugene Syromyatnikov

Update pointer to in-kernel root over NFS documentation

intro.4

Michael Kerrisk

SEE ALSO: add mknod(1) and mknod(2)

host.conf.5

Michael Kerrisk

Add cross-reference to hosts(5)

locale.5

Marko Myllynen

Refer to existing locales for encoding details

Since I don't think it would make sense to try to have different explanation for each glibc version on the locale(5) man page, I'm proposing that we apply the below patch so that we refer to existing locale definition files in general and not spell out the exact format or any certain locale as a definitive guideline.

nologin.5

Michael Kerrisk

Add a sentence explaining why nologin is useful

proc.5

Eugene Syromyatnikov

Document removal of htab-reclaim sysctl file

This PPC-specific sysctl option has been removed in Linux 2.4.9.2, according to historic Linux repository commit log.

Eugene Syromyatnikov

Add description for cpuN lines in /proc/stat

Eugene Syromyatnikov

Add description for softirq line in /proc/stat

Eugene Syromyatnikov

Document removal of timer_stats file

Michael Kerrisk

Note Linux 4.9 changes to privileges for /proc/[pid]/timerslack_ns

Michael Kerrisk

Show command used to mount /proc

Michael Kerrisk

Explicitly note in intro that some /proc files are writable

Eugene Syromyatnikov

Update pointer to in-kernel SysRq documentation

Michael Kerrisk

SEE ALSO: add sysfs(5)

Eugene Syromyatnikov

Update pointer to in-kernel security keys documentation

Benjamin Peterson

Fix path to binfmt_misc docs

Eugene Syromyatnikov

Update pointer to in-kernel MTRR documentation

Eugene Syromyatnikov

Update reference to kernel's crypto API documentation

tzfile.5

Paul Eggert

Sync from tzdb upstream

This makes tzfile.5 a copy of the tzdb version, except that the tzdb version's first line is replaced by man-pages boilerplate.

The new version documents version 3 format, among other things.

Also, it removes the "Summary of the timezone information file format" section, which should no longer be needed due to improvements in the part of the man page.

capabilities.7

Michael Kerrisk

Note semantics for a program that is set-UID-root and has capabilities

Note semantics for a program that is both set-user-ID-root and has file capabilities.

Michael Kerrisk [Dennis Knorr]

Note that a set-UID-root program may have an empty file capability set

cgroups.7

Michael Kerrisk

SEE ALSO: systemd-cgls(1)

cpuset.7

Eugene Syromyatnikov

Update pointer to in-kernel cpusets documentation

keyrings.7

Eugene Syromyatnikov

Document description restriction for logon keys

"logon" type has additional check that enforces colon-separated prefix in key descriptions.

Eugene Syromyatnikov

Add pointers to kernel's documentation

Mostly because of asymmetric-keys.txt, which is outside security/keys for some reason.

man-pages.7

Michael Kerrisk

Expand the guidance on formatting code snippets

netlink.7

David Wilder

Change buffer size in example code about reading netlink message

Michael Kerrisk [Rick Jones]

Add a comment on 8192 buffer size in example code

pthread.7

Michael Kerrisk

SEE ALSO: add pthread_mutexattr_destroy(3) and pthread_mutexattr_init(3)

signal.7

Michael Kerrisk

Since glibc 2.26, SIGUNUSED is no longer defined

tcp.7

Vincent Bernat

tcp_tw_recycle is removed from Linux 4.12

And it is completely broken.

unicode.7

Eugene Syromyatnikov

Update pointer to in-kernel Unicode terminal support documentation

Released: 2017-11-27, Paris

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Apologies if I missed anyone!

New and rewritten pages

pthread_spin_init.3

Michael Kerrisk [Peter Zijlstra, Thomas Gleixner, Zack Weinberg,
Florian Weimer]

New page describing pthread_spin_init(3) and pthread_spin_destroy(3)

pthread_spin_lock.3

Michael Kerrisk [Carlos O'Donnell]

New page describing functions that lock and unlock spin locks

Add a page describing pthread_spin_lock(3), pthread_spin_unlock(3),
and pthread_spin_trylock(3).

smartpqi.4

Don Brace [Michael Kerrisk, G. Branden Robinson]

Document the smartpqi SCSI driver

veth.4

Tomáš Pospíšek, Eric Biederman, Michael Kerrisk

New page documenting veth virtual ethernet devices

Based on a page from Tomáš Pospíšek, with some clean-ups by mtk.

Removed pages

infnan.3:

Michael Kerrisk

This function was in libc4 and libc5, but never part
of glibc. It ceased to be relevant nearly 20 years
ago. Time to remove the man page.

Newly documented interfaces in existing pages

ioctl_userfaultfd.2

userfaultfd.2

Prakash Sangappa [Andrea Arcangeli, Mike Rapoport]

Add description for UFFD_FEATURE_SIGBUS

madvise.2

Rik van Riel [Colm MacCárthaigh, Michael Kerrisk]

Document MADV_WIPEONFORK and MADV_KEEPPONFORK

Michael Kerrisk

Note fork() and execve() semantics for wipe-on-fork setting

membarrier.2

Mathieu Desnoyers

Update membarrier manpage for 4.14

Add documentation for these new membarrier() commands:

MEMBARRIER_CMD_PRIVATE_EXPEDITED

MEMBARRIER_CMD_REGISTER_PRIVATE_EXPEDITED

memfd_create.2

Mike Kravetz

Add description of MFD_HUGETLB (hugetlbf) support
hugetlbf support for memfd_create() was recently merged by Linus
and should be in the Linux 4.14 release. To request hugetlbf
support a new memfd_create() flag (MFD_HUGETLB) was added.

readv.2

Christoph Hellwig

Document RWF_NOWAIT added in Linux 4.14

seccomp.2

Tyler Hicks

Document the SECCOMP_GET_ACTION_AVAIL operation added in Linux 4.14

Tyler Hicks

Document the SECCOMP_FILTER_FLAG_LOG flag added in Linux 4.14

Tyler Hicks

Document the SECCOMP_RET_LOG action added In Linux 4.14

Michael Kerrisk [Kees Cook]

Add description of SECCOMP_RET_KILL_PROCESS

Michael Kerrisk

Add SECCOMP_RET_KILL_THREAD description and rework SECCOMP_RET_KILL text

Michael Kerrisk

Document the seccomp audit logging feature added in Linux 4.14

seccomp.2

proc.5

Tyler Hicks

Document the seccomp /proc interfaces added in Linux 4.14

Document the seccomp /proc interfaces in Linux 4.14:

/proc/sys/kernel/seccomp/actions_avail and

/proc/sys/kernel/seccomp/actions_logged.

sigaltstack.2

Michael Kerrisk [Stas Sergeev]

Document the SS_AUTODISARM flag added in Linux 4.7

proc.5

Michael Kerrisk

Document /proc/locks

Oliver Ebert

Document /proc/kpagecgroup

Oliver Ebert

Add KPF_BALLOON, KPF_ZERO_PAGE, and KPF_IDLE for /proc/kpageflags

pid_namespaces.7

Michael Kerrisk

Document /proc/sys/kernel/ns_last_pid

New and changed links

pthread_spin_destroy.3

Michael Kerrisk

New link to new pthread_spin_init.3 page

pthread_spin_trylock.3

pthread_spin_unlock.3

Michael Kerrisk

New links to new pthread_spin_lock.3 page

Global changes

Various pages

Michael Kerrisk

Consistently use "x86-64", not "x86_64"

When referring to the architecture, consistently use "x86-64", not "x86_64". Hitherto, there was a mixture of usages, with "x86-64" predominant.

Various pages

G. Branden Robinson

Replace incorrect uses of Latin abbreviation "cf.".

People seem to be using "cf." ("conferre"), which means "compare", to mean "see" instead, for which the Latin abbreviation would be "q.v." ("quod vide" -> "which see").

In some cases "cf." might actually be the correct term but it's still not clear what specific aspects of a function/system call one is supposed to be comparing.

Changes to individual pages

capget.2

Michael Kerrisk

Clarify discussion of kernels that have no VFS capability support

clock_getres.2

Michael Kerrisk

clock_gettime() may be implemented in the vDSO

clone.2

Michael Kerrisk

Warn that the clone() wrapper modifies child_stack in the parent

Michael Kerrisk

Rework the discussion of the historical CLONE_PID for clarity

Michael Kerrisk

Add NOTES heading

Michael Kerrisk

Add a reference to new veth(4) page

Michael Kerrisk

Eliminate some redundant phrasing in discussion of "fn()"

Michael Kerrisk

Combine redundant paragraphs describing child_stack==NULL

Michael Kerrisk

Note that child_stack can be NULL when using the raw system call

Michael Kerrisk

Remove a redundant paragraph

connect.2

Michael Kerrisk

Clarify that ECONNREFUSED is for stream sockets

fcntl.2

Michael Kerrisk [Jens Axboe]

Inode read-write hints persist only until the filesystem is unmounted

flock.2

Michael Kerrisk

Move NFS details to a headed subsection

Michael Kerrisk [Petr Uzel]

Placing an exclusive lock over NFS requires the file is open for writing

fork.2

Rik van Riel [Colm MacCárthaigh, Michael Kerrisk]

Document effect of MADV_WIPEONFORK

fork.2

getsid.2

setpgid.2

setsid.2

Ahmad Fatoum

Include <sys/types.h> in SYNOPSIS to obtain declaration of pid_t

fsync.2

Craig Ringer

ERRORS: add ENOSPC

getcpu.2

Michael Kerrisk

getcpu() may have an implementation in the vDSO

getpid.2

Michael Kerrisk

Mention that PID == TGID, and note contrast with TID

Michael Kerrisk

SEE ALSO: add gettid(2)

getrandom.2

Michael Kerrisk [Fabio Scotoni]

ERRORS: add ENOSYS

getrlimit.2

Michael Kerrisk [Scott Vokes]

Make it clear RLIMIT_NPROC is a limit on current number of processes

<https://twitter.com/silentbicycle/status/893849097903505409>

gettid.2

Michael Kerrisk

SEE ALSO: add getpid(2)

gettimeofday.2

Michael Kerrisk

Note that gettimeofday() may be implemented in the vDSO

ioctl_userfaultfd.2

Michael Kerrisk

Rework version information for feature bits

io_submit.2

Goldwyn Rodrigues

Add iocb details to io_submit

Add more information about the iocb structure. Explains the fields of the I/O control block structure which is passed to the io_submit() call.

Michael Kerrisk

Add cross-reference to io_getevents(2)

Michael Kerrisk

Cross reference pwritev(2) in discussion of RWF_SYNC and RWF_DSYNC

membarrier.2

Mathieu Desnoyers

Update example to take TSO into account

The existing example given specifically states that it focus on x86 (TSO memory model), but gives a read-read vs write-write ordering example, even though this scenario does not require explicit barriers on TSO.

So either we change the example architecture to a weakly-ordered architecture, or we change the example to a scenario requiring barriers on x86.

Let's stay on x86, but provide a Dekker as example instead.

Mathieu Desnoyers

Adapt the MEMBARRIER_CMD_SHARED return value documentation to reflect that it now returns -EINVAL when issued on a system configured for nohz_full.

memfd_create.2

Michael Kerrisk

Note the limit for size of 'name'

mkdir.2

Michael Kerrisk [Raghavendra D Prabhu]

ERRORS: document EINVAL error for invalid filename

mmap.2

Michael Kerrisk

Add explicit text noting that 'length' must be greater than 0
Currently, this detail is hidden in ERRORS. Make it clear in the main text.

Michael Kerrisk

SEE ALSO: add ftruncate(2)

mremap.2

Mike Kravetz [Florian Weimer, Jann Horn]

Add description of old_size == 0 functionality
Since at least the 2.6 time frame, mremap() would create a new mapping of the same pages if 'old_size == 0'. It would also leave the original mapping. This was used to create a 'duplicate mapping'.

A recent change was made to mremap() so that an attempt to create a duplicate a private mapping will fail.

Michael Kerrisk [Michal Hocko, Mike Kravetz]

BUGS: describe older behavior for old_size==0 on private mappings
Explain the older behavior, and why it changed. This is a follow-up to Mike Kravetz's patch documenting the behavior for old_size==0 with shared mappings.

Michael Kerrisk

Reformat EINVAL errors as a list

open.2

Michael Kerrisk

By contrast with O_RDONLY, no file permissions are required for O_PATH

Note one of the significant advantages of O_PATH: many of the operations applied to O_PATH file descriptors don't require read permission, so there's no reason why the open() itself should require read permission.

Michael Kerrisk

Note use of O_PATH to provide O_EXEC functionality

Michael Kerrisk

Mention O_PATH file descriptor use with fexecve(3)

Michael Kerrisk

ERRORS: document EINVAL error for invalid filename

Michael Kerrisk

Clarify that O_TMPFILE creates a *regular* file

Michael Kerrisk

Make it explicit that O_CREAT creates a regular file

Michael Kerrisk

Since glibc 2.26, the open() wrapper always uses the openat() syscall

Michael Kerrisk

Change pathname used in discussion of rationale for openat()

/path/to/file is a little confusing as a pathname

Michael Kerrisk

Make the purpose of open() a little clearer at the start of the page

open_by_handle_at.2

NeilBrown

Clarifications needed due to NFS reexport

NeilBrown [Lennart Poettering]

Clarify MAX_HANDLE_SZ

As hinted in the kernel source, MAX_HANDLE_SZ is a hint rather than a promise.

pipe.2

Michael Kerrisk [Marin H.]

Since Linux 4.5, fcntl() can be used to set O_DIRECT for a pipe

See https://bugzilla.kernel.org/show_bug.cgi?id=197917

pivot_root.2

Michael Kerrisk

SEE ALSO: add switch_root(8)

pkey_alloc.2

Breno Leitao

Fix argument order

Currently pkey_alloc() syscall has two arguments, and the very first argument is still not supported and should be set to zero.

The second argument is the one that should specify the page access rights.

ptrace.2

Michael Kerrisk

SEE ALSO: add ltrace(1)

reboot.2

Michael Kerrisk [Micha Zegan]

Fix bogus description of reboot() from non-initial PID namespace

The current text was confused (mea culpa). No signal is sent to the init() process. Rather, depending on the 'cmd' given to reboot(), the 'group_exit_code' value will set to either SIGHUP or SIGINT, with the effect that one of those signals is reported to wait() in the parent process.

See https://bugzilla.kernel.org/show_bug.cgi?id=195899

Michael Kerrisk

SEE ALSO: remove reboot(8) (synonym for halt(8)); add shutdown(8)

Michael Kerrisk

SEE ALSO: add systemctl(1), systemd(1)

recvmsg.2

sendmsg.2

Elliot Hughes

Type fixes in SYNOPSIS

[mtk: The raw system calls use "unsigned int", but the glibc wrappers have "int" for the 'flags' argument.]

sched_setaffinity.2

Michael Kerrisk

SEE ALSO: add numactl(8)

sched_yield.2

Michael Kerrisk [Peter Zijlstra]

sched_yield() is intended for use with real-time scheduling policies

seccomp.2

Michael Kerrisk [Adhemerval Zanella, Florian Weimer, Kees Cook]

Add some Caveats regarding the use of seccomp filters

Michael Kerrisk

Document the "default" filter return action

The kernel defaults to either SECCOMP_RET_KILL_PROCESS or SECCOMP_RET_KILL_THREAD for unrecognized filter return action values.

Michael Kerrisk [Kees Cook]

Change SECCOMP_RET_ACTION to SECCOMP_RET_ACTION_FULL

In Linux 4.14, the action component of the return value switched from being 15 bits to being 16 bits. A new macro, SECCOMP_RET_ACTION_FULL, that masks the 16 bits was added, to replace the older SECCOMP_RET_ACTION.

Michael Kerrisk

Explicitly note that other threads survive SECCOMP_RET_KILL_THREAD

Michael Kerrisk

SEE ALSO: add strace(1)

send.2

Grégory Vander Schueren

Add EALREADY to ERRORS

setns.2

Michael Kerrisk

SEE ALSO: add nsenter(1)

shmop.2

Yubin Ruan

Note that return value of shmat() is page-aligned

sigaction.2

Michael Kerrisk

Rework discussion of SA_SIGINFO handler arguments

Expand and rework the text a little, in particular adding a reference to sigreturn(2) as a source of further information about the ucontext argument.

Michael Kerrisk

Mention that libc sets the act.sa_restorer field

sigaltstack.2

Michael Kerrisk [Walter Harms]

Reword BUGS text to be a little clearer

Michael Kerrisk

Add explicit error handling to example code

Michael Kerrisk

Add use of sigaction() to example code

sigreturn.2

Michael Kerrisk

Make it a little clearer that a stack frame is created by the kernel

Michael Kerrisk

glibc has a simple wrapper for sigreturn() that returns ENOSYS

splice.2

Michael Kerrisk

Since Linux 2.6.31, 'fd_in' and 'fd_out' may both refer to pipes

stat.2

Michael Kerrisk [Richard Knutsson]

Use lstat() instead of stat()

It's more logical to use lstat() in the example code, since one can then experiment with symbolic links, and

also the S_IFLNK case can also occur.

NeilBrown

Correct AT_NO_AUTOMOUNT text and general revisions

Expand on the relationship between fstatat() and the other three functions, and improve the description of AT_NO_AUTOMOUNT. Specifically, both stat() and lstat() act the same way with respect to automounts, and that behavior matches fstatat() with the AT_NO_AUTOMOUNT flag.

stats.2

Michael Kerrisk

Add some comments noting filesystems that are no longer current

Michael Kerrisk

Add comments describing a few filesystem types

time.2

Michael Kerrisk

Note that time() may be implemented in the vDSO

Michael Kerrisk [Victor Porton]

Language fix-up: clarify that "tasks" means "work"

See https://bugzilla.kernel.org/show_bug.cgi?id=197183

userfaultfd.2

Mike Rapoport

BUGS: document spurious UFFD_EVENT_FORK

write.2

fsync.2

close.2

NeilBrown [Jeff Layton]

Update description of error codes

Since 4.13, errors from writeback are more reliably reported to all file descriptors that might be relevant.

Add notes to this effect, and also add detail about ENOSPC and EDQUOT which can be delayed in a similar many to EIO - for NFS in particular.

abort.3

Michael Kerrisk

Starting with glibc 2.27, abort() does not attempt to flush streams

Michael Kerrisk

SEE ALSO: add assert(3)

backtrace_symbols_fd(3)

Stefan Puiu [Walter Harms]

backtrace_symbols_fd() can trigger a call to malloc()

daemon.3

Michael Kerrisk

SEE ALSO: add daemon(7), logrotate(8)

errno.3

Michael Kerrisk

Note use of errno(1) to look up error names and numbers

Michael Kerrisk

Update error list for POSIX.1-2008

POSIX.1-2008 specified a couple of new errors not present in POSIX.1-2001.

Michael Kerrisk [Walter Harms]

Note the use of perror(3) and strerror(3)

Michael Kerrisk

Recast the advice against manually declaring 'errno'

Recast the advice against manually declaring 'errno' to a more modern perspective. It's 13 years since the original text was added, and even then it was describing old behavior.

Cast the description to be about behavior further away in time, and note more clearly that manual declaration will cause problems with modern C libraries.

Michael Kerrisk

Add some missing errors

Michael Kerrisk

Error numbers are positive values (rather than nonzero values)

POSIX.1-2008 noted the explicitly the change (to align with the C standards) that error numbers are positive, rather than nonzero.

Michael Kerrisk

Reorganize the text and add some subheadings

Restructure the text and add some subheadings for better readability. No (intentional) content changes.

Michael Kerrisk [Wesley Apteekar-Cassels]

Note that error numbers vary somewhat across architectures

Added after a patch from Wesley Apteekar-Cassels that proposed to add error numbers to the text.

Michael Kerrisk

Note the <errno.h> also provides the symbolic error names

Michael Kerrisk [Walter Harms]

Explicitly note that error numbers vary also across UNIX systems

exec.3

Michael Kerrisk

glibc 2.24 dropped CWD from the default path

Document the glibc 2.24 change that dropped CWD from the default search path employed by execlp(), execvp() and execvpe() when PATH is not defined.

fexecve.3

Michael Kerrisk

O_PATH file descriptors are also usable with fexecve()

Cristian Rodríguez

fexecve() is now implemented with execveat(2), where available

Michael Kerrisk

Add some detail on the glibc implementation of fexecve() via execveat(2)

ffs.3

Michael Kerrisk

glibc 2.27 relaxes the FTM requirements for ffs() and ffsll()

get_nprocs_conf.3

Michael Kerrisk

SEE ALSO: add nproc(1)

lround.3

Michael Kerrisk [David Eckardt]

Clarify that lround() rounds "halfway cases" away from zero

See https://bugzilla.kernel.org/show_bug.cgi?id=194601

makedev.3

Adrian Bunk

glibc has deprecated exposing the definitions via <sys/types.h>

mallinfo.3

Jakub Wilk

Fix the example

Remove reference to non-standard "tspi_hdr.h" and replace calls to functions that were declared in this header.

malloc.3

Michael Kerrisk

SEE ALSO: add valgrind(1)

popen.3

Michael Kerrisk

Add a cross reference to Caveats in system(3)

All of the same risks regarding system() also apply to popen().

pthread_detach.3

Michael Kerrisk [Rahul Bedarkar]

Improve sentence describing freeing of resources on process termination

As reported by Rahul, the existing sentence could be read as meaning that resources of joined and terminated detached threads are freed only at process termination. Eliminate that possible misreading.

pthread_yield.3

Michael Kerrisk [Peter Zijlstra]

pthread_yield() is intended for use with real-time scheduling policies

setlocale.3

Michael Kerrisk [Kištof Želechovski]

The standards do not specify all of the locale categories

socketmark.3

Seonghun Lim

Fix cruft in code example

stdio.3

Michael Kerrisk

Use proper section cross references in function list

Michael Kerrisk

Remove crufty reference to pc(1)

sysconf.3

Michael Kerrisk

Mention get_nprocs_conf(3)

Mention get_nprocs_conf(3) in discussion of _SC_NPROCESSORS_CONF and _SC_NPROCESSORS_ONLN.

system.3

Michael Kerrisk [Bastien Roucaries]

Create a "Caveats" subsection to hold warnings about the use of system()

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=882222>

Michael Kerrisk [Bastien Roucaries]

Mention PATH explicitly in discussion of system() and set-UID programs

Michael Kerrisk [Bastien Roucaries]

Note that user input for system() should be carefully sanitized

Michael Kerrisk

Mention file capabilities in discussion of privileged programs

Michael Kerrisk

Correctly note which shell Debian uses as (noninteractive) /bin/sh

core.5

Michael Kerrisk

Add some notes on systemd and core dumps

Michael Kerrisk

Dumps are not produced if core_pattern is empty and core_uses_pid is 0

Michael Kerrisk [Per Böhlin]

RLIMIT_CORE is not enforced when piping core dump to a program

Michael Kerrisk

SEE ALSO: add systemd-coredump(8)

Michael Kerrisk

SEE ALSO: add coredumpctl(1)

filesystems.5

Michael Kerrisk [Jonny Grant]

Replace crufty URL reference for 'smb' with up-to-date URL

Michael Kerrisk [Jonny Grant]

Refer to VFAT as an extended FAT (not DOS) filesystem

proc.5

Michael Kerrisk [Miklos Szered, Ram Pai]

Correct the description of the parent mount ID for /proc/PID/mountinfo

Oliver Ebert

Add mmap-exclusive bit for /proc/[pid]/pagemap

Marcus Folkesson

Update description of /proc/<pid>/oom_score

Lucas Werkmeister

Clarify permissions in /proc/[pid]/fd/

Michael Kerrisk

Add reference to pid_namespaces(7) for /proc/sys/kernel/ns_last_pid

shells.5

Michael Kerrisk

SEE ALSO: add pam_shells(8)

sysfs.5

Michael Kerrisk

Add a brief explanation of /sys/kernel

Michael Kerrisk

Add a brief description of /sys/class/net

Michael Kerrisk

Add a brief description of /sys/kernel/mm

Michael Kerrisk

Add brief description of /sys/kernel/debug/tracing

Michael Kerrisk

Add a description of /sys/kernel/mm/hugepages

arp.7

Michael Kerrisk

SEE ALSO: add arpd(8)

capabilities.7

Michael Kerrisk

Add a reference to xattr(7) in the discussion of extended attributes

Michael Kerrisk

SEE ALSO: add captest(8)

epoll.7

Michael Kerrisk

Note existence of kcmp() KCMP_EPOLL_TFD operation

fifo.7

Michael Kerrisk

Refer reader to pipe(7) for details of I/O semantics of FIFOs

hier.7

Michael Kerrisk

SEE ALSO: add file-hierarchy(7)

icmp.7

Michael Kerrisk

SEE ALSO: add rdisc(8)

man-pages.7

Michael Kerrisk

Note that "x86-64" is generally preferred over "x86_64"

G. Branden Robinson

Add a use case for real minus character

namespaces.7

Michael Kerrisk

Add a reference to new veth(4) page

Michael Kerrisk

EXAMPLE: refer also to example in clone(2)

pid_namespaces.7

Michael Kerrisk

SEE ALSO: add reboot(2)

Add because reboot(2) has special semantics for non-initial

PID namespaces.

pthread.7

Michael Kerrisk

SEE ALSO: add pthread_spin_init(3) and pthread_spin_lock(3)

socket.7

Michael Kerrisk [Petr Malat, Tobias Klausmann]

Correct the description of SO_RXQ_OVFL

standards.7

Michael Kerrisk

SEE ALSO: add getconf(1), confstr(3), pathconf(3), sysconf(3)

user_namespaces.7

Christian Brauner [Michael Kerrisk]

Document new 340 line idmap limit

ld.so.8

Michael Kerrisk [Yubin Ruan]

Simplify language around conferring capabilities

The statement "conferring permitted or effective capabilities" to the process is somewhat redundant. Binaries with capabilities confer capabilities only to those process capability sets, so it's simpler to just say "confers capabilities to the process".

===== Changes in man-pages-4.15 =====

Released: 2018-02-02, Palo Alto

New and rewritten pages

s390_sthyi.2

QingFeng Hao [Michael Kerrisk]

New page for s390-specific s390_sthyi(2)

network_namespaces.7

Michael Kerrisk

New page describing network namespaces

Based on content moved from namespaces(7)

vsock.7

Stefan Hajnoczi [Jorgen Hansen, Michael Kerrisk]

Document the VSOCK socket address family

Newly documented interfaces in existing pages

cgroups.7

Michael Kerrisk [Tejun Heo]

Document cgroups v2 "thread mode"

Michael Kerrisk [Tejun Heo]

Document cgroup v2 delegation via the 'nsdelegate' mount option

Michael Kerrisk

Document the cgroup.max.depth and cgroup.max.descendants files

Michael Kerrisk

Document 'release_agent' mount option

Michael Kerrisk [Roman Gushchin]

Document /sys/kernel/cgroup/delegate

Michael Kerrisk [Roman Gushchin]

Document /sys/kernel/cgroup/features

Michael Kerrisk [Roman Gushchin]

Document cgroups v2 cgroup.stat file

Global changes

Various pages

G. Branden Robinson

Standardize on "nonzero"

Also add this term to the style guide in man-pages(7).

Changes to individual pages

bpf.2

Nikolay Borisov

Sync list of supported map types with 4.14 kernel

copy_file_range.2

Michael Kerrisk

Library support was added in glibc 2.27

Shawn Landden

glibc provides a user-space emulation where the system call is absent

Florian Weimer

EFBIG errors are possible, similar to write(2)

Michael Kerrisk

ERRORS: add EISDIR

Michael Kerrisk

Order ERRORS alphabetically

Michael Kerrisk

Add comment to code example explaining use of syscall(2)

fcntl.2

read.2

write.2

NeilBrown

Document "Lost locks" as cause for EIO.

If an advisory lock is lost, then read/write requests on any affected file descriptor can return EIO - for NFSv4 at least.

memfd_create.2

Michael Kerrisk

glibc support for memfd_create() was added in version 2.27

mlock.2

Michael Kerrisk

Make details for MLOCK_ONFAULT a little more explicit

Michael Kerrisk

glibc support for mlock2() is added in version 2.27

mmap.2

John Hubbard [Michael Hocko]

MAP_FIXED is no longer discouraged

MAP_FIXED has been widely used for a very long time, yet the man page still claims that "the use of this option is discouraged".

John Hubbard

MAP_FIXED updated documentation

-- Expand the documentation to discuss the hazards in enough detail to allow avoiding them.

-- Mention the upcoming MAP_FIXED_SAFE flag.

-- Enhance the alignment requirement slightly.

mount.2

Keno Fischer [Michael Kerrisk]

Add EINVAL error condition when MS_BINDING MNT_LOCKED submounts

mprotect.2

pkey_alloc.2

Michael Kerrisk

Glibc support for memory protection keys was added in version 2.27

perf_event_open.2

Michael Kerrisk

SEE ALSO: add perf(1)

pkey_alloc.2

Michael Kerrisk

Clarify description of pkey_alloc() 'flags' argument

prctl.2

Michael Kerrisk

Defer to capabilities(7) for discussion of the "keep capabilities" flag

recvmsg.2

sendmsg.2

Nikola Forró

Point out that error handling is unreliable

seccomp.2

Michael Kerrisk

Clarify that SECCOMP_RET_TRAP SIGSYS signal is thread-directed

syscalls.2

Michael Kerrisk

Add s390-specific s390_sthyi(2) to syscall list

unshare.2

Michael Kerrisk

Clarify that EUSERS occurred only until kernel 4.8

errno.3

Michael Kerrisk

'errno -s' can be used to search for errors by string in description

Michael Kerrisk

Add Linux error text corresponding to ENOMEM

fgetpwent.3

Michael Kerrisk

Add missing ATTRIBUTES preamble

fts.3

Michael Kerrisk [Pradeep Kumar]

fts_pathlen = strlen(fts_path) + strlen(fts_name)

fuse.4

Michael Kerrisk

Places errors in alphabetical order (no content changes)

veth.4

Michael Kerrisk

Add network_namespaces(7)

sysfs.5

Michael Kerrisk

Refer to cgroups(7) for information about files in /sys/kernel/cgroup

capabilities.7

Michael Kerrisk

Note which capability sets are affected by SECBIT_NO_SETUID_FIXUP

Note explicitly that SECBIT_NO_SETUID_FIXUP is relevant for the permitted, effective, and ambient capability sets.

Michael Kerrisk

Deemphasize the ancient prctl(2) PR_SET_KEEPCAPS command

The modern approach is SECBITS_KEEP_CAPS.

Michael Kerrisk

Clarify effect of CAP_SETFCAP

Make it clear that CAP_SETFCAP allows setting arbitrary capabilities on a file.

Michael Kerrisk

Clarify which capability sets are effected by SECBIT_KEEP_CAPS

This flag has relevance only for the process permitted and effective sets.

Michael Kerrisk

Rephrase CAP_SETPCAP description

* Mention kernel versions.

* Place current kernel behavior first

Michael Kerrisk

SECBIT_KEEP_CAPS is ignored if SECBIT_NO_SETUID_FIXUP is set

Michael Kerrisk

Ambient set is also cleared when UIDs are set to nonzero value

cgroups.7

Michael Kerrisk

Add a more complete description of cgroup v1 named hierarchies

Michael Kerrisk

Add a section on unmounting cgroup v1 filesystems

Michael Kerrisk

Add subsection describing cgroups v2 subtree delegation

Michael Kerrisk

Mention ENOENT error that can occur when writing to subtree_control file

Michael Kerrisk

Add list of currently available version 2 controllers

Nikolay Borisov

Add information about RDMA controller

Michael Kerrisk

Rewrite the description of cgroup v2 subtree control

Michael Kerrisk [Tejun Heo]

Note Linux 4.11 changes to cgroup v2 delegation containment rules

Michael Kerrisk

systemd(1) nowadays automatically mounts the cgroup2 filesystem

Michael Kerrisk

Clarify that cgroup.controllers is read-only

Michael Kerrisk

Elaborate a little on problems of splitting threads across cgroups in v1

Michael Kerrisk [Tejun Heo]

Tweak the description of delegation of cgroup.subtree_control

ip.7

Ricardo Biehl Pasquali

INADDR_* values cannot be assigned directly to 's_addr'

Michael Kerrisk

s/INADDR_ANY/INADDR_LOOPBACK/ in discussion of htonl()

INADDR_LOOPBACK is a better example, since it is not byte-order neutral.

namespaces.7

network_namespaces.7

Michael Kerrisk

Move content from namespaces(7) to network_namespaces(7)

pid_namespaces.7

Michael Kerrisk

SEE ALSO: add mount_namespaces(7)

sched.7

Michael Kerrisk [Andrea Parri]

Correctly describe effect of priority changes for RT threads

The placement of a thread in the run queue for its new priority depends on the direction of movement in priority.

(This appears to contradict POSIX, except in the case of pthread_setschedprio().)

user_namespaces.7

Michael Kerrisk

Mention NS_GET_OWNER_UID ioctl() operation

===== Changes in man-pages-4.16 =====

Released: 2018-04-30, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Adam Borowski <kilobyte@angband.pl>
Andy Owen <andrew.owen@dolby.com>
Carlos O'Donnell <carlos@redhat.com>
Carsten Grohmann <carstengrohmann@gmx.de>
Elvira Khabirova <lineprinter@altlinux.org>
Enrique Garcia <cquike@arcor.de>

Martin Mares <mj@ucw.cz>
Mathieu Desnoyers <mathieu.desnoyers@efficios.com>
Mattias Andréé <maandree@kth.se>
Michael Kerrisk <mtk.manpages@gmail.com>
Michal Hocko <mhocko@suse.com>
Mike Frysinger <vapier@gentoo.org>
Nikos Mavrogiannopoulos <nmavrogi@redhat.com>
Robin Kuzmin <kuzmin.robin@gmail.com>
Ross Zwisler <ross.zwisler@linux.intel.com>
Rusty Russell <rusty@rustcorp.com.au>
Serge E. Hallyn <serge@hallyn.com>
Song Liu <songliubraving@fb.com>
Tomi Salminen <tsalminen@forcepoint.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages

membarrier.2

Mathieu Desnoyers [Michael Kerrisk]

Document new membarrier commands introduced in Linux 4.16

Document the following membarrier commands introduced in Linux 4.16:

MEMBARRIER_CMD_GLOBAL_EXPEDITED

(the old enum label MEMBARRIER_CMD_SHARED is now an alias to preserve header backward compatibility)

MEMBARRIER_CMD_REGISTER_GLOBAL_EXPEDITED

MEMBARRIER_CMD_PRIVATE_EXPEDITED_SYNC_CORE

MEMBARRIER_CMD_REGISTER_PRIVATE_EXPEDITED_SYNC_CORE

mmap.2

Jan Kara [Ross Zwisler, Michael Kerrisk]

Add description of MAP_SHARED_VALIDATE and MAP_SYNC

Michal Hocko [John Hubbard, Michael Kerrisk, Jann Horn]

Document new MAP_FIXED_NOREPLACE flag

4.17+ kernels offer a new MAP_FIXED_NOREPLACE flag which allows the caller to atomically probe for a given address range.

readv.2

io_submit.2

Jürg Billeter

Document RWF_APPEND added in Linux 4.16

capabilities.7

Michael Kerrisk

Describe file capability versioning

Michael Kerrisk [Serge E. Hallyn]

Document namespaced-file capabilities

[There's still more work to be done on this new text]

Changes to individual pages

bpf.2

Michael Kerrisk

Update list of architectures that support JITed eBPF

And note kernel version numbers where support is added.

Michael Kerrisk

Kernel 4.15 added CONFIG_BPF_JIT_ALWAYS_ON

This causes the JIT compiler to be always on and forces bpf_jit_enable to 1.

execve.2

Michael Kerrisk

Note that describing execve as "executing a new process" is misleading

This misdescription is so common that it's worth calling it out explicitly.

Michael Kerrisk

More explicitly describe effect of execve() in the opening paragraph

fallocate.2

Michael Kerrisk

Since Linux 4.16, Btrfs supports FALLOC_FL_ZERO_RANGE

getrlimit.2

Michael Kerrisk

CAP_SYS_RESOURCE capability is required in *initial user namespace*

io_submit.2

Michael Kerrisk

Add kernel version numbers for various 'aio_rw_flags' flags

Michael Kerrisk

Place 'aio_rw_flags' in alphabetical order

mmap.2

Jann Horn

MAP_FIXED is okay if the address range has been reserved

Clarify that MAP_FIXED is appropriate if the specified address range has been reserved using an existing mapping, but shouldn't be used otherwise.

Michael Kerrisk

Move the text on MAP_FIXED to NOTES

This text has become rather long, making it somewhat unwieldy in the discussion of the mmap() flags. Therefore, move it to NOTES, with a pointer in DESCRIPTION referring the reader to NOTES.

Michael Kerrisk [Heinrich Schuchardt]

Clarify that when addr==NULL, address chosen by kernel is page-aligned

Michael Kerrisk

Add a little historical detail on the obsolete MAP_DENYWRITE

mount.2

Michael Kerrisk

ERRORS: add EBUSY for the case of trying to stack same mount twice

Michael Kerrisk

Remove a couple of obsolete EBUSY errors

As far as I can tell, these EBUSY errors disappeared with the addition of stackable mounts in Linux 2.4.

msgget.2

semget.2

shmget.2

Michael Kerrisk

The purpose of "flags" == 0 is to obtain ID of an existing IPC object

This was implied in these pages, but the meaning of "flags" == 0

could be more explicit, as indicated by questions such as

<https://stackoverflow.com/questions/49833569/flag-value-of-semget-function>

open.2

Jann Horn

Document more -ETXTBSY conditions

Jakub Wilk

Add missing argument for snprintf() in example code

perf_event_open.2

Song Liu

Add type kprobe and uprobe

Two new types kprobe and uprobe are being added to

perf_event_open(), which allow creating kprobe or

uprobe with perf_event_open. This patch adds

information about these types.

ptrace.2

Jann Horn

Copy retval info for SECCOMP_GET_FILTER to right section

The "RETURN VALUE" section made a claim that was incorrect for

PTRACE_SECCOMP_GET_FILTER. Explicitly describe the behavior of

PTRACE_SECCOMP_GET_FILTER in the "RETURN VALUE" section (as

usual), but leave the now duplicate description in the section

describing PTRACE_SECCOMP_GET_FILTER, since the

PTRACE_SECCOMP_GET_FILTER section would otherwise probably become

harder to understand.

readv.2

Michael Kerrisk

Remove redundant sentence

seccomp.2

Michael Kerrisk

Note that execve() may change syscall numbers during life of process

On a multiarch/multi-ABI platform such as modern x86, each

architecture/ABI (x86-64, x32, i386) has its own syscall numbers,

which means a seccomp() filter may see different syscall numbers

over the life of the process if that process uses execve() to

execute programs that has a different architectures/ABIs.

Michael Kerrisk

Note which architectures support seccomp BPF

Michael Kerrisk

In EXAMPLE, clearly note that x32 syscalls are \geq X32_SYSCALL_BIT

shutdown.2

Carsten Grohmann

SEE ALSO: add close(2)

syscall.2

Adam Borowski

Add riscv

wait.2

Michael Kerrisk [Robin Kuzmin]

wait() and waitpid() block the calling thread (not process)

wait4.2

Michael Kerrisk [Martin Mares]

Soften the warning against the use of wait3()/wait4()

These functions are nonstandard, but there is no replacement.

See https://bugzilla.kernel.org/show_bug.cgi?id=199215

crypt.3

encrypt.3

Carlos O'Donell [Michael Kerrisk]

Add notes about _XOPEN_CRYPT

The distribution may choose not to support _XOPEN_CRYPT in the case that the distribution has transitioned from glibc crypt to libxcrypt.

fseek.3

Michael Kerrisk [Andy Owen]

ERRORS: EBADF should be ESPIPE

Michael Kerrisk

Improve EPIPE error text

getcwd.3

Carlos O'Donell

Mention that "(unreachable)" is no longer returned for glibc \geq 2.27.

makedev.3

Michael Kerrisk

Since glibc 2.28, <sys/types.h> no longer defines these macros

pthread_create.3

Frederic Brault

Note default thread stack size for several architectures

tsearch.3

Jann Horn

Clarify items vs nodes

The manpage claimed that `tsearch()` returns a pointer to a data item. This is incorrect; `tsearch()` returns a pointer to the corresponding tree node, which can also be interpreted as a pointer to a pointer to the data item.

Since this API is quite unintuitive, also add a clarifying sentence.

Jann Horn

`tdelete()` can return dangling pointers

POSIX says that deleting the root node must cause `tdelete()` to return some unspecified non-NULL pointer. Glibc implements it by returning a dangling pointer to the (freed) root node.

Therefore, explicitly note that `tdelete()` may return bad pointers that must not be accessed.

elf.5

Michael Kerrisk

SEE ALSO: add `patchelf(1)`

filesystems.5

Michael Kerrisk

Add an entry for `tmpfs(5)`

group.5

Michael Kerrisk

SEE ALSO: add `vigr(8)`

passwd.5

Michael Kerrisk

SEE ALSO: add `vipw(8)`

sysfs.5

Michael Kerrisk

Add brief note on `/sys/fs/smackfs`

tmpfs.5

Mike Frysinger

Document current mount options

Some of this content is moved from the `mount(8)` man page.

Style was based on `proc(5)` sections.

Michael Kerrisk

Remove reference to `mount(8)` for discussion of mount options

The mount options are now described in this page.

Michael Kerrisk

SEE ALSO: add Documentation/vm/transhuge.txt

Michael Kerrisk

Reformat 'huge' and 'mpol' mount option values as lists

Michael Kerrisk

Describe 'mpol' mount options

Based on text from Documentation/filesystems/tmpfs.txt.

Michael Kerrisk

Document 'huge' mount options

Based on text from Documentation/vm/transhuge.txt.

Michael Kerrisk

SEE ALSO: add set_mempolicy(2)

Michael Kerrisk

Document mpol=local mount option

capabilities.7

Michael Kerrisk

Remove redundant mention of PTRACE_SECCOMP_GET_FILTER

cgroups.7

Michael Kerrisk

cgroup.events transitions generate POLLERR as well as POLLPRI

mount_namespaces.7

Michael Kerrisk

Note another case where shared "peer groups" are formed

namespaces.7

Michael Kerrisk [Konstantin Khlebnikov]

Mention that device ID should also be checked when comparing NS symlinks

When comparing two namespaces symlinks to see if they refer to the same namespace, both the inode number and the device ID should be compared. This point was already made clear in `ioctl_ns(2)`, but was missing from this page.

Michael Kerrisk

Note an idiosyncrasy of `/proc/[pid]/ns/pid_for_children`
`/proc/[pid]/ns/pid_for_children` has a value only after first child is created in PID namespace. Verified by experiment.

network_namespaces.7

Michael Kerrisk

Network namespaces isolate the UNIX domain abstract socket namespace

Michael Kerrisk

Add cross reference to `unix(7)`

For further information on UNIX domain abstract sockets.

posixoptions.7

Carlos O'Donell

Expand XSI Options groups

We define in detail the X/Open System Interfaces i.e. `_XOPEN_UNIX` and all of the X/Open System Interfaces (XSI) Options Groups.

The XSI options groups include encryption, realtime, advanced realtime, realtime threads, advanced realtime threads, tracing, streams, and legacy interfaces.

Michael Kerrisk

Use a more consistent, less cluttered layout for option lists

Michael Kerrisk

Make function lists more consistent and less cluttered

Use more consistent layout for lists of functions, and remove punctuation from the lists to make them less cluttered.

socket.7

Michael Kerrisk [Tomi Salminen]

Fix error in `SO_INCOMING_CPU` code snippet

The last argument is passed by value, not reference.

time.7

Michael Kerrisk [Enrique Garcia]

Mention `clock_gettime()/clock_settime()` rather than `[gs]etimeofday()`

`gettimeofday()` is declared obsolete by POSIX. Mention instead the modern APIs for working with the realtime clock.

See https://bugzilla.kernel.org/show_bug.cgi?id=199049

unix.7

Michael Kerrisk [Rusty Russell]

ERRORS: add `EBADF` for sending closed file descriptor with `SCM_RIGHTS`

vdso.7

Michael Kerrisk

VDSO symbols (system calls) are not visible to `seccomp(2)` filters

xattr.7

Michael Kerrisk

SEE ALSO: add `selinux(8)`

ld.so.8

Mike Frysinger

Make lack of separator escaping explicit

Make it clear that the delimiters in `LD_PRELOAD`, `LD_LIBRARY_PATH`, and `LD_AUDIT` cannot be escaped so people don't try various methods (such as `\:`) to workaroud it.

Michael Kerrisk

Remove unneeded mention of `PATH` in discussion of `LD_LIBRARY_PATH`

This brief sentence doesn't add value to the text.

===== Changes in man-pages-5.00 =====

Released: 2019-03-06, Munich

Apologies if I missed anyone!

New and rewritten pages

s390_guarded_storage.2

Eugene Syromyatnikov

New page documenting s390_guarded_storage(2) s390-specific system call

address_families.7

Michael Kerrisk [Eugene Syromyatnikov]

New page that contains details of socket address families

There is too much detail in socket(2). Move most of it into
a new page instead.

bpf-helpers.7

Michael Kerrisk [Daniel Borkmann, Quentin Monnet]

Add new man page for eBPF helper functions
(autogenerated from kernel source files)

Removed Pages

mdoc.7

mdoc.samples.7

Michael Kerrisk [Ingo Schwarze]

Remove mdoc(7) and mdoc.samples(7)
groff_mdoc(7) from the groff project provides a better
equivalent of mdoc.samples(7) and the 'mandoc' project
provides a better mdoc(7). And nowadays, there are virtually
no pages in "man-pages" that use mdoc markup.

Newly documented interfaces in existing pages

fanotify_init.2

fanotify.7

nixiaoming [Amir Goldstein, Michael Kerrisk]

Document FAN_REPORT_TID
fanotify_init.2: add new flag FAN_REPORT_TID
fanotify.7: update description of member pid in
struct fanotify_event_metadata

Amir Goldstein

Document FAN_MARK_FILESYSTEM

Monitor fanotify events on the entire filesystem.

Matthew Bobrowski [Amir Goldstein]

Document FAN_OPEN_EXEC and FAN_OPEN_EXEC_PERM

io_submit.2

Adam Manzanares

Document IOCB_FLAG_IOPRIO

msgctl.2

semctl.2

shmctl.2

Davidlohr Bueso [Joe Lawrence, Michael Kerrisk]

Document STAT_ANY commands

prctl.2

Konrad Rzeszutek Wilk [Michael Kerrisk]

Document PR_SET_SPECULATION_CTRL and PR_GET_SPECULATION_CTRL

sched_setattr.2

Claudio Scordino [Michael Kerrisk]

Document SCHED_FLAG_DL_OVERRUN and SCHED_FLAG_RECLAIM

socket.2

Tobias Klauser

Document AF_XDP

Document AF_XDP added in Linux 4.18.

inotify.7

Henry Wilson

Document IN_MASK_CREATE

unix.7

Michael Kerrisk

Document SO_PASSSEC

Michael Kerrisk

Document SCM_SECURITY ancillary data

New and changed links

reallocarray.3

Michael Kerrisk

New link to malloc(3)

precedence.7

Josh Triplett

Add as a redirect to operator.7

Global changes

Various pages

Michael Kerrisk [G. Branden Robinson]

Use `\e` rather than `\\` to get a backslash

Various pages

Michael Kerrisk [Bjarni Ingi Gislason, G. Branden Robinson]

Use zerowidth space in appropriate locations

Various pages

Michael Kerrisk

Clarify the distinction between "file descriptor" and "file description"

Various pages

Mike Rapoport

Update paths for in-kernel memory management documentation files

A few pages

Michael Kerrisk

Change references to '2.6.0-test*' series kernels to just '2.6.0'

Changes to individual pages

iconv.1

Marko Myllynen

SEE ALSO: add `uconv(1)`

localedef.1

Howard Johnson

Note that `-f` and `-c`, are reversed from what you might expect

time.1

Michael Kerrisk [Johannes Altmanninger]

Document the `-q/--quiet` option

Jakub Wilk

Update bug reporting address

bpf.2

Tobias Klauser

Update JIT support list for Linux 4.18

JIT support for x86-32 was during the Linux 4.18 release cycle.

Also correct the entry for MIPS (only MIPS64 is supported).

Oded Elisha

Fix bug in example

Quentin Monnet

SEE ALSO: add bpf-helpers(7)

capget.2

Michael Kerrisk

Remove crufty sentence suggesting use of deprecated functions

Remove crufty sentence suggesting use of deprecated capsetp(3) and capgetp(3); the manual page for those functions has long (at least as far back as 2007) noted that they are deprecated.

Michael Kerrisk

Remove first paragraph, which repeats details from capabilities(7)

chroot.2

Michael Kerrisk

Mention /proc/[pid]/root

clock_getres.2

Michael Kerrisk [Jens Thoms Toerring]

CLOCK_MONOTONIC_RAW does not count while the system is suspended

Michael Kerrisk [Jens Thoms Toerring]

On Linux CLOCK_MONOTONIC counts time that the system has run since boot

Michael Kerrisk [Jens Thoms Toerring]

CLOCK_MONOTONIC does not count while the system is suspended

Michael Kerrisk

ERRORS: add EINVAL error for noncanonical clock_settime() value

clone.2

Michael Kerrisk

Rework discussion of threads and signals

The discussion is phrased in terms of signals sent using kill(2), but applies equally to a signal sent by the kernel.

Jann Horn

Pending CLONE_NEWPID prevents thread creation

Michael Kerrisk

Clarify the discussion of threads and signals

And explicitly introduce the terms "process-directed" and "thread-directed" signals.

Eugene Syromyatnikov

Add information about clone and clone2 on IA-64

Michael Kerrisk

ERRORS: EINVAL occurs with CLONE_NEWUSER if !CONFIG_USER_NS

connect.2

Benjamin Peterson

Document error semantics of nonblocking UNIX domain sockets

epoll_ctl.2

Michael Kerrisk

Use the term "interest list" consistently

epoll_wait.2

Michael Kerrisk

Clarify the behavior when `epoll_wait()`-ing on an empty interest list

Michael Kerrisk

Note that `epoll_wait()` round robins through the set of ready descriptors

eventfd.2

Michael Kerrisk

Move text noting that `eventfd()` creates a FD earlier in the page

fcntl.2

Michael Kerrisk

Actual pipe capacity may in practice be less than nominal capacity

The number of bytes that can be written to the pipe may be less (sometimes substantially less) than the nominal capacity.

Eugene Syromyatnikov

Mention that `l_sysid` is not used even if present

Michael Kerrisk

Briefly explain the meaning of the '`l_sysid`' field in '`struct flock`'

futex.2

Benjamin Peterson

Make the example use C11 atomics rather than GCC builtins

getcpu.2

Tobias Klauser [Michael Kerrisk]

`getcpu()` now has a glibc wrapper; remove mention of `syscall(2)`

The glibc wrapper was added in glibc 2.29, release on 1 Feb 2019.

getgid.2

getpid.2

getuid.2

pipe.2

syscall.2

Eugene Syromyatnikov [Michael Kerrisk]

Describe 2nd return value peculiarity

Some architectures (ab)use second return value register for additional return value in some system calls. Let's describe this.

getgroups.2

Michael Kerrisk

Note that a process can drop all groups with: `setgroups(0, NULL)`

getrlimit.2

Eugene Syromyatnikov

Note that setrlimit(RLIMIT_CPU) doesn't fail

Michael Kerrisk

Resource limits are process-wide attributes shared by all threads

This was already noted in pthreads(7), but bears repeating here.

Eugene Syromyatnikov

Correct information about large limits on 32-bit architectures

gettid.2

Michael Kerrisk

Glibc provides a wrapper since version 2.30

gettimeofday.2

Michael Kerrisk

ERRORS: add EINVAL for noncanonical 'tv' argument to gettimeofday()

gettimeofday.2

clock_getres.2

Michael Kerrisk [Jens Thoms Toerring]

ERRORS: EINVAL can occur if new real time is less than monotonic clock

getxattr.2

removexattr.2

setxattr.2

Michael Kerrisk [Andreas Gruenbacher, Enrico Scholz]

ERRORS: replace ENOATTR with ENODATA

See also https://bugzilla.kernel.org/show_bug.cgi?id=201995

inotify_add_watch.2

Paul Millar

Add IN_ONLYDIR based error

Henry Wilson

Note errors that can occur for IN_MASK_CREATE

io_submit.2

Jeff Moyer

Fix the description of aio_data

aio_data is not a kernel-internal field.

madvise.2

Michal Hocko [Niklas Hambüchen]

MADV_FREE clarify swapless behavior

memfd_create.2

Marc-André Lureau

Update hugetlb file-sealing support

Lucas De Marchi

Fix header for memfd_create()

Joseph C. Sible

_GNU_SOURCE is required

mmap.2

Elliott Hughes

Explicitly state that the fd can be closed

Jann Horn [Michal Hocko, William Kucharski]

Fix description of treatment of the hint

The current manpage reads as if the kernel will always pick a free space close to the requested address, but that's not the case.

mount.2

Michael Kerrisk

Clearly distinguish per-mount-point vs per-superblock mount flags

Michael Kerrisk

MS_SILENT is ignored when changing propagation type

Michael Kerrisk

Attempts to change MS_SILENT setting during remount are silently ignored

Michael Kerrisk [Harry Mallon]

Document EROFS for read-only filesystems

See https://bugzilla.kernel.org/show_bug.cgi?id=200649

Michael Kerrisk

Clarify that per-superblock flags are shared during remount

Michael Kerrisk

Remove crufty sentence about MS_BIND + MS_REMOUNT

Michael Kerrisk

Mention /proc/PID/mountinfo

Many people are unaware of the /proc/PID/mountinfo file. Provide a helpful clue here.

Michael Kerrisk

Mandatory locking also now requires CONFIG_MANDATORY_FILE_LOCKING

Michael Kerrisk [Simone Piccardi]

Add MS_STRICTATIME to list of flags that can be used in remount

Michael Kerrisk

EACCES: note some reasons why a filesystem may be read-only

Michael Kerrisk

SEE ALSO: add ioctl_iflags(2)

msgop.2

Michael Kerrisk

Correct the capability description for msgsnd() EACCESS error

nfsservctl.2

Michael Kerrisk

Add VERSIONS section noting that this system call no longer exists

open.2

Lucas Werkmeister

Document ENXIO for sockets

Michael Kerrisk

Clarify a special use case of O_NONBLOCK for devices

Eugene Syromiatnikov

Mention presence of unused O_RSYNC definition

O_RSYNC is defined in <asm/fcntl.h> on HP PA-RISC, but is not used anyway.

Eugene Syromiatnikov

Document FASYNC usage in Linux UAPI headers

Andrew Price

Remove O_DIRECT-related quotation

Remove a section that adds no benefit to the discussion of O_DIRECT.

Michael Kerrisk [Robin Kuzmin]

Clarify that O_NONBLOCK has no effect on poll/epoll/select

perf_event_open.2

Vince Weaver [Wang Nan]

Document the PERF_EVENT_IOC_PAUSE_OUTPUT ioctl

The PERF_EVENT_IOC_PAUSE_OUTPUT ioctl was introduced in Linux 4.7.

Vince Weaver

Fix wording in multiplexing description

Vince Weaver

Clarify exclude_idle

Vince Weaver

Document the PERF_EVENT_IOC_QUERY_BPF ioctl

Vince Weaver

Document the PERF_EVENT_IOC_MODIFY_ATTRIBUTES ioctl

Vince Weaver

Fix prctl behavior description

pivot_root.2

Elvira Khabirova

Explain the initramfs case and point to switch_root(8)

Joseph Sible [Joseph C. Sible]

Document EINVAL if root is rootfs

pkey_alloc.2

Michael Kerrisk [Szabolcs Nagy]

Switch to glibc prototype in SYNOPSIS

poll.2

Michael Kerrisk

Note that poll() and ppoll() are not affected by O_NONBLOCK

posix_fadvise.2

Eugene Syromyatnikov

Describe the difference between `fadvice64/fadvice64_64`

prctl.2

Benjamin Peterson

`PR_SET_MM_EXE_FILE` may now be used as many times as desired

Michael Kerrisk

Add some further historical details on `PR_SET_MM_EXE_FILE`

Michael Kerrisk [Jann Horn]

Explain the circumstances in which the parent-death signal is sent

Michael Kerrisk

Rework the `PR_SET_PDEATHSIG` description a little, for easier readability

Michael Kerrisk

Add additional info on `PR_SET_PDEATHSIG`

The signal is process directed and the `siginfo_t->si_pid` field contains the PID of the terminating parent.

Michael Kerrisk

Note `libcap(3)` APIs for operating on ambient capability set
(However, the `libcap` APIs do not yet seem to have manual pages...)

Michael Kerrisk

Mention `libcap` APIs for operating on capability bounding set

ptrace.2

Dmitry V. Levin

Do not say that `PTRACE_O_TRACESYSGOOD` may not work

Jann Horn

BUGS: `ptrace()` may set `errno` to zero

readdir.2

Eugene Syromyatnikov

Fix struct `old_linux_dirent` in accordance with current definition

readv.2

Xiao Yang [Florian Weimer]

Fix wrong `errno` for an unknown flag

rename.2

Michael Kerrisk

`glibc 2.28` adds library support for `renameat2()`

Tobias Klauser

Add feature test macro for `renameat2()`

The `glibc` wrapper for `renameat2()` was added in `glibc 2.28` and requires `_GNU_SOURCE`.

Eugene Syromyatnikov

Some additional notes regarding `RENAME_WHITEOUT`

Lucas Werkmeister [Michael Kerrisk]

Add kernel versions for `RENAME_NOREPLACE` support

Michael Kerrisk

Rework list of supported filesystems for RENAME_NOREPLACE

Tobias Klauser

renameat2() now has a libc wrapper; remove mention of syscall(2)

s390_runtime_instr.2

Eugene Syromyatnikov

Add a note about runtime_instr.h availability

s390_sthyi.2

Eugene Syromyatnikov [Heiko Carstens]

Some minor additions

sched_setattr.2

Michael Kerrisk

Add a bit more detail for SCHED_DEADLINE

sched_setparam.2

Michael Kerrisk

Clarify that scheduling parameters are per-thread (not per-process)

seccomp.2

Michael Kerrisk

(Briefly) document SECCOMP_FILTER_FLAG_SPEC_ALLOW

Michael Kerrisk

SEE ALSO: add bpfc(1)

select.2

Michael Kerrisk

BUGS: the use of value-result arguments is a design bug

Michael Kerrisk [Robin Kuzmin]

Note that select() and pselect() are not affected by O_NONBLOCK

select_tut.2

Michael Kerrisk [Antonio Chirizzi]

Diagnose inet_aton() errors with simple fprintf() (not perror())

setgid.2

Michael Kerrisk

Clarify EPERM capability requirements with respect to user namespaces

setns.2

Michael Kerrisk

When joining a user namespace, it must be a descendant user namespace

Michael Kerrisk

Note capability requirements for changing PID namespace

Note capability requirements for changing network, IPC, or UTS namespace

Note capability requirements for changing cgroup namespace

Michael Kerrisk

Some text restructuring and reordering

set_thread_area.2

Eugene Syromyatnikov

Mention related prctl() requests in SEE ALSO

Eugene Syromyatnikov

Mention that get_thread_area() is also Linux-specific

Eugene Syromyatnikov

Describe set_thread_area()/get_thread_area() on m68k/MIPS

setuid.2

Michael Kerrisk

Clarify EPERM capability requirements with respect to user namespaces

sigaction.2

Eugene Syromyatnikov [Michael Kerrisk]

Describe obsolete usage of struct sigcontext as signal handler argument

sigsuspend.2

Michael Kerrisk

Clarify that sigsuspend() suspends the calling *thread*

socket.2

Michael Kerrisk

Remove references to external docs

This information is all in the new address_families(7)

Michael Kerrisk

Add cross reference to address_families(7)

Eugene Syromyatnikov

Reinstate AF_VSOCK mention

Michael Kerrisk

Simplify list of address families

Remove many of the details that are in address_families(7)

Nikola Forró

Remove notes concerning AF_ALG and AF_XDP

All address families are now documented in address_families.7.

Michael Kerrisk

Remove some more obscure protocols from address family list

The list of address families in this page is still
overwhelmingly long. So let's shorten it.

The removed entries are all in address_families(7).

Michael Kerrisk

Remove a few obsolete protocols

Documentation for these remains in address_families(7)

socketpair.2

Eugene Syromyatnikov

Note that AF_TIPC also supports socketpair(2)

Introduced by Linux commit v4.12-rc1~64^3~304^2~1.

stat.2

Michael Kerrisk [Alessandro Vesely]

ERRORS: ENOENT can occur where a path component is a dangling symlink

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=909789>

Benjamin Peterson

SEE ALSO: add statx(2)

statx.2

Tobias Klauser [Michael Kerrisk]

statx() now has a glibc wrapper; remove mention of syscall(2)

syscall.2

Eugene Syromyatnikov [Michael Kerrisk]

Elaborate x32 ABI specifics

snyh

Fix wrong retval register number in alpha architecture

Helge Deller

parisc needs care with syscall parameters

Michael Kerrisk

Rework table to render within 80 columns

syscalls.2

Eugene Syromyatnikov

Change example of a thin syscall wrapper to chdir()

As truncate(3) should dispatch between truncate/truncate64,
as noted later in the page.

Eugene Syromyatnikov [Michael Kerrisk]

Update syscall table

Added: arc_gettls, arc_settls, arc_usr_cmpxchg, arch_prctl,
atomic_barrier, atomic_cmpxchg_32, bfin_spinlock, breakpoint,
clone2, cmpxchg, cmpxchg_badaddr, dma_memcpy, execv, get_tls,
getdomainname, getdtablesize, gethostname, getxgid, getxpid,
getxuid, metag_get_tls, metag_set_fpu_flags, metag_set_tls,
metag_set_global_bit, newfstatat, old_adjtimex, oldumount,
or1k_atomic, pread, pwrite, riscv_flush_icache,
sched_get_affinity, sched_set_affinity, set_tls, setaltroot,
sethae, setpggrp, spill, sram_alloc, sram_free, swapcontext,
switch_endian, sys_debug_setcontext, syscall, sysmips, timerfd,
usr26, usr32, xtensa.

Uncommented: memory_ordering

Renamed: ppc_rtas to rtas (__NR_rtas), ppc_swapcontext to
swapcontext (__NR_swapcontext).

Eugene Syromyatnikov

Note about s390x and old_mmap

Michael Kerrisk

Add s390_guarded_storage(2)

Michael Kerrisk

Update syscall list for Linux 4.18

Eugene Syromyatnikov

Note that not all architectures return errno negated

Helge Deller

parisc Linux does not any longer emulate HP-UX

Michael Kerrisk

Comment out details of a few system calls that only ever briefly existed

unshare.2

Michael Kerrisk [Shawn Landden]

Same EINVAL errors as for clone(2) can also occur with unshare(2)

Tycho Andersen

Note EINVAL when unsharing pid ns twice

The kernel doesn't allow unsharing a pid NS if it has previously been unshared.

ustat.2

Michael Kerrisk

Starting with version 2.28, glibc no longer provides a wrapper function

vmsplice.2

Andrei Vagin

Note that vmsplice can splice pages from pipe to memory

wait.2

Michael Kerrisk

Add some cross references to core(5)

write.2

Michael Kerrisk [Nadav Har'El]

RETURN VALUE: clarify details of partial write and

https://bugzilla.kernel.org/show_bug.cgi?id=197961

Goldwyn Rodrigues

Add details on partial direct I/O writes

alloca.3

Michael Kerrisk [Robin Kuzmin]

Prevent any misunderstanding about when allocated memory is released

bsd_signal.3

Xiao Yang

Fix the wrong version of _POSIX_C_SOURCE

bstring.3

Michael Kerrisk [Emil Fihlman]

Correct argument list for memmem() prototype

msg.3

Michael Kerrisk

Explain zero-initialization requirement for MSG_NXTHDR()

Michael Kerrisk

Remove out of place mention of MSG_CTRUNC

This detail is covered in recvmsg(2), and now also in unix(7).

Michael Kerrisk

Note that MSG_FIRSTHDR can return NULL

Michael Kerrisk

Remove unnecessary 'fdptr' intermediate variable in example code

des_crypt.3

encrypt.3

Michael Kerrisk

The functions described in these pages are removed in glibc 2.28

dlsym.3

Michael Kerrisk

Describe a case where a symbol value may be NULL

errno.3

Michael Kerrisk [Robert P. J. Day]

Mention that errno(1) is part of the 'moreutils' package

exec.3

Michael Kerrisk [Eugene Syromyatnikov]

Note that SPARC provides an execv() system call

exit.3

Mike Frysinger

Note wider sysexits.h availability

ferror.3

Elliot Hughes

Warn about closing the result of fileno()

fnmatch.3

Elliott Hughes

Clarify "shell wildcard pattern"

getaddrinfo.3

Michael Kerrisk [Eric Sanchis]

Fix off-by-one error in example client program

getcwd.3

Michael Kerrisk

Rework text on use of `getcwd()` system call

Make it clear that all of the library functions described on this page will use the `getcwd()` system call if it is present.

Michael Kerrisk

Add details on the `getcwd()` syscall and how it used by libc functions

Michael Kerrisk

Reorder the text describing "(unreachable)" being returned by `getcwd()`

`getmntent.3`

Elliot Hughes

Clarify that `endmntent()` should be used rather than `fclose()`

`isatty.3`

Michael Kerrisk [Jakub Wilk]

Most non-tty files nowadays result in the error `ENOTTY`

Historically, at least FIFOs and pipes yielded the error `EINVAL`.

`lockf.3`

Ian Turner

ERRORS: add `EINTR`

`malloc.3`

Michael Kerrisk

Add reference to glibc MallocInternals wiki

Michael Kerrisk

Note that `calloc()` detects overflow when multiplying its arguments

Michael Kerrisk

Since glibc 2.29, `reallocarray()` is exposed by defining `_DEFAULT_SOURCE`

Info gleaned from glibc NEWS file.

`pthread_attr_init.3`

Michael Kerrisk [Göran Häggsjö, Jakub Wilk]

Use correct `printf()` specifier for "size_t" in example program

`pthread_rwlockattr_setkind_np.3`

Carlos O'Donell

Remove bug notes

`pthread_setname_np.3`

Jakub Wilk

Explain `_np` suffix

Add text to CONFORMING TO explaining that the "`_np`" suffix is because these functions are non-portable.

`putenv.3`

Michael Kerrisk

Note a glibc extension: `putenv("NAME")` removes an environment variable

resolver.3

Michael Becker

Add documentation of res_nclose()

strcmp.3

Heinrich Schuchardt

Clarify that strcmp() is not locale aware

strcpy.3

Matthew Kilgore

Fix example code for strncpy, which could pass an incorrect length

Michael Kerrisk [Frank Theile]

Use "destination" consistently (instead of "target" sometimes)

strfry.3

Keith Thompson

Remove incorrect reference to rand(3)

string.3

strlen.3

strnlen.3

Michael Kerrisk [Jakub Wilk]

Use 'bytes' not 'characters'

This is in line with POSIX terminology.

system.3

Michael Kerrisk [Jonny Grant]

Use '(char *) NULL' rather than '(char *) 0'

Michael Kerrisk

Note that system() can fail for the same reasons as fork(2)

Arkadiusz Drabczyk

Mention that 'errno' is set on error

termios.3

Eugene Syromyatnikov

Note an XTABS alpha issue

trunc.3

Michael Kerrisk [Eric Benton, G. Branden Robinson]

Make the description a little clearer

Michael Kerrisk

Emphasize that the return value is a floating-point number

xcrypt.3

Jason A. Donenfeld

Warn folks not to use these functions

lirc.4

Sean Young

Fix broken link

Sean Young

Document error returns more explicitly

Sean Young

lirc.h include file is in /usr/include/linux/lirc.h

Sean Young [Alec Leamas, Mauro Carvalho Chehab]

Remove ioctls and feature bits which were never implemented

Sean Young

Unsupported ioctl() operations always return ENOTTY

Sean Young

LIRC_MODE_LIRCCODE has been replaced by LIRC_MODE_SCANCODE

Sean Young

Document remaining ioctl (LIRC_GET_REC_TIMEOUT)

Now all ioctls are documented.

Sean Young

Timeout reports are enabled by default

Sean Young

Some devices are send only

Sean Young

Update SEE ALSO

Sean Young

LIRC_CAN_SET_REC_DUTY_CYCLE_RANGE was never supported

No driver ever supported such a thing.

Michael Kerrisk

Clarify the description LIRC_SET_REC_TIMEOUT

tty.4

Michael Witten

Add `vcs(4)' and `pty(7)' to the `SEE ALSO' section

vcs.4

Mattias Engdegård [Michael Witten]

Fix broken example code

core.5

Michael Kerrisk

Add cross reference to vdso(7) where "virtual DSO" is mentioned

filesystems.5

Eugene Syromyatnikov

Mention sysfs(2)

host.conf.5

Nikola Forró

Clarify glibc versions in which spoof options were removed

proc.5

Michael Kerrisk [Philip Dumont]

Document /proc/[tid]

See also https://bugzilla.kernel.org/show_bug.cgi?id=201441

Michael Kerrisk

Add an overview section describing the groups of files under /proc

Keno Fischer [Robert O'Callahan]

Correct description of NSTgid

Lucas Werkmeister

Document fdinfo format for timerfd

Stephan Knauss

Mention /proc/uptime includes time spent in suspend

Michael Kerrisk

Reword /proc/PID/fdinfo timerfd field descriptions as a hanging list

Michael Kerrisk

SEE ALSO: add htop(1) and pstree(1)

fs/proc/uptime.c:uptime_proc_show() fetches time using

ktime_get_boottime which includes the time spent in suspend.

Michael Kerrisk

Document /proc/PID/status CoreDumping field

Michael Kerrisk

Mention choom(1) in discussion of /proc/[pid]/oom_score_adj

Michael Kerrisk

Add a few details on /proc/PID/fdinfo timerfd

Michael Kerrisk

Document /proc/meminfo KReclaimable field

Michael Kerrisk

Explain how to determine top-most mount in /proc/PID/mountinfo

Explain how to determine the top-most mount at a particular

location by inspecting /proc/PID/mountinfo.

Michael Kerrisk [Jakub Wilk]

Remove bogus suggestion to use cat(1) to read files containing '\0'

Michael Kerrisk

Refer to mount(2) for explanation of mount vs superblock options

Michael Kerrisk

Fix description of /proc/PID/* ownership to account for user namespaces

Elvira Khabirova

Describe ambiguities in /proc/<pid>/maps

Michael Kerrisk [Nick Gregory]

Since Linux 4.5, "stack:" is no longer shown in /proc/PID/maps

Nikola Forró

Document /proc/[pid]/status Speculation_Store_Bypass field

Alan Jenkins

Vmalloc information is no longer calculated (Linux 4.4)

Michael Kerrisk [Alexander E. Patrakov, Jakub Wilk, Michael Kerrisk]

Use 'tr '\000' '\n' to display contents of /proc/PID/envron

Michael Kerrisk

Setting dumpable to 1 reverts ownership of /proc/PID/* to effective IDs

Michael Kerrisk

Document /proc/meminfo LazyFree field

Michael Kerrisk

Fix kernel source pathname for soft-dirty documentation

Michael Kerrisk

/proc/[pid]/status VmPMD field was removed in Linux 4.15

resolv.conf.5

Nikola Forró

Document no-reload (RES_NPRELOAD) option

tzfile.5

Paul Eggert

Sync from tzdb upstream

capabilities.7

Michael Kerrisk

Fix some imprecisions in discussion of namespaced file capabilities

The file UID does not come into play when creating a v3 security.capability extended attribute.

Michael Kerrisk

Note that v3 security.attributes are transparently created/retrieved

Michael Kerrisk

Improve the discussion of when file capabilities are ignored

The text stated that the execve() capability transitions are not performed for the same reasons that setuid and setgid mode bits may be ignored (as described in execve(2)). But, that's not quite correct: rather, the file capability sets are treated as empty for the purpose of the capability transition calculations.

Michael Kerrisk

Rework bounding set as per-thread set in transformation rules

Michael Kerrisk

Substantially rework "Capabilities and execution of programs by root"

Rework for improved clarity, and also to include missing details on the case where (1) the binary that is being executed has capabilities attached and (2) the real user ID of the process is not 0 (root) and (3) the effective user ID of the process is 0 (root).

Marcus Gelderie

Add details about SECBIT_KEEP_CAPS

The description of SECBIT_KEEP_CAPS is misleading about the effects on the effective capabilities of a process during a switch to nonzero UIDs. The effective set is cleared based on the effective UID switching to a nonzero value, even if SECBIT_KEEP_CAPS is set. However, with this bit set, the effective and permitted sets are not cleared if the real and saved set-user-ID are set to nonzero values.

Marcus Gelderie

Mention header for SECBIT constants

Mention that the named constants (SECBIT_KEEP_CAPS and others) are available only if the linux/securebits.h user-space header is included.

Michael Kerrisk

Add text introducing bounding set along with other capability sets

Michael Kerrisk [Allison Randal]

Update URL for location of POSIX.1e draft standard

Michael Kerrisk

CAP_SYS_CHROOT allows use of setns() to change the mount namespace

Michael Kerrisk [Pierre Chifflier]

Ambient capabilities do not trigger secure-execution mode

Michael Kerrisk

Add a subsection on per-user-namespace "set-user-ID-root" programs

Michael Kerrisk

Rework discussion of exec and UID 0, correcting a couple of details

Clarify the "Capabilities and execution of programs by root" section, and correct a couple of details:

- * If a process with rUID == 0 && eUID != 0 does an exec, the process will nevertheless gain effective capabilities if the file effective bit is set.

- * Set-UID-root programs only confer a full set of capabilities if the binary does not also have attached capabilities.

Michael Kerrisk

Update URL for libcap tarballs

The previous location does not seem to be getting updated.

(For example, at the time of this commit, libcap-2.26

had been out for two months, but was not present at

<http://www.kernel.org/pub/linux/libs/security/linux-privs>.

Michael Kerrisk

Clarify which capability sets capset(2) and capget(2) apply to
capset(2) and capget(2) apply operate only on the permitted, effective, and inheritable process capability sets.

Michael Kerrisk

Correct the description of SECBIT_KEEP_CAPS

Michael Kerrisk

Add background details on capability transformations during execve(2)

Add background details on ambient and bounding set when discussing capability transformations during execve(2).

Michael Kerrisk

Document the 'no_file_caps' kernel command-line option

cgroup_namespaces.7

Michael Kerrisk [Troy Engel]

Clarify the example by making an implied detail more explicit.

See https://bugzilla.kernel.org/show_bug.cgi?id=201047

cgroups.7

Michael Kerrisk

Add more detail on v2 'cpu' controller and realtime threads
Explicitly note the scheduling policies that are relevant for the
v2 'cpu' controller.

Michael Kerrisk

Document the use of 'cgroup_no_v1=named' to disable v1 named hierarchies
This feature was added in Linux 5.0.

Michael Kerrisk [Mike Weilgart]

Complete partial sentence re kernel boot options and 'nsdelegate'
https://bugzilla.kernel.org/show_bug.cgi?id=201029

Michael Kerrisk

Reframe the text on delegation to include more details about cgroups v1

Michael Kerrisk [Leah Hanson]

Rework discussion of writing to cgroup.type file
In particular, it is possible to write "threaded" to a
cgroup.type file if the current type is "domain threaded".
Previously, the text had implied that this was not possible.

Michael Kerrisk [Balbir Singh, Marcus Gelderie]

Soften the discussion about delegation in cgroups v1
Balbir pointed out that v1 delegation was not an accidental
feature.

epoll.7

Michael Kerrisk

Introduce the terms "interest list" and "ready list"

Michael Kerrisk

Consistently use the term "interest list" rather than "epoll set"

Michael Kerrisk

Reformat Q&A list

Michael Kerrisk

Note that edge-triggered notification wakes up only one waiter
Note a useful performance benefit of EPOLLET: ensuring that
only one of multiple waiters (in `epoll_wait()`) is woken
up when a file descriptor becomes ready.

Michael Kerrisk

Expand the discussion of the implications of file descriptor duplication
In particular, note that it may be difficult for an application
to know about the existence of duplicate file descriptors.

feature_test_macros.7

Michael Kerrisk [Andreas Westfeld]

Add more detail on why FTMs must be defined before including any header

inotify.7

Michael Kerrisk [Paul Millar]

Note ENOTDIR error that can occur for IN_ONLYDIR
Note ENOTDIR error that occurs when requesting a watch on a
nondirectory with IN_ONLYDIR.

ip.7

Bert Hubert

IP_RECVTTL error fixed

I need to get the TTL of UDP datagrams from userspace, so I set the IP_RECVTTL socket option. And as promised by ip.7, I then get IP_TTL messages from recvfrom. However, unlike what the manpage promises, the TTL field gets passed as a 32 bit integer.

man.7

Michael Kerrisk

SEE ALSO: remove mdoc.samples(7)

mount_namespaces.7

Michael Kerrisk

SEE ALSO: add findmnt(8)

namespaces.7

Michael Kerrisk

List factors that may pin a namespace into existence

Various factors may pin a namespace into existence, even when it has no member processes.

Michael Kerrisk [Tycho Kirchner]

Briefly explain why CAP_SYS_ADMIN is needed to create nonuser namespaces

Michael Kerrisk

Mention ioctl(2) in discussion of namespaces APIs

Michael Kerrisk

SEE ALSO: add pam_namespace(8)

pid_namespaces.7

Michael Kerrisk

Clarify the semantics for the adoption of orphaned processes

Because of setns() semantics, the parent of a process may reside in the outer PID namespace. If that parent terminates, then the child is adopted by the "init" in the outer PID namespace (rather than the "init" of the PID namespace of the child).

Michael Kerrisk

Note a detail of /proc/PID/ns/pid_for_children behavior

After clone(CLONE_NEWPID), /proc/PID/ns/pid_for_children is empty until the first child is created. Verified by experiment.

Michael Kerrisk

Note that a process can do unshare(CLONE_NEWPID) only once

sched.7

Michael Kerrisk [Eugene Syromyatnikov]

In the kernel source SCHED_OTHER is actually called SCHED_NORMAL

Michael Kerrisk

SEE ALSO: add ps(1) and top(1)

Michael Kerrisk

SEE ALSO: add chcpu(1), lscpu(1)

signal.7

Michael Kerrisk [Robin Kuzmin]

Clarify that sigsuspend() and pause() suspend the calling *thread*

Helge Deller

Add signal numbers for parisc

Michael Kerrisk

Unify signal lists into a signal table that embeds standards info

Having the signals listed in three different tables reduces readability, and would require more table splits if future standards specify other signals.

Michael Kerrisk

Reorder the architectures in the signal number lists

x86 and ARM are the most common architectures, but currently are in the second subfield in the signal number lists.

Instead, swap that info with subfield 1, so the most common architectures are first in the list.

Michael Kerrisk

Place signal numbers in a separate table

The current tables of signal information are unwieldy, as they try to cram in too much information.

Michael Kerrisk

Insert standards info into tables

Michael Kerrisk

SEE ALSO: add clone(2)

socket.7

Michael Kerrisk

Refer reader to unix(7) for information on SO_PASSSEC

Michael Kerrisk

SEE ALSO: add address_families(7)

socket.7

unix.7

Michael Kerrisk

Move text describing SO_PEERCRECRED from socket(7) to unix(7)

This is, AFAIK, an option specific to UNIX domain sockets, so place it in unix(7).

tcp.7

udp.7

Michael Kerrisk

Add a reference to socket(7) noting existence of further socket options

unix.7

Michael Kerrisk

Enhance the description of SCM_RIGHTS

The existing description is rather thin. More can be said.

Michael Kerrisk

There is a limit on the size of the file descriptor array for SCM_RIGHTS

The limit is defined in the kernel as SCM_MAX_FD (253).

Michael Kerrisk

Rework SO_PEERCRED text for greater clarity

Michael Kerrisk [Felipe Gasper]

Clarify SO_PASSCRED behavior

Michael Kerrisk

Explicitly note that SO_PASSCRED provides SCM_CREDENTIALS messages

Michael Kerrisk

If the buffer to receive SCM_RIGHTS FDs is too small, FDs are closed

Michael Kerrisk

One must send at least one byte of real data with ancillary data

Michael Kerrisk

Ancillary data forms a barrier when receiving on a stream socket

Michael Kerrisk

When sending ancillary data, only one item of each type may be sent

Michael Kerrisk

Improve wording describing socket option argument/return values

Michael Kerrisk

Clarify treatment of incoming ancillary data if 'msg_control' is NULL

Michael Kerrisk

Note behavior if buffer to receive ancillary data is too small

Michael Kerrisk

Fix a minor imprecision in description of SCM_CREDENTIALS

Michael Kerrisk

Refer reader to socket(7) for information about SO_PEEK_OFF

user_namespaces.7

Michael Kerrisk

Rework terminology describing ownership of nonuser namespaces

Prefer the word "owns" rather than "associated with" when describing the relationship between user namespaces and non-user namespaces. The existing text used a mix of the two terms, with "associated with" being predominant, but to my ear, describing the relationship as "ownership" is more comprehensible.

vdso.7

Helge Deller

Fix parisc gateway page description

ld.so.8

Michael Kerrisk [Florian Weimer, David Newall]

Document the --preload command-line option added in glibc 2.30

Michael Kerrisk

Note delimiters for 'list' in --audit and --inhibit-rpath

Michael Kerrisk

Place OPTIONS in alphabetical order

Michael Kerrisk

LD_PRELOAD-ed objects are added to link map in left-to-right order

zdump.8

Paul Eggert

Sync from tzdb upstream

zic.8

Paul Eggert

Sync from tzdb upstream

==== Changes in man-pages-5.01 =====

Released: 2019-05-09, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Abhinav Upadhyay <er.abhinav.upadhyay@gmail.com>

Andreas Korb <andreas.d.korb@gmail.com>

Anisse Astier <anisse@astier.eu>

Brice Goglin <Brice.Goglin@inria.fr>

Carlos O'Donnell <carlos@redhat.com>

Dr. Jürgen Sauermaun <mail@xn--jrger-sauermaun-zvb.de>

Egmont Koblinger <egmont@gmail.com>

Elias Benali <stackptr@users.sourceforge.net>

Elliot Hughes <enh@google.com>

Florian Weimer <fweimer@redhat.com>

Hugues Evrard <hevrard@google.com>

Jakub Nowak <jakub.jakub.nowak@gmail.com>

Jakub Wilk <jwilk@jwilk.net>

Keegan Saunders <keeganwsaunders@gmail.com>

Lucas Werkmeister <mail@lucaswerkmeister.de>

Marcus Huewe <suse-tux@gmx.de>

Michael Kerrisk <mtk.manpages@gmail.com>

Michael Witten <mfwitten@gmail.com>

Seth Troisi <sethtroisi@google.com>

Slavomir Kaslev <kaslevs@vmware.com>

Vincent Lefevre <vincent@vinc17.net>

Wladimir Mutel <muwlg@gmail.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages

tsearch.3

Florian Weimer [Michael Kerrisk]

Document the `twalk_r()` function added in glibc 2.30

New and changed links

twalk_r.3

Michael Kerrisk

New link to `twalk(3)` page

Changes to individual pages

accept.2

Michael Kerrisk

Note that 'addrlen' is left unchanged in the event of an error

See <http://austingroupbugs.net/view.php?id=836>.

bpf.2

Michael Kerrisk

Update kernel version info for JIT compiler

clone.2

Michael Kerrisk [Jakub Nowak]

`CLONE_CHILD_SETTID` has effect before `clone()` returns *in the child*

`CLONE_CHILD_SETTID` may not have had effect by the time `clone()`

returns in the parent, which could be relevant if the

`CLONE_VM` flag is employed. The relevant kernel code is in

`schedule_tail()`, which is called in `ret_from_fork()`

in the child.

See https://bugzilla.kernel.org/show_bug.cgi?id=203105

execve.2

exec.3

Michael Kerrisk [Dr. Jürgen Sauermann]

Consistently use the term 'pathname' (not 'path')

execve.2

Michael Kerrisk

Note that stack+environ size is also limited to 3/4 of `_STK_LIM`

In `fs/exec.c::prepare_arg_pages()`, we have:

```
limit = _STK_LIM / 4 * 3;
```

```
limit = min(limit, bprm->rlim_stack.rlim_cur / 4);
```

Michael Kerrisk [Dr. Jürgen Sauermann]

SEE ALSO: refer to `exec(3)` (rather than `execl(3)`)

pipe.2

Michael Kerrisk

Note that 'pipefd' is left unchanged in the event of an error

See <http://austingroupbugs.net/view.php?id=467>.

sched_setaffinity.2

Michael Kerrisk [Brice Goglin]

Correct details of return value of `sched_getaffinity()` syscall

setfsuid.2

Michael Kerrisk

Rewrite for improved clarity and defer to `setfsuid()` for details

Rewrite for improved clarity and defer to `setfsuid(2)` for the rationale of the fsGID rather than repeating the same details in this page.

setfsuid.2

Michael Kerrisk

Rewrite for improved clarity and to hint history more explicitly

The current text reads somewhat clumsily. Rewrite it to introduce the eUID and fsUID in parallel, and more clearly hint at the historical rationale for the fsUID, which is detailed lower in the page.

socketpair.2

Michael Kerrisk

Clarify that 'sv' is left unchanged in the event of an error

See also <http://austingroupbugs.net/view.php?id=483>.

splice.2

Slavomir Kaslev

EAGAIN can occur when called on nonblocking file descriptors

syscalls.2

Michael Kerrisk [Andreas Korb]

Remove crufty text about i386 syscall dispatch table

The removed text long ago ceased to be accurate. Nowadays, the dispatch table is autogenerated when building the kernel (via the kernel makefile, `arch/x86/entry/syscalls/Makefile`).

tee.2

Slavomir Kaslev

EAGAIN can occur when called on nonblocking file descriptors

fopen.3

Elliot Hughes

Explain BSD vs glibc "a+" difference

Where is the initial read position for an "a+" stream?

POSIX leaves this unspecified. Most BSD man pages are silent, and MacOS has the ambiguous "The stream is positioned at the end of the file", not differentiating between reads and writes other than to say that fseek(3) does not affect writes. glibc's documentation explicitly specifies that the initial read position is the beginning of the file.

mallinfo.3

Elliott Hughes

Further discourage use of mallinfo()

The BUGS section already explains why you need to be cautious about using mallinfo, but given the number of bug reports we see on Android, it seems not many people are reading that far. Call it out up front.

malloc_trim.3

Carlos O'Donell

Update trimming information

Since glibc 2.8, commit 68631c8eb92, the malloc_trim function has iterated over all arenas and free'd back to the OS all page runs that were free. This allows an application to call malloc_trim to consolidate fragmented chunks and free back any pages it can to potentially reduce RSS usage.

posix_memalign.3

Elliot Hughes

Some functions set errno

True of bionic, glibc, and musl. (I didn't check elsewhere.)

resolver.3

Michael Kerrisk [Wladimir Mutel]

Mention that some functions set 'h_errno'

stdarg.3

Michael Kerrisk [Vincent Lefevre]

Remove the NOTES section describing the ancient varargs macros stdarg.h is now 30 years old, and gcc long ago (2004) ceased to implement <varargs.h>. There seems little value in keeping this

text.

See https://bugzilla.kernel.org/show_bug.cgi?id=202907

Michael Kerrisk [Egmont Koblinger]

Add a note that "..." in function signature means a variadic function

Egmont suggested adding this, because the string "..." appears at several other points in the page, but just to indicate that some text is omitted from example code.

strerror.3

Jakub Wilk

Don't discuss buffer size for strerror_l()

Unlike strerror_r(), strerror_l() doesn't take buffer length as an argument.

strtol.3

strtoul.3

Jakub Wilk

SEE ALSO: add strtoumax(3), strtoumax(3)

sysconf.3

Michael Kerrisk [Hugues Evrard]

Clearly note that _SC_PAGESIZE and _SC_PAGE_SIZE are synonyms

tsearch.3

Florian Weimer

Do not use const arguments in twalk() callback

The const specifier is not part of the prototype (it only applies to the implementation), so showing it here confuses the reader.

Michael Kerrisk

SYNOPSIS: add missing definition of 'VISIT' type

Michael Kerrisk

Reformat twalk() and twalk_r() prototypes for easier readability

console_codes.4

Jakub Wilk

Document that \e[1;n] and \e[2;n] support 16 colors

Source: setterm_command() in drivers/tty/vt/vt.c

elf.5

Michael Kerrisk [Keegan Saunders]

A data segment does not have PF_X

proc.5

Michael Witten [Anisse Astier]

Add missing Inode field to /proc/net/unix

hostname.7

Florian Weimer

HOSTALIASES/search path processing is DNS-specific

Other NSS modules do not necessarily honor these settings.

inode.7

Michael Kerrisk

Note that timestamp fields measure time starting at the Epoch

Michael Kerrisk

Timestamp fields are structures that include a nanosecond component

Michael Kerrisk

Add references to `execve(2)` to describe set-UID/set-GID behaviors

RELEASE

The Linux man page maintainer proudly announces. . .

man-pages-5.02.tar.gz - man pages for Linux

Differences from the previous manual pages release are listed in the file "Changes".

For further information, visit <http://www.kernel.org/doc/man-pages/>

POSIX PAGES

This package used to contains a copy of the POSIX 1003.1-2003 man pages. The POSIX pages are now distributed in the separate man-pages-posix package.

THE PAGES

These pages are most of the section 2, 3, 4, 5, 7 man pages for Linux. A few pages are provided in sections 1 and 8 for commands that are not documented in other packages, and there are a few pages in sections 5 and 8 for the timezone utilities.

[The timezone pages were taken from
<ftp://elsie.nci.nih.gov/pub/tzcode2001a.tar.gz>.]

[The section 3 man pages for the db routines have been taken from
<ftp://ftp.terra.net/pub/sleepycat/db.1.86.tar.gz>.]

[The rpc man pages were taken from the 4.4BSD-Lite CDROM.]

Here is a breakdown of what this distribution contains:

- Section 1 = user commands (intro, plus a few other pages)
- Section 2 = system calls
- Section 3 = libc calls
- Section 4 = devices (e.g., hd, sd)
- Section 5 = file formats and configuration files (e.g., wtmp, /etc/passwd)
- Section 6 = games (intro only)
- Section 7 = overviews, conventions, macro packages, etc.
- Section 8 = system administration (intro, plus a few other pages)

This package contains no, or very few, section 1, 6, and 8 man pages because these should be distributed with the binaries they are written for. Sometimes Section 9 is used for man pages describing parts of the kernel.

Note that only Section 2 is rather complete, but Section 3 contains several hundred man pages. If you want to write some man pages, or suggest improvements to existing pages, please visit <http://www.kernel.org/doc/man-pages/> .

Copyright information:

These man pages are distributed under a variety of copyright licenses. Although these licenses permit free distribution of the nroff sources contained in this package, commercial distribution may impose other requirements (e.g., acknowledgement of copyright or inclusion of the raw nroff sources with the commercial distribution).

If you distribute these man pages commercially, it is your responsibility to figure out your obligations. (For many man pages, these obligations require you to distribute nroff sources with any pre-formatted man pages that you provide.) Each file that contains nroff source for a man page also contains the author(s) name, email address, and copyright notice.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.

675 Mass Ave, Cambridge, MA 02139, USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free

program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any

part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any

later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

Appendix: How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright (C) 19yy <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 675 Mass Ave, Cambridge, MA 02139, USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) 19yy name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.
```

<signature of Ty Coon>, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion

of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable

source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying

the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates

the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright (C) 19yy <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) 19yy name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
```

`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc. <<http://fsf.org/>>

51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a

restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and

modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a

derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2)

will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute

the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that

system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if

necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc. <<http://fsf.org/>>

51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and

(2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and

you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of

Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by

modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License

may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

Appendix: How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) 19yy <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 675 Mass Ave, Cambridge, MA 02139, USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) 19yy name of author  
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
'Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the
library. If this is what you want to do, use the GNU Library General
Public License instead of this License.

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
License is intended to guarantee your freedom to share and change free
software--to make sure the software is free for all its users. This
General Public License applies to most of the Free Software
Foundation's software and to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by
the GNU Lesser General Public License instead.) You can apply it to
your programs, too.

When we speak of free software, we are referring to freedom, not
price. Our General Public Licenses are designed to make sure that you
have the freedom to distribute copies of free software (and charge for
this service if you wish), that you receive source code or can get it
if you want it, that you can change the software or use pieces of it
in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid
anyone to deny you these rights or to ask you to surrender the rights.
These restrictions translate to certain responsibilities for you if you
distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's

source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License.

However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot

impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR

REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

```
This program is free software; you can redistribute it and/or modify  
it under the terms of the GNU General Public License as published by  
the Free Software Foundation; either version 2 of the License, or  
(at your option) any later version.
```

```
This program is distributed in the hope that it will be useful,  
but WITHOUT ANY WARRANTY; without even the implied warranty of  
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the  
GNU General Public License for more details.
```

```
You should have received a copy of the GNU General Public License along  
with this program; if not, write to the Free Software Foundation, Inc.,  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.
```

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author  
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands ``show w'` and ``show c'` should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than ``show w'` and ``show c'`; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
'Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that

you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the

entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data

prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no

charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for

that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6,

whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

- a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
- b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!
Here is a list of the main contributors to lm-sensors version 3.

- * Frodo Looijaard
Original author of libsensors, sensors-detect, sensors and isadump.
- * Merlin Hughes
Original author of sensord.

* Bob Schlaermann

Dynamic chip feature detection (a.k.a. generic chip support) in libensors and sensors.

* Mark M. Hoffman

Many improvements to the libensors configuration file scanner.

* Jean Delvare

New libensors API, and migration of sensors and sensord thereto.

Many optimizations in libensors and sensors.

Configuration file converter.

Rewrite of sensors-detect.

Support for multiple configuration files in libensors.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.

59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get

it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

^L

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with

the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes

a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

^L

GNU LESSER GENERAL PUBLIC LICENSE

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs

(which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no

charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

^L

Once this change is made in a given copy, it is irreversible for

that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6,

whether or not they are linked directly with the Library itself.

^L

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

^L

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

- a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
- b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

^L

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

^L

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

^L

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

numactl

[![Build Status](https://travis-ci.org/numactl/numactl.svg?branch=master)](https://travis-ci.org/numactl/numactl)

Simple NUMA policy support. It consists of a numactl program to run other programs with a specific NUMA policy and a libnuma shared library ("NUMA API") to set NUMA policy in applications.

The libnuma binary interface is supposed to stay binary compatible.

Incompatible changes will use new symbol version numbers.

In addition there are various test and utility programs, like ``numastat`` to display NUMA allocation statistics and ``memhog``.

In ``test/`` there is a small regression test suite.

Note that ``regress`` assumes a unloaded machine with memory free on each node. Otherwise you will get spurious failures in the non-strict policies (prefered, interleave.)

See the manpages [``numactl.8``](<https://linux.die.net/man/8/numactl>) and [``numa.3``](<https://linux.die.net/man/3/numa>) for details.

License, Copyrights, Acknowledgements

``numactl`` and the demo programs are under the GNU General Public License, v.2.

``libnuma`` is under the GNU Lesser General Public License, v2.1.

The manpages are under the same license as the Linux manpages (see the files.)

``numademo`` links with a library derived from the C version of STREAM by John D. McCalpin and Joe R. Zagar for one sub benchmark. See ``stream_lib.c`` for the license. In particular when you publish ``numademo`` output you might need to pay attention there or filter out the STREAM results.

It also uses a public domain Mersenne Twister implementation from Michael Brundage.

GNU GENERAL PUBLIC LICENSE
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<https://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies

of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic

pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you

receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".
- c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.
- d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

- a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.
- b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.
- c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.
- d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.
- e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded

from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you

received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or

run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement,

or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you

to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest

to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <https://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

```
<program> Copyright (C) <year> <name of author>  
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <https://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <https://www.gnu.org/licenses/why-not-lgpl.html>.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free

software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1

above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest

possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author  
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program  
'Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
<signature of Ty Coon>, 1 April 1989
```

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

SIL OPEN FONT LICENSE Version 1.1 - 26 February 2007

PREAMBLE

The goals of the Open Font License (OFL) are to stimulate worldwide development of collaborative font projects, to support the font creation efforts of academic and linguistic communities, and to provide a free and open framework in which fonts may be shared and improved in partnership with others.

The OFL allows the licensed fonts to be used, studied, modified and redistributed freely as long as they are not sold by themselves. The fonts, including any derivative works, can be bundled, embedded, redistributed and/or sold with any software provided that any reserved names are not used by derivative works. The fonts and derivatives, however, cannot be released under any other type of license. The requirement for fonts to remain under this license does not apply to any document created using the fonts or their derivatives.

DEFINITIONS

"Font Software" refers to the set of files released by the Copyright Holder(s) under this license and clearly marked as such. This may include source files, build scripts and documentation.

"Reserved Font Name" refers to any names specified as such after the copyright statement(s).

"Original Version" refers to the collection of Font Software components as distributed by the Copyright Holder(s).

"Modified Version" refers to any derivative made by adding to, deleting, or substituting -- in part or in whole -- any of the components of the Original Version, by changing formats or by porting the Font Software to a new environment.

"Author" refers to any designer, engineer, programmer, technical writer or other person who contributed to the Font Software.

PERMISSION & CONDITIONS

Permission is hereby granted, free of charge, to any person obtaining a copy of the Font Software, to use, study, copy, merge, embed, modify, redistribute, and sell modified and unmodified copies of the Font Software, subject to the following conditions:

- 1) Neither the Font Software nor any of its individual components, in Original or Modified Versions, may be sold by itself.
- 2) Original or Modified Versions of the Font Software may be bundled, redistributed and/or sold with any software, provided that each copy contains the above copyright notice and this license. These can be included either as stand-alone text files, human-readable headers or in the appropriate machine-readable metadata fields within text or binary files as long as those fields can be easily viewed by the user.
- 3) No Modified Version of the Font Software may use the Reserved Font Name(s) unless explicit written permission is granted by the corresponding Copyright Holder. This restriction only applies to the primary font name as

presented to the users.

4) The name(s) of the Copyright Holder(s) or the Author(s) of the Font Software shall not be used to promote, endorse or advertise any Modified Version, except to acknowledge the contribution(s) of the Copyright Holder(s) and the Author(s) or with their explicit written permission.

5) The Font Software, modified or unmodified, in part or in whole, must be distributed entirely under this license, and must not be distributed under any other license. The requirement for fonts to remain under this license does not apply to any document created using the Font Software.

TERMINATION

This license becomes null and void if any of the above conditions are not met.

DISCLAIMER

THE FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF COPYRIGHT, PATENT, TRADEMARK, OR OTHER RIGHT. IN NO EVENT SHALL THE COPYRIGHT HOLDER BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, INCLUDING ANY GENERAL, SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF THE USE OR INABILITY TO USE THE FONT SOFTWARE OR FROM OTHER DEALINGS IN THE FONT SOFTWARE.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the

ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion

of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least

three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses

terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU

FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the library's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

Apache License
Version 2.0, January 2004
<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work,

where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or

for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason

of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

Licensed under the Apache License, Version 2.0 (the "License");
you may not use this file except in compliance with the License.
You may obtain a copy of the License at

<http://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and limitations under the License.

This is a string packages that uses a tree-based representation. See cord.h for a description of the functions provided. Ec.h describes "extensible cords", which are essentially output streams that write to a cord. These allow for efficient construction of cords without requiring a bound on the size of a cord.

More details on the data structure can be found in

Boehm, Atkinson, and Plass, "Ropes: An Alternative to Strings", Software Practice and Experience 25, 12, December 1995, pp. 1315-1330.

A fundamentally similar "rope" data structure is also part of SGI's standard template library implementation, and its descendants, which include the GNU C++ library. That uses reference counting by default.

There is a short description of that data structure at <http://www.sgi.com/tech/stl/ropeimpl.html>.

All of these are descendants of the "ropes" in Xerox Cedar.

cord/tests/de.c is a very dumb text editor that illustrates the use of cords.

It maintains a list of file versions. Each version is simply a cord representing the file contents. Nonetheless, standard editing operations are efficient, even on very large files.

(Its 3 line "user manual" can be obtained by invoking it without arguments. Note that ^R^N and ^R^P move the cursor by almost a screen. It does not understand tabs, which will show up as highlighted "I"s. Use the UNIX "expand" program first.)

To build the editor, type "make cord/de" in the gc directory.

Note that CORD_printf and friends use C functions with variable numbers

of arguments in non-standard-conforming ways. This code is known to break on some platforms, notably PowerPC. It should be possible to build the remainder of the library (everything but cordprnt.c) on any platform that supports the collector.

[This is an updated version of the page formerly at
`www.hpl.hp.com/personal/Hans_Boehm/gc/`, before that at
`http://reality.sgi.com/boehm/gc.html` and before that at
`ftp://ftp.parc.xerox.com/pub/gc/gc.html`.]

The

[Boehm](http://www.hboehm.info)-[Demers](http://www.cs.cornell.edu/annual_report/00-01/bios.htm#demers)-
[Weiser](http://www.ubiq.com/hypertext/weiser/weiser.html)

conservative Garbage Collector (**BDWGC**) can be used as a garbage collecting replacement for C `malloc` or C++ `new`. It allows you to allocate memory basically as you normally would, without explicitly deallocating memory that is no longer useful. The collector automatically recycles memory when it determines that it can no longer be otherwise accessed. A simple example of such a use is given [here](simple_example.md).

The collector is also used by a number of programming language implementations that either use C as intermediate code, want to facilitate easier

interoperation with C libraries, or just prefer the simple collector interface. For a more detailed description of the interface, see [\[here\]\(gcinterface.md\)](#).

Alternatively, the garbage collector may be used as a [\[leak detector\]\(leak.md\)](#) for C or C++ programs, though that is not its primary goal.

Typically several versions are offered for [\[downloading\]\(https://github.com/ivmai/bdwgc/wiki/Download\)](#): preview, stable, legacy. Usually you should use the one marked as the `_latest stable_release`. Preview versions may contain additional features, platform support, but are likely to be less well tested. The list of changes for each version is specified on the [\[releases\]\(https://github.com/ivmai/bdwgc/releases\)](#) page.

The arguments for and against conservative garbage collection in C and C++ are briefly discussed [\[here\]\(http://www.hboehm.info/gc/issues.html\)](#). The beginnings of a frequently-asked-questions list are [\[here\]\(http://www.hboehm.info/gc/faq.html\)](#).

The garbage collector code is copyrighted by [\[Hans-J. Boehm\]\(http://www.hboehm.info\)](#), [\[Alan J. Demers, Xerox Corporation\]\(http://www.xerox.com/\)](#), [\[Silicon Graphics\]\(http://www.sgi.com/\)](#), and [\[Hewlett-Packard Company\]\(http://www.hp.com/\)](#). It may be used and copied without payment of a fee under minimal restrictions. See the README.md file in the distribution or the [\[license\]\(http://www.hboehm.info/gc/license.txt\)](#) for more details. ****IT IS PROVIDED AS IS, WITH ABSOLUTELY NO WARRANTY EXPRESSED OR IMPLIED. ANY USE IS AT YOUR OWN RISK**.**

Empirically, this collector works with most unmodified C programs, simply by replacing ``malloc`` with ``GC_malloc`` calls, replacing ``realloc`` with ``GC_realloc`` calls, and removing free calls. Exceptions are discussed [\[here\]\(http://www.hboehm.info/gc/issues.html\)](#).

Platforms

The collector is not completely portable, but the distribution includes ports to most standard PC and UNIX/Linux platforms. The collector should work on Linux, *BSD, recent Windows versions, MacOS X, HP/UX, Solaris, Tru64, Irix and a few other operating systems. Some ports are more polished than others.

Irix pthreads, Linux threads, Win32 threads, Solaris threads (pthreads only), HP/UX 11 pthreads, Tru64 pthreads, and MacOS X threads are supported in recent versions.

Separately distributed ports

For MacOS 9/Classic use, Patrick Beard's latest port is available from

``http://homepage.mac.com/pbeard/gc/``. (Unfortunately, that's now quite dated. I'm not in a position to test under MacOS. Although I try to incorporate changes, it is impossible for me to update the project file.)

Precompiled versions of the collector for NetBSD are available [here](<ftp://ftp.netbsd.org/pub/pkgsrc/current/pkgsrc/devel/boehm-gc/README.html>).

[Debian Linux](<http://www.debian.org/>) includes prepackaged versions of the collector.

Scalable multiprocessor versions

Kenjiro Taura, Toshio Endo, and Akinori Yonezawa have made available a [parallel collector](<http://ieeexplore.ieee.org/abstract/document/1592629/>) based on this one. Their collector takes advantage of multiple processors during a collection. Starting with GC v6.0alpha1 we also do this, though with more modest processor scalability goals. Our approach is discussed briefly in [this document]([scale.md](#)).

Some Collector Details

The collector uses a [mark-sweep](<http://www.hboehm.info/gc/complexity.html>) algorithm. It provides incremental and generational collection under operating systems which provide the right kind of virtual memory support. (Currently this includes SunOS[45], IRIX, OSF/1, Linux, and Windows, with varying restrictions.) It allows [`_finalization_`]([finalization.md](#)) code to be invoked when an object is collected. It can take advantage of type information to locate pointers if such information is provided, but it is usually used without such information. See the README and ``gc.h`` files in the distribution for more details.

For an overview of the implementation, see [here]([gcdescr.md](#)).

The garbage collector distribution includes a C string (``cord.h``) package that provides for fast concatenation and substring operations on long strings. A simple curses- and win32-based editor that represents the entire file as a cord is included as a sample application.

Performance of the non-incremental collector is typically competitive with ``malloc`/`free`` implementations. Both space and time overhead are likely to be only slightly higher for programs written for ``malloc`/`free`` (see Detlefs, Dosser and Zorn's

[Memory Allocation Costs in Large C and C++

Programs](<http://citeseerx.ist.psu.edu/viewdoc/download?doi=10.1.1.30.3073&rep=rep1&type=ps>)).

For programs allocating primarily very small objects, the collector may be faster; for programs allocating primarily large objects it will be slower.

If the collector is used in a multi-threaded environment and configured for

thread-local allocation, it may in some cases significantly outperform
`malloc`/`free` allocation in time.

We also expect that in many cases any additional overhead will be more than
compensated for by decreased copying etc. if programs are written and tuned
for garbage collection.

Contacts and new release announcements

GitHub and Stack Overflow are the major two places for communication.

Technical questions (how to, how does it work, etc.) should be posted to [Stack Overflow](https://stackoverflow.com/questions/tagged/boehm-gc) with `_boehm-gc_` tag.

To contribute, please rebase your code to the latest [master](https://github.com/ivmai/bdwgc/tree/master/) and submit a [pull request](https://github.com/ivmai/bdwgc/pulls) to GitHub.

To report a bug, or propose (request) a new feature, create a [GitHub issue](https://github.com/ivmai/bdwgc/issues). Please make sure it has not been reported yet by someone else.

To receive notifications on every release, please subscribe to [Releases RSS feed](https://github.com/ivmai/bdwgc/releases.atom). Notifications on all issues and pull requests are available by [watching](https://github.com/ivmai/bdwgc/watchers) the project.

Mailing lists (`bdwgc-announce@lists.opendylan.org`, `bdwgc@lists.opendylan.org`, and the former `gc-announce@linux.hpl.hp.com` and `gc@linux.hpl.hp.com`) are not used at this moment. Their content is available in [bdwgc-announce](https://github.com/ivmai/bdwgc/files/1037650/bdwgc-announce-mailing-list-archive-2014_02.tar.gz) and [bdwgc](https://github.com/ivmai/bdwgc/files/1038163/bdwgc-mailing-list-archive-2017_04.tar.gz) archive files, respectively. The gc list archive may also be read at [Narkive](http://bdwgc.opendylan.narkive.com).

Some prior discussion of the collector has taken place on the gcc java mailing list, whose archives appear [here](http://gcc.gnu.org/ml/java/), and also on [gclist@iecc.com](http://lists.tunes.org/mailman/listinfo/gclist).

Boehm-Demers-Weiser Garbage Collector

This is version 8.0.4 of a conservative garbage collector for C and C++.

Download

You might find a more recent/stable version on the [Download](<https://github.com/ivmai/bdwgc/wiki/Download>) page, or [BDWGC site](<http://www.hboehm.info/gc/>).

Also, the latest bug fixes and new features are available in the [development repository](<https://github.com/ivmai/bdwgc>).

Overview

This is intended to be a general purpose, garbage collecting storage allocator. The algorithms used are described in:

- * Boehm, H., and M. Weiser, "Garbage Collection in an Uncooperative Environment", *Software Practice & Experience*, September 1988, pp. 807-820.
- * Boehm, H., A. Demers, and S. Shenker, "Mostly Parallel Garbage Collection", *Proceedings of the ACM SIGPLAN '91 Conference on Programming Language Design and Implementation*, SIGPLAN Notices 26, 6 (June 1991), pp. 157-164.
- * Boehm, H., "Space Efficient Conservative Garbage Collection", *Proceedings of the ACM SIGPLAN '91 Conference on Programming Language Design and Implementation*, SIGPLAN Notices 28, 6 (June 1993), pp. 197-206.
- * Boehm H., "Reducing Garbage Collector Cache Misses", *Proceedings of the 2000 International Symposium on Memory Management*.

Possible interactions between the collector and optimizing compilers are

discussed in

* Boehm, H., and D. Chase, "A Proposal for GC-safe C Compilation",
The Journal of C Language Translation 4, 2 (December 1992).

and

* Boehm H., "Simple GC-safe Compilation", Proceedings of the ACM SIGPLAN '96
Conference on Programming Language Design and Implementation.

Unlike the collector described in the second reference, this collector operates either with the mutator stopped during the entire collection (default) or incrementally during allocations. (The latter is supported on fewer machines.) On the most common platforms, it can be built with or without thread support. On a few platforms, it can take advantage of a multiprocessor to speed up garbage collection.

Many of the ideas underlying the collector have previously been explored by others. Notably, some of the run-time systems developed at Xerox PARC in the early 1980s conservatively scanned thread stacks to locate possible pointers (cf. Paul Rovner, "On Adding Garbage Collection and Runtime Types to a Strongly-Typed Statically Checked, Concurrent Language" Xerox PARC CSL 84-7). Doug McIlroy wrote a simpler fully conservative collector that was part of version 8 UNIX (tm), but appears to not have received widespread use.

Rudimentary tools for use of the collector as a [leak detector](doc/leak.md) are included, as is a fairly sophisticated string package "cord" that makes use of the collector. (See doc/README.cords and H.-J. Boehm, R. Atkinson, and M. Plass, "Ropes: An Alternative to Strings", Software Practice and Experience 25, 12 (December 1995), pp. 1315-1330. This is very similar to the "rope" package in Xerox Cedar, or the "rope" package in the SGI STL or the g++ distribution.)

Further collector documentation can be found in the [overview](doc/overview.md).

General Description

This is a garbage collecting storage allocator that is intended to be used as a plug-in replacement for C's malloc.

Since the collector does not require pointers to be tagged, it does not attempt to ensure that all inaccessible storage is reclaimed. However, in our experience, it is typically more successful at reclaiming unused memory than most C programs using explicit deallocation. Unlike manually introduced leaks, the amount of unreclaimed memory typically stays

bounded.

In the following, an "object" is defined to be a region of memory allocated by the routines described below.

Any objects not intended to be collected must be pointed to either from other such accessible objects, or from the registers, stack, data, or statically allocated bss segments. Pointers from the stack or registers may point to anywhere inside an object. The same is true for heap pointers if the collector is compiled with ``ALL_INTERIOR_POINTERS`` defined, or ``GC_all_interior_pointers`` is otherwise set, as is now the default.

Compiling without ``ALL_INTERIOR_POINTERS`` may reduce accidental retention of garbage objects, by requiring pointers from the heap to the beginning of an object. But this no longer appears to be a significant issue for most programs occupying a small fraction of the possible address space.

There are a number of routines which modify the pointer recognition algorithm. ``GC_register_displacement`` allows certain interior pointers to be recognized even if ``ALL_INTERIOR_POINTERS`` is not defined. ``GC_malloc_ignore_off_page`` allows some pointers into the middle of large objects to be disregarded, greatly reducing the probability of accidental retention of large objects. For most purposes it seems best to compile with ``ALL_INTERIOR_POINTERS`` and to use ``GC_malloc_ignore_off_page`` if you get collector warnings from allocations of very large objects. See [\[here\]\(doc/debugging.md\)](#) for details.

`_WARNING_`: pointers inside memory allocated by the standard ``malloc`` are not seen by the garbage collector. Thus objects pointed to only from such a region may be prematurely deallocated. It is thus suggested that the standard ``malloc`` be used only for memory regions, such as I/O buffers, that are guaranteed not to contain pointers to garbage collectible memory. Pointers in C language automatic, static, or register variables, are correctly recognized. (Note that ``GC_malloc_uncollectable`` has semantics similar to standard `malloc`, but allocates objects that are traced by the collector.)

`_WARNING_`: the collector does not always know how to find pointers in data areas that are associated with dynamic libraries. This is easy to remedy IF you know how to find those data areas on your operating system (see ``GC_add_roots``). Code for doing this under SunOS, IRIX 5.X and 6.X, HP/UX, Alpha OSF/1, Linux, and win32 is included and used by default. (See `doc/README.win32` for Win32 details.) On other systems pointers from dynamic library data areas may not be considered by the collector. If you're writing a program that depends on the collector scanning dynamic library data areas, it may be a good idea to include

at least one call to ``GC_is_visible`` to ensure that those areas are visible to the collector.

Note that the garbage collector does not need to be informed of shared read-only data. However if the shared library mechanism can introduce discontinuous data areas that may contain pointers, then the collector does need to be informed.

Signal processing for most signals may be deferred during collection, and during uninterruptible parts of the allocation process.

Like standard ANSI C mallocs, by default it is unsafe to invoke malloc (and other GC routines) from a signal handler while another malloc call may be in progress.

The allocator/collector can also be configured for thread-safe operation. (Full signal safety can also be achieved, but only at the cost of two system calls per malloc, which is usually unacceptable.)

`_WARNING_`: the collector does not guarantee to scan thread-local storage (e.g. of the kind accessed with ``pthread_getspecific``). The collector does scan thread stacks, though, so generally the best solution is to ensure that any pointers stored in thread-local storage are also stored on the thread's stack for the duration of their lifetime. (This is arguably a longstanding bug, but it hasn't been fixed yet.)

Installation and Portability

As distributed, the collector operates silently

In the event of problems, this can usually be changed by defining the ``GC_PRINT_STATS`` or ``GC_PRINT_VERBOSE_STATS`` environment variables. This will result in a few lines of descriptive output for each collection.

(The given statistics exhibit a few peculiarities.

Things don't appear to add up for a variety of reasons, most notably fragmentation losses. These are probably much more significant for the contrived program "test.c" than for your application.)

On most Unix-like platforms, the collector can be built either using a GNU autoconf-based build infrastructure (type ``../configure; make`` in the simplest case), or with a classic makefile by itself (type ``make -f Makefile.direct``).

Please note that the collector source repository does not contain configure and similar auto-generated files, thus the full procedure of autoconf-based build of ``master`` branch of the collector could look like:

```
git clone git://github.com/ivmai/bdwgc.git
cd bdwgc
```

```
git clone git://github.com/ivmai/libatomic_ops.git
./autogen.sh
./configure
make -j
make check
```

Cloning of `libatomic_ops` is now optional provided the compiler supports atomic intrinsics.

Below we focus on the collector build using classic makefile.

For the Makefile.direct-based process, typing `make check` instead of `make` will automatically build the collector and then run `setjmp_test` and `gctest`. `Setjmp_test` will give you information about configuring the collector, which is useful primarily if you have a machine that's not already supported. Gctest is a somewhat superficial test of collector functionality. Failure is indicated by a core dump or a message to the effect that the collector is broken. Gctest takes about a second to two to run on reasonable 2007 vintage desktops. It may use up to about 30MB of memory. (The multi-threaded version will use more. 64-bit versions may use more.) `make test` will also, as its last step, attempt to build and test the "cord" string library.)

Makefile.direct will generate a library gc.a which you should link against. Typing "make cords" will add the cord library to gc.a.

The GNU style build process understands the usual targets. `make check` runs a number of tests. `make install` installs at least libgc, and libcord. Try `./configure --help` to see the configuration options. It is currently not possible to exercise all combinations of build options this way.

It is suggested that if you need to replace a piece of the collector (e.g. GC_mark_rts.c) you simply list your version ahead of gc.a on the ld command line, rather than replacing the one in gc.a. (This will generate numerous warnings under some versions of AIX, but it still works.)

All include files that need to be used by clients will be put in the include subdirectory. (Normally this is just gc.h. `make cords` adds "cord.h" and "ec.h".)

The collector currently is designed to run essentially unmodified on machines that use a flat 32-bit or 64-bit address space. That includes the vast majority of Workstations and X86 (X >= 3) PCs. (The list here was deleted because it was getting too long and constantly out of date.)

In a few cases (Amiga, OS/2, Win32, MacOS) a separate makefile or equivalent is supplied. Many of these have separate README.system files.

Dynamic libraries are completely supported only under SunOS/Solaris, (and even that support is not functional on the last Sun 3 release), Linux, FreeBSD, NetBSD, IRIX 5&6, HP/UX, Win32 (not Win32S) and OSF/1 on DEC AXP machines plus perhaps a few others listed near the top of `dyn_load.c`. On other machines we recommend that you do one of the following:

- 1) Add dynamic library support (and send us the code).
- 2) Use static versions of the libraries.
- 3) Arrange for dynamic libraries to use the standard `malloc`.
This is still dangerous if the library stores a pointer to a garbage collected object. But nearly all standard interfaces prohibit this, because they deal correctly with pointers to stack allocated objects. (`Strtok` is an exception. Don't use it.)

In all cases we assume that pointer alignment is consistent with that enforced by the standard C compilers. If you use a nonstandard compiler you may have to adjust the alignment parameters defined in `gc_priv.h`. Note that this may also be an issue with packed records/structs, if those enforce less alignment for pointers.

A port to a machine that is not byte addressed, or does not use 32 bit or 64 bit addresses will require a major effort. A port to plain MSDOS or win16 is hard.

For machines not already mentioned, or for nonstandard compilers, some porting suggestions are provided [\[here\]](#)(`doc/porting.md`).

The C Interface to the Allocator

The following routines are intended to be directly called by the user. Note that usually only ``GC_malloc`` is necessary. ``GC_clear_roots`` and ``GC_add_roots`` calls may be required if the collector has to trace from nonstandard places (e.g. from dynamic library data areas on a machine on which the collector doesn't already understand them.) On some machines, it may be desirable to set ``GC_stacktop`` to a good approximation of the stack base. (This enhances code portability on HP PA machines, since there is no good way for the collector to compute this value.) Client code may include "gc.h", which defines all of the following, plus many others.

- 1) ``GC_malloc(nbytes)``
 - Allocate an object of size `nbytes`. Unlike `malloc`, the object is cleared before being returned to the user. ``GC_malloc`` will invoke the garbage collector when it determines this to be appropriate.

GC_malloc may return 0 if it is unable to acquire sufficient space from the operating system. This is the most probable consequence of running out of space. Other possible consequences are that a function call will fail due to lack of stack space, or that the collector will fail in other ways because it cannot maintain its internal data structures, or that a crucial system process will fail and take down the machine. Most of these possibilities are independent of the malloc implementation.

2) ``GC_malloc_atomic(nbytes)``

- Allocate an object of size `nbytes` that is guaranteed not to contain any pointers. The returned object is not guaranteed to be cleared. (Can always be replaced by ``GC_malloc``, but results in faster collection times. The collector will probably run faster if large character arrays, etc. are allocated with ``GC_malloc_atomic`` than if they are statically allocated.)

3) ``GC_realloc(object, new_size)``

- Change the size of object to be ``new_size``. Returns a pointer to the new object, which may, or may not, be the same as the pointer to the old object. The new object is taken to be atomic if and only if the old one was. If the new object is composite and larger than the original object, then the newly added bytes are cleared (we hope). This is very likely to allocate a new object, unless ``MERGE_SIZES`` is defined in `gc_priv.h`. Even then, it is likely to recycle the old object only if the object is grown in small additive increments (which, we claim, is generally bad coding practice.)

4) ``GC_free(object)``

- Explicitly deallocate an object returned by ``GC_malloc`` or ``GC_malloc_atomic``. Not necessary, but can be used to minimize collections if performance is critical. Probably a performance loss for very small objects (`<= 8 bytes`).

5) ``GC_expand_hp(bytes)``

- Explicitly increase the heap size. (This is normally done automatically if a garbage collection failed to ``GC_reclaim`` enough memory. Explicit calls to ``GC_expand_hp`` may prevent unnecessarily frequent collections at program startup.)

6) ``GC_malloc_ignore_off_page(bytes)``

- Identical to ``GC_malloc``, but the client promises to keep a pointer to the somewhere within the first 256 bytes of the object while it is live. (This pointer should normally be declared volatile to prevent interference from compiler optimizations.) This is the recommended way to allocate anything that is likely to be larger than 100 Kbytes or so. (``GC_malloc`` may result in failure to reclaim such objects.)

7) ``GC_set_warn_proc(proc)``
- Can be used to redirect warnings from the collector. Such warnings should be rare, and should not be ignored during code development.

8) ``GC_enable_incremental()``
- Enables generational and incremental collection. Useful for large heaps on machines that provide access to page dirty information. Some dirty bit implementations may interfere with debugging (by catching address faults) and place restrictions on heap arguments to system calls (since write faults inside a system call may not be handled well).

9) Several routines to allow for registration of finalization code. User supplied finalization code may be invoked when an object becomes unreachable. To call ``(*f)(obj, x)`` when obj becomes inaccessible, use ``GC_register_finalizer(obj, f, x, 0, 0);``
For more sophisticated uses, and for finalization ordering issues, see `gc.h`.

The global variable ``GC_free_space_divisor`` may be adjusted up from its default value of 3 to use less space and more collection time, or down for the opposite effect. Setting it to 1 will almost disable collections and cause all allocations to simply grow the heap.

The variable ``GC_non_gc_bytes``, which is normally 0, may be changed to reflect the amount of memory allocated by the above routines that should not be considered as a candidate for collection. Careless use may, of course, result in excessive memory consumption.

Some additional tuning is possible through the parameters defined near the top of `gc_priv.h`.

If only ``GC_malloc`` is intended to be used, it might be appropriate to define:

```
#define malloc(n) GC_malloc(n)
#define calloc(m,n) GC_malloc((m)*(n))
```

For small pieces of VERY allocation intensive code, `gc_inl.h` includes some allocation macros that may be used in place of ``GC_malloc`` and friends.

All externally visible names in the garbage collector start with ``GC_``. To avoid name conflicts, client code should avoid this prefix, except when accessing garbage collector routines or variables.

There are provisions for allocation with explicit type information. This is rarely necessary. Details can be found in `gc_typed.h`.

The C++ Interface to the Allocator

The Ellis-Hull C++ interface to the collector is included in the collector distribution. If you intend to use this, type ``make c++`` after the initial build of the collector is complete. See `gc_cpp.h` for the definition of the interface. This interface tries to approximate the Ellis-Detlefs C++ garbage collection proposal without compiler changes.

Very often it will also be necessary to use `gc_allocator.h` and the allocator declared there to construct STL data structures. Otherwise subobjects of STL data structures will be allocated using a system allocator, and objects they refer to may be prematurely collected.

Use as Leak Detector

The collector may be used to track down leaks in C programs that are intended to run with `malloc/free` (e.g. code with extreme real-time or portability constraints). To do so define ``FIND_LEAK`` in Makefile. This will cause the collector to invoke the ``report_leak`` routine defined near the top of `reclaim.c` whenever an inaccessible object is found that has not been explicitly freed. Such objects will also be automatically reclaimed.

If all objects are allocated with ``GC_DEBUG_MALLOC`` (see next section), then the default version of `report_leak` will report at least the source file and line number at which the leaked object was allocated. This may sometimes be sufficient. (On a few machines, it will also report a cryptic stack trace. If this is not symbolic, it can sometimes be called into a symbolic stack trace by invoking program "foo" with `"tools/callprocs.sh foo"`. It is a short shell script that invokes `adb` to expand program counter values to symbolic addresses. It was largely supplied by Scott Schwartz.)

Note that the debugging facilities described in the next section can sometimes be slightly LESS effective in leak finding mode, since in leak finding mode, ``GC_debug_free`` actually results in reuse of the object. (Otherwise the object is simply marked invalid.) Also note that the test program is not designed to run meaningfully in ``FIND_LEAK`` mode. Use `"make gc.a"` to build the collector.

Debugging Facilities

The routines ``GC_debug_malloc``, ``GC_debug_malloc_atomic``, ``GC_debug_realloc``, and ``GC_debug_free`` provide an alternate interface to the collector, which provides some help with memory overwrite errors, and the like.

Objects allocated in this way are annotated with additional information. Some of this information is checked during garbage collections, and detected inconsistencies are reported to stderr.

Simple cases of writing past the end of an allocated object should be caught if the object is explicitly deallocated, or if the collector is invoked while the object is live. The first deallocation of an object will clear the debugging info associated with an object, so accidentally repeated calls to ``GC_debug_free`` will report the deallocation of an object without debugging information. Out of memory errors will be reported to stderr, in addition to returning ``NULL``.

``GC_debug_malloc`` checking during garbage collection is enabled with the first call to ``GC_debug_malloc``. This will result in some slowdown during collections. If frequent heap checks are desired, this can be achieved by explicitly invoking ``GC_gcollect``, e.g. from the debugger.

``GC_debug_malloc`` allocated objects should not be passed to ``GC_realloc`` or ``GC_free``, and conversely. It is however acceptable to allocate only some objects with ``GC_debug_malloc``, and to use ``GC_malloc`` for other objects, provided the two pools are kept distinct. In this case, there is a very low probability that ``GC_malloc`` allocated objects may be misidentified as having been overwritten. This should happen with probability at most one in 2^{32} . This probability is zero if ``GC_debug_malloc`` is never called.

``GC_debug_malloc``, ``GC_malloc_atomic``, and ``GC_debug_realloc`` take two additional trailing arguments, a string and an integer. These are not interpreted by the allocator. They are stored in the object (the string is not copied). If an error involving the object is detected, they are printed.

The macros ``GC_MALLOC``, ``GC_MALLOC_ATOMIC``, ``GC_REALLOC``, ``GC_FREE``, and ``GC_REGISTER_FINALIZER`` are also provided. These require the same arguments as the corresponding (nondebugging) routines. If `gc.h` is included with ``GC_DEBUG`` defined, they call the debugging versions of these functions, passing the current file name and line number as the two extra arguments, where appropriate. If `gc.h` is included without ``GC_DEBUG`` defined, then all these macros will instead be defined to their nondebugging equivalents. (``GC_REGISTER_FINALIZER`` is necessary, since pointers to objects with debugging information are really pointers to a displacement of 16 bytes from the object beginning, and some translation is necessary when finalization routines are invoked. For details, about what's stored in the header, see the definition of the type `oh` in `dbg_mlc.c` file.)

Incremental/Generational Collection

The collector normally interrupts client code for the duration of

a garbage collection mark phase. This may be unacceptable if interactive response is needed for programs with large heaps. The collector can also run in a "generational" mode, in which it usually attempts to collect only objects allocated since the last garbage collection. Furthermore, in this mode, garbage collections run mostly incrementally, with a small amount of work performed in response to each of a large number of ``GC_malloc`` requests.

This mode is enabled by a call to ``GC_enable_incremental``.

Incremental and generational collection is effective in reducing pause times only if the collector has some way to tell which objects or pages have been recently modified. The collector uses two sources of information:

1. Information provided by the VM system. This may be provided in one of several forms. Under Solaris 2.X (and potentially under other similar systems) information on dirty pages can be read from the `/proc` file system. Under other systems (currently SunOS4.X) it is possible to write-protect the heap, and catch the resulting faults. On these systems we require that system calls writing to the heap (other than read) be handled specially by client code. See `os_dep.c` for details.
2. Information supplied by the programmer. The object is considered dirty after a call to ``GC_end_stubborn_change`` provided the library has been compiled suitably. It is typically not worth using for short-lived objects. Note that bugs caused by a missing ``GC_end_stubborn_change`` or ``GC_reachable_here`` call are likely to be observed very infrequently and hard to trace.

Bugs

Any memory that does not have a recognizable pointer to it will be reclaimed. Exclusive-or'ing forward and backward links in a list doesn't cut it.

Some C optimizers may lose the last undisguised pointer to a memory object as a consequence of clever optimizations. This has almost never been observed in practice.

This is not a real-time collector. In the standard configuration, percentage of time required for collection should be constant across heap sizes. But collection pauses will increase for larger heaps. They will decrease with the number of processors if parallel marking is enabled.

(On 2007 vintage machines, GC times may be on the order of 5 msec per MB of accessible memory that needs to be scanned and processor. Your mileage may vary.) The incremental/generational collection facility may help in some cases.

Feedback, Contribution, Questions and Notifications

Please address bug reports and new feature ideas to [GitHub issues](<https://github.com/ivmai/bdwgc/issues>). Before the submission please check that it has not been done yet by someone else.

If you want to contribute, submit a [pull request](<https://github.com/ivmai/bdwgc/pulls>) to GitHub.

If you need help, use [Stack Overflow](<https://stackoverflow.com/questions/tagged/boehm-gc>). Older technical discussions are available in `bdwgc` mailing list archive - it can be downloaded as a [compressed file](https://github.com/ivmai/bdwgc/files/1038163/bdwgc-mailing-list-archive-2017_04.tar.gz) or browsed at [Narkive](<http://bdwgc.opendylan.narkive.com>).

To get new release announcements, subscribe to [RSS feed](<https://github.com/ivmai/bdwgc/releases.atom>). usage: test_cpp number-of-iterations

This program tries to test the specific C++ functionality provided by
gc_c++.h that isn't tested by the more general test routines of the
collector.

A recommended value for number-of-iterations is 10, which will take a few minutes to complete.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts
as the successor of the GNU Library Public License, version 2, hence
the version number 2.1.]

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
Licenses are intended to guarantee your freedom to share and change
free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some
specially designated software packages--typically libraries--of the
Free Software Foundation and other authors who decide to use it. You
can use it too, but we suggest you first think carefully about whether
this license or the ordinary General Public License is the better
strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use,
not price. Our General Public Licenses are designed to make sure that

you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the

entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data

prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no

charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for

that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6,

whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

- a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
- b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free

software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this

License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any

associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by

all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes

make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) 19yy <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful,

but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) 19yy name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

1.341 libx11 1.6.8-1

1.341.1 Available under license :

The following is the 'standard copyright' agreed upon by most contributors, and is currently the canonical license preferred by the X.Org Foundation. This is a slight variant of the common MIT license form published by the Open Source Initiative at <http://www.opensource.org/licenses/mit-license.php>

Copyright holders of new code should use this license statement where possible, and insert their name to this list. Please sort by surname for people, and by the full name for other entities (e.g. Juliusz Chroboczek sorts before Intel Corporation sorts before Daniel Stone).

See each individual source file or directory for the license that applies to that file.

The "Artistic License"

Preamble

The intent of this document is to state the conditions under which a Package may be copied, such that the Copyright Holder maintains some semblance of artistic control over the development of the package, while giving the users of the package the right to use and distribute the Package in a more-or-less customary fashion, plus the right to make reasonable modifications.

Definitions:

"Package" refers to the collection of files distributed by the Copyright Holder, and derivatives of that collection of files created through textual modification.

"Standard Version" refers to such a Package if it has not been modified, or has been modified in accordance with the wishes

of the Copyright Holder as specified below.

"Copyright Holder" is whoever is named in the copyright or copyrights for the package.

"You" is you, if you're thinking about copying or distributing this Package.

"Reasonable copying fee" is whatever you can justify on the basis of media cost, duplication charges, time of people involved, and so on. (You will not be required to justify it to the Copyright Holder, but only to the computing community at large as a market that must bear the fee.)

"Freely Available" means that no fee is charged for the item itself, though there may be fees involved in handling the item. It also means that recipients of the item may redistribute it under the same conditions they received it.

1. You may make and give away verbatim copies of the source form of the Standard Version of this Package without restriction, provided that you duplicate all of the original copyright notices and associated disclaimers.
2. You may apply bug fixes, portability fixes and other modifications derived from the Public Domain or from the Copyright Holder. A Package modified in such a way shall still be considered the Standard Version.
3. You may otherwise modify your copy of this Package in any way, provided that you insert a prominent notice in each changed file stating how and when you changed that file, and provided that you do at least ONE of the following:
 - a) place your modifications in the Public Domain or otherwise make them Freely Available, such as by posting said modifications to Usenet or an equivalent medium, or placing the modifications on a major archive site such as uunet.uu.net, or by allowing the Copyright Holder to include your modifications in the Standard Version of the Package.
 - b) use the modified Package only within your corporation or organization.
 - c) rename any non-standard executables so the names do not conflict with standard executables, which must also be provided, and provide a separate manual page for each non-standard executable that clearly documents how it differs from the Standard Version.
 - d) make other distribution arrangements with the Copyright Holder.
4. You may distribute the programs of this Package in object code or

executable form, provided that you do at least ONE of the following:

- a) distribute a Standard Version of the executables and library files, together with instructions (in the manual page or equivalent) on where to get the Standard Version.
- b) accompany the distribution with the machine-readable source of the Package with your modifications.
- c) give non-standard executables non-standard names, and clearly document the differences in manual pages (or equivalent), together with instructions on where to get the Standard Version.
- d) make other distribution arrangements with the Copyright Holder.

5. You may charge a reasonable copying fee for any distribution of this Package. You may charge any fee you choose for support of this Package. You may not charge a fee for this Package itself. However, you may distribute this Package in aggregate with other (possibly commercial) programs as part of a larger (possibly commercial) software distribution provided that you do not advertise this Package as a product of your own. You may embed this Package's interpreter within an executable of yours (by linking); this shall be construed as a mere form of aggregation, provided that the complete Standard Version of the interpreter is so embedded.

6. The scripts and library files supplied as input to or produced as output from the programs of this Package do not automatically fall under the copyright of this Package, but belong to whoever generated them, and may be sold commercially, and may be aggregated with this Package. If such scripts or library files are aggregated with this Package via the so-called "undump" or "unexec" methods of producing a binary executable image, then distribution of such an image shall neither be construed as a distribution of this Package nor shall it fall under the restrictions of Paragraphs 3 and 4, provided that you do not represent such an executable image as a Standard Version of this Package.

7. C subroutines (or comparably compiled subroutines in other languages) supplied by you and linked into this Package in order to emulate subroutines and variables of the language defined by this Package shall not be considered part of this Package, but are the equivalent of input as in Paragraph 6, provided these subroutines do not change the language in any way that would cause it to fail the regression tests for the language.

8. Aggregation of this Package with a commercial distribution is always permitted provided that the use of this Package is embedded; that is,

when no overt attempt is made to make this Package's interfaces visible to the end user of the commercial distribution. Such use shall not be construed as a distribution of this Package.

9. The name of the Copyright Holder may not be used to endorse or promote products derived from this software without specific prior written permission.

10. THIS PACKAGE IS PROVIDED "AS IS" AND WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

The End

GNU GENERAL PUBLIC LICENSE

Version 1, February 1989

Copyright (C) 1989 Free Software Foundation, Inc.

51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The license agreements of most software companies try to keep users at the mercy of those companies. By contrast, our General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. The General Public License applies to the Free Software Foundation's software and to any other program whose authors commit to using it. You can use it for your programs, too.

When we speak of free software, we are referring to freedom, not price. Specifically, the General Public License is designed to make sure that you have the freedom to give away or sell copies of free software, that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of a such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must tell them their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any work containing the Program or a portion of it, either verbatim or with modifications. Each licensee is addressed as "you".

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this General Public License and to the absence of any warranty; and give any other recipients of the Program a copy of this General Public License along with the Program. You may charge a fee for the physical act of transferring a copy.

2. You may modify your copy or copies of the Program or any portion of it, and copy and distribute such modifications under the terms of Paragraph 1 above, provided that you also do the following:

a) cause the modified files to carry prominent notices stating that you changed the files and the date of any change; and

b) cause the whole of any work that you distribute or publish, that in whole or in part contains the Program or any part thereof, either with or without modifications, to be licensed at no charge to all third parties under the terms of this General Public License (except that you may choose to grant warranty protection to some or all third parties, at your option).

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the simplest and most usual way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this General Public License.

d) You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

Mere aggregation of another independent work with the Program (or its derivative) on a volume of a storage or distribution medium does not bring the other work under the scope of these terms.

3. You may copy and distribute the Program (or a portion or derivative of it, under Paragraph 2) in object code or executable form under the terms of Paragraphs 1 and 2 above provided that you also do one of the following:

a) accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Paragraphs 1 and 2 above; or,

b) accompany it with a written offer, valid for at least three years, to give any third party free (except for a nominal charge for the cost of distribution) a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Paragraphs 1 and 2 above; or,

c) accompany it with the information you received as to where the corresponding source code may be obtained. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form alone.)

Source code for a work means the preferred form of the work for making modifications to it. For an executable file, complete source code means all the source code for all modules it contains; but, as a special exception, it need not include source code for modules which are standard libraries that accompany the operating system on which the executable file runs, or for standard header files or definitions files that accompany that operating system.

4. You may not copy, modify, sublicense, distribute or transfer the Program except as expressly provided under this General Public License. Any attempt otherwise to copy, modify, sublicense, distribute or transfer

the Program is void, and will automatically terminate your rights to use the Program under this License. However, parties who have received copies, or rights to use copies, from you under this General Public License will not have their licenses terminated so long as such parties remain in full compliance.

5. By copying, distributing or modifying the Program (or any work based on the Program) you indicate your acceptance of this license to do so, and all its terms and conditions.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein.

7. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of the license which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the license, you may choose any version ever published by the Free Software Foundation.

8. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

9. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

10. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

Appendix: How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to humanity, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) 19yy <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 1, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) 19xx name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the
appropriate parts of the General Public License. Of course, the
commands you use may be called something other than `show w' and `show
c'; they could even be mouse-clicks or menu items--whatever suits your
program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the
program `Gnomovision' (a program to direct compilers to make passes
at assemblers) written by James Hacker.

Software Foundation; either version 1, or (at your option) any
later version, or
- b) the "Artistic License"

--- The GNU General Public License, Version 1, February 1989 ---

This software is Copyright (c) 2017 by Ken Williams.

This is free software, licensed under:

The GNU General Public License, Version 1, February 1989

GNU GENERAL PUBLIC LICENSE
Version 1, February 1989

Copyright (C) 1989 Free Software Foundation, Inc.
51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The license agreements of most software companies try to keep users at the mercy of those companies. By contrast, our General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. The General Public License applies to the Free Software Foundation's software and to any other program whose authors commit to using it. You can use it for your programs, too.

When we speak of free software, we are referring to freedom, not price. Specifically, the General Public License is designed to make sure that you have the freedom to give away or sell copies of free software, that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of a such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must tell them their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any work containing the Program or a portion of it, either verbatim or with modifications. Each licensee is addressed as "you".

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this General Public License and to the absence of any warranty; and give any other recipients of the Program a copy of this General Public License along with the Program. You may charge a fee for the physical act of transferring a copy.

2. You may modify your copy or copies of the Program or any portion of it, and copy and distribute such modifications under the terms of Paragraph 1 above, provided that you also do the following:

a) cause the modified files to carry prominent notices stating that you changed the files and the date of any change; and

b) cause the whole of any work that you distribute or publish, that in whole or in part contains the Program or any part thereof, either with or without modifications, to be licensed at no charge to all third parties under the terms of this General Public License (except that you may choose to grant warranty protection to some or all third parties, at your option).

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the simplest and most usual way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this General Public License.

d) You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

Mere aggregation of another independent work with the Program (or its derivative) on a volume of a storage or distribution medium does not bring the other work under the scope of these terms.

3. You may copy and distribute the Program (or a portion or derivative of it, under Paragraph 2) in object code or executable form under the terms of Paragraphs 1 and 2 above provided that you also do one of the following:

a) accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Paragraphs 1 and 2 above; or,

b) accompany it with a written offer, valid for at least three years, to give any third party free (except for a nominal charge for the cost of distribution) a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Paragraphs 1 and 2 above; or,

c) accompany it with the information you received as to where the corresponding source code may be obtained. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form alone.)

Source code for a work means the preferred form of the work for making modifications to it. For an executable file, complete source code means all the source code for all modules it contains; but, as a special exception, it need not include source code for modules which are standard libraries that accompany the operating system on which the executable file runs, or for standard header files or definitions files that accompany that operating system.

4. You may not copy, modify, sublicense, distribute or transfer the Program except as expressly provided under this General Public License. Any attempt otherwise to copy, modify, sublicense, distribute or transfer the Program is void, and will automatically terminate your rights to use the Program under this License. However, parties who have received copies, or rights to use copies, from you under this General Public License will not have their licenses terminated so long as such parties remain in full compliance.

5. By copying, distributing or modifying the Program (or any work based on the Program) you indicate your acceptance of this license to do so, and all its terms and conditions.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein.

7. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will

be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of the license which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the license, you may choose any version ever published by the Free Software Foundation.

8. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

9. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

10. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

Appendix: How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to humanity, the best way to achieve this is to make it free software which everyone can redistribute and change under these

terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) 19yy <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 1, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) 19xx name of author  
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the  
program `Gnomovision' (a program to direct compilers to make passes  
at assemblers) written by James Hacker.
```

That's all there is to it!

--- The Artistic License 1.0 ---

This software is Copyright (c) 2017 by Ken Williams.

This is free software, licensed under:

The Artistic License 1.0

The Artistic License

Preamble

The intent of this document is to state the conditions under which a Package may be copied, such that the Copyright Holder maintains some semblance of artistic control over the development of the package, while giving the users of the package the right to use and distribute the Package in a more-or-less customary fashion, plus the right to make reasonable modifications.

Definitions:

- "Package" refers to the collection of files distributed by the Copyright Holder, and derivatives of that collection of files created through textual modification.
- "Standard Version" refers to such a Package if it has not been modified, or has been modified in accordance with the wishes of the Copyright Holder.
- "Copyright Holder" is whoever is named in the copyright or copyrights for the package.
- "You" is you, if you're thinking about copying or distributing this Package.
- "Reasonable copying fee" is whatever you can justify on the basis of media cost, duplication charges, time of people involved, and so on. (You will not be required to justify it to the Copyright Holder, but only to the computing community at large as a market that must bear the fee.)
- "Freely Available" means that no fee is charged for the item itself, though there may be fees involved in handling the item. It also means that recipients of the item may redistribute it under the same conditions they received it.

1. You may make and give away verbatim copies of the source form of the Standard Version of this Package without restriction, provided that you duplicate all of the original copyright notices and associated disclaimers.

2. You may apply bug fixes, portability fixes and other modifications derived from the Public Domain or from the Copyright Holder. A Package modified in such a way shall still be considered the Standard Version.

3. You may otherwise modify your copy of this Package in any way, provided that you insert a prominent notice in each changed file stating how and when you changed that file, and provided that you do at least ONE of the following:

- a) place your modifications in the Public Domain or otherwise make them Freely Available, such as by posting said modifications to Usenet or an equivalent medium, or placing the modifications on a major archive site such as ftp.uu.net, or by allowing the Copyright Holder to include your modifications in the Standard Version of the Package.
- b) use the modified Package only within your corporation or organization.
- c) rename any non-standard executables so the names do not conflict with standard executables, which must also be provided, and provide a separate manual page for each non-standard executable that clearly documents how it differs from the Standard Version.
- d) make other distribution arrangements with the Copyright Holder.

4. You may distribute the programs of this Package in object code or executable form, provided that you do at least ONE of the following:

- a) distribute a Standard Version of the executables and library files, together with instructions (in the manual page or equivalent) on where to get the Standard Version.
- b) accompany the distribution with the machine-readable source of the Package with your modifications.
- c) accompany any non-standard executables with their corresponding Standard Version executables, giving the non-standard executables non-standard names, and clearly documenting the differences in manual pages (or equivalent), together with instructions on where to get the Standard Version.
- d) make other distribution arrangements with the Copyright Holder.

5. You may charge a reasonable copying fee for any distribution of this Package. You may charge any fee you choose for support of this Package. You may not charge a fee for this Package itself. However, you may distribute this Package in aggregate with other (possibly commercial) programs as part of a larger (possibly commercial) software distribution provided that you do not advertise this Package as a product of your own.

6. The scripts and library files supplied as input to or produced as output from the programs of this Package do not automatically fall under the copyright of this Package, but belong to whomever generated them, and may be sold commercially, and may be aggregated with this Package.

7. C or perl subroutines supplied by you and linked into this Package shall not be considered part of this Package.

8. The name of the Copyright Holder may not be used to endorse or promote products derived from this software without specific prior written permission.

9. THIS PACKAGE IS PROVIDED "AS IS" AND WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

The End

```
#!/perl
```

```
=head1 NAME
```

```
copyright.t
```

```
=head1 DESCRIPTION
```

Tests that the latest copyright years in the top-level README file and the C<perl -v> output match each other.

If the test fails, update at least one of README and perl.c so that they match reality.

Optionally you can pass the C<--now> option to check they are at the current year. This isn't checked by default, so that it doesn't fail for people working on older releases. It should be run before making a new release.

```
=cut
```

```
use strict;
```

```
use Config;
```

```
BEGIN { require './test.pl' }
```

```
if ( $Config{usecrosscompile} ) {
```

```
    skip_all( "Not all files are available during cross-compilation" );
```

```
}
```

```
my ($opt) = @ARGV;
```

```
my $readme_year = readme_year();
```

```

my $v_year = v_year();

# Check that both copyright dates are up-to-date, but only if requested, so
# that tests still pass for people intentionally working on older versions:
if ($opt eq '--now')
{
    my $current_year = (gmtime)[5] + 1900;
    is $v_year, $current_year, 'perl -v copyright includes current year';
    is $readme_year, $current_year, 'README copyright includes current year';
}

# Otherwise simply check that the two copyright dates match each other:
else
{
    is $readme_year, $v_year, 'README and perl -v copyright dates match';
}

done_testing;

sub readme_year
# returns the latest copyright year from the top-level README file
{

    open my $readme, '<', './README' or die "Opening README failed: $!";

    # The copyright message is the first paragraph:
    local $/ = "";
    my $copyright_msg = <$readme>;

    my ($year) = $copyright_msg =~ /\b(\d{4,})/s
        or die "Year not found in README copyright message '$copyright_msg'";

    $year;
}

sub v_year
# returns the latest copyright year shown in perl -v
{

    my $output = runperl switches => ['-v'];
    my ($year) = $output =~ /copyright 1987.\b(\d{4,})/i
        or die "Copyright statement not found in perl -v output '$output'";

    $year;
}

```

The "Artistic License"

Preamble

The intent of this document is to state the conditions under which a Package may be copied, such that the Copyright Holder maintains some semblance of artistic control over the development of the package, while giving the users of the package the right to use and distribute the Package in a more-or-less customary fashion, plus the right to make reasonable modifications.

Definitions:

"Package" refers to the collection of files distributed by the Copyright Holder, and derivatives of that collection of files created through textual modification.

"Standard Version" refers to such a Package if it has not been modified, or has been modified in accordance with the wishes of the Copyright Holder as specified below.

"Copyright Holder" is whoever is named in the copyright or copyrights for the package.

"You" is you, if you're thinking about copying or distributing this Package.

"Reasonable copying fee" is whatever you can justify on the basis of media cost, duplication charges, time of people involved, and so on. (You will not be required to justify it to the Copyright Holder, but only to the computing community at large as a market that must bear the fee.)

"Freely Available" means that no fee is charged for the item itself, though there may be fees involved in handling the item. It also means that recipients of the item may redistribute it under the same conditions they received it.

1. You may make and give away verbatim copies of the source form of the Standard Version of this Package without restriction, provided that you duplicate all of the original copyright notices and associated disclaimers.
2. You may apply bug fixes, portability fixes and other modifications derived from the Public Domain or from the Copyright Holder. A Package modified in such a way shall still be considered the Standard Version.
3. You may otherwise modify your copy of this Package in any way,

provided that you insert a prominent notice in each changed file stating how and when you changed that file, and provided that you do at least ONE of the following:

a) place your modifications in the Public Domain or otherwise make them Freely Available, such as by posting said modifications to Usenet or an equivalent medium, or placing the modifications on a major archive site such as uunet.uu.net, or by allowing the Copyright Holder to include your modifications in the Standard Version of the Package.

b) use the modified Package only within your corporation or organization.

c) rename any non-standard executables so the names do not conflict with standard executables, which must also be provided, and provide a separate manual page for each non-standard executable that clearly documents how it differs from the Standard Version.

d) make other distribution arrangements with the Copyright Holder.

4. You may distribute the programs of this Package in object code or executable form, provided that you do at least ONE of the following:

a) distribute a Standard Version of the executables and library files, together with instructions (in the manual page or equivalent) on where to get the Standard Version.

b) accompany the distribution with the machine-readable source of the Package with your modifications.

c) give non-standard executables non-standard names, and clearly document the differences in manual pages (or equivalent), together with instructions on where to get the Standard Version.

d) make other distribution arrangements with the Copyright Holder.

5. You may charge a reasonable copying fee for any distribution of this Package. You may charge any fee you choose for support of this Package. You may not charge a fee for this Package itself. However, you may distribute this Package in aggregate with other (possibly commercial) programs as part of a larger (possibly commercial) software distribution provided that you do not advertise this Package as a product of your own. You may embed this Package's interpreter within an executable of yours (by linking); this shall be construed as a mere form of aggregation, provided that the complete Standard Version of the interpreter is so embedded.

6. The scripts and library files supplied as input to or produced as output from the programs of this Package do not automatically fall under the copyright of this Package, but belong to whoever generated them, and may be sold commercially, and may be aggregated with this Package. If such scripts or library files are aggregated with this Package via the so-called "undump" or "unexec" methods of producing a binary executable image, then distribution of such an image shall neither be construed as a distribution of this Package nor shall it fall under the restrictions of Paragraphs 3 and 4, provided that you do not represent such an executable image as a Standard Version of this Package.

7. C subroutines (or comparably compiled subroutines in other languages) supplied by you and linked into this Package in order to emulate subroutines and variables of the language defined by this Package shall not be considered part of this Package, but are the equivalent of input as in Paragraph 6, provided these subroutines do not change the language in any way that would cause it to fail the regression tests for the language.

8. Aggregation of this Package with a commercial distribution is always permitted provided that the use of this Package is embedded; that is, when no overt attempt is made to make this Package's interfaces visible to the end user of the commercial distribution. Such use shall not be construed as a distribution of this Package.

9. The name of the Copyright Holder may not be used to endorse or promote products derived from this software without specific prior written permission.

10. THIS PACKAGE IS PROVIDED "AS IS" AND WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

1.345.1 Available under license :

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<http://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not

price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official

standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose

of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified

it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the

product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods,

procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work,

for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an

organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means,

then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
{one line to give the program's name and a brief idea of what it does.}  
Copyright (C) {year} {name of author}
```

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <http://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

```
{project} Copyright (C) {year} {fullname}
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <http://www.gnu.org/philosophy/why-not-lgpl.html>.

Apache License
Version 2.0, January 2004

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally

submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or

implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.

51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their

rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License

along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not

signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER

PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author  
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

GNU LESSER GENERAL PUBLIC LICENSE
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts
as the successor of the GNU Library Public License, version 2, hence
the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get

it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with

the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the

Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

- a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
- b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the

Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new

versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts
as the successor of the GNU Library Public License, version 2, hence
the version number 2.1.]

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
Licenses are intended to guarantee your freedom to share and change
free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some
specially designated software packages--typically libraries--of the
Free Software Foundation and other authors who decide to use it. You
can use it too, but we suggest you first think carefully about whether
this license or the ordinary General Public License is the better
strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use,
not price. Our General Public Licenses are designed to make sure that
you have the freedom to distribute copies of free software (and charge
for this service if you wish); that you receive source code or can get
it if you want it; that you can change the software and use pieces of
it in new free programs; and that you are informed that you can do
these things.

To protect your rights, we need to make restrictions that forbid
distributors to deny you these rights or to ask you to surrender these

rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages

are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated

straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of

its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form

under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies

the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

- a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
- b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and

conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original

author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that

you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it

contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application

to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any

patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR

OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software

Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether

gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate

copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program

with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such

parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING

OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author  
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate

parts of the General Public License. Of course, the commands you use may be called something other than `show w` and `show c`; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

1.353 attr 2.5.1

1.353.1 Available under license :

Most components of the "attr" package are licensed under Version 2.1 of the GNU Lesser General Public License (see below).
below.

Some components (as annotated in the source) are licensed under Version 2 of the GNU General Public License (see COPYING).

GNU LESSER GENERAL PUBLIC LICENSE
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your

freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be

consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The

former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a

fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of

a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be

linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is

interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or

distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot

impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN

WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!
Most components of the "attr" package are licensed under Version 2.1 of the GNU Lesser General Public License (see COPYING.LGPL).

Some components (as annotated in the source) are licensed under Version 2 of the GNU General Public License (see below),

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether

gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate

copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program

with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such

parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING

OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author  
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may

be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

1.355 go-nats 1.7.2

1.355.1 Available under license :

Apache License
Version 2.0, January 2004
<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the

outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable

copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and

do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<https://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for
software and other kinds of works.

The licenses for most software and other practical works are designed
to take away your freedom to share and change the works. By contrast,
the GNU General Public License is intended to guarantee your freedom to
share and change all versions of a program--to make sure it remains free
software for all its users. We, the Free Software Foundation, use the
GNU General Public License for most of our software; it applies also to
any other work released this way by its authors. You can apply it to
your programs, too.

When we speak of free software, we are referring to freedom, not

price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official

standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose

of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified

it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the

product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods,

procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work,

for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an

organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means,

then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <https://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

```
<program> Copyright (C) <year> <name of author>  
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <https://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <https://www.gnu.org/licenses/why-not-lgpl.html>.

GNU LESSER GENERAL PUBLIC LICENSE
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <https://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

This version of the GNU Lesser General Public License incorporates the terms and conditions of version 3 of the GNU General Public License, supplemented by the additional permissions listed below.

0. Additional Definitions.

As used herein, "this License" refers to version 3 of the GNU Lesser General Public License, and the "GNU GPL" refers to version 3 of the GNU General Public License.

"The Library" refers to a covered work governed by this License, other than an Application or a Combined Work as defined below.

An "Application" is any work that makes use of an interface provided by the Library, but which is not otherwise based on the Library. Defining a subclass of a class defined by the Library is deemed a mode of using an interface provided by the Library.

A "Combined Work" is a work produced by combining or linking an Application with the Library. The particular version of the Library with which the Combined Work was made is also called the "Linked Version".

The "Minimal Corresponding Source" for a Combined Work means the Corresponding Source for the Combined Work, excluding any source code for portions of the Combined Work that, considered in isolation, are based on the Application, and not on the Linked Version.

The "Corresponding Application Code" for a Combined Work means the object code and/or source code for the Application, including any data and utility programs needed for reproducing the Combined Work from the Application, but excluding the System Libraries of the Combined Work.

1. Exception to Section 3 of the GNU GPL.

You may convey a covered work under sections 3 and 4 of this License without being bound by section 3 of the GNU GPL.

2. Conveying Modified Versions.

If you modify a copy of the Library, and, in your modifications, a facility refers to a function or data to be supplied by an Application that uses the facility (other than as an argument passed when the facility is invoked), then you may convey a copy of the modified version:

- a) under this License, provided that you make a good faith effort to ensure that, in the event an Application does not supply the function or data, the facility still operates, and performs whatever part of its purpose remains meaningful, or
- b) under the GNU GPL, with none of the additional permissions of this License applicable to that copy.

3. Object Code Incorporating Material from Library Header Files.

The object code form of an Application may incorporate material from a header file that is part of the Library. You may convey such object code under terms of your choice, provided that, if the incorporated material is not limited to numerical parameters, data structure

layouts and accessors, or small macros, inline functions and templates (ten or fewer lines in length), you do both of the following:

- a) Give prominent notice with each copy of the object code that the Library is used in it and that the Library and its use are covered by this License.
- b) Accompany the object code with a copy of the GNU GPL and this license document.

4. Combined Works.

You may convey a Combined Work under terms of your choice that, taken together, effectively do not restrict modification of the portions of the Library contained in the Combined Work and reverse engineering for debugging such modifications, if you also do each of the following:

- a) Give prominent notice with each copy of the Combined Work that the Library is used in it and that the Library and its use are covered by this License.
- b) Accompany the Combined Work with a copy of the GNU GPL and this license document.
- c) For a Combined Work that displays copyright notices during execution, include the copyright notice for the Library among these notices, as well as a reference directing the user to the copies of the GNU GPL and this license document.

d) Do one of the following:

- 0) Convey the Minimal Corresponding Source under the terms of this License, and the Corresponding Application Code in a form suitable for, and under terms that permit, the user to recombine or relink the Application with a modified version of the Linked Version to produce a modified Combined Work, in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.

- 1) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (a) uses at run time a copy of the Library already present on the user's computer system, and (b) will operate properly with a modified version of the Library that is interface-compatible with the Linked Version.

e) Provide Installation Information, but only if you would otherwise

be required to provide such information under section 6 of the GNU GPL, and only to the extent that such information is necessary to install and execute a modified version of the Combined Work produced by recombining or relinking the Application with a modified version of the Linked Version. (If you use option 4d0, the Installation Information must accompany the Minimal Corresponding Source and Corresponding Application Code. If you use option 4d1, you must provide the Installation Information in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.)

5. Combined Libraries.

You may place library facilities that are a work based on the Library side by side in a single library together with other library facilities that are not Applications and are not covered by this License, and convey such a combined library under terms of your choice, if you do both of the following:

- a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities, conveyed under the terms of this License.
- b) Give prominent notice with the combined library that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

6. Revised Versions of the GNU Lesser General Public License.

The Free Software Foundation may publish revised and/or new versions of the GNU Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library as you received it specifies that a certain numbered version of the GNU Lesser General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that published version or of any later version published by the Free Software Foundation. If the Library as you received it does not specify a version number of the GNU Lesser General Public License, you may choose any version of the GNU Lesser General Public License ever published by the Free Software Foundation.

If the Library as you received it specifies that a proxy can decide whether future versions of the GNU Lesser General Public License shall apply, that proxy's public statement of acceptance of any version is permanent authorization for you to choose that version for the

Library.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts
as the successor of the GNU Library Public License, version 2, hence
the version number 2.1.]

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
Licenses are intended to guarantee your freedom to share and change
free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some
specially designated software packages--typically libraries--of the
Free Software Foundation and other authors who decide to use it. You
can use it too, but we suggest you first think carefully about whether
this license or the ordinary General Public License is the better
strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use,
not price. Our General Public Licenses are designed to make sure that
you have the freedom to distribute copies of free software (and charge
for this service if you wish); that you receive source code or can get
it if you want it; that you can change the software and use pieces of
it in new free programs; and that you are informed that you can do
these things.

To protect your rights, we need to make restrictions that forbid

distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less

of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a

portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or

table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or

derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse

engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on

which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with

this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and

"any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990

Ty Coon, President of Vice

That's all there is to it!

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free

software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this

License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any

associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by

all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes

make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful,

but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands ``show w'` and ``show c'` should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than ``show w'` and ``show c'`; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

GNU GENERAL PUBLIC LICENSE
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<http://fsf.org/>>
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for

software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions

of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the

extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all

recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".
- c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.
- d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family,

or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions.

Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms

of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do

not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a

later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <<http://www.gnu.org/licenses/>>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

```
<program> Copyright (C) <year> <name of author>  
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <<http://www.gnu.org/licenses/>>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <<http://www.gnu.org/philosophy/why-not-lgpl.html>>. License below is copied from <<http://www.unicode.org/copyright.html>>, last updated 7 July 2004, and claims to apply to all Unicode versions.

According to a post on emacs-devel, <<http://lists.gnu.org/archive/html/emacs-devel/2004-04/msg00036.html>>, RMS believe it is a free license:

This is a free license, and even compatible with the GPL (if

that ever matters). Yes, we can use it now.

EXHIBIT 1

UNICODE, INC. LICENSE AGREEMENT - DATA FILES AND SOFTWARE

Unicode Data Files include all data files under the directories

<http://www.unicode.org/Public/> and

<http://www.unicode.org/reports/>. Unicode Software includes any source

code under the directories <http://www.unicode.org/Public/> and

<http://www.unicode.org/reports/>.

NOTICE TO USER: Carefully read the following legal agreement. BY DOWNLOADING, INSTALLING, COPYING OR OTHERWISE USING UNICODE INC.'S DATA FILES ("DATA FILES"), AND/OR SOFTWARE ("SOFTWARE"), YOU UNEQUIVOCALLY ACCEPT, AND AGREE TO BE BOUND BY, ALL OF THE TERMS AND CONDITIONS OF THIS AGREEMENT. IF YOU DO NOT AGREE, DO NOT DOWNLOAD, INSTALL, COPY, DISTRIBUTE OR USE THE DATA FILES OR SOFTWARE.

COPYRIGHT AND PERMISSION NOTICE

Copyright 1991-2004 Unicode, Inc. All rights reserved. Distributed under the Terms of Use in <http://www.unicode.org/copyright.html>.

Permission is hereby granted, free of charge, to any person obtaining a copy of the Unicode data files and associated documentation (the "Data Files") or Unicode software and associated documentation (the "Software") to deal in the Data Files or Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, and/or sell copies of the Data Files or Software, and to permit persons to whom the Data Files or Software are furnished to do so, provided that (a) the above copyright notice(s) and this permission notice appear in all copies of the Data Files or Software, (b) both the above copyright notice(s) and this permission notice appear in associated documentation, and (c) there is clear notice in each modified Data File or in the Software as well as in the documentation associated with the Data File(s) or Software that the data or software has been modified.

THE DATA FILES AND SOFTWARE ARE PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF THIRD PARTY RIGHTS. IN NO EVENT SHALL THE COPYRIGHT HOLDER OR HOLDERS INCLUDED IN THIS NOTICE BE LIABLE FOR ANY CLAIM, OR ANY SPECIAL INDIRECT OR CONSEQUENTIAL DAMAGES, OR ANY DAMAGES WHATSOEVER RESULTING FROM LOSS OF USE, DATA OR PROFITS, WHETHER IN AN ACTION OF CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THE DATA FILES OR SOFTWARE.

Except as contained in this notice, the name of a copyright holder shall not be used in advertising or otherwise to promote the sale, use or other dealings in these Data Files or Software without prior written authorization of the copyright holder.

GNU LESSER GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<http://fsf.org/>>
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

This version of the GNU Lesser General Public License incorporates the terms and conditions of version 3 of the GNU General Public License, supplemented by the additional permissions listed below.

0. Additional Definitions.

As used herein, "this License" refers to version 3 of the GNU Lesser General Public License, and the "GNU GPL" refers to version 3 of the GNU General Public License.

"The Library" refers to a covered work governed by this License, other than an Application or a Combined Work as defined below.

An "Application" is any work that makes use of an interface provided by the Library, but which is not otherwise based on the Library. Defining a subclass of a class defined by the Library is deemed a mode of using an interface provided by the Library.

A "Combined Work" is a work produced by combining or linking an Application with the Library. The particular version of the Library with which the Combined Work was made is also called the "Linked Version".

The "Minimal Corresponding Source" for a Combined Work means the Corresponding Source for the Combined Work, excluding any source code for portions of the Combined Work that, considered in isolation, are based on the Application, and not on the Linked Version.

The "Corresponding Application Code" for a Combined Work means the object code and/or source code for the Application, including any data and utility programs needed for reproducing the Combined Work from the Application, but excluding the System Libraries of the Combined Work.

1. Exception to Section 3 of the GNU GPL.

You may convey a covered work under sections 3 and 4 of this License without being bound by section 3 of the GNU GPL.

2. Conveying Modified Versions.

If you modify a copy of the Library, and, in your modifications, a facility refers to a function or data to be supplied by an Application that uses the facility (other than as an argument passed when the facility is invoked), then you may convey a copy of the modified version:

- a) under this License, provided that you make a good faith effort to ensure that, in the event an Application does not supply the function or data, the facility still operates, and performs whatever part of its purpose remains meaningful, or
- b) under the GNU GPL, with none of the additional permissions of this License applicable to that copy.

3. Object Code Incorporating Material from Library Header Files.

The object code form of an Application may incorporate material from a header file that is part of the Library. You may convey such object code under terms of your choice, provided that, if the incorporated material is not limited to numerical parameters, data structure layouts and accessors, or small macros, inline functions and templates (ten or fewer lines in length), you do both of the following:

- a) Give prominent notice with each copy of the object code that the Library is used in it and that the Library and its use are covered by this License.
- b) Accompany the object code with a copy of the GNU GPL and this license document.

4. Combined Works.

You may convey a Combined Work under terms of your choice that, taken together, effectively do not restrict modification of the portions of the Library contained in the Combined Work and reverse engineering for debugging such modifications, if you also do each of the following:

- a) Give prominent notice with each copy of the Combined Work that the Library is used in it and that the Library and its use are covered by this License.
- b) Accompany the Combined Work with a copy of the GNU GPL and this license

document.

c) For a Combined Work that displays copyright notices during execution, include the copyright notice for the Library among these notices, as well as a reference directing the user to the copies of the GNU GPL and this license document.

d) Do one of the following:

0) Convey the Minimal Corresponding Source under the terms of this License, and the Corresponding Application Code in a form suitable for, and under terms that permit, the user to recombine or relink the Application with a modified version of the Linked Version to produce a modified Combined Work, in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.

1) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (a) uses at run time a copy of the Library already present on the user's computer system, and (b) will operate properly with a modified version of the Library that is interface-compatible with the Linked Version.

e) Provide Installation Information, but only if you would otherwise be required to provide such information under section 6 of the GNU GPL, and only to the extent that such information is necessary to install and execute a modified version of the Combined Work produced by recombining or relinking the Application with a modified version of the Linked Version. (If you use option 4d0, the Installation Information must accompany the Minimal Corresponding Source and Corresponding Application Code. If you use option 4d1, you must provide the Installation Information in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.)

5. Combined Libraries.

You may place library facilities that are a work based on the Library side by side in a single library together with other library facilities that are not Applications and are not covered by this License, and convey such a combined library under terms of your choice, if you do both of the following:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities, conveyed under the terms of this License.

b) Give prominent notice with the combined library that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

6. Revised Versions of the GNU Lesser General Public License.

The Free Software Foundation may publish revised and/or new versions of the GNU Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library as you received it specifies that a certain numbered version of the GNU Lesser General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that published version or of any later version published by the Free Software Foundation. If the Library as you received it does not specify a version number of the GNU Lesser General Public License, you may choose any version of the GNU Lesser General Public License ever published by the Free Software Foundation.

If the Library as you received it specifies that a proxy can decide whether future versions of the GNU Lesser General Public License shall apply, that proxy's public statement of acceptance of any version is permanent authorization for you to choose that version for the Library.

Libidn COPYING -- Explanation of licensing conditions.

Copyright (C) 2002-2015 Simon Josefsson

See the end for copying conditions.

The source code for the C library (libidn.a or libidn.so), the C# library (Libidn.dll) and the Java library (libidn-*.jar) are licensed under the terms of either the GNU General Public License version 2.0 or later (see the file COPYINGv2) or the GNU Lesser General Public License version 3.0 or later (see the file COPYING.LESSERv3), or both in parallel as here.

The author of the Java library has agreed to also distribute it under the Apache License Version 2.0 (see the file java/LICENSE-2.0).

The manual is licensed under the GNU Free Documentation License, Version 1.3 or any later.

The command line tool, self tests, examples, and other auxilliary files, are licensed under the GNU General Public License version 3.0 or later.

Other files are licensed as indicated in each file.

There may be exceptions to these general rules, see each file for precise information.

Copying and distribution of this file, with or without modification, are permitted in any medium without royalty provided the copyright notice and this notice are preserved.

Apache License
Version 2.0, January 2004
<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed

with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate

comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

Licensed under the Apache License, Version 2.0 (the "License"); you may not use this file except in compliance with the License. You may obtain a copy of the License at

<http://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and limitations under the License.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it

in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of

running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the

entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not

compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the

integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS

TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

GNU LESSER GENERAL PUBLIC LICENSE
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You

can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those

libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other

program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2,

instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative

work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or

distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the

original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF

SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

Here is a list of the main contributors to lm-sensors version 3.

* Frodo Looijaard

Original author of libsensors, sensors-detect, sensors and isadump.

* Merlin Hughes

Original author of sensord.

* Bob Schlaermann

Dynamic chip feature detection (a.k.a. generic chip support) in libsensors and sensors.

* Mark M. Hoffman

Many improvements to the libsensors configuration file scanner.

* Jean Delvare

New libsensors API, and migration of sensors and sensord thereto.

Many optimizations in libsensors and sensors.

Configuration file converter.

Rewrite of sensors-detect.

Support for multiple configuration files in libsensors.

PYTHON SOFTWARE FOUNDATION LICENSE VERSION 2

1. This LICENSE AGREEMENT is between the Python Software Foundation ("PSF"), and the Individual or Organization ("Licensee") accessing and otherwise using this software ("Python") in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, PSF hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python alone or in any derivative version, provided, however, that PSF's License Agreement and PSF's notice of copyright, i.e., "Copyright (c) 2001, 2002, 2003, 2004, 2005, 2006 Python Software Foundation; All Rights Reserved" are retained in Python alone or in any derivative version prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on or incorporates Python or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python.

4. PSF is making Python available to Licensee on an "AS IS" basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between PSF and Licensee. This License Agreement does not grant permission to use PSF trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By copying, installing or otherwise using Python, Licensee agrees to be bound by the terms and conditions of this License Agreement.

Copyright (C) 2017 - 2018, Stephan Mueller <smueller@chronox.de>

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the above copyright notice, and the entire permission notice in its entirety, including the disclaimer of warranties.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
3. The name of the author may not be used to endorse or promote products derived from this software without specific prior written permission.

ALTERNATIVELY, this product may be distributed under the terms of the GNU General Public License, in which case the provisions of the GPL2 are required INSTEAD OF the above restrictions. (This clause is

necessary due to a potential bad interaction between the GPL and the restrictions contained in a BSD-style copyright.)

THIS SOFTWARE IS PROVIDED ``AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ALL OF WHICH ARE HEREBY DISCLAIMED. IN NO EVENT SHALL THE AUTHOR BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF NOT ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.

51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether

gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate

copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program

with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such

parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING

OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author  
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate

parts of the General Public License. Of course, the commands you use may be called something other than `show w` and `show c`; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes

of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You

meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor,

except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical

transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable

by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use,

reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.
Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

GNU LESSER GENERAL PUBLIC LICENSE
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
59 Temple Place, Suite 330, Boston, MA 02111-1307 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts
as the successor of the GNU Library Public License, version 2, hence
the version number 2.1.]

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
Licenses are intended to guarantee your freedom to share and change
free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some
specially designated software packages--typically libraries--of the
Free Software Foundation and other authors who decide to use it. You
can use it too, but we suggest you first think carefully about whether
this license or the ordinary General Public License is the better

strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of

this Lesser General Public License (also called "this License").

Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify

that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above

specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by

modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries,

so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free

software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1

above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest

possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author  
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program  
'Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
<signature of Ty Coon>, 1 April 1989
```

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

## 1.372 netcat 0.7.1

### 1.372.1 Available under license :

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.

59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

#### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free

program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE  
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any

part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any

later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.
```

<signature of Ty Coon>, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General

Public License instead of this License.

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This

General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains

a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but

does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to

control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then

the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals

of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

## NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of

MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands ``show w'` and ``show c'` should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than ``show w'` and ``show c'`; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

## 1.378 golang 1.12.2

### 1.378.1 Available under license :

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation

source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable

(except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and

may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify,

defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "{}" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright {yyyy} {name of copyright owner}

Licensed under the Apache License, Version 2.0 (the "License"); you may not use this file except in compliance with the License. You may obtain a copy of the License at

<http://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and limitations under the License.

```
This is the official list of people who can contribute
(and typically have contributed) code to the Go repository.
The AUTHORS file lists the copyright holders; this file
lists people. For example, Google employees are listed here
but not in AUTHORS, because Google holds the copyright.
#
Names should be added to this file only after verifying that
the individual or the individual's organization has agreed to
the appropriate Contributor License Agreement, found here:
#
http://code.google.com/legal/individual-cla-v1.0.html
http://code.google.com/legal/corporate-cla-v1.0.html
#
The agreement for individuals can be filled out on the web.

Names should be added to this file like so:
Individual's name <submission email address>
Individual's name <submission email address> <email2> <emailN>
```

#  
# An entry with multiple email addresses specifies that the  
# first address should be used in the submit logs and  
# that the other addresses should be recognized as the  
# same person when interacting with Gerrit.

# Please keep the list sorted.

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common

control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
  - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or

documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill,

work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

#### END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

Licensed under the Apache License, Version 2.0 (the "License");  
you may not use this file except in compliance with the License.  
You may obtain a copy of the License at

<http://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and limitations under the License.

## 1.379.1 Available under license :

### GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts  
as the successor of the GNU Library Public License, version 2, hence  
the version number 2.1.]

#### Preamble

The licenses for most software are designed to take away your  
freedom to share and change it. By contrast, the GNU General Public  
Licenses are intended to guarantee your freedom to share and change  
free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some  
specially designated software packages--typically libraries--of the  
Free Software Foundation and other authors who decide to use it. You  
can use it too, but we suggest you first think carefully about whether  
this license or the ordinary General Public License is the better  
strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use,  
not price. Our General Public Licenses are designed to make sure that  
you have the freedom to distribute copies of free software (and charge  
for this service if you wish); that you receive source code or can get  
it if you want it; that you can change the software and use pieces of  
it in new free programs; and that you are informed that you can do  
these things.

To protect your rights, we need to make restrictions that forbid  
distributors to deny you these rights or to ask you to surrender these  
rights. These restrictions translate to certain responsibilities for  
you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis  
or for a fee, you must give the recipients all the rights that we gave  
you. You must make sure that they, too, receive or can get the source  
code. If you link other code with the library, you must provide  
complete object files to the recipients, so that they can relink them  
with the library after making changes to the library and recompiling  
it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

#### GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of

running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library,

and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever

changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined

library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then

the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status

of all derivatives of our free software and of promoting the sharing and reuse of software generally.

## NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful,  
but WITHOUT ANY WARRANTY; without even the implied warranty of  
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU  
Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public  
License along with this library; if not, write to the Free Software  
Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your  
school, if any, to sign a "copyright disclaimer" for the library, if  
necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the  
library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990  
Ty Coon, President of Vice

That's all there is to it!

## 1.380.1 Available under license :

GNU GENERAL PUBLIC LICENSE  
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

### Preamble

The licenses for most software are designed to take away your  
freedom to share and change it. By contrast, the GNU General Public  
License is intended to guarantee your freedom to share and change free  
software--to make sure the software is free for all its users. This  
General Public License applies to most of the Free Software  
Foundation's software and to any other program whose authors commit to  
using it. (Some other Free Software Foundation software is covered by  
the GNU Lesser General Public License instead.) You can apply it to  
your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## GNU GENERAL PUBLIC LICENSE

### TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another

language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in

themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other

circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY

FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

### 1.382.1 Available under license :

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<http://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

#### Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not

price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

## TERMS AND CONDITIONS

### 0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

### 1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official

standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

## 2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose

of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

### 3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

### 4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

### 5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified

it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

## 6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the

product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods,

procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

## 7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work,

for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

## 8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

## 9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

## 10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an

organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

## 11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means,

then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

## 12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

### 13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

### 14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

### 15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

## 16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## 17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <http://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

```
<program> Copyright (C) <year> <name of author>
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <http://www.gnu.org/philosophy/why-not-lgpl.html>.

GNU LESSER GENERAL PUBLIC LICENSE  
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <http://fsf.org/>  
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

This version of the GNU Lesser General Public License incorporates the terms and conditions of version 3 of the GNU General Public License, supplemented by the additional permissions listed below.

0. Additional Definitions.

As used herein, "this License" refers to version 3 of the GNU Lesser General Public License, and the "GNU GPL" refers to version 3 of the GNU General Public License.

"The Library" refers to a covered work governed by this License, other than an Application or a Combined Work as defined below.

An "Application" is any work that makes use of an interface provided by the Library, but which is not otherwise based on the Library. Defining a subclass of a class defined by the Library is deemed a mode of using an interface provided by the Library.

A "Combined Work" is a work produced by combining or linking an Application with the Library. The particular version of the Library with which the Combined Work was made is also called the "Linked Version".

The "Minimal Corresponding Source" for a Combined Work means the Corresponding Source for the Combined Work, excluding any source code for portions of the Combined Work that, considered in isolation, are based on the Application, and not on the Linked Version.

The "Corresponding Application Code" for a Combined Work means the object code and/or source code for the Application, including any data and utility programs needed for reproducing the Combined Work from the Application, but excluding the System Libraries of the Combined Work.

#### 1. Exception to Section 3 of the GNU GPL.

You may convey a covered work under sections 3 and 4 of this License without being bound by section 3 of the GNU GPL.

#### 2. Conveying Modified Versions.

If you modify a copy of the Library, and, in your modifications, a facility refers to a function or data to be supplied by an Application that uses the facility (other than as an argument passed when the facility is invoked), then you may convey a copy of the modified version:

- a) under this License, provided that you make a good faith effort to ensure that, in the event an Application does not supply the function or data, the facility still operates, and performs whatever part of its purpose remains meaningful, or
- b) under the GNU GPL, with none of the additional permissions of this License applicable to that copy.

#### 3. Object Code Incorporating Material from Library Header Files.

The object code form of an Application may incorporate material from a header file that is part of the Library. You may convey such object code under terms of your choice, provided that, if the incorporated material is not limited to numerical parameters, data structure

layouts and accessors, or small macros, inline functions and templates (ten or fewer lines in length), you do both of the following:

- a) Give prominent notice with each copy of the object code that the Library is used in it and that the Library and its use are covered by this License.
- b) Accompany the object code with a copy of the GNU GPL and this license document.

#### 4. Combined Works.

You may convey a Combined Work under terms of your choice that, taken together, effectively do not restrict modification of the portions of the Library contained in the Combined Work and reverse engineering for debugging such modifications, if you also do each of the following:

- a) Give prominent notice with each copy of the Combined Work that the Library is used in it and that the Library and its use are covered by this License.
- b) Accompany the Combined Work with a copy of the GNU GPL and this license document.
- c) For a Combined Work that displays copyright notices during execution, include the copyright notice for the Library among these notices, as well as a reference directing the user to the copies of the GNU GPL and this license document.

d) Do one of the following:

- 0) Convey the Minimal Corresponding Source under the terms of this License, and the Corresponding Application Code in a form suitable for, and under terms that permit, the user to recombine or relink the Application with a modified version of the Linked Version to produce a modified Combined Work, in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.

- 1) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (a) uses at run time a copy of the Library already present on the user's computer system, and (b) will operate properly with a modified version of the Library that is interface-compatible with the Linked Version.

e) Provide Installation Information, but only if you would otherwise

be required to provide such information under section 6 of the GNU GPL, and only to the extent that such information is necessary to install and execute a modified version of the Combined Work produced by recombining or relinking the Application with a modified version of the Linked Version. (If you use option 4d0, the Installation Information must accompany the Minimal Corresponding Source and Corresponding Application Code. If you use option 4d1, you must provide the Installation Information in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.)

#### 5. Combined Libraries.

You may place library facilities that are a work based on the Library side by side in a single library together with other library facilities that are not Applications and are not covered by this License, and convey such a combined library under terms of your choice, if you do both of the following:

- a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities, conveyed under the terms of this License.
- b) Give prominent notice with the combined library that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

#### 6. Revised Versions of the GNU Lesser General Public License.

The Free Software Foundation may publish revised and/or new versions of the GNU Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library as you received it specifies that a certain numbered version of the GNU Lesser General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that published version or of any later version published by the Free Software Foundation. If the Library as you received it does not specify a version number of the GNU Lesser General Public License, you may choose any version of the GNU Lesser General Public License ever published by the Free Software Foundation.

If the Library as you received it specifies that a proxy can decide whether future versions of the GNU Lesser General Public License shall apply, that proxy's public statement of acceptance of any version is permanent authorization for you to choose that version for the

## 1.383.1 Available under license :

Mozilla Public License Version 2.0

=====

### 1. Definitions

-----

#### 1.1. "Contributor"

means each individual or legal entity that creates, contributes to the creation of, or owns Covered Software.

#### 1.2. "Contributor Version"

means the combination of the Contributions of others (if any) used by a Contributor and that particular Contributor's Contribution.

#### 1.3. "Contribution"

means Covered Software of a particular Contributor.

#### 1.4. "Covered Software"

means Source Code Form to which the initial Contributor has attached the notice in Exhibit A, the Executable Form of such Source Code Form, and Modifications of such Source Code Form, in each case including portions thereof.

#### 1.5. "Incompatible With Secondary Licenses"

means

(a) that the initial Contributor has attached the notice described in Exhibit B to the Covered Software; or

(b) that the Covered Software was made available under the terms of version 1.1 or earlier of the License, but not also under the terms of a Secondary License.

#### 1.6. "Executable Form"

means any form of the work other than Source Code Form.

#### 1.7. "Larger Work"

means a work that combines Covered Software with other material, in a separate file or files, that is not Covered Software.

#### 1.8. "License"

means this document.

1.9. "Licensable"

means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently, any and all of the rights conveyed by this License.

1.10. "Modifications"

means any of the following:

(a) any file in Source Code Form that results from an addition to, deletion from, or modification of the contents of Covered Software; or

(b) any new file in Source Code Form that contains any Covered Software.

1.11. "Patent Claims" of a Contributor

means any patent claim(s), including without limitation, method, process, and apparatus claims, in any patent Licensable by such Contributor that would be infringed, but for the grant of the License, by the making, using, selling, offering for sale, having made, import, or transfer of either its Contributions or its Contributor Version.

1.12. "Secondary License"

means either the GNU General Public License, Version 2.0, the GNU Lesser General Public License, Version 2.1, the GNU Affero General Public License, Version 3.0, or any later versions of those licenses.

1.13. "Source Code Form"

means the form of the work preferred for making modifications.

1.14. "You" (or "Your")

means an individual or a legal entity exercising rights under this License. For legal entities, "You" includes any entity that controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants and Conditions

-----

2.1. Grants

Each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

- (a) under intellectual property rights (other than patent or trademark) Licensable by such Contributor to use, reproduce, make available, modify, display, perform, distribute, and otherwise exploit its Contributions, either on an unmodified basis, with Modifications, or as part of a Larger Work; and
- (b) under Patent Claims of such Contributor to make, use, sell, offer for sale, have made, import, and otherwise transfer either its Contributions or its Contributor Version.

## 2.2. Effective Date

The licenses granted in Section 2.1 with respect to any Contribution become effective for each Contribution on the date the Contributor first distributes such Contribution.

## 2.3. Limitations on Grant Scope

The licenses granted in this Section 2 are the only rights granted under this License. No additional rights or licenses will be implied from the distribution or licensing of Covered Software under this License. Notwithstanding Section 2.1(b) above, no patent license is granted by a Contributor:

- (a) for any code that a Contributor has removed from Covered Software; or
- (b) for infringements caused by: (i) Your and any other third party's modifications of Covered Software, or (ii) the combination of its Contributions with other software (except as part of its Contributor Version); or
- (c) under Patent Claims infringed by Covered Software in the absence of its Contributions.

This License does not grant any rights in the trademarks, service marks, or logos of any Contributor (except as may be necessary to comply with the notice requirements in Section 3.4).

## 2.4. Subsequent Licenses

No Contributor makes additional grants as a result of Your choice to distribute the Covered Software under a subsequent version of this License (see Section 10.2) or under the terms of a Secondary License (if permitted under the terms of Section 3.3).

## 2.5. Representation

Each Contributor represents that the Contributor believes its Contributions are its original creation(s) or it has sufficient rights to grant the rights to its Contributions conveyed by this License.

## 2.6. Fair Use

This License is not intended to limit any rights You have under applicable copyright doctrines of fair use, fair dealing, or other equivalents.

## 2.7. Conditions

Sections 3.1, 3.2, 3.3, and 3.4 are conditions of the licenses granted in Section 2.1.

## 3. Responsibilities

-----

### 3.1. Distribution of Source Form

All distribution of Covered Software in Source Code Form, including any Modifications that You create or to which You contribute, must be under the terms of this License. You must inform recipients that the Source Code Form of the Covered Software is governed by the terms of this License, and how they can obtain a copy of this License. You may not attempt to alter or restrict the recipients' rights in the Source Code Form.

### 3.2. Distribution of Executable Form

If You distribute Covered Software in Executable Form then:

- (a) such Covered Software must also be made available in Source Code Form, as described in Section 3.1, and You must inform recipients of the Executable Form how they can obtain a copy of such Source Code Form by reasonable means in a timely manner, at a charge no more than the cost of distribution to the recipient; and
- (b) You may distribute such Executable Form under the terms of this License, or sublicense it under different terms, provided that the license for the Executable Form does not attempt to limit or alter the recipients' rights in the Source Code Form under this License.

### 3.3. Distribution of a Larger Work

You may create and distribute a Larger Work under terms of Your choice, provided that You also comply with the requirements of this License for the Covered Software. If the Larger Work is a combination of Covered Software with a work governed by one or more Secondary Licenses, and the Covered Software is not Incompatible With Secondary Licenses, this License permits You to additionally distribute such Covered Software under the terms of such Secondary License(s), so that the recipient of the Larger Work may, at their option, further distribute the Covered Software under the terms of either this License or such Secondary License(s).

#### 3.4. Notices

You may not remove or alter the substance of any license notices (including copyright notices, patent notices, disclaimers of warranty, or limitations of liability) contained within the Source Code Form of the Covered Software, except that You may alter any license notices to the extent required to remedy known factual inaccuracies.

#### 3.5. Application of Additional Terms

You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, You may do so only on Your own behalf, and not on behalf of any Contributor. You must make it absolutely clear that any such warranty, support, indemnity, or liability obligation is offered by You alone, and You hereby agree to indemnify every Contributor for any liability incurred by such Contributor as a result of warranty, support, indemnity or liability terms You offer. You may include additional disclaimers of warranty and limitations of liability specific to any jurisdiction.

#### 4. Inability to Comply Due to Statute or Regulation

-----

If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Covered Software due to statute, judicial order, or regulation then You must: (a) comply with the terms of this License to the maximum extent possible; and (b) describe the limitations and the code they affect. Such description must be placed in a text file included with all distributions of the Covered Software under this License. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient of ordinary skill to be able to understand it.

#### 5. Termination

-----

5.1. The rights granted under this License will terminate automatically if You fail to comply with any of its terms. However, if You become compliant, then the rights granted under this License from a particular Contributor are reinstated (a) provisionally, unless and until such Contributor explicitly and finally terminates Your grants, and (b) on an ongoing basis, if such Contributor fails to notify You of the non-compliance by some reasonable means prior to 60 days after You have come back into compliance. Moreover, Your grants from a particular Contributor are reinstated on an ongoing basis if such Contributor notifies You of the non-compliance by some reasonable means, this is the first time You have received notice of non-compliance with this License from such Contributor, and You become compliant prior to 30 days after Your receipt of the notice.

5.2. If You initiate litigation against any entity by asserting a patent infringement claim (excluding declaratory judgment actions, counter-claims, and cross-claims) alleging that a Contributor Version directly or indirectly infringes any patent, then the rights granted to You by any and all Contributors for the Covered Software under Section 2.1 of this License shall terminate.

5.3. In the event of termination under Sections 5.1 or 5.2 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You or Your distributors under this License prior to termination shall survive termination.

\*\*\*\*\*

```
*
*
* 6. Disclaimer of Warranty
* -----
*
* Covered Software is provided under this License on an "as is"
* basis, without warranty of any kind, either expressed, implied, or
* statutory, including, without limitation, warranties that the
* Covered Software is free of defects, merchantable, fit for a
* particular purpose or non-infringing. The entire risk as to the
* quality and performance of the Covered Software is with You.
* Should any Covered Software prove defective in any respect, You
* (not any Contributor) assume the cost of any necessary servicing,
* repair, or correction. This disclaimer of warranty constitutes an
* essential part of this License. No use of any Covered Software is
* authorized under this License except under this disclaimer.
*
```

\*\*\*\*\*

\*\*\*\*\*

```
*
*
* 7. Limitation of Liability
*
```

\* ----- \*

\* \*

\* Under no circumstances and under no legal theory, whether tort \*

\* (including negligence), contract, or otherwise, shall any \*

\* Contributor, or anyone who distributes Covered Software as \*

\* permitted above, be liable to You for any direct, indirect, \*

\* special, incidental, or consequential damages of any character \*

\* including, without limitation, damages for lost profits, loss of \*

\* goodwill, work stoppage, computer failure or malfunction, or any \*

\* and all other commercial damages or losses, even if such party \*

\* shall have been informed of the possibility of such damages. This \*

\* limitation of liability shall not apply to liability for death or \*

\* personal injury resulting from such party's negligence to the \*

\* extent applicable law prohibits such limitation. Some \*

\* jurisdictions do not allow the exclusion or limitation of \*

\* incidental or consequential damages, so this exclusion and \*

\* limitation may not apply to You. \*

\* \*

\*\*\*\*\*

## 8. Litigation

-----

Any litigation relating to this License may be brought only in the courts of a jurisdiction where the defendant maintains its principal place of business and such litigation shall be governed by laws of that jurisdiction, without reference to its conflict-of-law provisions. Nothing in this Section shall prevent a party's ability to bring cross-claims or counter-claims.

## 9. Miscellaneous

-----

This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not be used to construe this License against a Contributor.

## 10. Versions of the License

-----

### 10.1. New Versions

Mozilla Foundation is the license steward. Except as provided in Section 10.3, no one other than the license steward has the right to modify or publish new versions of this License. Each version will be given a

distinguishing version number.

### 10.2. Effect of New Versions

You may distribute the Covered Software under the terms of the version of the License under which You originally received the Covered Software, or under the terms of any subsequent version published by the license steward.

### 10.3. Modified Versions

If you create software not governed by this License, and you want to create a new license for such software, you may create and use a modified version of this License if you rename the license and remove any references to the name of the license steward (except to note that such modified license differs from this License).

### 10.4. Distributing Source Code Form that is Incompatible With Secondary Licenses

If You choose to distribute Source Code Form that is Incompatible With Secondary Licenses under the terms of this version of the License, the notice described in Exhibit B of this License must be attached.

#### Exhibit A - Source Code Form License Notice

-----

This Source Code Form is subject to the terms of the Mozilla Public License, v. 2.0. If a copy of the MPL was not distributed with this file, You can obtain one at <http://mozilla.org/MPL/2.0/>.

If it is not possible or desirable to put the notice in a particular file, then You may include the notice in a location (such as a LICENSE file in a relevant directory) where a recipient would be likely to look for such a notice.

You may add additional accurate notices of copyright ownership.

#### Exhibit B - "Incompatible With Secondary Licenses" Notice

-----

This Source Code Form is "Incompatible With Secondary Licenses", as defined by the Mozilla Public License, v. 2.0.  
Copyright 2005 Sun Microsystems, Inc. All rights reserved.  
Use is subject to license terms.

This Source Code Form is subject to the terms of the Mozilla Public License, v. 2.0. If a copy of the MPL was not distributed with this

file, You can obtain one at <http://mozilla.org/MPL/2.0/>.

Mozilla Elliptic Curve Cryptography (ECC)
```

```
Mozilla ECC Notice
```

This notice is provided with respect to Elliptic Curve Cryptography, which is included with JRE, JDK, and OpenJDK.

You are receiving a  
[copy](<http://hg.openjdk.java.net/jdk9/jdk9/jdk/file/tip/src/jdk.crypto.ec/share/native/libsunec/impl>)  
of the Elliptic Curve Cryptography library in source

form with the JDK and OpenJDK source distributions, and as object code in the JRE & JDK runtimes.

```
<pre>
```

In the case of the JRE & JDK runtimes, the terms of the Oracle license do NOT apply to the Elliptic Curve Cryptography library; it is licensed under the following license, separately from Oracle's JDK & JRE. If you do not wish to install the Elliptic Curve Cryptography library, you may delete the Elliptic Curve Cryptography library:

- On Solaris and Linux systems: delete \$(JAVA\_HOME)/lib/libsunec.so
- On Mac OSX systems: delete \$(JAVA\_HOME)/lib/libsunec.dylib
- On Windows systems: delete \$(JAVA\_HOME)\bin\sunec.dll

```
</pre>
```

### Written Offer for Source Code

```
<pre>
```

For third party technology that you receive from Oracle in binary form which is licensed under an open source license that gives you the right to receive the source code for that binary, you can obtain a copy of the applicable source code from this page:

<http://hg.openjdk.java.net/jdk9/jdk9/jdk/file/tip/src/jdk.crypto.ec/share/native/libsunec/impl>

If the source code for the technology was not provided to you with the binary, you can also receive a copy of the source code on physical media by submitting a written request to:

Oracle America, Inc.  
Attn: Associate General Counsel,  
Development and Engineering Legal  
500 Oracle Parkway, 10th Floor  
Redwood Shores, CA 94065

Or, you may send an email to Oracle using the form at:

<http://www.oracle.com/goto/opensourcecode/request>

Your request should include:

- The name of the component or binary file(s) for which you are requesting the source code
- The name and version number of the Oracle product containing the binary
- The date you received the Oracle product
- Your name
- Your company name (if applicable)

- Your return mailing address and email and
- A telephone number in the event we need to reach you.

We may charge you a fee to cover the cost of physical media and processing. Your request must be sent (i) within three (3) years of the date you received the Oracle product that included the component or binary file(s) that are the subject of your request, or (ii) in the case of code licensed under the GPL v3, for as long as Oracle offers spare parts or customer support for that product model.

</pre>

### LGPL 2.1

<pre>

## GNU LESSER GENERAL PUBLIC LICENSE Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts  
as the successor of the GNU Library Public License, version 2, hence  
the version number 2.1.]

### Preamble

The licenses for most software are designed to take away your  
freedom to share and change it. By contrast, the GNU General Public  
Licenses are intended to guarantee your freedom to share and change  
free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some  
specially designated software packages--typically libraries--of the  
Free Software Foundation and other authors who decide to use it. You  
can use it too, but we suggest you first think carefully about whether  
this license or the ordinary General Public License is the better  
strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use,  
not price. Our General Public Licenses are designed to make sure that  
you have the freedom to distribute copies of free software (and charge  
for this service if you wish); that you receive source code or can get  
it if you want it; that you can change the software and use pieces of

it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

## GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a

table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or

link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for

reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

- a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
- b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the

original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version,

but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that

everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>
```

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

```
<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice
```

That's all there is to it!

## libpng v1.6.35

### libpng License

<pre>

This copy of the libpng notices is provided for your convenience. In case of any discrepancy between this copy and the notices in the file png.h that is included in the libpng distribution, the latter shall prevail.

COPYRIGHT NOTICE, DISCLAIMER, and LICENSE:

If you modify libpng you may insert additional notices immediately following this sentence.

This code is released under the libpng license.

libpng versions 1.0.7, July 1, 2000 through 1.6.35, September 29, 2017 are Copyright (c) 2000-2002, 2004, 2006-2018 Glenn Randers-Pehrson, are derived from libpng-1.0.6, and are distributed according to the same disclaimer and license as libpng-1.0.6 with the following individuals added to the list of Contributing Authors:

Simon-Pierre Cadieux  
Eric S. Raymond  
Mans Rullgard  
Cosmin Truta  
Gilles Vollant  
James Yu  
Mandar Sahastrabuddhe  
Google Inc.  
Vadim Barkov

and with the following additions to the disclaimer:

There is no warranty against interference with your enjoyment of the library or against infringement. There is no warranty that our efforts or the library will fulfill any of your particular purposes or needs. This library is provided with all faults, and the entire risk of satisfactory quality, performance, accuracy, and effort is with the user.

Some files in the "contrib" directory and some configure-generated files that are distributed with libpng have other copyright owners and are released under other open source licenses.

libpng versions 0.97, January 1998, through 1.0.6, March 20, 2000, are Copyright (c) 1998-2000 Glenn Randers-Pehrson, are derived from libpng-0.96, and are distributed according to the same disclaimer and

license as libpng-0.96, with the following individuals added to the list of Contributing Authors:

Tom Lane  
Glenn Randers-Pehrson  
Willem van Schaik

libpng versions 0.89, June 1996, through 0.96, May 1997, are Copyright (c) 1996-1997 Andreas Dilger, are derived from libpng-0.88, and are distributed according to the same disclaimer and license as libpng-0.88, with the following individuals added to the list of Contributing Authors:

John Bowler  
Kevin Bracey  
Sam Bushell  
Magnus Holmgren  
Greg Roelofs  
Tom Tanner

Some files in the "scripts" directory have other copyright owners but are released under this license.

libpng versions 0.5, May 1995, through 0.88, January 1996, are Copyright (c) 1995-1996 Guy Eric Schalnat, Group 42, Inc.

For the purposes of this copyright and license, "Contributing Authors" is defined as the following set of individuals:

Andreas Dilger  
Dave Martindale  
Guy Eric Schalnat  
Paul Schmidt  
Tim Wegner

The PNG Reference Library is supplied "AS IS". The Contributing Authors and Group 42, Inc. disclaim all warranties, expressed or implied, including, without limitation, the warranties of merchantability and of fitness for any purpose. The Contributing Authors and Group 42, Inc. assume no liability for direct, indirect, incidental, special, exemplary, or consequential damages, which may result from the use of the PNG Reference Library, even if advised of the possibility of such damage.

Permission is hereby granted to use, copy, modify, and distribute this source code, or portions hereof, for any purpose, without fee, subject to the following restrictions:

1. The origin of this source code must not be misrepresented.

2. Altered versions must be plainly marked as such and must not be misrepresented as being the original source.
3. This Copyright notice may not be removed or altered from any source or altered source distribution.

The Contributing Authors and Group 42, Inc. specifically permit, without fee, and encourage the use of this source code as a component to supporting the PNG file format in commercial products. If you use this source code in a product, acknowledgment is not required but would be appreciated.

END OF COPYRIGHT NOTICE, DISCLAIMER, and LICENSE.

### Apache 2.0 License

<pre>

Apache License  
Version 2.0, January 2004  
<http://www.apache.org/licenses/>

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object

form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a

file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

Apache Xalan v2.7.2
```

```
Apache Xalan Notice
<pre>
```

```
=====
====
== NOTICE file corresponding to the section 4d of the Apache License, Version 2.0, ==
== in this case for the Apache Xalan distribution. ==
=====
====
```

This product includes software developed by  
The Apache Software Foundation (<http://www.apache.org/>).

Specifically, we only include the XSLTC portion of the source from the Xalan distribution. The Xalan project has two processors: an interpretive one (Xalan Interpretive) and a compiled one (The XSLT Compiler (XSLTC)). We \*only\* use the XSLTC part of Xalan; We use the source from the packages that are part of the XSLTC sources.

Portions of this software was originally based on the following:

- software copyright (c) 1999-2002, Lotus Development Corporation., <http://www.lotus.com>.
- software copyright (c) 2001-2002, Sun Microsystems., <http://www.sun.com>.
- software copyright (c) 2003, IBM Corporation., <http://www.ibm.com>.
- voluntary contributions made by Ovidiu Predescu ([ovidiu@cup.hp.com](mailto:ovidiu@cup.hp.com)) on behalf of the Apache Software Foundation and was originally developed at Hewlett Packard Company.

### Apache 2.0 License

<pre>

Apache License  
Version 2.0, January 2004  
<http://www.apache.org/licenses/>

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain

separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the

origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

#### ADDITIONAL INFORMATION ABOUT LICENSING

Certain files distributed by Oracle America, Inc. and/or its affiliates are subject to the following clarification and special exception to the GPLv2, based on the GNU Project exception for its Classpath libraries, known as the GNU Classpath Exception.

Note that Oracle includes multiple, independent programs in this software package. Some of those programs are provided under licenses deemed incompatible with the GPLv2 by the Free Software Foundation and others. For example, the package includes programs licensed under the Apache License, Version 2.0 and may include FreeType. Such programs are licensed to you under their original licenses.

Oracle facilitates your further distribution of this package by adding the

Classpath Exception to the necessary parts of its GPLv2 code, which permits you to use that code in combination with other independent modules not licensed under the GPLv2. However, note that this would not permit you to commingle code under an incompatible license with Oracle's GPLv2 licensed code by, for example, cutting and pasting such code into a file also containing Oracle's GPLv2 licensed code and then distributing the result.

Additionally, if you were to remove the Classpath Exception from any of the files to which it applies and distribute the result, you would likely be required to license some or all of the other code in that distribution under the GPLv2 as well, and since the GPLv2 is incompatible with the license terms of some items included in the distribution by Oracle, removing the Classpath Exception could therefore effectively compromise your ability to further distribute the package.

Failing to distribute notices associated with some files may also create unexpected legal consequences.

Proceed with caution and we recommend that you obtain the advice of a lawyer skilled in open source matters before removing the Classpath Exception or making modifications to this package which may subsequently be redistributed and/or involve the use of third party software.

#### OPENJDK ASSEMBLY EXCEPTION

The OpenJDK source code made available by Oracle America, Inc. (Oracle) at [openjdk.java.net](http://openjdk.java.net) ("OpenJDK Code") is distributed under the terms of the GNU General Public License <<http://www.gnu.org/copyleft/gpl.html>> version 2 only ("GPL2"), with the following clarification and special exception.

Linking this OpenJDK Code statically or dynamically with other code is making a combined work based on this library. Thus, the terms and conditions of GPL2 cover the whole combination.

As a special exception, Oracle gives you permission to link this OpenJDK Code with certain code licensed by Oracle as indicated at <http://openjdk.java.net/legal/exception-modules-2007-05-08.html> ("Designated Exception Modules") to produce an executable, regardless of the license terms of the Designated Exception Modules, and to copy and distribute the resulting executable under GPL2, provided that the Designated Exception Modules continue to be governed by the licenses under which they were offered by Oracle.

As such, it allows licensees and sublicensees of Oracle's GPL2 OpenJDK Code to build an executable that includes those portions of necessary code that Oracle could not provide under GPL2 (or that Oracle has provided under GPL2 with the Classpath exception). If you modify or add to the OpenJDK code, that new GPL2 code may still be combined with Designated Exception Modules if the new code is made subject to this exception by its copyright holder.

### Apache 2.0 License

<pre>

Apache License  
Version 2.0, January 2004  
<http://www.apache.org/licenses/>

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain

separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the

origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

limitations under the License.

</pre>

```
Independent JPEG Group: JPEG release 6b
```

```
JPEG License
```

<pre>

Must reproduce following license in documentation and/or other materials  
provided with distribution:

The authors make NO WARRANTY or representation, either express or implied,  
with respect to this software, its quality, accuracy, merchantability, or  
fitness for a particular purpose. This software is provided "AS IS",  
and you, its user, assume the entire risk as to its quality and accuracy.

This software is copyright (C) 1991-1998, Thomas G. Lane.  
All Rights Reserved except as specified below.

Permission is hereby granted to use, copy, modify, and distribute  
this software (or portions thereof) for any purpose, without fee,  
subject to these conditions:

- (1) If any part of the source code for this software is distributed,  
then this README file must be included, with this copyright and no-warranty  
notice unaltered; and any additions, deletions, or changes to the original  
files must be clearly indicated in accompanying documentation.
- (2) If only executable code is distributed, then the accompanying documentation  
must state that "this software is based in part on the work of the  
Independent JPEG Group".
- (3) Permission for use of this software is granted only if the user accepts  
full responsibility for any undesirable consequences; the authors accept  
NO LIABILITY for damages of any kind.

These conditions apply to any software derived from or based on the IJG code, not just to the unmodified library. If you use our work, you ought to acknowledge us.

Permission is NOT granted for the use of any IJG author's name or company name in advertising or publicity relating to this software or products derived from it. This software may be referred to only as "the Independent JPEG Group's software".

We specifically permit and encourage the use of this software as the basis of commercial products, provided that all warranty or liability claims are assumed by the product vendor.

ansi2knr.c is included in this distribution by permission of L. Peter Deutsch, sole proprietor of its copyright holder, Aladdin Enterprises of Menlo Park, CA. ansi2knr.c is NOT covered by the above copyright and conditions, but instead by the usual distribution terms of the Free Software Foundation; principally, that you must include source code if you redistribute it. (See the file ansi2knr.c for full details.) However, since ansi2knr.c is not needed as part of any program generated from the IJG code, this does not limit you more than the foregoing paragraphs do.

The Unix configuration script "configure" was produced with GNU Autoconf. It is copyright by the Free Software Foundation but is freely distributable. The same holds for its supporting scripts (config.guess, config.sub, ltconfig, ltmain.sh). Another support script, install-sh, is copyright by M.I.T. but is also freely distributable.

It appears that the arithmetic coding option of the JPEG spec is covered by patents owned by IBM, AT&T, and Mitsubishi. Hence arithmetic coding cannot legally be used without obtaining one or more licenses. For this reason, support for arithmetic coding has been removed from the free JPEG software. (Since arithmetic coding provides only a marginal gain over the unpatented Huffman mode, it is unlikely that very many implementations will support it.) So far as we are aware, there are no patent restrictions on the remaining code.

The IJG distribution formerly included code to read and write GIF files. To avoid entanglement with the Unisys LZW patent, GIF reading support has been removed altogether, and the GIF writer has been simplified to produce "uncompressed GIFs". This technique does not use the LZW algorithm; the resulting GIF files are larger than usual, but are readable by all standard GIF decoders.

We are required to state that "The Graphics Interchange Format(c) is the Copyright property of CompuServe Incorporated. GIF(sm) is a Service Mark property of CompuServe Incorporated."

</pre>

### MPL v2.0

...

Mozilla Public License Version 2.0

=====

## 1. Definitions

-----

### 1.1. "Contributor"

means each individual or legal entity that creates, contributes to the creation of, or owns Covered Software.

### 1.2. "Contributor Version"

means the combination of the Contributions of others (if any) used by a Contributor and that particular Contributor's Contribution.

### 1.3. "Contribution"

means Covered Software of a particular Contributor.

### 1.4. "Covered Software"

means Source Code Form to which the initial Contributor has attached the notice in Exhibit A, the Executable Form of such Source Code Form, and Modifications of such Source Code Form, in each case

including portions thereof.

1.5. "Incompatible With Secondary Licenses"

means

- (a) that the initial Contributor has attached the notice described in Exhibit B to the Covered Software; or
- (b) that the Covered Software was made available under the terms of version 1.1 or earlier of the License, but not also under the terms of a Secondary License.

1.6. "Executable Form"

means any form of the work other than Source Code Form.

1.7. "Larger Work"
