include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly

negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work,

where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or

for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason

of your accepting any such warranty or additional liability.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the

editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the

Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise

designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. **Grant of Copyright License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. **Grant of Patent License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. **Redistribution.** You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
 - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
 - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
 - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
 - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must

include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly

negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

Mozilla Public License, version 2.0

1. Definitions

1.1. Contributor

means each individual or legal entity that creates, contributes to the creation of, or owns Covered Software.

1.2. Contributor Version

means the combination of the Contributions of others (if any) used by a Contributor and that particular Contributor's Contribution.

1.3. Contribution

means Covered Software of a particular Contributor.

1.4. Covered Software

means Source Code Form to which the initial Contributor has attached the notice in Exhibit A, the Executable Form of such Source Code Form, and Modifications of such Source Code Form, in each case including portions thereof.

1.5. Incompatible With Secondary Licenses

means

- a. that the initial Contributor has attached the notice described in Exhibit B to the Covered Software; or
- b. that the Covered Software was made available under the terms of version 1.1 or earlier of the License, but not also under the terms of a Secondary License.

1.6. Executable Form

means any form of the work other than Source Code Form.

1.7. Larger Work

means a work that combines Covered Software with other material, in a separate file or files, that is not Covered Software.

1.8. License

means this document.

1.9. Licensable

means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently, any and all of the rights conveyed by this License.

1.10. Modifications

means any of the following:

- a. any file in Source Code Form that results from an addition to, deletion from, or modification of the contents of Covered Software; or
- b. any new file in Source Code Form that contains any Covered Software.

1.11. Patent Claims of a Contributor

means any patent claim(s), including without limitation, method, process, and apparatus claims, in any patent Licensable by such Contributor that

would be infringed, but for the grant of the License, by the making, using, selling, offering for sale, having made, import, or transfer of either its Contributions or its Contributor Version.

1.12. Secondary License

means either the GNU General Public License, Version 2.0, the GNU Lesser General Public License, Version 2.1, the GNU Affero General Public License, Version 3.0, or any later versions of those licenses.

1.13. Source Code Form

means the form of the work preferred for making modifications.

1.14. You (or Your)

means an individual or a legal entity exercising rights under this License. For legal entities, You includes any entity that controls, is controlled by, or is under common control with You. For purposes of this definition, control means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants and Conditions

2.1. Grants

Each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

- a. under intellectual property rights (other than patent or trademark) Licensable by such Contributor to use, reproduce, make available, modify, display, perform, distribute, and otherwise exploit its Contributions, either on an unmodified basis, with Modifications, or as part of a Larger Work; and
- b. under Patent Claims of such Contributor to make, use, sell, offer for sale, have made, import, and otherwise transfer either its Contributions or its Contributor Version.

2.2. Effective Date

The licenses granted in Section 2.1 with respect to any Contribution become effective for each Contribution on the date the Contributor first distributes such Contribution.

2.3. Limitations on Grant Scope

The licenses granted in this Section 2 are the only rights granted under this License. No additional rights or licenses will be implied from the distribution or licensing of Covered Software under this License. Notwithstanding Section 2.1(b) above, no patent license is granted by a Contributor:

- a. for any code that a Contributor has removed from Covered Software; or
- b. for infringements caused by: (i) Your and any other third party's modifications of Covered Software, or (ii) the combination of its Contributions with other software (except as part of its Contributor Version); or
- c. under Patent Claims infringed by Covered Software in the absence of its Contributions.

This License does not grant any rights in the trademarks, service marks, or logos of any Contributor (except as may be necessary to comply with the notice requirements in Section 3.4).

2.4. Subsequent Licenses

No Contributor makes additional grants as a result of Your choice to distribute the Covered Software under a subsequent version of this License (see Section 10.2) or under the terms of a Secondary License (if permitted under the terms of Section 3.3).

2.5. Representation

Each Contributor represents that the Contributor believes its Contributions are its original creation(s) or it has sufficient rights to grant the rights to its Contributions conveyed by this License.

2.6. Fair Use

This License is not intended to limit any rights You have under applicable copyright doctrines of fair use, fair dealing, or other equivalents.

2.7. Conditions

Sections 3.1, 3.2, 3.3, and 3.4 are conditions of the licenses granted in Section 2.1.

3. Responsibilities

3.1. Distribution of Source Form

All distribution of Covered Software in Source Code Form, including any Modifications that You create or to which You contribute, must be under the terms of this License. You must inform recipients that the Source Code Form of the Covered Software is governed by the terms of this License, and how they can obtain a copy of this License. You may not attempt to alter or restrict the recipients rights in the Source Code Form.

3.2. Distribution of Executable Form

If You distribute Covered Software in Executable Form then:

- a. such Covered Software must also be made available in Source Code Form, as described in Section 3.1, and You must inform recipients of the Executable Form how they can obtain a copy of such Source Code Form by reasonable means in a timely manner, at a charge no more than the cost of distribution to the recipient; and
- b. You may distribute such Executable Form under the terms of this License, or sublicense it under different terms, provided that the license for the Executable Form does not attempt to limit or alter the recipients rights in the Source Code Form under this License.

3.3. Distribution of a Larger Work

You may create and distribute a Larger Work under terms of Your choice, provided that You also comply with the requirements of this License for the Covered Software. If the Larger Work is a combination of Covered Software with a work governed by one or more Secondary Licenses, and the Covered Software is not Incompatible With Secondary Licenses, this License permits You to additionally distribute such Covered Software under the terms of such Secondary License(s), so that the recipient of the Larger Work may, at their option, further distribute the Covered Software under the terms of either this License or such Secondary License(s).

3.4. Notices

You may not remove or alter the substance of any license notices (including copyright notices, patent notices, disclaimers of warranty, or limitations of liability) contained within the Source Code Form of the Covered Software, except that You may alter any license notices to the extent required to remedy known factual inaccuracies.

3.5. Application of Additional Terms

You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, You may do so only on Your own behalf, and not on behalf

of any Contributor. You must make it absolutely clear that any such warranty, support, indemnity, or liability obligation is offered by You alone, and You hereby agree to indemnify every Contributor for any liability incurred by such Contributor as a result of warranty, support, indemnity or liability terms You offer. You may include additional disclaimers of warranty and limitations of liability specific to any jurisdiction.

4. Inability to Comply Due to Statute or Regulation

If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Covered Software due to statute, judicial order, or regulation then You must: (a) comply with the terms of this License to the maximum extent possible; and (b) describe the limitations and the code they affect. Such description must be placed in a text file included with all distributions of the Covered Software under this License. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient of ordinary skill to be able to understand it.

5. Termination

5.1. The rights granted under this License will terminate automatically if You fail to comply with any of its terms. However, if You become compliant, then the rights granted under this License from a particular Contributor are reinstated (a) provisionally, unless and until such Contributor explicitly and finally terminates Your grants, and (b) on an ongoing basis, if such Contributor fails to notify You of the non-compliance by some reasonable means prior to 60 days after You have come back into compliance. Moreover, Your grants from a particular Contributor are reinstated on an ongoing basis if such Contributor notifies You of the non-compliance by some reasonable means, this is the first time You have received notice of non-compliance with this License from such Contributor, and You become compliant prior to 30 days after Your receipt of the notice.

5.2. If You initiate litigation against any entity by asserting a patent infringement claim (excluding declaratory judgment actions, counter-claims, and cross-claims) alleging that a Contributor Version directly or indirectly infringes any patent, then the rights granted to You by any and all Contributors for the Covered Software under Section 2.1 of this License shall terminate.

5.3. In the event of termination under Sections 5.1 or 5.2 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You or Your distributors under this License prior to termination shall survive termination.

6. Disclaimer of Warranty

Covered Software is provided under this License on an as is basis, without warranty of any kind, either expressed, implied, or statutory, including, without limitation, warranties that the Covered Software is free of defects, merchantable, fit for a particular purpose or non-infringing. The entire risk as to the quality and performance of the Covered Software is with You. Should any Covered Software prove defective in any respect, You (not any Contributor) assume the cost of any necessary servicing, repair, or correction. This disclaimer of warranty constitutes an essential part of this License. No use of any Covered Software is authorized under this License except under this disclaimer.

7. Limitation of Liability

Under no circumstances and under no legal theory, whether tort (including negligence), contract, or otherwise, shall any Contributor, or anyone who distributes Covered Software as permitted above, be liable to You for any direct, indirect, special, incidental, or consequential damages of any character including, without limitation, damages for lost profits, loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses, even if such party shall have been informed of the possibility of such damages. This limitation of liability shall not apply to liability for death or personal injury resulting from such party's negligence to the extent applicable law prohibits such limitation. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion and limitation may not apply to You.

8. Litigation

Any litigation relating to this License may be brought only in the courts of a jurisdiction where the defendant maintains its principal place of business and such litigation shall be governed by laws of that jurisdiction, without reference to its conflict-of-law provisions. Nothing in this Section shall prevent a party's ability to bring cross-claims or counter-claims.

9. Miscellaneous

This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not be used to construe this License against a Contributor.

10. Versions of the License

10.1. New Versions

Mozilla Foundation is the license steward. Except as provided in Section 10.3, no one other than the license steward has the right to modify or publish new versions of this License. Each version will be given a distinguishing version number.

10.2. Effect of New Versions

You may distribute the Covered Software under the terms of the version of the License under which You originally received the Covered Software, or under the terms of any subsequent version published by the license steward.

10.3. Modified Versions

If you create software not governed by this License, and you want to create a new license for such software, you may create and use a modified version of this License if you rename the license and remove any references to the name of the license steward (except to note that such modified license differs from this License).

10.4. Distributing Source Code Form that is Incompatible With Secondary Licenses

If You choose to distribute Source Code Form that is Incompatible With Secondary Licenses under the terms of this version of the License, the notice described in Exhibit B of this License must be attached.

Exhibit A - Source Code Form License Notice

This Source Code Form is subject to the terms of the Mozilla Public License, v. 2.0. If a copy of the MPL was not distributed with this file, You can obtain one at <http://mozilla.org/MPL/2.0/>.

If it is not possible or desirable to put the notice in a particular file, then You may include the notice in a location (such as a LICENSE file in a relevant directory) where a recipient would be likely to look for such a notice.

You may add additional accurate notices of copyright ownership.

Exhibit B - Incompatible With Secondary Licenses Notice

This Source Code Form is Incompatible With Secondary Licenses, as defined by the Mozilla Public License, v. 2.0.

Apache License
Version 2.0, January 2004

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally

submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or

implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "{}" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Apache License
Version 2.0, January 2004
<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or

Derivative Works a copy of this License; and

- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
License is intended to guarantee your freedom to share and change free
software--to make sure the software is free for all its users. This
General Public License applies to most of the Free Software
Foundation's software and to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by
the GNU Lesser General Public License instead.) You can apply it to
your programs, too.

When we speak of free software, we are referring to freedom, not
price. Our General Public Licenses are designed to make sure that you
have the freedom to distribute copies of free software (and charge for
this service if you wish), that you receive source code or can get it
if you want it, that you can change the software or use pieces of it
in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid
anyone to deny you these rights or to ask you to surrender the rights.
These restrictions translate to certain responsibilities for you if you
distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you

conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under

this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES,

INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author  
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate

parts of the General Public License. Of course, the commands you use may be called something other than `show w` and `show c`; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

1.289.1 Available under license :

GNU GENERAL PUBLIC LICENSE
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<http://fsf.org/>>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you

have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of

interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you

with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical

medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install

and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered

work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so

available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

```
This program is free software: you can redistribute it and/or modify  
it under the terms of the GNU General Public License as published by  
the Free Software Foundation, either version 3 of the License, or  
(at your option) any later version.
```

```
This program is distributed in the hope that it will be useful,  
but WITHOUT ANY WARRANTY; without even the implied warranty of  
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the  
GNU General Public License for more details.
```

You should have received a copy of the GNU General Public License

along with this program. If not, see <http://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

```
<program> Copyright (C) <year> <name of author>  
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <http://www.gnu.org/philosophy/why-not-lgpl.html>.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some

specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser

General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and

distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public

License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data

structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in

Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to

be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR

CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the library's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the

library `Frob' (a library for tweaking knobs) written by James
Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

/** \page threaded_mainloop Threaded Main Loop

*

* \section overv_sec Overview

*

* The threaded main loop implementation is a special version of the primary
* main loop implementation (see \ref mainloop). For the basic design, see
* its documentation.

*

* The added feature in the threaded main loop is that it spawns a new thread
* that runs the real main loop. This allows a synchronous application to use
* the asynchronous API without risking stalling the PulseAudio library.

*

* \section creat_sec Creation

*

* A pa_threaded_mainloop object is created using pa_threaded_mainloop_new().
* This will only allocate the required structures though, so to use it the
* thread must also be started. This is done through
* pa_threaded_mainloop_start(), after which you can start using the main loop.

*

* \section destr_sec Destruction

*

* When the PulseAudio connection has been terminated, the thread must be
* stopped and the resources freed. Stopping the thread is done using
* pa_threaded_mainloop_stop(), which must be called without the lock (see
* below) held. When that function returns, the thread is stopped and the
* pa_threaded_mainloop object can be freed using pa_threaded_mainloop_free().

*

* \section lock_sec Locking

*

* Since the PulseAudio API doesn't allow concurrent accesses to objects,

* a locking scheme must be used to guarantee safe usage. The threaded main loop API provides such a scheme through the functions `pa_threaded_mainloop_lock()` and `pa_threaded_mainloop_unlock()`.

* The lock is recursive, so it's safe to use it multiple times from the same thread. Just make sure you call `pa_threaded_mainloop_unlock()` the same number of times you called `pa_threaded_mainloop_lock()`.

* The lock needs to be held whenever you call any PulseAudio function that uses an object associated with this main loop. Make sure you do not hold on to the lock more than necessary though, as the threaded main loop stops while the lock is held.

* Example:

```
* \code
* void my_check_stream_func(pa_threaded_mainloop *m, pa_stream *s) {
*     pa_stream_state_t state;
*
*     pa_threaded_mainloop_lock(m);
*
*     state = pa_stream_get_state(s);
*
*     pa_threaded_mainloop_unlock(m);
*
*     if (state == PA_STREAM_READY)
*         printf("Stream is ready!");
*     else
*         printf("Stream is not ready!");
* }
* \endcode
```

* \section cb_sec Callbacks

* Callbacks in PulseAudio are asynchronous, so they require extra care when using them together with a threaded main loop.

* The easiest way to turn the callback based operations into synchronous ones, is to simply wait for the callback to be called and continue from there. This is the approach chosen in PulseAudio's threaded API.

* \subsection basic_subsec Basic callbacks

* For the basic case, where all that is required is to wait for the callback to be invoked, the code should look something like this:

* Example:

```

* \code
* static void my_drain_callback(pa_stream *s, int success, void *userdata) {
*     pa_threaded_mainloop *m;
*
*     m = userdata;
*     assert(m);
*
*     pa_threaded_mainloop_signal(m, 0);
* }
*
* void my_drain_stream_func(pa_threaded_mainloop *m, pa_stream *s) {
*     pa_operation *o;
*
*     pa_threaded_mainloop_lock(m);
*
*     o = pa_stream_drain(s, my_drain_callback, m);
*     assert(o);
*
*     while (pa_operation_get_state(o) == PA_OPERATION_RUNNING)
*         pa_threaded_mainloop_wait(m);
*
*     pa_operation_unref(o);
*
*     pa_threaded_mainloop_unlock(m);
* }
* \endcode

```

* The main function, `my_drain_stream_func()`, will wait for the callback to be called using `pa_threaded_mainloop_wait()`.

* If your application is multi-threaded, then this waiting must be done inside a while loop. The reason for this is that multiple threads might be using `pa_threaded_mainloop_wait()` at the same time. Each thread must therefore verify that it was its callback that was invoked. Also the underlying OS synchronization primitives are usually not free of spurious wake-ups, so a `pa_threaded_mainloop_wait()` must be called within a loop even if you have only one thread waiting.

* The callback, `my_drain_callback()`, indicates to the main function that it has been called using `pa_threaded_mainloop_signal()`.

* As you can see, `pa_threaded_mainloop_wait()` may only be called with the lock held. The same thing is true for `pa_threaded_mainloop_signal()`, but as the lock is held before the callback is invoked, you do not have to deal with that.

* The functions will not dead lock because the wait function will release

```

* the lock before waiting and then regrab it once it has been signalled.
* For those of you familiar with threads, the behaviour is that of a
* condition variable.
*
* \subsection data_subsec Data callbacks
*
* For many callbacks, simply knowing that they have been called is
* insufficient. The callback also receives some data that is desired. To
* access this data safely, we must extend our example a bit:
*
* \code
* static int * volatile drain_result = NULL;
*
* static void my_drain_callback(pa_stream*s, int success, void *userdata) {
*     pa_threaded_mainloop *m;
*
*     m = userdata;
*     assert(m);
*
*     drain_result = &success;
*
*     pa_threaded_mainloop_signal(m, 1);
* }
*
* void my_drain_stream_func(pa_threaded_mainloop *m, pa_stream *s) {
*     pa_operation *o;
*
*     pa_threaded_mainloop_lock(m);
*
*     o = pa_stream_drain(s, my_drain_callback, m);
*     assert(o);
*
*     while (drain_result == NULL)
*         pa_threaded_mainloop_wait(m);
*
*     pa_operation_unref(o);
*
*     if (*drain_result)
*         printf("Success!");
*     else
*         printf("Bitter defeat...");
*
*     pa_threaded_mainloop_accept(m);
*
*     pa_threaded_mainloop_unlock(m);
* }
* \endcode
*

```

- * The example is a bit silly as it would probably have been easier to just
- * copy the contents of success, but for larger data structures this can be
- * wasteful.
- *
- * The difference here compared to the basic callback is the value 1 passed
- * to pa_threaded_mainloop_signal() and the call to
- * pa_threaded_mainloop_accept(). What will happen is that
- * pa_threaded_mainloop_signal() will signal the main function and then wait.
- * The main function is then free to use the data in the callback until
- * pa_threaded_mainloop_accept() is called, which will allow the callback
- * to continue.
- *
- * Note that pa_threaded_mainloop_accept() must be called some time between
- * exiting the while loop and unlocking the main loop! Failure to do so will
- * result in a race condition. I.e. it is not ok to release the lock and
- * regrab it before calling pa_threaded_mainloop_accept().
- *
- * \subsection async_subsec Asynchronous callbacks
- *
- * PulseAudio also has callbacks that are completely asynchronous, meaning
- * that they can be called at any time. The threaded main loop API provides
- * the locking mechanism to handle concurrent accesses, but nothing else.
- * Applications will have to handle communication from the callback to the
- * main program through their own mechanisms.
- *
- * The callbacks that are completely asynchronous are:
- *
- * \li State callbacks for contexts, streams, etc.
- * \li Subscription notifications
- * /

1.292.1 Available under license :

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <http://fsf.org/>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and

"recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component

(kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".
- c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts,

regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a

fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal

Notices displayed by works containing it; or

- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and

finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of

rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or

arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF

SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

```
This program is free software: you can redistribute it and/or modify  
it under the terms of the GNU General Public License as published by  
the Free Software Foundation, either version 3 of the License, or  
(at your option) any later version.
```

```
This program is distributed in the hope that it will be useful,  
but WITHOUT ANY WARRANTY; without even the implied warranty of  
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the  
GNU General Public License for more details.
```

```
You should have received a copy of the GNU General Public License  
along with this program. If not, see <http://www.gnu.org/licenses/>.
```

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

```
<program> Copyright (C) <year> <name of author>  
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it
```

under certain conditions; type ``show c'` for details.

The hypothetical commands ``show w'` and ``show c'` should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <http://www.gnu.org/philosophy/why-not-lgpl.html>.

1.293.1 Available under license :

GNU Free Documentation License
Version 1.3, 3 November 2008

Copyright (C) 2000, 2001, 2002, 2007, 2008 Free Software Foundation, Inc.
<<http://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

0. PREAMBLE

The purpose of this License is to make a manual, textbook, or other functional and useful document "free" in the sense of freedom: to assure everyone the effective freedom to copy and redistribute it, with or without modifying it, either commercially or noncommercially. Secondly, this License preserves for the author and publisher a way to get credit for their work, while not being considered responsible for modifications made by others.

This License is a kind of "copyleft", which means that derivative works of the document must themselves be free in the same sense. It complements the GNU General Public License, which is a copyleft license designed for free software.

We have designed this License in order to use it for manuals for free

software, because free software needs free documentation: a free program should come with manuals providing the same freedoms that the software does. But this License is not limited to software manuals; it can be used for any textual work, regardless of subject matter or whether it is published as a printed book. We recommend this License principally for works whose purpose is instruction or reference.

1. APPLICABILITY AND DEFINITIONS

This License applies to any manual or other work, in any medium, that contains a notice placed by the copyright holder saying it can be distributed under the terms of this License. Such a notice grants a world-wide, royalty-free license, unlimited in duration, to use that work under the conditions stated herein. The "Document", below, refers to any such manual or work. Any member of the public is a licensee, and is addressed as "you". You accept the license if you copy, modify or distribute the work in a way requiring permission under copyright law.

A "Modified Version" of the Document means any work containing the Document or a portion of it, either copied verbatim, or with modifications and/or translated into another language.

A "Secondary Section" is a named appendix or a front-matter section of the Document that deals exclusively with the relationship of the publishers or authors of the Document to the Document's overall subject (or to related matters) and contains nothing that could fall directly within that overall subject. (Thus, if the Document is in part a textbook of mathematics, a Secondary Section may not explain any mathematics.) The relationship could be a matter of historical connection with the subject or with related matters, or of legal, commercial, philosophical, ethical or political position regarding them.

The "Invariant Sections" are certain Secondary Sections whose titles are designated, as being those of Invariant Sections, in the notice that says that the Document is released under this License. If a section does not fit the above definition of Secondary then it is not allowed to be designated as Invariant. The Document may contain zero Invariant Sections. If the Document does not identify any Invariant Sections then there are none.

The "Cover Texts" are certain short passages of text that are listed, as Front-Cover Texts or Back-Cover Texts, in the notice that says that the Document is released under this License. A Front-Cover Text may be at most 5 words, and a Back-Cover Text may be at most 25 words.

A "Transparent" copy of the Document means a machine-readable copy, represented in a format whose specification is available to the general public, that is suitable for revising the document straightforwardly with generic text editors or (for images composed of pixels) generic paint programs or (for drawings) some widely available drawing editor, and that is suitable for input to text formatters or for automatic translation to a variety of formats suitable for input to text formatters. A copy made in an otherwise Transparent file format whose markup, or absence of markup, has been arranged to thwart or discourage subsequent modification by readers is not Transparent. An image format is not Transparent if used for any substantial amount of text. A copy that is not "Transparent" is called "Opaque".

Examples of suitable formats for Transparent copies include plain ASCII without markup, Texinfo input format, LaTeX input format, SGML or XML using a publicly available DTD, and standard-conforming simple HTML, PostScript or PDF designed for human modification. Examples of transparent image formats include PNG, XCF and JPG. Opaque formats include proprietary formats that can be read and edited only by proprietary word processors, SGML or XML for which the DTD and/or processing tools are not generally available, and the machine-generated HTML, PostScript or PDF produced by some word processors for output purposes only.

The "Title Page" means, for a printed book, the title page itself, plus such following pages as are needed to hold, legibly, the material this License requires to appear in the title page. For works in formats which do not have any title page as such, "Title Page" means the text near the most prominent appearance of the work's title, preceding the beginning of the body of the text.

The "publisher" means any person or entity that distributes copies of the Document to the public.

A section "Entitled XYZ" means a named subunit of the Document whose title either is precisely XYZ or contains XYZ in parentheses following text that translates XYZ in another language. (Here XYZ stands for a specific section name mentioned below, such as "Acknowledgements", "Dedications", "Endorsements", or "History".) To "Preserve the Title" of such a section when you modify the Document means that it remains a section "Entitled XYZ" according to this definition.

The Document may include Warranty Disclaimers next to the notice which states that this License applies to the Document. These Warranty Disclaimers are considered to be included by reference in this License, but only as regards disclaiming warranties; any other implication that these Warranty Disclaimers may have is void and has no effect on the meaning of this License.

2. VERBATIM COPYING

You may copy and distribute the Document in any medium, either commercially or noncommercially, provided that this License, the copyright notices, and the license notice saying this License applies to the Document are reproduced in all copies, and that you add no other conditions whatsoever to those of this License. You may not use technical measures to obstruct or control the reading or further copying of the copies you make or distribute. However, you may accept compensation in exchange for copies. If you distribute a large enough number of copies you must also follow the conditions in section 3.

You may also lend copies, under the same conditions stated above, and you may publicly display copies.

3. COPYING IN QUANTITY

If you publish printed copies (or copies in media that commonly have printed covers) of the Document, numbering more than 100, and the Document's license notice requires Cover Texts, you must enclose the copies in covers that carry, clearly and legibly, all these Cover Texts: Front-Cover Texts on the front cover, and Back-Cover Texts on the back cover. Both covers must also clearly and legibly identify you as the publisher of these copies. The front cover must present the full title with all words of the title equally prominent and visible. You may add other material on the covers in addition. Copying with changes limited to the covers, as long as they preserve the title of the Document and satisfy these conditions, can be treated as verbatim copying in other respects.

If the required texts for either cover are too voluminous to fit legibly, you should put the first ones listed (as many as fit reasonably) on the actual cover, and continue the rest onto adjacent pages.

If you publish or distribute Opaque copies of the Document numbering more than 100, you must either include a machine-readable Transparent copy along with each Opaque copy, or state in or with each Opaque copy a computer-network location from which the general network-using public has access to download using public-standard network protocols a complete Transparent copy of the Document, free of added material. If you use the latter option, you must take reasonably prudent steps, when you begin distribution of Opaque copies in quantity, to ensure that this Transparent copy will remain thus accessible at the stated location until at least one year after the last time you distribute an Opaque copy (directly or through your agents or retailers) of that

edition to the public.

It is requested, but not required, that you contact the authors of the Document well before redistributing any large number of copies, to give them a chance to provide you with an updated version of the Document.

4. MODIFICATIONS

You may copy and distribute a Modified Version of the Document under the conditions of sections 2 and 3 above, provided that you release the Modified Version under precisely this License, with the Modified Version filling the role of the Document, thus licensing distribution and modification of the Modified Version to whoever possesses a copy of it. In addition, you must do these things in the Modified Version:

- A. Use in the Title Page (and on the covers, if any) a title distinct from that of the Document, and from those of previous versions (which should, if there were any, be listed in the History section of the Document). You may use the same title as a previous version if the original publisher of that version gives permission.
- B. List on the Title Page, as authors, one or more persons or entities responsible for authorship of the modifications in the Modified Version, together with at least five of the principal authors of the Document (all of its principal authors, if it has fewer than five), unless they release you from this requirement.
- C. State on the Title page the name of the publisher of the Modified Version, as the publisher.
- D. Preserve all the copyright notices of the Document.
- E. Add an appropriate copyright notice for your modifications adjacent to the other copyright notices.
- F. Include, immediately after the copyright notices, a license notice giving the public permission to use the Modified Version under the terms of this License, in the form shown in the Addendum below.
- G. Preserve in that license notice the full lists of Invariant Sections and required Cover Texts given in the Document's license notice.
- H. Include an unaltered copy of this License.
- I. Preserve the section Entitled "History", Preserve its Title, and add to it an item stating at least the title, year, new authors, and publisher of the Modified Version as given on the Title Page. If there is no section Entitled "History" in the Document, create one stating the title, year, authors, and publisher of the Document as given on its Title Page, then add an item describing the Modified Version as stated in the previous sentence.
- J. Preserve the network location, if any, given in the Document for public access to a Transparent copy of the Document, and likewise the network locations given in the Document for previous versions

- it was based on. These may be placed in the "History" section.
- You may omit a network location for a work that was published at least four years before the Document itself, or if the original publisher of the version it refers to gives permission.
- K. For any section Entitled "Acknowledgements" or "Dedications", Preserve the Title of the section, and preserve in the section all the substance and tone of each of the contributor acknowledgements and/or dedications given therein.
- L. Preserve all the Invariant Sections of the Document, unaltered in their text and in their titles. Section numbers or the equivalent are not considered part of the section titles.
- M. Delete any section Entitled "Endorsements". Such a section may not be included in the Modified Version.
- N. Do not retitle any existing section to be Entitled "Endorsements" or to conflict in title with any Invariant Section.
- O. Preserve any Warranty Disclaimers.

If the Modified Version includes new front-matter sections or appendices that qualify as Secondary Sections and contain no material copied from the Document, you may at your option designate some or all of these sections as invariant. To do this, add their titles to the list of Invariant Sections in the Modified Version's license notice. These titles must be distinct from any other section titles.

You may add a section Entitled "Endorsements", provided it contains nothing but endorsements of your Modified Version by various parties--for example, statements of peer review or that the text has been approved by an organization as the authoritative definition of a standard.

You may add a passage of up to five words as a Front-Cover Text, and a passage of up to 25 words as a Back-Cover Text, to the end of the list of Cover Texts in the Modified Version. Only one passage of Front-Cover Text and one of Back-Cover Text may be added by (or through arrangements made by) any one entity. If the Document already includes a cover text for the same cover, previously added by you or by arrangement made by the same entity you are acting on behalf of, you may not add another; but you may replace the old one, on explicit permission from the previous publisher that added the old one.

The author(s) and publisher(s) of the Document do not by this License give permission to use their names for publicity for or to assert or imply endorsement of any Modified Version.

5. COMBINING DOCUMENTS

You may combine the Document with other documents released under this

License, under the terms defined in section 4 above for modified versions, provided that you include in the combination all of the Invariant Sections of all of the original documents, unmodified, and list them all as Invariant Sections of your combined work in its license notice, and that you preserve all their Warranty Disclaimers.

The combined work need only contain one copy of this License, and multiple identical Invariant Sections may be replaced with a single copy. If there are multiple Invariant Sections with the same name but different contents, make the title of each such section unique by adding at the end of it, in parentheses, the name of the original author or publisher of that section if known, or else a unique number. Make the same adjustment to the section titles in the list of Invariant Sections in the license notice of the combined work.

In the combination, you must combine any sections Entitled "History" in the various original documents, forming one section Entitled "History"; likewise combine any sections Entitled "Acknowledgements", and any sections Entitled "Dedications". You must delete all sections Entitled "Endorsements".

6. COLLECTIONS OF DOCUMENTS

You may make a collection consisting of the Document and other documents released under this License, and replace the individual copies of this License in the various documents with a single copy that is included in the collection, provided that you follow the rules of this License for verbatim copying of each of the documents in all other respects.

You may extract a single document from such a collection, and distribute it individually under this License, provided you insert a copy of this License into the extracted document, and follow this License in all other respects regarding verbatim copying of that document.

7. AGGREGATION WITH INDEPENDENT WORKS

A compilation of the Document or its derivatives with other separate and independent documents or works, in or on a volume of a storage or distribution medium, is called an "aggregate" if the copyright resulting from the compilation is not used to limit the legal rights of the compilation's users beyond what the individual works permit. When the Document is included in an aggregate, this License does not apply to the other works in the aggregate which are not themselves derivative works of the Document.

If the Cover Text requirement of section 3 is applicable to these copies of the Document, then if the Document is less than one half of the entire aggregate, the Document's Cover Texts may be placed on covers that bracket the Document within the aggregate, or the electronic equivalent of covers if the Document is in electronic form. Otherwise they must appear on printed covers that bracket the whole aggregate.

8. TRANSLATION

Translation is considered a kind of modification, so you may distribute translations of the Document under the terms of section 4. Replacing Invariant Sections with translations requires special permission from their copyright holders, but you may include translations of some or all Invariant Sections in addition to the original versions of these Invariant Sections. You may include a translation of this License, and all the license notices in the Document, and any Warranty Disclaimers, provided that you also include the original English version of this License and the original versions of those notices and disclaimers. In case of a disagreement between the translation and the original version of this License or a notice or disclaimer, the original version will prevail.

If a section in the Document is Entitled "Acknowledgements", "Dedications", or "History", the requirement (section 4) to Preserve its Title (section 1) will typically require changing the actual title.

9. TERMINATION

You may not copy, modify, sublicense, or distribute the Document except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, or distribute it is void, and will automatically terminate your rights under this License.

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have

received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, receipt of a copy of some or all of the same material does not give you any rights to use it.

10. FUTURE REVISIONS OF THIS LICENSE

The Free Software Foundation may publish new, revised versions of the GNU Free Documentation License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns. See <http://www.gnu.org/copyleft/>.

Each version of the License is given a distinguishing version number. If the Document specifies that a particular numbered version of this License "or any later version" applies to it, you have the option of following the terms and conditions either of that specified version or of any later version that has been published (not as a draft) by the Free Software Foundation. If the Document does not specify a version number of this License, you may choose any version ever published (not as a draft) by the Free Software Foundation. If the Document specifies that a proxy can decide which future versions of this License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Document.

11. RELICENSING

"Massive Multiauthor Collaboration Site" (or "MMC Site") means any World Wide Web server that publishes copyrightable works and also provides prominent facilities for anybody to edit those works. A public wiki that anybody can edit is an example of such a server. A "Massive Multiauthor Collaboration" (or "MMC") contained in the site means any set of copyrightable works thus published on the MMC site.

"CC-BY-SA" means the Creative Commons Attribution-Share Alike 3.0 license published by Creative Commons Corporation, a not-for-profit corporation with a principal place of business in San Francisco, California, as well as future copyleft versions of that license published by that same organization.

"Incorporate" means to publish or republish a Document, in whole or in

part, as part of another Document.

An MMC is "eligible for relicensing" if it is licensed under this License, and if all works that were first published under this License somewhere other than this MMC, and subsequently incorporated in whole or in part into the MMC, (1) had no cover texts or invariant sections, and (2) were thus incorporated prior to November 1, 2008.

The operator of an MMC Site may republish an MMC contained in the site under CC-BY-SA on the same site at any time before August 1, 2009, provided the MMC is eligible for relicensing.

ADDENDUM: How to use this License for your documents

To use this License in a document you have written, include a copy of the License in the document and put the following copyright and license notices just after the title page:

Copyright (c) YEAR YOUR NAME.

Permission is granted to copy, distribute and/or modify this document under the terms of the GNU Free Documentation License, Version 1.3 or any later version published by the Free Software Foundation; with no Invariant Sections, no Front-Cover Texts, and no Back-Cover Texts. A copy of the license is included in the section entitled "GNU Free Documentation License".

If you have Invariant Sections, Front-Cover Texts and Back-Cover Texts, replace the "with...Texts." line with this:

with the Invariant Sections being LIST THEIR TITLES, with the Front-Cover Texts being LIST, and with the Back-Cover Texts being LIST.

If you have Invariant Sections without Cover Texts, or some other combination of the three, merge those two alternatives to suit the situation.

If your document contains nontrivial examples of program code, we recommend releasing these examples in parallel under your choice of free software license, such as the GNU General Public License, to permit their use in free software.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively

when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you

received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or

otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software

Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands ``show w'` and ``show c'` should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than ``show w'` and ``show c'`; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

GNU GENERAL PUBLIC LICENSE
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<http://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of

protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through

a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding

Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".
- c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.
- d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

- a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.
- b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.
- c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.
- d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.
- e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for

unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further

restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of

this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that

contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's

public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <http://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

```
<program> Copyright (C) <year> <name of author>  
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <http://www.gnu.org/philosophy/why-not-lgpl.html>.

@item

PREAMBLE

The purpose of this License is to make a manual, textbook, or other
functional and useful document @dfn{free} in the sense of freedom: to
assure everyone the effective freedom to copy and redistribute it,
with or without modifying it, either commercially or noncommercially.
Secondarily, this License preserves for the author and publisher a way
to get credit for their work, while not being considered responsible
for modifications made by others.

This License is a kind of ``copyleft'', which means that derivative
works of the document must themselves be free in the same sense. It
complements the GNU General Public License, which is a copyleft
license designed for free software.

We have designed this License in order to use it for manuals for free
software, because free software needs free documentation: a free
program should come with manuals providing the same freedoms that the
software does. But this License is not limited to software manuals;
it can be used for any textual work, regardless of subject matter or
whether it is published as a printed book. We recommend this License
principally for works whose purpose is instruction or reference.

@item

APPLICABILITY AND DEFINITIONS

This License applies to any manual or other work, in any medium, that
contains a notice placed by the copyright holder saying it can be
distributed under the terms of this License. Such a notice grants a
world-wide, royalty-free license, unlimited in duration, to use that
work under the conditions stated herein. The ``Document'', below,
refers to any such manual or work. Any member of the public is a
licensee, and is addressed as ``you''. You accept the license if you
copy, modify or distribute the work in a way requiring permission

under copyright law.

A "Modified Version" of the Document means any work containing the Document or a portion of it, either copied verbatim, or with modifications and/or translated into another language.

A "Secondary Section" is a named appendix or a front-matter section of the Document that deals exclusively with the relationship of the publishers or authors of the Document to the Document's overall subject (or to related matters) and contains nothing that could fall directly within that overall subject. (Thus, if the Document is in part a textbook of mathematics, a Secondary Section may not explain any mathematics.) The relationship could be a matter of historical connection with the subject or with related matters, or of legal, commercial, philosophical, ethical or political position regarding them.

The "Invariant Sections" are certain Secondary Sections whose titles are designated, as being those of Invariant Sections, in the notice that says that the Document is released under this License. If a section does not fit the above definition of Secondary then it is not allowed to be designated as Invariant. The Document may contain zero Invariant Sections. If the Document does not identify any Invariant Sections then there are none.

The "Cover Texts" are certain short passages of text that are listed, as Front-Cover Texts or Back-Cover Texts, in the notice that says that the Document is released under this License. A Front-Cover Text may be at most 5 words, and a Back-Cover Text may be at most 25 words.

A "Transparent" copy of the Document means a machine-readable copy, represented in a format whose specification is available to the general public, that is suitable for revising the document straightforwardly with generic text editors or (for images composed of pixels) generic paint programs or (for drawings) some widely available drawing editor, and that is suitable for input to text formatters or for automatic translation to a variety of formats suitable for input to text formatters. A copy made in an otherwise Transparent file format whose markup, or absence of markup, has been arranged to thwart or discourage subsequent modification by readers is not Transparent. An image format is not Transparent if used for any substantial amount of text. A copy that is not "Transparent" is called "Opaque".

Examples of suitable formats for Transparent copies include plain `@sc{ascii}` without markup, Texinfo input format, `La@TeX{}` input format, `@acronym{SGML}` or `@acronym{XML}` using a publicly available `@acronym{DTD}`, and standard-conforming simple `@acronym{HTML}`, PostScript or `@acronym{PDF}` designed for human modification. Examples

of transparent image formats include @acronym{PNG}, @acronym{XCF} and @acronym{JPG}. Opaque formats include proprietary formats that can be read and edited only by proprietary word processors, @acronym{SGML} or @acronym{XML} for which the @acronym{DTD} and/or processing tools are not generally available, and the machine-generated @acronym{HTML}, PostScript or @acronym{PDF} produced by some word processors for output purposes only.

The ``Title Page" means, for a printed book, the title page itself, plus such following pages as are needed to hold, legibly, the material this License requires to appear in the title page. For works in formats which do not have any title page as such, ``Title Page" means the text near the most prominent appearance of the work's title, preceding the beginning of the body of the text.

The ``publisher" means any person or entity that distributes copies of the Document to the public.

A section ``Entitled XYZ" means a named subunit of the Document whose title either is precisely XYZ or contains XYZ in parentheses following text that translates XYZ in another language. (Here XYZ stands for a specific section name mentioned below, such as ``Acknowledgements", ``Dedications", ``Endorsements", or ``History".) To ``Preserve the Title" of such a section when you modify the Document means that it remains a section ``Entitled XYZ" according to this definition.

The Document may include Warranty Disclaimers next to the notice which states that this License applies to the Document. These Warranty Disclaimers are considered to be included by reference in this License, but only as regards disclaiming warranties: any other implication that these Warranty Disclaimers may have is void and has no effect on the meaning of this License.

@item

VERBATIM COPYING

You may copy and distribute the Document in any medium, either commercially or noncommercially, provided that this License, the copyright notices, and the license notice saying this License applies to the Document are reproduced in all copies, and that you add no other conditions whatsoever to those of this License. You may not use technical measures to obstruct or control the reading or further copying of the copies you make or distribute. However, you may accept compensation in exchange for copies. If you distribute a large enough number of copies you must also follow the conditions in section 3.

You may also lend copies, under the same conditions stated above, and you may publicly display copies.

@item

COPYING IN QUANTITY

If you publish printed copies (or copies in media that commonly have printed covers) of the Document, numbering more than 100, and the Document's license notice requires Cover Texts, you must enclose the copies in covers that carry, clearly and legibly, all these Cover Texts: Front-Cover Texts on the front cover, and Back-Cover Texts on the back cover. Both covers must also clearly and legibly identify you as the publisher of these copies. The front cover must present the full title with all words of the title equally prominent and visible. You may add other material on the covers in addition.

Copying with changes limited to the covers, as long as they preserve the title of the Document and satisfy these conditions, can be treated as verbatim copying in other respects.

If the required texts for either cover are too voluminous to fit legibly, you should put the first ones listed (as many as fit reasonably) on the actual cover, and continue the rest onto adjacent pages.

If you publish or distribute Opaque copies of the Document numbering more than 100, you must either include a machine-readable Transparent copy along with each Opaque copy, or state in or with each Opaque copy a computer-network location from which the general network-using public has access to download using public-standard network protocols a complete Transparent copy of the Document, free of added material.

If you use the latter option, you must take reasonably prudent steps, when you begin distribution of Opaque copies in quantity, to ensure that this Transparent copy will remain thus accessible at the stated location until at least one year after the last time you distribute an Opaque copy (directly or through your agents or retailers) of that edition to the public.

It is requested, but not required, that you contact the authors of the Document well before redistributing any large number of copies, to give them a chance to provide you with an updated version of the Document.

@item

MODIFICATIONS

You may copy and distribute a Modified Version of the Document under the conditions of sections 2 and 3 above, provided that you release the Modified Version under precisely this License, with the Modified Version filling the role of the Document, thus licensing distribution and modification of the Modified Version to whoever possesses a copy of it. In addition, you must do these things in the Modified Version:

@enumerate A

@item

Use in the Title Page (and on the covers, if any) a title distinct from that of the Document, and from those of previous versions (which should, if there were any, be listed in the History section of the Document). You may use the same title as a previous version if the original publisher of that version gives permission.

@item

List on the Title Page, as authors, one or more persons or entities responsible for authorship of the modifications in the Modified Version, together with at least five of the principal authors of the Document (all of its principal authors, if it has fewer than five), unless they release you from this requirement.

@item

State on the Title page the name of the publisher of the Modified Version, as the publisher.

@item

Preserve all the copyright notices of the Document.

@item

Add an appropriate copyright notice for your modifications adjacent to the other copyright notices.

@item

Include, immediately after the copyright notices, a license notice giving the public permission to use the Modified Version under the terms of this License, in the form shown in the Addendum below.

@item

Preserve in that license notice the full lists of Invariant Sections and required Cover Texts given in the Document's license notice.

@item

Include an unaltered copy of this License.

@item

Preserve the section Entitled ``History'', Preserve its Title, and add to it an item stating at least the title, year, new authors, and publisher of the Modified Version as given on the Title Page. If there is no section Entitled ``History'' in the Document, create one stating the title, year, authors, and publisher of the Document as given on its Title Page, then add an item describing the Modified Version as stated in the previous sentence.

@item

Preserve the network location, if any, given in the Document for public access to a Transparent copy of the Document, and likewise the network locations given in the Document for previous versions it was based on. These may be placed in the ``History'' section. You may omit a network location for a work that was published at least four years before the Document itself, or if the original publisher of the version it refers to gives permission.

@item

For any section Entitled ``Acknowledgements'' or ``Dedications'', Preserve the Title of the section, and preserve in the section all the substance and tone of each of the contributor acknowledgements and/or dedications given therein.

@item

Preserve all the Invariant Sections of the Document, unaltered in their text and in their titles. Section numbers or the equivalent are not considered part of the section titles.

@item

Delete any section Entitled ``Endorsements''. Such a section may not be included in the Modified Version.

@item

Do not retitle any existing section to be Entitled ``Endorsements'' or to conflict in title with any Invariant Section.

@item

Preserve any Warranty Disclaimers.

@end enumerate

If the Modified Version includes new front-matter sections or appendices that qualify as Secondary Sections and contain no material copied from the Document, you may at your option designate some or all of these sections as invariant. To do this, add their titles to the list of Invariant Sections in the Modified Version's license notice. These titles must be distinct from any other section titles.

You may add a section Entitled ``Endorsements'', provided it contains nothing but endorsements of your Modified Version by various parties---for example, statements of peer review or that the text has been approved by an organization as the authoritative definition of a standard.

You may add a passage of up to five words as a Front-Cover Text, and a passage of up to 25 words as a Back-Cover Text, to the end of the list of Cover Texts in the Modified Version. Only one passage of

Front-Cover Text and one of Back-Cover Text may be added by (or through arrangements made by) any one entity. If the Document already includes a cover text for the same cover, previously added by you or by arrangement made by the same entity you are acting on behalf of, you may not add another; but you may replace the old one, on explicit permission from the previous publisher that added the old one.

The author(s) and publisher(s) of the Document do not by this License give permission to use their names for publicity for or to assert or imply endorsement of any Modified Version.

@item

COMBINING DOCUMENTS

You may combine the Document with other documents released under this License, under the terms defined in section 4 above for modified versions, provided that you include in the combination all of the Invariant Sections of all of the original documents, unmodified, and list them all as Invariant Sections of your combined work in its license notice, and that you preserve all their Warranty Disclaimers.

The combined work need only contain one copy of this License, and multiple identical Invariant Sections may be replaced with a single copy. If there are multiple Invariant Sections with the same name but different contents, make the title of each such section unique by adding at the end of it, in parentheses, the name of the original author or publisher of that section if known, or else a unique number. Make the same adjustment to the section titles in the list of Invariant Sections in the license notice of the combined work.

In the combination, you must combine any sections Entitled ``History'' in the various original documents, forming one section Entitled ``History''; likewise combine any sections Entitled ``Acknowledgements'', and any sections Entitled ``Dedications''. You must delete all sections Entitled ``Endorsements.''

@item

COLLECTIONS OF DOCUMENTS

You may make a collection consisting of the Document and other documents released under this License, and replace the individual copies of this License in the various documents with a single copy that is included in the collection, provided that you follow the rules of this License for verbatim copying of each of the documents in all other respects.

You may extract a single document from such a collection, and distribute it individually under this License, provided you insert a copy of this License into the extracted document, and follow this License in all

other respects regarding verbatim copying of that document.

@item

AGGREGATION WITH INDEPENDENT WORKS

A compilation of the Document or its derivatives with other separate and independent documents or works, in or on a volume of a storage or distribution medium, is called an ``aggregate" if the copyright resulting from the compilation is not used to limit the legal rights of the compilation's users beyond what the individual works permit. When the Document is included in an aggregate, this License does not apply to the other works in the aggregate which are not themselves derivative works of the Document.

If the Cover Text requirement of section 3 is applicable to these copies of the Document, then if the Document is less than one half of the entire aggregate, the Document's Cover Texts may be placed on covers that bracket the Document within the aggregate, or the electronic equivalent of covers if the Document is in electronic form. Otherwise they must appear on printed covers that bracket the whole aggregate.

@item

TRANSLATION

Translation is considered a kind of modification, so you may distribute translations of the Document under the terms of section 4. Replacing Invariant Sections with translations requires special permission from their copyright holders, but you may include translations of some or all Invariant Sections in addition to the original versions of these Invariant Sections. You may include a translation of this License, and all the license notices in the Document, and any Warranty Disclaimers, provided that you also include the original English version of this License and the original versions of those notices and disclaimers. In case of a disagreement between the translation and the original version of this License or a notice or disclaimer, the original version will prevail.

If a section in the Document is Entitled ``Acknowledgements", ``Dedications", or ``History", the requirement (section 4) to Preserve its Title (section 1) will typically require changing the actual title.

@item

TERMINATION

You may not copy, modify, sublicense, or distribute the Document except as expressly provided under this License. Any attempt

otherwise to copy, modify, sublicense, or distribute it is void, and will automatically terminate your rights under this License.

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, receipt of a copy of some or all of the same material does not give you any rights to use it.

@item

FUTURE REVISIONS OF THIS LICENSE

The Free Software Foundation may publish new, revised versions of the GNU Free Documentation License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns. See [@uref{http://www.gnu.org/copyleft/}](http://www.gnu.org/copyleft/).

Each version of the License is given a distinguishing version number. If the Document specifies that a particular numbered version of this License "or any later version" applies to it, you have the option of following the terms and conditions either of that specified version or of any later version that has been published (not as a draft) by the Free Software Foundation. If the Document does not specify a version number of this License, you may choose any version ever published (not as a draft) by the Free Software Foundation. If the Document specifies that a proxy can decide which future versions of this License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Document.

@item

RELICENSING

``Massive Multiauthor Collaboration Site" (or ``MMC Site") means any World Wide Web server that publishes copyrightable works and also provides prominent facilities for anybody to edit those works. A public wiki that anybody can edit is an example of such a server. A ``Massive Multiauthor Collaboration" (or ``MMC") contained in the site means any set of copyrightable works thus published on the MMC site.

``CC-BY-SA" means the Creative Commons Attribution-Share Alike 3.0 license published by Creative Commons Corporation, a not-for-profit corporation with a principal place of business in San Francisco, California, as well as future copyleft versions of that license published by that same organization.

``Incorporate" means to publish or republish a Document, in whole or in part, as part of another Document.

An MMC is ``eligible for relicensing" if it is licensed under this License, and if all works that were first published under this License somewhere other than this MMC, and subsequently incorporated in whole or in part into the MMC, (1) had no cover texts or invariant sections, and (2) were thus incorporated prior to November 1, 2008.

The operator of an MMC Site may republish an MMC contained in the site under CC-BY-SA on the same site at any time before August 1, 2009, provided the MMC is eligible for relicensing.

@end enumerate

@page

@heading ADDENDUM: How to use this License for your documents

To use this License in a document you have written, include a copy of the License in the document and put the following copyright and license notices just after the title page:

@smallexample

@group

Copyright (C) @var{year} @var{your name}.

Permission is granted to copy, distribute and/or modify this document under the terms of the GNU Free Documentation License, Version 1.3 or any later version published by the Free Software Foundation; with no Invariant Sections, no Front-Cover Texts, and no Back-Cover Texts. A copy of the license is included in the section entitled ``GNU Free Documentation License".

@end group

@end smallexample

If you have Invariant Sections, Front-Cover Texts and Back-Cover Texts, replace the ``with@dots{ }Texts." line with this:

```
@smallexample
@group
  with the Invariant Sections being @var{list their titles}, with
  the Front-Cover Texts being @var{list}, and with the Back-Cover Texts
  being @var{list}.
@end group
@end smallexample
```

If you have Invariant Sections without Cover Texts, or some other combination of the three, merge those two alternatives to suit the situation.

If your document contains nontrivial examples of program code, we recommend releasing these examples in parallel under your choice of free software license, such as the GNU General Public License, to permit their use in free software.

```

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.

51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you

distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or

collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is

void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing

to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING

WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author  
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it
```

under certain conditions; type ``show c'` for details.

The hypothetical commands ``show w'` and ``show c'` should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than ``show w'` and ``show c'`; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
'Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

1.296 libidn 2.3.2

1.296.1 Available under license :

Libidn2 COPYING -- Licensing information. `-*- outline -*-`
Copyright (C) 2011-2016 Simon Josefsson
See the end for copying conditions.

The source code for the C library (libidn2.a or libidn.so) are licensed under the terms of either the GNU General Public License version 2.0 or later (see the file COPYINGv2) or the GNU Lesser General Public License version 3.0 or later (see the file COPYING.LESSERv3), or both in parallel as here.

The command line tool, self tests, examples, and other auxiliary files, are licensed under the GNU General Public License version 3.0 or later.

The license of the Unicode character data files (which are parsed into static storage in the library) are documented in COPYING.unicode.

Other files are licensed as indicated in each file.

There may be exceptions to these general rules, see each file for precise information.

This file is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This file is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this file. If not, see <<http://www.gnu.org/licenses/>>.

A. Unicode Copyright.

Copyright 1991-2016 Unicode, Inc. All rights reserved.

Certain documents and files on this website contain a legend indicating that "Modification is permitted." Any person is hereby authorized, without fee, to modify such documents and files to create derivative works conforming to the Unicode Standard, subject to Terms and Conditions herein.

Any person is hereby authorized, without fee, to view, use, reproduce, and distribute all documents and files solely for informational purposes and in the creation of products supporting the Unicode Standard, subject to the Terms and Conditions herein.

Further specifications of rights and restrictions pertaining to the use of the particular set of data files known as the "Unicode Character Database" can be found in the License.

Each version of the Unicode Standard has further specifications of rights and restrictions of use. For the book editions (Unicode 5.0 and earlier), these are found on the back of the title page. The online code charts carry specific restrictions. All other files, including online documentation of the core specification for Unicode 6.0 and later, are covered under these general Terms of Use.

No license is granted to "mirror" the Unicode website where a fee is charged for access to the "mirror" site.

Modification is not permitted with respect to this document. All copies of this document must be verbatim.

B. Restricted Rights Legend.

Any technical data or software which is licensed to the United States of America, its agencies and/or instrumentalities under this Agreement is commercial technical data or commercial computer software developed exclusively at private expense as defined in FAR 2.101, or DFARS 252.227-7014 (June 1995), as applicable. For technical data, use, duplication, or disclosure by the Government is subject to restrictions as set forth in DFARS 202.227-7015 Technical Data, Commercial and Items (Nov 1995) and this Agreement. For Software, in accordance with FAR 12-212 or DFARS 227-7202, as applicable, use, duplication or disclosure by the Government is subject to the restrictions set forth in this Agreement.

C. Warranties and Disclaimers.

This publication and/or website may include technical or typographical errors or other inaccuracies. Changes are periodically added to the information herein; these changes will be incorporated in new editions of the publication and/or website. Unicode may make improvements and/or changes in the product(s) and/or program(s) described in this publication and/or website at any time.

If this file has been purchased on magnetic or optical media from Unicode, Inc. the sole and exclusive remedy for any claim will be exchange of the defective media within ninety (90) days of original purchase.

EXCEPT AS PROVIDED IN SECTION C.2, THIS PUBLICATION AND/OR SOFTWARE IS PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND EITHER EXPRESS, IMPLIED, OR STATUTORY, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NON-INFRINGEMENT. UNICODE AND ITS LICENSORS ASSUME NO RESPONSIBILITY FOR ERRORS OR OMISSIONS IN THIS PUBLICATION AND/OR SOFTWARE OR OTHER DOCUMENTS WHICH ARE REFERENCED BY OR LINKED TO THIS PUBLICATION OR THE UNICODE WEBSITE.

D. Waiver of Damages.

In no event shall Unicode or its licensors be liable for any special, incidental, indirect or consequential damages of any kind, or any damages whatsoever, whether or not Unicode was advised of the possibility of the damage, including, without limitation, those resulting from the following: loss of use, data or profits, in connection with the use, modification or distribution of this information or its derivatives.

E. Trademarks & Logos.

The Unicode Word Mark and the Unicode Logo are trademarks of Unicode, Inc. The Unicode Consortium and Unicode, Inc. are trade names of Unicode, Inc. Use of the information and materials found on this website indicates your acknowledgement of Unicode, Inc.'s exclusive worldwide rights in the Unicode Word Mark, the Unicode Logo, and the Unicode trade names.

The Unicode Consortium Name and Trademark Usage Policy (Trademark Policy) are incorporated herein by reference and you agree to abide by the provisions of the Trademark Policy, which may be changed from time to time in the sole discretion of Unicode, Inc.

All third party trademarks referenced herein are the property of their respective owners.

F. Miscellaneous.

Jurisdiction and Venue. This server is operated from a location in the State of California, United States of America. Unicode makes no representation that the materials are appropriate for use in other locations. If you access this server from other locations, you are responsible for compliance with local laws. This Agreement, all use of this site and any claims and damages resulting from use of this site are governed solely by the laws of the State of California without regard to any principles which would apply the laws of a different jurisdiction. The user agrees that any disputes regarding this site shall be resolved solely in the courts located in Santa Clara County, California. The user agrees said courts have personal jurisdiction and agree to waive any right to transfer the dispute to any other forum.

Modification by Unicode Unicode shall have the right to modify this Agreement at any time by posting it to this site. The user may not assign any part of this Agreement without Unicode's prior written consent.

Taxes. The user agrees to pay any taxes arising from access to this website or use of the information herein, except for those based on Unicode's net income.

Severability. If any provision of this Agreement is declared invalid or unenforceable, the remaining provisions of this Agreement shall remain in effect.

Entire Agreement. This Agreement constitutes the entire agreement between the parties.

EXHIBIT 1

Unicode Data Files include all data files under the directories

<http://www.unicode.org/Public/>, <http://www.unicode.org/reports/>,

<http://www.unicode.org/cldr/data/>, <http://source.icu-project.org/repos/icu/>, and

<http://www.unicode.org/utility/trac/browser/>.

Unicode Data Files do not include PDF online code charts under the directory <http://www.unicode.org/Public/>.

Software includes any source code published in the Unicode Standard or under the directories

<http://www.unicode.org/Public/>, <http://www.unicode.org/reports/>,
<http://www.unicode.org/cldr/data/>, <http://source.icu-project.org/repos/icu/>, and
<http://www.unicode.org/utility/trac/browser/>.

NOTICE TO USER: Carefully read the following legal agreement.

BY DOWNLOADING, INSTALLING, COPYING OR OTHERWISE USING UNICODE INC.'S DATA FILES ("DATA FILES"), AND/OR SOFTWARE ("SOFTWARE"), YOU UNEQUIVOCALLY ACCEPT, AND AGREE TO BE BOUND BY, ALL OF THE TERMS AND CONDITIONS OF THIS AGREEMENT. IF YOU DO NOT AGREE, DO NOT DOWNLOAD, INSTALL, COPY, DISTRIBUTE OR USE THE DATA FILES OR SOFTWARE.

COPYRIGHT AND PERMISSION NOTICE

Copyright 1991-2016 Unicode, Inc. All rights reserved.
Distributed under the Terms of Use in <http://www.unicode.org/copyright.html>.

Permission is hereby granted, free of charge, to any person obtaining a copy of the Unicode data files and any associated documentation (the "Data Files") or Unicode software and any associated documentation (the "Software") to deal in the Data Files or Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, and/or sell copies of the Data Files or Software, and to permit persons to whom the Data Files or Software are furnished to do so, provided that either

- (a) this copyright and permission notice appear with all copies of the Data Files or Software, or
- (b) this copyright and permission notice appear in associated Documentation.

THE DATA FILES AND SOFTWARE ARE PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF THIRD PARTY RIGHTS.

IN NO EVENT SHALL THE COPYRIGHT HOLDER OR HOLDERS INCLUDED IN THIS NOTICE BE LIABLE FOR ANY CLAIM, OR ANY SPECIAL INDIRECT OR CONSEQUENTIAL DAMAGES, OR ANY DAMAGES WHATSOEVER RESULTING FROM LOSS OF USE, DATA OR PROFITS, WHETHER IN AN ACTION OF CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THE DATA FILES OR SOFTWARE.

Except as contained in this notice, the name of a copyright holder shall not be used in advertising or otherwise to promote the sale,

use or other dealings in these Data Files or Software without prior written authorization of the copyright holder.

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so

that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

- b) Accompany it with a written offer, valid for at least three

years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the

original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will

be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
'Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

GNU LESSER GENERAL PUBLIC LICENSE
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<http://fsf.org/>>
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

This version of the GNU Lesser General Public License incorporates the terms and conditions of version 3 of the GNU General Public License, supplemented by the additional permissions listed below.

0. Additional Definitions.

As used herein, "this License" refers to version 3 of the GNU Lesser General Public License, and the "GNU GPL" refers to version 3 of the GNU General Public License.

"The Library" refers to a covered work governed by this License, other than an Application or a Combined Work as defined below.

An "Application" is any work that makes use of an interface provided by the Library, but which is not otherwise based on the Library. Defining a subclass of a class defined by the Library is deemed a mode of using an interface provided by the Library.

A "Combined Work" is a work produced by combining or linking an Application with the Library. The particular version of the Library with which the Combined Work was made is also called the "Linked Version".

The "Minimal Corresponding Source" for a Combined Work means the Corresponding Source for the Combined Work, excluding any source code for portions of the Combined Work that, considered in isolation, are based on the Application, and not on the Linked Version.

The "Corresponding Application Code" for a Combined Work means the object code and/or source code for the Application, including any data and utility programs needed for reproducing the Combined Work from the Application, but excluding the System Libraries of the Combined Work.

1. Exception to Section 3 of the GNU GPL.

You may convey a covered work under sections 3 and 4 of this License without being bound by section 3 of the GNU GPL.

2. Conveying Modified Versions.

If you modify a copy of the Library, and, in your modifications, a facility refers to a function or data to be supplied by an Application that uses the facility (other than as an argument passed when the facility is invoked), then you may convey a copy of the modified version:

- a) under this License, provided that you make a good faith effort to ensure that, in the event an Application does not supply the function or data, the facility still operates, and performs whatever part of its purpose remains meaningful, or
- b) under the GNU GPL, with none of the additional permissions of this License applicable to that copy.

3. Object Code Incorporating Material from Library Header Files.

The object code form of an Application may incorporate material from a header file that is part of the Library. You may convey such object code under terms of your choice, provided that, if the incorporated material is not limited to numerical parameters, data structure layouts and accessors, or small macros, inline functions and templates (ten or fewer lines in length), you do both of the following:

- a) Give prominent notice with each copy of the object code that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the object code with a copy of the GNU GPL and this license document.

4. Combined Works.

You may convey a Combined Work under terms of your choice that, taken together, effectively do not restrict modification of the portions of the Library contained in the Combined Work and reverse engineering for debugging such modifications, if you also do each of the following:

a) Give prominent notice with each copy of the Combined Work that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the Combined Work with a copy of the GNU GPL and this license document.

c) For a Combined Work that displays copyright notices during execution, include the copyright notice for the Library among these notices, as well as a reference directing the user to the copies of the GNU GPL and this license document.

d) Do one of the following:

0) Convey the Minimal Corresponding Source under the terms of this License, and the Corresponding Application Code in a form suitable for, and under terms that permit, the user to recombine or relink the Application with a modified version of the Linked Version to produce a modified Combined Work, in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.

1) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (a) uses at run time a copy of the Library already present on the user's computer system, and (b) will operate properly with a modified version of the Library that is interface-compatible with the Linked Version.

e) Provide Installation Information, but only if you would otherwise be required to provide such information under section 6 of the GNU GPL, and only to the extent that such information is necessary to install and execute a modified version of the Combined Work produced by recombining or relinking the Application with a modified version of the Linked Version. (If you use option 4d0, the Installation Information must accompany

the Minimal Corresponding Source and Corresponding Application Code. If you use option 4d1, you must provide the Installation Information in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.)

5. Combined Libraries.

You may place library facilities that are a work based on the Library side by side in a single library together with other library facilities that are not Applications and are not covered by this License, and convey such a combined library under terms of your choice, if you do both of the following:

- a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities, conveyed under the terms of this License.
- b) Give prominent notice with the combined library that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

6. Revised Versions of the GNU Lesser General Public License.

The Free Software Foundation may publish revised and/or new versions of the GNU Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library as you received it specifies that a certain numbered version of the GNU Lesser General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that published version or of any later version published by the Free Software Foundation. If the Library as you received it does not specify a version number of the GNU Lesser General Public License, you may choose any version of the GNU Lesser General Public License ever published by the Free Software Foundation.

If the Library as you received it specifies that a proxy can decide whether future versions of the GNU Lesser General Public License shall apply, that proxy's public statement of acceptance of any version is permanent authorization for you to choose that version for the Library.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original

authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices

stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your

cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to

these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to

address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author  
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program  
'Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
<signature of Ty Coon>, 1 April 1989  
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into

proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<http://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains

that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without

permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source

includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention

is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".
- c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.
- d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work,

and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

- a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.
- b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.
- c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.
- d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the

Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a

network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or

f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered

work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the

option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <http://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

```
<program> Copyright (C) <year> <name of author>  
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <<http://www.gnu.org/philosophy/why-not-lgpl.html>>.

GNU LESSER GENERAL PUBLIC LICENSE
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<http://fsf.org/>>
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

This version of the GNU Lesser General Public License incorporates the terms and conditions of version 3 of the GNU General Public License, supplemented by the additional permissions listed below.

0. Additional Definitions.

As used herein, "this License" refers to version 3 of the GNU Lesser General Public License, and the "GNU GPL" refers to version 3 of the GNU General Public License.

"The Library" refers to a covered work governed by this License, other than an Application or a Combined Work as defined below.

An "Application" is any work that makes use of an interface provided by the Library, but which is not otherwise based on the Library. Defining a subclass of a class defined by the Library is deemed a mode of using an interface provided by the Library.

A "Combined Work" is a work produced by combining or linking an Application with the Library. The particular version of the Library with which the Combined Work was made is also called the "Linked Version".

The "Minimal Corresponding Source" for a Combined Work means the Corresponding Source for the Combined Work, excluding any source code for portions of the Combined Work that, considered in isolation, are based on the Application, and not on the Linked Version.

The "Corresponding Application Code" for a Combined Work means the object code and/or source code for the Application, including any data and utility programs needed for reproducing the Combined Work from the Application, but excluding the System Libraries of the Combined Work.

1. Exception to Section 3 of the GNU GPL.

You may convey a covered work under sections 3 and 4 of this License without being bound by section 3 of the GNU GPL.

2. Conveying Modified Versions.

If you modify a copy of the Library, and, in your modifications, a facility refers to a function or data to be supplied by an Application that uses the facility (other than as an argument passed when the facility is invoked), then you may convey a copy of the modified version:

- a) under this License, provided that you make a good faith effort to ensure that, in the event an Application does not supply the function or data, the facility still operates, and performs whatever part of its purpose remains meaningful, or
- b) under the GNU GPL, with none of the additional permissions of this License applicable to that copy.

3. Object Code Incorporating Material from Library Header Files.

The object code form of an Application may incorporate material from a header file that is part of the Library. You may convey such object code under terms of your choice, provided that, if the incorporated material is not limited to numerical parameters, data structure layouts and accessors, or small macros, inline functions and templates (ten or fewer lines in length), you do both of the following:

- a) Give prominent notice with each copy of the object code that the Library is used in it and that the Library and its use are covered by this License.
- b) Accompany the object code with a copy of the GNU GPL and this license document.

4. Combined Works.

You may convey a Combined Work under terms of your choice that, taken together, effectively do not restrict modification of the portions of the Library contained in the Combined Work and reverse engineering for debugging such modifications, if you also do each of the following:

- a) Give prominent notice with each copy of the Combined Work that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the Combined Work with a copy of the GNU GPL and this license document.

c) For a Combined Work that displays copyright notices during execution, include the copyright notice for the Library among these notices, as well as a reference directing the user to the copies of the GNU GPL and this license document.

d) Do one of the following:

0) Convey the Minimal Corresponding Source under the terms of this License, and the Corresponding Application Code in a form suitable for, and under terms that permit, the user to recombine or relink the Application with a modified version of the Linked Version to produce a modified Combined Work, in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.

1) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (a) uses at run time a copy of the Library already present on the user's computer system, and (b) will operate properly with a modified version of the Library that is interface-compatible with the Linked Version.

e) Provide Installation Information, but only if you would otherwise be required to provide such information under section 6 of the GNU GPL, and only to the extent that such information is necessary to install and execute a modified version of the Combined Work produced by recombining or relinking the Application with a modified version of the Linked Version. (If you use option 4d0, the Installation Information must accompany the Minimal Corresponding Source and Corresponding Application Code. If you use option 4d1, you must provide the Installation Information in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.)

5. Combined Libraries.

You may place library facilities that are a work based on the Library side by side in a single library together with other library facilities that are not Applications and are not covered by this License, and convey such a combined library under terms of your choice, if you do both of the following:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities, conveyed under the terms of this License.

b) Give prominent notice with the combined library that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

6. Revised Versions of the GNU Lesser General Public License.

The Free Software Foundation may publish revised and/or new versions of the GNU Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library as you received it specifies that a certain numbered version of the GNU Lesser General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that published version or of any later version published by the Free Software Foundation. If the Library as you received it does not specify a version number of the GNU Lesser General Public License, you may choose any version of the GNU Lesser General Public License ever published by the Free Software Foundation.

If the Library as you received it specifies that a proxy can decide whether future versions of the GNU Lesser General Public License shall apply, that proxy's public statement of acceptance of any version is permanent authorization for you to choose that version for the Library.

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<http://fsf.org/>>
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains

in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a

copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place

additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an

organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a

publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this

License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF

ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <<https://www.gnu.org/licenses/>>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

```
<program> Copyright (C) <year> <name of author>  
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <<https://www.gnu.org/licenses/>>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <<https://www.gnu.org/philosophy/why-not-lgpl.html>>.

1.299.1 Available under license :

Apache License
Version 2.0, January 2004
<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the

Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
 - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

 - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and

 - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

 - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside

or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer,

and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "{}" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

/*

* Interface declarations for Skein hashing.
* Source code author: Doug Whiting, 2008.
* This algorithm and source code is released to the public domain.
*
* The following compile-time switches may be defined to control some
* tradeoffs between speed, code size, error checking, and security.
*
* The "default" note explains what happens when the switch is not defined.
*
* SKEIN_DEBUG -- make callouts from inside Skein code
* to examine/display intermediate values.
* [default: no callouts (no overhead)]
*
* SKEIN_ERR_CHECK -- how error checking is handled inside Skein
* code. If not defined, most error checking
* is disabled (for performance). Otherwise,
* the switch value is interpreted as:
* 0: use assert() to flag errors
* 1: return SKEIN_FAIL to flag errors
*
*/

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.

675 Mass Ave, Cambridge, MA 02139, USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and

(2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and

you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of

Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by

modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License

may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) 19yy <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 675 Mass Ave, Cambridge, MA 02139, USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) 19yy name of author  
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
'Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the
library. If this is what you want to do, use the GNU Library General
Public License instead of this License.

GNU LESSER GENERAL PUBLIC LICENSE
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.

59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in

non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does

and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based

on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and

therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License.

Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the

user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any

particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU

Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the

source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty;

and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under

the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY

YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

```
This program is free software; you can redistribute it and/or modify  
it under the terms of the GNU General Public License as published by  
the Free Software Foundation; either version 2 of the License, or  
(at your option) any later version.
```

```
This program is distributed in the hope that it will be useful,  
but WITHOUT ANY WARRANTY; without even the implied warranty of  
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the  
GNU General Public License for more details.
```

```
You should have received a copy of the GNU General Public License along  
with this program; if not, write to the Free Software Foundation, Inc.,  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.
```

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author  
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

1.308 dtc 1.4.6

1.308.1 Available under license :

Licensing and contribution policy of dtc and libfdt

=====

This dtc package contains two pieces of software: dtc itself, and libfdt which comprises the files in the libfdt/ subdirectory. These two pieces of software, although closely related, are quite distinct. dtc does not incorporate or rely on libfdt for its operation, nor vice versa. It is important that these two pieces of software have different license conditions.

As the copyright banners in each source file attest, dtc is licensed under the GNU GPL. The full text of the GPL can be found in the file entitled 'GPL' which should be included in this package. dtc code, therefore, may not be incorporated into works which do not have a GPL compatible license.

libfdt, however, is GPL/BSD dual-licensed. That is, it may be used either under the terms of the GPL, or under the terms of the 2-clause BSD license (aka the ISC license). The full terms of that license are given in the copyright banners of each of the libfdt source files. This is, in practice, equivalent to being BSD licensed, since the terms of the BSD license are strictly more permissive than the GPL.

I made the decision to license libfdt in this way because I want to encourage widespread and correct usage of flattened device trees, including by proprietary or otherwise GPL-incompatible firmware or tools. Allowing libfdt to be used under the terms of the BSD license

makes that it easier for vendors or authors of such software to do so.

This does mean that libfdt code could be "stolen" - say, included in a proprietary firmware and extended without contributing those extensions back to the libfdt mainline. While I hope that doesn't happen, I believe the goal of allowing libfdt to be widely used is more important than avoiding that. libfdt is quite small, and hardly rocket science; so the incentive for such impolite behaviour is small, and the inconvenience caused thereby is not dire.

Licenses such as the LGPL which would allow code to be used in non-GPL software, but also require contributions to be returned were considered. However, libfdt is designed to be used in firmwares and other environments with unusual technical constraints. It's difficult to anticipate all possible changes which might be needed to meld libfdt into such environments and so difficult to suitably word a license that puts the boundary between what is and isn't permitted in the intended place. Again, I judged encouraging widespread use of libfdt by keeping the license terms simple and familiar to be the more important goal.

****IMPORTANT**** It's intended that all of libfdt as released remain permissively licensed this way. Therefore only contributions which are released under these terms can be merged into the libfdt mainline.

David Gibson <david@gibson.dropbear.id.au>

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
59 Temple Place, Suite 330, Boston, MA 02111-1307 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it,

either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program,

and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component

itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to

apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

```
This program is free software; you can redistribute it and/or modify  
it under the terms of the GNU General Public License as published by  
the Free Software Foundation; either version 2 of the License, or  
(at your option) any later version.
```

```
This program is distributed in the hope that it will be useful,  
but WITHOUT ANY WARRANTY; without even the implied warranty of  
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the  
GNU General Public License for more details.
```

```
You should have received a copy of the GNU General Public License  
along with this program; if not, write to the Free Software
```

Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

1.309.1 Available under license :

GNU Free Documentation License
Version 1.2, November 2002

Copyright (C) 2000,2001,2002 Free Software Foundation, Inc.
51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

0. PREAMBLE

The purpose of this License is to make a manual, textbook, or other functional and useful document "free" in the sense of freedom: to assure everyone the effective freedom to copy and redistribute it, with or without modifying it, either commercially or noncommercially. Secondly, this License preserves for the author and publisher a way to get credit for their work, while not being considered responsible for modifications made by others.

This License is a kind of "copyleft", which means that derivative works of the document must themselves be free in the same sense. It complements the GNU General Public License, which is a copyleft license designed for free software.

We have designed this License in order to use it for manuals for free software, because free software needs free documentation: a free program should come with manuals providing the same freedoms that the software does. But this License is not limited to software manuals; it can be used for any textual work, regardless of subject matter or whether it is published as a printed book. We recommend this License principally for works whose purpose is instruction or reference.

1. APPLICABILITY AND DEFINITIONS

This License applies to any manual or other work, in any medium, that contains a notice placed by the copyright holder saying it can be distributed under the terms of this License. Such a notice grants a world-wide, royalty-free license, unlimited in duration, to use that work under the conditions stated herein. The "Document", below, refers to any such manual or work. Any member of the public is a licensee, and is addressed as "you". You accept the license if you copy, modify or distribute the work in a way requiring permission under copyright law.

A "Modified Version" of the Document means any work containing the Document or a portion of it, either copied verbatim, or with modifications and/or translated into another language.

A "Secondary Section" is a named appendix or a front-matter section of the Document that deals exclusively with the relationship of the publishers or authors of the Document to the Document's overall subject (or to related matters) and contains nothing that could fall directly within that overall subject. (Thus, if the Document is in part a textbook of mathematics, a Secondary Section may not explain any mathematics.) The relationship could be a matter of historical connection with the subject or with related matters, or of legal,

commercial, philosophical, ethical or political position regarding them.

The "Invariant Sections" are certain Secondary Sections whose titles are designated, as being those of Invariant Sections, in the notice that says that the Document is released under this License. If a section does not fit the above definition of Secondary then it is not allowed to be designated as Invariant. The Document may contain zero Invariant Sections. If the Document does not identify any Invariant Sections then there are none.

The "Cover Texts" are certain short passages of text that are listed, as Front-Cover Texts or Back-Cover Texts, in the notice that says that the Document is released under this License. A Front-Cover Text may be at most 5 words, and a Back-Cover Text may be at most 25 words.

A "Transparent" copy of the Document means a machine-readable copy, represented in a format whose specification is available to the general public, that is suitable for revising the document straightforwardly with generic text editors or (for images composed of pixels) generic paint programs or (for drawings) some widely available drawing editor, and that is suitable for input to text formatters or for automatic translation to a variety of formats suitable for input to text formatters. A copy made in an otherwise Transparent file format whose markup, or absence of markup, has been arranged to thwart or discourage subsequent modification by readers is not Transparent. An image format is not Transparent if used for any substantial amount of text. A copy that is not "Transparent" is called "Opaque".

Examples of suitable formats for Transparent copies include plain ASCII without markup, Texinfo input format, LaTeX input format, SGML or XML using a publicly available DTD, and standard-conforming simple HTML, PostScript or PDF designed for human modification. Examples of transparent image formats include PNG, XCF and JPG. Opaque formats include proprietary formats that can be read and edited only by proprietary word processors, SGML or XML for which the DTD and/or processing tools are not generally available, and the machine-generated HTML, PostScript or PDF produced by some word processors for output purposes only.

The "Title Page" means, for a printed book, the title page itself, plus such following pages as are needed to hold, legibly, the material this License requires to appear in the title page. For works in formats which do not have any title page as such, "Title Page" means the text near the most prominent appearance of the work's title, preceding the beginning of the body of the text.

A section "Entitled XYZ" means a named subunit of the Document whose

title either is precisely XYZ or contains XYZ in parentheses following text that translates XYZ in another language. (Here XYZ stands for a specific section name mentioned below, such as "Acknowledgements", "Dedications", "Endorsements", or "History".) To "Preserve the Title" of such a section when you modify the Document means that it remains a section "Entitled XYZ" according to this definition.

The Document may include Warranty Disclaimers next to the notice which states that this License applies to the Document. These Warranty Disclaimers are considered to be included by reference in this License, but only as regards disclaiming warranties: any other implication that these Warranty Disclaimers may have is void and has no effect on the meaning of this License.

2. VERBATIM COPYING

You may copy and distribute the Document in any medium, either commercially or noncommercially, provided that this License, the copyright notices, and the license notice saying this License applies to the Document are reproduced in all copies, and that you add no other conditions whatsoever to those of this License. You may not use technical measures to obstruct or control the reading or further copying of the copies you make or distribute. However, you may accept compensation in exchange for copies. If you distribute a large enough number of copies you must also follow the conditions in section 3.

You may also lend copies, under the same conditions stated above, and you may publicly display copies.

3. COPYING IN QUANTITY

If you publish printed copies (or copies in media that commonly have printed covers) of the Document, numbering more than 100, and the Document's license notice requires Cover Texts, you must enclose the copies in covers that carry, clearly and legibly, all these Cover Texts: Front-Cover Texts on the front cover, and Back-Cover Texts on the back cover. Both covers must also clearly and legibly identify you as the publisher of these copies. The front cover must present the full title with all words of the title equally prominent and visible. You may add other material on the covers in addition. Copying with changes limited to the covers, as long as they preserve the title of the Document and satisfy these conditions, can be treated as verbatim copying in other respects.

If the required texts for either cover are too voluminous to fit legibly, you should put the first ones listed (as many as fit

reasonably) on the actual cover, and continue the rest onto adjacent pages.

If you publish or distribute Opaque copies of the Document numbering more than 100, you must either include a machine-readable Transparent copy along with each Opaque copy, or state in or with each Opaque copy a computer-network location from which the general network-using public has access to download using public-standard network protocols a complete Transparent copy of the Document, free of added material. If you use the latter option, you must take reasonably prudent steps, when you begin distribution of Opaque copies in quantity, to ensure that this Transparent copy will remain thus accessible at the stated location until at least one year after the last time you distribute an Opaque copy (directly or through your agents or retailers) of that edition to the public.

It is requested, but not required, that you contact the authors of the Document well before redistributing any large number of copies, to give them a chance to provide you with an updated version of the Document.

4. MODIFICATIONS

You may copy and distribute a Modified Version of the Document under the conditions of sections 2 and 3 above, provided that you release the Modified Version under precisely this License, with the Modified Version filling the role of the Document, thus licensing distribution and modification of the Modified Version to whoever possesses a copy of it. In addition, you must do these things in the Modified Version:

- A. Use in the Title Page (and on the covers, if any) a title distinct from that of the Document, and from those of previous versions (which should, if there were any, be listed in the History section of the Document). You may use the same title as a previous version if the original publisher of that version gives permission.
- B. List on the Title Page, as authors, one or more persons or entities responsible for authorship of the modifications in the Modified Version, together with at least five of the principal authors of the Document (all of its principal authors, if it has fewer than five), unless they release you from this requirement.
- C. State on the Title page the name of the publisher of the Modified Version, as the publisher.
- D. Preserve all the copyright notices of the Document.
- E. Add an appropriate copyright notice for your modifications adjacent to the other copyright notices.
- F. Include, immediately after the copyright notices, a license notice giving the public permission to use the Modified Version under the terms of this License, in the form shown in the Addendum below.

- G. Preserve in that license notice the full lists of Invariant Sections and required Cover Texts given in the Document's license notice.
- H. Include an unaltered copy of this License.
- I. Preserve the section Entitled "History", Preserve its Title, and add to it an item stating at least the title, year, new authors, and publisher of the Modified Version as given on the Title Page. If there is no section Entitled "History" in the Document, create one stating the title, year, authors, and publisher of the Document as given on its Title Page, then add an item describing the Modified Version as stated in the previous sentence.
- J. Preserve the network location, if any, given in the Document for public access to a Transparent copy of the Document, and likewise the network locations given in the Document for previous versions it was based on. These may be placed in the "History" section. You may omit a network location for a work that was published at least four years before the Document itself, or if the original publisher of the version it refers to gives permission.
- K. For any section Entitled "Acknowledgements" or "Dedications", Preserve the Title of the section, and preserve in the section all the substance and tone of each of the contributor acknowledgements and/or dedications given therein.
- L. Preserve all the Invariant Sections of the Document, unaltered in their text and in their titles. Section numbers or the equivalent are not considered part of the section titles.
- M. Delete any section Entitled "Endorsements". Such a section may not be included in the Modified Version.
- N. Do not retitle any existing section to be Entitled "Endorsements" or to conflict in title with any Invariant Section.
- O. Preserve any Warranty Disclaimers.

If the Modified Version includes new front-matter sections or appendices that qualify as Secondary Sections and contain no material copied from the Document, you may at your option designate some or all of these sections as invariant. To do this, add their titles to the list of Invariant Sections in the Modified Version's license notice. These titles must be distinct from any other section titles.

You may add a section Entitled "Endorsements", provided it contains nothing but endorsements of your Modified Version by various parties--for example, statements of peer review or that the text has been approved by an organization as the authoritative definition of a standard.

You may add a passage of up to five words as a Front-Cover Text, and a passage of up to 25 words as a Back-Cover Text, to the end of the list of Cover Texts in the Modified Version. Only one passage of Front-Cover Text and one of Back-Cover Text may be added by (or through arrangements made by) any one entity. If the Document already

includes a cover text for the same cover, previously added by you or by arrangement made by the same entity you are acting on behalf of, you may not add another; but you may replace the old one, on explicit permission from the previous publisher that added the old one.

The author(s) and publisher(s) of the Document do not by this License give permission to use their names for publicity for or to assert or imply endorsement of any Modified Version.

5. COMBINING DOCUMENTS

You may combine the Document with other documents released under this License, under the terms defined in section 4 above for modified versions, provided that you include in the combination all of the Invariant Sections of all of the original documents, unmodified, and list them all as Invariant Sections of your combined work in its license notice, and that you preserve all their Warranty Disclaimers.

The combined work need only contain one copy of this License, and multiple identical Invariant Sections may be replaced with a single copy. If there are multiple Invariant Sections with the same name but different contents, make the title of each such section unique by adding at the end of it, in parentheses, the name of the original author or publisher of that section if known, or else a unique number. Make the same adjustment to the section titles in the list of Invariant Sections in the license notice of the combined work.

In the combination, you must combine any sections Entitled "History" in the various original documents, forming one section Entitled "History"; likewise combine any sections Entitled "Acknowledgements", and any sections Entitled "Dedications". You must delete all sections Entitled "Endorsements".

6. COLLECTIONS OF DOCUMENTS

You may make a collection consisting of the Document and other documents released under this License, and replace the individual copies of this License in the various documents with a single copy that is included in the collection, provided that you follow the rules of this License for verbatim copying of each of the documents in all other respects.

You may extract a single document from such a collection, and distribute it individually under this License, provided you insert a copy of this License into the extracted document, and follow this License in all other respects regarding verbatim copying of that document.

7. AGGREGATION WITH INDEPENDENT WORKS

A compilation of the Document or its derivatives with other separate and independent documents or works, in or on a volume of a storage or distribution medium, is called an "aggregate" if the copyright resulting from the compilation is not used to limit the legal rights of the compilation's users beyond what the individual works permit. When the Document is included in an aggregate, this License does not apply to the other works in the aggregate which are not themselves derivative works of the Document.

If the Cover Text requirement of section 3 is applicable to these copies of the Document, then if the Document is less than one half of the entire aggregate, the Document's Cover Texts may be placed on covers that bracket the Document within the aggregate, or the electronic equivalent of covers if the Document is in electronic form. Otherwise they must appear on printed covers that bracket the whole aggregate.

8. TRANSLATION

Translation is considered a kind of modification, so you may distribute translations of the Document under the terms of section 4. Replacing Invariant Sections with translations requires special permission from their copyright holders, but you may include translations of some or all Invariant Sections in addition to the original versions of these Invariant Sections. You may include a translation of this License, and all the license notices in the Document, and any Warranty Disclaimers, provided that you also include the original English version of this License and the original versions of those notices and disclaimers. In case of a disagreement between the translation and the original version of this License or a notice or disclaimer, the original version will prevail.

If a section in the Document is Entitled "Acknowledgements", "Dedications", or "History", the requirement (section 4) to Preserve its Title (section 1) will typically require changing the actual title.

9. TERMINATION

You may not copy, modify, sublicense, or distribute the Document except as expressly provided for under this License. Any other attempt to copy, modify, sublicense or distribute the Document is void, and will automatically terminate your rights under this License. However,

parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

10. FUTURE REVISIONS OF THIS LICENSE

The Free Software Foundation may publish new, revised versions of the GNU Free Documentation License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns. See <http://www.gnu.org/copyleft/>.

Each version of the License is given a distinguishing version number. If the Document specifies that a particular numbered version of this License "or any later version" applies to it, you have the option of following the terms and conditions either of that specified version or of any later version that has been published (not as a draft) by the Free Software Foundation. If the Document does not specify a version number of this License, you may choose any version ever published (not as a draft) by the Free Software Foundation.

ADDENDUM: How to use this License for your documents

To use this License in a document you have written, include a copy of the License in the document and put the following copyright and license notices just after the title page:

Copyright (c) YEAR YOUR NAME.

Permission is granted to copy, distribute and/or modify this document under the terms of the GNU Free Documentation License, Version 1.2 or any later version published by the Free Software Foundation; with no Invariant Sections, no Front-Cover Texts, and no Back-Cover Texts. A copy of the license is included in the section entitled "GNU Free Documentation License".

If you have Invariant Sections, Front-Cover Texts and Back-Cover Texts, replace the "with...Texts." line with this:

with the Invariant Sections being LIST THEIR TITLES, with the Front-Cover Texts being LIST, and with the Back-Cover Texts being LIST.

If you have Invariant Sections without Cover Texts, or some other combination of the three, merge those two alternatives to suit the situation.

If your document contains nontrivial examples of program code, we

recommend releasing these examples in parallel under your choice of free software license, such as the GNU General Public License, to permit their use in free software.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling

it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this

case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not

compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the

Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

- a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
- b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent

license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free

Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the library's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

```
This library is free software; you can redistribute it and/or  
modify it under the terms of the GNU Lesser General Public
```

License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for

this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based

on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent

access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any

patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED

OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands ``show w'` and ``show c'` should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than ``show w'` and ``show c'`; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

```
Copyright (C) 2000-2009 Josh Coalson
Copyright (C) 2011-2016 Xiph.Org Foundation
```

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

- Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.
- Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
- Neither the name of the Xiph.org Foundation nor the names of its contributors may be used to endorse or promote products derived from this software without specific prior written permission.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical

transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable

by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use,

reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence

the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run

that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any

warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to

exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the

Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining

where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is

implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR

PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

GNU LESSER GENERAL PUBLIC LICENSE
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of

it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a

table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or

link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for

reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

- a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
- b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the

original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version,

but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that

everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<https://fsf.org/>>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for
software and other kinds of works.

The licenses for most software and other practical works are designed
to take away your freedom to share and change the works. By contrast,
the GNU General Public License is intended to guarantee your freedom to
share and change all versions of a program--to make sure it remains free
software for all its users. We, the Free Software Foundation, use the
GNU General Public License for most of our software; it applies also to
any other work released this way by its authors. You can apply it to
your programs, too.

When we speak of free software, we are referring to freedom, not
price. Our General Public Licenses are designed to make sure that you
have the freedom to distribute copies of free software (and charge for
them if you wish), that you receive source code or can get it if you
want it, that you can change the software or use pieces of it in new
free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you
these rights or asking you to surrender the rights. Therefore, you have
certain responsibilities if you distribute copies of the software, or if
you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether
gratis or for a fee, you must pass on to the recipients the same
freedoms that you received. You must make sure that they, too, receive
or can get the source code. And you must show them these terms so they
know their rights.

Developers that use the GNU GPL protect your rights with two steps:
(1) assert copyright on the software, and (2) offer you this License
giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but

which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid

circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".
- c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.
- d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent

works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

- a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.
- b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.
- c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.
- d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the

Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for

the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some

trade names, trademarks, or service marks; or

f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are

specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General

Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <<https://www.gnu.org/licenses/>>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

<program> Copyright (C) <year> <name of author>

This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.

This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary.

For more information on this, and how to apply and follow the GNU GPL, see <<https://www.gnu.org/licenses/>>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <<https://www.gnu.org/licenses/why-not-lgpl.html>>.

GNU LESSER GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<https://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

This version of the GNU Lesser General Public License incorporates the terms and conditions of version 3 of the GNU General Public License, supplemented by the additional permissions listed below.

0. Additional Definitions.

As used herein, "this License" refers to version 3 of the GNU Lesser General Public License, and the "GNU GPL" refers to version 3 of the GNU General Public License.

"The Library" refers to a covered work governed by this License, other than an Application or a Combined Work as defined below.

An "Application" is any work that makes use of an interface provided by the Library, but which is not otherwise based on the Library. Defining a subclass of a class defined by the Library is deemed a mode of using an interface provided by the Library.

A "Combined Work" is a work produced by combining or linking an Application with the Library. The particular version of the Library with which the Combined Work was made is also called the "Linked Version".

The "Minimal Corresponding Source" for a Combined Work means the Corresponding Source for the Combined Work, excluding any source code for portions of the Combined Work that, considered in isolation, are based on the Application, and not on the Linked Version.

The "Corresponding Application Code" for a Combined Work means the object code and/or source code for the Application, including any data and utility programs needed for reproducing the Combined Work from the Application, but excluding the System Libraries of the Combined Work.

1. Exception to Section 3 of the GNU GPL.

You may convey a covered work under sections 3 and 4 of this License without being bound by section 3 of the GNU GPL.

2. Conveying Modified Versions.

If you modify a copy of the Library, and, in your modifications, a facility refers to a function or data to be supplied by an Application that uses the facility (other than as an argument passed when the facility is invoked), then you may convey a copy of the modified version:

- a) under this License, provided that you make a good faith effort to ensure that, in the event an Application does not supply the function or data, the facility still operates, and performs whatever part of its purpose remains meaningful, or
- b) under the GNU GPL, with none of the additional permissions of this License applicable to that copy.

3. Object Code Incorporating Material from Library Header Files.

The object code form of an Application may incorporate material from a header file that is part of the Library. You may convey such object code under terms of your choice, provided that, if the incorporated material is not limited to numerical parameters, data structure layouts and accessors, or small macros, inline functions and templates (ten or fewer lines in length), you do both of the following:

- a) Give prominent notice with each copy of the object code that the Library is used in it and that the Library and its use are covered by this License.
- b) Accompany the object code with a copy of the GNU GPL and this license document.

4. Combined Works.

You may convey a Combined Work under terms of your choice that, taken together, effectively do not restrict modification of the portions of the Library contained in the Combined Work and reverse engineering for debugging such modifications, if you also do each of the following:

- a) Give prominent notice with each copy of the Combined Work that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the Combined Work with a copy of the GNU GPL and this license document.

c) For a Combined Work that displays copyright notices during execution, include the copyright notice for the Library among these notices, as well as a reference directing the user to the copies of the GNU GPL and this license document.

d) Do one of the following:

0) Convey the Minimal Corresponding Source under the terms of this License, and the Corresponding Application Code in a form suitable for, and under terms that permit, the user to recombine or relink the Application with a modified version of the Linked Version to produce a modified Combined Work, in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.

1) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (a) uses at run time a copy of the Library already present on the user's computer system, and (b) will operate properly with a modified version of the Library that is interface-compatible with the Linked Version.

e) Provide Installation Information, but only if you would otherwise be required to provide such information under section 6 of the GNU GPL, and only to the extent that such information is necessary to install and execute a modified version of the Combined Work produced by recombining or relinking the Application with a modified version of the Linked Version. (If you use option 4d0, the Installation Information must accompany the Minimal Corresponding Source and Corresponding Application Code. If you use option 4d1, you must provide the Installation Information in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.)

5. Combined Libraries.

You may place library facilities that are a work based on the Library side by side in a single library together with other library facilities that are not Applications and are not covered by this License, and convey such a combined library under terms of your choice, if you do both of the following:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities,

conveyed under the terms of this License.

b) Give prominent notice with the combined library that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

6. Revised Versions of the GNU Lesser General Public License.

The Free Software Foundation may publish revised and/or new versions of the GNU Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library as you received it specifies that a certain numbered version of the GNU Lesser General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that published version or of any later version published by the Free Software Foundation. If the Library as you received it does not specify a version number of the GNU Lesser General Public License, you may choose any version of the GNU Lesser General Public License ever published by the Free Software Foundation.

If the Library as you received it specifies that a proxy can decide whether future versions of the GNU Lesser General Public License shall apply, that proxy's public statement of acceptance of any version is permanent authorization for you to choose that version for the Library.

1.318.1 Available under license :

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<http://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to

share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to

avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a

covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".
- c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.
- d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

- a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status

of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by

this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the

additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a

party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not

excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY

APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

```
This program is free software: you can redistribute it and/or modify  
it under the terms of the GNU General Public License as published by  
the Free Software Foundation, either version 3 of the License, or
```

(at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <http://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

```
<program> Copyright (C) <year> <name of author>  
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <http://www.gnu.org/philosophy/why-not-lgpl.html>.

.b"\" The following does seem a poor API-design choice...'

.b"\"

.b"\" One or more other seals are typically used with F_SEAL_WRITE'

.b"\" because, given a file with the F_SEAL_WRITE seal set, then,'

.b"\" while it would no longer be possible to (say) write zeros into'

.b"\" the last 100 bytes of a file, it would still be possible'

.b"\" to (say) shrink the file by 100 bytes using ftruncate(), and'

.b"\" then increase the file size by 100 bytes, which would have'

.b"\" the effect of replacing the last hundred bytes by zeros.'

.b"\"

.b"\"

.b"\" .BR _BSD_SOURCE ,'

.b"\" or'

.b"\" .PP'

.b"\" SVr4 documents additional EIO, ENOLINK and EOVERFLOW error conditions.'

.b"\" FIXME . Once glibc adds support, add a note about FTM requirements'

.b"\"

.b"\"

.b"\" e.g., Solaris 8 documents this field in fcntl(2), and Irix 6.5'

.b"\" documents it in fcntl(5). mtk, May 2007'

.b"\" Also, FreeBSD documents it (Apr 2014).'

.b"\"

.b"\" Neil Brown: With NFSv3 the failure mode is the reverse. If

.b"\" the server loses contact with a client then any lock stays in place'

.b"\" indefinitely ("why can't I read my mail"... I remember it well).'

.b"\"

.b"\"

.b"\" Jeff Layton:'

.b"\" Note that this is not a firm timeout. The server runs a job'

.b"\" periodically to clean out expired stateful objects, and it's likely'

.b"\" that there is some time (maybe even up to another whole lease period)'

.b"\" between when the timeout expires and the job actually runs. If the'

.b"\" client gets a RENEW in there within that window, its lease will be'

.b"\" renewed and its state preserved.'

.b"\"

.b"\" commit ef1820f9be27b6ad158f433ab38002ab8131db4d'

.b"\" commit f6de7a39c181dfb8a2c534661a53c73afb3081cd'

.b"\" FIXME . According to POSIX.1-2001, O_SYNC should also be modifiable'

.b"\" via fcntl(2), but currently Linux does not permit this'

Martin Pool <mbp@sourcefrog.net>
Richard Kreckel <Richard.Kreckel@ginac.de>
Vasya Pupkin <ptushnik@gmail.com>

Apologies if I missed anyone!

Global changes

Various pages

Fabian Kreutz

Many math pages had their synopses compressed, as per suggestion from Fabian Kreutz.

Various pages

Fabian Kreutz / aeb

Many minor content and formatting bug fixes were made to the math pages, following suggestions from Fabian Kreutz (who recently translated many of the 1.70 math pages into German) and Andries Brouwer.

Various pages

mtk

For consistency, all instances of "super-user" were changed to the more common "superuser".

Various pages

Vasya Pupkin / mtk

After a note from Vasya Pupkin, I added <errno.h> to the SYNOPSIS of several Section 2 pages using the _syscallN() macros.

In addition:

-- erroneous semicolons at the end of _syscallN() were removed on various pages.

-- types such as "uint" in syscallN() declarations were changed to "unsigned int", etc.

-- various other minor breakages in the synopses were fixed.

The affected pages are:

getdents.2
gettid.2
llseek.2
mmap2.2
modify_ldt.2
pivot_root.2
quotactl.2
readdir.2
sysctl.2
syslog.2
tkill.2

Typographical or grammatical errors have been corrected in several other places.

Changes to individual pages

bind.2

Florian Weimer

Added 'const' to declaration of 'my_addr' in prototype.
as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=239762>.

fcntl.2

Martin Pool

Added O_NOATIME to list of flags that can be changed via F_SETFL.

mtk/aeb

Noted F_GETOWN bug after suggestion from aeb.

See also:

<http://marc.theaimsgroup.com/?l=linux-kernel&m=108380640603164&w=2>

getrlimit.2

mtk

Material on getrusage.2 has been separated out into its own page.

Rewrote discussion on RLIMIT_MEMLOCK to incorporate kernel

2.6.9 changes.

Added note on RLIMIT_CPU error in older kernels.

Added RLIMIT_SIGPENDING.

Also made a few other minor changes.

getrusage.2

mtk

This page is new(ish) -- it was created by splitting
getrlimit.2.

Repaired note on SIGCHLD behavior to note that the

POSIX non-conformance has been fixed in 2.6.9.

kill.2

Modified after suggestion from Emmanuel Colbus

Changed wording of sentence under NOTES describing
when signals can be sent to init(1).

mlock.2

munlock.2

mlockall.2

munlockall.2

These have been consolidated into a single mlock.2 page.

In the process, much duplication was eliminated

and new information was added about RLIMIT_MEMLOCK

and the changes in memory locking in kernel 2.6.9,

mmap.2

mtk

Added cross-ref to setrlimit(2) concerning memory locking limits.

Eric Estievenart

Note that MAP_FIXED replaces existing mappings

msgctl.2

mtk

Substantial language and formatting clean-ups.
Added msqid_ds and ipc_perm structure definitions.

msgget.2

mtk

Substantial language and formatting clean-ups.
Added notes on /proc files.

msgop.2

mtk

Substantial language and formatting clean-ups.
Added notes on /proc files.

open.2

Martin Pool

Added O_NOATIME (new in Linux 2.6.8)

mtk

Reordered list of 'flags' description alphabetically

personality.2

2004-11-03 applied patch from Martin Schulze

semctl.2

mtk

Substantial language and formatting clean-ups.
Rewrote semun text.
Added semid_ds and ipc_perm structure definitions.

semget.2

mtk

Substantial language and formatting clean-ups.
Added notes on /proc files.
Rewrote BUGS note about semget()'s failure to initialize semaphore values.

semop.2

mtk

Substantial language and formatting clean-ups.
Added notes on /proc files.

shmctl.2

mtk

Substantial language and formatting clean-ups.
Updated shmid_ds structure definitions.
Added information on SHM_DEST and SHM_LOCKED flags.
Noted that CAP_IPC_LOCK is not required for SHM_UNLOCK

since kernel 2.6.9.

Added notes on 2.6.9 RLIMIT_MEMLOCK changes.

Added RLIMIT_SIGPENDING (new in Linux 2.6.8)

shmget.2

mtk

Substantial language and formatting clean-ups.

Added notes on /proc files.

shmop.2

mtk

Substantial language and formatting clean-ups.

Changed wording and placement of sentence regarding attachment of segments marked for destruction.

sigaction.2

mtk

Added mention of SIGCONT under SA_NOCLDSTOP.

Added SA_NOCLDWAIT.

Updated discussion for POSIX.1-2001 and SIGCHLD and sa_flags.

Noted that CLD_CONTINUED is supported since Linux 2.6.9.

Added SI_TKILL (new in Linux 2.4.19).

Other minor changes.

signal.2

mtk

Removed text on ignoring SIGCHLD; replaced with pointer to sigaction.2.

sigwaitinfo.2

After bug report from Andrey Kiselev

Fixed prototype: "timeout" --> "*timeout"

as per: <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=222145>

stat.2

Enrico Zini

Added text to clarify that S_IS*() macros should be applied to st_mode field.

as per: <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=249698>

swapon.2

After Debian bug report from Anand Kumria

Added "no swap space signature" to EINVAL error.

mtk

Added EINVAL error for swapoff() ("not currently a swap area").

Added EBUSY error for swapon().

A few formatting fixes.

times.2

mtk

In Linux 2.6, the return value of times changed; it is no longer time since boot, but rather:

$$\text{boot_time} + 2^{32} / \text{HZ} - 300$$

Repaired note on SIGCHLD behavior to note that the POSIX non-conformance has been fixed in 2.6.9.
Some formatting fixes.

undocumented.2

After bug report from Johannes Berg

Changed

.TH UNIMPLEMENTED

to:

.TH UNDOCUMENTED

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=220741>

wait.2

mtk

Added waitid(2).

Added WCONTINUED and WIFCONTINUED (new in 2.6.10).

Added text on SA_NOCLDSTOP.

Updated discussion of SA_NOCLDWAIT to reflect 2.6 behavior.

Much other text rewritten.

wait4.2

mtk

Rewrote this page, removing much duplicated information, and replacing with pointers to wait.2.

Luis Javier Merino Morán / mtk

CONFORMING TO said "SVr4, POSIX". Changed to "4.3BSD"

waitid.2

mtk

New link to wait.2

assert.3

After bug report from Branden Robinson

The assert() failure message goes to stderr not stdout.

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=284814>

ctime.3

mtk

Noted that 0 in tm_mday is interpreted to mean the last day of the preceding month.

getnameinfo.3

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=229618>

getnameinfo() does not set errno, it returns a non-zero value indicating the error.

mtk

added EAI_OVERFLOW error

killpg.3

mtk

Minor changes to SEE ALSO and CONFORMING TO.

lseek64.3

aeb

New page by Andries Brouwer

tzset.3

Richard Kreckel

Change "NULL" to "empty" when talking about the value of TZ.

http://sources.redhat.com/bugzilla/show_bug.cgi?id=601

printf.3

After bug report from Jan Kuznik

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=205736>

Fixed bad realloc() use in snprintf() example

realpath.3

mtk

Added discussion of resolved_path == NULL.

random.4

After bug report from John V. Belmonte

Updated init and quit scripts to reflect kernel 2.4/2.6 reality

(Scripts taken from drivers/char/random.c)

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=247779>

proc.5

mtk

Updated description of /proc/loadavg to include

nr_running(), nr_threads, last_pid.

rtsig-max and rtsig-nr went away in 2.6.8

updated statm, and fixed error in order of list

boot.7

applied patch from Martin Schulze

capabilities.7

mtk

Added O_NOATIME for CAP_FOWNER

netdevice.7

Karel Kulhavy and AEB

Formatting fix after note from Karel Kulhavy and AEB, plus a few wording fixes.

signal.7

mtk

/proc/sys/kernel/rtsig-* were superseded by RLIMIT_SIGPENDING in kernel 2.6.8.

tcp.7

mtk/aeb

Updated details of interaction of TCP_CORK and TCP_NODELAY.

==== Changes in man-pages-2.01 =====

Released: 2004-12-20

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Carsten Hey <c.hey@web.de>

Johannes Berg <johannes@sipsolutions.de>

Joshua Kwan <joshk@triplehelix.org>

Marek Habersack <grendel@debian.org>

Martin Schulze <joe@infodrom.org>

Matthew Dempsky <jivera@flame.org>

Matthew Gregan <kinetik@orcon.net.nz>

Pedro Zorzenon Neto <pzn@terra.com.br>

Tony Crawford <tony@klosterdorf.de>

Apologies if I missed anyone!

Global changes

accept.2

close.2

send.2

setsid.2

socket.2

closedir.3

initgroups.3

mkstemp.3

opendir.3

readdir.3

telldir.3

Matthew Dempsky, mtk

triggered by <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=283179>

The wording describing how errno is set was fixed up in these pages.

Typographical or grammatical errors have been corrected in several other places.

Changes to individual pages

sendfile.2

mtk

Adjusted descriptions of argument file types to be closer to 2.6 reality.

Wording and formatting changes.

ctan.3

ctanh.3

Tony Crawford

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=270817>

Formulae on the pages should be $T = S / C$ not $T = C / S$.

errno.3

Martin Schulze, mtk

Removed errno declaration from prototype, added notes on historical need for this declaration.

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=174175>

aio_return.3

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=224953>

Changed erroneous "aio_return(2)" to "aio_return(3)".

posix_openpt.3

mtk

New by mtk

ptsname.3

mtk

Added description of ptsname_r().

Added ERRORS.

ptsname_r.3

mtk

New link to ptsname.3.

shm_open.3

Matthew Gregan

add <fcntl.h> to synopsis

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=271243>

strcasecmp.3

Marek Habersack

.SH "CONFORMING TO"

-BSD 4.4

+BSD 4.4, SUSv3

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=234443>

strfry.3

Joshua Kwan

Added _GNU_SOURCE to prototype

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=213538>

strftime.3

Cartsen Hey

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=276248>

Changed range for "%S" from 0..61 to 0..60.

SUSv3 says 0..60. I think the manual page probably says 0..61, because that's what SUSv2 said.

(Some other implementations' man pages also say 0..61 -- e.g., Solaris 8 & 9, Tru64 5.1B; FreeBSD 5.1 says 0..60.)

The glibc manual currently says 0..60.

Given that SUSv3 says 0..60, I've changed the manual page to also say this:

-The second as a decimal number (range 00 to 61).

+The second as a decimal number (range 00 to 60).

+(The range is up to 60 to allow for occasional leap seconds.)

sysconf.3

Johannes Berg

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=226974>

-.BR POSIX2_FORT_RUN " - " _SC_2_FORT_DEV

+.BR POSIX2_FORT_DEV " - " _SC_2_FORT_DEV

system.3

Pedro Zorzenon

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=242638>

Noted use of `_XOPEN_SOURCE` to get macros from `<stdlib.h>`
for `wait(2)`.

mtk

Changed name of argument from 'string' to 'command' (like POSIX).

Noted that `glibc` does nowadays explicitly check for the existence
of the shell if 'command' is `NULL`, rather than the older behavior
of assuming the shell exists and always returning 1 if
'command' is `NULL`.

Other wording and formatting clean-ups.

undocumented.3

Remove some functions names that *are* documented.

==== Changes in man-pages-2.02 =====

Released: 2005-04-14

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Michael Haardt <michael@morja.de>
Michael Mühlebach <michael@anduin.ch>
Mike Frysinger <vapier@gentoo.org>
Sasa Stevanovic <mg94c18@alas.matf.bg.ac.yu>
Serguei Leontiev <leo@sai.msu.ru>

Apologies if I missed anyone!

Global changes

ctime.3

tzselect.8

zdump.8

zic.8

Martin (Joey) Schulze

Removed SEE ALSO reference to nonexistent newctime(3).

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=236884>

Typographical or grammatical errors have been corrected in several other places.

Changes to individual pages

clone.2

mtk

Noted the PID caching behavior of NPTL's getpid() wrapper under BUGS.

Added futex(2), set_thread_area(2), set_tid_address(2), tkill(2) under SEE ALSO.

epoll_ctl.2

epoll_create.2

Marko Kohtala / mtk

Improved various error descriptions.

epoll_wait.2

David Lloyd / Mike Frysinger, Marko Kohtala

Added EINTR to errors.

fcntl.2

Jamie Lokier / mtk

Improved discussion of F_SETOWN and F_SETSIG with respect to multi-threaded programs.

Generally cleaned up the discussion of F_SETOWN.

Updated CONFORMING TO to note that F_GETOWN and F_SETOWN are now in POSIX.

link.2

mtk

Noted discrepancy between Linux and POSIX.1 when oldpath is a symbolic link.

See: http://bugs.linuxbase.org/show_bug.cgi?id=367

and: <http://www.opengroup.org/austin/mailarchives/ag/msg08152.html>

Michael Haardt / mtk

Clarified EXDEV error description: it isn't possible to link across mount points, even if the mount points refer to the same file system.

mincore.2

mtk, after note from Gordon Jin

Updated ERRORS.

pipe.2

As per message from Serguei Leontiev

Removed SVr2, AT&T, and BSD from CONFORMING TO, since a pipe on those systems is actually bidirectional.

(Pipes are implemented as STREAMS on the former, and sockets on the latter.)

posix_fadvise.2

mtk

Noted kernel version where posix_fadvise() appeared and noted bug in handling of 'len' in kernels < 2.6.6.

rename.2

Michael Haardt

Clarified EXDEV error description: it isn't possible to rename a file across mount points, even if the mount points refer to the same file system.

semop.2

mtk

Noted kernel version numbers for semtimedop().

setitimer.2

Matthias Lang, mtk

Noted MAX_SEC_IN_JIFFIES ceiling.

Added note about treatment of out-of-range tv_usec values.

sigqueue.2

Johan Walles, Martin (Joey) Schulze

Added sigqueue.2 to SEE ALSO.

times.2

mtk

Added notes on non-standard behavior: Linux allows 'buf' to be NULL, but POSIX.1 doesn't specify this and it's non-portable.

uselib.2

Andries Brouwer

Improved DESCRIPTION; clarified distinction between
EACCES and ENOEXEC.

bcopy.3

Heikki Orsila

bcopy() handles overlapping case, but memcpy() does not,
so for consistency memmove() should be also mentioned.

getmntent_r.3

Martin (Joey) Schulze

New link to man3/getmntent.3.

memcpy.3

Small wording change after suggestion from Sasa Stevanovic.

strcasestr.3

mtk

Created as link to strstr.3.

strptime.3

mtk

Noted that SUSv2 allowed a range of 00 to 61 for %S specifier.

strstr.3

mtk

Added description of strcasestr().

random.4

aeb

Improved description of read from /dev/urandom.

st.4

Kai Makisara

Substantial updates.

man.7

Martin Schulze

Branden Robinson

Colin Watson

Mention the .URL macro more verbosely.

==== Changes in man-pages-2.03 =====

Released: 2005-06-02

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>
Joey (Martin) Schulze <joe@infodrom.org>
Johannes Nicolai <johannes.nicolai@hpi.uni-potsdam.de>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Klaus Ethgen <Klaus@Ethgen.de>
Pavel Heimlich <tropikhajma@seznam.cz>
Ross Boylan <RossBoylan@stanfordalumni.org>
Vincent Fourmond <vincent.fourmond@9online.fr>

Apologies if I missed anyone!

Global changes

console.4
console_ioctl.4
mouse.4
tty.4
vcs.4

 Pavel Heimlich

 Change `ttys(4)` to `ttyS(4)`.

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

clone.2

 mtk

 Substantially enhanced discussion of CLONE_THREAD.

 Added CLONE_SYSVSEM, CLONE_UNTRACED, CLONE_STOPPED.

 Other minor fixes.

execve.2

 aeb

 Noted effect of ptracing when execing a set-UID program.

fcntl.2

 Johannes Nicolai / mtk

 Noted F_SETOWN bug for socket file descriptor in Linux 2.4

and earlier.

Added text on permissions required to send signal to owner.

flock.2

mtk

Noted that lock conversions are not atomic.

getrusage.2

mtk

ru_nswap has never contained useful information.

Kernel 2.6.6 clarified that with a patch

("[PATCH] eliminate nswap and cnswap"). See also:

<http://www.ussg.iu.edu/hypermail/linux/kernel/0404.1/0720.html>

kill.2

mtk

Clarified wording of the 'pid == -1' case.

mount.2

mtk

Added MNT_EXPIRE, plus a few other tidy-ups.

sched_setaffinity.2

mtk

Added text to note that sched_setaffinity() will migrate the affected process to one of the specified CPUs if necessary.

Added a NOTE to point out that the affinity mask is actually a per-thread attribute that can be adjusted independently for each thread in a thread group.

shmctl.2

mtk

Noted aberrant Linux behavior with respect to new attaches to a segment that has already been marked for deletion.

Noted changes in permissions required for SHM_LOCK/SHM_UNLOCK.

wait.2

mtk

Noted that the __W* flags can't be used with waitid().

confstr.3

mtk

Added _CS_GNU_LIBC_VERSION and _CS_GNU_LIBPTHREAD_VERSION.

hosts.5

Ross Boylan / Martin Schulze

various changes as per

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=304242>

proc.5

mtk

Minor changes to discussion of /proc/PID/stat signal fields.

Added 'rt_priority' and 'policy' to /proc/PID/stat.

capabilities.7

mtk

1,\$s/inherited/inheritable/g

regex.7

Vincent Fourmond / Joey (Martin) Schulze

Removed discussion of '['[:<:]]' and '['[:>:]]' since they do not seem to be in the glibc implementation.

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=295666>

tzselect.8

Joey (Martin) Schulze / Klaus Ethgen

The default zoneinfo directory is now /usr/share/zoneinfo.

(was: /usr/local/etc/zoneinfo)

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=267471>

===== Changes in man-pages-2.04 =====

Released: 2005-06-21

Thierry Excoffier <exco@bat710.univ-lyon1.fr>
Thomas Hood <jdthood@yahoo.co.uk>
Vincent Lefevre <vincent@vinc17.org>
Walter Harms <walter.harms@informatik.uni-oldenburg.de>

Apologies if I missed anyone!

Global changes

Various pages

mtk

For consistency across pages:

1,\$s/nonzero/non-zero/g

Typographical or grammatical errors have been corrected in several places.

New pages

pthread.7

mtk

An overview of the Linux implementations of POSIX threads.

Changes to individual pages

_exit.2

mtk

Various minor changes.

epoll_ctl.2

Mike Furr

BUGS: In kernels < 2.6.9, EPOLL_CTL_DEL required a non-NULL 'event', even though this argument is ignored.

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=306517>

flock.2

mtk / Kevin Ryde

Clarified semantics of relationship between flock() locks and open file entries and file descriptors.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=291121>

getitimer.2

Olivier Croquette, Thierry Excoffier

Noted the existence of the short sleep bug (up to 1 jiffy).

getrlimit.2

mtk

RLIMIT_RSS only has affect "in 2.4.x", not "in 2.4 and later".

getrusage.2

Geoff Clare

Since Linux 2.6, the ru_nivcsw and ru_nivcsw fields are used.

nice.2

mtk / Guido Trotter

Rewrote description of return value.

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=296183>

open.2

Walter Harms

O_DIRECT needs _GNU_SOURCE.

mtk

O_ASYNC works for pipes and FIFOs in Linux 2.6.

Various minor fixes.

atexit.3

mtk

Various minor changes.

exit.3

mtk

Various minor changes.

getopt.3

mtk / Philipp Spitzer

Fix description of return value.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=308359>

hsearch.3

mtk

Changed (char *) to (void *) in example.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=313607>

log1p.3

Justin Pryzby

Make log(3) SEE ALSO log1p(3),

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=309578>

makecontext.3

Tanaka Akira

Fix description of RETURN VALUE for makecontext(),
as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=311800>

on_exit.3

mtk

Various minor changes.

rand.3

kabloom

Small fix to a code example,
as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=194842>

realpath.3

mtk / Thomas Hood

When specifying resolved_path as NULL, realpath()
will (still) only allocate up to PATH_MAX bytes.
Plus other minor changes.
See also <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=239424>

rcmd.3

Dave Love

The required header file for these functions on Linux is <netdb.h>,
as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=311680>

scanf.3

Olivier Guilyardi

Arg for %p is a pointer to _a pointer to_ void,
as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=263109>

stdin.3

Vincent Lefevre

freopen() can change the descriptors associated with
stdin/stdout/stderr, as per
<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=295859>

strerror.3

Baurjan Ismagulov

strerror_r(3) requires #define _XOPEN_SOURCE 600,
as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=290880>

sysconf.3

Peter Cordes / mtk

Fix typo: "_SC_2_DEV" should be "_SC_2_C_DEV".

proc.5

mtk

Added pointers under /proc/sys/net to tcp.7 and ip.7.

ip.7

mtk

Various wording and formatting fixes.

Reordered /proc/sys/net/ipv4/ip_* file descriptions alphabetically.

tcp.7

Dieter Brueggemann / mtk

Fixes to the discussion of SIOCATMARK and tcp_stdurg.

mtk

Various wording and formatting fixes.

Incorporated some new /proc/sys/net/ipv4/tcp_* file descriptions from the 2.6.12 source file Documentation/networking/ip-sysctl.txt.

==== Changes in man-pages-2.05 =====

Released: 2005-06-27

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

A Costa <agcosta@gis.net>

Andries Brouwer <Andries.Brouwer@cwi.nl>

Bas Zoetekouw <bas@debian.org>

Dan Jacobson <jidanni@jidanni.org>

Delian Krustev <krustev@krustev.net>

Dora Anna Volgyesi <volgyesi@elte.hu>

Martin (Joey) Schulze <joe@infodrom.org>

Ove Kaaven <ovek@arcticnet.no>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several places. (Special thanks to A Costa.)

Changes to individual pages

`_exit.2`

mtk / aeb

Reversed 2.04 introduction of the term "process termination function".

`close.2`

mtk

Clarified what type of lock `close()` affects.
Minor formatting changes.

`dup.2`

mtk

Consistent use of terms "open file description", "file status flags", and "file descriptor flags".
Removed mention of lock sharing -- it was not accurate.
Minor formatting fixes.

`fcntl.2`

mtk

Consistent use of terms "open file description", "file status flags", and "file descriptor flags".
Some rewriting of discussion of file descriptor flags
Under `F_DUPFD`, replaced some text duplicated in `dup.2` with a cross ref to `dup.2`
Minor wording and formatting fixes.

`fpclassify.3`

mtk / Martin (Joey) Schulze / Bas Zoetekouw

The return value of `isinf()` changed in glibc 2.02 to differentiate positive and negative infinity.
See: <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=285765>

`getgid.2`

`getuid.2`

Delian Krustev

Remove confusing text describing real and effective IDs.
As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=285852>

`getitimer.2`

mtk

The short sleep bug (up to 1 jiffy) that was newly noted in `man-pages-2.04` has just been fixed in 2.6.12.

`getpriority.2`

mtk

Changed range documented in main text from `-20..20` to `-20..19`.
Noted that the range is `-20..20` on some systems.

open.2

mtk / aeb

Clarification of term "open file description" along with explanation of what information it maintains.

Other wording improvements.

Various minor wording changes.

atexit.3

mtk / aeb

Reversed 2.04 introduction of the term "process termination function".

mtk

Noted use of atexit() for establishing function to be invoked on shared library unload.

Noted that atexit()-registered functions are not invoked on abnormal termination.

Formatting fixes.

exit.3

mtk / aeb

Reversed 2.04 introduction of the term "process termination function".

mtk

Minor rewording and formatting changes.

getloadavg.3

mtk

Added #define _BSD_SOURCE to prototype.

log.2.3

Martin (Joey) Schulze

Add ERANGE error.

readdir.3

mtk

Added definition of Linux dirent structure.

Some formatting cleanups.

strtod.3

Dora Anna Volgyesi / mtk

strtold() and strtod() need _ISOC99_SOURCE or _XOPEN_SOURCE=600

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=246668>

tdestroy.3

mtk

New link to tsearch.3.

tsearch.3

mtk

Added tdestroy to .TH line.

mem.4

mtk

Change "chown root:mem /dev/mem" to "chown root:kmem /dev/mem".

null.4

mtk

Change "chown root:mem /dev/null /dev/zero" to

"chown root:root /dev/null /dev/zero".

vcs.4

Dan Jacobson / Martin (Joey) Schulze

Replaced "selection(1)" by "gpm(8)" under SEE ALSO

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=253515>

signal.7

Ove Kaaven

SA_SIGACTION should be SA_SIGINFO

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=305369>

urn.7

mtk

New link to uri.7

==== Changes in man-pages-2.06 =====

Released: 2005-07-15

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>

Andries Brouwer <Andries.Brouwer@cwi.nl>

Bhavesh P Davda <bhavesh@avaya.com>

Clau Weber <claus@jambit.com>

Dov Murik <dov@dv-networks.com>

David Lloyd <dlloyd@microbits.com.au>

Frederik Deweerdt <frederik.deweerdt@gmail.com>

Justin Pryzby <justinpryzby@users.sourceforge.net>

Lars Wirzenius <liw@iki.fi>

Martin Pool <mbp@sourcefrog.net>

Mike Frysinger <vapier@gentoo.org>

Petter Reinholdtsen <pere@hungry.com>
Steven Murdoch <Steven.Murdoch@cl.cam.ac.uk>
Walter Harms <walter.harms@informatik.uni-oldenburg.de>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several places.

Many uses of hyphens and dashes were corrected.

New pages

canonicalize_file_name.3

Walter Harms / mtk

Removed Pages

sstk.2

mtk

AFAIK, this system call has never actually done anything (other than be a stub) on any Unix.

Changes to individual pages

accept.2

mtk

Various wording and formatting fixes.

bind.2

mtk

Minor formatting changes

clone.2

mtk

Various minor wording improvements; some formatting fixes

connect.2

mtk

Various wording and formatting fixes.

epoll_create.2

Bhavesh P Davda

s/positive/non-negative/ [for file descriptor]

getrlimit.2

mtk

Documented RLIMIT_MSGQUEUE limit.

RLIMIT_RSS ceased to have any effect in 2.4 in kernel 2.4.30.

(It already didn't have any effect in 2.2.x and 2.6.x.)

s/MADVISE_WILLNEED/MADV_WILLNEED/

listen.2

mtk

Removed historic comment on BSD backlog ceiling.

Minor wording and formatting changes.

semop.2

mtk

Added BUG: in some circumstances, a process that is waiting for a semaphore to become zero is not woken up when the value does actually reach zero.

<http://marc.theaimsgroup.com/?l=linux-kernel&m=110260821123863&w=2>

<http://marc.theaimsgroup.com/?l=linux-kernel&m=110261701025794&w=2>

socket.2

mtk

Various minor wording improvements

umask.2

mtk

Added mkdir(2) to discussion, made term "file mode creation mask" clearer.

Various, mostly small, wording changes

errno.3

Martin Pool

Change description for ESTALE

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=237344>

fgetgrent.3

getgrent.3

getgrent_r.3

David Lloyd

Added SEE ALSO putgrent(3)

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=211336>

getgrent.3

getgrnam.3

getpwent.3

getpwnam.3

Lars Wirzenius / mtk

Replace mention of /etc/{passwd,group} by references to "passwd/group database", and LDAP and NIS.

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=316117>

mtk

Miscellaneous wording improvements

Consistent DESCRIPTION and ERRORS wording across these pages.

getnameinfo.3

mtk

Relocate misplaced text describing gai_strerror().

getnetent.3

Petter Reinholdtsen

s/endservent/endnetent/

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=316517>

getspnam.3

Lars Wirzenius / mtk

Replace mention of /etc/shadow by references to "shadow password database", and LDAP and NIS.

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=316117>

mtk, Claus Weber

Miscellaneous wording improvements

Consistent DESCRIPTION wording vis-a-vis getpwnam.3 etc.

hsearch.3

Frederik Deweerdt

Fix hsearch_r() prototype

scanf.3

Justin Pryzby / mtk

Fix description of RETURN VALUE

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=317037>

mtk

various parts substantially rewritten; added description of %n\$ form; various text incorporated from the GNU C library documentation ((C) The Free Software Foundation).

shm_open.3

mtk

Modified details of how user and group ownership of a new object are set.

Various minor wording and formatting cleanups.

elf.5

Mike Frysinger

tweaked the short description to include definition of 'ELF'
add ELFOSABI_NONE to the ELFOSABI_list
tweak/add more machines to EM_list for ehdr->e_machine
fix indenting to be consistent
tweak the display of the ELF_ST_* macros
document the Elf_Dyn structure

proc.5

mtk

Updated discussion of /proc/stat.
Added text on the /proc/sys/fs/mqueue/* files.

ip.7

Steven Murdoch

Change protocol in UDP prototype.
As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=182635>

tcp.7

Dov Murik

The first sentence under NOTES about SO_KEEPALIVE and SIGPIPE
makes no grammatical sense (and possibly also no technical sense).
It has been removed.

==== Changes in man-pages-2.07 =====

Released: 2005-07-19

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>

Mike Frysinger <vapier@gentoo.org>

Apologies if I missed anyone!

Global changes

Various pages

mtk

The terms "set-user-ID" and "set-group-ID" are now used
consistently (no abbreviations) across all manual pages.

Various pages

mtk

Consistent use of "saved set-user-ID" and "saved set-group-ID"
(no more "saved user ID", "saved effective UID",
saved group ID", etc.)

Various pages

mtk

Global fixes in textual descriptions:

uid --> UID

gid --> GID

pid --> PID

id --> ID

Various pages

mtk

Consistent use of st_atime, st_ctime, st_mtime, with
explanatory text, instead of atime/ctime/mtime.

Various pages

mtk

Classical BSD versions are now always named x.yBSD (formerly
there was a mix of x.yBSD and BSD x.y).

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages

setresuid.2

mtk

Some rewording.

stat.2

Mike Frysinger

Improve description of st_dev and st_rdev.

mtk

Various wording and formatting improvements.

truncate.2

mtk

Some formatting fixes

Global changes

Various pages

mtk

RFC references are now always written as "RFC\ nnn"
(not "RFC nnn" or "RFCnnn").

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

du.1

Mike Frysinger

To get an effect like "-h", BLOCKSIZE must start with "human", not "HUMAN".

time.1

Mike Frysinger

s/standard output/standard error/

clone.2

Paul Brook / mtk

Fix small error in description of CLONE_PARENT_SETTID

connect.2

Heikki Orsila

Add EINTR error

See <http://lkml.org/lkml/2005/7/12/254>

getpriority.2

mtk

Expanded discussion of relationship between user and kernel representations of the nice value.

Added discussion of RLIMIT_NICE and a cross reference to getrlimit.2 under the description of the EACCES error.

Noted 2.6.12 change in credentials checking for setpriority().

getrlimit.2

mtk

Added description of RLIMIT_RTPRIO

Added description of RLIMIT_NICE

mmap.2

mtk

Noted bug in MAP_POPULATE for kernels before 2.6.7.

mremap.2

mtk

Added _GNU_SOURCE to prototype.

Rewrote description of MREMAP_MAYMOVE.

Rewrote description of EAGAIN error.

Added discussion of resizing of memory locks.

Added entries to SEE ALSO.

Some formatting fixes.

msgctl.2

mtk

Added IPC_INFO, MSG_INFO, MSG_STAT descriptions.

nanosleep.2

Baurzhan Ismagulov

Add to prototype: define _POSIX_C_SOURCE 199309

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=314435>

nice.2

mtk

Added sentence noting that range of the nice value is described in `getpriority.2`.

Added cross-reference to `setrlimit(2)` for discussion on `RLIMIT_NICE`.

outb.2

David N. Welton / Justin Pryzby / mtk

Clarified the order of value and port arguments;

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=263756>

pause.2

mtk

Added SEE ALSO for `sigsuspend.2`

Some formatting fixes.

poll.2

Tommy Pettersson

`nfds` should be prototyped as `nfds_t`

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=322934>

mtk

Some wording and formatting improvements.

prctl.2

mtk

Since kernel 2.6.13 `PR_SET_DUMPABLE` can also have the value 2.

rand.3

Hrvoje Niksic / mtk

Remove misleading text describing FreeBSD's `sranddev()` function.

As per debian bug 328629

readv.2

mtk / Walter harms

Added LINUX NOTES on trickery performed by glibc when vector size exceeds `IOV_MAX`.

Formatting clean-ups.

remap_file_pages.2

mtk

Added text to note that start and size are both rounded downward.

sched_setparam.2

mtk

Modified discussion of privileges; added pointer to sched_setscheduler.2 for a discussion of privileges and resource limits.

sched_setscheduler.2

mtk

Modified discussion of privileges; added discussion of RLIMIT_RTPRIO.

semctl.2

mtk

Added IPC_INFO, SEM_INFO, SEM_STAT descriptions.

shmctl.2

mtk

Added IPC_INFO, SHM_INFO, SHM_STAT descriptions.

sigaction.2

mtk

Split sigpending(), sigprocmask(), and sigsuspend() out into separate new pages.

Other minor changes

mtk

NOTES: described SA_NODEFER / sa_mask bug which was present in all kernels up to and including 2.6.13.

See <http://marc.theaimsgroup.com/?l=linux-kernel&m=112360948603171&w=2> and <http://marc.theaimsgroup.com/?l=linux-kernel&m=112362164911432&w=2>

List: linux-kernel

Subject: Signal handling possibly wrong

From: Bodo Stroesser

Date: 2005-08-09 17:44:06

signal.2

mtk

Updated SEE ALSO to reflect splitting of sigaction.2 into sigaction.2, sigsuspend.2, sigpending.2, sigprocmask.2

sigpending.2

mtk

New page created by splitting out from sigaction.2

Changed CONFORMING TO.

sigprocmask.2

mtk

New page created by splitting out from sigaction.2

Added text on effect of NULL for 'set' argument.

Added text noting effect of ignoring SIGBUS, SIGFPE, SIGILL,
and SIGSEGV.

Noted that sigprocmask() can't be used in multithreaded process.

Fixed EINVAL error diagnostic.

Changed CONFORMING TO.

sigsuspend.2

mtk

New page created by splitting out from sigaction.2

Added NOTES on usage.

Added new text to DESCRIPTION.

Changed CONFORMING TO.

stat.2

Mike Frysinger

Improve st_blocks description.

carg.3

Ramiro Aceves / aeb

Change:

One has $\text{carg}(z) = \text{atan}(\text{creal}(z) / \text{cimag}(z))$

to:

One has $\text{tan}(\text{carg}(z)) = \text{cimag}(z) / \text{creal}(z)$

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=326720>

cmmsg.3

mtk

s/SOL_TCP/IPPROTO_TCP/ (POSIX standard name)

dlopen.3

Alain Portal

s/-nostartupfiles/-nostartfiles/

getaddrinfo.3

mtk

Nowadays (since 2.3.4) glibc only sets the first ai_canonname field if AI_CANONNAME was specified (the current behavior is all that SUSv3 requires).

1,\$s/PF_/AF_/g

Added descriptions of AI_ALL, AI_ADDRCONFIG, AI_V4MAPPED,
and AI_NUMERICSERV.

Some wording and formatting fixes.

getpwnam.3

Bernhard R. Link / mtk

Add NOTES text describing relationship of pw_dir and HOME and
pointing out that applications should preferentially inspect HOME.

inet.3

Mike Frysinger

Mention "little endian" and "big endian".
Added note about octal and hex interpretation of
numbers-and-dots notation.

rpc.3

mtk / Ludovic Courtes

Commented out references to rpc_secure(3) -- we don't currently
have such a page in the man-pages set.
In response to <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=325115>

setenv.3

mtk

glibc 2.3.4 fixed the "name contains '='" bug.

strlen.3

Mike Frysinger

Added "#define _GNU_SOURCE" to prototype.

initrd.4

Norbert Buchmuller / mtk

Added text noting that the use of real-root-dev for changing
the root device is obsolete, in favor of pivot root.
(However, the page still needs to be rewritten to actually
describe the pivot_root method...)
As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=323621>

proc.5

mtk

Improve text describing /proc/sys/fs/mqueue/* files.

Describe /proc/sys/fs/suid_dumpable (new in 2.6.13).

Added placeholder mention of /proc/zoneinfo (new in 2.6.13).
More needs to be said about this file.

Repaired earlier cut and paste mistake which resulted

in part of the text of this page being duplicated.

utmp.5

Mike Frysinger

Added text on biarch details for ut_session and ut_tv.

capabilities.7

mtk

Added CAP_AUDIT_CONTROL and CAP_AUDIT_WRITE.

ip.7

mtk / Andrew Pimlott

Add a couple of words to make it clear that port is a 16-bit number.
Reformat long source lines (no text changed).

s/SOL_IP/IPPROTO_IP/ (POSIX standard name)

Hasso Tepper

Fix discussion of IPC_RECVTTL / IP_TTL.

signal.7

mtk

Updated SEE ALSO to reflect splitting of sigaction.2 into
sigaction.2, sigsuspend.2, sigpending.2, sigprocmask.2.

socket.7

mtk

Clarified details of use of SO_PEERCRED.

tcp.7

mtk

s/SOL_TCP/IPPROTO_TCP/ (POSIX standard name)

s/SOL_IP/IPPROTO_IP/ (POSIX standard name)

udp.7

mtk

Added description of UDP_CORK socket option.

s/SOL_UDP/IPPROTO_UDP/ (POSIX standard name)

s/SOL_IP/IPPROTO_IP/ (POSIX standard name)

==== Changes in man-pages-2.09 =====

Released: 2005-10-13

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Justin Pryzby <pryzbyj@justinpryzby.com>

Peter Chubb <peterc@gelato.unsw.edu.au>

Samuel Thibault <samuel.thibault@ens-lyon.org>

Tomas Pospisek <tpo_deb@sourcepole.ch>

Trond Myklebust <trond.myklebust@fys.uio.no>

Apologies if I missed anyone!

Global changes

ptsname.3

getpt.3

unlockpt.3

openpty.3

posix_openpt.3

grantpt.3

pts.4

tty_ioctl.4

mtk

Added SEE ALSO for new pty.7 page.

Typographical or grammatical errors have been corrected in several places.

New pages

pty.7

mtk

Overview of Unix 98 and BSD pseudo-terminals.

Changes to individual pages

ldd.1

mtk

Remove "-V" option (fix from Fedora man-pages-2.07-7).

fcntl.2

Peter Chubb / Trond Myklebust / mtk

Since kernel 2.6.10, a read lease can only be placed on a

file descriptor that is opened read-only.

See the following LKML thread of Aug 2005

("fcntl(F_GETLEASE) semantics??"):

<http://marc.theaimsgroup.com/?l=linux-kernel&m=112371777712197&w=2>

<http://marc.theaimsgroup.com/?l=linux-kernel&m=112374818213000&w=2>

<http://marc.theaimsgroup.com/?l=linux-kernel&m=112376335305284&w=2>

<http://marc.theaimsgroup.com/?l=linux-kernel&m=112377294030092&w=2>

mprotect.2

mtk

Add new text to ENOMEM error.

mremap.2

mtk

Added description of MREMAP_FIXED and 'new_address' argument under NOTES.

Revised text of EINVAL error.

read.2

Samuel Thibault / mtk

read() can fail with EINVAL when using O_DIRECT

mtk

Added open(2) to SEE ALSO.

shmget.2

mtk

s/int/size_t/ for type of 'size' argument (fix from Fedora man-pages-2.07-7).

write.2

Samuel Thibault / mtk

write() can fail with EINVAL when using O_DIRECT

atanh.3

mtk

Fix: s/acosh/atanh/ (fix from Fedora man-pages-2.07-7).

fopen.3

mtk

Improved "a+" description (fix from Fedora man-pages-2.07-7).

getrcent.3

mtk

s/getrcent/setrcent/ (fix from Fedora man-pages-2.07-7).

stdio.3

mtk / Justin Pryzby

Removed references to fopen() and fwopen(), which are

BSDisms that don't appear in glibc.

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=331174>

strftime.3

mtk

Typo fix: %Ry ==> %Ey [SUSv3 mentions...] (fix from Fedora man-pages-2.07-7).

nsswitch.conf.5

mtk

s/network/networks/ (fix from Fedora man-pages-2.07-7).

proc.5

mtk

Added description of /proc/sys/vm/legacy_va_layout.

socket.7

mtk

Update description of SO_RCVLOWAT and SO_SNDBLOWAT.
(fix derived from Fedora man-pages-2.07-7).

===== Changes in man-pages-2.10 =====

Released: 2005-10-19

Global changes

The changes in this release consist **solely** of formatting fixes, with the aim bringing greater consistency to the manual pages according to the following rules:

- Function name references should **always** be followed by parentheses, "()" (possibly containing a manual page section number).
- The parentheses following a function name should **not** be formatted. Thus, for example, instead of:

.B name()

one should write:

.BR name ()

Much of the change was automated using two scripts:
add_parens_for_own_funcs.sh and unformat_parens.sh.

For the (possible) benefit of downstream manual page maintainers and translators, I have placed these scripts in a new subdirectory 'scripts'.

NOTE THE FOLLOWING POINTS WELL:

- These scripts provide a computer-assisted solution to the above two goals. However, they are not perfect, and their output should be scanned by a human. (To see what changes the two scripts *would* make, without making them, use the "-n" command line option.)
- The scripts do not fix all instances that violate the above rules: some manual fixes are required. Two further scripts are provided to help find remaining instances of function names without following "()": find_dots_no_parens.sh and find_slashes_no_parens.sh.

The following changes were made:

- add_parens_for_own_funcs.sh was applied to the pages in Sections 2 and 3.
- unformat_parens.sh was applied to pages in Sections 2, 3, 4, and 7 (the only sections where such changes were required).
- further changes (not so very many) were performed by hand. (found places to fix with the assistance of find_dots_no_parens.sh and find_slashes_no_parens.sh).

==== Changes in man-pages-2.11 =====

Released: 2005-10-24

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Alain PORTAL <aportal@univ-montp2.fr>

Apologies if I missed anyone!

Global changes

Various pages

mtk

Most instances of the constant "NULL" are not formatted (bolded) in

man pages, but a few are. For consistency, formatting on "NULL" has been removed where it occurred.

Many minor formatting fixes were made.

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

getrlimit.2

mtk

Added EINVAL error for rlim_cur > rlim_max when calling setrlimit().

path_resolution.2

mtk

Repaired discussion of capabilities and file system UID, which mistakenly had involved exec() in the discussion.

prctl.2

mtk

Removed text saying there is no library interface. There is nowadays.

mkfifo.3

mtk

Minor change to RETURN VALUE text.

sk98lin.4

Alain Portal

Formatting fixes.

capabilities.7

mtk

Minor changes.

==== Changes in man-pages-2.12 =====

Released: 2005-10-31

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Akihiro MOTOKI <amotoki@dd.iij4u.or.jp>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Brian M. Carlson <sandals@crustytoothpaste.ath.cx>
herbert <herbert@gondor.apana.org.au>
Martin Landers <martin.landlers@treibgut.net>
Michael Benedict <benedict@starbak.net>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

mlock.2

mtk

Reworded text around PAGESIZE, noting also that sysconf(_SC_PAGESIZE) can be used.

path_resolution.2

mtk / aeb

Removed words "as well" (added in 2.11) from the phrase "and it gets these last five capabilities if its fsuid is 0 as well" since there are (unusual) situations in which fsuid can be 0 while the effective UID is not.

Reworked (cut down) discussion of capabilities, moving part of it into capabilities.7

setresuid.2

mtk

Add text to note that setresuid() always modifies the file system UID, and setresgid() likewise always modifies the file system GID.

shmget.2

mtk

Added (brief) description of SHM_HUGETLB.

sigaltstack.2

mtk / Martin Landers

Noted that ss_sp is automatically aligned by the kernel.

byteorder.3

Brian M. Carlson / herbert

Change <netinet/in.h> to <arpa/inet.h> in prototype; add text explaining that some systems need the former header.

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=265244>

capabilities.7

mtk

Reworked part of the discussion of exec() and capabilities.

Added sub-section "Effect of User ID Changes on Capabilities".

Reworked discussion of CAP_SYS_ADMIN and file-max.

===== Changes in man-pages-2.13 =====

Released: 2005-11-03

This release consists entirely of formatting and typographical fixes.

Global changes

Typographical or grammatical errors have been corrected in several places.

Various pages

mtk

Function and page cross references that were italicized were made bold (which is how the majority of function and page cross references were already done).

Various pages

mtk

Instances of things like "NULL-terminated string" were changed to "null-terminated string".

Various pages

mtk

Pathnames, structures, arguments, and <header-files> that were bold were changed to italics.

Various pages

mtk

Instances of the constant "NULL" that were bold-faced were made unformatted (which is how most instances of "NULL" were already formatted.)

==== Changes in man-pages-2.14 =====

Released: 2005-11-17

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Angelo <ang310@katamail.com>

Avery Pennarun <apenwarr@nit.ca>

Justin Pryzby <justinpryzby@users.sourceforge.net>

Martin (Joey) Schulze <joe@infodrom.org>

Stefan Brüns <stefan.bruens@rwth-aachen.de>

Volker Reichelt <reichelt@igpm.rwth-aachen.de>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several places.

New pages

rexec.3

mtk / Justin Pryzby

This page is taken as is from the FreeBSD 5.4 distribution.

(Not checked against Linux reality, but likely things are the same.)

See also <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=336875>

Changes to individual pages

arch_prctl.2

mtk

Updated discussion about lack of prototype in glibc.

execve.2

mtk

Improved description of E2BIG error: it relates to the sum of the bytes in both environment and argument list.

fcntl.2

mtk

Clarified parts of the discussion of file leases, noting effect of `open(O_NONBLOCK)`, interruption by signal handler, or termination by signal in lease breaker. In response to <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=339037>

stat.2

mtk / Stefan Brüns

Added LINUX NOTES describing nanosecond timestamps.

frexp.3

Volker Reichelt / mtk

Fixed to point out that `frexp()` returns a number whose *absolute* value is ≥ 0.5 and < 1 . Amended the example program to demonstrate this.

open.2

mtk / Avery Pennarun

Add `EWOULDBLOCK` error for file leases. In response to <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=339037>

putenv.3

mtk

Although the glibc implementation returns -1 on error (and some other man pages (e.g., the BSDs) also document that value for error returns), SUSv3 merely says "non-zero" (and this is what manual pages on many implementations also say).

posix_memalign.3

mtk

Formerly, the page said that all systems declare `memalign()` in `<malloc.h>`. In fact, many declare it in `<stdlib.h>`.

strtok.3

mtk

Almost a complete rewrite after Angelo pointed out that the existing page was deficient.

sd.4

Martin Schulze

Remove SEE ALSO for nonexistent `scsi.4`.

proc.5

mtk

Updated discussion of `/proc/sys/kernel/pid_max`.

signal.7

mtk

Added pthreads.7 to SEE ALSO.

ld.so.8

mtk

Fix typo: s/LD_DEBUG_OUTPUT/LD_PROFILE_OUTPUT/

===== Changes in man-pages-2.15 =====

Released: 2005-11-30

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>

James Vega <jamessan@debian.org>

Malcolm Scott <mas90@io.malc.org.uk>

Senthil Kumar <senthilkumar_sen@hotpop.com>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several places.

New pages

sigvec.3 -- for details, see below.

sigset.3 -- for details, see below.

Changes to individual pages

kill.2

mtk

Added text describing the 2.6.[0-7] EPERM bug that occurred when sending signals to a process group.

sigaction.2

mtk

Noted that `si_signo` is unused on Linux.

sigpending.2

mtk

Added BUGS noting wrapper function problem that existed in glibc versions $\leq 2.2.1$.

sigpause.2

mtk

Moved to section 3; see also [sigpause.3](#) below.

sigsetops.3

mtk

Added a GLIBC NOTES section describing `sigisemtpyset()`, `sigandset()`, and `sigorset()`.

sigvec.2

sigblock.2

mtk

These pages have been deleted, and replaced by a new [sigvec.3](#) man page that more fully describes the BSD signal API.

siggetmask.2

sigmask.2

sigsetmask.2

mtk

These links to the now-deleted [sigblock.2](#) have been also been deleted. They are replaced by corresponding links in Section 3: [sigmask.3](#), [sigsetmask.3](#), [siggetmask.3](#).

sigvec.3

mtk

This new page provides a fuller description of the BSD signal API than was provided in the now-deleted [sigvec.2](#) and [sigblock.2](#).

sigblock.3

siggetmask.3

sigmask.3

sigsetmask.3

mtk

Created as links to [sigvec.3](#).

sigpause.3

mtk

Moved here from Section 2.

Some minor wording fixes; clarified System V origins of X/Open flavor of this function.

sigset.3

mtk

New page describing the System V signal API: sigset(), sighold(), sigelse(), sigignore().

strftime.3

James Vega

Add further text clarifying that %+ specifier is not supported in glibc2.

mtk

Added GLIBC NOTES section describing optional 'flag' and 'width' components of conversion specifiers.

Some wording changes to bring terminology closer to SUSv3.

Added an example program.

vm86old.2

mtk / aeb

Add as new link to vm86.2.

intro.7

mtk

Added a few words to reflect the fact that several of the section 7 pages provide overviews of various topics.

signal.7

mtk

Added some SEE ALSO entries.

socket.7

Senthil Kumar / mtk

Added text noting that select()/poll() do not respect SO_RCVLOWAT.

udp.7

Malcolm Scott

s/tcp_socket/udp_socket/ in example

Fixes <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=340927>

==== Changes in man-pages-2.16 =====

Released: 2005-12-02

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Alan Stern <stern@rowland.harvard.edu>

Andries Brouwer <Andries.Brouwer@cwi.nl>

Urs Thuermann <urs@isnogud.escape.de>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

HOWTOHELP

Urs Thuermann

Added instructions for finding maintainer in Debian package.

poll.2

mtk

Added NOTES about INFTIM constant provided on some other implementations.

shmop.2

Alan Stern

The -1 error return of shmat() should be cast "(void *)".

strftime.3

aeb

Remove junk text (actually intended as source code comment in page).

ip.7

Urs Thuermann

Fix a typo: s/SOCK_RAW/SOCK_PACKET/

packet.7

Urs Thuermann

Clarification: s%SOCK_PACKET%PF_INET/SOCK_PACKET%

==== Changes in man-pages-2.17 =====

Released: 2005-12-13

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Justin Pryzby <justinpryzby@users.sourceforge.net>

Michael Haardt <michael@moriam.de>

Urs Thuermann <urs@isnogud.escape.de>

Walter Harms <walter.harms@informatik.uni-oldenburg.de>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several places.

New pages

fmemopen.3

Walter Harms / mtk

New documentation for the glibc-specific fmemopen() and open_memstream(). Based on glibc info page.

pipe.7

mtk (with prompting and suggestions for improvements by Michael Haardt)

New page providing overview of pipes and FIFOs.

Changes to individual pages

HOWTOHELP

mtk

Added notes on how to write example programs for manual pages.

fork.2

mtk

Added pointers to examples of fork() in wait.2 and pipe.2.

pipe.2

mtk

Added an example program.

Added SEE ALSO for new pipe.7 page.

wait.2

mtk

Added example program demonstrating use of fork() and waitpid().

carg.3

Justin Pryzby

Delete line that should have been deleted when applying
2.08 fix for this page.

getaddrinfo.3

mtk

Rearranged EAI_* list alphabetically.

inet.3

mtk

Added GLIBC NOTES describing feature test macros required
to expose declaration of inet_aton().

open_memstream.3

mtk

New link to new fmemopen.3.

fifo.4

mtk

Added SEE ALSO for new pipe.7 page.

environ.5

mtk

Removed BROWSER, since it seems not in fact to be common.

socket.7

Urs Thuermann

Added documentation of SO_TIMESTAMP.

tcp.7

mtk

Noted 200 millisecond ceiling imposed on TCP_CORK.

udp.7

mtk

Rearranged options into something approximating alphabetical order.

==== Changes in man-pages-2.18 =====

Released: 2005-12-15

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Justin Pryzby <justinprzby@users.sf.net>
Karsten Sperling <karsten.sperling@stud.uni-karlsruhe.de>
Martin (Joey) Schulze <joe@infodrom.org>
Mike Frysinger <vapier@gentoo.org>
Stefan Puiu <stefanpuiu@yahoo.com>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

bind.2

mtk

Added mention of AF_INET6 address family.
Added discussion of sockaddr structure and an example in the Unix domain.

recv.2

mtk

Put 'flags' list in alphabetical order.

send.2

mtk

Added cross-reference from discussion of MSG_MORE to UDP_CORK in udp(7).

Put 'flags' list in alphabetical order.

err.3

mtk

Added CONFORMING TO section noting that these are non-standard BSDisms.

errno.3

Justin Pryzby

Added SEE ALSO for errno.3.

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=306867>

gethostbyname.3

Martin (Joey) Schulze / mtk

Added references to nsswitch.conf(5); remove cross references to resolv+(8).

See also <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=308397>

perror.3

Justin Pryzby

Added SEE ALSO for perror.3 .

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=306867>

resolver.3

mtk / Martin (Joey) Schulze

Remove cross references to resolv+(8); add cross references to resolv.conf(5).

See also <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=214892>

Added SEE ALSO entry for resolver(5);

see <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=251122>

strerror.3

mtk / Stefan Puiu

Rewrote and extended the discussion of the two flavors of strerror_r(), and added some additional information on strerror().

Justin Pryzby

Added SEE ALSO for strerror.3, as per

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=306867>

elf.5

Mike Frysinger

Fix three typos in identifier names.

operator.7

Karsten Sperling

The + operator should be in the list of unary operators.

raw.7

mtk

Small wording changes around discussion of SO_BSDCOMPAT.

Fixed a couple of wording errors elsewhere.

Reformatted some long lines.

socket.7

mtk, after a note by Stefan Puiu

Updated discussion of SO_BSDCOMPAT.

Reformatted some long lines.

Noted the Linux-specific feature whereby setsockopt() doubles the value given for SO_SNDBUF and SO_RCVBUF.

Noted kernel-imposed minimum values for SO_SNDBUF and SO_RCVBUF.

udp.7

mtk, after a note by Stefan Puiu

Updated discussion of SO_BSDCOMPAT.

unix.7

mtk

Added new (UN)SUPPORTED FEATURES section in which it is noted that Unix domain sockets do not support MSG_OOB or MSG_MORE.

Noted details of SO_SNDBUF and SO_RCVBUF support for Unix domain sockets.

==== Changes in man-pages-2.19 =====

Released: 2005-12-23

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>

Walter Harms <walter.harms@informatik.uni-oldenburg.de>

Stefan Puiu <stefanpuiu@yahoo.com>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

HOWTOHELP

mtk

Minor changes.

bind.2

Stefan Puiu / mtk

Remove text under EINVAL error: "This may change in the future: see linux/unix/sock.c for details." This behavior has been unchanged for a long time, and seems unlikely to change.

Add EADDRINUSE to errors.

send.2

aeb

Add cmsg(3) to SEE ALSO.

fopen.3

Walter Harms / mtk

Added description of 'x' mode character (exclusive open).

pipe.7

mtk / aeb

Some wording changes to description of pipes.

===== Changes in man-pages-2.20 =====

Released: 2006-01-03

Global changes

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

sigaltstack.2

mtk

Added some text to explain the usual scenario in which sigaltstack() is employed.

getloadavg.3

mtk

Noted that this function is available since glibc 2.2.

strcpy.3

mtk

s/nulls/null bytes/

capabilities.7

mtk

Noted that capability bounding set appeared with kernel 2.2.11.

arp.7

icmp.7

ip.7

ipv6.7

netdevice.7

packet.7

raw.7

rtnetlink.7

socket.7

tcp.7

unix.7

udp.7

mtk

The only changes to these pages have been for formatting:

- Structure definitions were changed to K&R style
- Some long source lines were broken to fit into ~70 character lines.

No changes were made to the content of these pages (yet...).

==== Changes in man-pages-2.21 =====

Released: 2006-01-16

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>

Falk Hueffner <falk@debian.org>

Mike Frysinger <vapier@gentoo.org>
Senthil Kumar <senthilkumar_sen@hotpop.com>
Stefan Puiu <stefanpuiuro@yahoo.com>

Apologies if I missed anyone!

Global changes

dd.1 cp.1
truncate.2 gethostname.2 lseek.2 listxattr.2 readlink.2
sysfs.2 stat.2 ustat.2 uname.2 getdomainname.2
argz_add.3 asprintf.3 confstr.3 bstring.3 bzero.3 dlopen.3 fwide.3
gethostbyname.3 getline.3 getlogin.3 getnameinfo.3 getpass.3 hsearch.3
perror.3 printf.3 readdir.3 scanf.3 stpcpy.3 strdup.3 strfmon.3
strftime.3 string.3 strptime.3 sysconf.3 termios.3 ttyname.3
dsp56k.4 tty_ioctl.4
elf.5 proc.5 termcap.5
charsets.7 unix.7

mtk

Various pages use inconsistent terms for 'null byte' (which is the C99/SUSv3 term for the '\0' character).

To rectify this the following changes were made in the above pages:

- Replace 'zero byte' with 'null byte'.
- Replace 'null character' with 'null byte'.
- Replace 'nulls' with 'null bytes'.
- Replace 'NUL-terminated' by 'null-terminated'.
- Replace 'NUL' by 'null byte'.
- Replace 'terminating NUL' by 'terminating null byte'.
- Replace 'final NUL' by 'terminating null byte'.
- Replace 'NUL character' by 'null byte'.

Various pages

mtk

Replace "SysV"/"SYSV" by "System V".

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

capget.2

mtk

Noted bug that could wrongly cause EPERM in unprivileged capset() with 'pid' field == getpid().

epoll_ctl.2

mtk

Noted that EPOLLONESHOT was added in 2.6.2.

gethostname.2

mtk

Added GLIBC NOTES describing operation of glibc's gethostname() wrapper function.

mmap.2

mtk / Mike Frysinger

Clarify relationship between mmap2(2) and mmap64(3).

mtk

A few other small rewordings.

mmap64.3

Mike Frysinger

New link to mmap.2.

open.2

mtk

Added BUG noting that O_ASYNC can't be enabled via open(): fcntl() must be used for this purpose.

recv.2

Stefan Puiu

Relocate misplaced discussion of MSG_DONTWAIT.

dlopen.3

mtk

Rewrote discussion of dlopen() 'flag' argument; added descriptions of RTLD_NOLOAD, RTLD_DELETE, and RTLD_DEEPBIND.

Noted use of atexit() to register a function that is automatically called when a library is unloaded.

fmemopen.3

mtk

Rewrote substantial parts of the page, and relicensed under GPL.

fseeko.3

Mike Frysinger

Add RETURN VALUE section.

getopt.3

mtk

Noted historical use of <stdio.h> to declare getopt().

qsort.3

mtk / Falk Hueffner

Clarify how strcmp() should be used as the 'compar' function by providing an example.

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=348072>

proc.5

mtk

Noted that /proc/mounts is pollable since kernel 2.6.15.

Documented /proc/PID/task.

Noted that the contents of /proc/PID/{cwd,exe,fd,root,task} are not available if the main thread has terminated.

Senthil Kumar

Add pointer to random(4) for description of files under /proc/sys/kernel/random.

udp.7

Stefan Puiu / mtk

Small rewording of discussion of SO_BSDCOMPAT (add cross-ref to socket(7)).

==== Changes in man-pages-2.22 =====

Released: 2006-02-02

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>

Andre Noll <maan@systemlinux.org>

Andries Brouwer <Andries.Brouwer@cw.nl>

Colin Tuckley <colin@tuckley.org>

Stefan Puiu <stefanpuiuro@yahoo.com>

Thomas Hood <jdthood@yahoo.co.uk>

Thorsten Kukuk <kukuk@suse.de>

Walter Harms <walter.harms@informatik.uni-oldenburg.de>

Global changes

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

mmap.2

aeb / mtk

Noted that portable applications should specify fd as -1 when using MAP_ANONYMOUS.

Some rewriting of description of MAP_ANONYMOUS.

rt_sigreturn.2

Thorsten Kukuk

New link to sigreturn.2.

rt_sigsuspend.2

mtk

New link to sigsuspend.2.

waitid.2

mtk

Noted that waitid() does not set infop->si_uid field on most other implementations.

getopt.3

Walter harms / mtk

Make clear that when calling getopt_long() and there are no short options, then 'optstring' should be "", not NULL.

openpty.3

Thomas Hood / mtk

In glibc 2.0.92, openpty() was modified to preferably open Unix 98 ptys instead of BSD ptys.

qsort.3

mtk

Small rewording under EXAMPLES.

strtol.3

strtoul.3

Stefan Puiu

s/string must begin/string may begin/

proc.5

mtk

Documented inotify files under /proc/sys/fs/inotify:
max_queued_events, max_user_instances, and max_user_watches.

==== Changes in man-pages-2.23 =====

Released: 2006-02-10

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andi Kleen <ak@muc.de>
Britton Leo Kerin <bkerin_rb@letterboxes.org>
Dan Jacobson <jidanni@jidanni.org>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Luc Van Oostenryck <lkml@looxix.net>
Kurt Wall <kwall@kurtwerks.com>
Martin (Joey) Schulze <joe@infodrom.org>
Matthias Andree <matthias.andree@gmx.de>
Robert Love <rlove@rlove.org>
Samuel Thibault <samuel.thibault@ens-lyon.org>
Urs Thuermann <urs@isnogud.escape.de>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

New pages

inotify_init.2
inotify_add_watch.2
inotify_rm_watch.2

Robert Love, with some additions by mtk.

New pages describing the inotify API.

mbind.2

get_mempolicy.2

set_mempolicy.2

Andi Kleen, with additional work by mtk

New pages describing the NUMA memory allocation policy API.

Drawn from the set at <ftp://ftp.suse.com/pub/people/ak/numa>.

rtc.4

Urs Thuermann, with additional work by mtk

New page describing the real-time clock driver.

inotify.7

mtk

Overview of the inotify API.

Changes to individual pages

clone.2

Andi Kleen

On x86, clone() should not be called through vsyscall,
but directly through "int \$0x80".

fcntl.2

mtk

Small wording changes.

Added cross-ref to inotify.7 under the description of dnotify.

kill.2

mtk / Britton Leo Kerin

Small wording change under NOTES to clarify

what happens when a process sends a signal to itself.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=350236>

mlock.2

mtk / Matthias Andree

Added BUGS txt on interaction between MCL_FUTURE and
RLIMIT_MEMLOCK.

See the following LKML thread:

<http://marc.theaimsgroup.com/?l=linux-kernel&m=113801392825023&w=2>

"Rationale for RLIMIT_MEMLOCK"

msgop.2

mtk / Samuel Thibault

Rewrote declaration of 'msgop' to be "void *" in response

to <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=350884>

Various other wording fixes.

open.2

mtk

Clarify distinction between "file creation flags" and "file status flags".

read.2

Justin Pryzby

Add SEE ALSO for pread(2).

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=351873>

sched_setaffinity.2

mtk

Major rewrite.

select.2

mtk

Added return types to prototypes for FD_SET(), FD_CLR(), FD_ZERO, and FD_ISSET().

Other minor wording changes.

read.2

mtk

Add SEE ALSO for pwrite(2).

(Analogous with read.2 change above.)

errno.3

Kurt Wall / mtk

Add Linux specific errors to this page.

localeconv.3

mtk

Added cross-ref to locale.7 for 'struct lconv' defn.

Other minor wording changes.

Martin (Joey) Schulze

Added SEE ALSO refs for nl_langinfo.3

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=351831>

scanf.3

mtk / Justin Pryzby

Minor formatting & wording fixes.

setlocale.3

Martin (Joey) Schulze

Added SEE ALSO refs for nl_langinfo.3

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=351831>

proc.5

mtk

Migrated description of inotify files to the new inotify.7 page.

ascii.7

Dan Jacobson / mtk

Add text describing characters 001 to 037.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=342173>

locale.7

mtk

Minor wording and formatting changes.

===== Changes in man-pages-2.24 =====

Released: 2006-02-17

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Joerg Habenicht <habenich@planetserver.com>

Luc Van Oostenryck <lkml@looxix.net>

Mike Frysinger <vapier@gentoo.org>

Samuel Thibault <samuel.thibault@ens-lyon.org>

Apologies if I missed anyone!

New pages

get_kernel_syms.2

create_module.2

delete_module.2

init_module.2

query_module.2

FSF / mtk (with assistance of Luc Van Oostenryck)

man-pages finally gets pages for these system calls, several of which are obsolete in Linux 2.6.

Took the old GPLed pages dated 1996 and made a number of clean-ups and minor additions.

Global changes

various pages

mtk

Change "file name" to "filename"

Change "path name" to "pathname"

stpncpy.3

strstr.3

strcmp.3

toupper.3

strlen.3

stpcpy.3

puts.3

strdup.3

strtok.3

isalpha.3

strspn.3

gets.3

strpbrk.3

mtk after a suggestion from Samuel Thibault

Added SEE ALSO pointers to wide character equivalent functions

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=351996>

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

clone.2

mtk

Remove duplicate CLONE_STOPPED text.

Commented out crufty text describing EINVAL error for the now obsolete CLONE_DETACHED flag.

Under CLONE_SIGHAND, noted that 'flags' must also include CLONE_VM if CLONE_SIGHAND is specified.

fcntl.2

mtk

Under ERRORS: Separate out EAGAIN error for locking mmaped files.

inotify_add_watch.2

mtk

Minor wording fix.

msgop.2

mtk

Documented the EAGAIN error for msgrcv().

fnmatch.3

Mike Frysinger / mtk

Expand explanation of FNM_PATHNAME.

lockf.3

Joerg Habenicht / mtk

Fix up discussion of EAGAIN/EACCESS errors.

===== Changes in man-pages-2.25 =====

Released: 2006-03-02

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

James Peach <jpeach@samba.org>

Krzysztof Benedyczak <golbi@mat.uni.torun.pl>

Marten von Gagern <Martin.vGagern@gmx.net>

Michael Haardt <michael@morla.de>

Michael Wronski <michal.wronski@gmail.com>

Apologies if I missed anyone!

New pages

mq_close.3

mq_getattr.3

mq_notify.3

mq_open.3

mq_receive.3

mq_send.3

mq_unlink.3

mtk

New pages describing POSIX message queue API.

posix_fallocate.3

mtk, after a suggestion by James Peach

New page describing posix_fallocate().

mq_overview.7

mtk

New page giving overview of the POSIX message queue API.

Changes to individual pages

lseek.2

Michael Haardt

Add a case to the EINVAL error text.

mtk

Various minor wording fixes

Added SEE ALSO referring to new posix_fallocate.3.

posix_fadvise.2

mtk

Added "#define _XOPEN_SOURCE 600" to prototype.

Added SEE ALSO referring to new posix_fallocate.3.

proc.5

mtk

Migrated information on POSIX message queues to new mqueue.7 page.

inotify.7

Marten von Gagern

Fix thinko: s/assuming a non-blocking/assuming a blocking/

===== Changes in man-pages-2.26 =====

Released: 2006-03-21

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>

Andi Kleen <ak@muc.de>

Andries Brouwer <Andries.Brouwer@cwil.nl>

Christoph Lameter <clameter@engr.sgi.com>

Hasso Tepper <hasso@estpak.ee>

Justin Pryzby <justinpryzby@users.sourceforge.net>

Martin (Joey) Schulze <joe@infodrom.org>

Nicolas François <nicolas.francois@centraliens.net>

Paul Brook <paul@nowt.org>

Siward de Groot <siward@wanadoo.nl>

Steve Beattie <sbeattie@suse.de>

Walter Harms <walter.harms@informatik.uni-oldenburg.de>

Apologies if I missed anyone!

Global changes

clone.2

getdents.2

gettid.2

llseek.2

mmap.2.2

modify_ldt.2

pivot_root.2

quotactl.2

readdir.2

sysctl.2

syslog.2

tkill.2

mtk, aeb, Steve Beattie

Added comment in SYNOPSIS to note that syscall(2) may be preferable over _syscallN (see intro(2)).

Various minor formatting changes were done on a range of pages in Section 7. (No content was changed.)

New pages

openat.2

mtk

New page describing openat(2), added in kernel 2.6.16, and some notes on rationale for the at*(2) system calls.

mbind.2

Andi Kleen, Christoph Lameter, mtk

Added MPOL_MF_MOVE and MPOL_MF_MOVE_ALL descriptions, from numactl-0.9.2 man page.

Plus a few other smaller fixes.

fexecve.3

mtk

New page describing fexecve(3).

futimes.3

mtk

New page describing futimes(3).

Changes to individual pages

execve.2

mtk

Added SEE ALSO pointing to new fexecve.3.

intro.2

mtk, aeb, Steve Beattie

Added some notes on syscall(2) versus _syscall.

msgctl.2

msgget.2

msgop.2

mtk

Added SEE ALSO pointing to mq_overview.7.

open.2

mtk

Added SEE ALSO pointing to new openat.2.

Split out part of the RETURN VALUE text into separate NOTES section.

Modified wording referring to raw(8) to indicate that this interface is deprecated.

poll.2

mtk

Added discussion of ppoll(2), which is new in 2.6.16.

ppoll.2

mtk

New link to poll.2.

recvmsg.2

sendmsg.2

mtk / Paul Brook

Added text to note that although POSIX says msg_controllen should be socklen_t, glibc actually uses size_t.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=356502> and the associated glibc bug report.

http://sourceware.org/bugzilla/show_bug.cgi?id=2448

mtk

Various formatting fixes.

select.2

mtk

Updated to reflect the fact that pselect() has been implemented in the kernel in 2.6.16; various other minor wording changes.

pselect() prototype needs "#define _XOPEN_SOURCE 600".

tempnam.3

Justin Pryzby

Clean up description of EEXIST error.

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=357893>

unlink.2

mtk

Added a little extra text to clarify EISDIR vs EPERM.

utime.2

mtk

Added new SEE ALSO entry pointing to new futimes.3 page.

exec.3

mtk

Added SEE ALSO pointing to new fexecve.3.

shm_unlink.3

mtk

New link to shm_open.3 (should have been made when page was originally written).

swab.3

Walter Harms

Add needed "#define _XOPEN_SOURCE".

undocumented.3

mtk

Updated to remove a few function names that are now documented.

capabilities.7

mtk

Various changes to bring this page closer to current kernel versions.

inotify.7

mtk

Noted that glibc 2.4 is required to get glibc support for inotify.

mq_overview.7

mtk

Some rewording and added a few words about System V

message queues.

netlink.7

Hasso Tepper

Substantial updates to various parts of this page.

mtk, Alain Portal

Minor fixes

pthread.7

mtk

Updated to reflect that the NPTL limitation that only the main thread could call setsid() and setpgid() was removed in 2.6.16.

raw.7

Hasso Tepper

Removed text implying that only in kernel 2.2 does IP_HDRINCL prevent datagrams from being fragmented.

socket.7

mtk

Documented SO_SNDBUFFORCE and SO_RCVBUFFORCE socket options, new in 2.6.14.

Placed socket options in alphabetical order.

==== Changes in man-pages-2.27 =====

Released: 2006-03-24

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>

Charles P. Wright <cwright@cs.sunysb.edu>

Christoph Lameter <clameter@sgi.com>

Chuck Ebbert <76306.1226@compuserve.com>

Daniel Jacobowitz <dan@debian.org>

Ingo Molnar <mingo@elet.hu>

Heiko Carstens <heiko.carstens@de.ibm.com>

Janak Desai <janak@us.ibm.com>

Paolo (Blaisorblade) Giarrusso <blaisorblade@yahoo.it>

Stefan Puiu <stefanpuiuro@yahoo.com>

Apologies if I missed anyone!

Global changes

man7/*

mtk

Various minor formatting changes were done on a range of pages in Section 7. (No content was changed.)

New pages

unshare.2

mtk, with reference to documentation by Janak Desai

New page describing unshare(2), added in kernel 2.6.16.

Changes to individual pages

clone.2

fork.2

vfork.2

mtk

Added SEE ALSO pointing to new unshare.2.

mbind.2

Christoph Lameter

MPOL_MF_MOVE_ALL requires CAP_SYS_NICE not CAP_SYS_RESOURCE.

mremap.2

mtk

Clarified the description of MREMAP_FIXED and restructured the text to reflect the fact that this flag is exposed by glibc since version 2.4.

ptrace.2

Chuck Ebbert, with assistance from Daniel Jacobowitz, Paolo (Blaisorblade) Giarrusso, and Charles P. Wright; after a suggestion from Heiko Carstens.

Document the following ptrace requests:

PTRACE_SETOPTIONS (2.4.6)

plus associated flags:

PTRACE_O_TRACESYSGOOD (2.4.6)

PTRACE_O_TRACEFORK (2.5.46)

PTRACE_O_TRACEVFORK (2.5.46)

PTRACE_O_TRACECLONE (2.5.46)
PTRACE_O_TRACEEXEC (2.5.46)
PTRACE_O_TRACEVFORKDONE (2.5.60)
PTRACE_O_TRACEEXIT (2.5.60)
PTRACE_SETSIGINFO (2.3.99-pre6)
PTRACE_GETSIGINFO (2.3.99-pre6)
PTRACE_GETEVENTMSG (2.5.46)
PTRACE_SYSEMU (since Linux 2.6.14)
PTRACE_SYSEMU_SINGLESTEP (since Linux 2.6.14)

sched_get_priority_max.2

sched_setscheduler.2

sched_setparam.2

mtk, Ingo Molnar

Modified to document SCHED_BATCH policy, new in kernel 2.6.16.

Text describing SCHED_BATCH was added to sched_setscheduler.2, and was drawn in part from Ingo Molnar's description in the mail message containing the patch that implemented this policy.

Various other minor rewordings and formatting fixes.

proc.5

mtk, using text from Documentation/filesystems/proc.txt

Document /proc/sys/vm/drop_caches, new in kernel 2.6.16.

mtk, using information from ChangeLog-2.6.14.

Document /proc/PID/smmaps, new in kernel 2.6.14.

capabilities.7

mtk

Noted affect of CAP_SYS_NICE for mbind(MPOL_MF_MOVE_ALL).

pthreads.7

mtk

Kernel 2.6.16 eliminated buggy behavior with respect to the alternate signal stack.

==== Changes in man-pages-2.28 =====

Released: 2006-03-31

sem_post.3

sem_getvalue.3

sem_close.3

sem_open.3

sem_destroy.3

sem_wait.3

sem_unlink.3

sem_init.3

sem_overview.7

mtk

New pages describing the POSIX semaphores API.

These pages supersede and provide a superset of the information in the glibc (3thr) "semaphores(3)" manual page.

Changes to individual pages

ppoll.2

Aleksandr Blokhin

Fix broken link.

ptrace.2

mtk

Wrapped long lines (no content changes).

semctl.2

semget.2

semop.2

mtk

Add SEE ALSO pointing to the new sem_overview.7 page.

elf.5

Greg Johnson

Removed SEE ALSO reference to nonexistent core(5).

==== Changes in man-pages-2.29 =====

Released: 2006-04-06

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Michael Haardt <michael@morja.de>
Roberto Jimenoca <robertojimenoca@terra.es>
Stefan Puiu <stefanpuiuro@yahoo.com>

Apologies if I missed anyone!

Global changes

getrlimit.2
prctl.2
sigaction.2
elf.5
signal.7
mtk
Added SEE ALSO entry referring to new core.5 page.

New pages

mkdirat.2
mtk
New page describing mkdirat(2), new in 2.6.16.

mknodat.2
mtk
New page describing mknodat(2), new in 2.6.16.

core.5
mtk
New page describing core dump files.

mkfifoat.3
mtk
New page describing mkfifoat(3).

Changes to individual pages

accept.2

getpeername.2

getsockname.2

Michael Haardt / mtk

Document EINVAL error for 'len' argument < 0.

fcntl.2

mtk

Expanded discussion of mandatory locking.

getrlimit.2

mtk

Added BUGS text on 2.6.x handling of RLIMIT_CPU limit
of zero seconds. See

<http://marc.theaimsgroup.com/?l=linux-kernel&m=112256338703880&w=2>

mkdir.2

mtk

Added SEE ALSO entry referring to new mkdirat.2.

mknod.2

mtk

Added SEE ALSO entry referring to new mkodat.2.

open.2

mtk / Roberto Jimenoca

Clarified discussion of file types affected by O_NONBLOCK.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=360243>

openat.2

mtk

Rewrote NOTES describing rationale for openat().

Various other minor changes.

recv.2

Stefan Puiu

Removed a misleading cross-ref to socket.2.

shmop.2

mtk

Since 2.6.17-rc1, shmdt() gives the error EINVAL in a further
circumstance: if shmaddr is not aligned on a page boundary.

unshare.2

mtk

Remove text saying that specifying invalid flags "is likely to cause compatibility problems" since the kernel now (2.6.17-rc1) contains an explicit check for invalid bits with a consequent EINVAL error.

mkfifo.3

mtk

Added SEE ALSO entry referring to new mkfifoat.3.

proc.5

mtk

Information on core_pattern and core_uses_pid has been migrated to the new core.5 page.

ip.7

Stefan Puiu

Removed paragraph referring to obsolete ipchains / ipfw(4).

sem_overview.7

mtk

Add SEE ALSO entry referring to pthreads.7.

==== Changes in man-pages-2.30 =====

Released: 2006-04-17

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Andre Lehovich <andrel@yahoo.com>

Andries Brouwer <Andries.Brouwer@cwi.nl>

Karel Kulhavy <clock@twibright.com>

Stefan Puiu <stefanpuiuro@yahoo.com>

Apologies if I missed anyone!

New pages

linkat.2

mtk

New page describing linkat(), new in kernel 2.6.16

renameat.2

mtk

New page describing renameat(), new in kernel 2.6.16

symlinkat.2

mtk

New page describing symlinkat(), new in kernel 2.6.16

unlinkat.2

mtk

New page describing unlinkat(), new in kernel 2.6.16

Changes to individual pages

link.2

mtk

Added SEE ALSO entry pointing to new linkat.2 page.

openat.2

mtk

Added SEE ALSO entries pointing to new *at.2 pages.

rename.2

mtk

Added SEE ALSO entry pointing to new renameat.2 page.

rmdir.2

mtk

Added SEE ALSO entry pointing to new unlinkat.2 page.

symlink.2

mtk

Added SEE ALSO entry pointing to new symlinkat.2 page.

unlink.2

mtk

Added SEE ALSO entry pointing to new unlinkat.2 page.

termios.3

mtk / Karel Kulhavy

Document the feature test macros required to expose various flags.

Karel Kulhavy

Clarify 'speed' argument for cfsetispeed() text.

Karel Kulhavy / mtk

Note that LOBLK is not implemented on Linux.

mtk

Clarify arguments for cfsetspeed().

Various formatting changes.

full.4

Andre Lehovich

Add a sentence describing the purpose of full(4).

core.5

aeb / mtk

Rework text describing circumstances in which
core dump files are not produced.

mtk / Stefan Puiu

A core dump of a multithreaded process always includes the
PID in the core filename.

mtk / Stefan Puiu

Eliminate some accidentally duplicated text.

===== Changes in man-pages-2.31 =====

Released: 2006-05-02

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Joshua Kwan <joshk@triplehelix.org>

Justin Pryzby <justinpryzby@users.sourceforge.net>

Karel Kulhavy <clock@twibright.com>

Mark Glines <mark@glines.org>

Martin (Joey) Schulze <joe@infodrom.org>

Nishanth Aravamudan <nacc@us.ibm.com>

Reuben Thomas <rrt@sc3d.org>

Ryan S. Arnold <rsa@us.ibm.com>

Ulrich Drepper <drepper@redhat.com>

Apologies if I missed anyone!

Page renamings

The following pages have been relocated into section 7, since
that is their more natural home. SEE ALSO references in various
other pages have been adjusted.

epoll.4

fifo.4

futex.4

complex.5

environ.5

(many pages outside man-pages actually *expect*
'environ' to be in Section 7.)

ipc.5

renamed to svipc.7

".so" link files have been created to link the old file locations to the new file locations. These links are added just to ensure that cross references from any other (non-man-pages) pages will remain valid; eventually these links will be removed.

New pages

fstatat.2

mtk

New page for fstatat(2), new in 2.6.16.

adjtime.3

mtk

New page for adjtime(3).

error.3

Justin Pryzby / mtk

New page describing error() and error_at_line()

Fixes <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=186307>

program_invocation_name.3

mtk

New page describing program_invocation_name and
program_invocation_short_name variables.

socketmark.3

mtk

New page for socketmark(3).

ftm.7

mtk

New page describing feature test macros.

time.7

mtk

New page giving an overview of "time" on Linux systems.

Global changes

getgroups.2

wait4.2

chown.2

chdir.2

gettimeofday.2

initgroups.3

dirfd.3

mtk

Simplified wording around requirement for `_BSD_SOURCE` feature test macro.

times.2

time.2

gettimeofday.2

getitimer.2

nanosleep.2

ctime.3

rtc.4

mtk

Added SEE ALSO referring to new time.7.

err.3

errno.3

perror.3

strerror.3

Justin Pryzby / mtk

Add SEE ALSO referring to new error.3.

getdate.3

printf.3

scanf.3

mtk

Added SEE ALSO entry referring to setlocale.3.

Changes to individual pages

accept.2

Mark Glines

Remove mention of `SOCK_RDM` from this page, since this socket type does not support `accept()`ing connections.

adjtimex.2

mtk

Modified text referring to adjtime(); added SEE ALSO for new adjtime.3 page.

fsync.2

mtk, after a note by Karel Kulhavy

Rewrote most of the DESCRIPTION, as well as some other parts the page, to clarify use and operation of, and rationale for, fsync(2) and fdatsync(2).

getitimer.2

mtk

Updated discussion of maximum timer value to reflect the fact that the default jiffy is now 4 milliseconds.

Added text to note that current incorrect behavior of normalizing tv_usec ≥ 1000000 will be repaired in a future kernel; applications should be fixed now.

gettimeofday.2

Karel Kulhavy

Point out more explicitly that 'tz' argument should normally be NULL.

mtk

Various other minor edits and formatting fixes.

mount.2

mtk

Since kernel 2.6.16, MS_NOATIME and MS_NODIRATIME are settable on a per-mount basis.

Detail exactly which mount flags can be changed on MS_REMOUNT.

nanosleep.2

mtk / Karel Kulhavy

Clarify RETURN VALUE discussion.

openat.2

mtk

Add SEE ALSO reference pointing to new fstatat.2.

program_invocation_short_name.3

mtk

New link to new program_invocation_name.3.

recv.2

mtk

Added SEE ALSO for new socketmark.3.

rmdir.2

Joshua Kwan / Martin (Joey) Schulze / mtk

Correct wording of EBUSY case.

mtk

Add ".." case to ENOTEMPTY error

select.2

Karel Kulhavy

Note more clearly that fd_set arguments can be NULL.

mtk / Karel Kulhavy

Improve opening paragraph describing purpose of select().

mtk

Various other minor edits and formatting fixes.

semget.2

mtk / Nishanth Aravamudan

Add text to noting that the initial values of semaphores in a new set are indeterminate.

shmget.2

mtk

Add text noting that contents of newly created segment are zero values.

sigwaitinfo.2

mtk

Noted that all threads should block signal being waited for.

stat.2

Nishanth Aravamudan / mtk

Added NOTE that st_size is always returned as zero for most /proc files.

mtk

Add SEE ALSO reference pointing to new fstatat.2.

syscall.2

Justin Pryzby / mtk

Remove bogus BUGS text.

utime.2

mtk

Various minor changes.

confstr.3

mtk

Rewrote RETURN VALUE discussion.

Updated CONFORMING TO.

Removed BUGS.

ctanh.3

Martin (Joey) Schulze / mtk

Fix errors in DESCRIPTION.

ctime.3

mtk

The range of tm_sec is 0..60 (not 0..61).

error_at_line.3

error_message_count.3

error_on_per_line.3

error_print_progname.3

mtk

New links to new error.3.

fmemopen.3

mtk / Ryan S. Arnold

Add text noting that explicitly controlling output buffering may be useful to catch errors on output operations on an fmemopen() stream.

getline.3

Justin Pryzby

Add SEE ALSO pointing to getline.3.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=364772>

strtod.3

strtoul.3

mtk

Describe correct handling of errno in order to distinguish error from success after the call.

Added EXAMPLE section which points to strtol.3 which provides an example of the use of the analogous strtol(3).

strtol.3

mtk / Justin Pryzby

Add an example program.

mtk

Describe correct handling or errno in order to distinguish error from success after the call.

tmpfile.3

Reuben Thomas

DESCRIPTION does not need to say "temporary file name"

just "temporary file", since the name is in any case
unavailable to the user.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=363518>

mtk

In DESCRIPTION:

Change /automatically deleted when the program terminates normally/
to /automatically deleted when the program terminates/
since deletion occurs on both normal and abnormal termination.

ip.7

Karel Kulhavy / mtk

Various wording improvements and clarifications.

signal.7

mtk / Ulrich Drepper

Add text noting that a signal's disposition is process-wide,
shared by all threads.

mtk

Add text on changing signal dispositions.
Add text on "signal mask and pending signals".
Other minor edits.

time.7

mtk

Added SEE ALSO for new adjtime.3.

ld.so.8

Justin Pryzby

Remove bogus duplicate line.

==== Changes in man-pages-2.32 =====

Released: 2006-05-13

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>

Johannes Weiner <root@hnaz.ath.cx>

Justin Pryzby <justinpryzby@users.sourceforge.net>

Karel Kulhavy <clock@twibright.com>

Paul Brook <paul@nowt.org>

Pavel Heimlich <tropikhajma@seznam.cz>

Apologies if I missed anyone!

New pages

faccessat.2

mtk

New page for faccessat(2), new in 2.6.16.

fchmodat.2

mtk

New page for fchmodat(2), new in 2.6.16.

fchownat.2

mtk

New page for fchownat(2), new in 2.6.16.

futimesat.2

mtk

New page for futimesat(2), new in 2.6.16.

Changes to individual pages

access.2

mtk

Add SEE ALSO reference pointing to new faccessat.2 page.

capget.2

mtk

Reworded to reflect that capabilities are per-thread.

chmod.2

mtk

Add SEE ALSO reference pointing to new fchmodat.2 page.

chown.2

mtk

Add SEE ALSO reference pointing to new fchownat.2 page.

mmap.2

mtk

Updated discussion of MAP_NORESERVE since it is no longer restricted to MAP_PRIVATE mappings.

Add reference to discussion of /proc/sys/vm/overcommit_memory in proc.5.

openat.2

mtk

Add SEE ALSO reference pointing to new faccessat.2, fchmodat.2, fchownat.2, futimesat.2 pages.

shmget.2

mtk

Document SHM_NORESERVE flag, new in 2.6.15.

truncate.2

Paul Brook / mtk

Expand text noting that ftruncate()/truncate() may fail if asked to extend a file beyond its current length.

Add EPERM error.

utime.2

mtk

Add SEE ALSO reference pointing to new futimesat.2 page.

fopen.3

Justin Pryzby / mtk

Document 'm' (mmap) flag.

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=365754>

mtk

Document 'c' (notcancel) flag.

futimes.3

mtk

Add SEE ALSO reference pointing to new futimesat.2 page.

qsort.3

Johannes Weiner

Add missing "const" qualifies to cast in EXAMPLE.

mtk

Slight rewording of comments in EXAMPLE.

termios.3

Karel Kulhavy

Clarify meaning of IXANY.

Clarify relationship of MIN with VMIN and TIME with VTIME.

mtk

Noted that CIBAUD, OFDEL, and DELECHO are not implemented on Linux.

Added explanatory paragraph for phrases "not in POSIX" and "XSI".

capabilities.7

mtk

Reworded to reflect that capabilities are per-thread.

Add ioprio_set() to list of operations permitted by CAP_SYS_NICE.

Add ioprio_set() IOPRIO_CLASS_RT and IOPRIO_CLASS_IDLE scheduling classes to list of operations permitted by CAP_SYS_ADMIN.

Note effects of CAP_SYS_NICE for migrate_pages().

===== Changes in man-pages-2.33 =====

Released: 2006-05-23

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>

Justin Pryzby <justinpryzby@users.sourceforge.net>

Martin Osvald" <martin.osvald@gmail.com>

Stefan Puiu <stefanpuiuro@yahoo.com>

Apologies if I missed anyone!

Page renamings

ftm.7

mtk / Stefan Puiu

renamed to the more suggestive feature_test_macros.7

New pages

mq_getsetattr.2

mtk

New page briefly describing mq_getsetattr(2), the system call that underlies mq_setattr(3) and mq_getattr(3).

rpmatch.3

Justin Pryzby / mtk

New page for rpmatch(3).

Changes to individual pages

chmod.2

mtk

Remove mention of non-standard S_IREAD, S_IWRITE, S_IEXEC.
POSIX does now document ELOOP.

open.2

mtk

Remove mention of non-standard S_IREAD, S_IWRITE, S_IEXEC.

mmap.2

Justin Pryzby

Add mincore(2) to SEE ALSO.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=367401>

msync.2

Justin Pryzby

Note that EINVAL can also be caused by
flags == MS_SYNC | MS_ASYNC.

sched_setaffinity.2

mtk

Add CPU_ISSET, CPU_CLR, CPU_SET, CPU_ZERO to NAME section.

select.2

mtk

Various minor changes.

select_tut.2

mtk

Removed much material that is redundant with select.2.
Various other changes.

umask.2

mtk

Substantial rewrite of description of 'mask'.

CPU_ISSET.3

CPU_CLR.3

CPU_SET.3

CPU_ZERO.3

mtk

New links to sched_setaffinity.2

FD_CLR.3

FD_ISSET.3

FD_SET.3

FD_ZERO.3

mtk

New links to select.2.

fts.3

Justin Pryzby

Add SEE also referring to ftw.3.

ftw.3

Justin Pryzby

Add SEE also referring to fts.3.

getline.3

Justin Pryzby

Various minor clarifications.

mkstemp.3

mtk

Clarify that O_EXCL is an open(2) flag.

mq_open.3

Martin Osvald

Fix prototype declaration for 'attr'.

mq_notify.3

Martin Osvald

s/sigev_signal/sigev_signo/

mq_setattr.3

mtk

New link to mq_getattr.3.

mq_timedreceive.3

mtk

New link to mq_receive.3.

mq_timedsend.3

mtk

New link to mq_send.3.

setlocale.3

Justin Pryzby

Added SEE ALSO referring to rpmatch.3.

sigandset.3

sigisemptyset.3

sigorset.3

mtk

New links to sigsetops.3.

stdio.3

Justin Pryzby

Added SEE ALSO referring to unlocked_stdio.3

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=367667>

strchr.3

Justin Pryzby

Add description of strchrnul().

strchrnul.3

mtk

New link to strchr.3.

undocumented.3

Justin Pryzby / mtk

Updated to remove some functions that don't exist, and therefore don't need to be documented.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=367671>

unlocked_stdio.3

Justin Pryzby

Added SEE ALSO referring to stdio.3

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=367667>

mq_overview.7

mtk

Added section describing relationship between library interfaces and system calls.

Added SEE ALSO referring to new mq_getsetattr.2.

feature_test_macros.7

Stefan Puiu

Fix typo: s/_POSIX_C_SOURCE/_POSIX_SOURCE/

==== Changes in man-pages-2.34 =====

Released: 2006-06-20

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Aristeu Sergio Rozanski Filho <aris@cathedrallabs.org>
bert hubert <bert.hubert@netherlabs.nl>
Chris Curtis <chris.curtis@riptidesoftware.com>
Eduardo Madeira Fleury <efleury@br.ibm.com>
Joerg Scheurich <rusmufti@helpdesk.bera.rus.uni-stuttgart.de>
Justin Pryzby <justinpryzby@users.sf.net>
Kenichi Okuyama <okuyama.kenichi@oss.ntt.co.jp>
Marc Lehmann <debian-reportbug@plan9.de>
Martin (Joey) Schulze <joe@infodrom.org>
Mats Wichmann <mats.d.wichmann@intel.com>
Mike Frysinger <vapier@gentoo.org>
Peter Eiserloh <eiserlohpp@yahoo.com>
Stefan Puiu <stefanpuiu@yahoo.com>
Thomas Dickey <dickey@radix.net>
Walter Harms <wharms@bfs.de>

Apologies if I missed anyone!

Global changes

tzselect.8

zdump.8

zic.8

mtk, Joey

Added header comment noting that these pages are in the public domain.

bindresvport.3

getrpcent.3

getrpcport.3

rpc.3

xdr.3

rpc.5

mtk, aeb, Joey

Added following to top of these pages to clarify origin and license:

.\ " This page was taken from the 4.4BSD-Lite CDROM (BSD license)

New pages

ioprio_set.2

Eduardo Madeira Fleury, with edits by mtk, and review by Jens Axboe

New page for ioprio_get(2) and ioprio_set(2), new in 2.6.13.

offsetof.3

Justin Pryzby / mtk

New page describing offsetof() macro.

Changes to individual pages

_exit.2

mtk

Add SEE ALSO referring to exit_group.2.

acct.2

mtk

Add SEE ALSO referring to acct.5.

fcntl.2

mtk

Explicitly mention term "dnotify" in discussion of F_NOTIFY.

inotify_add_watch.2

Aristeu Sergio Rozanski Filho / mtk

s/<inotify.h>/<sys/inotify.h>/ in prototypes.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=369960>

mtk

Renamed argument from 'path' to 'pathname'.

Reword introductory paragraph to clarify that

inotify_add_watch() may also modify an existing watch item.

mtk

The EINVAL error can also occur if 'fd' is not an inotify
file descriptor.

mtk

Moved BUGS section from this page to inotify.7.

inotify_init.2

Aristeu Sergio Rozanski Filho / mtk

s/<inotify.h>/<sys/inotify.h>/ in prototypes.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=369960>

inotify_rm_watch.2

Aristeu Sergio Rozanski Filho / mtk

s/<inotify.h>/<sys/inotify.h>/ in prototypes.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=369960>

mtk

The EINVAL error can also occur if 'fd' is not an inotify
file descriptor.

ioprio_get.2

mtk

New link to new ioprio_set.2.

mmap.2

mtk

Add SEE ALSO referring to remap_file_pages.2.

mount.2

Kenichi Okuyama

s/MNT_FORCE/MNT_EXPIRE/ under EINVAL error.

mremap.2

Mike Frysinger

s/unsigned long flags/int flags/ in SYNOPSIS.

pipe.2

mtk

Add SEE ALSO referring to popen.3.

posix_fadvise.2

mtk

Add SEE ALSO referring to readahead.2.

read.2

mtk

SEE ALSO for readv should refer to Section 2, not 3.

readahead.2

mtk

Add SEE ALSO referring to posix_fadvise.2.

send.2

Peter Eiserloh

Fix missing arguments in statement about equivalent send() and sendto() calls.

setsid.2

mtk

Add SEE ALSO referring to tcgetsid.3.

shmctl.2

mtk

Minor wording change at start of DESCRIPTION.

stat.2

mtk

Add SEE ALSO referring to access.2.

statfs.2

mtk

Relocated "Note" about f_fsid.

write.2

mtk

SEE ALSO for writev should refer to Section 2, not 3.

__setfpucw.3

mtk, Joey

Added license statement (GPL) after consultation with
Joerg Scheurich.

assert_perror.3

Justin Pryzby

Add #define _GNU_SOURCE to prototype

difftime.3

Joey

Added note about time_t representation on other systems.
Added CONFORMING TO.

ftw.3

Justin Pryzby / mtk

A fairly major revision...

Document FTW_ACTIONRETVL; include .SH "RETURN VALUE";

Reorganized and rewrote much of the page

Added an example program.

inet.3

Marc Lehmann

Fixed typo in NOTES.

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=370277>

isalpha.3

Joey

Updated CONFORMING TO.

mktemp.3

mtk

Updated CONFORMING TO.

printf.3

Walter Harms

Add documentation of %m.

readdir.3

mtk

Added SEE ALSO referring to ftw.3.

re_comp.3

mtk

Note that these functions are obsolete in favor of regcomp(3).

Justin Pryzby

Add SEE ALSO referring to regcomp.3

scandir.3

Mats Wichmann

Reworded CONFORMING TO statement on scandir() and alphasort().

strchr.3

Stefan Puiu

Fix prototype for strchrnul().

strtoul.3

Stefan Puiu

Add text clarifying treatment of strings starting with minus sign.

tmpnam.3

mtk, after comments by Justin Pryzby

Add text noting the need to use open(O_EXCL).

mtk

Clarify discussion of use of free(3).

Various other minor changes to text and formatting.

tmpfile.3

mtk

Updated CONFORMING TO.

tmpnam.3

mtk, after comments by Justin Pryzby

Add text noting the need to use open(O_EXCL).

Updated CONFORMING TO.

undocumented.3

mtk

Remove offsetof(), which is now documented.

null.4

mtk

Added SEE ALSO referring to full.4.

console_codes.4

Thomas Dickey

Various improvements and corrections.

epoll.7

mtk

Added CONFORMING TO section mentioning FreeBSD kqueue and Solaris /dev/poll.

feature_test_macros.7

mtk

Added pointer to location of LFS specification.

futex.7

mtk, after suggestion by Joey.

Added license statement to page, after discussion with original author, bert hubert.

mtk

Reformat long lines; no content changes.

inotify.7

mtk

'path' argument renamed to 'pathname'.

A few minor rewordings.

Added BUGS section describing a couple of bugs.

ip.7

mtk

Add SEE ALSO referring to byteorder.3.

man.7

Justin Pryzby

Add SEE ALSO referring to groff_man(7).

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=369253>

==== Changes in man-pages-2.35 =====

Released: 2006-07-06

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>

Andi Kleen <ak@suse.de>

Andrew Morton <akpm@osdl.org>

Bauke Jan Douma <bjdouma@xs4all.nl>

Davide Libenzi <davidel@xmailserver.org>

Denis Barbier <barbier@linuxfr.org>
Horacio Rodriguez Montero <Horacio.Rodriguez.Montero@galinter.com.ar>
Johan Lithander <johan.lithander@teligent.se>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Mike Frysinger <vapier@gentoo.org>
Stefan Puiu <stefanpuiu@yahoo.com>
Thorsten Kukuk <kukuk@suse.de>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several places.

New pages

sync_file_range.2

Andrew Morton / mtk

New page for sync_file_range(2), new in kernel 2.6.17.

Changes to individual pages

adjtime.3

mtk

Noted BUG that occurs if 'delta' is specified as NULL.

See http://bugzilla.kernel.org/show_bug.cgi?id=6761

bind.2

Stefan Puiu

Add EADDRNOTAVAIL error.

Stefan Puiu / mtk

Make example code more complete.

epoll_ctl.2

mtk / Davide Libenzi

Added EPOLLRDHUP description.

mtk

Added SEE ALSO referring to poll.2.

poll.2

mtk / Davide Libenzi

Added POLLRDHUP description.

mtk

The correct header file is <poll.h>, not <sys/poll.h>.
Rewrote and reformatted various other parts.

readlink.2

mtk

Nowadays, readlink() returns 'ssize_t', as required in
POSIX.1-2001.

wavelan.4

mtk

Added license statement.

nscd.conf.5

Thorsten Kukuk

Add documentation for various new fields.

passwd.5

Horacio Rodriguez Montero

Add explanation of 'x' character in 'password' field.

mtk

The proper name of "*" is "asterisk" not "star".

tcp.7

Johan Lithander

Update RFC reference for ECN.

Andi Kleen

Add sentence on "low memory" limit for tcp_mem on 32-bit systems.

==== Changes in man-pages-2.36 =====

Released: 2006-07-11

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>

Jens Axboe <jans@suse.de>

Justin Pryzby <justinpryzby@users.sourceforge.net>

Kyle McMartin <kyle@mcmartin.ca>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several places.

New pages

MAINTAINING

mtk

How to maintain man-pages.

TODO

mtk

Things that it would be nice to get done for man-pages one day.

scripts/FIXME_list.sh

mtk

This script, intended for use by manual page maintainers, displays the FIXMEs in the manual page source files.

Changes to individual pages

fdatsync.2

fsync.2

mtk

Added SEE ALSO referring to sync_file_range.2.

sendfile.2

mtk / Jens Axboe

Fix description of 'offset' argument to explain the case where 'offset' is NULL.

ferror.3

Justin Pryzby

Add SEE ALSO referring to fdopen.3.

intro.3

mtk

Removed information about Section 3 subsections -- it doesn't reflect current reality, and probably never has.

Added SEE ALSO referring to intro.2.

tcp.7

Kyle McMartin

Correction: tcp_window_scaling is ENabled by default.

Released: 2006-08-02

Thomas Huriaux <thomas.huriaux@gmail.com>

Ville Skyttä <ville.skytta@iki.fi>

Apologies if I missed anyone!

Global changes

Thomas Huriaux / mtk

Various formatting problems found as a result of reviewing the following command were fixed.

```
for a in $(wc -l man?/*.*| awk '$1 > 2 {print $2}' | grep -v total); do
    echo $a; groff -Tascii -wmac -mman $a > /dev/null;
done 2>&1 | less
```

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=378544>

Typographical or grammatical errors have been corrected in several places.

New pages

readlinkat.2

mtk (after prompting from Ivana Varekova)

New page for readlinkat(2), new in kernel 2.6.16.

Changes to individual pages

ldd.1

Ville Skyttä

Document "-u" option.

chdir.2

mtk

Noted effect of fork() and execve() on current working directory.

chroot.2

mtk

Noted effect of fork() and execve() on root directory.

epoll_ctl.2

Frank van Viegen / mtk

Fix description of EBADF error.

execve.2

mtk

Add text noting that effective IDs are copied to saved set-IDs during execve().

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=379297>

getitimer.2

mtk

Noted effect of fork() and execve() on interval timers.

getrlimit.2

mtk

Noted effect of fork() and execve() on resource limits.

getpriority.2

mtk

Noted effect of fork() and execve().

inotify_add_watch.2

mtk

Some rewording; included text describing required file permissions.

intro.2

mtk

Revised description of standards under CONFORMING TO.

makecontext.3

Helmut Grohne / mtk

Point out that args following 'argc' are int.

mtk

Added an example program.

Various minor wording fixes.

mmap.2

mtk

Expand description of MAP_POPULATE.

mtk, after prompting by Dean Gaudet

Expand description MAP_NONBLOCK.

mtk

Various minor formatting fixes.

openat.2

mtk

Added SEE ALSO linking to readlinkat.2.

nanosleep.2

mtk

Noted buggy behavior in Linux 2.4 and earlier when

nanosleep() is restarted after receiving stop+SIGCONT signals.

nice.2

mtk

Very minor rewording.

readlink.2

mtk

Added SEE ALSO linking to readlinkat.2.

sched_setscheduler.2

mtk

Noted preservation of scheduling parameters across execve().

setpgid.2

mtk

Noted effect of fork() and execve() on process group ID.

setsid.2

mtk

Noted effect of fork() and execve() on session ID.

umask.2

mtk

Noted effect of fork() and execve() on umask.

atexit.3

mtk

Noted inheritance of registrations across fork().

capabilities.7

mtk

Added material on privileges required for move_pages().

CLONE_NEWNS needs CAP_SYS_ADMIN.

keyctl(KEYCTL_CHOWN) and keyctl(KEYCTL_SETPERM) require CAP_SYS_ADMIN.

==== Changes in man-pages-2.38 =====

Released: 2006-08-03

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>

Apologies if I missed anyone!

Global changes

Most pages

mtk

There was a major reworking of the CONFORMING TO sections in most manual pages.

* generally try to rationalize the names used for standards.

The preferred names are now documented as the head words of the list in standards(7). For the future: there is probably no need to talk about anything more than C89, C99, POSIX.1-2001 (or later), xBSD, and SVr4. (In particular, I've eliminated most references to XPG and SVID, replacing them with references to SUS or SVr4.)

* eliminate discussion of errors that can occur on other systems. This information exists only patchily in the manual pages, is probably of limited use, is hard to maintain, and was in some cases simply wrong (and probably always was).

* Tried to ensure that those interfaces specified in C99 or POSIX.1-2001 are marked as such in their manual pages.

intro.1

intro.2

intro.3

intro.4
intro.5
intro.7
feature_test_macros.7

mtk
Added SEE ALSO referring to new standards.7.

Various pages
mtk
Changed instances of "HP UX" to "HP-UX".

Various pages
mtk
Changed instances of "DG-UX to "DG/UX"

Typographical or grammatical errors have been corrected in several places.

New pages

standards.7
mtk
Based on material taken from intro.2, but expanded to include discussion of many additional standards.

Changes to individual pages

bind.2
mtk
Minor wording change for ENOTSOCK error.

intro.2
mtk
Removed information on standards to new standards.7.

futimesat.2

linkat.2

mkdirat.2

mknodat.2

openat.2

readlinkat.2

renameat.2

symlinkat.2

mtk (after a note by Alain Portal)

Make naming of 'pathname' argument consistent; various minor rewordings.

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

clone.2

mtk

Reinstate text on CLONE_DETACHED, and add a few words.

execve.2

mtk

Added list of process attributes that are not preserved on exec().

fork.2

mtk, after a suggestion by Christoph Hellwig

Greatly expanded, to describe all attributes that differ in parent and child.

linkat.2

mtk

Document AT_SYMLINK_FOLLOW (new in 2.6.18).

set_mempolicy.2

mtk / Andi Kleen

Memory policy is preserved across execve().

write.2

mtk / Alain Portal

SEE ALSO for writev should refer to Section 2, not 3.
(i.e., really make the change that was logged in 2.34)

getcwd.3

Samuel Thibault / mtk

Fix SYNOPSIS and CONFORMING TO text for getwd() and
get_current_dir().

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=381692>

proc.5

Chuck Ebbert

Document /proc/PID/auxv.

capabilities.7

Alain Portal

Restore text accidentally deleted in 2.39.

regex.7

mtk / Alain Portal

Change references to "1003.2" to "POSIX.2".

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several places.

New pages

splice.2

tee.2

vmsplice.2

Jens Axboe / Michael Kerrisk

See also:

<http://lwn.net/Articles/118760/>

<http://lwn.net/Articles/178199/>

<http://lwn.net/Articles/179492/>

<http://kerneltrap.org/node/6505>

<http://lwn.net/Articles/179434/>

Changes to individual pages

ldd.1

Stefan Puiu

Note glibc version where "ldd -u" appeared.

execve.2

mtk

The PR_SET_NAME setting is not preserved across an execve().

fork.2

mtk

Mappings marked with madvise(MADV_DONTFORK) are not inherited by child.

getdtablesize.2

mtk

Noted that sysconf(_SC_OPEN_MAX) is preferred in portable applications.

getpagesize.2

mtk

Noted that sysconf(_SC_PAGE_SIZE) is preferred in portable

applications.

`_SC_PAGE_SIZE` is available on most systems.

madvise.2

mtk

Document `MADV_REMOVE`, new in 2.6.16.

Document `MADV_DONTFORK` / `MADV_DOFORK`, new in 2.6.16.

mount.2

mtk / Trond Myklebust

`MNT_FORCE` can cause data loss.

mmap.2

mtk

Added note on Linux's old (pre-2.6.12) buggy treatment of `length==0`.

Justin Pryzby / mtk

Added some `EINVAL` errors.

mremap.2

mtk

Remove superfluous `"#include <unistd.h>"` from SYNOPSIS.

msync.2

mtk

Added `EBUSY` error for case where `MS_INVALIDATE` is applied to a locked region.

posix_fadvise.2

Andrew Morton

Since 2.6.18, `POSIX_FADV_NOREUSE` is a no-op.

prctl.2

Marcel Holtmann / mtk

Since kernel 2.6.18, setting 2 for `PR_SET_DUMPABLE` is no longer possible.

Guillem Jover

Updated Linux versions where the options were introduced.

Added `PR_SET_TIMING`, `PR_GET_TIMING`, `PR_SET_NAME`, `PR_GET_NAME`, `PR_SET_UNALIGN`, `PR_GET_UNALIGN`, `PR_SET_FPEMU`, `PR_GET_FPEMU`, `PR_SET_FPEXC`, `PR_GET_FPEXC`.

Michael Kerrisk

Document `PR_GET_ENDIAN` and `PR_SET_ENDIAN`.

remap_file_pages.2

mtk

Add `"#define _GNU_SOURCE"` to SYNOPSIS.

sync_file_range.2

mtk

Noted that sync_file_range() appeared in kernel 2.6.17.

vfork.2

mtk

Noted interactions with fork handlers in multithreaded programs.

wait4.2

mtk

Added feature test macros to SYNOPSIS.

clog2.3

mtk / aeb / Kevin Ryde

Fix broken text in description.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=386214>

clog10.3

Kevin Ryde

Fix broken text in description.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=386214>

mq_receive.3

Britton Leo Kerin

Fix return type in SYNOPSIS; should be "ssize_t" not "mqd_t".

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=387551>

qsort.2

Hrvoje Niksic

Fix wording referring to the use of strcmp() in 'compar' function.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=391402>

sendfile.2

mtk

Added SEE ALSO referring to new splice.2 page.

termios.3

mtk

Documented IUTF8 (which was new in kernel 2.6.4).

tzset.3

mtk

Added some TZ examples.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=386087>

proc.5

mtk

Added delayacct_blkio_ticks (new in 2.6.18) to /proc/PID/statm.

ip.7

Stuart MacDonald / Andi Kleen

Fix discussion for TCP error queue /IP_RECVERR on TCP.

pthread.7

mtk

Noted effect of RLIMIT_STACK resource limit for NPTL.

socket.7

Senthil Kumar

Place socket options in alphabetical order.

==== Changes in man-pages-2.42 =====

Released: 2006-11-24

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Andrew Morton <akpm@osdl.org>
Chuck Ebbert <76306.1226@compuserve.com>
Doug Goldstein <cardoe@gentoo.org>
Eduard Bloch <blade@debian.org>
Evan Teran <eteran@alum.rit.edu>
Pavel Heimlich <tropikhajma@seznam.cz>
Petr Baudis <pasky@ucw.cz>
Randy Dunlap <rdunlap@xenotime.net>
Ulrich Drepper <drepper@redhat.com>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

brk.2

Evan Teran / mtk

Add text describing behavior of the Linux brk() system call and point out that the glibc brk() wrapper provides different behavior.

mtk

Note that sbrk() is implemented as a library function in glibc that calls the brk() system call.

futex.2

mtk

FUTEX_FD is scheduled for removal in June 2007.

getaddrinfo.3

getnameinfo.3

Ulrich Drepper, with edits by mtk

Add text describing Internationalized Domain Name extensions.

open.2

mtk / Eduard Bloch

Fix description of O_LARGEFILE to mention required feature test macros.

ptrace.2

Chuck Ebbert

Since Linux 2.6.18, the PID of the new process is also available for PTRACE_EVENT_VFORKDONE.

syslog.3

Doug Goldstein

Fix header file required for vsyslog() in SYNOPSIS.

wcwidth.3

Petr Baudis

Fix CONFORMING TO.

core.5

mtk

Linux 2.4.21 added core_pattern (which was already in 2.6).
Noted a few more reasons why a core dump file might not be produced.

==== Changes in man-pages-2.43 =====

Released: 2006-11-29

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Andi Kleen <ak@suse.de>
David Brownell <david-b@pacbell.net>
Eduard Bloch <blade@debian.org>
Egmont Koblinger <egmont@uhulinux.hu>
Reuben Thomas <rrt@sc3d.org>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

ioperm.2

mtk

Clarify discussion of privilege requirements.
Added ENOMEM to ERRORS.

open.2

mtk / Eduard Bloch

Clarify description of O_LARGEFILE.

crypt.3

Egmont Koblinger

Make description of MD5 output string less ambiguous.

strerror.3

Reuben Thomas

Add C99 to CONFORMING TO; see
<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=400634>

rtc.4

David Brownell

Update the RTC man page to reflect the new RTC class framework:

- Generalize ... it's not just for PC/AT style RTCs, and there may be more than one RTC per system.
- Not all RTCs expose the same feature set as PC/AT ones; most of these ioctls will be rejected by some RTCs.
- Be explicit about when {A,P}IE_{ON,OFF} calls are needed.
- Describe the parameter to the get/set epoch request; correct the description of the get/set frequency parameter.
- Document RTC_WKALM_{RD,SET}, which don't need AIE_{ON,OFF} and which support longer alarm periods.
- Hey, not all system clock implementations count timer irq's any more now that the new RT-derived clock support is merging.

proc.5

mtk

s/fseek(3)/lseek(2)/ under /proc/PID/mem entry.

feature_test_macros.7

mtk / Eduard Bloch

The LFS spec is now at <http://opengroup.org/platform/lfs.html>

raw.7

udp.7

Andi Kleen

Describe the correct default for UDP/RAW path MTU discovery.

New pages

termio.7

mtk, after a bit of prodding by Reuben Thomas

A brief discussion of the old System V termio interface,
with pointers to pages that will contain the information
that the reader probably wants.

scripts/find_repeated_words.sh

mtk

Find consecutive duplicate words in a man page, some of
which may be grammar errors.

Global changes

Various pages

Justin Pryzby / mtk

Add "#define _ATFILE_SOURCE" to SYNOPSIS in following pages:

faccessat.2

fchmodat.2

fchownat.2

fstatat.2

futimesat.2

linkat.2

mkdirat.2

mknodat.2
openat.2
readlinkat.2
renameat.2
symlinkat.2
unlinkat.2
mkfifoat.3

Various pages

mtk

Various references to "getty" were changed to "mingetty", since that is the manual page more likely to be found on current systems.

Various pages

mtk, after a suggestion by Reuben Thomas <rrt@sc3d.org>

Updated various header pages to accurately reflect which functions are and are not part of C89. Also fixed/improved a few other CONFORMING TO entries.

Various pages

mtk

s/Unices/Unix systems/ on the 5 pages where it appears.

Various pages

mtk

Wrapped long source lines in the following files

getsockopt.2
mknodat.2
io_setup.2
select_tut.2
select.2
readlinkat.2
io_cancel.2
syslog.2
wcsncat.3
getipnodebyname.3
cmsg.3
wpcncpy.3
wcsrtombs.3
wcstok.3
fgetwc.3
wmemcmp.3
wcssp.3
div.3
modf.3
stdio_ext.3
ctermid.3
des_crypt.3

wcsncmp.3
wmemchr.3
wcsstr.3
wmemcpy.3
wprintf.3
wcsrtombs.3
termios.3
erf.3
ceil.3
lround.3
nextafter.3
wcsncpy.3
wmemset.3
getw.3
console_ioctl.4
sk98lin.4
environ.7
unix.7
time.7

Various pages

mtk

Added a SEE ALSO reference for feature_test_macros(7) to all pages where a feature test macro appears in the SYNOPSIS.

Various pages

mtk

Added SEE ALSO entry pointing to time.7

alarm.2
nanosleep.2
ualarm.3
usleep.3

Various pages

Justin Pryzby / mtk

Fixed consecutive duplicate word typos on a number of pages.

Typographical or grammatical errors have been corrected in several places. (Special thanks to Nicolas François!)

Changes to individual pages

access.2

mtk

Since 2.6.20, access() honors the MS_NOEXEC mount flag.

Jorge Peixoto de Morais Neto / mtk

Improve ENOENT description.

clone.2

mtk

Added some detail to the prototype.

Added some notes on IA-64's clone2().

epoll_ctl.2

mtk

Add text to note that EPOLLRDHUP appeared in kernel 2.6.17.

faccessat.2

Justin Pryzby

Various fixes as per

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=411177>

* s/effective/real/ in description text.

* added <fcntl.h> to synopsis.

* various other changes.

getrlimit.2

mtk / Fedora downstream patches; thanks to Ivana Varekova

Added a few words to note that RLIMIT_NPROC is really a limit on threads.

io_cancel.2

io_destroy.2

io_getevents.2

io_setup.2

io_submit.2

Fedora downstream patches; thanks to Ivana Varekova

s%/linux/aio.h%libaio.h% in SYNOPSIS.

Changed return type from "long" to "int".

mbind.2

Samuel Thibault / mtk

Fix EINVAL description.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=411777>

mincore.2

Nick Piggin

Kernel 2.6.21 fixes several earlier bugs in mincore().

Nick Pollitt

Remove words "of a file" -- mincore() is describing memory residence information, not properties of a file.

mtk

Rewrote various parts to make the page clearer.

mmap.2

mtk

Rewrote and reorganized various parts to be clearer.

Taken from Fedora downstream patches; thanks to Ivana Varekova

Removed text stating that mmap() never returns 0; that's not true.

mount.2

mtk / Val Henson

Document MS_RELATIME, new in Linux 2.6.20.

open.2

Andre Majorel / mtk

On Linux, the error returned when opening a large file on a 32-bit system is actually EFBIG, not EOVERFLOW.

posix_fadvise.2

Pádraig Brady

Fix RETURN VALUE description: returns error number of failure.

rename.2

mtk / Timo Sirainen

Various improvements to DESCRIPTION.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=416012>

semop.2

mtk

If sops contains multiple operations, then these are performed in array order. All Unix systems that I know of do this, and some Linux applications depend on this behavior. SUSv3 made no explicit statement here, but SUSv4 will explicitly require this behavior.

Small rewording of explanation of "atomically".

signal.2

Nicolas François

Fix incorrect argument name in DESCRIPTION.

mtk

Small wording improvement.

socket.2

Nicolas François

Add reference to ipv6.7 page.

socketcall.2

Nicolas François

Fix .TH line.

splice.2

Benjamin Gilbert

Fix inconsistent argument names in SYNOPSIS and DESCRIPTION.

statvfs.2

mtk

Small wording clarification.

symlink.2

mtk / Nicolas François

Removed cryptic text under CONFORMING to referring to "open(2) and NFS". There is no relevant text in open.2 as far as I (mtk) can see.

time.2

mtk / Reuben Thomas

Remove sentence "gettimeofday() obsoleting time() on 4.3BSD". This information is old, and probably no longer relevant. See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=403888>

write.2

mtk, after an idea from a downstream Fedora patch.

Clarified discussion of /count == 0/ case.

ptrace.2

Chuck Ebbert

When the parent receives an event with PTRACE_EVENT_* set, the child is not in the normal signal delivery path. This means the parent cannot do ptrace(PTRACE_CONT) with a signal or ptrace(PTRACE_KILL). kill() with a SIGKILL signal can be used instead to kill the child process after receiving one of these messages.

sched_setaffinity.2

mtk

Fix glibc version number in description of 'cpusetsize' argument.

vfork.2

mtk

Stripped some excess/outdated text from the BUGS section.

basename.3

mtk / Jorge Peixoto de Morais Neto

Add text to clarify that the pointer returned by these functions may be into some part of 'path'.

dlopen.3

Taken from Fedora downstream patches; thanks to Ivana Varekova + Carlo Marcelo Arenas Belon

Add "#include <stdlib.h>" to example program.

fclose.3

mtk

Complete rewrite. The existing page was hard to read, and the RETURN VALUE description seems to be wrong.

getopt.3

mtk

Added getopt() example program.

mtk

Add a few words to clarify the operation of the GNU-specific double-colon feature, which allows options to have optional arguments.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=352139>

glob.3

Nicolas François

Fix PROTOTYPE.

inet_network.3

mtk, after an idea from a downstream Fedora patch.

Clarified description of inet_network().

log.3

Nicolas François

Fix .TH line.

log10.3

Nicolas François

Fix .TH line.

malloc.3

Nicolas François

Small rewording to mention calloc().

posix_openpt.3

Martín Ferrari

Fix return type in SYNOPSIS; as per

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=400971>

Needs _XOPEN_SOURCE == 600; as per

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=400975>

Julien BLACHE

s/ptsname/posix_openpt/ in RETURN VALUE

re_comp.3

Taken from Fedora downstream patches; thanks to Ivana Varekova

Add "#define _REGEX_RE_COMP" to SYNOPSIS.

regex.3

Nicolas François

Fix .TH line.

termios.3

mtk

Added .SS headers to give some structure to this page; and a small amount of reordering.

mtk

Added a section on canonical and non-canonical mode.

mtk

Enhanced the discussion of "raw" mode for `cfmakeraw()`.

mtk

Document CMSPAR.

mtk

Make description of PARODD a little clearer.

Reuben Thomas

Add SEE ALSO link to `tty_ioctl.4`

mtk

Add SEE ALSO link to `console_ioctl.4`

ualarm.3

mtk

Removed BSD prototype from synopsis.

Various rewordings.

usleep.3

mtk

Removed BSD prototype from synopsis.

Various rewordings.

termcap.5

Taken from Fedora downstream patches; thanks to Ivana Varekova
s/curses/ncurses/ under SEE ALSO

bootparam.7

Taken from Fedora downstream patches; thanks to Ivana Varekova
Documented "mem=nopentium".

feature_test_macros.7

mtk

The default treatment of `_POSIX_C_SOURCE` changed in glibc 2.4.

mtk, after a suggestion by Justin Pryzby

Added some text warning that the "___" macros that
<features.h> defines internally should never be
directly defined by programs.

mtk, based on notes by Jakub Jelinek

Document _FORTIFY_SOURCE

(See <http://gcc.gnu.org/ml/gcc-patches/2004-09/msg02055.html>)

mtk

Document _REENTRANT and _THREAD_SAFE.

mdoc.7

mtk / Nicolas François

Remove CONFIGURATION section, since this does not seem to be true for Linux.

svipc.7

Nicolas François

Fix data types in associated data structures;
remove nonexistent semzcnt and semncnt fields.

time.7

mtk

Since kernel 2.6.20, the software clock can also be 300 HZ.

===== Changes in man-pages-2.45 =====

Released: 2007-04-05

Global changes

This release consists mainly of formatting fixes (to a large number of pages) to achieve greater consistency across pages. With the exception of the few individual changes noted below, no changes were made to content.

Changes to individual pages

io_destroy.2

io_getevents.2

io_setup.2

io_cancel.2

io_submit.2

mtk

Clarified RETURN VALUE text

bindresvport.3

mtk

Rewrote prototype using modern C syntax.

===== Changes in man-pages-2.46 =====

Released: 2007-04-06

Global changes

This release consists mainly of formatting fixes (to a large number of pages) to achieve greater consistency across pages:

- * Most instances of two or more consecutive blank lines in man page output were shrunk to a single line.
- * A number of example programs were reformatted to more closely match K&R style.
- * In various places (mainly code examples), the use of tabs was replaced by spaces

With the exception of the few individual changes noted below, no changes were made to content.

Changes to individual pages

bdflush.2

mtk

Add <sys/kdaemon.h> header file to SYNOPSIS.

sched_rr_get_interval.2

mtk

Moved timespec definition from SYNOPSIS into description.

select_tut.2

mtk

Make SYNOPSIS match select.2.

===== Changes in man-pages-2.47 =====

Released: 2007-05-04

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>

John Heffner <jheffner@psc.edu>

Apologies if I missed anyone!

Global changes

This release consists mainly of changes to source file layout (wrapped long lines; stripped trailing white space; started new sentences on new lines).

There is very little change to output formatting or content (see the notes below).

Changes to individual pages

sched_rr_get_interval.2

mtk

Remove crufty statement that this system call is not implemented.

The nice interval can be used to control the size of the round-robin quantum.

Corrected .TH line.

ip.7

John Heffner / mtk

Document IP_PMTUDISC_PROBE, which will be in 2.6.22.

===== Changes in man-pages-2.48 =====

Released: 2007-05-04

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Colin Watson <cjwatson@debian.org>

Justin Pryzby <justinpryzby@users.sourceforge.net>

Apologies if I missed anyone!

Global changes

This release consists mainly of changes to source file layout
(wrapped long lines; stripped trailing white space; started new
sentences on new lines).

There is very little change to output formatting or content (see the
notes below).

Various pages

mtk

In various places where it occurred,
s/nonnegative/non-negative/

Various pages

mtk

s/wide character/wide-character/ when used attributively.

Changes to individual pages

man.7

Justin Pryzby / Colin Watson / mtk

.SH doesn't require quotes.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=411303>

===== Changes in man-pages-2.49 =====

Released: 2007-05-20

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Akihiro MOTOKI <amotoki@dd.iij4u.or.jp>

Bruno Haible <bruno@clisp.org>

Justin Pryzby <justinpryzby@users.sourceforge.net>

Apologies if I missed anyone!

New pages

bsd_signal.3

mtk

Documentation of bsd_signal().

eidaccess.3

mtk

Manual page for eidaccess() and eaccess().

getsubopt.3

mtk / Justin Pryzby

Documentation of getsubopt().

sysv_signal.3

mtk

Documentation of sysv_signal().

New links

epoll_pwait.2

mtk

New link to epoll_wait.2.

eaccess.3

mtk

New link to new eidaccess.3,

sem_timedwait.3

mtk

New link to sem_wait.3.

sem_trywait.3

mtk

New link to sem_wait.3.

Global changes

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

access.3

mtk

Added SEE ALSO ref to new `eidaccess.3` page.

`epoll_wait.2`

mtk

Added description of `epoll_pwait()`, new in kernel 2.6.19.

`execve.2`

mtk

Add text noting that Linux allows 'argv' and 'envp' to be NULL, but warning that this is non-standard and non-portable, and should be avoided in portable programs.

Bug filed (http://bugzilla.kernel.org/show_bug.cgi?id=8408) to get this changed, but maybe that won't be done because it is an ABI change.

mtk

Added an example program.

mtk

Expanded the discussion of interpreter scripts and the 'optional-arg' argument of an interpreter script.

For further info, see

<http://homepages.cwi.nl/~aeb/std/hashexclam-1.html>

<http://www.in-ulm.de/~mascheck/various/shebang/>

mtk

Added text noting that `FD_CLOEXEC` causes record locks to be released.

mtk

Mention effect of `MS_NOSUID` mount(2) flag for set-user-ID programs.

mtk

Expanded description of handling of file descriptors during `execve()`, adding text to note that descriptors 0, 1, and 2 may be treated specially.

`faccessat.3`

mtk

Added SEE ALSO ref to new `eidaccess.3` page.

`mmap.2`

mtk

Place `MAP_*` flags list in alphabetical order.

`readv.2`

mtk

A fairly substantial rewrite, which among other things fixes the problem reported by Kyle Sluder in

http://bugzilla.kernel.org/show_bug.cgi?id=8399

And added some example code.

sigaction.2

mtk

Added text referring to the discussion of async-signal-safe functions in signal(7).

A few other minor formatting and wording changes.

signal.2

mtk

Moved the discussion of async-signal-safe functions to signal(7).

Added text referring to the discussion of async-signal-safe functions in signal(7).

Added SEE ALSO entries referring to new `bsd_signal.3` and `sysv_signal.3` pages.

copysign.3

Bruno Haible

Clarify discussion of negative zero.

getopt.3

mtk

Add SEE ALSO ref to new `getsubopt.3`.

iconv_open.3

Bruno Haible

Describe the `glibc/libiconv //TRANSLIT` and `//IGNORE` extensions for 'tocode'.

iswblank.3

Bruno Haible

Update CONFORMING TO; `iswblank()` is in POSIX.1-2001.

inotify.7

mtk

Definitions for `IN_DONT_FOLLOW`, `IN_MASK_ADD`, and `IN_ONLYDIR` were added to `glibc` in version 2.5.

signal.7

mtk

Incorporated (and slightly modified) the text on async-signal-safe functions that was formerly in signal(2).

Added SEE ALSO entries referring to new `bsd_signal.3` and `sysv_signal.3` pages.

==== Changes in man-pages-2.50 =====

Released: 2007-05-21

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Andreas Halter <halter@google.com>

Laird Shaw <netocrat@dodo.com.au>

Mike Frysinger <vapier@gentoo.org>

Apologies if I missed anyone!

Removed pages (!)

Most Section 1 man pages are removed

mtk (with help from Mike Frysinger, Laird Shaw, Andreas Halter)

Once upon time Andries added a number of Section 1 manual pages to man-pages. However, since that time, those pages have not seen much maintenance, and are not in fact distributed in most distributions. Instead most distributions supply the coreutils versions of these pages, which are currently maintained. In addition, man-pages provides the 1p pages, which document the portable subset of functionality of these commands. Since the man1 pages are mostly unneeded, and out of date, I'm removing them. The following pages disappear:

chgrp.1
chmod.1
chown.1
cp.1
dd.1
df.1
diff.1
dir.1
dircolors.1
du.1
install.1
ln.1
ls.1
mkdir.1
mkfifo.1
mknod.1
mv.1
rm.1
rmdir.1
touch.1

vdir.1

The following Section 1 pages will be kept:

intro.1

ldd.1

time.1

==== Changes in man-pages-2.51 =====

Released: 2007-05-28

Global changes

Various pages

mtk

(Hopefully) all cross references outside a page now include a section number. This should permit better resulting output from a man2html-type conversion.

Various pages

mtk

Convert function formatting of the form "\fBname\fp()" to ".BR name ()".

Changes to individual pages

futimesat.2

mtk

s/futimes/futimesat/ in .SH NAME line.

msgop.2

mtk

Put "msgrcv" and "msgsnd" in .SH NAME line.

mount.2

mtk

Add "umount2" to .SH NAME line.

wait.2

mtk

Add "waitid" to .SH NAME line.

getopt.3

mtk

Add "getopt_long" and "getopt_long_only" in .SH NAME line.

sem_wait.3

mtk

Add "sem_timedwait" and "sem_trywait" to .SH NAME line.

stdarg.3

mtk

Add "va_start", "va_arg", "va_end", "va_copy" to .SH NAME line.

===== Changes in man-pages-2.52 =====

Released: 2007-05-29

"A foolish consistency is the hobgoblin of little minds, adored by
little statesmen and philosophers and divines"

Ralph Waldo Emerson (1803-1882)

"But damn it, these man pages are a mess!"

Global changes

Most of the changes below are about bringing greater consistency
to manual pages, including reducing the wide range of .SH
Section headings.

Typographical or grammatical errors have been corrected in several
places.

Various pages

mtk

Make 'manual' component of .TH line into the string

"Linux Programmer's Manual".

Reason: consistency.

Various pages

mtk

Changed date in .TH line into form YYYY-DD-MM.

Reason: consistency.

Various pages

mtk

Some .SH header lines were made into .SS lines. (One of the aims

here is to reduce the number of non-standard .SH lines.)

Various pages

mtk

Change title .SH sections named "NOTE" to "NOTES", in some cases also changing the location of the section within the page.

Reason: consistency.

Various pages

mtk

Commented out .SH AUTHOR sections; the right place for documentation authorship sections is usually comments at the top of the page source.

Various pages

mtk

Changed .SH HISTORY to .SH VERSIONS.

Reason: in many cases, HISTORY was being used to describe Linux/glibc version information, as was already done for VERSIONS sections in other pages.

Various pages

mtk

Removed HISTORY section, or moved it as a subsection or paragraphs under another section e.g., NOTES.

Reason: there are too many arbitrary section (.SH) names, and a HISTORY section never was consistently used across Linux manual pages.

Various pages

mtk

Moved SEE ALSO section to be last section on the page

Reason: consistency -- and this is where SEE ALSO should be!

Various pages

mtk

Relocated GLIBC NOTES as subsection under NOTES

Reason: reduce number of arbitrary section (.SH) names.

Various pages

mtk

Relocated LINUX NOTES as subsection under NOTES

Reason: reduce number of arbitrary section (.SH) names.

Various pages

mtk

Renamed some "AVAILABILITY" sections to "VERSIONS".

Reason: consistency.

Various pages

mtk

Renamed some "DIAGNOSTICS" sections to "RETURN VALUE".

Reason: consistency.

getopt.3

tzselect.8

mtk

s/\.SH ENVIRONMENT VARIABLES/.SH ENVIRONMENT/

Reason: consistency.

intro.2

select.2

sysctl.2

bsearch.3

dlopen.3

envz_add.3

fmtmsg.3

getgrent_r.3

getgrouplist.3

getpwent_r.3

gettutent.3

hsearch.3

rtime.3

strptime.3

tsearch.3

vcs.4

wordexp.3

mtk

s/return 0/exit(EXIT_FAILURE)/ in main() of function example program.

Reason: consistency.

mprotect.2

select_tut.2

dlopen.3

getgrent_r.3

getopt.3

getpwent_r.3

hsearch.3

select_tut.2

tsearch.3

mtk

Use symbolic constants (EXIT_SUCCESS, EXIT_FAILURE) in calls to exit().

Reason: consistency.

access.2
chown.2
lseek.2
open.2
read.2
utmp.5

mtk

Renamed RESTRICTIONS section to NOTES, or moved text in a RESTRICTIONS section under existing NOTES section.

Reason: consistency, and reduce number of arbitrary section (.SH) names.

Changes to individual pages

capget.2

mtk

s/\.SH FURTHER INFORMATION/\.SH NOTES/

dup.2

mtk

s/\.SH WARNING/\.SH NOTES/

kill.2

mtk

Renamed LINUX HISTORY section to LINUX NOTES, and relocated within page.

select_tut.2

mtk

Relocated example program and made its .SH title "EXAMPLE".

sigaltstack.2

mtk

Move code example into its own EXAMPLE section.

sigreturn.2

mtk

s/\.SH WARNING/\.SH NOTES/

setuid.2

mtk

s/\.SH "LINUX-SPECIFIC REMARKS"/\.SH LINUX NOTES/

shmget.2

mtk

Remove section about effect of fork()/exec()/exit(); shmop.2

contains the same text, and it only needs to be said once.

shmop.2

mtk

Minor rewording under DESCRIPTION.

daemon.3

mtk

Minor wording and formatting changes.

encrypt.3

mtk

Removed statement that glibc unconditionally exposes declarations of encrypt() and setkey(), since portable applications must use <unistd.h> and define _XOPEN_SOURCE to obtain the declarations of setkey() and encrypt(). Adjusted example program accordingly.

mkstemp.3

mtk

Slight rewording.

LDP.7

mtk

Minor wording and formatting changes.

man.7

mtk

Substantial rewrite, revising and extending the discussion about desired conventions for writing pages.

There will be further updates to this page in the next few man-pages releases.

==== Changes in man-pages-2.53 =====

Released: 2007-05-30

"A foolish consistency is the hobgoblin of little minds, adored by little statesmen and philosophers and divines"

Ralph Waldo Emerson (1803-1882)

"But damn it, these man pages are a mess!"

Global changes

Many many pages

mtk

Reordered sections to be more consistent, in some cases renaming sections or shifting paragraphs between sections.

man7/*

mtk

In various pages in this section, .SH headings were converted to .SS.

===== Changes in man-pages-2.54 =====

Released: 2007-06-07

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Emmanuel Mogenet <emogenet@google.com>

Michael Berg <michaeljberg@gmail.com>

Apologies if I missed anyone!

Global changes

Various pages

mtk

Where there is an instruction in the SYNOPSIS about linking or compiling with a certain option, the option is now marked up in italics (e.g., "\fI-lm\fP").

Various pages

mtk

Added page numbers to page cross references.

A few pages

mtk

s/manpage/man page/, for consistency.

Typographical or grammatical errors have been corrected in several places.

New pages

man-pages.7

mtk

A description of the conventions that should be followed when writing pages for the man-pages package.

Removed pages

man1/README

mtk

Already deleted most of the man1 pages previously, so this doesn't need to stay.

LDP.7

mtk

Removed this page since it is out of date, and the proper place to go for up-to-date information is <http://www.tldp.org/>

ksoftirq.9

mtk

Reason: this was the only Section 9 page, and it is old (Linux 2.4). The man9 section never took off as an idea, and I see little point in keeping a Section 9 with just a single old page.

Changes to individual pages

HOWTOHELP

mtk

Moved some material out of here into new man-pages.7.

alloc_hugepages.2

mtk

Minor rewrites, eliminating some duplication, and removing some outdated text.

epoll_pwait.2

Michael Berg

Fix broken link path;

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=425570>

fcntl.2

mtk

Remove misleading text about setting O_ASYNC when calling open(); one must use fcntl() F_SETFL for this task.

fdatasync.2

mtk

Converted outdated BUGS note about fdatasync() being equivalent to fsync() on Linux 2.2 into a NOTES note about this historical behavior.

futex.2

mtk

Small rewording to fix "fails with the error EWOULDBLOCK" rather than "returns EWOULDBLOCK".

See Red Hat bug 172828.

mprotect.2

mtk, after an observation by Emmanuel Mogenet

A much improved example program.

mtk

Significant rewrites and additions to description.

mremap.2

mtk

Remove text about the nonexistent BSD mremap() -- too much information, in my opinion.

sched_yield.2

mtk

Added ERRORS section.

set_mempolicy.2

mtk

Moved text for "Versions and Library Support".

set_tid_address.2

mtk

Small rewording in RETURN VALUE section.

sigaction.2

mtk

Add EXAMPLE section with a pointer to example in mprotect.2.

sync_file_range.2

mtk

Fix return type in SYNOPSIS. Add RETURN VALUE section.

atexit.3

mtk

Small rearrangement of text under NOTES.

bindresvport.3

mtk

Rewrite and substantial additional text.

exec.3

mtk

Minor clarifications for text on `execlp()` and `execvp()`. Removed FILES section, since it provides no useful additional info.

fenv.3

mtk

Moved link instructions from NOTES to SYNOPSIS.
Added `feenableexcept`, `fedisableexcept`, `fegetexcept` to .SH NAME list.

fputwc.3

mtk

Added 'putwc' to .SH NAME list.

gethostbyname.3

mtk

`s/int/socklen_t/` for type of `gethostbyaddr()` 'len' argument, and add a few more words in NOTES about the type used here.

login.3

mtk

Removed remark from NOTES about linking with `-lutil`; add text on that point to SYNOPSIS.

openpty.3

mtk

Removed redundant remark from NOTES about linking with `-lutil` since there is text on that point under SYNOPSIS.

sysconf.3

mtk

Added SEE ALSO referring to `getconf(1)`.

unlocked_stdio.3

mtk

Revised .SH NAME section.

ascii.7

mtk

Minor rearrangement of order of text.

capabilities.7

mtk

s/exec()/execve(2)/ in various places.

complex.7

mtk

Changed "atan(1)" to "atan(1.0)" to prevent some versions of man2html(1) from mistaking that string as a page cross reference.

rtnetlink.7

mtk

Small restructuring to avoid 'cannot adjust line' from man(1).

ldconfig.8

mtk

Removed now very out-of-date sentence about need to link shared libraries with -lc.

man.7

mtk

Various text was moved out of this page into the new man-pages.7.

mdoc.7

mtk

Added SEE ALSO referring to new man-pages.7.

mdoc.samples.7

mtk

A few changes, hopefully done right, to eliminate some errors to stderr when rendering with man(1).

rtnetlink.7

mtk

Shorten a line in table so it fits in 80 columns.
Minor rewording under BUGS.

tzselect.8

mtk

Moved EXIT STATUS section.

==== Changes in man-pages-2.55 =====

modify_ldt.2

mq_getsetattr.2

pivot_root.2

quotactl.2

readdir.2

sysctl.2

syslog.2

tkill.2

mtk, after a note by Mike Frysinger

Updated to reflect the fact that the `_syscallN()` macros have gone away,

Several pages

mtk

Change reference to `path_resolution.2` to `path_resolution.7`.

Typographical or grammatical errors have been corrected in several places.

Moved pages

path_resolution.2 has been moved to section 7, thus path_resolution.7

mtk

Reason: this is an overview page, not one describing as a specific system call.

Changes to individual pages

MAINTAINING

mtk, after a note from Xose Vazquez Perez

Added pointer to Red Hat man-pages bugzilla.

mtk

Added a release philosophy note on separating out big formatting changes into their own release that contains minimal content changes.

accept.2

mtk

Add new EXAMPLE section with pointer to example in bind.2.

arch_prctl.2

mtk

Added RETURN VALUE section.

bind.2

mtk

Expand example program, and move it to new EXAMPLE section. Added text pointing to example in getaddrinfo.3.

cacheflush.2

mtk

Convert NOTES section to CONFORMING TO and note that this call is Linux-specific. Other minor rewordings.

connect.2

mtk

Added new EXAMPLE section pointing to example in getaddrinfo.3.

create_module.2

mtk

Add ENOSYS error.

fcntl.2

flock.2

mtk

Small rewrite of SEE ALSO text pointing to Documentation/* in kernel source.

get_kernel_syms.2

mtk

Added ERRORS heading

Add ENOSYS error.

getdtablesize.2

mtk

Added an ERRORS section.

getsid.2

mtk

Added a RETURN VALUE section.

getpid.2

mtk

Added an ERRORS section (stating that the calls are always successful).

ioctl_list.2

mtk

Add SEE ALSO reference to ioctl.2.

listen.2

mtk

Add new EXAMPLE section with pointer to example in bind.2.

query_module.2

Martin (Joey) Schulze

Add ENOSYS error.

recv.2

mtk

Added new EXAMPLE section pointing to example in getaddrinfo.3.

sched_get_priority_max.2

sched_rr_get_interval.2

sched_setscheduler.2

sched_yield.2

mtk

Modified .TH line

send.2

mtk

Added new EXAMPLE section pointing to example in getaddrinfo.3.

set_tid_address.2

mtk

Added an ERRORS section (stating that the call is always successful).

signal.2

mtk, after a note from Alexander Taboriskiy

Strengthen warning against the use of signal().

Added siginterrupt(3) to SEE ALSO list.

mtk

Rewrote various parts; added an ERRORS section.

socket.2

mtk

Added new EXAMPLE section pointing to example in getaddrinfo.3.

stat.2

mtk

Added EXAMPLE program.

syscall.2

mtk

Converted to -man format; some rewrites; added an EXAMPLE.

sysctl.2

mtk

Improved the example program.

getnameinfo.3

mtk

Add text pointing to example in getaddrinfo.3.

getaddrinfo.3

mtk

Add example programs.

Add getnameinfo() to SEE ALSO list.

memmove.3

mtk / Serge van den Boom

Clarify discussion of what happens if 'src' and 'dest' overlap.

regex.3

Justin Pryzby

Add grep(1) to SEE ALSO list.

sigpause.3

mtk after a note from Ulrich Drepper

Clarify discussion of feature test macros that are needed to

expose System V and BSD versions of this function in glibc.

undocumented.3

mtk

Removed some functions that have been documented.

wprintf.2

Martin (Joey) Schulze

Remove wscanf.3 from SEE ALSO list, since that page does not exist.

utmp.5

Joey Hess

Removed outdated note on xdm.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=418009>

Martin (Joey) Schulze

Removed outdated note about Debian and libc5.

bootparam.7

Martin (Joey) Schulze

Fix order of commands listed under 'init='.

hier.7

Joey Hess

Add /media, remove /dos.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=418234>

inotify.7

mtk

Added text describing what happens when the buffer given to read(2) is too small to return information about the next event, and noting the behavior change in 2.6.21.

man-pages.7

mtk

Added text to note that ERRORS list should be in alphabetical order.

mdoc.7

mdoc.samples.7

mtk

Added SEE ALSO reference to groff_mdoc(7).

unix.7

mtk

Added EXAMPLE section with pointer to bind.2 EXAMPLE.

ld.so.8

mtk

Simplify text describing --inhibit-rpath.

mtk, after a note by John Reiser
Describe use of \$ORIGIN in rpath.

===== Changes in man-pages-2.56 =====

Released: 2007-06-11

Global changes

Many pages

mtk

Removed version numbers in .TH lines.

Reason: these were only arbitrarily updated, and so impart no useful information. Version information goes into a VERSIONS section nowadays, and the date in the .TH line should be updated to reflect the date of the last (significant) change to the page.

Typographical or grammatical errors have been corrected in several places.

===== Changes in man-pages-2.57 =====

Released: 2007-06-17

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Samuel Thibault <samuel.thibault@ens-lyon.org>

Apologies if I missed anyone!

Global changes

Many pages

mtk

Fix section numbers in page cross references.

Changes to individual pages

access.2

mtk

Minor wording fixes.
Small clarification of description of 'mode'.

bind.2

mtk

Small reworking of EXAMPLE program.

exit_group.2

mtk

Minor wording fixes.

exit.3

mtk

Added more detail on exit handlers.
Minor wording fixes.

ioctl.2

mtk

Remove SEE ALSO reference to nonexistent mt.4.

modify_ldt.2

Samuel Thibault / mtk

In Linux 2.6, the 'modify_ldt_ldt_s' structure was renamed
'user_desc'.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=378668>

mtk

Include definition of 'user_desc' structure.
Minor rewordings.

mprotect.2

mtk

Small reworking of EXAMPLE program.

sigaction.2

mtk

Removed reference to nonexistent sigsend(2).

a64l.3

mtk

Remove SEE ALSO reference to nonexistent itoa.3.

dysize.3

mtk

Removed SEE ALSO reference to nonexistent time.3.

encrypt.3

mtk

Removed SEE ALSO reference to nonexistent fcrypt.3.

fmemopen.3

mtk

Small reworking of EXAMPLE program.

fpurge.3

mtk

Remove SEE ALSO reference to nonexistent fclean.3.

getutent.3

mtk

s/ttyname(0)/ttyname(STDIN_FILENO)/ in program example.

vcs.4

mtk

s/exit(1)/exit(EXIT_FAILURE)/

environ.7

mtk

Correct some section numbers in page cross references.

man-pages.7

mtk

Modify requirements for example programs a little.

uri.7

mtk

Wrapped long source lines.

access.2

initgroups.3

euidaccess.3

tcgetpgrp.3

path_resolution.7

capabilities.7

unix.7

mtk

Add SEE ALSO link to new credentials.7.

New pages

credentials.7

mtk

An overview of Linux process identifiers (PIDs, PPIDs, PGIDS, SIDs, UIDs, GIDs).

Changes to individual pages

bind.2

mtk

Added some comments to example program.

getxattr.2

mtk

VERSIONS: In kernel since 2.4; glibc support since 2.3.

listen.2

mtk

Updated discussion of somaxconn limit.

listxattr.2

mtk

VERSIONS: In kernel since 2.4; glibc support since 2.3.

posix_fadvise.2

mtk

VERSIONS: Glibc support has been provided since version 2.2.

readahead.2

mtk

Added VERSIONS section.

remap_file_pages.2

mtk

Updated VERSIONS section with text on glibc support.

removexattr.2

mtk

VERSIONS: In kernel since 2.4; glibc support since 2.3.

semop.2

mtk

Added VERSIONS section with info on semtimedop().

setxattr.2

mtk

VERSIONS: In kernel since 2.4; glibc support since 2.3.

dl_iterate_phdr.3

mtk

VERSIONS: Supported since glibc 2.2.4.

getloadavg.3

mtk

Added VERSIONS section.

posix_openpt.3

mtk

VERSIONS: Supported since glibc 2.2.1.

printf.3

mtk after a suggestion by Mike Frysinger

Add text to the introductory part of DESCRIPTION, about the 'size' argument of snprintf() and vsnprintf().

shm_open.3

mtk

Added VERSIONS section; rewrote info about linking with -lrt.

strcat.3

Marc Boyer

Improve the discussion of strcat().

strcpy.3

Marc Boyer

Improve the discussion of strcpy().

proc.5

mtk

Added discussion of /proc/sys/net/core/somaxconn.

==== Changes in man-pages-2.59 =====

Released: 2007-06-25

Global changes

Manual pages are now standardized on American spelling. See http://en.wikipedia.org/wiki/American_and_British_English_spelling_differences for more information on the differences. Formerly, different pages (and sometimes even a single page!) employed American and British spelling conventions; best to standardize on one spelling, and American English is the standard in Computer Science.

Changes to individual pages

man-pages.7

mtk

Note that man-pages has now standardized on American spelling conventions.

execve.2

getxattr.2

listxattr.2
removexattr.2
setxattr.2
signal.2
syscall.2
aio_cancel.3
bindresvport.3
stdarg.3
charmap.5
bootparam.7
ipv6.7
man.7
path_resolution.7
uri.7
nscd.8

mtk

Corrected minor spelling/wording mistakes (i.e., changes independent of fixes for American spelling).

===== Changes in man-pages-2.60 =====

Released: 2007-06-25

Global changes

Various pages

mtk

Wrapped lines in some files.

Various pages

mtk

Change "e.g. " to "e.g., ", or in some cases, "for example, ".

Various pages

mtk

Change "i.e. " to i.e., ", or in some cases, "that is, ".

Various pages

mtk

Removed AUTHORS section.

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

vfork.2

mtk

s/w.r.t./with respect to/

man-pages.7

mtk

Strengthened warning against use of AUTHORS section.

===== Changes in man-pages-2.61 =====

Released: 2007-07-01

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Benno Schulenberg <bensberg@justemail.net>

Michael Gehring <mg@ebfe.org>
Serge van den Boom <svdb@stack.nl>
Stefan Puiu <stefanpuiu@yahoo.com>
Stepan Kasal <kasal@ucw.cz>

Apologies if I missed anyone!

Global changes

Various pages

mtk

substitute `\\0' by '\\0'.

Various pages

mtk

s^// when the thing being quoted is a character.

accept.2

bind.2

connect.2

getsockopt.2

listen.2

socket.2

socketpair.2

mtk after a note by Martin (Joey) Schulze

Add NOTES paragraph noting that <sys/types.h> isn't required by POSIX.1-2001 or Linux, but was required on some implementations.

accept.2

getsockname.2

recv.2

vm86.2

send.2

getgrouplist.3

memmem.3

nsswitch.conf.5

putenv.3

wprintf.3

mtk

Replace form `...' with \fI...\fP where the enclosed string is a pathname, type name, or argument name.

A few files

mtk

s/process' /process's/

gets.3

qsort.3

getaddrinfo.3

rpc.3

ungetwc.3

wcsnrtombs.3

capabilities.7

mtk

Add section number to page cross references.

time.1

bind.2

pivot_root.2

sysctl.2

mtk

Reordered .SH sections.

full.4
mouse.4
random.4
sd.4
mtk

Made CONFIG/CONFIGURING heading ==> CONFIGURATION

time.1
console_codes.4
random.4
sk98lin.4
charmap.5
ftusers.5
bootparam.7
charsets.7
glob.7
mq_overview.7
unicode.7
uri.7
utf-8.7
mtk

Reformatted headings

New pages

backtrace.3

mtk, with input from Justin Pryzby and Stefan Puiu
Documents backtrace(), backtrace_symbols(), and
backtrace_symbols_fd().

New links

backtrace_symbols.3

backtrace_symbols_fd.3

mtk

Links to backtrace.3.

__clone.2

Stepan Kasal

Link to clone.2.

Changes to individual pages

Makefile

Serge van den Boom

Fix setting of 'prefix' macro.

eval.1p

Benno Schulenberg

Fix bad text (concatenated line).

chdir.2

mtk

Fixed description of EACCES error.

Added sentence defining "current working directory".

Other minor wording changes.

cfree.3

mtk

Added SEE ALSO section.

clone.2

mtk

s/clone2/ __clone2/.

fdatasync.2

mtk

Minor wording changes.

fork.2

Alain Portal

Fix small wording error.

gethostid.2

Stefan Puiu / mtk

Add NOTES on what happens if gethostid() can't open /etc/hostid.

idle.2

mtk

Made NOTES text into a VERSIONS section, since that's what it really describes.

ioperm.2

mtk

Minor wording changes.

intro.2

mtk

Rewrite to reflect the fact that the _syscallN macros are no longer available.

io_cancel.2

mtk

Add "Link with -laio" to SYNOPSIS.

io_destroy.2

mtk

Add "Link with -laio" to SYNOPSIS.

io_getevents.2

mtk

Add "Link with -laio" to SYNOPSIS.

io_setup.2

mtk

Add "Link with -laio" to SYNOPSIS.

io_submit.2

Ivana Varekova

Fix include in SYNOPSIS.

mtk

Add "Link with -laio" to SYNOPSIS.

ipc.2

mtk

Add semtimedop() to SEE ALSO.

Note that some architectures don't have ipc(2); instead
real system calls are provided for shmctl(), semctl(), etc.

killpg.2

mtk

Minor wording changes.

listen.2

mtk

Added <sys/types.h> to SYNOPSIS.

sched_setscheduler.2

mtk

Add NOTES para about permissions required to call
sched_setscheduler() on other systems.

select.2

mtk

Noted that 'timeout' can also be changed if select() is
interrupted by a signal.

setup.2

mtk

Remove reference to `_syscall0()` macro.

shmop.2

mtk

Changed text for `EINVAL` error.

socketcall.2

mtk

Add `recvmsg()` and `sendmsg()` to `SEE ALSO`.

Note that some architectures don't have `socketcall(2)`; instead real system calls are provided for `socket()`, `bind()`, etc.

swapon.2

Ivana Varekova / mtk

Update text for `EPERM` error describing the maximum number of swap files. (From downstream Fedora patch.)

write.2

mtk

Added details about seekable files and file offset.

Noted that `write()` may write less than 'count' bytes, and gave some examples of why this might occur.

Noted what happens if `write()` is interrupted by a signal.

Minor wording changes.

`__setfpucw`.3

mtk

Added a `CONFORMING TO` section; other minor edits.

`confstr`.3

mtk

Minor rewrites in code example.

`ctime`.3

Justin Pryzby

Make `SEE ALSO` refer to `timegm`.3

`daemon`.3

mtk

Small wording change.

`dl_iterate_phdr`.3

Michael Gehring

Comment was missing closing `"*/"`.

`dlopen`.3

mtk

Formatting changes, and minor rewordings.

mtk, after a note by Serge van den Boom

Add a comment explaining the need for the rather strange cast of the return value of `dlsym()`.

`fpclassify.3`

mtk

Add "isinf" to NAME section.

`getgrouplist.3`

mtk

Minor rewording.

`getline.3`

mtk

Minor rewording, and note that '*n*' is ignored if '*lineptr' is NULL.

`malloc.3`

Ivana Varekova / mtk

Update description of `MALLOC_CHECK_` to include description for value 3. (From downstream Fedora patch.)

`netlink.3`

mtk

Added a CONFORMING TO section; other minor edits.

`openpty.3`

mtk

Minor changes to SYNOPSIS.

`program_invocation_name.3`

mtk

Shortened page title to `INVOCATION_NAME`.

`rtnetlink.3`

mtk

Added a CONFORMING TO section; other minor edits.

`scanf.3`

Florian Ernst

Fix duplicated word "the".

(Really fix <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=412467> !)

`select_tut.3`

mtk

Small wording change.

setnetgrent.3

mtk

Added a CONFORMING TO section.

sigpause.3

mtk

Added a CONFORMING TO section.

strftime.3

Just Pryzby

Small wording fix.

mtk

Note use of "gcc -Wno-format-y2k" to avoid the "'%c' yields only last 2 digits of year in some locales" warning.

strstr.3

mtk

Add "strcasestr" to NAME section.

syslog.3

mtk

Small wording change.

termios.3

mtk

Reformat SYNOPSIS.

Added a CONFORMING TO section.

timegm.3

mtk

Small wording changes.

ulimit.3

mtk

Remove erroneous text saying that glibc does not provide <ulimit.h>; it does.

initrd.4

mtk

Various reformattings.

core.5

mtk

Added a sentence noting why core dumps named "core.PID" were useful with LinuxThreads.

bootparam.7

mtk
Fix capitalization in .SS headings.

epoll.7
mtk
Language clean ups.

feature_test_macros.7
mtk
Added SEE ALSO section.

mq_overview.7
mtk
Reformatted headings; minor rewrites.

sem_overview.7
mtk
Reformatted headings; minor rewrites.

socket.7
Loïc Minier <lool@dooz.org>
Document argument type for SO_REUSEADDR.
See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=255881>

uri.7
mtk
Wrap long line in SYNOPSIS.

ldconfig.8
mtk
Added SEE ALSO section.

==== Changes in man-pages-2.62 =====

Released: 2007-07-09

This release consists solely of formatting fixes. There are no changes to content.

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Stepan Kasal <kasal@ucw.cz>

Apologies if I missed anyone!

Global changes

Many many pages

mtk

Many many formatting fixes.

man[013]p/*

Stepan Kasal

Add section number to .TH line for POSIX pages in man[013]p.

==== Changes in man-pages-2.63 =====

Released: 2007-07-16

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Arnd Bergmann <arndb@de.ibm.com>

Eduardo M. Fleury <efleury@br.ibm.com>

Ivana Varekova <varekova@redhat.com>

Justin Pryzby <justinpryzby@users.sourceforge.net>

Marc Boyer <marc.boyer@enseiht.fr>

Martin (Joey) Schulze <joeys@infodrom.org>

Martin Röhricht <martin@roehricht.info>

Patrick Mansfield <patmans@us.ibm.com>

Pierre Habouzit <madcoder@debian.org>

Stepan Kasal <kasal@ucw.cz>

Apologies if I missed anyone!

Global changes

gettimeofday.2

madvise.2

msgctl.2

select.2

semctl.2

shmctl.2

syslog.2

stat.2

a64l.3

printf.3

termios.3

xdr.3

sd.4

mtk

Minor wording changes.

obsolete.2

syscall.2

unimplemented.2

mtk

Added SEE ALSO reference to syscalls.2.

New pages

sgetmask.2

mtk

A real man page for sgetmask(2) and ssetmask(2).

(This page replaces a previous link of the same name, which
linked to signal.2.)

spu_create.2

Arnd Bergmann with additional work by Eduardo M. Fleury and mtk

Document the PowerPC SPU spu_create() system call.

(Originally taken from the kernel source file
Documentation/filesystems/spufs.txt.)

spu_run.2

Arnd Bergmann with additional work by Eduardo M. Fleury and mtk

Document the PowerPC SPU spu_run() system call.

(Originally taken from the kernel source file
Documentation/filesystems/spufs.txt.)

spufs.7

Arnd Bergmann with additional work by Eduardo M. Fleury and mtk

Document the PowerPC SPU file system.

(Originally taken from the kernel source file
Documentation/filesystems/spufs.txt.)

Removed Pages

[__clone.2](#)

mtk

This file was created by accident in 2.61, as a copy of clone.2.
(it should have been a link to clone.2.)

[obsolete.2](#)

mtk

Details on this page are covered in syscalls.2 and in
respective syscall man pages (stat.2, uname.2).

[undocumented.2](#)

mtk

This page is very out of date, and in any case difficult
to maintain. Information about undocumented system calls
is maintained in the HOWTOHELP file, and probably in other
places soon.

[killpg.3](#)

mtk

This rather incomplete page seems unnecessary since there
is a killpg.2.

New links

[chown32.2](#)

[fchown32.2](#)

[getegid32.2](#)

[geteuid32.2](#)

[getgid32.2](#)

[getgroups32.2](#)

[getresgid32.2](#)

[getresuid32.2](#)

[getuid32.2](#)

[lchown32.2](#)

[setfsgid32.2](#)

[setfsuid32.2](#)

[setgid32.2](#)

[setgroups32.2](#)

[setregid32.2](#)

[setresgid32.2](#)

[setresuid32.2](#)

[setreuid32.2](#)

[setuid32.2](#)

mtk

Added as link to corresponding page without "32".

fcntl64.2
fstat64.2
fstatat64.2
fstatfs64.2
ftruncate64.2
getdents64.2
lstat64.2
pread64.2
pwrite64.2
sendfile64.2
stat64.2
statfs64.2
truncate64.2

mtk

Added as link to corresponding page without "64".

__clone2.2
clone2.2

mtk

Links to clone.2.

ugetrlimit.2

mtk

Link to getrlimit.2.

mq_notify.2
mq_open.2
mq_timedreceive.2
mq_timedsend.2
mq_unlink.2

mtk

Added as links to corresponding section 3 pages.

fadvise64.2
fadvise64_64.2

mtk

Links to posix_fadvise.2.

rt_sigaction.2
rt_sigpending.2
rt_sigprocmask.2
rt_sigtimedwait.2

mtk

Added as link to corresponding page without "rt_" prefix.

rt_sigqueueinfo.2

mtk

[Link to sigqueue.2.](#)

madvise.1.2

tuxcall.2

vserver.2

mtk / Ivana Varekova

[Link to unimplemented.2.](#)

Changes to individual pages

access.2

mtk

Fairly substantial rewrites of various parts,
and a few additions.

chmod.2

mtk

Update SYNOPSIS to reflect the fact that fchmod(2) needs
either "#define _XOPEN_SOURCE 500" or "#define _BSD_SOURCE".

chown.2

mtk

Update SYNOPSIS to reflect the fact that fchmod(2) and lchown(2)
need either "#define _XOPEN_SOURCE 500" or "#define _BSD_SOURCE".
Added an example program.

killpg.2

mtk

Note that killpg() is actually a library function on Linux.

mmap.2

mtk

Added note that glibc mmap() wrapper nowadays invokes mmap2().

mmap2.2

Ivana Varekova / mtk

On most platforms the unit for 'offset' is 4096 bytes, not
the system page size.

mtk

Rewrote NOTES to note that glibc mmap() wrapper nowadays
invokes this system call.

mtk

Added an EXAMPLE program.

oldfstat.2

oldlstat.2

oldstat.2

mtk

Changed link to point to stat.2 (instead of obsolete.2).

olduname.2

oldolduname.2

mtk

Changed link to point to uname.2 (instead of obsolete.2).

sched_setaffinity.2

Martin Röhrich

Added `_GNU_SOURCE` to SYNOPSIS.

semctl.2

mtk

Remove reference discussion of ipc(2), since none of the other System V IPC pages mention ipc(2).

semop.2

mtk

Add an example code segment.

shmctl.2

mtk

Add svipc(7) to SEE ALSO list.

sigaction.2

mtk

Reformatted tables as lists; other minor reformatting and wording changes.

sigqueue.2

mtk

Added info on `rt_sigqueueinfo(2)`.

sigwaitinfo.2

mtk

Noted that `sigwaitinfo()` is a library function implemented on top of `sigtimedwait()`.

ssetmask.2

mtk

Make this link point to new `sgetmask.2` instead of `signal.2`.

stat.2

mtk

Add notes on the different system call interfaces that have appeared over time.

syscalls.2

mtk

A fairly substantial rewrite of this page, bringing it up to date with the current kernel version, and listing all system calls in tabular form.

uname.2

mtk

Add notes on the different system call interfaces that have appeared over time.

unimplemented.2

mtk

Add vserver, madvise1 to NAME line.
Removed SEE ALSO reference to obsolete.2.

Ivana Varekova

Add tuxcall to NAME line.

mktemp.3

Patrick Mansfield

Fix description of return value.

strcat.3

Marc Boyer

Minor fix to example program.

undocumented.3

mtk

Add section numbers to function names; remove some functions since they are documented.

proc.5

mtk

Update/correct text on /proc/malloc.

mtk, after a note by Pierre Habouzit, and a few comments by Justin Pryzby

Update description of /proc/PID/stat to match 2.6.21.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=417933>

inotify.7

mtk

IN_DONT_FOLLOW and IN_ONLYDIR are only available from 2.6.15.

signal.7

Stepan Kasal / mtk

Note SIGRTMIN value depends on glibc.

mtk

Various rewrites and additions to the text in real-time signals.

Add SEE ALSO reference to sgetmask.2.

svipc.7

mtk

Add ipc(2) to SEE ALSO.

Added/updated feature test macro requirements for
glibc; see [feature_test_macros.7](#) for details.

Changes to individual pages

mq_notify.2
mq_open.2
mq_timedreceive.2
mq_timedsend.2
mq_unlink.2

mtk

Fix broken link

setpgid.2

mtk

Fairly substantial changes and corrections, including adding
coverage of all of the interfaces that get/set PGIDs.

syscalls.2

mtk / aeb

Various rewordings; clear up some imprecisions.

lgamma.3

mtk

Added 'signgam' to SYNOPSIS and NAME line.

strerror.3

mtk

Note that the XPG version is provided since glibc 2.3.4. The page formerly said that the GNU-specific version is provided by default. That certainly isn't true nowadays, since `_POSIX_C_SOURCE` is set to 200112L by default, so that the XSI-compliant version is supplied by default.

man-pages.7

mtk

Added note pointing to `feature_test_macros.7` for a description of how feature test macro requirements should be specified in manual pages. Various other minor fixes and changes.

feature_test_macros.7

mtk

Added note about how feature test macros are specified in manual pages. Many other corrections, improvements, additions, and details about differences across glibc versions.

Typographical or grammatical errors have been corrected in several places.

Various pages

mtk

Use 'glibc' consistently to refer to GNU C library.

Various pages

mtk

Order errors under ERRORS alphabetically.

Various pages

Nicolas François

Spelling and formatting fixes, as per

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=439560>

intro.2

select.2

fmtmsg.3

getgrent_r.3

envz_add.3

rtime.3

strptime.3

wordexp.3

Maxime Vaudequin

Add "#include <stdlib.h>" (to declare exit(3)) to example program.

New pages

timeradd.3

mtk

Description of timeradd(), timersub(), timerclear(), timerisset(), timercmp() macros for operating on struct timeval.

Removed pages

fdatasync.2

mtk

Somehow, over time, material on fdatsync(2) crept into fsync.2, and fdatsync also got added to the NAME section of fsync.2. All of the material in fdatsync.2 that was not already in fsync.2 has now been moved there, and the former page has been removed.

In place of the content there, is now a link to fsync.2.

New links

clock_getres.2

clock_gettime.2

clock_settime.2

mtk

Link to man3/clock_getres.3.

fdatasync.2

mtk

Link to fsync.2.

fdopendir.3

mtk

Link to opendir.3.

gethostbyaddr_r.3

Mats Wichmann

Link to gethostbyaddr.3.

timerclear.3

timercmp.3

timerisset.3

timersub.3

mtk

Links to new timeradd.3.

Changes to individual pages

Makefile

Mike Frysinger

Make the install target of man-pages respect the standard "DESTDIR" variable as well as check the exit status of the install command so errors aren't ignored.

get_mempolicy.2

Lee Schermerhorn

changed the "policy" parameter to "mode" through out the descriptions in an attempt to promote the concept that the memory policy is a tuple consisting of a mode and optional set of nodes.

added requirement to link '-lnuma' to synopsis

rewrite portions of description for clarification.

added all errors currently returned by sys call.

removed cautionary note that use of MPOL_F_NODE|MPOL_F_ADDR is not supported. This is no longer true.

added mmap(2) to SEE ALSO list.

getitimer.2

mtk

Since kernel 2.6.22, Linux setitimer() now conforms to POSIX.1, giving an EINVAL error for a non-canonical tv_usec value.

gettimeofday.2

mtk

Replace discussion of timer* macros with a pointer to new page timeradd.3.

ioctl_list.2

Nicolas George

Fixed argument type for BLKGETSIZE.

mbind.2

Lee Schermerhorn

changed the "policy" parameter to "mode" throughout the descriptions in an attempt to promote the concept that the memory policy is a tuple consisting of a mode and optional set of nodes.

rewrite portions of description for clarification.

clarify interaction of policy with mmap()'d files and shared memory regions, including SHM_HUGE regions.

defined how "empty set of nodes" specified and what this means for MPOL_PREFERRED.

mention what happens if local/target node contains no free memory.

clarify semantics of multiple nodes to BIND policy.

Note: subject to change. We'll fix the man pages when/if this happens.

added all errors currently returned by sys call.

added mmap(2), shmget(2), shmat(2) to SEE ALSO list.

mmap.2

mprotect.2

François Diakhate

Add text noting that PROT_WRITE may (and on x86 does) imply PROT_READ.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=441387>

nfsservctl.2

Aleksandr Koltsoff

Fix prototype.

oldfstat.2

oldlstat.2

oldstat.2

mtk

Fix broken link

prctl.2

mtk

Update arches/kernel versions for PR_SET_UNALIGNED / PR_GET_UNALIGNED.

readahead.2

mtk

Removed SEE ALSO reference to nonexistent fadvise.2.

reboot.2

mtk

Place SYNOPSIS comments inside C comments (`/* ... */`).

sched_setaffinity.2

Samuel Thibault

Note what thread is affected if 'pid' is specified as 0, or as the value returned by `getpid()`.

sched_setscheduler.2

Carsten Emde

Add text on real-time features of mainline Linux kernel.

select_tut.2

mtk

sync SYNOPSIS with `select.2`

set_mempolicy.2

Lee Schermerhorn

changed the "policy" parameter to "mode" throughout the descriptions in an attempt to promote the concept that the memory policy is a tuple consisting of a mode and optional set of nodes.

added requirement to link '-lnuma' to synopsis

rewrite portions of description for clarification.

clarify interaction of policy with `mmap()`'d files.

defined how "empty set of nodes" specified and what this means for `MPOL_PREFERRED`.

mention what happens if local/target node contains no free memory.

clarify semantics of multiple nodes to `BIND` policy.

Note: subject to change. We'll fix the man pages when/if this happens.

added all errors currently returned by sys call.

added `mmap(2)` to `SEE ALSO` list.

sigaction.2

mtk

`s/si_sign/si_errno/` in statement about which field is unused.

Ari Entlich

s/SIGILL/SIGCHLD/ for paragraph describing SIGCHLD.

stat.2

mtk

Improve text describing underlying system calls.

swapon.2

Michael Prokop

EINVAL also occurs if target path is on tmpfs or similar.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=435885>

sync.2

mtk

Incorporated material from now deleted fdatasync.2.

syscall.2

mtk

Small fix in example program.

uname.2

mtk

Improve text describing underlying system calls.

utime.2

Vincent Lefevre / mtk

Clarify utimes() behaviour when 'times' is NULL.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=431480>

mtk

Other minor clarifications of description of utimes().

copysign.3

Vincent Lefevre

s/sign/sign bit/ to remove ambiguity in description.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=435415>

eidaccess.3

mtk

Changed NOTES to VERSIONS.

ffsl.3

mtk

Add ffsl and ffsll to NAME line.

fts.3

mtk

Removed statement that fts functions are expected to appear soon in POSIX; it's years old and has not yet come to pass.

ftw.3

mtk / Geoff Clare

Fixes/improvements for example program.

getdate.3

mtk

Add getdate_r to NAME section.

getaddrinfo.3

mtk / Geoff Clare

Fixes/improvements for example program.

gethostbyaddr.3

Mats Wichmann

Add documentation for gethostbyaddr_r().

Plus a few other small fixes.

gethostbyname.3

mtk

Add gethostbyname2, gethostbyname2_r, gethostbyname_r,
gethostent_r to NAME line.

getmntent.3

mtk

Fix misnamed function references.

getopt.3

Jon Burgess

Fix small error in example program.

getrpcent.3

mtk

Add setrpcent and endrpcent to NAME line.

gsignal.3

Aleksandr Koltsoff

Fix gsignal() prototype.

hsearch.3

mtk

Add hcreate_r, hdestroy_r, hsearch_r to NAME line.

inet.3

Maxime Bizon

Correct definition of "struct in_addr".

isatty.3

mtk

Minor wording fix.

isgreater.3

mtk

Add islessequal to NAME line.

lgamma.3

Vincent Lefevre

Fix CONFORMING TO section.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=417592>

log1p.3

mtk

Add log1pf and log1pl to NAME line.

longjmp.3

Paul Brook / mtk

After a call to longjmp(), the values of modified, non-volatile variables in the function that called setjmp() are unspecified.

makecontext.3

Aleksandr Koltsoff

Fix makecontext() prototype.

malloc.3

mtk / Tolga Dalman

Explain what happens for malloc(0), or calloc() where one of the arguments is 0.

mtk

Added notes on malloc()'s use of sbrk() and mmap().

mtk

Add mmap(2), alloca(3) to SEE ALSO.

mq_close.3

mq_getattr.3

mq_notify.3

mq_open.3

mq_receive.3

mq_send.3

mq_unlink.3

mtk

Add "Link with -lrt." to SYNOPSIS.

opendir.3

Ulrich Drepper; some edits and additional text by mtk

Document fdopendir().

readdir.3

mtk, after a note by Andi Kleen

Document DT_* constants for d_type.

Ulrich Drepper / mtk

Rework discussion of non-standard structure fields.

sem_wait.3

mtk

Minor improvements to example program.

syslog.3

mtk

Add vsyslog to NAME section.

termios.3

Nicolas François

Fix XCASE feature test macro description.

wcsspn.3

Aleksandr Koltsoff

Add return type to prototype.

proc.5

mtk

Improve description of num_threads field under /proc/PID/stat.

Maxime Vaudequin

Fix path error (s%proc/sys%proc/sys/kernel%) in mentions of /proc/sys/ostype, /proc/sys/osrelease and proc/sys/version.

Maxime Vaudequin

I noticed things to correct and to clarify in subsection

"/proc/filesystems" of proc.5:

- clarify filesystems listing: not only FS compiled into the kernel, also FS kernel modules currently loaded
- add a reference to fs(5)
- add an explanation for FS marked with "nodev"
- s/mount(1)/mount(8)/, also corrected in section "SEE ALSO"
- clarify usage by mount: the current wording may lead to think /proc/filesystems is always used by mount when no FS is specified. So, usage of "may" which IMHO is more appropriate + additional explanations

In mount(8) we can see:

If no -t option is given, or if the auto type is specified, mount will try to guess the desired type.

If mount was compiled with the blkid library, the guessing is done by this library. Otherwise, mount guesses itself by probing the superblock; if that does not turn up anything that looks familiar,

mount will try to read the file /etc/filesystems, or, if that does not exist, /proc/filesystems. All of the filesystem types listed there will be tried, except for those that are labeled "nodev" (e.g., devpts, proc and nfs). If /etc/filesystems ends in a line with a single * only, mount will read /proc/filesystems afterwards.

Samuel Thibault

Since linux 2.6.11, /proc/stat has an eighth value for cpu lines: stolen time, which is the time spent in other operating systems when running in a virtualized environment.

arp.7

Updated BUGS text referring to jiffies; refer to time.7 instead.

credentials.7

mtk

Add words to note that file system ID is Linux specific.

hier.7

Maxime Vaudequin

This is some corrections for hier.7:

- missing period for /media and /mnt
- /mnt description is not totally correct, it is true for some distributions but in others /mnt is used as a temporary FS mount point, as it is specified by FHS:
<http://www.pathname.com/fhs/pub/fhs-2.3.html#MNTMOUNTPOINTFORATEMPORARILYMOUNT>
- s/X-Windows/X-Window/ (3 occurrences)
- section "SEE ALSO": s/mount(1)/mount(8)/

man-pages.7

man.7

mdoc.7

mdoc.samples.7

mtk / Nicolas François

Nowadays tmac.XXX are called XXX.tmac.

pthreads.7

mtk

Update text about modern threading implementations (NPTL vs LinuxThreads).

socket.7

mtk, after a note by Andi Kleen

Clarify that SO_SNDTIMEO and SO_RCVTIMEO only have effect for socket I/O calls; not for multiplexing system calls like select() and poll().

time.7

mtk

Add SEE ALSO reference to new timeradd.3.

=====
===== Changes in man-pages-2.66 =====
=====

Released: 2007-10-01

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Amit K. Arora <aarora@linux.vnet.ibm.com>

David Chinner <dgc@sgi.com>

Fredrik Noring <noring@nocrew.org>

Mats Wichmann <mats.d.wichmann@intel.com>

Maxime Vaudequin <maxime.vaudequin@gmail.com>

Ollie Wild <aaw@google.com>

Ulrich Drepper <drepper@redhat.com>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several places.

New pages

fallocate.2

David Chinner, with some input from Amit Amora and mtk

Describes the fallocate() system call, new in 2.6.23.

Changes to individual pages

close.2

Fredrik Noring

Add text cautioning about use of close() in

multithreaded programs.

execve.2

Ollie Wild / mtk

Add text describing limit on total size of argv + envp,
and changes that occurred with 2.6.23.

mtk

Add getopt(3) to SEE ALSO list.

open.2

mtk, Acked by Ulrich Drepper

Added description of O_CLOEXEC (new in 2.6.23) + other
minor fixes for O_DIRECT.

recv.2

mtk

Added description of MSG_CMSG_CLOEXEC (new in 2.6.23).

sysctl.2

mtk

Strengthened the warning against using this system call
and note that it may disappear in a future kernel version.

rpc.3

Mats Wichmann

Fix type definition for 'protocol' in prototypes of pmap_set()
and pmap_getport().

==== Changes in man-pages-2.67 =====

Released: 2007-10-08

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>

Andrew Josey <a.josey@opengroup.org>

Maxime Vaudequin <maxime.vaudequin@gmail.com>

Apologies if I missed anyone!

Global changes

*.1p

*.3p

mtk, after a note by Andi Kleen and consultation with Andrew Josey.

Add a PROLOG section:

This manual page is part of the POSIX Programmer's Manual.

The Linux implementation of this interface may differ

(consult the corresponding Linux manual page for details

of Linux behavior), or the interface may not be implemented

on Linux.

*.0p

*.1p

*.3p

mtk

Some formatting fixes, mostly to get rid of unwanted

spaces before "," in formatted output.

*

/

mtk

Change all occurrences of my email address in man-pages source

to my new gmail address.

Many many pages

Maxime Vaudequin

I noticed useless use of macros with alternating formatting

("`.IR`" instead "`.I`" which suffices, "`.BR`" instead "`.B`", etc.)

because there is only one element. For example in `ldconfig.8`:

```
-.BR /sbin/ldconfig
```

```
+.B /sbin/ldconfig
```

This is not very important, it only makes the sources more tidy.

To find these I used:

```
egrep '\.(B[RI]|R[IB]|I[RB]) ([^ ]+|\("[^"]\|"+")$'
```

And if you want to make these changes, you can use:

```
sed 's/^\(.\[BRI]\)\[BRI]\( ([^ ]+|\("[^"]\|"+")\)$\1\2/g'
```

==== Changes in man-pages-2.68 =====

fchmodat.2
fchownat.2
fstatat.2
futimesat.2
linkat.2
mkdirat.2
mknodat.2
readlinkat.2
renameat.2
symlinkat.2
mkfifoat.3
mtk, after <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=445436>
by Timo Juhani Lindfors
Added <fcntl.h> to SYNOPSIS.

Typographical or grammatical errors have been corrected in several places.

New pages

_syscall.2

mtk

Created as a new page, by taking the content specific to the _syscall() macros from intro(2).

Changes to individual pages

README

mtk

Brought up to date.

man-pages-*-Announce

mtk

Brought the info in here up to date.

intro.1

mtk

Added intro paragraph about section, plus a paragraph about exit status values.

Move "user intro" text to NOTES.

get_mempolicy.2

mtk

Reorder ERRORS sections alphabetically

intro.2

mtk

Pretty much a complete rewrite, covering some additional topics.

Moved _syscallN() material to new _syscall(2) page.

mbind.2

mtk

Reorder ERRORS sections alphabetically

mmap.2

Maxime Vaudequin

Fix syntax error in example program.

prctl.2

mtk

Linux 2.6.22 added support on Alpha for PR_SET_UNALIGN.

ptrace.2

Nicolas François / mtk

s/PTRACE_POKEUSR/PTRACE_POKEUSER/
s/PTRACE_PEEKUSR/PTRACE_PEEKUSER/

read.2

mtk / Geoff Clare

Add text describing timerfd EINVAL error for read(2).

set_mempolicy.2

mtk

Reorder ERRORS sections alphabetically

syscall.2

mtk

Added _syscall(2) and intro(2) to SEE ALSO section.

syscalls.2

mtk

Added fallocate(2); removed timerfd(2).

sysinfo.2

mtk

Removed reference to example in intro(2).

dlopen.3

mtk

Added "Link with -ldl." to SYNOPSIS.

getaddrinfo.3

Ulrich Drepper / mtk

Remove references to getipnodebyname.3 and getipnodebyaddr.3.

gethostbyname.3

mtk / Ulrich Drepper

Remove SEE ALSO references to getipnodebyname.3 and
getipnodebyaddr.3.

Pádraig Brady / mtk / Ulrich Drepper

Point out that the functions described on this page
are made obsolete by getaddrinfo(3) and getnameinfo(3).

getipnodebyname.3

mtk

Clarify that glibc does not implement these functions.

glob.3

Ulrich Drepper / mtk

Fix description of GLOB_ONLYDIR.

mtk

Added description of GLOB_TILDE_NOMATCH.

Expanded the description of various flags.

Various wording fixes..

intro.3

mtk

Pretty much a complete rewrite, covering some additional topics.

posix_fallocate.3

mtk

Add SEE ALSO referring to fallocate.2.

rpc.3

Sam Varshavchik

Add some arg declarations to prototypes; fix typos.

setbuf.3

Mike Frysinger

Fix text in BUGS section.

sigset.3

mtk

The sigset() bugs were fixed in glibc 2.5.

See http://sourceware.org/bugzilla/show_bug.cgi?id=1951

intro.4

mtk

Minor rewrites.

st.4

Maxime Vaudequin

Various small corrections, formatings and modifications.

elf.5

Mike Frysinger

Document:

- new p_flag: PT_GNU_STACK

- new sections: .gnu.version .gnu.version_d .gnu.version_r
.note.GNU-stack

- new structures: ElfN_Verdef ElfN_Verdaux ElfN_Verneed
ElfN_Vernaux

intro.5

mtk

Minor rewrites.

proc.5

Ivana Varekova / mtk

Add text noting that since kernel 2.6.16, /proc/slabinfo is only available if CONFIG_SLAB is enabled.

Maxime Vaudequin

Update description of /proc/pci.

Maxime Vaudequin

Give italic formatting to file names in proc.5.

mtk

The display type of the /proc/PID/stat fields changed

%lu to %u in Linux 2.6.22:

flags

rt_priority

policy

slabinfo.5

Ivana Varekova / mtk

Add text noting that since kernel 2.6.16, /proc/slabinfo is only available if CONFIG_SLAB is enabled.

intro.6

mtk

Minor rewrites.

bootparam.7

Maxime Vaudequin

Update references to files in kernel "Documentation" directory.

intro.7

mtk

Minor rewrites.

ipv6.7

Andrew McDonald

Fix description of IPV6_ROUTER_ALERT option.

standards.7

mtk

Note online location of C99 standard.

intro.8

mtk

Some rewrites, plus new paragraph on exit status values.

==== Changes in man-pages-2.69 =====

Released: 2007-12-03

Maxime Vaudequin <maxime.vaudequin@gmail.com>
Mike Frylinger <vapier@gentoo.org>
Reuben Thomas <rrt@sc3d.org>
Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

Global changes

*.[013]p

mtk

Many whitespace clean-ups in formatted output.

mprotect.2

bind.2

mq_notify.3

makecontext.3

fmemopen.3

David Härdeman / mtk

Rename error handling function in example program

(s/die/handle_error/).

Typographical or grammatical errors have been corrected in several places.

Removed pages

HOWTOHELP

MAINTAINING

mtk

The content of these files is now available in HTML format.

New links

cfsetpspeed.3

mtk

Link to termios.3.

Changes to individual pages

time.1

Alain Portal

Added "Linux User's Manual" to .TH line.

_syscall.2

aeb / mtk

Remove outdated text about pointer blocks for syscalls that have more than 5 arguments.

fcntl.2

J. Bruce Fields

Add warning that mandatory locking is unreliable.

J. Bruce Fields

Clarify details in description of file leases.

J. Bruce Fields / mtk

Minor wording edits.

J. Bruce Fields

Add F_GETLEASE under RETURN VALUE.

mmap.2

mtk

Handle errors using a custom handle_error() macro.

sched_setscheduler.2

Mats Wichmann

Add BUGS text noting that the return value from Linux sched_setschuler() does not conform to POSIX.

spu_create.2

Jeremy Kerr

Various updates and improvements.

Luke Browning

Refinement of text describing a "gang".

mtk

Minor edits.

spu_run.2

Jeremy Kerr

Various updates and improvements.

mtk

Minor edits.

err.3

mtk

Remove HISTORY section.

fopen.3

Mike Frysinger

Document 'e' (close-on-exec) option, new in glibc 2.7.

getloadavg.3

Alain Portal / mtk

Remove HISTORY section.

printf.3

Andries E. Brouwer / mtk

Fix the discussion of stdarg macros in the description of vprintf() description.

sem_wait.3

mtk

Handle errors using a custom handle_error() macro.

sigsetops.3

Mats Wichmann

Note that sigset_t objects must be initialized with sigemptyset() or sigfillset() before the other macros are employed.

termios.3

mtk, after a note by Alain Portal

Added cfsetpspeed() to SYNOPSIS. Added text under CONFORMING TO noting that cfsetpspeed() is BSD specific.

ttyslot.3

Alain Portal

Various references to "getty" were changed to "mingetty", since that is the manual page more likely to be found on current systems. (Completes changes that were made in man-pages-2.44.)

initrd.4

mtk, after a note by Alain Portal

Move "Configuration" section to top of page (like other section 4 pages) and make it a .SH section.

full.4

mtk

Re-ordered CONFIGURATION section to go before DESCRIPTION.

sk98lin.4

Maxime Vaudequin

Fix reference to kernel Documentation file.

elf.5

mtk

Renamed HISTORY section to NOTES, and removed BSD specific info.

proc.5

Maxime Vaudequin

Mention grub(8) in same sentence as lilo(8).

Maxime Vaudequin

Improve description of /proc/sys/abi and
/proc/sys/kernel/modprobe.

utmp.5

Alain Portal

Various references to "getty" were changed to "mingetty", since that is the manual page more likely to be found on current systems. (Completes changes that were made in man-pages-2.44.)

iso_8859-2.7

Adam Borowski

Reverse the 2.68 change applied by mtk in response to <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=445085> that replaced "Sorbian" with "Serbian".
(Sorbian is a language of 50000 people in Brandenburg.)

man-pages.7

mtk

Added CONFIGURATION to list of "standard" section names.

spufs.7

Jeremy Kerr

Various updates and improvements.

mtk

Minor edits.

tcp.7

Maxime Vaudequin

Fix reference to kernel Documentation file.

Released: 2007-12-06

Global changes

Many pages

mtk

Remove section numbers for page references where the reference refers to the page itself. (This stops man2html producing links from a page back to itself.)

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

get_mempolicy.2

mtk

Add CONFORMING TO section.

io_getevents.2

mtk

Remove redundant SEE ALSO entry.

mbind.2

mtk

Add CONFORMING TO section.

msgop.2

mtk

Remove redundant SEE ALSO entries.

sigprocmask.2

mtk

Remove redundant SEE ALSO entry.

splice.2

mtk

Remove redundant SEE ALSO entry.
Add SEE ALSO referring to vmsplice(2).

csin.3

mtk

Remove redundant SEE ALSO entry.

Add SEE ALSO referring to ccos(3).

gethostbyname.3

mtk

Add gethostbyaddr_r to NAME section.

rint.3

mtk

Remove redundant SEE ALSO entry.

sigsetops.3

mtk

Minor rewording.

epoll.7

mtk

Minor rewording.

===== Changes in man-pages-2.71 =====

Released: 2007-12-14

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>

John Sigler <linux.kernel@free.fr>

Josh Triplett <josh@freedesktop.org>

Mats Wichmann <mats.d.wichmann@intel.com>

Pascal MALAISE <malaise@magic.fr>

Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

Global changes

err.3

fts.3

getloadavg.3

queue.3

rcmd.3

rexec.3

stdin.3

elf.5

operator.7

mtk

Replaced the use of mdoc macros on these pages with man macros. The only pages in man-pages that still use mdoc macros are mdoc.7 and mdoc.samples.7.

Typographical or grammatical errors have been corrected in several places.

Deleted pages

TODO

mtk

This information is now on the website.

Changes to individual pages

Changes.old

mtk

Reformat various change log entries to use a consistent format.
Expand Debian bug report numbers to be URLs.
Other minor tidy-ups.

fcntl.2

mtk

Document the F_DUPFD_CLOEXEC operation, which is new in kernel 2.6.24.

listen.2

Josh Triplett

Fix incorrect path for somaxconn.

getpw.3

Alain PORTAL

Add ENOENT error to ERRORS.

sysconf.3

Mats Wichmann

Add documentation of _SC_NPROCESSORS_CONF and _SC_NPROCESSORS_ONLN.

tty.4

John Sigler

Add tty_ioctl(4) to SEE ALSO list.

regex.7

Pascal MALAISE <malaise@magic.fr>

Separate text on back references from that describing basic regexps,
as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=379829>.

mtk

Remove crufty text about word boundaries.

===== Changes in man-pages-2.72 =====

Released: 2007-12-14

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>

Alex Tuninga <atuninga@google.com>

Bert Wesarg <bert.wesarg@googlemail.com>

Maxime Vaudequin <maxime.vaudequin@gmail.com>

Rob Weryk <rjweryk@uwo.ca>

Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

Global changes

Various pages

Alain PORTAL / mtk

Format include files consistently ("*.I* <.*\h>").

Various pages

Alain PORTAL / mtk

Format pathname in italics (*.I*).

dbopen.3

mpool.3

recno.3

Alain PORTAL

Remove brackets ([]) around error names.

console.4

tty.4

ttyS.4

issue.5

ttytype.5

utmp.5

mtk / Maxime Vaudequin

Some systems have mingetty(8), others have agetty(8), so both should be mentioned when we are talking about getty-style programs.

Typographical or grammatical errors have been corrected in several places.

Renamed pages

filesystems.5

mtk / Alain PORTAL

Was previously fs.5

New links

argz.3

Bert Wesarg / mtk

Link to argz_add.3.

envz.3

Bert Wesarg / mtk

Link to envz_add.3.

fs.5

mtk / Alain PORTAL

Link to filesystems.5.

Changes to individual pages

readahead.2

Rob Weryk

Fix declaration of 'offset' in SYNOPSIS.

seteuid.2

mtk

s/SETGUID/SETEUID/ in .TH line.

__setpucw.3

mtk

Fixed include files references / formatting.

abort.3

mtk, after a note by Alex Tuninga

A fairly significant rewrite to clarify operation of abort().

argz_add.3

Bert Wesarg / mtk

s/envz/envz_add/ in SEE ALSO.

basename.3

mtk

s/DIRNAME/BASENAME/ in .TH line, and swap function names in NAME section.

envz_add.3

Bert Wesarg / mtk

s/argz/argz_add/ in SEE ALSO.

flockfile.3

mtk

s/LOCKFILE/FLOCKFILE/ in .TH line.

getgrent_r.3

mtk

s/GETGREN/GETGREN_R/ in .TH line.

stdio.3

Sam Varshavchik

Reformat function list at end of page as a proper table.

ttyslot.3

Maxime Vaudequin

Revert earlier s/getty/mingetty/. This page talks about historical behavior, and that means "getty(8)".

undocumented.3

mtk

Remove reference to "obstack stuff"; it's not clear what that is about.

console_ioctl.4

mtk

s/CONSOLE_IOCTL/CONSOLE_IOCTL/ in .TH line.

proc.5
mtk
s/fs (5)/filesystems (5)/

man-pages.7
mtk / Alain PORTAL
Improve discussion of formatting of file names.

==== Changes in man-pages-2.73 =====

Released: 2007-12-14

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Pádraig Brady <P@draigBrady.com>
Reuben Thomas <rrt@sc3d.org>

Apologies if I missed anyone!

Global changes

Various pages

Alain PORTAL
Formatting fixes.

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

mknod.2

mtk, after a report by Reuben Thomas
Clarify use of mkfifo() versus mknod().
as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=455825>

fgetgrent.3

mtk
Small rewording.

fgetpwent.3

mtk

Small rewording.

rcmd.3

mtk

Noted feature test macro requirements.

BUGS: noted that iruserok() is not declared in glibc headers.

filesystems.5

mtk

Added Reiserfs, XFS, JFS to list of file systems.

==== Changes in man-pages-2.74 =====

Released: 2007-12-20

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>

Andrew Morton <akpm@linux-foundation.org>

David Brown <lkml@davidb.org>

Jeremy Kerr <jk@ozlabs.org>

Mats Wichmann <mats.d.wichmann@intel.com>

Sam Morris <sam@robots.org.uk>

Sam Varshavchik <mrsam@courier-mta.com>

Samuel Thibault <samuel.thibault@ens-lyon.org>

Apologies if I missed anyone!

Global changes

Various pages

Alain PORTAL

Formatting fixes.

Various pages

mtk / Alain Portal

s/^"..."/"..." /

Various pages

mtk

s/epoch/Epoch/

Various pages

mtk

Make the standard indent for code samples, shell session logs, etc. to be ".in +4n".

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

_syscall.2

mtk

Nowadays there is _syscall6() also.

chroot.2

mtk

Various minor formatting changes.

epoll_wait.2

mtk

Fix types in structs.
Formatting fixes.

mount.2

mtk, after a note by Sam Morris

Clarify that MS_NODIRATIME provides a subset of the functionality provided by MS_NOATIME.

sched_setaffinity.2

mtk

Minor rearrangement of text.

select_tut.2

mtk

Fix (my) typos in argument names.
Formatting fixes.

spu_create.2

Jeremy Kerr

We can use context FDs for the dirfd argument to the *at() syscalls.

times.2

mtk, after a note from David Brown and Andrew Morton

<http://marc.info/?l=linux-kernel&m=119447727031225&w=2>

Rework the text describing the return value to be closer to the requirements of POSIX.1; move Linux details to NOTES and add a warning not to rely on those details. Add a warning about the -1 to -4095 bug which results in a 41 second window where the glibc wrapper will wrongly return -1 indicating an error.

mtk

Remove cruft HZ text.

Clarify text describing return value of clock(3).

getw.3

Mats Wichmann

CONFORMING TO: getw() and putw() were in SUSv2, but are not in POSIX.1-2001.

hash.3

mtk / Alain Portal

Minor rewordings + formatting fixes.

st.4

Alain Portal / mtk

Many formatting fixes.

mtk

Place ERRORS in alphabetical order.

vcs.4

Samuel Thibault

Document VT_GETHIFONTMASK (new in 2.6.18) and add to example program; attribute/text characters are in the host byte order.

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=456437>

mtk

Minor edits.

bootparam.7

Alain PORTAL

Formatting fixes.

inotify.7

mtk

Minor heading changes and reformattings.

man-pages.7

mtk

Note that code segments, structure definitions, shell session logs, should be indented by 4 spaces.

spufs.7

Jeremy Kerr

Add a little information about the differences to mbox.

==== Changes in man-pages-2.75 =====

Released: 2008-01-08

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>

Andi Kleen <ak@suse.de>

Andreas Henriksson <andreas@fatal.se>

Jeremy Kerr <jk@ozlabs.org>

Justin Pryzby <jpryzby+d@quoinic.com>

Phil Endecott <spam_from_debian_bugs_4@chezphil.org>

Sam Varshavchik <mrsam@courier-mta.com>

Thomas Huriaux <thomas.huriaux@gmail.com>

Timo Sirainen <tss@iki.fi>

Trond Myklebust <trond.myklebust@fys.uio.no>

Apologies if I missed anyone!

Global changes

Various pages

mtk

(Grammatical) hyphenation was fixed in many places.

epoll_wait.2

mbind.2

spu_run.2

ecvt.3

fntmsg.3

getnameinfo.3

rtc.4

proc.5

charsets.7

ip.7

ipv6.7

raw.7

uri.7

Justin Pryzby / mtk

Fix incorrect usage of "a" and "an" before following vowel /
consonant, by reviewing the output of the following scripts:

```
for a in $(wc */*.? | awk '$1 > 10 {print $4}' | gv total); do
  echo $a
  MANWIDTH=4000 man -l $a 2>/dev/null |
  egrep '(^|)an [^aeiou][a-z]'
done | less
```

```
for a in $(wc */*.? | awk '$1 > 10 {print $4}' | gv total); do
  echo $a
  MANWIDTH=4000 man -l $a 2>/dev/null |
  egrep '(^|)a [aeiou][a-z]'
done | less
```

err.3

fts.3

queue.3

rcmd.3

rexec.3

stdin.3

elf.5

mtk, after a note by Alain Portal

Improve macros used in 2.71 to convert from "mdoc" to "man".

_exit.2

chroot.2

getgid.2

getpid.2

getrusage.2

getsid.2

gettid.2

mtk

Various reformattings.

Various pages

Alain Portal

Formatting fixes.

mlock.2

mprotect.2

mpool.3

offsetof.3

Alain Portal

Format SYNOPSIS in a manner consistent with other pages.

Various pages

mtk / Alain Portal

Format casts so that there is a non-breaking space after the type, and remove unnecessary parentheses around the casted value.

Thus, for example, the following:

```
.IR "(size_t) (\-1)" .
```

becomes:

```
.IR "(size_t)\ \-1" .
```

Various pages

mtk / Alain Portal

Replace "-" by "\-" where a real dash is required.

Various pages

mtk

Make the formatting of instances of '*varname' consistent, changing instances such as:

```
.RI * varname
```

to:

.I *varname

pciconfig_read.2
nfservctl.2

Remove extraneous .sp macros.

fcntl.2
outb.2
send.2
syscalls.2
getopt.3
proc.5
man-pages.7
standards.7
tcp.7
mtk

Remove/replace extraneous .sp macros.

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

_syscall.2
mtk

Nowadays there are seven macros (see 2.74 change log also).

arch_prctl.2

mtk, Acked by Andi Kleen

Clarify interpretation of 'addr'; plus a few other minor edits
and updates.

bind.2

mtk

Minor rewrites.

close.2

mtk

Clarify relationship between file descriptor and open file description.

connect.2

mtk, Acked by Andi Kleen

Since kernel 2.2, AF_UNSPEC for unconnecting a connected socket **is** supported.

execve.2

Alain Portal

Minor rewordings.

futimesat.2

Alain Portal

Remove duplicate "#include <fcntl.h>" from SYNOPSIS.

getgid.2

mtk

Add getresgid(2) and credentials(7) to SEE ALSO.

getpagesize.2

mtk

Small rewording.

getresuid.2

mtk

Rewrote various parts.

getuid.2

mtk

Add getresuid(2) and credentials(7) to SEE ALSO.

ioctl_list.2

Alain Portal

Use proper tables for layout, and various formatting fixes.

mtk

Various formatting fixes.

listen.2

mtk

Rewrote various parts.

mbind.2

Andi Kleen / mtk / Alain Portal

Modify explanation of EINVAL 'maxnode' error.

mmap.2

mtk

Add comma to clarify meaning of a sentence.

open.2

mtk

Clarify initial description of O_EXCL.

Clarify description of behaviors of O_CREAT | O_EXCL
for symbolic links.

Clarify text describing use of lockfiles without O_EXCL.

mtk, with input from Timo Sirainen and Trond Myklebust

O_EXCL is supported on NFSv3 and later, with Linux 2.6 and later.

pipe.2

mtk

Rename 'filedes' argument 'pipefd'.

pivot_root.2

mtk

s/cwd/current working directory/

seteuid.2

mtk

Minor changes.

setpgid.2

mtk

Add credentials(7) to SEE ALSO, and updated copyright credits,
to reflect my rewrite of a few months ago.

setsid.2

mtk

Add getsid(2) and credentials(7) to SEE ALSO.

spu_create.2

Alain Portal / mtk; acked by Jeremy Kerr

Minor formatting/wording changes.

mtk

Put EPERM in right alphabetical position in ERRORS list.

argz_add.3

mtk

Formatting fixes.

atexit.3

mtk

Minor changes to example program.

cerf.3

mtk

These functions are still not present as at glibc 2.7.

dbopen.3

Alain Portal / mtk

Various minor spelling and formatting fixes.

envz_add.3

mtk

Formatting fixes.

fexecve.3

mtk

Fix placement of feature test macro in SYNOPSIS.

fmax.3

fmin.3

mtk

Small rewording.

getline.3

mtk

Minor changes to example program.

getrpercent.3

getrpcport.3

mtk

Use modern C prototypes in SYNOPSIS.

getutent.3

Alain Portal / mtk

Formatting fixes.

mbsnrtowcs.3

mbsrtowcs.3

mbstowcs.3

mtk

Use .IP tags to create properly formatted lists.

rpc.3

mtk

Convert function declarations to use modern C prototypes.

Add text and start of page describing header files

and types required by functions.

Reformat discussion of request under `clnt_control()`.

xdr.3

mtk

Convert function declarations to use modern C prototypes.

Remove crufty "int empty" from `xdrrec_eof()` description.

console_codes.4

Phil Endecott

Relocate misplaced line:

"and if LF/NL (new line mode) is set also a carriage return;"

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=458338>.

console_ioctl.4

mtk

Formatting fixes.

bootparam.7

mtk, after a note by Alan Portal

Fix reference to kernel documentation source file in the

"The Sound Driver" subsection.

man-pages.7

Alain Portal

Move CONFIGURATION description after SYNOPSIS description.

mtk / Alain Portal

Note that header files should be surrounded by angle brackets (`<>`).

posixoptions.7

mtk

Minor formatting and wording fixes.

rtnetlink.7

Andreas Henriksson

Fix description of `RTM_F_EQUALIZE`.

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=458325>.

signal.7

mtk

Minor formatting and wording fixes.

socket.7

mtk

Small rewording of discussion of `O_ASYNC`.

spufs.7

mtk / Jeremy Kerr / Alain Portal

s/SPE/SPU/

===== Changes in man-pages-2.76 =====

Released: 2008-01-14

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Carlo Marcelo Arenas Belon <carenas@sajinet.com.pe>
Jeremy Kerr <jk@ozlabs.org>
Sam Varshavchik <mrsam@courier-mta.com>
Trond Myklebust <trond.myklebust@fys.uio.no>

Apologies if I missed anyone!

Global changes

longjmp.3
printf.3
scanf.3
setbuf.3
setjmp.3
sk98lin.4
environ.7
 mtk
 Rework/remove use of ".ad" macros.

ioctl_list.2
mlock.2
mprotect.2
mremap.2
syslog.2
cfree.3
mpool.3
offsetof.3
rpc.3
stdin.3
 mtk
 Fix unbalanced quotes in formatting macros.

ftok.3

mtk

s/i-node/inode/, for consistency with other pages and POSIX.1-2001.

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

chown.2

mtk

Minor wording change.

dup.2

mtk

Reordered text in DESCRIPTION and added some details for dup2().

open.2

Trond Myklebust / mtk

Minor fix to O_EXCL changes in previous release.

gettid.2

mtk

Rewrote DESCRIPTION; noted that thread ID is not the same thing as a POSIX thread ID.

pipe.2

mtk

Rewrote DESCRIPTION; minor additions to EXAMPLE text.

umask.2

mtk

A few rewrites and additions.

strptime.3

Carlo Marcelo Arenas Belon / mtk

Add "#define _XOPEN_SOURCE" to example program.

initrd.4

mtk

Use quotes more consistently in formatting macros.

random.4

mtk, after a report by Daniel Kahn Gilmor

Add 2.6 details for /proc/sys/kernel/random/poolsize.

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=459232>.

pthread.7

mtk

Minor changes.

spufs.7

mtk / Jeremy Kerr

Define abbreviation "MSS".

==== Changes in man-pages-2.77 =====

Released: 2008-01-31

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Pavel Heimlich <tropikhajma@seznam.cz>

Phil Endecott <phil_vonar_endecott@chezphil.org>

Thomas Huriaux <thomas.huriaux@gmail.com>

Vincent Lefevre <vincent@vinc17.org>

WANG Cong <xiyou.wangcong@gmail.com>

Apologies if I missed anyone!

Global changes

stdarg.3

bootparam.7

Thomas Huriaux

Fix broken use of single quotes at start of line,

as per: <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=462636>

Typographical or grammatical errors have been corrected in several places.

New pages

remove_COLOPHON.sh

mtk

Script to remove the COLOPHON section from the man pages provided as command-line arguments. This is useful to remove the COLOPHON sections from all of the man pages in two different release trees

in order to do a "diff -ruN" to see the "real" differences between the trees.

Changes to individual pages

fcntl.2

mtk

Replace tables with .TP macros.

fork.2

mtk

Added discussion of directory streams.

Removed "#include <sys/types>" from SYNOPSIS.

Changed authorship notice.

futex.2

mtk

Add ENOSYS error to errors.

Phil Endecott

Explicitly describe return value in the event of an error.

inotify_add_watch.2

mtk

Minor wording changes.

splice.2

WANG Cong

Fix types for 2 and 4 arguments in splice prototype.

wait.2

Phil Endecott

Clarify description of return value for WNOHANG.

tkill.2

mtk

Rewrote DESCRIPTION; emphasized that tkill() is obsoleted by tkill().

alloca.3

mtk

Change description in NAME section.

Various rewrites and additions (including notes on longjmp() and SIGSEGV).

mtk / Vincent Lefevre

Weaken warning against use of alloca(), and point out some cases where it can be useful;

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=461100>.

bootparam.7

Pavel Heimlich

Remove junk line.

inotify.7

mtk

Replace tables with .TP macros.

s/MultiSource Synchronization/MultiSource Synchronization (MSS)/

===== Changes in man-pages-2.78 =====

Released: 2008-02-15

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Davide Libenzi <davidel@xmailserver.org>

Greg Banks <gnb@melbourne.sgi.com>

Michael Tokarev <mjt@tls.msk.ru>

Phil Endecott <phil_vonar_endecott@chezphil.org>

Apologies if I missed anyone!

Global changes

sigaction.2

signal.2

sigwaitinfo.2

signal.7

mtk

Add SEE ALSO entry referring to new signalfd.2 page.

Typographical or grammatical errors have been corrected in several places.

New pages

eventfd.2

mtk, with input and review from Davide Libenzi
Documents the eventfd() system call, new in 2.6.22.

signalfd.2

mtk, with input and review from Davide Libenzi
Documents the signalfd() system call, new in 2.6.22.

Changes to individual pages

futex.2

mtk / Phil Endecott
Improve wording describing error returns.

open.2

Greg Banks
Greatly expand the detail on O_DIRECT.

reboot.2

mtk / Michael Tokarev
Fix RETURN VALUE description: in some cases reboot() does not return.

mtk

Rename the 'flag' argument to 'cmd', since that is more meaningful, and also what is used in the kernel source.
Other minor wording changes.

mtk
Links to eventfd.2.

Changes to individual pages

Makefile

aeb
Remove code relating to man1/README, which no longer exists.

execve.2

mtk
Clarify detail of RLIMIT_STACK/4 limit for argv+environ.

getitimer.2

mtk

Added SEE ALSO entry referring to timerfd_create.2.

getrusage.2

mtk

Minor rewordings.

open.2

Michael Haardt

Move discussion of 'mode' argument under description of O_CREAT.

signalfd.2

mtk

Fix type for 'ssi_ptr' field.

See <http://sources.redhat.com/ml/libc-hacker/2008-01/msg00002.html>.

syscalls.2

mtk

Add timerfd_create(), timerfd_settime(), and timerfd_gettime() to list.

syslog.2

Jeremy Kerr

Add info on command type 10.

Add details on types 6, 7, 8, and 9.

Minor grammar fix.

mtk

Update LOG_BUF_LEN details.

Update RETURN VALUE section.

Notes capability requirements under EPERM error.

Minor fix to description of type==3 and type==4.

Other minor edits.

ctime.3

Walter Harms

Note that POSIX requires localtime() to act as though tzset() was called, but localtime_r() does not have the same requirement.

See also <http://thread.gmane.org/gmane.comp.time.tz/2034/>

getaddrinfo.3

mtk

Clarify discussion of NULL 'hints' argument; other minor rewrites.

mtk / Sam Varshavchik

Remove some duplicated text.

malloc.3

Lasse Kärkkäinen / Mike Frysinger / mtk

Clarify description of realloc() behavior for
((size == 0) && (ptr != NULL)).

posix_fallocate.3

Samuel Thibault

s/stdlib.h/fcntl.h/ in SYNOPSIS.

proc.5

Fernando Luis Vázquez Cao

Update /proc/[number]/cmdline description.

It used to be true that the command line arguments were
not accessible when the process had been swapped out.

In ancient kernels (circa 2.0.*) the problem was that the
kernel relied on get_phys_addr to access the user space buffer,
which stopped working as soon as the process was swapped out.
Recent kernels use get_user_pages for the same purpose and thus
they should not have that limitation.

epoll.7

Davide Libenzi / mtk

Clarify the somewhat unintuitive behavior that occurs if a file
descriptor in an epoll set is closed while other file descriptors
referring to the same underlying open file description remain
open.

See also <http://thread.gmane.org/gmane.linux.kernel/596462/>.

mtk

Clarify error that occurs if we add an epoll fd to its own set.

mtk

A few minor rewordings.

mtk, after a note by Chris Heath

Rework Q1/A1, describing what happens when adding the same
file descriptor twice to an epoll set, and when adding duplicate
file descriptors to the same epoll set.

Heikki Orsila / mtk / Davide Libenzi

Clarify Q9/A9 to discuss packet/token-oriented files.

mtk, after comments by Davide Libenzi and Chris Heath

Added Q0/A0, making explicit that the key for items in an epoll
set is [file descriptor, open file description].

mtk, after a note by Ron Burk

Change A3, to note that when events are available,
the epoll file descriptor will indicate as being readable.

mtk

Add some further explanation to Q5/A5 about why an epoll file
descriptor cannot be passed across a Unix domain socket.

posixoptions.7

mtk

Add SEE ALSO entry for standards(7).

regex.7

mtk

Add grep(1) to SEE ALSO.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=348552>.

standards.7

mtk

Add SEE ALSO entry for posixoptions(7).

time.7

mtk

Added SEE ALSO entry referring to timerfd_create.2.

===== Changes in man-pages-2.80 =====

Released: 2008-06-05

Tim Stoakes <tim@stoakes.net>
Timothy Baldwin <T.E.Baldwin99@members.leeds.ac.uk>
Tolga Dalman <tdalman@project-psi.org>

Apologies if I missed anyone!

Global changes

bdflush.2
inotify_add_watch.2
mprotect.2
sigprocmask.2
ctime.3
getusershell.3
setbuf.3
st.4
ip.7
packet.7

mtk

Replace "(il)legal" by "(not) permitted" or "(in)valid".

read.2
utime.2
filesystems.5
packet.7

mtk

s/time stamp/timestamp/, for consistency with majority use
in other pages, and in POSIX.1.

madvise.2
mbind.2
mincore.2
mmap.2
mmap2.2
msync.2
remap_file_pages.2

mtk

Change name of 'start' argument to 'addr' for consistency
with:

- * other memory-related interfaces
- * POSIX specification (for those interfaces in POSIX)

* Linux and glibc source code (in at least some cases)

Various pages

mtk

s/filesystem/file system/, for consistency with majority use
in other pages, and in POSIX.1.

Various pages

mtk

s/zeros/zeros/, for consistency with majority use
in other pages, and in POSIX.1.

abs.3

proc.5

mtk

s/builtin/built-in/, for consistency with majority use
in other pages, and in POSIX.1.

mknod.2

ftw.3

mtk

s/normal file/regular file/

Various pages

mtk

s/nonempty/non-empty/

Various pages

mtk

s/nonzero/non-zero/

Various pages

mtk

s/realtime/real-time/, for consistency with majority usage.

Various pages

mtk

s/command line/command-line/ when used attributively.

Various pages

mtk

Use "run time" when non-attributive, "run-time" when attributive.

Various pages

mtk

Various pages that I wrote carried a slightly modified version
of the "verbatim" license. In the interests of minimizing
license proliferation, I've reverted the modified form

so that the license is exactly the same as on other pages
carrying the verbatim license.

epoll_ctl.2

getitimer.2

getrlimit.2

unix.7

mtk

s/since kernel x.y.z/since Linux x.y.z/

wait.2

inotify.7

mtk

Reformat kernel version information for flags.

Typographical or grammatical errors have been corrected in several places.
(Special thanks to Nicolas François.)

New pages

random_r.3

mtk, after a suggestion by aeb

Documents [random_r\(3\)](#), [srandom_r\(3\)](#), [initstate_r\(3\)](#), and
[setstate_r\(3\)](#), which are the reentrant equivalents of
[random\(3\)](#), [srandom\(3\)](#), [initstate\(3\)](#), and [setstate\(3\)](#).

New links

lutimes.3

mtk

Link to [futimes.3](#).

[initstate_r.3](#)

[setstate_r.3](#)

[srandom_r.3](#)

mtk

Links to [random_r.3](#).

[daylight.3](#)

[timezone.3](#)

[tzname.3](#)

mtk

Links to [tzset.3](#).

isnanf.3

isnanl.3

mtk

Links to finite.3.

encrypt_r.3

setkey_r.3

mtk

Links to encrypt.3.

Changes to individual pages

clone.2

mtk

Added note that CLONE_STOPPED (which no-one uses anyway) is now deprecated.

epoll_create.2

mtk

Add NOTES section pointing out that 'size' argument is unused since kernel 2.6.8.

epoll_ctl.2

mtk

Added portability note to BUGS text for EPOLL_CTL_DEL.

epoll_wait.2

mtk

If the 'sigmask' is NULL, then epoll_pwait() is equivalent to epoll_wait().

fork.2

mtk

NOTES: since glibc 2.3.3, the glibc NPTL fork() wrapper bypasses the fork() system call to invoke clone() with flags providing equivalent functionality.

futex.2

mtk, after a note from Adrian Bunk

FUTEX_FD has been removed, as of kernel 2.6.26.

futimesat.2

mtk

Note that this system call is made obsolete by utimensat(2).

getgroups.2

Petter Reinholdtsen

SEE ALSO: Add getgrouplist(3).

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=479284>.

mtk

NGROUPS_MAX increased in kernel 2.6.4.

SEE ALSO: Add credentials(7).

mtk

Reformat DESCRIPTION and RETURN VALUE sections to be more consistent with man-pages style.

Add some more detail to descriptions of system calls.

Clarified what happens if caller of getgroups() is a member of more than 'size' supplementary groups.

ERRORS: Add ENOMEM.

getpriority.2

mtk, after a note from Ingo Molnar

Add text in NOTES about the punchier effect of nice values in kernel 2.6.23 and later.

Add Documentation/scheduler/sched-nice-design.txt to SEE ALSO list.

gettid.2

mtk

Added VERSIONS section noting that this system call first appeared in 2.4.11.

kill.2

Marty Leisner / mtk

Add text explicitly noting that sig==0 can be used to check for the existence of a PID or PGID.

mtk

A few minor rewordings.

mbind.2

mtk

The location of the numactl package has changed.

mmap.2

mtk

Added some .SS headings to make structure of page a little more obvious.

mtk, with input from Nick Piggin

MAP_POPULATE supports both file and anonymous mappings.

Since 2.6.23, MAP_POPULATE supports private mappings.

Since 2.6.23, MAP_NONBLOCK causes MAP_POPULATE to be a no-op.

mtk

NOTES: Added details on mapping address that is selected by kernel when MAP_FIXED is / isn't specified.

mount.2

mtk

The MS_REMOUNT changes in 2.4 were at 2.4.10 (not 2.4).

mtk

Minor wording change.

msgctl.2

mtk

Clarify that "unused" fields in msginfo structure are "unused within the kernel".

msginfo.msgpool is measured in kilobytes, not bytes.

Minor rewordings in comments for msginfo structure.

msgop.2

mtk

Various minor rewordings and restructurings for clarity.

mtk, after a note from Reuben Thomas

Remove "msgop" from NAME section.

mkdir.2

mtk

Clarify meaning of "BSD group semantics".

SEE ALSO: add chown(2).

mknod.2

mtk

SEE ALSO: add chown(2) and chmod(2).

mmap.2

mtk

SEE ALSO: add mprotect(2) and shmat(2).

mprotect.2

Hamaji Shinichiro

SYNOPSIS: s/size_t *len/size_t len/

open.2

mtk

Note that O_CLOEXEC should be in the next POSIX.1 revision.

mtk

More than just ext2 supports "mount -o bsdgroups" nowadays, so make the discussion about group ownership of new files a bit more generic.

mtk

SEE ALSO: add chown(2) and chmod(2).

poll.2

mtk

If the 'sigmask' is NULL, then ppoll() is equivalent to poll() with respect to signal mask manipulations.

posix_fadvise.2

mtk

s/posix_madvise (2)/posix_madvise (3)/;

(The referred-to page still doesn't exist yet, but hopefully will do sometime soon.)

ptrace.2

Anoop, Acked by Roland McGrath.

Re PTRACE_PEEKUSER: the offsets and data returned might not match with the definition of struct user.

See also <http://lkml.org/lkml/2008/5/8/375>

recv.2

Felix Kater / mtk

Improve wording for EAGAIN error in discussion of MSG_DONTWAIT.

rmdir.2

Martin Pitt

POSIX.1 also allows EEXIST for the ENOTEMPTY error condition.

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=467552>.

sched_setscheduler.2

mtk, with input from Ingo Molnar

Add description of SCHED_IDLE policy (new in 2.6.23).

Tweak description of SCHED_BATCH.

Minor rewordings.

select_tut.2

Justin Pryzby

Various wording clean-ups.

semctl.2

mtk

Clarify that "unused" fields in seminfo structure are

"unused within the kernel".

Minor rewordings in comments for seminfo structure.

semop.2

Aurelien Gerome

Small fix in example code.

setpgid.2

mtk / Karsten Weiss

Clarify description of setpgid() a little.

shmctl.2

mtk

Clarify that "unused" fields in shminfo structure are "unused within the kernel".

Minor rewordings in comments for shminfo structure.

shmop.2

mtk, after a note from Reuben Thomas

Remove "shmop" from NAME section.

signalfd.2

mtk

Added BUGS text noting that before kernel 2.6.25, the ssi_int and ssi_ptr fields are not set.

Added comments describing fields in signalfd_siginfo structure.

Update field names in example program (s/signo/ssi_signo/).

Various small fixes, and remove duplicated sentence.

Minor edits to structure definition.

sigqueue.2

mtk

Added some comments to code in NOTES.

stat.2

mtk

Minor wording change.

symlink.2

mtk

SEE ALSO: add lchown(2).

sync_file_range.2

mtk / Andrew Morton

Remove statement that (SYNC_FILE_RANGE_WAIT_BEFORE | SYNC_FILE_RANGE_WRITE | SYNC_FILE_RANGE_WAIT_AFTER) is a traditional fdatsync(2) operation.

See https://bugzilla.mozilla.org/show_bug.cgi?id=421482 comments 129 to 131.

syscalls.2

mtk

This page is now up to date as at kernel 2.6.25.

syslog.2

mtk

Small tidy up of language relating to permissions/capabilities.

timerfd_create.2

mtk

Minor change to example program.

Minor wording change.

utime.2

Reuben Thomas

Remove unnecessary subheading for utimes().

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=477402>.

mtk

Change description in NAME line ("or" is not correct: these calls always change *both* timestamps).

CONFORMING TO: utimes() is in POSIX.1-2001.

mtk

Rename 'buf' argument of utime() to 'times' (like utimes()).

Clarify explanation of EACCES and EPERM errors.

Remove BUGS section, since it doesn't seem to add useful information.

Clarified discussion of capabilities, and noted that

CAP_DAC_OVERRIDE also has a role.

Other minor rewordings.

wait.2

mtk, after a note by Justin Pryzby

Add a sentence clarifying that even though the default disposition of SIGCHLD is "ignore", explicitly setting the disposition to SIG_IGN results in different treatment of zombies.

aio_cancel.3

aio_error.3

aio_fsync.3

aio_read.3

aio_return.3

aio_suspend.3

aio_write.3

Kevin O'Gorman <kogorman@csc.calpoly.edu>

Add "Link with -lrt" to SYNOPSIS.

backtrace.3

Nicolas François

s/backtrace_symbols/backtrace_symbols_fd/ in one sentence.

mtk

Fix bogus reference to variable 'strings': should be:

"the array of pointers".

ctime.3

mtk

Add warning under NOTES that asctime(), ctime(), gmtime(), and localtime() may each overwrite the static object returned by any

of the other calls.
Other minor edits.

dlopen.3

mtk

Add more detail to the description of the fields in the structure returned by dladdr().

fexecve.3

mtk

Clean up SYNOPSIS after work by cut-and-paste-Pete:
the necessary header file is <unistd.h> not <sys/time.h>!

futimes.3

mtk

Add documentation of lutimes(), which appeared in glibc 2.6.

mtk

Change description in NAME line ("or" is not correct: these calls always change *both* timestamps).

CONFORMING TO: futimes() did not come from 4.2BSD. (It came from FreeBSD; see the FreeBSD man page.)

getenv.3

mtk

Noted that caller must not modify returned value string.
Noted that getenv() is not reentrant: the buffer may be statically allocated and overwritten by later calls to getenv(), putenv(), setenv(), or unsetenv().
Other minor rewrites.

getgrent.3

Petter Reinholdtsen

SEE ALSO: Add getgrouplist(3).
as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=479284>.

gethostbyname.3

mtk

Add 'h_errno' to NAME list.

getopt.3

mtk

Add 'optarg', 'optind', 'opterr', and 'optopt' to NAME section.
Add subheading for getopt_long() and getopt_long_only() description.

getpt.3

mtk

Point out that this function should be avoided in favor of

posix_openpt().
Add ERRORS section referring to open(2).

getsubopt.3

Daniel Burr

SYNOPSIS: Fix declaration of valuep.

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=476672>.

malloc.3

mtk

RETURN VALUE: Note circumstances in which successful malloc() and calloc() can return NULL.

mq_open.3

mtk, after a note by Marty Leisner

Note that <fcntl.h> is needed for O_* constants and <sys/stat.h> is needed for 'mode' constants.

opendir.3

mtk

Describe treatment of close-on-exec flag by opendir() and fdopendir().

openpty.3

mtk

SEE ALSO: add ttyname(3).

raise.3

mtk / Timothy Baldwin

Clarify semantics of raise() when called from a multithreaded program.

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=476484>.

mtk

Rewrites and additions to various parts of the page.

rand.3

Tolga Dalman / aeb / mtk

Remove outdated warning in NOTES; encourage the use of random(3) instead.

Folkert van Heusden

Clarify wording describing range of values returned by rand().

random.3

aeb / mtk / Tolga Dalman

Recommend use of random_r(3) for multithreaded applications that need independent, reproducible sequences of random numbers.

Move references to "The Art of Computer Programming" and

"Numerical Recipes", formerly in rand(3), to this page.

Add drand48(93) to SEE ALSO list.

regex.3

Heikki Orsila

Clarify description of 'rm_eo' field.

sem_open.3

mtk, after a note by Marty Leisner

Note that <fcntl.h> is needed for O_* constants and <sys/stat.h> is needed for 'mode' constants.

sem_post.3

mtk

Added pointer to example in sem_wait(3).

sem_close.3

sem_destroy.3

sem_getvalue.3

sem_init.3

sem_open.3

sem_post.3

sem_unlink.3

sem_wait.3

mtk, after a note from Marty Leisner

Add text to SYNOPSIS noting the need to link with "-lrt" or "-pthread".

setenv.3

mtk

setenv() copies 'name' and 'value' (contrast with putenv()).

unsetenv() of a nonexistent variable does nothing and is considered successful.

Noted that setenv() and unsetenv() need not be reentrant.

shm_open.3

mtk, after a note by Marty Leisner

Note that <fcntl.h> is needed for O_* constants and <sys/stat.h> is needed for 'mode' constants.

undocumented.3

mtk

initstate_r(3), setkey_r(3), setstate_r(3) are now documented.

utmp.5

Nicolas François

Small rewording.

resolv.conf.5

Nicolas François

gethostname() is in Section 2, not section 3.

ascii.7

Stuart Brady

Fix rendering of ' (backtick) and apostrophe (') in tables

charsets.7

Nicolas François

[s/unicode.com/unicode.org/](https://unicode.com/unicode.org/)

credentials.7

mtk

NOTES: Pthreads requires that all threads share the same UIDs and GIDs. But the Linux kernel maintains separate UIDs and GIDs for every thread. NPTL does some work to ensure that credential changes by any thread are carried through to all POSIX threads in a process.

mtk

sysconf(_SC_NGROUPS_MAX) can be used to determine the number of supplementary groups that a process may belong to.

Clarify that supplementary group IDs are specified in POSIX.1-2001.

epoll.7

mtk, after a note from Sam Varshavchik

For answer A2, change "not recommended" to "careful programming may be required".

inotify.7

mtk

Document SIGIO feature (new in 2.6.25) for inotify file descriptors.

mtk

Note that select()/poll()/epoll_wait() indicate a ready inotify file descriptor as readable.

mtk

Document IN_ATTRIB in a little more detail.

pthread.7

Justin Pryzby

Grammar fix, plus fix typo in script.

mtk

Add list of thread-safe functions.

standards.7

mtk

Add a section on the upcoming POSIX revision.

ld.so.8

Justin Pryzby / mtk

Various wording improvements.

===== Changes in man-pages-3.00 =====

Released: 2008-06-12, Konolfingen

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>

Stuart Brady <sdb Brady@ntlworld.com>

Apologies if I missed anyone!

Global changes

The POSIX.1 man pages (sections 0p, 1p, 3p) have been moved out of this package into the separate man-pages-posix package.

This made sense because those pages are seldom changed (only formatting fixes, etc.) so that it was unnecessary to redistribute them with each man-pages release.

console_codes.4

random.4

dir_colors.5

proc.5

glob.7

Stuart Brady

s/^`/ for backquotes used in command substitution, for proper rendering in UTF-8.

Various pages

mtk, after a note from Stuart Brady

Using `'x'` to denote a character (string) renders poorly in UTF-8, where the two `'` characters render as closing single quotes. On the other hand, using `^x^` renders nicely on UTF-8, where proper opening and closing single quotes are produced by

groff(1), but looks ugly when rendered in ASCII. Using the sequence `^\aqx\aq/` produces a reasonable rendering ("`\aq'` is a vertical "apostrophe quote") in both UTF-8 and ASCII. So that change is made in a number of pages. See also <http://www.cl.cal.ac.uk/~mgk25/ucs/quotes.html>.

Various pages

mtk

Replace form `^string'/` by `/"string"/`, since the former renders poorly in ASCII.

termios.3

console_codes.4

tty_ioctl.4

termcap.5

charsets.7

mtk

Control character names (`^X`) are written boldface, without quotes.

printf.3

scanf.3

proc.5

glob.7

regex.7

mtk

Various edits to try and bring some consistency to the use of quotes.

Changes to individual pages

tty_ioctl.4

mtk

Small rewordings in description of packet mode.

locale.7

mtk

Minor formatting fixes.

New and rewritten pages

acct.5

mtk

A complete rewrite of this page, now with much more detail.

hostname.7

mtk

A description of hostname resolution. Taken from FreeBSD 6.2,

and lightly edited for man-pages style.

symlink.7

mtk

A description of symbolic links. Taken from FreeBSD 6.2, but heavily edited for Linux details, improved readability, and man-pages style.

Newly documented interfaces in existing pages

getrlimit.2

mtk / Peter Zijlstra

Add description of RLIMIT_RTTIME limit, new in 2.6.25.

mkstemp.3

mtk

Add description of mkostemp(), new in glibc 2.7.

core.5

mtk, after a note by Petr Gajdos; review by Neil Horman

Document core_pattern pipe syntax, which appeared in kernel 2.6.19.

Add an example program demonstrating use of core_pattern pipe syntax.

mtk

Document /proc/PID/coredump_filter, new in kernel 2.6.23.

Documentation was based on the text in

Documentation/filesystems/proc.txt, plus testing, and checking the kernel source.

proc.5

mtk

Document /proc/PID/oom_score, which was new in kernel 2.6.11.

This file displays the "badness" score of the process, which provides the basis for OOM-killer decisions.

mtk

Document /proc/PID/oom_adj, which was new in kernel 2.6.11.

This file influences the oom_score of a process.

mtk

Document /proc/PID/limits, which was new in 2.6.24.

This file displays a process's resource limits.

mtk

Document /proc/PID/fdinfo/*, which was new in 2.6.22.

These files display info about each descriptor opened by the process: the current file offset, and the file access mode + file status flags as set in open() or fcntl(F_SETFL).

mtk

Document /proc/PID/mountinfo, which was new in 2.6.26.

This file displays information about mount points.

Closely based on text from Documentation/filesystems/proc.txt.

mtk

Document /proc/PID/mountstats, which was new in 2.6.17.

This file displays statistics about mount points.

mtk

Document /proc/PID/status.

Samuel Thibault / mtk, review by Laurent Vivier,

Christian Borntraeger, and Andrew P

Document guest (virtual CPU) time field in /proc/stat.

Document guest (virtual CPU) time fields in /proc/PID/stat.

New links

mkostemp.3

mtk

Link to mkstemp.3.

getcwd.2

mtk

Link to getcwd.3, which describes several interfaces, among them getcwd(), which is in fact a system call.

For consistency, "fix" cases where argument of .B or .I was on the following source line.

adjtimex.2

getrusage.2

io_getevents.2

poll.2

select.2

semop.2

sigwaitinfo.2

aio_suspend.3

clock_getres.3

mq_receive.3

mq_send.3

sem_wait.3

proc.5

mtk

SEE ALSO: add time(7)

Typographical or grammatical errors have been corrected in several places.
(Special thanks to Nicolas François and Alain Portal.)

Changes to individual pages

acct.2

mtk

Add a few more words to DESCRIPTION.

NOTES: Add pointer to acct(5).

alarm.2

Alain Portal

s/process/calling process/ so as to say that the alarm signal is delivered to the calling process.

brk.2

Yao Zhao / mtk

Clarify discussion of return value of sbrk().

mtk

DESCRIPTION: Add some sentences giving an overview of these interfaces.

Add note recommending use of malloc(3).

Change name of brk() argument to the simpler 'addr'.

Add "(void *)" cast to "-1" for error return of sbrk().

Removed some incorrect text about "brk(0)".

Note that SUSv2 specified the return value of sbrk().
Added a detail on the glibc brk() wrapper.
Remove discussions of old standards (C89 and POSIX.1-1990);
CONFORMING TO already discusses the situation with respect
to more recent standards.

chmod.2

mtk

Clarify description of chmod() and fchmod().
Add further detail on S_ISUID, S_ISGID, and S_ISVTX permissions.
Reformat list of permissions bits.

chown.2

mtk

Describe rules governing ownership of new files (bsdgroups
versus sysvgroups, and the effect of the parent directory's
set-group-ID permission bit).

chroot.2

Alain Portal

Clarify description a little.
s/changes the root directory/
changes the root directory of the calling process/

execve.2

mtk

Fix text that warns against use of NULL argv and envp.
Using a NULL envp does in fact seem to be portable (works
on Solaris and FreeBSD), but the Linux semantics for a NULL
argv certainly aren't consistent with other implementations.
See http://bugzilla.kernel.org/show_bug.cgi?id=8408.

getdents.2

mtk, after a note from George Spelvin

Document d_type field, present since kernel 2.6.4.
Other minor edits.

getitimer.2

mtk

Noted that POSIX.1 leaves interactions with alarm(), sleep(),
and usleep() unspecified.
Linux 2.6.16 removed the MAX_SEC_IN_JIFFIES ceiling on timer
values.
Other minor changes.

io_cancel.2

io_destroy.2

io_getevents.2

io_setup.2

io_submit.2

mtk, after a note by Masatake YAMOTO and input from Jeff Moyer

Describe the unconventional error return provided by the wrapper function in libaio (and contrast with behavior if the system call is invoked via syscall(2)).

See <http://thread.gmane.org/gmane.linux.ltp/4445/>

Alain Portal / mtk

Re-order ERRORS and SEE ALSO entries to be alphabetical.

io_getevents.2

Alain Portal

Small wording fix.

io_submit.2

Jeff Moyer

s/AIO request blocks/AIO control blocks/

mknod.2

mtk

Note that EEXIST applies, even if the pathname is a (possibly dangling) symbolic link.

nanosleep.2

mtk, after a report from Stephane Chazelas

Remove crufty discussion of HZ, and replace with a pointer to time(7).

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=485636>

mtk, after some discussions with Bart Van Assche and Roman Zippel

NOTES: describe CLOCK_REALTIME versus CLOCK_NANOSLEEP

See also <http://thread.gmane.org/gmane.linux.kernel/696854/>

"nanosleep() uses CLOCK_MONOTONIC, should be CLOCK_REALTIME?"

mtk

Replace mentions of "process" by "thread".

NOTES: describe case where clock_nanosleep() can be preferable.

Some minor rewrites.

open.2

mtk, after a note from Christoph Hellwig

NOTES: Note that access mode flags are not single bits, and document the Linuxism "access mode 3".

See also <http://thread.gmane.org/gmane.linux.kernel/653123>.

readdir.2

mtk

Minor wording fixes.

recv.2

Alain Portal

Add comment to 'ee_pad' field in structure definition.

sched_setscheduler.2

mtk

Add pointer to discussion of RLIMIT_RTTIME in getrlimit.2.

mtk, after a note by Andrew Clayton

Rewrote and restructured various parts of the page for greater clarity.

mtk

Add more detail to the rules that are applied when an unprivileged process with a non-zero RLIMIT_RTPRIO limit changes policy and priority.

SEE ALSO: Add Documentation/scheduler/sched-rt-group.txt

sync_file_range.2

Pavel Machek

SYNC_FILE_RANGE_WRITE can block on writes greater than request queue size. For some background, see

<http://thread.gmane.org/gmane.linux.kernel/687713/focus=688340>

syscalls.2

mtk

Added system call history back to version 1.2.

Fix typo on kernel version for pivot_root().

syslog.2

WANG Cong

Document ENOSYS error, which can occur if kernel was built without CONFIG_PRINTK.

utime.2

Nicolas François

Clarify description of 'times' array for utimes().

adjtime.3

mtk

The longstanding bug that if delta was NULL, olddelta didn't return the outstanding clock adjustment, is now fixed (since glibc 2.8 + kernel 2.6.26).

http://sourceware.org/bugzilla/show_bug?id=2449

http://bugzilla.kernel.org/show_bug.cgi?id=6761

dprintf.3

mtk

Note that these functions are included in the next POSIX revision.

Remove editorial discussion about what the functions should have been named.

ftime.3

mtk

Rewrote various pieces, and added some details.

getaddrinfo.3

mtk

Improve description of 'hints' and 'res' arguments.

Add details on numeric strings that can be specified for 'node'.

Other fairly major restructurings and rewrites to improve logical structure and clarity of the page.

SEE ALSO: Add hostname(7).

gethostbyname.3

mtk

DESCRIPTION: Add reference to inet_addr(3) for dotted notation.

SEE ALSO: add inet(3).

mtk

Added BUGS section noting that gethostbyname() does not recognize hexadecimal components in dotted address strings;

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=482973>

getmntent.3

mtk, after Stuart Cunningham pointed out the typo

Remove statement that LSB deprecates the functions

"endmntent(), setmntent() [sic] and setmntent()".

This doesn't seem to be true (I can't find mention of it being deprecated in any of the LSB specs). Rather, LSB simply doesn't specify these functions. (LSB 1.3 had a spec of setmntent(), but not getmntent() or endmntent(), and noted that having a spec of setmntent() was of little use without also having a spec of getmntent().)

See also <https://lists.linux-foundation.org/pipermail/lsb-discuss/2006-October/003078.html>

getnameinfo.3

Tolga Dalman

Remove mention of sa_len field from example code.

That field is a BSDism not present on Linux.

mtk

Various minor changes.

inet.3

mtk / Stephane Chazelas

inet_aton() is **not** in POSIX.1.

Rewrote discussion of why inet_addr() is disfavored.

SEE ALSO: Add getaddrinfo(3).

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=482979>.

mtk, after a note by Stephane Chazelas

Describe the various address forms supported by `inet_aton()`.

mtk

Rewrite description of `inet_network()`.

Clarify discussion of `inet_lnaof()`, `inet_netof()`, and `inet_makeaddr()`.

Add discussion of Classful Addressing, noting that it is obsolete.

Added an EXAMPLE program.

mtk

Relocate discussion of i386 byte order to NOTES.

Note that `inet_aton()` returns an address in network byte order.

SEE ALSO: Add `byteorder(3)` and `getnameinfo(3)`.

`inet_ntop.3`

mtk

Remove unneeded header files from SYNOPSIS.

SEE ALSO: Add `inet(3)` and `getnameinfo(3)`.

Make NAME line more precise.

Move errors to an ERRORS section.

Add EXAMPLE section pointing to `inet_pton(3)`.

`inet_pton.3`

mtk / Stephane Chazelas

Remove statement that `inet_pton()` extends `inet_ntoa()`;

that's not really true, since `inet_pton()` doesn't support all of the string forms that are supported by `inet_ntoa()`.

SEE ALSO: Add `getaddrinfo(3)`.

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=482987>.

mtk

Describe IPv6 address formats.

Describe dotted decimal format in more detail.

Add an example program.

mtk

Remove unneeded header files from SYNOPSIS.

Make NAME line more precise.

Make description of return value more precise.

SEE ALSO: Add `inet(3)`.

`mkfifo.3`

mtk

Note that `EEXIST` applies, even if the pathname is a (possibly dangling) symbolic link.

`mkstemp.3`

mtk

Fix discussion of `O_EXCL` flag.

These functions may also fail for any of the errors described in `open(2)`.

Various other rewordings.

readdir.3

mtk

Document DT_LNK (symbolic link) for d_type field.
Reorder DT_ entries alphabetically.

remainder.3

mtk

Recommend against drem(), in favor of remainder().

scanf.3

mtk, after a note from Stephane Chazelas

Add an ERRORS section documenting at least some of the errors that may occur for scanf().

See also <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=487254>.

mtk, after a note from Stephane Chazelas; review by Stephane Chazelas

Document the GNU 'a' modifier for dynamically allocating strings.

See also <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=487254>.

Document the GNU 'm' modifier for dynamically allocating strings.

strcat.3

Andreas Herrmann

s/strcat/strncat/ (a typo that changed the semantics in DESCRIPTION).

strerror.3

mtk, after a note from Daniele Giacomini

Modify SYNOPSIS to show prototypes of both versions of strerror_r(), and make other small clarifications of the description regarding the two versions.

random.4

George Spelvin (taking time out from his busy Broadway schedule), with some tweaks by Matt Mackall and mtk

Add a Usage subsection that recommends most users to use /dev/urandom, and emphasizes parsimonious usage of /dev/random.

locale.5

Petr Baudis <pasky@suse.cz>

LC_TIME: Describe first_weekday and first_workday.

proc.5

mtk

The various CPU time fields in /proc/stat and /proc/PID/stat return time in clock ticks (USER_HZ, cputime_to_clock_t(), sysconf(_SC_CLK_TCK)).

Updated, clarified and expanded the description several fields in /proc/[number]/stat.

mtk

Clarified and expanded the description of /proc/[number]/fd.

mtk

Updated and clarified the description of /proc/[number]/statm.

mtk

Updated and clarified the description of /proc/sys/fs/dentry-state.

mtk

Many formatting, wording, and grammar fixes.

man-pages.7

mtk

Enhanced description of VERSIONS section.

mq_overview.7

mtk

Note that Linux does not currently support ACLs for POSIX message queues.

sem_overview.7

mtk

Note that Linux supports ACLs on POSIX named semaphores since 2.6.19.

time.7

mtk, with some suggestions from Bart Van Assche and Thomas Gleixner

Added some details about where jiffies come into play.

Added section on high-resolution timers.

Mentioned a few other time-related interfaces at various points in the page.

See <http://thread.gmane.org/gmane.linux.kernel/697378>.

unix.7

mtk, after a note by Samuel Thibault

Provide a clear description of the three types of address that can appear in the sockaddr_un structure: pathname, unnamed, and abstract.

==== Changes in man-pages-3.02 =====

Released: 2008-07-02, Konolfingen

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Reuben Thomas <rt@sc3d.org>
Sam Varshavchik <mrsam@courier-mta.com>
Stephane Chazelas <stephane_chazelas@yahoo.fr>
WANG Cong <xiyou.wangcong@gmail.com>

Apologies if I missed anyone!

New and rewritten pages

clock_nanosleep.2

mtk

A description of the clock_nanosleep() system call,
which was added in kernel 2.6.

getgrouplist.3

mtk

A near complete rewrite, including additional information and
a new example program.

getutmp.3

mtk

Documents getutmp(3) and getutmpx(3).

gnu_get_libc_version.3

mtk

Documents gnu_get_libc_version(3) and gnu_get_libc_release(3).

sigwait.3

mtk

Documents sigwait(3).

shm_overview.7

mtk

An overview of the POSIX shared memory API.

Newly documented interfaces in existing pages

updwtmp.3

mtk

Document updwtmpx(3).

New links

getutmpx.3

mtk

Link to getutmp.3.

gnu_get_libc_release.3

mtk

Link to gnu_get_libc_version.3

updwtmpx.3

mtk

Link to updwtmp.3

utmpxname.3

mtk

Link to getutent.3.

utmpx.5

mtk

Link to utmp.5.

Global changes

Various pages

mtk

s/user name/username/

Various pages

mtk

s/host name/hostname/

Changes to individual pages

fchmodat.2

Alain Portal

SEE ALSO: add symlink.7. (3.01 changelog wrongly said this had been done.)

io_setup.2

Alain Portal

Remove superfluous text from RETURN VALUE.

mmap.2

mtk

SEE ALSO: Add mmap(2), shm_overview(7).

shmget.2

shmop.2

mtk

SEE ALSO: add shm_overview(7).

sigreturn.2

mtk

Added a bit more detail on what sigreturn() actually does.

signalfd.2

sigsuspend.2

mtk

SEE ALSO: Add sigwait(3).

sigwaitinfo.2

mtk

Describe behavior when multiple threads are blocked in sigwaitinfo()/sigtimedwait().

SEE ALSO: Add sigwait(3).

dirfd.3

mtk

RETURN VALUE: describe return value on success.

Add an ERRORS section documenting POSIX.1-specified errors.

getaddrinfo.3

mtk, after a note by Stephane Chazelas

getaddrinfo() supports specifying IPv6 scope-IDs.

getlogin.3

mtk

ERRORS: add ENOTTY.

SEE ALSO: add utmp(5).

getutent.3

WANG Cong

utmpname() does return a value.

mtk

Add paragraph to start of DESCRIPTION recommending use of POSIX.1 "utmpx" functions.

CONFORMING TO: mention utmpxname().

Add an ERRORS section.

There are no utmpx equivalents of the _r reentrant functions.

Clarify discussion of return values.
Add pointer to definition of utmp structure in utmp(5).
Clarify discussion of utmpx file on other systems (versus Linux situation).

getutent.3

mtk

SEE ALSO: add getutmp(3)

inet_pton.3

Stephane Chazelas

Fix error in description of IPv6 presentation format:
s/x.x.x.x.x.x.x/x:x:x:x:x:x/x/.

setbuf.3

Reuben Thomas / mtk

Fix confused wording for return value of setvbuf().
Fixes <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=488104>.

mtk

Other minor rewordings.

shm_open.3

mtk

SEE ALSO: add shm_overview(7).

random.4

mtk, after a note by Alain Portal

Slight rewording to make life easier for non-native English speakers.

utmp.5

mtk

Add discussion of POSIX.1 utmpx specification.
Provide a little more detail on fields of utmp structure.
Added comments to macros for ut_type field.
Correct the description of the ut_id field.

mtk

Consolidate duplicated information about ut_tv and ut_session on biarch platforms.

mtk

Move some text from CONFORMING TO to NOTES.
Removed some crufty text.
SEE ALSO: add login(3), logout(3), logwtmp(3).
UT_LINESIZE is 32 (not 12).

mtk

SEE ALSO: add getutmp(3)

man-pages.7

mtk

Enhanced the discussion of font conventions.

signal.7

mtk

Note that the delivery order of multiple pending standard signals is unspecified.

SEE ALSO: Add sigwait(3).

===== Changes in man-pages-3.03 =====

Released: 2008-07-08, Konolfingen

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>

Andi Kleen <ak@muc.de>

Hidetoshi Seto <seto.hidetoshi@jp.fujitsu.com>

Li Zefan <lizf@cn.fujitsu.com>

Paul Jackson <pj@sgi.com>

Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

New and rewritten pages

getcpu.2

Andi Kleen, with some text and edits by mtk

Documents the getcpu(2) system call, introduced in Linux 2.6.19.

sched_getcpu.3

mtk

Documents sched_getcpu(3), a wrapper for getcpu(2), provided since glibc 2.6.

cpuset.7

Paul Jackson, with review and editing by mtk, and comments by Hidetoshi Seto and Li Zefan

A description of the cpuset file system, the mechanism introduced kernel 2.6.12 for confining processes to designated processors

and nodes. (Becomes the fourth largest page in man-pages!)

Newly documented interfaces in existing pages

readdir.3

mtk

Add documentation of readdir_r().

New links

updwtmpx.3

Alain Portal

Link to updwtmp.3 (3.02 changelog wrongly said this had been done).

readdir_r.3

mtk

Link to readdir.3.

Global changes

get_mempolicy.2

mbind.2

sched_setaffinity.2

set_mempolicy.2

mtk

SEE ALSO: Add getcpu(2).

accept.2

close.2

connect.2

dup.2

epoll_wait.2

fcntl.2

flock.2

futex.2

msgop.2

poll.2

read.2

recv.2

select.2

semop.2

send.2

sigwaitinfo.2

spu_run.2

wait.2

write.2

aio_suspend.3

mq_receive.3

mq_send.3

scanf.3

sem_wait.3

usleep.3

inotify.7

mtk

ERRORS: Added reference to signal(7) in discussion of EINTR.

Various pages

mtk

Wrapped very long source lines.

Changes to individual pages

accept.2

mtk

Small wording change.

io_getevents.2

mtk

ERRORS: Add EINTR error.

open.2

mtk

ERRORS: Add EINTR error.

sigaction.2

mtk

Note circumstances in which each SA_* flag is meaningful.

mtk

Describe POSIX specification, and Linux semantics for SA_NOCLDWAIT when establishing a handler for SIGCHLD.

mtk

Add pointer under SA_RESTART to new text in signal(7) describing system call restarting.

mtk

Other minor edits.

truncate.2

mtk

ERRORS: Added EINTR error.

A few minor rewordings.

wait.2

mtk

Remove statement that WUNTRACED and WCONTINUED only have effect if SA_NOCLDSTOP has not been set for SIGCHLD. That's not true.

errno.3

mtk

Add a pointer to signal(7) for further explanation of EINTR.

getgrouplist.3

mtk

SEE ALSO: Add passwd(5).

readdir.3

mtk

Remove <sys/types.h> from SYNOPSIS; POSIX.1-2001 does not require it.

Some minor rewordings.

sleep.3

mtk

RETURN VALUE: explicitly mention interruption by signal handler.

SEE ALSO: add signal(7).

usleep.3

mtk

POSIX.1-2001 also only documents EINVAL.

group.5

mtk

SEE ALSO: Add getgrent(3), getgrnam(3).

passwd.5

mtk

SEE ALSO: Add getpwent(3), getpwnam(3).

proc.5

mtk

Add pointer to description of /proc/PID/cpuset in cpuset(7).

signal.7

mtk

Add a section describing system call restarting, and noting which system calls are affected by SA_RESTART, and which system calls are never restarted.

mtk

Describe the aberrant Linux behavior whereby a stop signal plus SIGCONT can interrupt some system calls, even if no signal handler has been established, and note the system calls that behave this way.

mtk

Note a few more architectures on which signal numbers are valid.
SEE ALSO: added a number of pages.

mtk

Update async-signal-safe function list for POSIX.1-2004 (which adds sockatmark()).

==== Changes in man-pages-3.04 =====

Released: 2008-07-15, Konolfingen

Web site

licenses.html

mtk

A page describing the preferred licenses for new pages that are contributed to man-pages.

New and rewritten pages

utimensat.2

mtk

New page documenting the utimensat() system call, new in 2.6.22, and futimens() library function.

end.3

mtk

Documents etext, edata, and end symbols.

Newly documented interfaces in existing pages

memchr.3

mtk

Add description of rawmemchr().

proc.5

mtk

Document /proc/config.gz (new in kernel 2.6).

mtk, based on text from Documentation/vm/sysctl.txt

Document /proc/sys/vm/oom_kill_allocating_task (new in Linux 2.6.24).

Document /proc/sys/vm/oom_dump_tasks (new in Linux 2.6.25).

Document /proc/sys/vm/panic_on_oom (new in Linux 2.6.18).

New links

edata.3

etext.3

mtk

Links to end.3.

futimens.3

mtk

Link to new utimensat.2.

sys_nerr.3

mtk

Links to perror.3.

Global changes

Various pages

mtk

s/parameter/argument/ when talking about the things given
to a function call, for consistency with majority usage.

Various pages

mtk

s/UNIX/Unix/, when not used as part of a trademark,
for consistency with majority usage in pages.

Various pages

mtk, after a note from Alain Portal

Put SEE ALSO entries into alphabetical order.

Various pages

mtk

Remove period at end of SEE ALSO list.

Various pages

mtk, after a note by Alain Portal

Even when the CONFORMING TO section is just a list of standards,
they should be terminated by a period.

getpriority.2

MB_LEN_MAX.3

MB_CUR_MAX.3

fwide.3

mblen.3

rtime.3

st.4

proc.5

bootparam.7

man-pages.7

utf-8.7

tcp.5

mtk / Alain Portal

Small wording fixes -- express \leq , $<$, \geq , $>$ in words when in running text.

sched_setparam.2

sched_setscheduler.2

getgrent_r.3

hash.3

mtk

Minor rewording w.r.t. use of the term "parameter".

Typographical or grammatical errors have been corrected in several other places. (Many, many thanks to Alain Portal!)

Changes to individual pages

capget.2

Andrew Morgan

Update in line with addition of file capabilities and 64-bit capability sets in kernel 2.6.2[45].

clock_nanosleep.2

mtk

Add "Link with -lrt" to SYNOPSIS.

getrusage.2

Sripathi Kodi

Document RUSAGE_THREAD, new in 2.6.26.

mtk

Improve description of RUSAGE_CHILDREN.

Add pointer to /proc/PID/stat in proc(5).

Other minor clean-ups.

ioprio_set.2

Nikanth Karthikesan

Since Linux 2.6.25, CAP_SYS_ADMIN is longer required to set a low priority (IOPRIO_CLASS_IDLE).

mount.2

mtk

Since Linux 2.6.26, MS_RDONLY honors bind mounts.

openat.2

mtk

SEE ALSO: add utimensat(3).

prctl.2

Serge Hallyn, with some edits/input from mtk

Document PR_CAPBSET_READ and PR_CAPBSET_DROP.

Erik Bosman

Document PR_GET_TSC and PR_SET_TSC.

mtk, reviewed by Andrea Arcangeli

Document PR_SET_SECCOMP and PR_GET_SECCOMP.

mtk

PR_SET_KEEPCAPS and PR_GET_KEEPCAPS operate on a per-thread setting, not a per-process setting.

mtk

Clarify fork(2) details for PR_SET_PDEATHSIG.

mtk

Add description of PR_SET_SECUREBITS and PR_GET_SECUREBITS, as well as pointer to further info in capabilities(7).

mtk

PR_GET_ENDIAN returns endianness info in location pointed to by arg2 (not as function result, as was implied by previous text).

mtk

Expand description of PR_SET_NAME and PR_GET_NAME.

mtk

RETURN VALUE: bring up to date for various options.

mtk

Various improvements in ERRORS.

mtk

Note that PR_SET_TIMING setting of PR_TIMING_TIMESTAMP is not currently implemented.

mtk

Minor changes:

- * Clarify wording for PR_GET_UNALIGN, PR_GET_FPEMU, and PR_GET_FPEXC.

- * Some reformatting of kernel version information.

- * Reorder PR_GET_ENDIAN and PR_SET_ENDIAN entries.

readlinkat.2

John Brooks / mtk

Fix and reword erroneous RETURN VALUE text.

recv.2

mtk

Noted which flags appeared in Linux 2.2.

sched_setaffinity.2

mtk, after a Fedora downstream patch

Update type used for cpusetsize argument in SYNOPSIS.

select.2

Andreas Mohr / mtk

Clarify "zero timeout" case.

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=490868>.

send.2

mtk

Noted which flags appeared in Linux 2.2.

sigaction.2

mtk

Document si_omax and si_tid fields of siginfo structure.

Add some text for si_trapno field.

The si_errno field is *generally* unused.

mtk

Put descriptions of SA_* constants in alphabetical order.

signal.2

mtk

Rewrote and expanded portability discussion.

NOTES: Show the raw prototype of signal() (without use of sighandler_t).

signalfd.2

mtk

Modify description of ssi_trapno field.

swapon.2

mtk

Fix two version number typos for MAX_SWAPFILES discussion:

s/2.6.10/2.4.10/

utime.2

mtk

SEE ALSO: add utimensat(2), futimens(3).

dl_iterate_phdr.3

Alain Portal

SEE ALSO: Add elf(5).

crypt.3

mtk, after a Fedora downstream patch

Describe additional encryption algorithms.

See also: https://bugzilla.redhat.com/show_bug.cgi?id=428280.

errno.3

mtk

Small rewrites in DESCRIPTION.

exec.3

mtk, after a note from Alain Portal

Small rewording.

exp10.3

Alain Portal

SEE ALSO: Add log10(3).

exp2.3

Alain Portal

Add C99 to CONFORMING TO.

fgetgrent.3

Alain Portal

Add references to group(5).

mtk

Minor rewordings.

SEE ALSO: add fopen(3).

fgetpwent.3

Alain Portal

Add reference to passwd(5).

mtk

Minor rewordings.

SEE ALSO: add fopen(3).

frexp.3

Alain Portal

Add C99 to CONFORMING TO.

futimes.3

mtk

SEE ALSO: remove futimesat(2); add utimensat(2).

getopt.3

mtk

Add details on initial value of `optind`, and note that it can be reset (to 1) to restart scanning of an argument vector.

Add a NOTES section describing the glibc-specific behavior when `optind` is reset to 0 (rather than 1).

See http://groups.google.com/group/comp.unix.programmer/browse_thread/thread/be0d0b7a07a165fb

mtk

Note glibc extensions under CONFORMING TO.

`getspnam.3`

mtk

Improve comments on struct `spwd`.

`getpw.3`

Alain Portal

RETURN VALUE: note that `errno` is set on error.

mtk

Add `EINVAL` error.

`insque.3`

mtk / Alain Portal

Minor rewordings.

`log.3`

Alain Portal

Remove unnecessary sentence in ERRORS.

`log10.3`

mtk

SEE ALSO: Add `exp10(3)`.

`offsetof.3`

Alain Portal

Small wording improvement.

`pow.3`

Alain Portal

Remove unnecessary sentence in ERRORS.

`printf.3`

mtk / Alain Portal

Many small formatting fixes.

`proc.5`

mtk

Remove redundant summary list of files in description of `/proc/sys/kernel`.

Make kernel version for `/proc/sys/kernel/panic_on_oops` more precise.

Make kernel version for `/proc/sys/kernel/pid_max` more precise.

Add Documentation/sysctl/vm.txt to SEE ALSO.

Other minor edits.

profil.3

mtk / Alain Portal

Small wording improvement.

rtime.3

mtk, after a note by Alain Portal

Clarify meaning of midnight on 1 Jan 1900/1970.

mtk

Remove netdate(1) and rdate(1) from SEE ALSO, since these pages don't seem to exist on Linux systems.

scanf.3

Vincent Lefevre / mtk

Clarify treatment of initial white space by %% conversion specification.

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=435648>.

mtk

Many small formatting fixes.

stdin.3

Alain Portal

Rename CONSIDERATIONS section to NOTES, and relocate to appropriate place on page.

tmpfile.3

mtk, after a note by Alain Portal

Prepend "POSIX.1-2001 specifies that: " to the sentence stating that tmpfile() may write to stdout. (AFAICS, glibc's tmpfile() does not do this.)

ttyname.3

Alain Portal

Remove unnecessary sentence in ERRORS.

wcsdup.3

Alain Portal

Make wording more precise: the memory allocated by wcsdup(3) *should* be freed with free(3).

wordexp.3

Alain Portal / mtk

Move example into proper EXAMPLE section.

tty_ioctl.4

mtk / Petr Gajdos

The features in the "Get and Set Window Size" subsection require the inclusion of `<sys/ioctl.h>`.

capabilities.7

Serge Hallyn, plus a bit of work by mtk

Document file capabilities, per-process capability bounding set, changed semantics for `CAP_SETPCAP`, and other changes in 2.6.2[45]. Add `CAP_MAC_ADMIN`, `CAP_MAC_OVERRIDE`, `CAP_SETFCAP`. Various smaller fixes.

mtk, plus review by Serge Hallyn and Andrew Morgan

Add text detailing how `CAP_SETPCAP` (theoretically) permits -- on pre-2.6.25 kernels, and 2.6.25 and later kernels with file capabilities disabled -- a thread to change the capability sets of another thread.

Add section describing rules for programmatically adjusting thread capability sets.

Add some words describing purpose of inheritable set.

Note existence of `CONFIG_SECURITY_CAPABILITIES` config option.

Describe rationale for capability bounding set.

Document `securebits` flags (new in 2.6.26).

Remove obsolete `BUGS` section.

SEE ALSO: Add `getcap(8)`, `setcap(8)`, and various `libcap` pages.

mtk

Add text noting that if we set the effective flag for one file capability, then we must also set the effective flag for all other capabilities where the permitted or inheritable bit is set.

mtk

Since Linux 2.6.25, `CAP_SYS_ADMIN` is no longer required for `ioprio_set()` to set `IOPRIO_CLASS_IDLE` class.

mtk

Reword discussion of `CAP_LINUX_IMMUTABLE` to be file-system neutral.

man-pages.7

mtk

A list of standards in the `CONFORMING TO` list should be terminated by a period.

The list of pages in a `SEE ALSO` list should not be terminated by a period.

tcp.7

mtk

Correct a detail for `sysctl_tcp_adv_win_scale`.

Formatting fixes.

==== Changes in man-pages-3.05 =====

Released: 2008-07-23, Konolfingen

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andries Brouwer <Andries.Brouwer@cw.nl>

Sam Varshavchik <mrsam@courier-mta.com>
Uli Schlacter <psychon@znc.in>

Apologies if I missed anyone!

New and rewritten pages

matherr.3

mtk, with review by Andries Brouwer

A description of the SVID-specified mechanism for reporting math exceptions.

See <http://thread.gmane.org/gmane.linux.man/266>.

math_error.7

mtk, with review and suggested input from Andries Brouwer

A description of how math functions report errors.

See <http://thread.gmane.org/gmane.linux.man/249>.

Global changes

Various pages

mtk

s/floating point/floating-point/ when used attributively.

Various pages

mtk

For consistency with majority usage:

s/plus infinity/positive infinity/

s/minus infinity/negative infinity/

Typographical or grammatical errors have been corrected in several

other places.

Changes to individual pages

brk.2

mtk

SEE ALSO: add end(3).

open.2

Brian M. Carlson / mtk

Remove ambiguity in description of support for O_EXCL on NFS.

As per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=491791>.

prctl.2

mtk

Place options in some semblance of alphabetical order.

(No content or formatting changes were made.)

cerf.3

mtk

Bump version number: these functions are still missing in glibc 2.8.

fenv.3

mtk

SEE ALSO: Add math_error(7).

INFINITY.3

mtk

SEE ALSO: Add math_error(7).

nan.3

mtk

Remove unneeded "Compile with" piece in SYNOPSIS.

SEE ALSO: Add math_error(7).

rpc.3

mtk / Franck Jousseume

Fix errors introduced into a few prototypes when converting

function declarations to use modern C prototypes in man-pages-2.75.

ipv6.7

mtk, after a report from Uli Schlacter

Document the IPV6_V6ONLY flag.

Released: 2008-08-05, Konolfingen

Changes to individual pages

crypt.3

mtk

Tweak discuss text describing support for Blowfish.

ctime.3

mtk / Gernot Tenchio

Added some words to make clear that the string returned by
ctime() and asctime() is null-terminated.

math_error.7

Sam Varshavchik

Reverse order of SYNOPSIS and NAME sections.

mtk

NOTES: Summarize the state of glibc support for exceptions
and errno for error reporting.

Changes to individual pages (math functions)

Almost all of the changes in this release relate to math man pages.

Very many changes were made to the math pages, including:

- * Fixed feature test macros (FTMs). Often, the FTM requirements for the "float" and "long double" versions of a math function are different from the requirements for the "double" version. Each math page now shows the correct FTM requirements for all three versions of the function(s) it describes. This may have required either a change to the existing FTM text (if the requirements for the "double" function were already described), or the addition of an FTM description to a SYNOPSIS where one was not previously present (typically because the "double" version of the function does not require any FTMs to be defined).
- * CONFORMING TO: in many cases, POSIX.1-2001 was not mentioned. Where a function is specified in POSIX.1-2001, this is now noted. Also, statements about what other standards a function conforms to were generally clarified. (The wording about which functions conformed to C99 was previously often done as an add on sentence; now it is made part of the first sentence of the CONFORMING TO section, along with POSIX.1-2001.)
- * RETURN VALUE: in many cases, pages lacked descriptions of the return value when the function arguments are special values such as +0, -0, NaN (not-a-number), +infinity, -infinity, etc. This has been fixed. I carried out tests on glibc 2.8 to ensure that all of these functions match the RETURN VALUE descriptions (and the POSIX.1-2001 requirements).
- * ERRORS: many pages lacked a clear (or indeed any) description of how errno is set on error and what exception is raised for each error. This has been fixed. The ERRORS sections are now generally headed up as per the POSIX.1 way of doing things, describing Pole / Range / Domain errors, as applicable. I carried out tests on glibc 2.8 to ensure that all of these

functions match the ERRORS descriptions. Deviations from POSIX.1-2001 requirements have been filed as glibc bug reports, and noted in the man pages. (The pages now describe the situation for ERRORS as at glibc 2.8; I may eventually try and extend the text with descriptions of changes in older versions of glibc.)

NOTE: one point that has not been covered in any page is the circumstances that generate inexact (FE_INEXACT) exceptions. (The details for these exceptions are not specified in POSIX.1-2001, and I haven't gone looking for the standards that describe the details.)

acos.3

mtk

SYNOPSIS: Added feature test macro requirements.

RETURN VALUE: Added details for special argument cases.

Rewrote ERRORS section.

Updated CONFORMING TO.

acosh.3

mtk

SYNOPSIS: Fixed feature test macro requirements.

Added RETURN VALUE section.

Rewrote ERRORS section.

Updated CONFORMING TO.

asin.3

mtk

SYNOPSIS: Added feature test macro requirements.

RETURN VALUE: Added details for special argument cases.

Rewrote ERRORS section.

Updated CONFORMING TO.

asinh.3

mtk

SYNOPSIS: Added feature test macro requirements.

DESCRIPTION: Some rewording.

RETURN VALUE: Added details for special argument cases.

Added (null) ERRORS section.

Updated CONFORMING TO.

atan.3

mtk

SYNOPSIS: Added feature test macro requirements.

DESCRIPTION: Some rewording.

RETURN VALUE: Added details for special argument cases.

Added (null) ERRORS section.

Updated CONFORMING TO.

atan2.3

mtk

SYNOPSIS: Added feature test macro requirements.

DESCRIPTION: Some rewording.

RETURN VALUE: Added details for special argument cases.

Added (null) ERRORS section.

Updated CONFORMING TO.

atanh.3

mtk

SYNOPSIS: Fixed feature test macro requirements.

Added RETURN VALUE section.

Rewrote ERRORS section.

Updated CONFORMING TO.

Added BUGS section noting that pole error sets errno to EDOM,
when it should be ERANGE instead; see also

http://sources.redhat.com/bugzilla/show_bug.cgi?id=6759.

cbirt.3

mtk

SYNOPSIS: Fixed feature test macro requirements.

Added RETURN VALUE section.

Added (null) ERRORS section.

Updated CONFORMING TO.

ceil.3

mtk

SYNOPSIS: Added feature test macro requirements.

DESCRIPTION: Enhanced.

RETURN VALUE: Added details for special argument cases.

Rewrote ERRORS section.

Updated CONFORMING TO.

NOTES: Added some details.

copysign.3

mtk

Added RETURN VALUE section.

Updated CONFORMING TO.

cos.3

mtk

SYNOPSIS: Added feature test macro requirements.

Rewrote RETURN VALUE section.

Added ERRORS section; noted errno is not set:

http://sources.redhat.com/bugzilla/show_bug.cgi?id=6780.

Updated CONFORMING TO.

cosh.3

mtk

SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section.
Updated CONFORMING TO.

erf.3

mtk

Removed the erfc() material (there is now a new erfc page).
Reason: the functions are logically separate; also their return values differ, and it would have been confusing to document them on the same page.
SYNOPSIS: Fixed feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see http://sources.redhat.com/bugzilla/show_bug.cgi?id=6785.
Updated CONFORMING TO.

exp.3

mtk

SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see http://sources.redhat.com/bugzilla/show_bug.cgi?id=6786.
Updated CONFORMING TO.

exp10.3

mtk

SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set for underflow; see http://sources.redhat.com/bugzilla/show_bug.cgi?id=6787.

exp2.3

mtk

Added RETURN VALUE and ERRORS sections.
Updated CONFORMING TO.

expm1.3

mtk

SYNOPSIS: Fixed feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set for overflow; see http://sources.redhat.com/bugzilla/show_bug.cgi?id=6788.
Updated CONFORMING TO.
Added BUGS section, describing bogus underflow exception for -large, see http://sources.redhat.com/bugzilla/show_bug.cgi?id=6778; and describing bogus invalid exception for certain +large, see http://sources.redhat.com/bugzilla/show_bug.cgi?id=6814.

fabs.3

mtk

SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Updated CONFORMING TO.

fdim.3

mtk

SYNOPSIS: Added feature test macro requirements.
DESCRIPTION: Some rewording.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6796.
Updated CONFORMING TO.

fenv.3

mtk

Make style of writing exception names consistent with other
pages and POSIX.1-2001.
Updated CONFORMING TO.

finite.3

mtk

SYNOPSIS: Fixed feature test macro requirements.

floor.3

mtk

SYNOPSIS: Added feature test macro requirements.
DESCRIPTION: Enhanced.
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section.
Updated CONFORMING TO.

fma.3

mtk

SYNOPSIS: Added feature test macro requirements.
DESCRIPTION: Some rewording.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6801.
Updated CONFORMING TO.

fmax.3

fmin.3

mtk

NAME: Make description clearer

tgamma.3

mtk

Added RETURN VALUE section.

Rewrote ERRORS section; noted that errno is not set /
incorrectly set in some cases; see also

http://sources.redhat.com/bugzilla/show_bug.cgi?id=6809

and http://sources.redhat.com/bugzilla/show_bug.cgi?id=6810.

CONFORMING TO: Added POSIX.1-2001.

Added NOTES section to hold text explaining origin of tgamma().

trunc.3

mtk

RETURN VALUE: small rewording.

CONFORMING TO: Added POSIX.1-2001.

Added NOTES section explaining that result may be too large
to store in an integer type.

===== Changes in man-pages-3.07 =====

Released: 2008-08-12, Konolfingen

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>

Andries Brouwer <Andries.Brouwer@cwi.nl>

Christoph Lameter <cl@linux-foundation.org>

Cliff Wickman <cpw@sgi.com>

Fabian Kreutz <kreutz@dbs.uni-hannover.de>

Filippo Santovito <filippo.santovito@email.it>

Khalil GHORBAL <khalil.ghorbal@cea.fr>

Lee Schermerhorn <lee.schermerhorn@hp.com>

Maxin John <maxin.john@gmail.com>

Reuben Thomas <rrt@sc3d.org>

Samuel Thibault <samuel.thibault@ens-lyon.org>

Sam Varshavchik <mrsam@courier-mta.com>

Soh Kam Yung <sohkamyung@gmail.com>

Stephane Chazelas <stephane_chazelas@yahoo.fr>

Pavel Heimlich <tropikhajma@seznam.cz>

Reuben Thomas <rrt@sc3d.org>

Apologies if I missed anyone!

New and rewritten pages

move_pages.2

Christoph Lameter, various edits and improvements by mtk

Documentation of the move_pages() system call.

This page was formerly part of the numactl package, but really belongs in man-pages (since it describes a kernel interface).

clock_getcpuclockid.3

mtk

New page documenting the clock_getcpuclockid() library function, available since glibc 2.2.

udplite.7

Gerrit Renker

Document the Linux implementation of the UDP-Lite protocol, new in Linux 2.6.20.

Newly documented interfaces in existing pages

proc.5

Christoph Lameter, minor edits and improvements by mtk

Documentation of the /proc/PID/numa_maps file.

This material was formerly the numa_maps.5 page in the numactl package, but really belongs in man-pages (since it describes a kernel interface).

Global changes

nanosleep.2

inet_ntop.3

inet_pton.3

scanf.3

initrd.4

mtk

Fix mis-ordered (.SH) sections.

connect.2

socket.2

rtnetlink.3

arp.7

ddp.7
ip.7
ipv6.7
netlink.7
packet.7
raw.7
rtnetlink.7
socket.7
tcp.7
udp.7
unix.7
x25.7
mtk

s/PF_/AF_/ for socket family constants. Reasons: the AF_ and PF_ constants have always had the same values; there never has been a protocol family that had more than one address family, and POSIX.1-2001 only specifies the AF_* constants.

Typographical or grammatical errors have been corrected in several other places.

Changes to individual pages

execve.2

mtk

The floating-point environment is reset to the default during an execve().

get_mempolicy.2

Lee Schermerhorn

Misc cleanup of get_mempolicy(2):

+ mention that any mode flags will be saved with mode.

I don't bother to document mode flags here because we already have a pointer to set_mempolicy(2) for more info on memory policy. mode flags are discussed there.

+ remove some old, obsolete [IMO] NOTES and 'roff comments.

Lee Schermerhorn

Update the get_mempolicy(2) man page to add in the description of the MPOL_F_MEMS_ALLOWED flag, added in 2.6.23.

mtk

Document additional EINVAL error that occurs is MPOL_F_MEMS_ALLOWED is specified with either MPOL_F_ADDR or MPOL_F_NODE.

getitimer.2

mtk

CONFORMING TO: POSIX.1-2008 marks getitimer() and setitimer()

obsolete.

mbind.2

Lee Schermerhorn

Fix error conditions, now that the kernel silently ignores nodes outside the task's cpuset, as long as one valid node remains.

Now that cpuset man page exists, we can refer to it. Remove stale comment regarding lack thereof.

Lee Schermerhorn

Add brief discussion of mode flags.

Lee Schermerhorn

Attempt to clarify discussion of MPOL_DEFAULT.

mtk

Fix URI reference for libnuma.

mprotect.2

mtk / Maxin John

Remove EFAULT from errors. Under ENOMEM error, note that EFAULT was the error produced in some cases for kernels before 2.4.19.

msgctl.2

mtk, after a note from Filippo Santovito

In the ipc_perm structure definition, some fields were incorrectly named: s/key/__key/ and s/seq/__seq/.

set_mempolicy.2

Lee Schermerhorn

Fix up the error return for nodemask containing nodes disallowed by the process' current cpuset. Disallowed nodes are now silently ignored, as long as the nodemask contains at least one node that is on-line, allowed by the process' cpuset and has memory.

Now that we have a cpuset man page, we can refer to cpusets directly in the man page text.

Lee Schermerhorn

Another attempt to rationalize description of MPOL_DEFAULT.

Since ~2.6.25, the system default memory policy is "local allocation". MPOL_DEFAULT itself is a request to remove any non-default policy and "fall back" to the surrounding context. Try to say that without delving into implementation details.

Lee Schermerhorn

Add discussion of mempolicy mode flags to set_mempolicy(2).

This adds another reason for EINVAL.

setpgid.2

mtk

CONFORMING TO: POSIX.1-2008 marks setpgrp() obsolete.

semctl.2

mtk, after a note from Filippo Santovito

In the ipc_perm structure definition, some fields were incorrectly named: s/key/__key/ and s/seq/__seq/.

shmctl.2

Filippo Santovito / mtk

In the ipc_perm structure definition, some fields were incorrectly named: s/key/__key/ and s/seq/__seq/.

utime.2

mtk

CONFORMING TO: POSIX.1-2008 marks utime() obsolete.

CONFORMING TO: POSIX.1-2008 removes the POSIX.1-2001 LEGACY marking of utimes(), so mention of this point has been removed from the page.

vfork.2

mtk

CONFORMING TO: POSIX.1-2008 removes the specification of vfork().

atan2.3

Fabian Kreutz

SEE ALSO Add carg(3).

bcmp.3

mtk

CONFORMING TO: POSIX.1-2008 removes the specification of bcmp().

bsd_signal.3

mtk

CONFORMING TO: POSIX.1-2008 removes the specification of bsd_signal().

bzero.3

mtk

CONFORMING TO: POSIX.1-2008 removes the specification of bzero().

cexp2.3

mtk

AVAILABILITY: These functions are still not in glibc as at version 2.8.

clock_getres.3

mtk

SEE ALSO: Add clock_getcpuclockid(3).

clog2.3

mtk

AVAILABILITY: These functions are still not in glibc as at version 2.8.

ctime.3

mtk

POSIX.1-2008 marks asctime(), asctime_r(), ctime(), and ctime_r() as obsolete.

dprintf.3

mtk

CONFORMING TO: These functions are nowadays in POSIX.1-2008.

ecvt.3

mtk

CONFORMING TO: POSIX.1-2008 removes the specifications of ecvt() and fcvt().

ftime.3

mtk

CONFORMING TO: POSIX.1-2008 removes the specification of ftime().

ftw.3

mtk

CONFORMING TO: POSIX.1-2008 marks ftw() as obsolete.

gcvt.3

mtk

CONFORMING TO: POSIX.1-2008 removes the specification of gcvt().

getcwd.3

Reuben Thomas / mtk

Clarify description of getcwd() for buf==NULL case;

CONFORMING TO: According to POSIX.1, the behavior of getcwd() is unspecified for the buf==NULL case.

mtk

Add an introductory paragraph giving an overview of what these functions do.

Fix error in description of getwd(): it does not truncate the pathname; rather, it gives an error if the pathname exceeds PATH_MAX bytes.

Rewrote RETURN VALUE section.

Add EINVAL ENAMETOOLONG errors for getwd().

Various other clarifications and wording fixes.

CONFORMING TO: POSIX.1-2001 does not define any errors for getwd().

CONFORMING TO: POSIX.1-2008 removes the specification of getwd().

gethostbyname.3

mtk

CONFORMING TO: POSIX.1-2008 removes the specifications of gethostbyname(), gethostbyaddr(), and h_errno.

gets.3

mtk

CONFORMING TO: POSIX.1-2008 removes the specification of gets().

iconv.3

iconv_close.3

iconv_open.3

mtk

VERSIONS: These functions are available in glibc since version 2.1.

index.3

mtk

CONFORMING TO: POSIX.1-2008 removes the specifications of index() and rindex().

isalpha.3

mtk

CONFORMING TO: POSIX.1-2008 marks isalpha() as obsolete.

makecontext.3

mtk

CONFORMING TO: POSIX.1-2008 removes the specifications of makecontext() and swapcontext().

memchr.3

mtk

VERSIONS: memchr() since glibc 2.2; rawmemchr() since glibc 2.1.

mempcpy.3

mtk

VERSIONS: mempcpy() since glibc 2.1.

mktemp.3

mtk

CONFORMING TO: POSIX.1-2008 removes the specification of mktemp().

opendir.3

mtk

CONFORMING TO: POSIX.1-2008 specifies fdopendir().

rand.3

mtk

CONFORMING TO: POSIX.1-2008 marks rand_r() as obsolete.

siginterrupt.3

mtk

CONFORMING TO: POSIX.1-2008 marks siginterrupt() as obsolete.

sigset.3

mtk

CONFORMING TO: POSIX.1-2008 marks sighold(), sigignore(),
sigpause(), sigrelse(), and sigset() as obsolete.

strchr.3

mtk

VERSIONS: strchrnul() since glibc 2.1.1.

tempnam.3

mtk

CONFORMING TO: POSIX.1-2008 marks tempnam() as obsolete.

tmpnam.3

mtk

CONFORMING TO: POSIX.1-2008 marks tmpnam() as obsolete.

toascii.3

mtk

CONFORMING TO: POSIX.1-2008 marks toascii() as obsolete.

ualarm.3

mtk

CONFORMING TO: POSIX.1-2008 removes the specification of ualarm().

ulimit.3

mtk

CONFORMING TO: POSIX.1-2008 marks ulimit() as obsolete.

usleep.3

mtk

CONFORMING TO: POSIX.1-2008 removes the specification of usleep().

standards.7

mtk

Updated details for POSIX.1-2008, and noted that if
POSIX.1-2001 is listed in the CONFORMING TO section of a man

page, then the reader can assume that the interface is also specified in POSIX.1-2008, unless otherwise noted.

time.7

mtk

SEE ALSO: Add clock_getcpuclockid(3).

udp.7

mtk

SEE ALSO: add udplite(7).

Changes to individual pages (math functions)

Various changes here following on from the big update to the math pages in the previous release. Test results going back glibc 2.3.2 (so far) allowed updates to various pages to note changes in historical behavior for error reporting by math functions. Thanks to the following people for providing me with test results on various distributions and glibc versions: Alain Portal, Andries Brouwer, Fabian Kreutz, Heikki Orsila, Khalil GHORBAL, Pavel Heimlich, Reuben Thomas, Samuel Thibault, Soh Kam Yung, and Stephane Chazelas

cabs.3

cacos.3

cacosh.3

carg.3

casin.3

casinh.3

catan.3

catanh.3

ccos.3

ccosh.3

cexp.3

cimag.3

clog.3

clog10.3

conj.3

cpow.3

cproj.3

creal.3

csin.3

csinh.3

csqrt.3

ctan.3

ctanh.3

exp10.3

exp2.3

fdim.3

fenv.3

fma.3

fmax.3

fmin.3

log2.3

lrint.3

lround.3

nan.3

pow10.3

remquo.3

round.3

scalbln.3

sincos.3

tgamma.3

trunc.3

mtk

Added VERSIONS section noting that these functions first appeared in glibc in version 2.1.

cosh.3

mtk

BUGS: In glibc 2.3.4 and earlier, an FE_OVERFLOW exception is not raised when an overflow occurs.

fenv.3

mtk / Fabian Kreuz

Provide more detail in the description of rounding modes.

Add text describing FLT_ROUNDS (formerly in fma.3).

Add BUGS section pointing out the FLT_ROUNDS does not reflect changes by fesetround().

fma.3

mtk

Remove text about FLT_ROUNDS, replacing with a cross-reference to fenv(3).

fpclassify.3

mtk

CONFORMING TO: Note that the standards provide a weaker guarantee for the return value of isinf().

log.3

mtk

BUGS: In glibc 2.5 and earlier, log(nan("")) produces a bogus FE_INVALID exception.

lround.3

mtk

Add reference to fenv(3) for discussion of current rounding mode.

nextafter.3

mtk

BUGS: In glibc 2.5 and earlier these functions do not raise an FE_UNDERFLOW exception on underflow.

pow.3

mtk

BUGS: described buggy NaN return when x is negative and y is large.
See also: http://sources.redhat.com/bugzilla/show_bug.cgi?id=3866.
BUGS: Note the bogus FE_INVALID exception that occurred in glibc 2.3.2 and earlier on overflow and underflow.

remainder.3

mtk

Add reference to fenv(3) for discussion of current rounding mode.

round.3

mtk

Add reference to fenv(3) for discussion of current rounding mode.

scalb.3

mtk

CONFORMING TO: POSIX.1-2008 removes the specification of scalb().

tgamma.3

mtk

BUGS: In glibc 2.3.3, tgamma(+0) produced a domain error instead of a pole error.

y0.3

mtk

In glibc 2.3.2 and earlier, these functions do not raise an FE_INVALID exception for a domain error.

math_error.7

mtk

Rewrite introductory paragraph.
Point out that a NaN is commonly returned by functions that report a domain error.

==== Changes in man-pages-3.08 =====

Released: 2008-08-27, Zurich

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Gerrit Renker <gerrit@erg.abdn.ac.uk>
Li Zefan <lizf@cn.fujitsu.com>
Mike Bianchi <MBianchi@foveal.com>
Sam Varshavchik <mrsam@courier-mta.com>
Venkatesh Srinivas <me@acm.jhu.edu>
Vijay Kumar <vijaykumar@bravegnu.org>

Apologies if I missed anyone!

New and rewritten pages

getnetent_r.3

mtk

Documents getnetent_r(), getnetbyname_r(), and getnetbyaddr_r(), the reentrant equivalents of getnetent(), getnetbyname(), and getnetbyaddr().

getprotoent_r.3

mtk

Documents getprotoent_r(), getprotobyname_r(), and getprotobynumber_r(), the reentrant equivalents of getprotoent(), getprotobyname(), and getprotobynumber().

getrpcnt_r.3

mtk

Documents getrpcnt_r(), getrpcbyname_r(), and getrpcbynumber_r(), the reentrant equivalents of getrpcnt(), getrpcbyname(), and getrpcbynumber().

getservent_r.3

mtk

Documents getservent_r(), getservbyname_r(), and getservbyport_r(), the reentrant equivalents of getservent(), getservbyname(), and getservbyport().

numa.7

mtk

A new page giving overview details for the Linux NUMA interfaces.
Incorporates some material from mbind.2, and the description
of /proc/PID/numa_maps from proc.5.

Newly documented interfaces in existing pages

crypt.3

mtk

Add description of crypt_r().

New and changed links

crypt.3

mtk

New link to crypt.3.

getnetbyname_r.3

getnetbyaddr_r.3

mtk

New links to new getnetent_r.3.

getprotobyname_r.3

getprotobyname_r.3

mtk

New links to new getprotoent_r.3.

getrpcbyname_r.3

getrpcbynumber_r.3

mtk

New links to new getrpcent_r.3.

getservbyname_r.3

getservbyport_r.3

mtk

New links to new getservent_r.3.

numa_maps.5

mtk

Link to new numa(7) page, which incorporates the
/proc/PID/numa_maps description.

As part of the numactl() package, the /proc/PID/numa_maps
documentation was in a numa_maps.5 page; this link
ensures that "man 5 numa_maps" still works.

(Eventually, we may want to remove this link.)

Global changes

get_mempolicy.2

mbind.2

move_pages.2

set_mempolicy.2

mtk

Add reference to numa(7) for information on library support.

Added a VERSIONS section.

SEE ALSO: Add numa(7).

faccessat.2

fchmodat.2

fchownat.2

fstatat.2

mkdirat.2

mknodat.2

linkat.2

openat.2

readlinkat.2

renameat.2

symlinkat.2

unlinkat.2

mkfifoat.3

psignal.3

strsignal.3

mtk

These interfaces are specified in POSIX.1-2008.

Changes to individual pages

eventfd.2

Vijay Kumar

When an eventfd overflows, select() indicates the file as both readable and writable (not as having an exceptional condition).

fcntl.2

mtk

F_DUPFD_CLOEXEC is specified in POSIX.1-2008.

getrlimit.2

mtk

NOTES: Add text mentioning the shell 'ulimit' (or 'limit')

built-in command for setting resource limits.

gettimeofday.2

mtk

CONFORMING TO: POSIX.1-2008 marks gettimeofday() as obsolete.

link.2

mtk

Note kernel version where Linux stopped following symbolic links in 'oldpath'; see also <http://lwn.net/Articles/294667>.

POSIX.1-2008 makes it implementation-dependent whether or not 'oldpath' is dereferenced if it is a symbolic link.

Add a reference to linkat(2) for an interface that allows precise control of the treatment of symbolic links.

mbind.2

mtk

Remove material on library support and numactl; that material is now in numactl.7.

mmap.2

mtk

Add kernel version numbers for MAP_32BIT.

Add some details on MAP_32BIT (see <http://lwn.net/Articles/294642>).

move_pages.2

mtk

Added VERSIONS (from kernel 2.6.18) and CONFORMING TO sections.

open.2

mtk

O_CLOEXEC is specified in POSIX.1-2008.

socket.2

mtk

s/d/domain/ for name of argument.

Add reference to socket(2) for further information on domain, type, and protocol arguments.

utimensat.2

mtk

CONFORMING TO: POSIX.1-2008 specifies utimensat() and futimens().

dirfd.3

mtk

CONFORMING TO: Add POSIX.1-2008; other minor changes.

exec.3

mtk

Small rewording: "s/returned/failed with/ [an error]".

fmemopen.3

mtk

Since glibc 2.7, it is possible to seek past the end of a stream created by `open_memstream()`. Add a BUGS section describing the bug in earlier glibc versions.

gethostbyname.3

mtk

Clarify exactly which functions are obsoleted by `getnameinfo()` and `getaddrinfo()`.

getnetent.3

mtk

Rephrase description in terms of a database, rather than a file. Note that each of the `get*()` functions opens a connection to the database if necessary.

The database connection is held open between `get*()` calls if 'stayopen' is non-zero (not necessarily 1).

s/zero terminated list/NULL-terminated list/

mtk

In glibc 2.2, the type of the 'net' argument for `getnetbyaddr()` changed from 'long' to 'uint32_t'.

mtk

Note that the `gethostbyaddr()` 'net' argument is in host byte order.

mtk

RETURN VALUE: emphasize that returned pointer points to a statically allocated structure.

SEE ALSO: add `getnetent_r.3`.

getprotoent.3

mtk

Rephrase description in terms of a database, rather than a file. Note that each of the `get*()` functions opens a connection to the database if necessary.

The database connection is held open between `get*()` calls if 'stayopen' is non-zero (not necessarily 1).

s/zero terminated list/NULL-terminated list/

mtk

RETURN VALUE: emphasize that returned pointer points to a statically allocated structure.

SEE ALSO: add `getprotoent_r.3`.

getrpcent.3

mtk

s/rpc/RPC/.

Rephrase description in terms of a database, rather than a file.

Note that each of the get*() functions opens a connection to the database if necessary.

s/zero terminated list/NULL-terminated list/

mtk

RETURN VALUE: emphasize that returned pointer points to a statically allocated structure.

SEE ALSO: add getrpcnt_r.3.

getservent.3

mtk

Rephrase description in terms of a database, rather than a file.

Note that each of the get*() functions opens a connection to the database if necessary.

The database connection is held open between get*() calls if 'stayopen' is non-zero (not necessarily 1).

s/zero terminated list/NULL-terminated list/

mtk

RETURN VALUE: emphasize that returned pointer points to a statically allocated structure.

SEE ALSO: add getservent_r.3.

mkdtemp.3

mtk

CONFORMING TO: this function is specified in POSIX.1-2008.

mq_notify.3

Venkatesh Srinivas

s/sigev_notify_function/sigev_thread_function/

as per <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=494956>.

realpath.3

mtk

Relocate text for resolved_path==NULL case to DESCRIPTION.

POSIX.1-2001 leaves the resolved_path==NULL case as

implementation-defined; POSIX.1-2008 specifies the behavior

described in this man page.

sem_init.3

mtk

POSIX.1-2008 rectifies the POSIX.1-2001 omission, specifying that zero is returned by a successful sem_init() call.

core.5

Mike Bianchi / mtk

Make the page more helpful to non-programmers by referencing

the documentation of the shell's 'ulimit' command in the

discussion of RLIMIT_CORE and RLIMIT_FSIZE.

SEE ALSO: Add bash(1).

mtk

Note that a core dump file can be used in a debugger.

proc.5

mtk

Remove /proc/PID/numa_maps material (it is now in numa(7)).

cpuset.7

mtk

SEE ALSO: Add numa(7).

inotify.7

mtk / Li Zefan

Explain bug that occurred in coalescing identical events in kernels before 2.6.25.

(See commit 1c17d18e3775485bf1e0ce79575eb637a94494a2 "A potential bug in inotify_user.c" in the 2.6.25 Changelog.)

pthread.7

mtk

Update thread-safe functions list with changes in POSIX.1-2008.

SEE ALSO: add proc(5).

signal.7

mtk

Update list of async-signal-safe functions for POSIX.1-2008.

==== Changes in man-pages-3.09 =====

Released: 2008-09-10, Munich

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Bernd Eckenfels <be-mail2006@lina.inka.de>

Bruno Haible <bruno@clisp.org>

Carsten Emde <Carsten.Emde@osadl.org>

Christopher Head <chead@telus.net>

H. Peter Anvin <hpa@zytor.com>

Jan Engelhardt <jengelh@medozas.de>

Joe Korty <joe.korty@ccur.com>

Marko Kreen <markokr@gmail.com>

Martin (Joey) Schulze <joe@infodrom.org>
Mats Wichmann <mats.d.wichmann@intel.com>
Michael Schurter <michael@susens-schurter.com>
Mike Bianchi <MBianchi@foveal.com>
Mike Frysinger <vapier@gentoo.org>
Sam Varshavchik <mrsam@courier-mta.com>
Suka <sukadev@us.ibm.com>
Timothy S. Nelson <wayland@wayland.id.au>
Tolga Dalman <tdalman@project-psi.org>
Török Edwin <edwintorok@gmail.com>

Apologies if I missed anyone!

New and rewritten pages

fopencookie.3

mtk

Document fopencookie(3), a library function that allows custom implementation of a stdio stream.

networks.5

Martin (Joey) Schulze, with a few light edits by mtk

Documents the /etc/networks file.

Global changes

Various pages

mtk

s/time zone/timezone/ for consistency across pages and with POSIX.1.

kill.2

sigaction.2

sigpending.2

sigprocmask.2

sigsuspend.2

confstr.3

ctermid.3

ctime.3

ferror.3

flockfile.3

fopen.3

getaddrinfo.3

getgrnam.3

getnameinfo.3
getopt.3
getpwnam.3
longjmp.3
popen.3
rand.3
readdir.3
setjmp.3
sigsetops.3
sigwait.3
strtok.3
tzset.3
unlocked_stdio.3

mtk

Add/fix feature test macro requirements.

Changes to individual pages

fcntl.2

mtk, after a note by Mike Bianchi

More clearly and consistently describe whether or not the third argument to fcntl() is required, and what its type should be.

mtk

Move description of negative l_len from NOTES, integrating it into the discussion of file locking.

Minor rewrites of the text on file locking.

getrusage.2

Bernd Eckenfels

SEE ALSO: Add clock(3), clock_gettime(3).

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=353475>

ioctl_list.2

mtk

Remove old sentence about where to send updates for this page.

Add more detail on mount options that prevent updates to atime.

sched_setscheduler.2

Carsten Emde

Update kernel version numbers relating to real-time support.

stat.2

H. Peter Anvin

Note that lstat() will generally not trigger automounter action, whereas stat() will.

clock.3

Bernd Eckenfels

SEE ALSO: Add clock_gettime(3).

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=353475>

clock_getres.3

Tolga Dalman / mtk

Add "Link with -lrt" to SYNOPSIS; remove now redundant sentence mentioning librt from NOTES.

getdate.3

mtk

Rewrite description of getdate_r() and integrate into main text (rather than describing in NOTES).

Other parts rewritten for greater clarity.

Make it clearer in the main text that glibc does not implement %Z; remove discussion of that point from NOTES.

Added an example program.

hsearch.3

mtk

Noted that table size as specified by 'nel' is immutable.

Described differences between hsearch() and hsearch_r().

Added missing pieces to RETURN VALUE.

Added a number of new entries under ERRORS.

NOTES: added some basic advice on sizing the hash table; noted that when a table is destroyed, the caller is responsible for freeing the buffers pointed to by 'key' and 'data' fields.

One of the BUGS was fixed in glibc 2.3.

Rewrote and clarified various other pieces.

Rename arguments for reentrant functions, using same name as glibc headers: s/ret/retval/; s/tab/htab/.

mtk, after a suggestion by Timothy S. Nelson

Integrate discussion of reentrant functions into main discussion (rather than as a short paragraph at the end).

iconv.3

Bruno Haible

Describe "shift sequence" input.

ptsname.3

sukadev

Fix return type of ptsname_r() in SYNOPSIS.

readdir.3

H. Peter Anvin

s/stat(2)/lstat(2)/ when discussing d_type (since we

are talking about a case where we might be interested to whether the file itself is a symbolic link).

sigsetops.3

Chris Head, signed-off-by: Mike Fry singer

Fix typo: s/sigdelset/sigorset/

proc.5

Mats Wichmann / mtk

s/[number]/[pid]/ in file names for /proc/PID files.

And similar changes for task/[tid] sub-directories.

mtk / Mats Wichmann

In the description of /proc/[pid]/environ, remove reference to lilo(8)/grub(8) since there seems to be nothing in those pages that related to this /proc file.

Michael Schurter / mtk

Remove sentence wrongly saying that /proc/meminfo reports info in bytes;

see <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=462969>

mtk

Note that /proc/meminfo reports system-wide memory usage statistics.

Joe Kerty

Document new fields in /proc/interrupts that were added in Linux 2.6.24.

unix.7

Marko Kreen

Since glibc 2.8, `_GNU_SOURCE` must be defined in order to get the definition of the `ucred` structure from `<sys/socket.h>`.

==== Changes in man-pages-3.10 =====

Released: 2008-09-23, Munich

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

André Goddard Rosa <andre.goddard@gmail.com>

George Spelvin <linux@horizon.com>

Pavel Heimlich <tropikhajma@seznam.cz>

Sam Varshavchik <mrsam@courier-mta.com>

John Reiser <jreiser@bitwagon.com>

Apologies if I missed anyone!

Global changes

closedir.3

dirfd.3

readdir.3

rewinddir.3

scandir.3

seekdir.3

telldir.3

mtk

Fix 'dir' argument name: should be 'dirp'.

POSIX.1-2008 and glibc call this argument 'dirp' (consistent with the fact that it is a *pointer* to a DIR structure).

Changes to individual pages

clone.2

mtk, after a comment by John Reiser

Clarify text describing getpid() caching bug for clone() wrapper.

See also:

http://sourceware.org/bugzilla/show_bug.cgi?id=6910

https://bugzilla.redhat.com/show_bug.cgi?id=417521

getpid.2

mtk, after a comment by John Reiser

Describe getpid()'s PID caching and its consequences.

timerfd_create.2

Sam Varshavchik

s/it_interval/it_value/ when talking about TIMERFD_ABSTIME.

closedir.3

George Spelvin

Clarify closedir()'s treatment of underlying file descriptor.

tsearch.3

André Goddard Rosa

Fix memory leak in example program.

Add use of tdestroy to example program.

mtk

Add "#define _GNU_SOURCE" to example program.

protocols.5

mtk, after a note from Pavel Heimlich

Remove SEE ALSO references to nonexistent Guides to Yellow Pages

services.5

mtk

Remove some out-of-date bugs.

mtk, after a note from Pavel Heimlich

Remove SEE ALSO references to nonexistent Guides to Yellow Pages
and Bind/Hesiod docs.

mtk

Remove crufty text about use of comma instead of slash to separate
port and protocol.

===== Changes in man-pages-3.11 =====

Ricardo Catalinas Jiménez <jimenezrick@gmail.com>

Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

New and rewritten pages

umount.2

Michael Kerrisk

Create a new page for `umount()` and `umount2()` by extracting existing material from `mount.2` page.

New and changed links

`umount.2`

Michael Kerrisk

Change link to point to new `umount.2`

The `umount2()` material migrated from `mount.2` to `umount.2`

Changes to individual pages

`execve.2`

Michael Kerrisk

`_SC_ARG_MAX` is no longer necessarily constant

POSIX.1-2001 says that the values returned by `sysconf()` are constant for the life of the process.

But the fact that, since Linux 2.6.23, `ARG_MAX` is settable via `RLIMIT_STACK` means `_SC_ARG_MAX` is no longer constant, since it can change at each `execve()`.

Michael Kerrisk

Linux now imposes a floor on the `ARG_MAX` limit

Starting with Linux 2.6.23, the `ARG_MAX` limit became settable via (1/4 of) `RLIMIT_STACK`. This broke ABI compatibility if `RLIMIT_STACK` was set such that `ARG_MAX` was < 32 pages. Document the fact that since 2.6.25

Linux imposes a floor on `ARG_MAX`, so that the old limit of 32 pages is guaranteed.

For some background on the changes to `ARG_MAX` in kernels 2.6.23 and 2.6.25, see:

http://sourceware.org/bugzilla/show_bug.cgi?id=5786

http://bugzilla.kernel.org/show_bug.cgi?id=10095

<http://thread.gmane.org/gmane.linux.kernel/646709/focus=648101>,
checked into 2.6.25 as

commit `a64e715fc74b1a7dcc5944f848acc38b2c4d4ee2`.

Also some reordering/rewording of the discussion of `ARG_MAX`.

`fallocate.2`

Michael Kerrisk

Note lack of glibc wrapper; caller must use `syscall(2)`

Glibc doesn't (and quite probably won't) include a wrapper for this system call. Therefore, point out that

potential callers will need to use `syscall(2)`, and rewrite the RETURN VALUE text to show things as they would be if `syscall()` is used.

Michael Kerrisk

Refer reader to `posix_fallocate(3)` for portable interface
Add a para to start of page that points out that this is the low-level, Linux-specific API, and point the reader to `posix_fallocate(3)` for the portable API.

getdents.2

readdir.3

Michael Kerrisk

`d_type` is currently only supported on `ext[234]`
As at kernel 2.6.27, only `ext[234]` support `d_type`.
On other file systems, `d_type` is always set to `DT_UNKNOWN (0)`.

getdents.2

Michael Kerrisk

Add an example program

Michael Kerrisk

comment out `linux_dirent` fields with varying location
The location of the fields after `d_name` varies according to the size of `d_name`. We can't properly declare them in C; therefore, put those fields inside a comment.

Michael Kerrisk

The `DT_*` constants are defined in `<dirent.h>`

Michael Kerrisk

Remove header files from SYNOPSIS
None of the header files provides what is needed.
Calls are made via `syscall(2)`.

Michael Kerrisk

The programmer must define the `linux_dirent` structure
Point out that this structure is not defined in glibc headers.

Michael Kerrisk

`s/dirent/linux_dirent/`
The structure isn't currently defined in glibc headers, and the kernel name of the structure is `'linux_dirent'` (as was already used in some, but not all, places in this page).

getrlimit.2

Michael Kerrisk

Reword/relocate discussion of BSD's historical `RLIMIT_OFILE`
The old sentence sat on its own in an odd place, and anyway the modern BSDs use the name `RLIMIT_NOFILE`.

Michael Kerrisk

Refer to `execve(2)` for `RLIMIT_STACK`'s effect on `ARG_MAX`
Refer the reader to new text in `execve(2)` that describes how

(since Linux 2.6.23) RLIMIT_STACK determines the value of ARG_MAX.

getrusage.2

Michael Kerrisk

Rusage measures are preserved across execve(2)

mlock.2

Maxin John

Add EAGAIN error.

move_pages.2

Nicolas François

Make a detail of EPERM error more precise

mount.2

Michael Kerrisk

Add description of per-process namespaces

Describe per-process namespaces, including discussion of clone() and unshare CLONE_NEWNS, and /proc/PID/mounts.

Michael Kerrisk

List a few other file systems that we may see in /proc/filesystems

Add some modern file systems to that list (xfs, jfs, ext3, reiserfs).

Michael Kerrisk

Document MS_SILENT (and MS_VERBOSE)

mount.2

umount.2

Michael Kerrisk

Split umount*() out into a separate page

The length of this page means that it's becoming difficult to parse which info is specific to mount() versus umount()/umount2(), so split the umount material out into its own page.

pause.2

Michael Kerrisk

Remove mention of words "library function"

This really is a system call.

readdir.2

Michael Kerrisk

The programmer must declare the old_linux_dirent structure

Glibc does not provide a definition of this structure.

Michael Kerrisk

s/dirent/old_linux_dirent/

Nowadays, this is the name of the structure in the kernel sources.

Michael Kerrisk

Remove words "which may change"

These words are slightly bogus: although the interface is obsolete, for ABI-compatibility reasons, the kernel folk should never be changing this interface.

Michael Kerrisk

Remove header files from SYNOPSIS

glibc doesn't provide any support for readdir(2), so remove these header files (which otherwise suggest that glibc does provide the required pieces).

recv.2

Nicolas François

Move kernel version number to first mention to MSG_ERRQUEUE.

semop.2

Kirill A. Shutemov

Fix typo in example

(The '&' before sop in the semop() call is unneeded.)

send.2

Michael Kerrisk

Make kernel version for MSG_CONFIRM more precise
s/2.3+ only/Since Linux 2.3.15/

sigaction.2

Michael Kerrisk

Refer reader to signal(7) for an overview of signals
Explain semantics of signal disposition during fork() and execve()
Refer to signal(7) for more details on signal mask.

sigaltstack.2

Michael Kerrisk

Explain inheritance of alternate signal stack across fork(2)

sigwaitinfo.2

Michael Kerrisk

Distinguish per-thread and process-wide signals
A sentence clarifying that pending signal set is union of
per-thread and process-wide pending signal sets.

Michael Kerrisk

These interfaces have per-thread semantics
The page was previously fuzzy about whether these interfaces have process-wide or per-thread semantics. (E.g., now the page states that the calling *thread* (not process) is suspended until the signal is delivered.)

sigpending.2

Michael Kerrisk

Explain effect of `fork()` and `execve()` for pending signal set

Michael Kerrisk

Explain how thread's pending signal set is defined

The pending set is the union of per-thread pending signals and process-wide pending signals.

sigprocmask.2

Michael Kerrisk

Explain effects of `fork()` and `execve()` for signal mask

splice.2

Michael Kerrisk

Note that `SPLICE_F_MOVE` is a no-op since kernel 2.6.21

syscall.2

Michael Kerrisk

Add more detail about wrapper functions

Add a few more details about work generally done by wrapper functions. Note that `syscall(2)` performs the same steps.

tkill.2

Michael Kerrisk

`EINVAL` error can also occur for invalid TGID

The `EINVAL` error on an invalid TGID for `tkill()` was not documented; this change documents it.

utimensat.2

Michael Kerrisk

POSIX.1-2008 revision will likely affect FTMs for `futimens()`

Make it clear that the POSIX.1 revision that is likely to affect the feature test macro requirements for `futimens()` is POSIX.1-2008.

Nicolas François

Make various wordings a little more precise.

The `times` argument point to **an array of** structures, and the man-page should say that consistently.

wait4.2

Michael Kerrisk

`wait3()` is a library function layered on `wait4()`.

On Linux `wait3()` is a library function implemented on top of `wait4()`. (Knowing this is useful when using `strace(2)`, for example.)

atan2.3

Nicolas François

Fix error in description of range or return value

In recent changes to the man page, mtk accidentally changed the description of the return value range to $-\pi/2..pi/2$; the correct range is $-\pi..pi$.

cmmsg.3

Nicolas François

Add parentheses after macro names.

ctime.3

Michael Kerrisk

Clarify mktime()'s use of tm_isdst

Describe use of tm_isdst for input to mktime(); explain how mktime() modifies this field. (This field is left unchanged in case of error.)

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=500178>

Michael Kerrisk

Clarify wording for ctime_r() and asctime_r() to indicate that the buffer must be at least 26 *bytes*.

Michael Kerrisk

Minor rewording of mktime() description.

floor.3

Nicolas François

floor.3: Fix error in description: s/smallest/largest/

hsearch.3

André Goddard Rosa

Call hdestroy() after using hash table created by hcreate(), for the sake of completeness

mq_getattr.3

Michael Kerrisk

mq_getattr() and mq_setattr() are layered on mq_getsetattr(2) mq_getattr() and mq_setattr() are library functions layered on top of the mq_getsetattr(2) system call. (This is useful info for users of strace(1).)

mq_receive.3

Michael Kerrisk

mq_send() is a library function layered on mq_timedreceive() syscall This info is useful for users of strace(1).

mq_send.3

Michael Kerrisk

mq_send() is a library function layered on mq_timedsend() syscall This info is useful for users of strace(1).

nextafter.3

Nicolas François

Make description more precise: s/next/largest/

readdir.3

Michael Kerrisk

SEE ALSO: add getdents(2)

Because readdir() is implemented on top of getdents(2).

realpath.3

Michael Kerrisk

Clarify that returned pathname is NULL terminated

Also clarify that null-byte is included in PATH_MAX limit.

proc.5

Michael Kerrisk

Rewrite and simplify description of /proc/mounts

Most of the relevant discussion is now under /proc/PID/mounts;
all that needs to be here is a mention of the pre-2.4.19
system-wide namespace situation, and a reference to the
discussion under /proc/PID/mounts.

Michael Kerrisk

Add description of /proc/PID/mounts

Largely cribbed from existing /proc/mounts discussion, which is
about to be rewritten.

mq_overview.7

Michael Kerrisk

Add mq_notify() to list of lib. functions and syscalls in MQ API

signal.7

Michael Kerrisk

Improve description in NAME section

Add mention of sigaltstack(2).

Describe syscalls that synchronously wait for a signal,

Give overview of syscalls that block until a signal is caught

Add overview of interfaces for sending signals.

Michael Kerrisk

Describe semantics w.r.t. fork() and execve()

Include text describing semantics of fork() and execve() for
signal dispositions, signal mask, and pending signal set.

==== Changes in man-pages-3.12 =====

Released: 2008-10-29, Bucaramanga

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Bert Wesarg <bert.wesarg@googlemail.com>

Apologies if I missed anyone!

New and rewritten pages

pthread_attr_init.3

Michael Kerrisk

New page for pthread_attr_init(3) and pthread_attr_destroy(3)

pthread_attr_setdetachstate.3

Michael Kerrisk

New page for pthread_attr_setdetachstate(3) and pthread_attr_getdetachstate(3)

pthread_attr_setguardsize.3

Michael Kerrisk

New page for pthread_attr_setguardsize(3) and pthread_attr_getguardsize(3)

pthread_attr_setscope.3

Michael Kerrisk

New page for pthread_attr_setscope(3) and pthread_attr_getscope(3)

pthread_attr_setstack.3

Michael Kerrisk

New page for pthread_attr_setstack(3) and pthread_attr_getstack(3)

pthread_attr_setstackaddr.3

Michael Kerrisk

New page for pthread_attr_setstackaddr(3) and
pthread_attr_getstackaddr(3)

pthread_attr_setstacksize.3

Michael Kerrisk

New page for pthread_attr_setstacksize(3) and
pthread_attr_getstacksize(3)

pthread_create.3

Michael Kerrisk

New page describing pthread_create(3)

pthread_detach.3

Michael Kerrisk

New page for pthread_detach(3)

pthread_equal.3

Michael Kerrisk

New page for pthread_equal(3)

pthread_exit.3

Michael Kerrisk

New page describing pthread_exit(3)

pthread_getattr_np.3

Michael Kerrisk

New page for pthread_getattr_np(3)

pthread_join.3

Michael Kerrisk

New page for pthread_join(3)

pthread_self.3

Michael Kerrisk

New page for pthread_self(3)

pthread_tryjoin_np.3

Michael Kerrisk

New page for pthread_tryjoin_np(3) and pthread_timedjoin_np(3)

Newly documented interfaces in existing pages

dup.2

Michael Kerrisk

Add description of dup3()
dup3() was added in kernel 2.6.27.

epoll_create.2

Michael Kerrisk

Add description of new epoll_create1()
The new epoll_create1() system call appeared in Linux 2.6.27.

eventfd.2

Michael Kerrisk

Describe eventfd2() and EFD_NONBLOCK and EFD_CLOEXEC
Linux 2.6.27 added eventfd(), which supports a flags argument
that eventfd() did not provide. The flags so far implemented
are EFD_NONBLOCK and EFD_CLOEXEC,

inotify_init.2

Michael Kerrisk

Add description of inotify_init1()
The inotify_init1() system call was added in Linux 2.6.27.

pipe.2

Michael Kerrisk

Add description of new pipe2() syscall
pipe2() was added in 2.6.27. Describe the O_NONBLOCK and
O_CLOEXEC flags.

signalfd.2

Michael Kerrisk

Describe signalfd4() and SFD_NONBLOCK and SFD_CLOEXEC
Linux 2.6.27 added signalfd4(), which supports a flags argument
that signalfd() did not provide. The flags so far implemented
are SFD_NONBLOCK and SFD_CLOEXEC.

New and changed links

dup3.2

Michael Kerrisk

New link to dup.2
dup.2 now contains the description of the new dup3() syscall.

epoll_create1.2

Michael Kerrisk

New link to epoll_create.2
epoll_create.2 now includes a description of the new
epoll_create1() system call.

eventfd2.2

Michael Kerrisk

New link to eventfd.2

The eventfd.2 page has some details on the eventfd2() system call, which was new in Linux 2.6.27.

inotify_init1.2

Michael Kerrisk

New link to inotify_init.2

inotify_init.2 now includes a description of the new inotify_init1() system call.

pipe2.2

Michael Kerrisk

New link to pipe.2

pipe(2) now contains a description of the new pipe2() syscall.

pthread_attr_destroy.3

Michael Kerrisk

New link to new pthread_attr_init.3

pthread_attr_getdetachstate.3

Michael Kerrisk

New link to new pthread_attr_setdetachstate.3

pthread_attr_getguardsize.3

Michael Kerrisk

New link to new pthread_attr_setguardsize.3

pthread_attr_getscope.3

Michael Kerrisk

New link to new pthread_attr_setscope.3

pthread_attr_getstack.3

Michael Kerrisk

New link to new pthread_attr_setstack.3

pthread_attr_getstackaddr.3

Michael Kerrisk

New link to new pthread_attr_setstackaddr.3

pthread_attr_getstacksize.3

Michael Kerrisk

New link to new pthread_attr_setstacksize.3

pthread_timedjoin_np.3

Michael Kerrisk

New link to new pthread_tryjoin_np.3

signalfd.2

Michael Kerrisk

New link to signalfd.2

signalfd.2 now includes text describing signalfd4() system call, new in Linux 2.6.27.

Global changes

eventfd.2, getdents.2, mprotect.2, signalfd.2, timerfd_create.2, wait.2, backtrace.3, clock_getcpuclockid.3, end.3, fmemopen.3, fopencookie.3, getdate.3, getgrouplist.3, getprotoent_r.3, getservernt_r.3, gnu_get_libc_version.3, inet.3, inet_pton.3, makecontext.3, matherr.3, offsetof.3, pthread_attr_init.3, pthread_create.3, pthread_getattr_np.3, sem_wait.3, strtol.3, core.5

Michael Kerrisk

Add ".SS Program source" to EXAMPLE

Add ".SS Program source" to clearly distinguish shell session and descriptive text from actual program code.

eventfd.2, execve.2, getdents.2, ioprio_set.2, mprotect.2, signalfd.2, timerfd_create.2, wait.2, backtrace.3, clock_getcpuclockid.3, end.3, fmemopen.3, fopencookie.3, frexp.3, getdate.3, getgrouplist.3, getprotoent_r.3, getservernt_r.3, gnu_get_libc_version.3, inet.3, inet_pton.3, makecontext.3, malloc.3, matherr.3, offsetof.3, pthread_attr_init.3, pthread_create.3, pthread_getattr_np.3, sem_wait.3, strptime.3, strtok.3, strtol.3, core.5, proc.5, cpuset.7, mq_overview.7

Michael Kerrisk

Format user input in shell sessions in boldface

frexp.3, strptime.3, strtok.3

Michael Kerrisk

Relocate shell session above example program

Move the shell session text that demonstrates the use of the example program so that it precedes the actual example program. This makes the page consistent with the majority of other pages.

Changes to individual pages

epoll_create.2

Michael Kerrisk

Say more about unused epoll_create() 'size' arg

Supply a little more explanation about why the 'size' argument of `epoll_create()` is nowadays ignored.

eventfd.2

Michael Kerrisk

Remove crufty text relating to flags argument

Remove sentence saying that glibc adds a flags argument to the syscall; that was only relevant for the older `eventfd()` system call.

getdents.2

Christoph Hellwig

Fix text relating to `DT_UNKNOWN` and 'd_type' support

Some file systems provide partial support for 'd_type', returning `DT_UNKNOWN` for cases they don't support.

Update the discussion of 'd_type' and `DT_UNKNOWN` to support this.

getpeername.2, getsockname.2

Michael Kerrisk

SEE ALSO: add `ip(7)` and `unix(7)`

getsockopt.2

Michael Kerrisk

`EINVAL` can also occur if 'optval' is invalid

In some cases, `EINVAL` can occur if 'optval' is invalid.

Note this, and point reader to an example in `ip(7)`.

In response to:

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=216092>

inotify_init.2

pipe.2

timerfd_create.2

Michael Kerrisk

Clarify `*_NONBLOCK` description

Make it clear that the `NONBLOCK` flag sets an attribute in the new open file description.

sched_yield.2

Michael Kerrisk

Rewrite description in terms of threads

The text formerly described the operation of `sched_yield()` in terms of processes. It should be in terms of threads.

Michael Kerrisk

Add NOTES text on appropriate use of `sched_yield()`

Strategic calls to `sched_yield()` can be used to improve performance, but unnecessary use should be avoided.

sigaction.2

Michael Kerrisk

Clarify that `sa_mask` affects the *per-thread* signal mask
The page didn't previously clearly explain the scope of the signal mask that is affected by `sa_mask`.

signalfd.2

Michael Kerrisk

Remove crufty text relating to flags argument
Remove sentence saying that glibc adds a flags argument to the syscall; that was only relevant for the older `signalfd()` system call.

sigprocmask.2

Michael Kerrisk

Clarify that `sigprocmask()` operates on a per-thread mask
The first sentence of the page was vague on the scope of the attribute changed by `sigprocmask()`. Reword to make this clearer and add a sentence in NOTES to explicitly state that the signal mask is a per-thread attribute.

socket.2

Michael Kerrisk

Document `SOCK_NONBLOCK` and `SOCK_CLOEXEC` flags
These flags, specified in the 'type' argument, are supported since Linux 2.6.27.

socketpair.2

Michael Kerrisk

Refer to `socket(2)` for `SOCK_CLOEXEC` and `SOCK_NONBLOCK`
Refer the reader to `socket(2)` for a description of the `SOCK_CLOEXEC` and `SOCK_NONBLOCK` flags, which are supported by `socketpair()` since Linux 2.6.27.

syscalls.2

Michael Kerrisk

Add new 2.6.27 system calls
Add `pipe2()`, `dup3()`, `epoll_create1()`, `inotify_init1()`, `eventfd2()`, `signalfd4()`.

timerfd_create.2

Michael Kerrisk

Document `timerfd_create()` `TFD_CLOEXEC` and `TFD_NONBLOCK`
`TFD_CLOEXEC` and `TFD_NONBLOCK` are supported since Linux 2.6.27.

vfork.2

Michael Kerrisk

Clarify meaning of "child releases the parent's memory"
The man page was not explicit about how the memory used by

the child is released back to the parent.

ctime.3

Michael Kerrisk

ctime_r() and localtime_r() need not set 'timezone' and 'daylight'

The man page already noted that these functions need not set 'tzname', but things could be clearer: tzset() is not called, then the other two variables also are not set.

Also, clarify that ctime() does set 'timezone' and 'daylight'.

dlopen.3

Michael Kerrisk

LD_LIBRARY_PATH is inspected once, at program start-up

Make it clear that LD_LIBRARY_PATH is inspected *once*, at program start-up. (Verified from source and by experiment.)

fmemopen.3

Michael Kerrisk

Document binary mode (mode 'b')

Glibc 2.9 adds support to fmemopen() for binary mode opens.

Binary mode is specified by inclusion of the letter 'b' in the 'mode' argument.

getaddrinfo.3

Michael Kerrisk

Clarify error descriptions with some examples

Clarify the description of some errors by giving examples that produce the errors. (Text added for EAI_SERVICE and EAI_SOCKTYPE.)

Also, add an error case for EAI_BADFLAGS.

gethostbyname.3

Michael Kerrisk

Rationalize text on POSIX.1-2001 obsolete interfaces

POSIX.1 marks gethostbyname(), gethostbyaddr(), and 'h_errno' as obsolete. The man page explained this, but with some duplication. Remove the duplication, and otherwise tidy up discussion of this point.

popen.3

Michael Kerrisk

Change one-line description in NAME

s%process I/O%pipe stream to or from a process%

Michael Kerrisk

Document 'e' (close-on-exec) flag

glibc 2.9 implements the 'e' flag in 'type', which sets the

close-on-exec flag on the underlying file descriptor.

raise.3

Michael Kerrisk

SEE ALSO: add pthread_kill(3)

readdir.3

Christoph Hellwig

Fix text relating to DT_UNKNOWN and 'd_type' support

(This mirrors the previous change to getdents.2)

Some file systems provide partial support for 'dt_type',
returning DT_UNKNOWN for cases they don't support.

Update the discussion of 'd_type' and DT_UNKNOWN to
support this.

strcpy.3

Jason Spiro

Strengthen warning about checking against buffer overruns

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=413940>

tty_ioctl.4

Michael Kerrisk

Explain capability requirements for TIOCCONS

Explain capability requirements for TIOCCONS, and describe
changes in 2.6.10 relating to capabilities.

Michael Kerrisk

Explain capability requirements for various ioctls

For TIOCSLCKTRMIOS, TIOCSCTTY, TIOCEXCL, explain the exact
capability that is required (the text formerly just said "root"
in each case).

proc.5

Michael Kerrisk

Document /proc/sys/kernel/threads-max

Defines the system-wide limit on the number of threads (tasks).

utmp.5

Pierre Cazenave

It is just "other" who should not have write perms on utmp

The page was vague before, saying that utmp should not be
writable by any user. This isn't true: it can be, and
typically is, writable by user and group.

epoll.7

Michael Kerrisk

Mention epoll_create1() as part of epoll API

epoll_create1() was added in Linux 2.6.27, and extends the
functionality of epoll_create().

inotify.7

Michael Kerrisk

Mention `inotify_init1()` in overview of API

Discuss the new `inotify_init1()` system call in the overview of the inotify API.

ip.7

Michael Kerrisk

Detail `EINVAL` error for `IP_ADD_MEMBERSHIP` socket option

In response to:

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=216092>

iso_8859-7.7

Lefteris Dimitroulakis

Add Drachma, Euro, and Greek Ypogegrammeni

Also, amend description of characters 0241 and 0242.

man-pages.7

Michael Kerrisk

Example shell sessions should have user input boldfaced

pthread.7

Michael Kerrisk

Describe return value from pthreads functions

Describe the usual success (0) and failure (non-zero) returns, and note that POSIX.1-2001 specifies that pthreads functions can never fail with the error `EINTR`.

signal.7

Michael Kerrisk

Timeouts make socket interfaces non-restartable

If `setsockopt()` is used to set a timeout on a socket(), then the various socket interfaces are not automatically restarted, even if `SA_RESTART` is specified when establishing the signal handler. Analogous behavior occurs for the "stop signals" case.

socket.7

Michael Kerrisk

SEE ALSO: `add unix(7)`

ld.so.8

Michael Kerrisk

Document `LD_USE_LOAD_BIAS`

Drawing heavily on Jakub Jelinek's description in

<http://sources.redhat.com/ml/libc-hacker/2003-11/msg00127.html>

(Subject: [PATCH] Support `LD_USE_LOAD_BIAS`)

--inhibit-rpath is ignored for setuid/setgid ld.so
The --inhibit-rpath option is ignored if ld.so is setuid/setgid
(not if the executable is setuid/setgid).

Michael Kerrisk

Since glibc 2.4, setuid/setgid programs ignore LD_ORIGIN_PATH

Michael Kerrisk

Fix description of LD_PROFILE and LD_PROFILE_OUTPUT

Clarify that LD_PROFILE is pathname or a soname,
and identify name of profiling output file.

Fix description of LD_PROFILE_OUTPUT, which wasn't even close to
the truth. (But why did it remain unfixed for so many years?)

Michael Kerrisk

Since glibc 2.3.4, setuid/setgid programs ignore LD_DYNAMIC_WEAK

Michael Kerrisk

Since version 2.3.5, setuid/setgid programs ignore LD_SHOW_AUXV

Michael Kerrisk

Reorder lists of LD_* environment variables alphabetically

Michael Kerrisk

Since glibc 2.3.4, setuid/setgid programs ignore LD_DEBUG

==== Changes in man-pages-3.13 =====

Released: 2008-11-07, Bucaramanga

Contributors

Valdis Kletnieks <Valdis.Kletnieks@vt.edu>

Apologies if I missed anyone!

New and rewritten pages

pthread_attr_setaffinity_np.3

Michael Kerrisk

New page for `pthread_attr_setaffinity_np(3)` and
`pthread_attr_getaffinity_np(3)`

`pthread_attr_setschedparam.3`

Michael Kerrisk

New page for `pthread_attr_setschedparam(3)` and
`pthread_attr_getschedparam(3)`

`pthread_attr_setschedpolicy.3`

Michael Kerrisk

New page for `pthread_attr_setschedpolicy(3)` and
`pthread_attr_getschedpolicy(3)`

`pthread_setaffinity_np.3`

Michael Kerrisk

New page for `pthread_setaffinity_np(3)` and `pthread_getaffinity_np(3)`

`pthread_setschedparam.3`

Michael Kerrisk

New page for `pthread_setschedparam(3)` and `pthread_getschedparam(3)`

`pthread_setschedprio.3`

Michael Kerrisk

New page for `pthread_setschedprio(3)`

New and changed links

`pthread_attr_getaffinity_np.3`

Michael Kerrisk

New link to new `pthread_attr_setaffinity_np.3`

`pthread_attr_getschedparam.3`

Michael Kerrisk

New link to new `pthread_attr_setschedparam.3`

`pthread_attr_getschedpolicy.3`

Michael Kerrisk

New link to new `pthread_attr_setschedpolicy.3`

`pthread_getaffinity_np.3`

Michael Kerrisk

New link to new `pthread_setaffinity_np.3`

`pthread_getschedparam.3`

Michael Kerrisk

New link to new pthread_setschedparam.3

Global changes

pthread_attr_setaffinity_np.3

pthread_getattr_np.3

pthread_setaffinity_np.3

pthread_tryjoin_np.3

Michael Kerrisk

Explain _np suffix

Add text to CONFORMING TO explaining that the "_np" suffix is because these functions are non-portable.

Changes to individual pages

sched_setaffinity.2

Michael Kerrisk

SEE ALSO: add sched_getcpu(3)

sched_setaffinity.2

Michael Kerrisk

SEE ALSO: Add pthread_setaffinity_np(3)

sched_setaffinity.2

Michael Kerrisk

Clarify EINVAL error for cpusetsize < kernel mask size

For sched_setaffinity(), the EINVAL error that occurs if 'cpusetsize' is smaller than the kernel CPU set size only occurs with kernels before 2.6.9.

vfork.2

Michael Kerrisk

Child holds parent's memory until execve() or *termination*

The page was phrased in a few places to describe the child as holding the parent's memory until the child does an execve(2) or an _exit(2). The latter case should really be the more general process termination (i.e., either _exit(2) or abnormal termination).

clock_getres.3

Michael Kerrisk

CLOCK_PROCESS_CPUTIME_ID and CLOCK_THREAD_CPUTIME_ID not settable

According to POSIX.1-2001, the CLOCK_PROCESS_CPUTIME_ID and

CLOCK_THREAD_CPUTIME_ID clocks should be settable, but

currently they are not.

pthread_attr_setstacksize.3

Michael Kerrisk, after a report by Karsten Weiss

EINVAL occurs on some systems if stacksize != page-size
On MacOS X at least, pthread_attr_setstacksize(3) can fail with EINVAL if 'stacksize' is not a multiple of the system page size. Best to mention this so as to aid people writing portable programs.

pthread_create.3

Karsten Weiss

Fix bug in EXAMPLE program

The calloc() line should read like this instead:

```
tinfo = calloc(num_threads, sizeof(struct thread_info));
```

pthread_exit.3

Michael Kerrisk

BUGS: thread group with a dead leader and stop signals

Document the bug that can occur when a stop signal is sent to a thread group whose leader has terminated.

<http://thread.gmane.org/gmane.linux.kernel/611611>

<http://marc.info/?l=linux-kernel&m=122525468300823&w=2>

resolver.3

Michael Kerrisk

Fix prototype of dn_expand()

The 4th argument is "char *", not "unsigned char *".

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504708>

epoll.7

Michael Kerrisk

Fix error handling after accept() in example code

Simply continuing after an error is in most cases wrong, and can lead to infinite loops (e.g., for EMFILE).

So handle an error by terminating.

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504202>

epoll.7

Michael Kerrisk

Add error handling for epoll_wait() call in example code

epoll.7

Michael Kerrisk

Improve example code

Fill in some gaps in example code (variable declarations, adding listening socket to epoll set).

Give variables more meaningful names.
Other minor changes.
<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504202>

iso_8859-7.7

Lefteris Dimitroulakis

Add characters for Drachma and Greek Ypogegrammeni

Lines for these two characters were added in the previous patch,
but the actual characters were not included in the 4th column
of the table. This fixes that.

pthread.7

Michael Kerrisk

Add a section describing thread IDs

In particular, note that in each pthreads function that takes
a thread ID argument, that ID by definition refers to a thread
in the same process as the caller.

===== Changes in man-pages-3.14 =====

Stew Benedict <stewb@linux-foundation.org>
Vegard Nossum <vegard.nossum@gmail.com>

Apologies if I missed anyone!

New and rewritten pages

CPU_SET.3

Michael Kerrisk

New page documenting CPU_* macros

This page contains material moved out of sched_setscheduler(2).

It overwrites a previously existing link file with the same name.

Michael Kerrisk

Add description of macros for dynamically allocated CPU sets

Add descriptions of CPU_ALLOC(), CPU_ALLOC_SIZE(), CPU_FREE(), CPU_SET_S(), CPU_CLR_S(), CPU_ISSET_S(), CPU_ZERO_S(), CPU_COUNT_S(), CPU_AND_S(), CPU_OR_S(), CPU_XOR_S(), and CPU_EQUAL_S().

Michael Kerrisk

Add documentation of CPU_COUNT()

Michael Kerrisk

Add description of CPU_AND(), CPU_OR, CPU_XOR(), and CPU_EQUAL()

Plus a few other small clean-ups of the text

Michael Kerrisk

Various improvements in DESCRIPTION

After review comments by Bert Wesarg:

- * Explain that cpu_set_t is a bitset, but should be considered opaque.
- * A CPU set can be duplicated with memset().
- * Size of a CPU set is rounded up to size of long.
- * CPU_SETSIZE is in bits, but the setsize argument is in bytes.

Michael Kerrisk

Document CPU_ALLOC()/CPU_ALLOC_SIZE() bug

These macros return twice what they should because of thinko in glibc 2.8 and earlier. The bug is fixed for glibc 2.9.

http://sourceware.org/bugzilla/show_bug.cgi?id=7029

Michael Kerrisk

NOTES: Discuss use of types in "prototypes" for these macros

The SYNOPSIS shows types for arguments and return values, but these are really just suggestions: since the interfaces are macros, the compiler won't catch all violations of the "type rules". Warn the reader of this.

pthread_attr_setinheritsched.3

Michael Kerrisk

New page for pthread_attr_setinheritsched(3) and pthread_attr_getinheritsched(3)

pthread_cancel.3

Michael Kerrisk

New page for pthread_cancel(3)

pthread_cleanup_push.3

Michael Kerrisk

New page for pthread_cleanup_push(3) and pthread_cleanup_pop(3)

pthread_setcancelstate.3

Michael Kerrisk

New page for pthread_setcancelstate(3) and pthread_setcanceltype(3)

pthread_testcancel.3

Michael Kerrisk

New page for pthread_testcancel(3)

Newly documented interfaces in existing pages

Global changes

clone.2

mount.2

unshare.2

proc.5

path_resolution.7

Michael Kerrisk

Global fix: s/namespace/mount-point namespace/, as appropriate

In recent times, a number of other namespace flags have been added to clone(2). As such, it is no longer clear to use the generic term "namespace" to refer to the particular namespace controlled by CLONE_NEWNS; instead, use the term "mount-point namespace".

Michael Kerrisk

Global fix: s/mount-point namespace/mount namespace/

This is more consistent with the term "mounts namespace" used in the 2008 ACM SIGOPS paper, "Virtual servers and checkpoint/restart in mainstream Linux".

(I avoided the "s", because using the plural strikes me as klunky English, and anyway we don't talk about the "PIDs namespace" or the "networks namespace", etc..)

connect.2

listen.2

send.2

uname.2

cmsg.3

proc.5

arp.7

ddp.7

icmp.7

ip.7

raw.7

socket.7

tcp.7

udp.7

Michael Kerrisk

Global fix: eliminate mention of the obsolete sysctl(2) interface

Many pages still mention use of the obsolete sysctl(2) system call, or used the term "sysctls"; rewrite these mentions to instead be in terms of /proc interfaces.

fcntl.2

signal.2

mbsnrtowcs.3

mbsrtowcs.3

mbtowc.3

wcrtomb.3

wcsnrtombs.3

wcsrtombs.3

wctomb.3

Michael Kerrisk

Global fix: s/multi-thread/multithread/

getdents.2

pthread_attr_init.3

pthread_create.3

pthread_getattr_np.3

pthread_setaffinity_np.3

pthread_setschedparam.3

pthread_tryjoin_np.3

Michael Kerrisk

Use consistent error-handling function names

Many older pages use a `handle_error()` macro to do simple error handling from system and library function calls.

Switch these pages to do similar.

Changes to individual pages

time.1

Michael Kerrisk

Note that some shells have a 'time' built-in command

Therefore, to access the functionality described on this page, it may be necessary to specify the full pathname.

clone.2

Michael Kerrisk

Place list of `CLONE_*` flags in alphabetical order

(No content changes.)

fsync.2

Michael Kerrisk

Update feature test macro requirements for `fsync()`

Since glibc 2.8, the `fsync()` declaration is also exposed if `_POSIX_C_SOURCE >= 200112L`

sched_setaffinity.2

Michael Kerrisk

Add note on system-imposed restrictions on CPUs actually used

After Loïc Dommage's suggestion for `pthread_setaffinity_np(3)`, add similar text to this page noting that the system silently limits the set of CPUs on which the process actually runs to

the set of CPUs physically present and the limits imposed by `cpuset(7)`.

`sched_setaffinity.2`

Michael Kerrisk

Removed discussion of `CPU_*` macros()

These macros are now moving to a separate page.

Michael Kerrisk

Refer reader to `pthread_setaffinity_np(3)`

`pthread_setaffinity_np()` is preferable for setting thread CPU affinity if using the POSIX threads API.

`sysctl.2`

Michael Kerrisk

Add prominent warning against using this system call

This was already stated under NOTES, but make it even more prominent by adding a sentence at the start of the DESCRIPTION.

`uname.2`

Michael Kerrisk

Add C comments describing fields in `utsname` structure

`atan2.3`

Stefano Teso

Fix description of range of function value return

The range is not $[-\pi/2, \pi/2]$, but $[-\pi, \pi]$.

(mtk: This error was reported by Nicolas François, and should have been fixed in 3.11, but somewhere along the way, the fix got lost.)

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=506299>

`bindresvport.3`

Michael Kerrisk

Since glibc 2.8, `EPFNOSUPPORT` error is now `EAFNOSUPPORT`

Glibc switched to using a POSIX-specified error code for this error case.

http://bugs.linuxbase.org/show_bug.cgi?id=2375

`clock_getres.3`

Michael Kerrisk

`CLOCK_PROCESS_CPUTIME_ID` and `CLOCK_THREAD_CPUTIME_ID` not settable

According to POSIX.1-2001, the `CLOCK_PROCESS_CPUTIME_ID` and `CLOCK_THREAD_CPUTIME_ID` clocks should be settable, but currently they are not.

getgrnam.3

Michael Kerrisk

Clarify and add more detail in RETURN VALUE description

The page was a bit fuzzy in describing the return values for various cases. In particular, it needed to be more explicit in describing what happens for the "not found" case.

This is an analogous change to the change for
getpwnam.3, made after Andreas Henriksson's report.

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504787>

Michael Kerrisk

Rename arguments to getgrnam_r() and getgrgid_r()
s/gbuf/grp/ and s/gbufp/result/, for consistency
with POSIX.1 argument names.

Michael Kerrisk

Clarify RETURN VALUE description

The page was a bit fuzzy in describing the return values for various cases. In particular, it needed to be more explicit in describing what happens for the "not found" case.

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504708>

getpwnam.3

Michael Kerrisk

Rename arguments to getpwnam_r() and getpwuid_r()
s/pwbuf/pwd/ and s/pwbufp/result/, for consistency
with POSIX.1 argument names.

Michael Kerrisk

Clarify and add more detail in RETURN VALUE description

The page was a bit fuzzy in describing the return values for various cases. In particular, it needed to be more explicit in describing what happens for the "not found" case.

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504787>

Michael Kerrisk

Add an EXAMPLE program for getpwnam_r()

inet_ntop.3

Michael Kerrisk

Rename 'cnt' argument to 'size'

This is consistent with POSIX.1, and also a more sensible name.

Michael Kerrisk

Rework text describing 'size' argument

(After a suggestion by Vegard Nossum.)

Also made a few other small rewordings to in the initial
paragraph.

makecontext.3

Michael Kerrisk

Add text on use of pointer arguments to `makecontext()`
Passing pointer arguments to `makecontext()` is possible,
but only on some architectures, and with no guarantees
of portability.

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504699>

`pthread_attr_setaffinity_np.3`

Michael Kerrisk

Various fixes after review by Loïc Dommage

Reviewed-by: Loïc Dommage

`pthread_attr_setaffinity_np.3`

`pthread_setaffinity_np.3`

Michael Kerrisk

Update to reflect new location of `CPU_*`() documentation
The `CPU_*`() macros are now documented in `CPU_SET.3`;
update to reflect that fact.

Michael Kerrisk

Remove redundant text relating to CPU sets

Information about `CPU_SETSIZE` can be found in `CPU_SET.3`, so
remove discussion of it here.

`pthread_attr_setschedparam.3`

`pthread_setschedparam.3`

Michael Kerrisk

Remove text saying that only `sched_priority` is required by POSIX.1

Loïc Dommage points out that if a system implements
`SCHED_SPORADIC` (which Linux does not), then other
fields are also specified in `sched_param`. The simple
solution is just to remove that phrase from the man
page.

`pthread_cancel.3`

`pthread_detach.3`

`pthread_join.3`

`pthread_setaffinity_np.3`

Michael Kerrisk

Make text of `ESRCH` error consistent

`pthread_setaffinity_np.3`

Michael Kerrisk

Add text to `EINVAL` error mentioning `cpuset(7)`

Michael Kerrisk

Various fix-ups after Loïc's review.

Reviewed-by: Loïc Dommage

pthread_setschedparam.3

Michael Kerrisk

PTHREAD_INHERIT_SCHED is default for inherit scheduler attribute

In EXAMPLE, note that PTHREAD_INHERIT_SCHED is the default for the inherit scheduler attribute.

syslog.3

Masanari Iida

LOG_KERN messages can't be generated from user processes

Masanari notes that this is an FAQ for logger(1) and that Solaris and FreeBSD document this point in syslog(3).

The glibc info page also hides this comment in its source:

Internally, there is also LOG_KERN, but LOG_KERN == 0, which means if you try to use it here, just selects default.

proc.5

Ivana Varekova

Fix reference to kernel source file

Use relative reference to Documentation/mtr.txt.

arp.7

Michael Kerrisk

Add kernel version numbers for /proc interfaces

cpuset.7

Michael Kerrisk

SEE ALSO: add CPU_SET(3)

epoll.7

Michael Kerrisk

Note glibc version that added epoll support

icmp.7

Michael Kerrisk

Add kernel version numbers to /proc file descriptions

inotify.7

Vegard Nossum

Fix description of max_user_watches

It seems that inotify(7) is wrong here:

```
"/proc/sys/fs/inotify/max_user_watches
```

This specifies a limit on the number of watches that can be associated with each inotify instance."

On my system, the default value for this variable is 8192. But I cannot create more than 8192 watches in total for the same UID even when they are on different inotify instances. So I suggest to rephrase this as: "This specifies an upper limit on the number of watches that can be created per real user ID."

ip.7

Michael Kerrisk

Reorder socket options alphabetically

Michael Kerrisk

Added kernel version numbers for IP_* socket options

Michael Kerrisk

Relocate kernel version information for IP_PMTUDISC_PROBE

Michael Kerrisk

Add kernel version numbers for /proc/sys/net/ipv4/ip_* files

Michael Kerrisk

Remove mention of kernel header from description of IP_RECVERR

Looks like glibc has had this definition since about version 2.1.

Michael Kerrisk

Relocate kernel version information for ip_mreqn structure

Michael Kerrisk

Relocate info about Linux-specific sockopts to NOTES

Also add some source comments about non-standard Linux-specific options that are not yet documented.

netlink.7

Vegard Nossum

Fix incorrect variable names in example code

s/snl/sa/ * 2

pthread.7

Michael Kerrisk

Add section on cancellation points

This section includes a list of the functions that must and may be cancellation points.

Michael Kerrisk

Rework, and fix small error in, thread-safe function list

Integrate the changes that occurred in POSIX.1-2008 into the main list (to be consistent with the list, elsewhere on this page, of functions that are cancellation points).

Also, fix an error that said that strerror() was added to the list in POSIX.1-2008. It was strsignal() that was added. (strerror() was already in the list in POSIX.1-2001.)

Michael Kerrisk

Tweak text on sigpause() cancellation point

In POSIX.1-2008, this function moves from the "must be" to the "may be" list.

Michael Kerrisk

Add ref to signal(7) for further info on use of real-time signals
signal(7) provides some further details on the use of real-time
signals by the two Linux threading implementations.

Michael Kerrisk

SEE ALSO: add pthread_attr_init() and pthread_cancel()

tcp.7

Michael Kerrisk

Update description of tcp_rmem defaults for Linux 2.6

Michael Kerrisk

Add kernel version numbers for TCP_* socket options

Note kernel version were each socket option first appeared.

Michael Kerrisk

The tcp_bic* proc files disappeared in Linux 2.6.13

Michael Kerrisk

tcp_vegas_cong_avoid disappeared in Linux 2.6.13

Michael Kerrisk

Add mention of RFC 4138 for 'tcp_frto' /proc file

Michael Kerrisk

Remove mention of /proc in VERSIONS

This information is not indicated for each /proc interface

Michael Kerrisk

Clarify that tcp_mem measures in units of the system page size

Michael Kerrisk

Update tcp_frto description for 2.6.22 changes

Linux 2.6.22 added a mode value 2 ("Enable SACK-enhanced
F-RTO if flow uses SACK").

Michael Kerrisk

Fix alphabetical order in /proc file list

A few entries were slightly out of order.

Michael Kerrisk

Remove obsolete statement about /proc from VERSIONS

Much of the text has been updated to 2.6.27 or so,
so this statement no longer applies.

Michael Kerrisk

Add kernel version numbers for each /proc interface

Note kernel version where each /proc interface first appeared

Michael Kerrisk

tcp_westwood /proc file disappeared in Linux 2.6.13

Michael Kerrisk

Update description of tcp_wmem defaults for Linux 2.6

==== Changes in man-pages-3.15 =====

Released: 2008-12-05, Bucaramanga

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Rob Landley <rob@landley.net>
Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

New and rewritten pages

makedev.3

Michael Kerrisk

New page for makedev(), major(), and minor() macros

pthread_cleanup_push_defer_np.3

Michael Kerrisk

New page for pthread_cleanup_push_defer_np(3) and pthread_cleanup_pop_restore_np(3)

Newly documented interfaces in existing pages

accept.2

Michael Kerrisk

Document accept4() system call, new in Linux 2.6.28

fmemopen.3

Petr Baudis

Add description of open_wmemstream(3)

tcp.7

Michael Kerrisk

Document MSG_TRUNC flag for TCP sockets

New and changed links

accept4.2

Michael Kerrisk

New link to accept.2

accept.2 now documents the new accept4() system call.

open_wmemstream.3

Petr Baudis

New link to fmemopen.3

fmemopen.3 now documents open_wmemstream().

pthread_cleanup_pop_restore_np.3

Michael Kerrisk

New link to new pthread_cleanup_push_defer_np.3

Global changes

accept.2

listen.2

recv.2

getpeername.2

getsockname.2

shutdown.2

socketpair.2

Michael Kerrisk

Global fix: SEE ALSO: add socket(7)

bind.2

rcmd.3

capabilities.7

ip.7

Michael Kerrisk

Global fix: s/reserved port/privileged port/

Some pages used one term, some pages the other term;
make some consistency.

connect.2

getpeername.2

getsockname.2

Michael Kerrisk

Use consistent argument names

Most other sockets pages are using the names 'addr'
and 'addrlen'; make these pages do the same.

getpeername.2

getsockname.2

getsockopt.2

recv.2

send.2

shutdown.2

socketatmark.3

socket.7

udplite.7

Michael Kerrisk

SYNOPSIS: Rename socket file descriptor argument to 'sockfd'

Many sockets man pages use the name 'sockfd' already.

For consistency, changes the others to do so as well.

gnu_dev_major.3

gnu_dev_makedev.3

gnu_dev_minor.3

major.3

minor.3

Michael Kerrisk

New links to new makedev(3) page

Changes to individual pages

_exit.2

Michael Kerrisk

Since glibc 2.3, the exit() wrapper function invokes exit_group(2)

This information is useful to users of strace(1).

accept.2

Michael Kerrisk

Clarify details when returned address is truncated

If the returned address is truncated, the 'addrlen' argument indicates the actual size of the address, rather than a count of the number of bytes in the truncated buffer.

Also clarify that if 'addr' argument is NULL, then 'addrlen' should be unused, and should also be NULL.

Michael Kerrisk

Reorder ERRORS list

Some errors were listed under a separate "may" heading.

There's probably no real need to do this; integrate those errors into the main list.

exit_group.2

Michael Kerrisk

Note that since glibc 2.3, exit(2) invokes exit_group()

futex.2

Michael Kerrisk

Mention that glibc provides no wrapper function for futex()

get_thread_area.2

Michael Kerrisk

Note that glibc provides no wrapper for this system call

getdomainname.2

Michael Kerrisk

Substantial rewrite

Expand description of setdomainname() and getdomainname().

Note that getdomainname() is implemented as a library function in glibc.

Note limits on size of domain name.

Reorganize ERRORS list.

gethostname.2

Michael Kerrisk

Various parts rewritten

Write a paragraph describing sethostname().

Clarify differences between glibc's gethostbyname() and the kernel gethostbyname() system calls.

gethostname.2

Michael Kerrisk

Note that HOST_NAME_MAX is 64 on Linux

Also note that in pre-1.0 days, the limit on hostnames was 8 bytes.

getpeername.2

Michael Kerrisk

Note that returned address may be truncated if buffer is too small

getsid.2

Michael Kerrisk

Simplified version information and moved to a new VERSIONS section

getsockname.2

Michael Kerrisk

Note that returned address is truncated if buffer is too small

mknod.2

Michael Kerrisk

Refer reader to makedev(3) to build a device ID

mmap.2

Michael Kerrisk

Loosen language around how 'addr' hint is interpreted

Mel Gorman reported that in Linux 2.6.27, 'addr' is rounded down to a page boundary.

Before kernel 2.6.26, if 'addr' was taken as a hint, it was rounded up to the next page boundary. Since Linux 2.6.24, it is rounded down. Therefore, loosen the description of this point to say that the address is rounded to "a nearby page boundary".

open.2

Michael Kerrisk

EFBIG error is now EOVERFLOW (since Linux 2.6.24)

When a 32-bit app opens a file whose size is too big to be represented in 31-bits, POSIX.1 specifies the error EOVERFLOW. Linux used to give EFBIG for this case, but 2.6.24 fixed this.

Also, add some text to describe the error scenario in more detail.

pread.2

Michael Kerrisk

Note that glibc emulation for these calls uses lseek(2)

(This makes it clearer that the emulated calls are not atomic.)

recv.2

send.2

Michael Kerrisk

Make names of "address" and "address length" args more consistent

Make the names of these arguments more consistent with other sockets man pages.

recv.2

Michael Kerrisk

Clarify details when returned address is truncated

If the recvfrom() returned address is truncated, the 'fromlen' argument indicates the actual size of the address, rather than a count of the number of bytes in the truncated buffer.

Also clarify that the 'from' argument can be NULL, in which case 'fromlen' should be unused, and should also be NULL.

Michael Kerrisk

Internet datagram and netlink sockets support MSG_TRUNC for recv(2)

Internet datagram (since Linux 2.4.27/2.6.8),
and netlink (since Linux 2.6.22) sockets support
the MSG_TRUNC flag for recv(2).

select.2

Michael Kerrisk

Rewrote text describing feature test macros requirement for pselect()

select_tut.2

Michael Kerrisk

Fix SHUT_FD* macros in example program
Add "do { } while (0)"

set_thread_area.2

Michael Kerrisk

Note that glibc provides no wrapper for this system call

setfsuid.2

setfsuid.2

Michael Kerrisk

Simplify version information and move to a VERSIONS section

setsid.2

Michael Kerrisk

Rework RETURN VALUE section; add an ERRORS section

setup.2

Michael Kerrisk

Relocate some CONFORMING TO text to VERSIONS and NOTES

stat.2

Michael Kerrisk

Document EOVERFLOW error

Michael Kerrisk

Refer reader to major() and minor() to decompose a device ID

syscalls.2

Michael Kerrisk

Fix version numbers for a few system calls
Some 2.6 system calls were wrongly mentioned as also being
backported into a 2.4.x kernel.

uname.2

Michael Kerrisk

DESCRIPTION: Point reader at NOTES for further info on field lengths

atan.3

Andries E. Brouwer

Fix return value description

The correct range for the return value is $[-\pi/2, \pi/2]$.
(mtk's fix in the last change to the return value text was
a botch-up of a (correct) suggestion by Nicolas François.)

atexit.3

Michael Kerrisk

atexit() and on_exit(3) register functions on the same list

Michael Kerrisk

Terminating registered function using longjmp() is undefined
According to POSIX.1, using longjmp() to terminate execution of
a function registered using atexit() produces undefined results.

Michael Kerrisk

Calling exit(3) more than once produces undefined results
If an exit handler itself calls exit(3), the results are
undefined (see the POSIX.1-2001 specification of exit(3)).

Michael Kerrisk

The same exit handler may be registered multiple times

Michael Kerrisk

Calling _exit(2) terminates processing of exit handlers

Michael Kerrisk

Terminating registered function using longjmp() is undefined
According to POSIX.1, using longjmp() to terminate execution of
a function registered using atexit() produces undefined results.

bindresvport.3

Mats Wichmann

SYNOPSIS: $s^{\backslash}^{\backslash}^{\backslash}^{\backslash}$ in prototype

Michael Kerrisk

Fix errors regarding port used, plus other rewrites
Glibc's bindresvport() takes no notice of $sin \rightarrow sin_port$:
it always returns an arbitrary reserved port in the
anonymous range (512-1023). (Reported by Mats Wichmann.)

Also:

- * Add EADDRINUSE and EACCES errors.
- * Mention use of getsockname(2).
- * Other minor rewrites and reorderings of the text.
- * Explicitly note that glib's bindresvport() ignores
 $sin \rightarrow sin_port$.
- * Change license There's now virtually no text remaining from
the 1.70 version of this page.

Reviewed-by: Mats Wichmann

Reviewed-by: Petr Baudis

dlopen.3

Petr Baudis

Describe confusing dladdr() behavior

dladdr() will act unexpectedly if called from non-pic code on a compile-time-generated function pointer.

fmemopen.3

Michael Kerrisk

Add VERSIONS section

Petr Baudis

SEE OPEN: Add fopencookie(3)

fopencookie(3) is used to implement fmemopen().

fopen.3

Petr Baudis

SEE ALSO: Add fmemopen(3) and fopencookie(3)

fopencookie.3

Petr Baudis

fopencookie() needs `_GNU_SOURCE` feature test macro

getaddrinfo.3

Petr Baudis

Document results ordering and `/etc/gai.conf`

This patch documents the order of the `getaddrinfo(3)` results (RFC 3484), how should the application deal with that, mentions the extremely common cause of having multiple results per query (both IPv4 and IPv6 addresses available) and mentions `/etc/gai.conf`.

(mtk: Minor tweaks, and note glibc version for `/etc/gai.conf`)

isatty.3

Michael Kerrisk

Complete rewrite of this page, with rather more detail

memmem.3

Michael Kerrisk

Remove sentence saying that libc 5.0.9 is still widely used

That was a **long** time ago.

on_exit.3

Michael Kerrisk

Document handling of registrations on `fork(2)` and `execve(2)`

Treatment in these cases is the same as for `atexit(3)`.

Michael Kerrisk

Arg given to registered function is status from **last** call to `exit()`

It's a subtle point, but if a registered function itself

calls `exit(3)`, then subsequent functions that were registered

with `on_exit(3)` will see the exit status given to the more recent `exit(3)` call.

Michael Kerrisk

Note that same function may be registered multiple times

setlocale.3

locale.7

Michael Kerrisk

Clean up the description of LANGUAGE environment variable

Clean up the \$LANGUAGE description, by removing bogus comments from `setlocale(3)` and expanding the mention in `locale(7)`.

Maybe you will decide that a more detailed description should be left to the `gettext(3)` documentation, but I actually care about the invisible part of the patch more since the comments have put me off the track initially (\$LANGUAGE has nothing to do with `setlocale(3)` and is completely isolated to `gettext`, as obvious from the glibc sources).

proc.5

Michael Kerrisk

/proc/stat: s/minor/disk_idx/ in description of /proc/stat

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=225619>

capabilities.7

Drake Wilson

Various minor fixes as per Debian bug 471029

The relevant pieces of

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=471029> are:

- Delete duplicate subentry for KEYCTL_CHOWN/KEYCTL_SETPERM operations in the CAP_SYS_ADMIN entry. (It feels like that capability entry should be converted to a list, but I've left it in semicolon-delimited form for now.)
- Remove text about ENFILE from the text about the /proc/sys/fs/file-max limit in the CAP_SYS_ADMIN entry, since this is already described in the man pages for the relevant ofile-creating system calls.
- Correct or clarify a few other bits of grammar and such; see the diff file itself for details.

socket.7

Michael Kerrisk

SEE ALSO: add `tcp(7)` and `udp(7)`

tcp.7

Michael Kerrisk

Relocate out-of-band data discussion

Move to a new subsection entitled "Sockets API".

Michael Kerrisk

Note that MSG_PEEK can be used on out-of-band data

time.7

Michael Kerrisk

SEE ALSO: add clock_gettime(3)

unix.7

Michael Kerrisk

Unix domain sockets don't support the recv() MSG_TRUNC flag

Michael Kerrisk

Retitled subsection "(Un)supported features" to "Sockets API"

This is consistent with the recent change in tcp(7).

===== Changes in man-pages-3.16 =====

Released: 2009-01-13, Christchurch

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Colin Watson <cjwatson@ubuntu.com>

Florentin Duneau <fduneau@gmail.com>

Petr Baudis <pasky@suse.cz>

Apologies if I missed anyone!

New and rewritten pages

pthread_getcpuclockid.3

Michael Kerrisk

New page documenting pthread_getcpuclockid(3)

libc.7

Michael Kerrisk

New page giving brief overview of C libraries on Linux

Michael Kerrisk

New page documenting dynamic linker auditing API

Newly documented interfaces in existing pages

ld.so.8

Petr Baudis

Document LD_AUDIT

Petr Baudis

Document LD_POINTER_GUARD

New and changed links

gethostid.2

Michael Kerrisk

New link to new page location in Section 3

sethostid.2

Michael Kerrisk

Change link to point to new page location in Section 3

sethostid.3

Michael Kerrisk

New link to relocated page in Section 3

glibc.7

Michael Kerrisk

New link to new libc.7

Global changes

syscalls.2

feature_test_macros.7

standards.7

Michael Kerrisk

SEE ALSO: add libc(7)

dlopen.3

ld.so.8

Michael Kerrisk

SEE ALSO: add rtd-audit(7)

Changes to individual pages

gethostid.2

Michael Kerrisk

Move to Section 3

The interfaces documented in this page are purely glibc.

syscalls.2

Michael Kerrisk

Kernel 2.6.28 adds accept4()

clock_getres.3

Michael Kerrisk

SEE ALSO: Add pthread_getcpuclockid(3)

fmemopen.3

Michael Kerrisk

Fix VERSIONS information

gethostid.3

Michael Kerrisk

Before version 2.2, glibc stored the host ID in /var/adm/hostid

Also: rewrite some text describing the /etc/hostid file, so that this location is referred to just once on the page.

Michael Kerrisk

RETURN VALUE: describe return value of sethostid()

Michael Kerrisk

Added BUGS section noting that ID can't be guaranteed to be unique

Michael Kerrisk

Added ERRORS section describing errors for sethostid()

Michael Kerrisk

Update section number to reflect relocation into Section 3

printf.3

Michael Kerrisk

Source and destination buffers may not overlap for `*s*printf()`

http://sourceware.org/bugzilla/show_bug.cgi?id=7075

Some existing code relies on techniques like the following to append text to a buffer:

```
$ cat s.c
#include <stdio.h>
char buf[80] = "not ";
```

```
main()
{
    sprintf(buf, "%sfail", buf);
    puts(buf);
    return 0;
}
```

```
$ cc s.c
$ ./a.out
not fail
```

However, the standards say the results are undefined if source and destination buffers overlap, and with suitable compiler options, recent changes can cause unexpected results:

```
$ cc -v 2>&1 | grep gcc
gcc version 4.3.1 20080507 (prerelease) [gcc-4_3-branch revision 135036] (SUSE Linux)
$ cc -D_FORTIFY_SOURCE -O2 s.c
$ ./a.out
fail
```

readdir.3

Michael Kerrisk

Rewrite text describing 'dirent' fields standardized in POSIX.1

Michael Kerrisk

Clarify text for return value/errno setting for end-of-stream case

nscd.8

Petr Baudis

Correct NOTES section on reloading configuration files

It behaved this way at least since

"Sun Oct 18 15:02:11 1998 +0000",

some four months after including the nscd implementation

in glibc. But there does seem to be a short window between

glibc-2.1 and glibc-2.1.3 when nscd -i was not available,

I don't think it's worth muddling the point of the page

with that, though.

==== Changes in man-pages-3.17 =====

Changes to individual pages

bind.2

Michael Kerrisk

SEE ALSO: Add getifaddrs(3)

epoll_create.2

Michael Kerrisk

Document EMFILE error

This error is encountered when the limit imposed by `/proc/sys/fs/epoll/max_user_instances` is encountered.

Michael Kerrisk

Clarify distinction between epoll instance and epoll file descriptor

Reword so that the notion of an epoll instance is made clear, and made distinct from the notion of an epoll file descriptor.

Some other minor rewordings also.

epoll_ctl.2

Michael Kerrisk

Reordered parts of the text

Michael Kerrisk

Introduce notion of epoll instance

Introduce notion of epoll instance as distinct from epoll file descriptor. Plus other wording clean-ups.

Michael Kerrisk

Document ENOSPC error (new in Linux 2.6.28)

This error results when the limit imposed by `/proc/sys/fs/epoll/max_user_watches` is encountered.

epoll_wait.2

Michael Kerrisk

Introduce the notion of an epoll instance into text

getdents.2

Michael Kerrisk

Before kernel < 2.6.4, 'd_type' was effectively always DT_UNKNOWN

gethostid.2

Michael Kerrisk

Rename file (was misnamed gethostd.2 in previous release)

getsockname.2

Michael Kerrisk

SEE ALSO: Add getifaddrs(3)

signalfd.2

Michael Kerrisk

Fix description of fork() semantics

The page text described the semantics of the initial implementation of signalfd(). These were changed early on, but the man page wasn't updated.

byteorder.3

Michael Kerrisk

SEE ALSO: add endian(3)

longjmp.3

Michael Kerrisk

Clarify wording re saving/restoring signal mask

Michael Kerrisk

siglongjmp() restores signal mask iff 'savesigs' was non-zero

Note that siglongjmp() restores signal mask if, and only if, 'savesigs' argument of sigsetjmp() was non-zero. (Previous text omitted the "and only if".)

memccpy.3

Michael Kerrisk

Fix CONFORMING TO: s/C99/POSIX.1-2001/

Michael Kerrisk

If the memory areas overlap, the results are undefined

sethostid.3

Michael Kerrisk

Rename file (was misnamed sethostd.3 in previous release)

setjmp.3

Michael Kerrisk

Clarify wording re saving/restoring signal mask

Michael Kerrisk

Clarify when setjmp() provides BSD vs System V signal mask semantics

strsep.3

Michael Kerrisk

BUGS: explicitly list problems afflicting strsep()

Previously, the page said this function suffered the same problems as strtok(), but in fact strsep() doesn't suffer from all of the same problems as strtok(), so explicitly list just the problems of strsep() in the strsep.3 page.

proc.5

Michael Kerrisk

Add pointer to epoll(7) for description of epoll /proc files

epoll.7

Michael Kerrisk

Various wording changes to improve clarity and consistency

Global fix: Fix xrefs to clock_*.? pages to reflect move to section 2

clock_nanosleep.2

execve.2

fork.2

nanosleep.2

sigaction.2

timerfd_create.2

pthread_getcpuclockid.3

ualarm.3

usleep.3

pthreads.7

time.7

Michael Kerrisk

Global fix: s/(3)/(2)/ in section number xrefs for timer_*(`)` API

The POSIX timers API is implemented (mostly) within the kernel, so these interfaces are system calls. Although there are as yet no man pages, when they are added they should be in Section 2, not 3. Therefore fix those pages that currently refer to these interfaces as being in Section 3.

Changes to individual pages

capget.2

Andi Kleen

Add some details and relocate a paragraph

While writing a little program using capset
I found the capset manpage quite light on crucial
details and I had to resort to RTFS.

This patch improves the points I found unclear
and also moves one misplaced paragraph around.

clock_getres.2

Michael Kerrisk

Move page from Section 3 to Section 2

eventfd.2

Michael Kerrisk

glibc eventfd() supports the use of eventfd2() since version 2.9

fork.2

Michael Kerrisk

SEE ALSO: add daemon(3)

getdents.2

Michael Kerrisk

Remove unneeded HAVE_D_TYPE from example program
Since d_type will always just return DT_UNKNOWN before
kernel 2.6.4, we don't need to use a conditional for
determining whether we use this flag.

nanosleep.2

Michael Kerrisk

Relocated misplaced BUGS heading

select_tut.2

Michael Kerrisk

Clean up error checking in example program (no semantic changes)

Michael Kerrisk

Many parts tidied and rewritten
Remove some redundant text, clarify various pieces,
tidy example code, etc.

Michael Kerrisk

Bug fixes + rewrites in example program
Sebastien pointed out that the first example program

wrongly thinks it can count signals.
Also, some further rewrites by mtk.

socket.2

Michael Kerrisk

BUGS: Remove discussion SOCK_UUCP

As time goes on, this sentence becomes less a piece of humor,
and more a puzzle.

stat.2

Michael Kerrisk

Note that open(O_NOATIME) also causes st_atime not to be updated

timerfd_create.2

Michael Kerrisk

Add BUGS noting that timerfd supports fewer clock types than
timer_create()

btowc.3

Michael Kerrisk

SEE ALSO: add wctob(3)

clock_getcpuclockid.3

Michael Kerrisk

SEE ALSO: add pthread_getcpuclockid(3)

cos.3

Michael Kerrisk

SEE ALSO: add sincos(3)

fexecve.3

Timo Sirainen

Note that fexecve() depends on a mounted /proc

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=514043>

Michael Kerrisk

CONFORMING TO: note addition of fexecve() in POSIX.1-2008

Michael Kerrisk

'fd' must be opened read-only and refer to a file that is executable

fmemopen.3

Michael Kerrisk

CONFORMING TO: note that these functions are in POSIX.1-2008

getifaddrs.3

Lucio Maciel

Fix memory leak in example program

Petr Baudis

Various small fixes

getpwnam.3

Michael Kerrisk

SEE ALSO: add getspname(3)

getumask.3

Michael Kerrisk

Updated glibc version number in NOTES

ilogb.3

Michael Kerrisk

SEE ALSO: add significand(3)

intro.3

Michael Kerrisk

SEE ALSO: add libc(7)

isalpha.3

Michael Kerrisk

Fix statement that isalpa() is obsolete; should be isascii()

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=512709>

Michael Kerrisk

SEE ALSO: add toascii(3)

mq_notify.3

Michael Kerrisk

Add cross reference to pthread_attr_init(3)

pthread_attr_setaffinity_np.3

Michael Kerrisk

SYNOPSIS: Fix declaration of 'attr'

pthread_getcpuclockid.3

Michael Kerrisk

SYNOPSIS: fix type of 'thread'

qsort.3

Michael Kerrisk

EXAMPLE: remove unnecessary "#include <unistd.h>"

random.3

Michael Kerrisk

SEE ALSO: add random_r(3)

remainder.3

Michael Kerrisk

SEE ALSO: add div(3)

scandir.3

Michael Kerrisk

CONFORMING TO: alphasort() and scandir() are added to POSIX.1-2008

Michael Kerrisk

CONFORMING TO: note that versionsort() was added to glibc in version 2.1

sem_wait.3

Michael Kerrisk

SEE ALSO: add clock_gettime(2)

significand.3

Michael Kerrisk

Add CONFORMING TO noting that this function is unstandardized

sigwait.3

Michael Kerrisk

Add EXAMPLES section referring to pthread_sigmask(3)

sin.3

Michael Kerrisk

SEE ALSO: add sincos(3)

stpcpy.3

Michael Kerrisk

Add BUGS section noting the possibility of buffer overruns

Michael Kerrisk

Add missing pieces/fix various problems in example program

Michael Kerrisk

CONFORMING TO: stpcpy() is nowadays on the BSDs

Michael Kerrisk

SEE ALSO: add stpcpy.3

wscasecmp.3

Michael Kerrisk

CONFORMING TO: note that this function is added in POSIX.1-2008

wcsdup.3

Michael Kerrisk

CONFORMING TO: note that this function was added in POSIX.1-2008

wcsncasecmp.3

Michael Kerrisk

CONFORMING TO: note that this function is added in POSIX.1-2008

wctob.3

Michael Kerrisk

SEE ALSO: add btowc(3)

proc.5

Michael Kerrisk

Remove mention of epoll/max_user_instances
(Since this interface appeared in 2.6.28, and then
disappeared in 2.6.29.)

ascii.7

Michael Kerrisk

Update SEE ALSO list to include pages added in 3.17

Michael Kerrisk

SEE ALSO: add recently added iso_8859-*(7) pages

epoll.7

Michael Kerrisk

remove documentation of /proc/sys/fs/epoll/max_user_instances
This /proc interface appeared in 2.6.28. but will be
removed in 2.6.29.

Also, document change in default value of
/proc/sys/fs/epoll/max_user_watches (was 1/32 of lowmem,
now 1/25 of lowmem).

koi8-r.7

Michael Kerrisk

SEE ALSO: add koi8-u(7); remove crufty text

standards.7

Michael Kerrisk

Update to note that latest POSIX/SUS was ratified in 2008

time.7

Michael Kerrisk

SEE ALSO: add pthread_getcpuclockid(3)

==== Changes in man-pages-3.19 =====

Michael Kerrisk

New page documenting timer_settime(2) and timer_gettime(2)

New and changed links

timer_gettime.2

Michael Kerrisk

New link to new timer_settime.2

Global changes

Various pages

Kir Kolyshkin

Trivial punctuation fixes in SEE ALSO

In SEE ALSO, when a few man pages are referenced, those
are divided by commas. Every reference is on a separate

line, and all lines but the last one should end with comma. I spotted one place where there is no comma in between references, and mocked up an awk script to find similar places:

```
for f in man*/*; do
  awk '
    /^.SH ["']SEE ALSO["']/ {
      sa=1; print "==" FILENAME " =="; print; next
    }
    /^\. (PP|SH)/ {
      sa=0; no=0; next
    }
    /^\.BR/ {
      if (sa==1) {
        print;
        if (no == 1)
          print "Missing comma in " FILENAME " +" FNR-1; no=0
      }
    }
    /^\.BR .*$/ {
      if (sa==1)
        no=1;
      next
    }
    /\.\\"/ {next}
    /\.*/ {
      if (sa==1) {
        print; next
      }
    }
  ' $f;
done | fgrep 'Missing comma'
```

This patch fixes all the places found by the above script.

Also, there is an extra dot at the end of uri.7 "SEE ALSO" section. Removed as per man-pages(7) recommendation.

Changes to individual pages

getitimer.2

clock_getcpuclid.3

time.7

Michael Kerrisk

SEE ALSO: add timer_create(2)

gettimer.2

Michael Kerrisk

Rename arguments for consistency with other timer pages
Also some other minor wording improvements

splice.2

Mark Hills

ERRORS: Add EINVAL case for file opened O_APPEND
Target file cannot be opened in append (O_APPEND) mode

In kernels prior to v2.6.27 splice() to a file in
append mode is broken, and since that version it is
disallowed. It is possible this behaviour may change
in the future; see the kernel commit message
(efc968d450e013049a662d22727cf132618dcb2f) for more
information.

syscalls.2

Michael Kerrisk

Note that getpmsg(2) and putmsg(2) are unimplemented
See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=514771>

timerfd_create.2

Michael Kerrisk

ERRORS: add EFAULT

timerfd_create.2

Michael Kerrisk

Rename timerfd_settime() 'curr_value' arg to 'old_value'
For consistency with related pages.

vm86.2

Parag Warudkar

CONFORMING TO: Add 32-bit specific
Note that this call is only on *32-bit* Intel

mq_open.3

Michael Kerrisk

ERRORS: add ENOENT error for name == "/"

mq_open.3

Michael Kerrisk

ERRORS: Add EACCES error for name containing > 1 slash

sem_open.3

Michael Kerrisk

ERRORS: add EINVAL error where name == "/"

sem_open.3

Jens Thoms Toerring

Add case of non-well-formed name to ENOENT

shm_open.3

Michael Kerrisk

Clarify rules for construction of shared memory object names

proc.5

Michael Kerrisk

Add description of /proc/sys/kernel/sysrq

Reported by: Goerghe Cosorea <gheorghe.cosorea@gmail.com>

proc.5

Michael Kerrisk

Put /proc/modules entry in correct alphabetical order

ascii.7

Kir Kolyshkin

Fix formatting of tables on second page to use monospaced font

mq_overview.7

Michael Kerrisk

Clarify construction rules for message queue object names

sem_overview.7

Michael Kerrisk

Clarify construction rules for semaphore object names

Apologies if I missed anyone!

New and rewritten pages

cpuid.4

Andi Kleen

New page for cpuid access device

msr.4

Andi Kleen

New page documenting x86 CPU MSR access device

Newly documented interfaces in existing pages

proc.5

Américo Wang

Document /proc/sys/vm/swappiness

Michael Kerrisk

Document /proc/sysrq-trigger

Global changes

timer_create.2
timer_delete.2
timer_getoverrun.2
timer_settime.2
numa.7

Michael Kerrisk

Make source layout of 'Link with' text consistent with other pages
No actual change to formatted output, but this makes the
page sources more consistent for the purpose of grepping, etc.

mempcpy.3
signbit.3
significand.3

Michael Kerrisk

Global fix: acknowledge FSF in copyright

These pages are heavily based on original material in
glibc info pages, but the comments in the source of the pages
did not acknowledge the FSF copyright on the original material.
Fix that.

accept.2
read.2
recv.2
send.2
write.2

Michael Kerrisk

Fix discussion of EAGAIN/EWOULDBLOCK errors

For a non-blocking socket, POSIX.1-2001/2008 allow either
EAGAIN or EWOULDBLOCK to be returned in cases where a call
would have blocked. Although these constants are defined
with the same value on most Linux architectures (PA-RISC
is the exception), POSIX.1 does not require them to have
the same value. Therefore, a portable application using
the sockets API should test for both errors when checking
this case.

(NB POSIX.1 only mentions EWOULDBLOCK in the context of
the sockets interfaces.)

Change made after a note cross-posted on linux-arch@vger,
<http://thread.gmane.org/gmane.linux.debian.ports.hppa/5615>
and a suggestion for write(2) from Carlos O'Donnell

basename.3
getgrent.3
getgrnam.3

getpwent.3

iso_8859-9.7

koi8-r.7

koi8-u.7

Michael Kerrisk

Add explicit character set encoding to first line of source

Nowadays mandb has provision to understand a character set encoding that is explicitly indicated in the first line of the source. As pointed out by Colin Watson, including such an explicit indication on pages encoded in anything other than ISO 8859-1 or UTF-8 is useful for man-pages that aren't shipped in UTF-8.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=519209> and for some other background (responded to by Colin Watson in the above report):

<http://thread.gmane.org/gmane.comp.internationalization.linux/6040> ("man page encoding", 5 Jul 2005)

Changes to individual pages

fallocate.2

Michael Kerrisk

VERSIONS: glibc support is provided since version 2.10

fcntl.2

Michael Kerrisk

Remove mention of EWOULDBLOCK from discussion of mandatory locking

In the kernel, the error on encountering a mandatory lock is EAGAIN. Although EAGAIN and EWOULDBLOCK are the same on most Linux architectures, on some they are not, so don't mention EWOULDBLOCK as it is misleading. (Mea culpa.)

getcontext.2

Michael Kerrisk

Note that POSIX.1-2008 removes the specification of getcontext()

getitimer.2

Michael Kerrisk

Note that POSIX.1-2008 recommends POSIX timers API instead of this API

gettimeofday.2

Michael Kerrisk

Note that POSIX.1-2008 recommends clock_gettime() instead of this API

ptrace.2

Michael Kerrisk

Note use of 'data' for PTRACE_SYS{CALL,EMU} and PTRACE_*_SINGLESTEP
These operations use the 'data' argument as a signal number, like PTRACE_CONT.

ptrace.2

Mike Frysinger

only reference <sys/user.h>

The kernel no longer installs linux/user.h, so update references to sys/user.h.

recv.2

Michael Kerrisk

Add 'iovec' defn to defn of 'msghdr' structure

The 'msghdr' structure includes a field of type 'iovec', so show the definition of that structure in this page.

rename.2

Michael Kerrisk

Make ENOENT description consistent with POSIX.1-2008

timerfd_create.2

Michael Kerrisk

ERRORS: add EINVAL for invalid 'flags' for timer_settime()

truncate.2

Michael Kerrisk

SYNOPSIS: Fix description of feature test macro requirements

After a report by Arvid Norlander.

bcopy.3

Michael Kerrisk

Note that POSIX.1-2008 removes specification of bcopy()

bsd_signal.3

Michael Kerrisk

Note that POSIX.1-2008 recommends sigaction(2) instead of this API

ctime.3

Michael Kerrisk

Note that POSIX.1-2008 recommends strftime(3) instead of these functions

ecvt.3

Michael Kerrisk

Note that POSIX.1-2008 recommends sprintf(3) instead of these functions

gcvt.3

Michael Kerrisk

Note that POSIX.1-2008 recommends sprintf(3) instead of this function

getcwd.3

Michael Kerrisk

Note that getcwd() should be used instead of the obsolete getwd()

getgrent.3

Michael Kerrisk

Returned buffer may be statically allocated and overwritten by later calls

gethostbyname.3

Michael Kerrisk

POSIX.1-2008 recommends getaddrinfo(3) and getnameinfo(3) instead

getnetent_r.3

Michael Kerrisk

Fix function name in text: s/getnetbynumber_r/getnetbyaddr_r/
The SYNOPSIS showed the right function name (getnetbyaddr_r),
but the text repeatedly used the wrong name (getnetbynumber_r).
Probably, this was a cut-and-paste error.

getpwent.3

Michael Kerrisk

Returned buffer may be statically allocated and overwritten by later calls

index.3

Michael Kerrisk

Note that POSIX.1-2008 recommends `strchr(3)` and `strchr(3)` instead

isalpha.3

Michael Kerrisk

Explain why POSIX.1-2008 marks `isascii(3)` obsolete

lockf.3

Nikanth Karthikesan

Update pointer to documentation in kernel source

makecontext.3

Michael Kerrisk

Note that POSIX.1-2008 recommends the use of POSIX threads instead

mq_notify.3

Michael Kerrisk

Document the POSIX.1-2008 optional `EINVAL` error
POSIX.1-2008 allows an optional `EINVAL` error if
`notification==NULL` and the caller is not currently
registered to receive notifications.

posix_fallocate.3

Michael Kerrisk

Clarify that `EINVAL` also occurs of 'len' *equals* zero
See http://bugzilla.kernel.org/show_bug.cgi?id=12919

posix_fallocate.3

Michael Kerrisk

Document POSIX.1-2001 and POSIX.1-2008 specifications for `EINVAL` error
See http://bugzilla.kernel.org/show_bug.cgi?id=12919

posix_memalign.3

Michael Kerrisk

Document handling of `size==0` case for `posix_memalign()`

pthread_exit.3

Michael Kerrisk

Fix error in DESCRIPTION: `s/pthread_create/pthread_exit/`

realpath.3

Michael Kerrisk

Rework `resolved_path==NULL` discussion w.r.t. POSIX.1-200[18]
Although the page already mentioned the `resolved_path==NULL`
feature, and that this feature was added in POSIX.1-2008, there
was still some crufty text in BUGS that hadn't been updated to
reflect the POSIX.1-2008 changes.

Also, some other minor wording and grammar fixes.

scalb.3

Michael Kerrisk

Note that POSIX.1-2008 recommends `scalbln*(3)` instead

seekdir.3

Michael Kerrisk

SYNOPSIS: Fix type of 'offset' argument: `s/off_t/long/`

And add a NOTES section pointing out that 'off_t'

was indeed used in glibc 2.1.1 and earlier.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=519230>

sem_post.3

Michael Kerrisk

Document EOVERFLOW error

shm_open.3

Michael Kerrisk

Recast discussion on name length to exclude terminating NULL byte

Probably it's clearer to describe the length of the IPC object

name as a count that excludes the null terminator.

siginterrupt.3

Michael Kerrisk

Note that POSIX.1-2008 recommends `sigaction()` instead

sigset.3

Michael Kerrisk

Note APIs that POSIX.1-2008 recommends instead of these obsolete APIs

strftime.3

Michael Kerrisk

Small fix to description of %G

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=516677>

strftime.3

Michael Kerrisk

Add details on ISO 8601 week-based dates

ISO 8602 week-based dates are relevant for %G, %g, and %V,

and the existing details on these dates are a little thin.

strftime.3

Michael Kerrisk

Remove mention of year from ISO 8601 standard

The text mentioned the 1988 8601 standard, but there have

already been two revisions of the standard since then, so

simply remove mention of the year.

tellidir.3

Michael Kerrisk

SYNOPSIS: Fix return type: s/off_t/long/

And add a NOTES section pointing out that 'off_t'
was indeed used in glibc 2.1.1 and earlier.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=519230>

timeradd.3

Michael Kerrisk

Note that on some systems, <=, >=, == don't work for timercmp()

timeradd.3

Michael Kerrisk

SYNOPSIS: Fix return types of timerisset() and timercmp()

toascii.3

Michael Kerrisk

Note why POSIX.1-2008 marks this function obsolete

console_ioctl.4

Alan Curry

Fix 'argp' type for KDGETLED description

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=517485>

group.5

Michael Kerrisk

Various minor rewordings and improvements

resolv.conf.5

Michael Kerrisk

Document 'ip6-bytestring' option

resolv.conf.5

Michael Kerrisk

Document 'edns0' option

resolv.conf.5

Michael Kerrisk

Document 'ip6-dotint' / 'no-ip6-dotint' option

resolv.conf.5

Michael Kerrisk

Note that maximum value of 'ndots' option is capped to 15

resolv.conf.5

Michael Kerrisk

Note that maximum value of 'timeout' option is capped to 30

hier.7

Michael Kerrisk

Add description of /srv

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=520904>

ip.7

Michael Kerrisk

Fix type used to declare sin6_port

The page should use the type specified by POSIX,
rather than the (equivalent) type used in the kernel

ipv6.7

Teddy Hogeborn

Fix types used to declare sin6_family and sin6_port

The page should use the types specified by POSIX,
rather than the (equivalent) types used in the kernel.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=517074>

mq_overview.7

Michael Kerrisk

Recast discussion on name length to exclude terminating NULL byte

Probably it's clearer to describe the length of the IPC object
name as a count that excludes the null terminator.

rtld-audit.7

Michael Kerrisk

Note that multiple libraries in LD_AUDIT doesn't work

This is reportedly fixed in glibc 2.10.

See http://sourceware.org/bugzilla/show_bug.cgi?id=9733

sem_overview.7

Michael Kerrisk

Fix discussion of length of semaphore names

Because of the "sem." prefix added by glibc to a semaphore
name, the limit on the length of the name (excluding the
terminating null byte) is 251 characters.

==== Changes in man-pages-3.21 =====

Released: 2009-04-15, Los Gatos

Contributors

pthread_getconcurrency.3

Michael Kerrisk

New link to new pthread_setconcurrency(3)

Changes to individual pages

initrd.4

Michael Kerrisk

Various minor wording improvements

initrd.4

Frank Dana

Add missing word in description

feature_test_macros.7

Michael Kerrisk

Update for glibc 2.10 changes to <features.h>

From glibc 2.10, <features.h> understands the values 200809 for _POSIX_C_SOURCE and 700 for _XOPEN_SOURCE, and makes corresponding changes to defaults for other feature test macros.

Michael Kerrisk

Add an example program

This example program makes it possible to explore what feature test macros are set depending on the glibc version and the macros that are explicitly set.

ldconfig.8

Michael Kerrisk

/etc/ld.so.conf also include libraries found in /lib and /usr/lib

Changes to individual pages

clone.2

Michael Kerrisk

Rewrite crufty text about number of args in older version of clone()

Some bit rot had crept in regarding the discussion of the number of arguments in older versions of this syscall.

Simplify the text to just say that Linux 2.4 and earlier didn't have ptid, tls, and ctid arguments.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=533868>

Michael Kerrisk

Fix version number for CLONE_NEWIPC

It's 2.6.19, not 2.4.19.

Michael Kerrisk

Fix errors in argument names in text (ptid, ctd)

execve.2

Mike Frysinger

Remove erroneous statement that pending signal set is cleared on execve(2).

fcntl.2

Michael Kerrisk

The kernel source file mandatory.txt is now mandatory-locking.txt

Michael Kerrisk

The Documentation/* files are now in Documentation/filesystems

flock.2

Michael Kerrisk

Remove unneeded reference to Documentation/mandatory.txt

Mandatory locks are only implemented by fcntl() locking

Michael Kerrisk

The Documentation/* files are now in Documentation/filesystems

fork.2

Jeff Moyer

Document fork() behaviour for the Linux native AIO io_context

It was noted on lkml that the fork behaviour is documented for the POSIX AIO calls, but not for the Linux native calls.

Here is a patch which adds a small blurb that folks will hopefully find useful.

Upon fork(), the child process does not inherit the io_context_t data structures returned by io_setup, and thus cannot submit further asynchronous I/O or reap event completions for said contexts.

getdents.2

Michael Kerrisk

The `d_type` field is fully supported on Btrfs

mount.2

Michael Kerrisk

Document `MS_STRICTATIME`, update description of `MS_RELATIME`

Starting with Linux 2.6.30, the `MS_RELATIME` behavior became the default, and `MS_STRICTATIME` is required to obtain the traditional semantics.

poll.2

Michael Kerrisk

Remove `EBADF` error from `ERRORS`

As reported by Motohiro:

"man poll" describe this error code.

```
>ERRORS
```

```
> EBADF An invalid file descriptor was given in one of the sets.
```

but current kernel implementation ignore invalid file descriptor, not return `EBADF`.

...

In the other hand, `SUSv3` talk about

```
> POLLNVAL
```

```
> The specified fd value is invalid. This flag is only valid in the  
> revents member; it shall ignored in the events member.
```

and

```
> If the value of fd is less than 0, events shall be ignored, and  
> irevents shall be set to 0 in that entry on return from poll().
```

but, no describe `EBADF`.

(see <http://www.opengroup.org/onlinepubs/009695399/functions/poll.html>)

So, I think the implementation is correct.

Why don't we remove `EBADF` description?

sigaction.2

Michael Kerrisk

Expand description of `si_utime` and `si_stime` fields of `siginfo_t`

stat.2

Michael Kerrisk

Improve wording of ENOTDIR error

syscalls.2

Michael Kerrisk

Add preadv() and pwritev(), new in kernel 2.6.30

wait.2

Gokdeniz Karadag

Document CLD_DUMPED and CLD_TRAPPED si_code values

daemon.3

Michael Kerrisk

Clarify discussion of 'noclose' and 'nochdir' arguments

ffs.3

Petr Baudis

SEE ALSO: add memchr(3)

fmemopen.3

Petr Baudis

Relocate BUGS section to correct position

Petr Baudis

NOTES: there is no file descriptor associated with the returned stream

Alexander Lamaison pointed out that this is not obvious from the documentation, citing an example with passing the FILE * handle to a function that tries to fstat() its fileno() in order to determine the buffer size.

Michael Kerrisk

CONFORMING TO: remove note that these functions are GNU extensions

That sentence is now redundant, since these functions are added in POSIX.1-2008.

lockf.3

Michael Kerrisk

Clarify relationship between fcntl() and lockf() locking

memchr.3

Petr Baudis

SEE ALSO: add ffs(3)

readdir.3

Michael Kerrisk

The d_type field is fully supported on Btrfs

setjmp.3

Mike Frysinger

Fix typo and clarify RETURN description

The word "signal" was duplicated in NOTES, and the RETURN

section refers to `setjmp()` and `sigsetjmp()`, and mentions `longjmp()`, but not `siglongjmp()`.

`strcmp.3`

Petr Baudis

SEE ALSO: `add strverscmp(3)`

`strcpy.3`

Mark Hills

SEE ALSO: `Add strdup(3)`

`complex.7`

Michael Kerrisk

Add missing header file for example program

Reimar Döffinger

Fix type used in example code

man `complex` (from release 3.18) contains the following code:

```
complex z = cexp(I * pi);
```

Reading the C99 standard, "complex" is not a valid type, and several compilers (Intel ICC, ARM RVCT) will refuse to compile.

It should be

```
double complex z = cexp(I * pi);
```

 instead.

`environ.7`

Michael Kerrisk

Note that last element in `environ` array is `NULL`

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=528628>

Michael Kerrisk

Wording fixes

`mq_overview.7`

Michael Kerrisk

Note that `mkdir` and `mount` commands here need superuser privilege

Michael Kerrisk

Fix example showing contents of `/dev/mqueue` file

`standards.7`

Michael Kerrisk

Remove references to dated books

Gallmeister and Lewine are rather old books. Probably, there are better books to consult nowadays, and anyway, this man page isn't intended to be a bibliography.

==== Changes in man-pages-3.23 =====

Released: 2009-09-30, Munich

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Aaron Gardner <aaron.j.gardner@gmail.com>
Andrey Vihrov <vihrov@gmail.com>
Christoph Hellwig <hch@lst.de>
Georg Sauthoff <gsauthof@techfak.uni-bielefeld.de>
Leslie P. Polzer <sky@viridian-project.de>
Marc Lehmann <debian-reportbug@plan9.de>
Mark Hills <mark@pogo.org.uk>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Nicolas François <nicolas.francois@centraliens.net>
Serge Hallyn <serue@us.ibm.com>
Siward de Groot <siward@ziggo.nl>
rui rlex <rui.rlex@gmail.com>

Apologies if I missed anyone!

Changes to individual pages

execve.2

pipe.2

tee.2

fmemopen.3

mq_notify.3

qsort.3

Michael Kerrisk

Replace use of assert() by code that checks argc

See http://bugzilla.kernel.org/show_bug.cgi?id=13569

As noted by Andrey:

The purpose of the assert macro, defined in <assert.h>, is to provide a tool to check for programming mistakes or program logic errors. However, the assert macro must never be used to perform checks for run time errors, since, with the NDEBUG macro defined, expressions within the assert macro invocations are not evaluated/checked for, resulting in behavior that was not originally intended.

...

The pages affected in the core package are

execve(2)
pipe(2)
tee(2)
fmemopen(3)
mq_notify(3)
qsort(3)

getrusage.2

Michael Kerrisk

ru_inblock and ru_oublock are now implemented
These fields of the rusage structure are filled in since
Linux 2.6.22.

mmap.2

Michael Kerrisk

Add brief documentation of MAP_HUGETLB
This flag is new in 2.6.32, and serves a similar
purpose to the shmget() SHM_HUGETLB flag.

open.2

Christoph Hellwig

add some comments on O_SYNC and friends

poll.2

Michael Kerrisk

Clarify wording describing of 'nfds' argument.
reported by: rui rlex <rui.rlex@gmail.com>

semctl.2

Nicolas François

Remove some redundant words

setpgid.2

Michael Kerrisk

Add an explanation of orphaned process groups

splice.2

tee.2

vmsplice.2

Mark Hills

Fix return type
Since glibc 2.7, the return type for these functions
is ssize_t (formerly it was long).

stat.2

Nicolas François

Fix small bug in example program
Since it is a failure, EXIT_FAILURE looks more appropriate

than EXIT_SUCCESS.

umount.2

Michael Kerrisk

glibc only exposes MNT_DETACH and MNT_EXPIRE since version 2.11

See http://sourceware.org/bugzilla/show_bug.cgi?id=10092

exit.3

Michael Kerrisk

Add a pointer to explanation of orphaned process groups in setpgid(2)

fflush.3

Michael Kerrisk

fflush() discards buffered input

ffs.3

Michael Kerrisk

Clarify that ffs() and ffsll() are GNU extensions

getaddrinfo.3

Michael Kerrisk

Note nonstandard assumed hints.ai_flags value when hints is NULL

When hints is NULL, glibc assumes hints.ai_flags is

AI_V4MAPPED|AI_ADDRCONFIG whereas POSIX says 0.

According to Ulrich Drepper, glibc's behavior is better.

getmntent.3

Mike Frysinger

setmntent() argument is 'filename' not 'fp'

The description of setmntent() formerly used the wrong argument name.

posix_fallocate.3

Nicolas François

Fix reference to POSIX.1-2008

The sentence mentions twice POSIX.1-2001.

I guess the second one should be POSIX.1-2008.

This should be checked in the standard.

setenv.3

Michael Kerrisk

Improve ERRORS section

Add ENOMEM error; improve EINVAL description. Also, make RETURN VALUE section a little more accurate in its mention of errno.

strftime.3

Nicolas François

Fix error in description: s/Monday/Thursday/

proc.5

Nicolas François

Fix page cross reference

max_user_watches is better explained in epoll(7) than inotify(7).

proc.5

Michael Kerrisk

dmesg is in section 1, not section 8

capabilities.7

Michael Kerrisk

FS UID manipulations affect CAP_LINUX_IMMUTABLE and CAP_MKNOD

Nowadays, file system UID manipulations also affect

CAP_LINUX_IMMUTABLE (since 2.6.3) and CAP_MKNOD (since 2.6.29).

capabilities.7

Michael Kerrisk

Fix version number for CAP_MKNOD in FS UID manipulations

A recent patch said "since 2.6.29". It should have

been "since 2.6.30".

capabilities.7

Nicolas François

Reword a bad sentence in description of capability bounding set.

mq_overview.7

Michael Kerrisk

Change documented ranges for msg_max and msgsize_max

Linux 2.6.28 changed the permissible ranges for

these /proc files.

tcp.7

udp.7

Nicolas François

Replace references to syctl interfaces with /proc

==== Changes in man-pages-3.24 =====

timeradd.3

rtc.4

core.5

proc.5

icmp.7

time.7

Michael Witten

Global fix: Consistently define the Epoch

All definitions of the Epoch have been refactored to the following:

1970-01-01 00:00:00 +0000 (UTC)

That form is more consistent, logical, precise, and internationally recognizable than the other variants.

Also, some wording has been altered as well.

spu_create.2

getopt.3

passwd.5

Michael Kerrisk

Global fix: s/non-existing/nonexistent/

faccessat.2
fchmodat.2
fchownat.2
fstatat.2
futimesat.2
linkat.2
mkdirat.2
mknodat.2
openat.2
readlinkat.2
renameat.2
symlinkat.2
unlinkat.2
utimensat.2
mkfifoat.3

Michael Kerrisk

Update feature test macro requirements

Starting in glibc 2.10, defining `_XOPEN_SOURCE >= 700`,
or `_POSIX_C_SOURCE >= 200809` exposes the declarations of
these functions.

Changes to individual pages

clock_getres.2

Michael Kerrisk

Update text on nonsettable `CLOCK_*_CPUTIME_ID` clocks

SUSv3 permits, but does not require `CLOCK_THREAD_CPUTIME_ID` and
`CLOCK_PROCESS_CPUTIME_ID` to be settable.

See http://bugzilla.kernel.org/show_bug.cgi?id=11972.

execve.2

Colin Watson

Fix description of treatment of caught signals

Caught signals reset to their default on an `execve()` (not
to being ignored).

fcntl.2

Michael Kerrisk

`s/F_OWNER_GID/F_OWNER_PGRP/`

Peter Zijlstra took the name change I suggested.

Michael Kerrisk

Document `F_[SG]ETOWN_EX`; update details on `F_SETOWN`

Linux 2.6.32 adds `F_SETOWN_EX` and `F_GETOWN_EX`.

Linux 2.6.12 changed (broke) the former behavior of

`F_SETOWN` with respect to threads.

intro.2

intro.3

Michael Kerrisk

Make subsection heading consistent with other intro.? pages
These pages used "Copyright Terms"; the other intro.? pages
used "Copyright Conditions". Make these pages like the others.

sendfile.2

Michael Kerrisk

Clarify behavior when 'offset' is NULL

seteuid.2

Michael Kerrisk

Note unstandardized behavior for effective ID
POSIX.1 doesn't require that the effective ID can be changed
to the same value it currently has (a no-op). The man page
should note this, since some other implementations
don't permit it.

setgid.2

Michael Kerrisk

Fix EPERM error description
s/effective group ID/real group ID/
This bug lived in man pages for 15 years before Jason
spotted it! I checked back in Linux 1.0, and the behavior
was as the fixed man page describes.

setreuid.2

Michael Kerrisk

Add more detail on POSIX.1 specification for these syscalls

setuid.2

Michael Kerrisk

Remove crufty statement that seteuid() is not in POSIX
See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=569812>

stime.2

strftime.3

tzset.3

zic.8

Michael Witten

GMT -> UTC (where appropriate)

sync_file_range.2

Christoph Hellwig

Add some big warnings re data integrity
This system call is by design completely unsuitable for any data
integrity operations. Make that very clear in the manpage.

CPU_SET.3

Vlastimil Babka

SYNOPSIS: Fix return types for CPU_COUNT_*(
These functions return 'int' not void'.

confstr.3

Michael Kerrisk

Fix feature test macro requirements

daemon.3

Michael Kerrisk

Fix description of 'nochdir' argument.

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=554819>

gethostbyname.3

Michael Kerrisk

Document feature test macro requirements for herror() and hstrerror()

Since glibc 2.8, one of _BSD_SOURCE, _SVID_SOURCE,
or _GNU_SOURCE is required.

getline.3

Michael Kerrisk

Update to reflect that these functions were standardized in POSIX.1-2008

getnameinfo.3

Michael Kerrisk

Document feature test macros requirements for NI_MAXHOST and NI_MAXSERV

Since glibc 2.8, one of _BSD_SOURCE, _SVID_SOURCE, or _GNU_SOURCE
must be defined to obtain these definitions.

getopt.3

Jonathan Nieder

Fix feature test macro requirements

memchr.3

Michael Kerrisk

Add feature text macro requirements for memrchr()

nextafter.3

Michael Kerrisk

Fix notable error in DESCRIPTION.

"less than y" should be "less than x".

popen.3

Michael Kerrisk

Fix feature test macro requirements

pthread_attr_setdetachstate.3

pthread_attr_setschedparam.3

pthread_attr_setschedpolicy.3

Denis Barbier

Argument name is 'attr' not 'thread'

The function argument was misnamed in the DESCRIPTION on these three pages.

rtnetlink.3

Michael Kerrisk

Various fixes in example code

Edward reported a problem in the example code, where a variable seems to be misnamed. Upon inspection, there seem to be a few such instances, and this patch is my best guess at how things should look.

sched_getcpu.3

Michael Kerrisk

Place correct header file in SYNOPSIS

sleep.3

Bill O. Gallmeister

sleep() puts calling *thread* to sleep (not calling *process*)

sleep.3

Bill O. Gallmeister

Add nanosleep(2) to SEE ALSO

strftime.3

Michael Kerrisk

%z is defined in SUSv3

So, substitute "GNU" tag in man page by "SU".

strftime.3

Michael Witten

Move 822-compliant date format example to EXAMPLES section

The RFC 822-compliant date format given in the description of '%z' is now moved to the 'EXAMPLES' section (note: 'EXAMPLE' has been renamed 'EXAMPLES').

Furthermore, that format example is now actually RFC 822-compliant (using '%y' instead of '%Y') and has been qualified as being correct only when in the context of at least an English locale. Also, '%T' is used in place of '%H:%M:%S'.

For completeness, an RFC 2822-compliant format example has been similarly added.

strftime.3

Michael Witten

Expand introductory text

strftime.3

Michael Witten

Clarification of %z specifier

string.3

Mark Hills

Add stpcpy() to this list of string functions

strptime.3

Michael Kerrisk

Initialize tm structure in example program

undocumented.3

Michael Kerrisk

Remove pages now documented

By now, the following are documented:

fopencookie(3)

freeifaddrs(3)

rawmemchr(3)

readdir_r(3)

getutmp(3)

getutmpx(3)

utmpxname(3)

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=554819>

group.5

Michael Kerrisk

s/passwd/password/

The page inconsistently used "passwd" and "password" to refer to the same field.

capabilities.7

Michael Kerrisk

Update securebits discussion to use SECBIT_* flags

feature_test_macros.7

Michael Kerrisk

_POSIX_C_SOURCE >= 200808 defines _ATFILE_SOURCE

Since glibc 2.10, _POSIX_C_SOURCE >= 200808 defines _ATFILE_SOURCE

path_resolution.7

Michael Kerrisk

Add readlink(2) to SEE ALSO

Michael Kerrisk

Fix NAME line

The poorly constructed part preceding "\-" causes apropos not to be able to find the subject.

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=558300>

signal.7

Michael Kerrisk

Fix discussion of SIGUNUSED

Clarify that this signal really is synonymous with SIGSYS.

See http://bugzilla.kernel.org/show_bug.cgi?id=14449

Apologies if I missed anyone!

New and rewritten pages

migrate_pages.2

Andi Kleen

New page documenting migrate_pages(2).

Andi's text based on the move_pages.2 page;
additional edits by mtk.

migrate_pages(2) was new in Linux 2.6.16.

quotactl.2

Jan Kara

Major updates

Update the page to consolidate information from the
outdated man-pages quotactl.2 page and the quotactl.2
page in the "quota-tools" package. The page in "quota-tools"
has now been dropped by Jan Kara, so that there is just one
canonical quotactl.2 page (in pan-pages).

Michael Kerrisk

Various other pieces added to the page by mtk.

Newly documented interfaces in existing pages

fcntl.2

Michael Kerrisk

Document F_SETPIPE_SZ and F_GETPIPE_SZ

These commands, new in kernel 2.6.35, set and get the capacity of pipes.

madvise.2

Andi Kleen

Document MADV_HWPOISON

Michael Kerrisk

Added documentation of MADV_MERGEABLE and MADV_UNMERGEABLE

These flags (used for Kernel Samepage Merging, KSM) are new in 2.6.32.

Andi Kleen

Document MADV_SOFT_OFFLINE

This operation was added in Linux 2.6.33.

mmap.2

Michael Kerrisk

Document MAP_UNINITIALIZED flag

New in Linux 2.6.33.

prctl.2

Andi Kleen

Document the hwpoison prctls in 2.6.32

sched_setscheduler.2

Michael Kerrisk

Document SCHED_RESET_ON_FORK

New in Linux 2.6.32

umount.2

Michael Kerrisk

Document UMOUNT_NOFOLLOW

New in Linux 2.6.34.

mkstemp.3

Michael Kerrisk

Document mkstemps() and mkostemps()

These functions are new in glibc 2.11. They allow the template string to include a suffix after the "XXXXXX" string.

proc.5

Michael Kerrisk

Document /proc/sys/vm/memory_failure_early_kill

New in 2.6.32. Description based on the text in Documentation/sysctl/vm.txt.

Michael Kerrisk

Document /proc/sys/vm/memory_failure_recovery

New in Linux 2.6.32. Description based on the text in Documentation/sysctl/vm.txt.

Michael Kerrisk

Document /proc/sys/fs/pipe-max-size

socket.7

Jan Engelhardt

Document SO_DOMAIN and SO_PROTOCOL

These read-only socket options were new in Linux 2.6.32.

New and changed links

fstatvfs.2

Michael Kerrisk

Adjust link to point to Section 3

fstatvfs.3

statvfs.2

Michael Kerrisk

New link to page relocated to Section 3

mkstemp.3

mkostemp.3

Michael Kerrisk

New links to mkstemp.3

mkstemp.3 now describes mkstemp(3) and mkostemp(3).

timer_create.2

timer_delete.2

timer_getoverrun.2

timer_settime.2

getline.3

Michael Kerrisk

Add 'L' to constants in feature test macro specifications

Be consistent with POSIX, which uses constants such as 200809L.

Global changes

open.2

sync_file_range.2

umount.2

Michael Kerrisk

Global fix: s/filesystem/file system/

Changes to individual pages

fcntl.2

Michael Kerrisk

Note that glibc 2.11 papers over the kernel F_GETOWN bug
Since version 2.11, glibc works around the kernel limitation for
process groups IDs < 4096 by implementing F_GETOWN via F_GETOWN_EX.

futex.2

Michael Kerrisk

Various fixes in SEE ALSO

getpriority.2

nice.2

Francesco Cosoleto

Move renice from section 8 to section 1

getrusage.2

Mark Hills

Add ru_maxrss

See kernel commit 1f10206.

Mark Hills

Description of maintained fields

These descriptions are taken from NetBSD 5.0's getrusage(2).

Michael Kerrisk

Enhanced description of various fields

mlock.2

Michael Kerrisk

/proc/PID/status VmLck shows how much memory a process has locked

After a note from Tom Swigg, it seems sensible mention VmLck here.

mount.2

Petr Uzel

Fix incorrect path

move_pages.2

Andi Kleen

Clarify includes/libraries

mremap.2

Michael Kerrisk

Clarify existence of fifth argument.

msgctl.2

semctl.2

shmctl.2

Francesco Cosoleto

Move ipc's from section 8 to section 1

open.2

Michael Kerrisk

Remove ambiguity in text on NFS and O_EXCL.

poll.2

Michael Kerrisk

Fix discussion of ppoll() timeout argument

1. Rename ppoll() argument to "timeout_ts" to distinguish it from the poll() argument in the text.
2. More accurately describe the poll() call that is equivalent to ppoll().

posix_fadvise.2

Michael Kerrisk

Add sync_file_range(2) under SEE ALSO

prctl.2

Michael Kerrisk

Correct PR_SET_KEEPCAPS description

The "keep capabilities" flag only affects the treatment of permitted capabilities, not effective capabilities.

Also: other improvements to make the PR_SET_KEEPCAPS text clearer.

select_tut.2

Michael Kerrisk

Fix bug in example program

sigaction.2

Michael Kerrisk

Add TRAP_BRANCH and TRAP_HWBKPT to si_code values for SIGTRAP

Michael Kerrisk

Rearrange text describing fields set by sigqueue(2)

Michael Kerrisk

Add details for signals sent by POSIX message queue notifications

Michael Kerrisk

Improve description of various siginfo_t fields

Michael Kerrisk

Add some details for SIGTRAP and si_trapno

Andi Kleen

Document hwpoison signal extensions

statfs.2

Michael Kerrisk

Bring statfs struct type declarations closer to glibc reality

Fang Wenqi

Add definition EXT4_SUPER_MAGIC = 0xEF53

Michael Kerrisk

Document f_frsize field.

statvfs.2

Michael Kerrisk

Move this page to section 3 (since it's a library call)

swapon.2

Ivana Hutarova Varekova

Note effect of CONFIG_MEMORY_FAILURE on MAX_SWAPFILES

From 2.6.32, MAX_SWAPFILES is decreased by 1 if the kernel is built with CONFIG_MEMORY_FAILURE.

syscalls.2

Michael Kerrisk

Bring system call list up to date with Linux 2.6.33

Michael Kerrisk

Fix kernel version number for utimes()

cproj.3

Michael Kerrisk

Note fix for C99 conformance in glibc 2.12.

crypt.3

Petr Baudis

Correct note on key portion significance

As Marcel Moreaux notes:

The Linux manpage for crypt()[1] contains the following statement as the last sentence of the NOTES section:

In the SHA implementation the entire key is significant (instead of only the first 8 bytes in MD5).

It should probably say "DES" where it says "MD5" (and maybe "MD5/SHA" where it says "SHA"), because in MD5 password hashing, the entire key is significant, not just the first 8 bytes.

This patch fixes the wording.

fmemopen.3

Michael Kerrisk

Bug fix in example program

ftw.3

Michael Kerrisk

Note that if 'fn' changes CWD, the results are undefined

Michael Kerrisk

Clarify description of fpath argument

As reported by Pierre Habouzit, 'fpath' is not relative to 'dirpath'. It is either relative to the calling process's current working directory (if 'dirpath' was relative), or it is absolute (if 'dirpath' was absolute).

getaddrinfo.3

Christian Franke

Fix a field name mixup: s/ai_family/ai_flags/

getline.3

Robert Wohrab

Remove unneeded check before free()

The manpage of getline shows an example with an extra NULL pointer check before it calls free. This is unneeded according to free(3):

If ptr is NULL, no operation is performed.

This patch removes the "if" check.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=572508>

log.3

log10.3

log2.3

Jan Engelhardt

Add cross-references to other-base logarithmic functions

opendir.3

Petr Baudis

Specify feature test macro requirements for fdopendir(3)

Currently, there is no note on the fact that fdopendir() is POSIX.2008-only.

openpty.3

Eric Blake

Use const as appropriate

Michael Kerrisk

Note glibc version that added "const" to function arguments

Michael Kerrisk

Explicitly note that these functions are not in POSIX

resolver.3

Michael Kerrisk

Fix declaration of dn_comp() in SYNOPSIS

Remove the second 'exp_dn' from the calling signature.

termios.3

Michael Kerrisk

Change NOFLSH text to speak of characters, not signals

core.5

Michael Kerrisk

Update description of coredump_filter

Kernel 2.6.24 added MMF_DUMP_ELF_HEADERS.

Kernel 2.6.28 added MMF_DUMP_HUGETLB_PRIVATE and
MMF_DUMP_HUGETLB_SHARED.

elf.5

Daisuke HATAYAMA

Document PN_XNUM extension

In linux-2.6.34-rc1, an ELF core extension was added; user-land
tools manipulating ELF core dump such as gdb and binutils has
already been modified before; so elf.5 needs to be modified
accordingly.

You can follow information on the ELF extension via the LKML post:

<http://lkml.org/lkml/2010/1/3/103>

Date Mon, 04 Jan 2010 10:06:07 +0900 (JST)

Subject ... elf coredump: Add extended numbering support

This Linux-specific extension was added in kernel 2.6.34.

Reviewed-by: Petr Baudis <pasky@suse.cz>

Michael Kerrisk

Remove EI_BRAND

As reported by Yuri Kozlov and confirmed by Mike Frysinger,

EI_BRAND is not in GABI

(<http://www.sco.com/developers/gabi/latest/ch4.eheader.html>)

It looks to be a BSDism

Michael Kerrisk

Remove words under '.note': "described below"

The existing text is broken, because there is
no "'Note Section' format' describe below. Simplest
solution is to remove the words "described below".

filesystems.5

Jeff Barry

Add discussion of ntfs and ext4

proc.5

Michael Kerrisk

Simplify description of /proc/sys and /proc/sys/fs

In the description of these directories, there's no need
to list all the files and subdirectories that they contain;

that information is provided by the entries that follow.

services.5

Yuri Kozlov

Remove crufty reference to nonexistent BUGS section

capabilities.7

Michael Kerrisk

Document CAP_SYS_RESOURCE and F_SETPIPE_SZ

With CAP_SYS_RESOURCE, a process can increase pipe capacity above /proc/sys/ps/pipe-max-size.

Michael Kerrisk

Add get_robust_list() info under CAP_SYS_PTRACE

Michael Kerrisk

Add MADV_HWPOISON under CAP_SYS_ADMIN

signal.7

Michael Kerrisk

Make a clearer statement about nonportable aspect of signal(2)

Make a clearer statement that signal(2) is less portable for establishing a signal handler.

socket.7

Michael Kerrisk

Use consistent language to describe read-only socket options

udp.7

Michael Kerrisk

Add FIONREAD warning.

Warn that FIONREAD can't distinguish case of a zero-length datagram from the case where no datagrams are available.

Michael Kerrisk

Add EMLINK error to ERRORS

mq_getsetattr.2

mq_close.3

mq_getattr.3

mq_notify.3

mq_send.3

mq_unlink.3

Lnac Huard

Fix return type in SYNOPSIS (s/mqd_t/int/)

recv.2

send.2

Michael Kerrisk

Remove obsolete reference to glibc version in NOTES

recv.2

send.2

Nicholas Hunt

Adjust type shown for msg_controllen to glibc reality

This patch fixes the type of msg_controllen in the struct msg_hdr definition given in send.2 and recv.2 to match the definition in glibc and the kernel.

select.2

Michael Kerrisk

Update NOTES on old glibc pselect()

Make it clear that modern glibc uses the kernel pselect() on systems where it is available.

See https://bugzilla.kernel.org/show_bug.cgi?id=14411

statfs.2

Guillem Jover

Fix copy & paste error for __SWORD_TYPE definition

sysfs.2

Michael Kerrisk

Clarify that this syscall is obsolete.

And strengthen recommendation to use /proc/filesystems instead.

write.2

Michael Kerrisk

Add EDESTADDRREQ error

a64l.3

Peng Haitao

Fix error in NOTES, s/a64l/164a/

error.3

Linus Nilsson

Change "perror" to "strerror" in DESCRIPTION of error()

mq_send.3

Michael Kerrisk

Fix EAGAIN description (s/empty/full)

initrd.4

Yuri Kozlov

Fix IP address in explanation of NFS example

tzfile.5

Michael Kerrisk

Add information on version 2 format timezone files

Updated using information from the tzcode 2010l release at
<ftp://elsie.nci.nih.gov/pub>.

(It's an open question whether or not a version of tzfile.5
should live independently in man-pages. It was added to the
man-pages set many years ago. For now, I'll follow a
conservative course that causes least pain to downstream,
by continuing to maintain a separate copy in man-pages.)

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=594219>

Fix decimal values in encoding tables

Octal and hexadecimal values are right, but there are some off-by-one errors in decimal values. Correct values are printed by this command:

```
perl -pi -e 'if (s/^(([0-7]+)\t([0-9]+)\t([0-9a-fA-F]+)/))  
{printf "%03o\t%d\t%s", hex($3), hex($3), $3;}' man7/*.7
```

Changes to individual pages

capget.2

Michael Kerrisk

SYNOPSIS: Remove unneeded "undef _POSIX_SOURCE"

fcntl.2

Michael Kerrisk

Add feature test macro requirements for F_GETOWN and F_SETOWN

fcntl.2

Michael Kerrisk

Note feature test macro requirements for F_DUPFD_CLOEXEC

getrlimit.2

Michael Kerrisk

Document units for RLIMIT_RTTIME limit

This limit is in microseconds

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=596492>

lseek.2

Michael Kerrisk

Removed note about return type on ancient systems

mount.2

Michael Kerrisk

Definitions of various MS_* constants only appeared in glibc 2.12

See http://sourceware.org/bugzilla/show_bug.cgi?id=11235

stat.2

Michael Kerrisk

Update information on nanosecond timestamp fields

Update feature test macro requirements for exposing these fields.

Note that these fields are specified in POSIX.1-2008.

timer_create.2

Michael Kerrisk

Factor out generic material that was moved to new sigevent(7) page

aio_fsync.3

Michael Kerrisk

Add reference to new sigevent(7) page

atanh.3

Michael Kerrisk

glibc 2.10 fixed pole error bug

http://sourceware.org/bugzilla/show_bug.cgi?id=6759

was resolved.

cerf.3

Michael Kerrisk

Make it clearer that this function is unimplemented

cos.3

Michael Kerrisk

errno is now correctly set to EDOM on a domain error

http://sources.redhat.com/bugzilla/show_bug.cgi?id=6780

was (silently) resolved.

expm1.3

Michael Kerrisk

errno is now correctly set to ERANGE on a range error

http://sources.redhat.com/bugzilla/show_bug.cgi?id=6788

was (silently) resolved.

fmod.3

Michael Kerrisk

errno is now correctly set to EDOM for the x==inf domain error
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6784
was (silently) resolved.

insque.3

Michael Kerrisk

Noted prev == NULL bug in glibc 2.4 and earlier
As noted by Remi Denis-Courmont, glibc nowadays allows
'prev' to be NULL, as required by POSIX for initializing
a linear list. But in glibc 2.4 and earlier, 'prev' could
not be NULL. Add a BUGS section noting this.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=551201>

Michael Kerrisk

Added info on circular lists, and initializing circular lists

Michael Kerrisk

Added example program

lgamma.3

Michael Kerrisk

glibc 2.10 fixed pole error bug
http://sourceware.org/bugzilla/show_bug.cgi?id=6777
was (silently) resolved.

log2.3

Matthew Flaschen

log2() function does not conform to C89
log2(), log2f(), and log2l() do not conform to C89.
They are defined in C99. See <http://flash-gordon.me.uk/ansi.c.txt>
and <http://www.schweikhardt.net/identifiers.html>

mq_notify.3

Michael Kerrisk

Factor out generic material that was moved to new sigevent(7) page

pow.3

Michael Kerrisk

errno is now correctly set to ERANGE on a pole error
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6776
was (silently) resolved.

pthread_kill_other_threads_np.3

Michael Kerrisk

CONFORMING TO: Note meaning of "_np" suffix

rand.3

Michael Kerrisk

Clarify description of range of returned value

Michael Kerrisk

Add an example program

Michael Kerrisk

Expand description of rand_r()

random.3

W. Trevor King

Update initState() return value description to match glibc

readdir.3

Michael Kerrisk

Clarify that "positive error numbers" are listed in ERRORS

rexec.3

Michael Kerrisk

SYNOPSIS: Add header file and feature test macro requirements

sigpause.3

Michael Kerrisk

Correct discussion of when BSD vs SysV version is used in glibc

sin.3

Michael Kerrisk

errno is now correctly set to EDOM on a domain error

http://sources.redhat.com/bugzilla/show_bug.cgi?id=6781

was (silently) resolved.

tan.3

Michael Kerrisk

errno is now correctly set to EDOM on a domain error

http://sources.redhat.com/bugzilla/show_bug.cgi?id=6782

was (silently) resolved.

wscasecmp.3

wcncasecmp.3

wcsnlen.3

Michael Kerrisk

Added VERSIONS section

boot.7

Yuri Kozlov

Update list of major Linux distributions

feature_test_macros.7

Michael Kerrisk

Make text on required placement of macros more prominent

Move the text that notes the requirement that feature test macros

must be defined before including any header files to the top of the page, and highlight the text further, so that the reader will not miss this point.

pthread.7

signal.7

Michael Kerrisk

Add SEE ALSO reference to new sigevent(7) page

tcp.7

Michael Kerrisk

Clarify header file details for SIOCINQ and SIOCOUTQ

Also note synonymous FIONREAD and TIOCOUTQ.

==== Changes in man-pages-3.28 =====

Released: 2010-10-04, Munich

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Andries E. Brouwer <Andries.Brouwer@cwi.nl>

Denis Barbier <bouzim@gmail.com>

Jan Kara <jack@suse.cz>

Landijk <landijk-user@yahoo.com>

Lennart Poettering <mzjro@0pointer.net>

Michael Haardt <michael@morja.de>

Michael Kerrisk <mtk.manpages@gmail.com>

Petr Baudis <pasky@suse.cz>

Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

New and rewritten pages

getaddrinfo_a.3

Petr Baudis

New page documenting getaddrinfo_a()

The page also documents gai_suspend(), gai_cancel(), and gai_error().

aio.7

Michael Kerrisk

New page providing an overview of POSIX asynchronous I/O

Newly documented interfaces in existing pages

exec.3

Michael Kerrisk

Document `execvpe()`

This function was added to `glibc` in version 2.11.

Also various other small rewrites in the page.

New and changed links

`gai_cancel.3`

`gai_error.3`

`gai_suspend.3`

Petr Baudis

New links to new `getaddrinfo_a.3` page

`error_one_per_line.3`

Michael Kerrisk

Fix misnamed link file (was `error_on_per_line.3`)

`execvpe.3`

Michael Kerrisk

New link to `exec.3`

`sigstack.3`

Michael Kerrisk

New link to `sigaltstack.2`

No new programs should use `sigstack(3)`. Point the user to the better `sigaltstack(2)`, whose man page briefly mentions `sigstack(3)`.

`vlimit.3`

Michael Kerrisk

New link to `getrlimit.2`

No new programs should use `vlimit(3)`. Point the user to the better `setrlimit(2)`, whose man page briefly mentions `vlimit(3)`.

`vtimes.3`

Michael Kerrisk

New link to `getrusage.2`

No new programs should use `vtimes(3)`. Point the user to the

better getrusage(2), whose man page briefly mentions vtimes(3).

Global changes

Various pages

Michael Kerrisk

Switch to American usage: "-wards" ==> "-ward"

American English uses "afterward" in preference to "afterwards",
and so on

chdir.2

chmod.2

chown.2

gethostname.2

getsid.2

pread.2

setpgid.2

sigaltstack.2

stat.2

truncate.2

wait.2

dirfd.3

getsubopt.3

mkdtemp.3

mkstemp.3

siginterrupt.3

strdup.3

Michael Kerrisk

Simplify feature test macro requirements

Changes to individual pages

getrlimit.2

Michael Kerrisk

Add mention of the ancient vlimit() function

getrusage.2

Michael Kerrisk

Add mention of the ancient vtimes() function

io_cancel.2

io_destroy.2

io_getevents.2

io_setup.2

io_submit.2

Michael Kerrisk

SEE ALSO: add aio(7)

sched_setscheduler.2

Michael Kerrisk

ERRORS: note that NULL 'param' yields EINVAL

stat.2

Michael Kerrisk

Note feature test macro requirements for blkcnt_t and blksize_t

timer_create.2

Michael Kerrisk

Standardize on name 'sevp' for sigevent argument

truncate.2

Michael Kerrisk

Correct and simplify ftruncate() feature test macro requirements

The glibc 2.12 feature test macro requirements for ftruncate() are buggy; see http://sourceware.org/bugzilla/show_bug.cgi?id=12037.

Corrected the requirements in the SYNOPSIS, and added a BUGS section describing the problem in glibc 2.12.

aio_cancel.3

Michael Kerrisk

Add pointer to aio(7) for example program

Refer the reader to aio(7) for a description of the aiocb structure

CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_error.3

Michael Kerrisk

Wording improvements in RETURN VALUE

Add pointer to aio(7) for example program

Refer the reader to aio(7) for a description of the aiocb structure

CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_fsync.3

Michael Kerrisk

Refer the reader to aio(7) for a description of the aiocb structure

CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_read.3

Michael Kerrisk

Various minor rewordings and additions

Add pointer to sigevent(7) for details of notification of I/O completion

Add pointer to aio(7) for example program

Refer the reader to aio(7) for a description of the aiocb structure

CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_return.3

Michael Kerrisk

Improve description in RETURN VALUE

Add pointer to aio(7) for example program

Refer the reader to aio(7) for a description of the aiocb structure

CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_suspend.3

Michael Kerrisk

Various additions and rewordings.

Give some arguments more meaningful names.

More explicitly describe the 'nitems' argument.

Explicitly note that return is immediate if an I/O operation has already completed.

Note that aio_error(3) should be used to scan the aiocb list after a successful return.

Add references to other relevant pages.

Various other pieces rewritten.

Refer the reader to aio(7) for a description of the aiocb structure

CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_write.3

Michael Kerrisk

Add pointer to sigevent(7) for details of notification of I/O completion

Various minor rewordings and additions

Refer the reader to aio(7) for a description of the aiocb structure

CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

clearenv.3

Michael Kerrisk

Fix error in feature test macro requirements

dysize.3

Michael Kerrisk

Remove crufty statement about old SCO bug

exec.3

Michael Kerrisk

Add feature test macro requirements for execvpe()

Rewrite description of PATH and mention _CS_PATH

Note execvp() and execlp() behavior for filename containing a slash

getaddrinfo.3

Michael Kerrisk

Add SEE ALSO reference to new getaddrinfo_a.3 page

gethostbyname.3

Michael Kerrisk

Fix formatting of feature test macros

getw.3

Michael Kerrisk

Fix feature test macros

malloc.3

Landijk

Remove editorializing comments on memory overcommitting

See https://bugzilla.kernel.org/show_bug.cgi?id=19332

Michael Kerrisk

Various minor reorganizations and wording fix-ups

mq_notify.3

Michael Kerrisk

Standardize on name 'sevp' for sigevent argument

nl_langinfo.3

Michael Haardt

Make it clear that nl_langinfo() interacts with setlocale()

Add an example program

posix_openpt.3

Michael Kerrisk

Fix feature test macro requirements

rand.3

Michael Kerrisk

Remove duplicate #include in example program

strtok.3

Petr Baudis

Add reference to strtok() example in getaddrinfo(3)

inotify.7

Michael Kerrisk

Added section noting limitations and caveats of inotify

sigevent.7

Michael Kerrisk

Add SEE ALSO reference to new getaddrinfo_a.3 page

Add SEE ALSO referring to new aio(7) page

suffixes.7

Michael Kerrisk

Change explanation of ".rpm" to "RPM software package"

===== Changes in man-pages-3.29 =====

Released: 2010-10-19, Detroit

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Balazs Scheidler <bazsi@balabit.hu>
David Prevot <davidp@altern.org>
Denis Barbier <bouzim@gmail.com>
Guillem Jover <guillem@hadrons.org>
Ivana Varekova <varekova@redhat.com>

Stephan Mueller <stephan.mueller@atsec.com>
Thomas Jarosch <thomas.jarosch@intra2net.com>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages

subpage_prot.2

Michael Kerrisk

New page documenting the PowerPC-specific subpage_prot(2)

aio_init.3

Michael Kerrisk

New page documenting aio_init(3)

Newly documented interfaces in existing pages

posix_fadvise.2

Michael Kerrisk

Document the architecture-specific arm_fadvise64_64() system call

This ARM-specific system call fixes the argument ordering

for that architecture. Since Linux 2.6.14.

sync_file_range.2

Michael Kerrisk

Document the architecture-specific sync_file_range2() system call

As described in commit edd5cd4a9424f22b0fa08bef5e299d41befd5622, the sync_file_range() argument order is broken for some architectures (PowerPC, ARM, tile). The remedy was a different system call using the right argument order on those architectures.

psignal.3

Guillem Jover

Document psiginfo()

psiginfo() was added to glibc in version 2.10.

Michael Kerrisk

Add details, VERSIONS, and BUGS for psiginfo()

ip.7

Balazs Scheidler

Document IP_RECVORIGDSTADDR

Document IP_TRANSPARENT

Michael Kerrisk

Document IP_FREEBIND

Text based on input from Lennart Poettering and Balazs Scheidler.

See https://bugzilla.kernel.org/show_bug.cgi?id=20082

New and changed links

arm_fadvise64_64.2

Michael Kerrisk

New link to posix_fadvise.2

arm_sync_file_range.2, sync_file_range2.2

Michael Kerrisk

New links to sync_file_range.2

arm_fadvise.2

Michael Kerrisk

New link to posix_fadvise.2

psiginfo.3

Guillem Jover

New link to psignal.3

Global changes

Many pages

Michael Kerrisk

global fix: s/Unix/UNIX/

The man pages were rather inconsistent in the use of "Unix" versus "UNIX". Let's go with the trademark usage.

Various pages

Michael Kerrisk

Global fix: s/pseudo-terminal/pseudoterminal/

grantpt.3, ptsname.3, unlockpt.3, pts.4

Michael Kerrisk

Global fix: s/pty/pseudoterminal/

recv.2, cmsg.3, unix.7

Michael Kerrisk

global fix: s/UNIX socket/UNIX domain socket/

fmtmsg.3, gethostbyname.3, termios.3

Michael Kerrisk

Global fix: s/Unixware/UnixWare/

Changes to individual pages

inotify_rm_watch.2

Michael Kerrisk

SYNOPSIS: fix type of 'wd' argument

posix_fadvise.2

Michael Kerrisk

Rewrite VERSIONS, noting that the system call is fadvise64()

syscalls.2

Michael Kerrisk

Add the PowerPC-specific subpage_prot() system call

Add sync_file_range2()

truncate.2

Michael Kerrisk

Fix feature test macros

aio_cancel.3

aio_error.3

aio_fsync.3

aio_read.3

aio_return.3

aio_suspend.3

aio_write.3

Michael Kerrisk

SEE ALSO: Add lio_listio(3)

gai_cancel.3

gai_error.3

gai_suspend.3

Michael Kerrisk

Make these into links

In the previous release, these files were accidentally made copies of getaddrinfo_a.3, instead of being made as link files.

getifaddrs.3

Thomas Jarosch

Prevent possible NULL pointer access in example program

malloc.3

Michael Kerrisk

Emphasize that malloc() and realloc() do not initialize allocated memory

malloc_hook.3

Ivana Varekova

Warn that these functions are deprecated

strcpy.3

Michael Kerrisk

Formatting fixes in strncpy() example implementation code

ip.7

Michael Kerrisk

Reword NOTES on Linux-specific options

sigevent.7

Michael Kerrisk

SEE ALSO: Add aio_read(3), aio_write(3), and lio_listio(3)

unix.7

Michael Kerrisk

Document the autobind feature

Michael Kerrisk

Fix description of abstract socket names

As reported by Lennart Poettering:

The part about "abstract" sockets is misleading as it suggests that the sockaddr returned by getsockname() would necessarily have the size of sizeof(struct sockaddr), which however is not

the case: getsockname() returns exactly the sockaddr size that was passed in on bind(). In particular, two sockets that are bound to the same sockaddr but different sizes are completely independent.

See https://bugzilla.kernel.org/show_bug.cgi?id=19812

Michael Kerrisk

Fix description of "pathname" sockets

As reported by Lennart Poettering:

The part about "pathname" sockets suggests usage of `sizeof(sa_family_t) + strlen(sun_path) + 1` for calculating the sockaddr size. Due to alignment/padding this is probably not a good idea. Instead, one should use `offsetof(struct sockaddr_un, sun_path) + strlen() + 1` or something like that.

See https://bugzilla.kernel.org/show_bug.cgi?id=19812

===== Changes in man-pages-3.30 =====

Released: 2010-11-01, Munich

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>
Bernhard Walle <bernhard@bwalle.de>
David Prevot <davidp@altern.org>
Eric W. Biederman <ebiederm@xmission.com>
Florian Lehmann <flo.lehmann@gmail.com>
Jan Engelhardt <jengelh@medozas.de>
Lucian Adrian Grijincu <lucian.grijincu@gmail.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Paul Mackerras <paulus@samba.org>
Pádraig Brady <P@draigbrady.com>
Reuben Thomas <rrt@sc3d.org>
scarlettsp <scarlettsp@gmail.com>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages

kexec_load.2

Andi Kleen

New page documenting kexec_load(2)

Michael Kerrisk

Add license

Michael Kerrisk

Incorporate fixes from Eric W. Biederman

Eric noted that a few instances of "virtual" should be "physical" and noted:

There is an expectation that at hand off from sys_kexec that virtual and physical addresses will be identity mapped. But this isn't the old Alpha booting convention where you have a virtual address and then you have to parse the page table to figure out where your kernel was actually loaded.

Michael Kerrisk

Additions and edits by mtk

Various wording and layout improvements.

Fixed the name of a constant: s/KEXEC_ARCH_I386/KEXEC_ARCH_386/.

Added RETURN VALUE and ERRORS sections.

Added VERSIONS section

Note that CONFIG_KEXEC is needed

Removed details of using syscall; the reader can find them in syscall(2).

Added some details for KEXEC_PRESERVE_CONTEXT.

Revised the text mentioning the kernel header, since it is not yet exported, and it's not certain that it will be.

lio_listio.3

Michael Kerrisk

New page documenting lio_listio(3)

Newly documented interfaces in existing pages

reboot.2

Andi Kleen

Document LINUX_REBOOT_KEXEC

Some fix-ups by Michael Kerrisk

Michael Kerrisk

Place 'cmd' values in alphabetical order.

unshare.2

Michael Kerrisk

Document CLONE_NEWIPC

Michael Kerrisk

Document CLONE_NEWNET

Lucian Adrian Grijincu

Improve description of CLONE_NEWNET

CLONE_NEWNET creates a new network namespace from scratch.

You don't have anything from the old network namespace in the new one. Even the loopback device is new.

Michael Kerrisk

Document CLONE_SYSVSEM

Michael Kerrisk

Document CLONE_NEWUTS

Michael Kerrisk

Relocate discussion of CAP_SYS_ADMIN to CLONE_NEWNS section

And rewrite the EPERM description to be more general in preparation for the new flags to be documented.

Global changes

Various pages

Michael Kerrisk

Add reference to feature_test_macros(7)

Some pages simply list feature test macro requirements in the form:

```
#define #GNU_SOURCE
#include <someheader.h>
```

For these pages, add a "See feature_test_macros(7)" comment on the "#define" line.

Various pages

Michael Kerrisk

SEE ALSO: Remove redundant reference to feature_test_macros(7)

Various pages

David Prevo

Use greater consistency in NAME line

(Remove definite article at start of descriptive clause.)

Various pages

Michael Kerrisk

SEE ALSO: Place entries in correct order

Various pages

Michael Kerrisk

ERRORS: Place entries in correct order

Various pages

Michael Kerrisk

Add section number to references to functions documented in other pages

Various pages

Michael Kerrisk

Remove redundant section number in page references

Remove section number in function references that are for functions documented on this page.

armSCII-8.7

iso_8859-3.7

iso_8859-4.7

iso_8859-5.7

iso_8859-6.7

iso_8859-10.7

iso_8859-11.7

iso_8859-13.7

iso_8859-14.7

koi8-u.7

David Prevot

Capitalize hexadecimal numbers

Changes to individual pages

access.2

Michael Kerrisk

Note use of `faccessat(2)` for checking symbolic link permissions

Michael Kerrisk

Give an example of a safer alternative to using `access()`

clone.2

Michael Kerrisk

Clarify when `CLONE_NEWNET` implementation was completed

faccessat.2

Michael Kerrisk

Note that `faccessat()` is racy

fcntl.2

Michael Kerrisk

RETURN VALUE: Improve description of `F_GETFD` and `F_GETFL`

inotify_add_watch.2

Michael Kerrisk

Document `ENOENT` error

mlock.2

Michael Kerrisk

Improve wording describing /proc/PID/status /VmLck field

Michael Kerrisk

shmctl() SHM_LOCKed memory is not included in VmLck

reboot.2

Michael Kerrisk

Place 'cmd' values in alphabetical order

subpage_prot.2

Michael Kerrisk

Change 1-line page description

Michael Kerrisk

Improvements after review by Paul Mackerras

timer_settime.3

Michael Kerrisk

Remove redundant SEE ALSO reference

eidaccess.3

Michael Kerrisk

Note the use of faccessat(2) to operate on symbolic links

Michael Kerrisk

Note that the use of eidaccess() is racy

fenv.3

Michael Kerrisk

Clarify wording relating to glibc version

getgrent.3

getgrent_r.3

getgrnam.3

Michael Kerrisk

Refer reader for group(5) for more info on group structure

getopt.3

Bernhard Walle

Use constants in getopt_long() example

The description of getopt_long() mentions the constants
required_argument, no_argument and optional_argument.

Use them in the example to make the code easier to understand.

getpw.3

Michael Kerrisk

Change comment describing pw_gecos

getpw.3

getpwent.3

getpwent_r.3

Michael Kerrisk

Refer reader to passwd(5) for more info on the passwd structure

getpwent.3

getpwnam.3

Michael Kerrisk

Note that pw_gecos is not in POSIX

And change the comment describing this field

getpwent_r.3

Michael Kerrisk

Change comment describing pw_gecos

getpwnam.3

Michael Kerrisk

Some rewording and restructuring

sched_getcpu.3

Michael Kerrisk

Fix feature test macro requirements

strlen.3

Michael Kerrisk

Fix feature test macro requirements

group.5

Michael Kerrisk

Various minor rewordings

hosts.5

protocols.5

spufs.7

termio.7

David Prevot

Remove definite article from NAME section

Please find inline another tiny patch in order to shrink the definite article from some other pages (found with "rgrep -i '\\\\- the' man*").

passwd.5

Michael Kerrisk

Various minor rewordings

proc.5

Michael Kerrisk

Add reference to mlock(2) for further info on /proc/PID/status VmLck

armscii-8.7

David Prevtot

Write the character set name as ArmSCII

cp1251.7

David Prevtot

Capitalize hexadecimal numbers

ip.7

David Prevtot

Fix name of socket option: s/IP_TTL/IP_TRANSPARENT/

David Prevtot

Place socket options in alphabetical order

koi8-r.7

David Prevtot

Fix special character names

Comparing to koi8-u.7, I noticed some inconsistencies in special character names. After checking with the following Unicode related pages, please find inline (and gzipped attached, hopefully not messing with encoding), a patch in order to make it right, on an Unicode point of view.

<http://www.unicode.org/charts/PDF/U2500.pdf>

<http://www.unicode.org/charts/PDF/U25A0.pdf>

<http://www.unicode.org/charts/PDF/U0080.pdf>

<http://www.unicode.org/charts/PDF/U1D400.pdf>

David Prevtot

Fix SEE ALSO reference and letter names

The koi8-r(7) (Russian Net Character Set) manual page refers to iso-8859-7(7) manual page, which is the Latin/Greek one.

I guess it should refer instead to the iso-8859-5(7)

(Latin/Cyrillic) one. This is addressed at the end of the patch.

It has also been spotted that letter names are different in this manual page and in the Unicode related page [0], the first part of the page address this.

0: <http://www.unicode.org/charts/PDF/U0400.pdf>

man-pages.7

Michael Kerrisk

Update example

The old example used the chmod(2) man page, but the feature test macro requirements on that page had changed.

Update to use an example from a different page (acct(2), whose feature test macro requirements are probably unlikely

to change in the future).

==== Changes in man-pages-3.31 =====

Released: 2010-11-12, Munich

Contributors

The following people contributed notes, ideas, or patches that have been incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>
David Prevot <davidp@altern.org>
Denis Barbier <bouzim@gmail.com>
Krzysztof elechowski <giecrlj@stegny.2a.pl>
Michael Kerrisk <mtk.manpages@gmail.com>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

Newly documented interfaces in existing pages

getrlimit.2

Michael Kerrisk
Added documentation of prlimit()
prlimit() is new in kernel 2.6.36.

inotify.7

Michael Kerrisk
Document IN_EXCL_UNLINK
This flag was added in Linux 2.6.36.
See kernel commit 8c1934c8d70b22ca8333b216aec6c7d09fdbd6a6.

New and changed links

prlimit.2

Michael Kerrisk
New link to getrlimit.2

Changes to individual pages

getrlimit.2

Michael Kerrisk

Remove unneeded text in DESCRIPTION

intro.2

Michael Kerrisk

Added various pages to SEE ALSO

kexec_load.2

Michael Kerrisk

Add kernel version where KEXEC_PRESERVE_CONTEXT first appeared

Added kernel version number where KEXEC_ON_CRASH first appeared

Fix copyright

Make copyright in the name of Intel corporation

VERSIONS: Fix version number

kexec_load() was first implemented in 2.6.13, though the entry
in the system call table was reserved starting in 2.6.7.

migrate_pages.2

Michael Kerrisk

SEE ALSO: Add reference to Documentation/vm/page_migration

sched_setaffinity.2

Michael Kerrisk

Add missing word "real" to "user ID"

syscalls.2

Michael Kerrisk

Fix kernel version number for kexec_load

kexec_load() was first implemented in 2.6.13, though the entry
in the system call table was reserved starting in 2.6.7.

Michael Kerrisk

Add prlimit() to list

intro.3

Michael Kerrisk

Added various pages to SEE ALSO

Apologies if I missed anyone!

New and rewritten pages

pthread_sigqueue.3

Michael Kerrisk

New page documenting pthread_sigqueue()

pthread_sigqueue() is new in glibc 2.11 (requires a kernel with
rt_tgsigqueinfo(), added in Linux 2.6.31).

Newly documented interfaces in existing pages

readv.2

Michael Kerrisk

Add documentation of preadv() and pwritev()

The preadv() and pwritev() system calls were added in

Linux 2.6.30.

New and changed links

preadv.2

Michael Kerrisk

New link to readv.2

pwritev.2

Michael Kerrisk

New link to readv.2

Changes to individual pages

chdir.2

Michael Kerrisk

Remove redundant and incorrect info on FTMs from NOTES

chown.2

Michael Kerrisk

Add NOTES explaining 32-bit system calls added in Linux 2.4

clock_nanosleep.2

Michael Kerrisk

Clarify that clock_nanosleep() suspends the calling *thread*

epoll_create.2

Michael Kerrisk

Note that 'size' argument must be greater than 0

See https://bugzilla.kernel.org/show_bug.cgi?id=23872

Michael Kerrisk

Added VERSIONS section

epoll_ctl.2

Michael Kerrisk

Added VERSIONS section

epoll_wait.2

Michael Kerrisk

Updated VERSIONS section

fcntl.2

Michael Kerrisk

Add notes on fcntl64()

fstatat.2

Michael Kerrisk

Add NOTES on fstatat64(), the name of the underlying system call

getdents.2

Michael Kerrisk

Added notes on getdents64()

getgid.2

Michael Kerrisk

Add NOTES explaining 32-bit system calls added in Linux 2.4

getgroups.2

Michael Kerrisk

Add NOTES explaining 32-bit system calls added in Linux 2.4

getpagesize.2

Michael Kerrisk

Improve description of getpagesize()

Improve description of getpagesize() and relocate discussion of sysconf(_SC_PAGESIZE).

In part inspired by

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=537272>

getresuid.2

Michael Kerrisk

Add NOTES explaining 32-bit system calls added in Linux 2.4

getrlimit.2

Michael Kerrisk

Add example program for prlimit()

getuid.2

Michael Kerrisk

Add NOTES explaining 32-bit system calls added in Linux 2.4

open.2

Ivana Hutarova Varekova

O_EXCL can be used without O_CREAT for block devices

Since Linux 2.6 there is a possibility to use O_EXCL without O_CREAT. See patch: <http://lkml.org/lkml/2003/8/10/221>.

pread.2

Michael Kerrisk

Add notes on pread64() and pwrite64()

See https://bugzilla.kernel.org/show_bug.cgi?id=23072

Michael Kerrisk

SEE ALSO: add readv(3)

readv.2

Michael Kerrisk

Wording fix: readv() and writev() are system calls, not functions

sendfile.2

Michael Kerrisk

Add notes on sendfile64()

setfsuid.2

Michael Kerrisk

Add NOTES explaining 32-bit system calls added in Linux 2.4

setfsuid.2

Michael Kerrisk

Add NOTES explaining 32-bit system calls added in Linux 2.4

setgid.2

Michael Kerrisk

Add NOTES explaining 32-bit system calls added in Linux 2.4

setresuid.2

Michael Kerrisk

Add NOTES explaining 32-bit system calls added in Linux 2.4

setreuid.2

Michael Kerrisk

Add NOTES explaining 32-bit system calls added in Linux 2.4

setuid.2

Michael Kerrisk

Add NOTES explaining 32-bit system calls added in Linux 2.4

sigqueue.2

pthread.7

signal.7

Michael Kerrisk

SEE ALSO: Add pthread_sigqueue(3)

stat.2

Michael Kerrisk

Fix EOVERFLOW error description

2<<31 should read 1<<31 (which equals 2^31).

statfs.2

Michael Kerrisk

Add notes on statfs64() and fstatfs64()

swapon.2

Hugh Dickins

Document SWAP_FLAG_DISCARD and discarding of swap pages

truncate.2

Michael Kerrisk

Add notes on truncate64() and ftruncate64()

memcpy.3

Michael Kerrisk

Change "should not overlap" to "must not overlap"

glibc 2.12 changed things so that applications that use memcpy() on overlapping regions will encounter problems. (The standards have long said that the behavior is undefined if the memory areas overlap.)

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=603144>

In reference of <http://lwn.net/Articles/414467/>

and <http://article.gmane.org/gmane.comp.lib.glibc.alpha/15278>

usleep.3

Petr Uzel

usleep() suspends calling thread, not process

core.5

Michael Kerrisk

Change single quote to double quote in shell session example

The example section has a sample shell session containing:

```
echo '$PWD/core_pattern_pipe_test %p UID=%u GID=%g sig=%s'
```

But \$PWD won't be expanded in single quotes. It should be double quotes around the entire argument or some other form.

pthread.7

Michael Kerrisk

Added description of async-cancel-safe functions

unix.7

Michael Kerrisk

Reworded the text of various errors

Michael Kerrisk

Added ENOENT error

Apologies if I missed anyone!

Newly documented interfaces in existing pages

sync.2

Michael Kerrisk

Added new syncfs() system call

syncfs() was added in Linux 2.6.39.

New and changed links

syncfs.2

Michael Kerrisk

New link for sync(2).

Global changes

Various pages

Simon Paillard

Global fix: properly escape minus sign

Changes to individual pages

clone.2

Michael Kerrisk

Note that CLONE_STOPPED was removed in 2.6.38

execve.2

Michael Kerrisk [Sebastian Geiger]

Note that the first argv[] value should contain name of executable

fcntl.2

Michael Kerrisk [Reuben Thomas]

Note that F_GETFL also retrieves file access mode

getrlimit.2

Michael Kerrisk [Ryan Mullen]

Remove mention of kernel versions in discussion of RLIMIT_CPU

Michael Kerrisk [Seonghun Lim]

Fix example program and add `_FILE_OFFSET_BITS` requirement

mlock.2

Michael Kerrisk [Brian M. Carlson]

Clarify `EINVAL` error

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?625747>

Michael Kerrisk [Seonghun Lim]

Simplify and correct text for `EPERM` error

mprotect.2

Seonghun Lim

Fix off-by-one error in a memory range

Seonghun Lim

Fix small bug in example program

The description of the example program says that it makes the third page "read-only". Thus use `PROT_READ` instead of `PROT_NONE`.

open.2

Folkert van Heusden

Remove text describing `O_CLOEXEC` as Linux-specific
`O_CLOEXEC` is specified in POSIX.1-2008, as noted elsewhere in the page.

readlink.2

Michael Kerrisk [Dan Jacobson]

SEE ALSO: Add `readlink(1)`

sendfile.2

Akira Fujita

Since 2.6.33, 'out_fd' can refer to any file type

Linux kernel commit [cc56f7de7f00d188c7c4da1e9861581853b9e92f](https://git.kernel.org/cgit/linux/kernel/git/torvalds/linux.git/commit/?id=cc56f7de7f00d188c7c4da1e9861581853b9e92f)
meant `sendfile(2)` can work with any output file.

Michael Kerrisk

Shift text on falling back to `read()/write()` to NOTES

Michael Kerrisk [Tolga Dalman]

Remove mention of kernel version for 'in_fd' argument

Tolga Dalman

Add an explicit reference to `splice(2)`

Unlike `sendfile()`, `splice()` can transfer data between a pair of sockets.

sigaction.2

Michael Kerrisk [Tolga Dalman]

Add a little info about `ucontext_t`

stat.2

Michael Kerrisk [Jon Grant]

Small rewording of ENAMETOOLONG error

sync.2

Michael Kerrisk

Some rewrites to description of sync()

syscalls.2

Michael Kerrisk

Added fanotify_init() and fanotify_mark() to syscall list

Michael Kerrisk

Added new 2.6.39 system calls

Michael Kerrisk

Updated for Linux 3.0 system calls

Michael Kerrisk

Update kernel version at head of syscall list

Michael Kerrisk

Update to mention 3.x kernel series

syslog.2

Michael Kerrisk [Serge E. Hallyn]

Update for kernel 2.6.37 changes

Document /proc/sys/kernel/dmesg_restrict.

Document CAP_SYSLOG.

time.2

Michael Kerrisk [Alexander Schuch]

NOTES: Fix description of "Seconds since the Epoch"

timerfd_create.2

Michael Kerrisk [Josh Triplett]

Note behavior when timerfd_settime() old_value is NULL

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?641513>

Tomislav Jonjic

Fix small error in description of timerfd_settime()

truncate.2

Seonghun Lim

Remove redundant EINTR description

unlink.2

Hendrik Jan Thomassen

Improve EBUSY description

cacos.3

cacosh.3

catan.3

catanh.3

Michael Kerrisk [Richard B. Kreckel, Andries Brouwer]

Fix formula describing function

The man pages for `cacos()`, `cacosh()`, `catan()`, `catanh()` contain incorrect formulae describing the functions.

`cacos.3`

Michael Kerrisk

Add example program

`cacosh.3`

Michael Kerrisk

Add example program

`cacosh.3`

`casinh.3`

`catan.3`

`catanh.3`

Michael Kerrisk

SEE ALSO: Add reference to inverse function

`catan.3`

Michael Kerrisk

Add example program

`catanh.3`

Michael Kerrisk

Add example program

`ccos.3`

`ccosh.3`

`csin.3`

`csinh.3`

`ctan.3`

`ctanh.3`

Michael Kerrisk

SEE ALSO Add reference to "arc" inverse function

`cexp.3`

Michael Kerrisk

SEE ALSO: add `cexp(3)`

`clog.3`

Michael Kerrisk

SEE ALSO: Add reference to `clog(2)`

`crypt.3`

Michael Kerrisk [Jan Engelhardt]

Fix header file and feature test macro requirements for `crypt_r()`

err.3

Seonghun Lim

Clean up description of error message source

In the second paragraph of DESCRIPTION section, one of the sources of error messages is incorrect: the four functions obtain error message only from errno, and "a code" is just relevant with errc() and warnc(), which are not present on Linux.
see <http://www.unix.com/man-page/freebsd/3/ERR/> .

Then, the third paragraph becomes a duplicate.

fflush.3

Regid Ichira

Fix wording error

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?614021>

hsearch.3

Seonghun Lim

Update ERRORS section

EINVAL can occur for hdestroy_r().

EINVAL can't occur for hcreate().

Other minor fixes.

lockf.3

Michael Kerrisk [Mikel Ward]

ERRORS: EBADF can also occur for nonwritable file descriptor

As noted in the DESCRIPTION, the file descriptor must be writable in order to place a lock.

malloc.3

Seonghun Lim

Reorder prototypes in SYNOPSIS

calloc() comes before realloc() in the other sections,
so should do in SYNOPSIS, too.

mbstowcs.3

Michael Kerrisk

SEE ALSO: add reference to wcstombs(3)

memcmp.3

Michael Kerrisk [Sebastian Unger]

Clarify that comparison interprets bytes as "unsigned char"

realpath.3

Michael Kerrisk [Seonghun Lim]

Fix EINVAL error

Since glibc 2.3, resolved_path can be non-NULL (with the semantics already documented in the page).

scandir(3)

Mike Frysinger

Add ENOENT/ENOTDIR errors

siginterrupt.3

Michael Kerrisk [Luis Javier Merino]

Remove misleading sentence about signal(2) and system call interruption

strlen.3

Michael Kerrisk [Jon Grant]

SEE ALSO: Add strnlen(3)

strnlen.3

Michael Kerrisk [Jon Grant]

CONFORMING TO: Note that strnlen() is in POSIX.1-2008

strtoul.3

Michael Kerrisk [Tolga Dalman]

Fix NOTES section constants

termios.3

Michael Kerrisk

Use "terminal special characters" consistently throughout page

Michael Kerrisk [Paul Evans]

Add documentation of _POSIX_VDISABLE

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=627841>

Michael Kerrisk

Add a description of STATUS character

Michael Kerrisk

Added description of SWTCH character

Michael Kerrisk

Add names of terminal special characters

Michael Kerrisk

List terminal special characters in alphabetical order

wcstombs.3

Michael Kerrisk

SEE ALSO: add mbstowcs(3)

console_codes.4

Petr Písar

Add ESC [3 J

Linux 3.0 (commit f8df13e0a901fe55631fed66562369b4dba40f8b)

implements \E[3J to allow scrambling content of console

including scroll-back buffer

(<http://thread.gmane.org/gmane.linux.kernel/1125792>).

proc.5

Michael Kerrisk [Stan Sieler]

Add description of 'PPid' field of /proc/PID/status

Michael Kerrisk [Stan Sieler]

Add description of 'SigQ' field of /proc/PID/status

capabilities.7

Michael Kerrisk [Serge E. Hallyn]

Document CAP_SYSLOG and related changes in Linux 2.6.37

Michael Kerrisk

File capabilities are no longer optional

Starting with Linux 2.6.33, the CONFIG_SECURITY_FILE_CAPABILITIES has been removed, and file capabilities are always part of the kernel.

complex.7

Michael Kerrisk

Updated SEE ALSO list to include all complex math functions

ipv6.7

Michael Kerrisk [Simon Cross]

Fix description of address notation: "8 4-digit hexadecimal numbers"

signal.7

Seonghun Lim

Remove crufty repeated info about LinuxThreads

unix.7

Michael Kerrisk

Add pointer to cmsmsg(3) for an example of the use of SCM_RIGHTS

==== Changes in man-pages-3.34 =====

Released: 2011-09-23, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes and ideas that have been incorporated in changes in this release:

Alan Curry <pacman@kosh.dhis.org>

Benjamin Poirier <benjamin.poirier@gmail.com>

Brian M. Carlson <sandals@crustytoothpaste.net>

David Howells <dhowells@redhat.com>

David Prévot <taffit@debian.org>
Denis Barbier <bouzim@gmail.com>
Doug Goldstein <cardoe@cardoe.com>
Eric Blake <eblake@redhat.com>
Guillem Jover <guillem@hadrons.org>
Jon Grant <jg@jguk.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Neil Horman <nhorman@tuxdriver.com>
Paul Pluzhnikov <ppluzhnikov@google.com>
Reuben Thomas <rt@sc3d.org>
Stefan Puiu <stefan.puiu@gmail.com>
Stephan Mueller <stephan.mueller@atsec.com>
Stephen Cameron <scameron@beardog.cce.hp.com>
Sunil Mushran <sunil.mushran@oracle.com>

Apologies if I missed anyone!

New and rewritten pages

rt_sigqueueinfo.2

Michael Kerrisk [Stephan Mueller]

New page for rt_sigqueueinfo(2) and rt_tgsigqueueinfo(2)

This replaces the previous '.so' man page link file for
rt_sigqueueinfo.2, which linked to this sigqueue() man page.

cciss.4

Stephen M. Cameron

New man page for cciss driver

I obtained the information in this man page as a consequence
of having worked on the cciss driver for the past several years,
and having written considerable portions of it.

Michael Kerrisk

Copyedit by mtk

hpsa.4

Stephen M. Cameron

New man page for the hpsa driver

I obtained the information in this man page as a consequence
of being the main author of the hpsa driver.

Michael Kerrisk

Copyedits my mtk

Newly documented interfaces in existing pages

fstatat.2

Michael Kerrisk [David Howells]

Document AT_NO_AUTOMOUNT

This flag was added in Linux 2.6.38.

lseek.2

Michael Kerrisk [Eric Blake, Sunil Mushran]

Document SEEK_HOLE and SEEK_DATA

These flags, designed for discovering holes in a file,
were added in Linux 3.1. Included comments from Eric
Blake and Sunil Mushran.

madvise.2

Doug Goldstein

Add MADV_HUGEPAGE and MADV_NOHUGEPAGE

Document the MADV_HUGEPAGE and MADV_NOHUGEPAGE flags added to
madvise() in Linux 2.6.38.

New and changed links

rt_tgsigqueueinfo.2

Michael Kerrisk

New link to new rt_sigqueueinfo.2 page

sigqueue.2

Michael Kerrisk

Create link to page that was relocated to section 3

Global changes

Various pages

Michael Kerrisk

Change reference to "sigqueue(2)" to "sigqueue(3)"

Changes to individual pages

fallocate.2

Michael Kerrisk

ERRORS: Add EPERM and ESPIPE errors

lseek.2

Michael Kerrisk [Alan Curry, Reuben Thomas]

Remove suspect note about 'whence' being incorrect English

prctl.2

Paul Pluzhnikov

PR_SET_DUMPABLE makes process non-pttrace-attachable

readlink.2

Guillem Jover

Document using st_size to allocate the buffer

Michael Kerrisk

Added copyright text + changelog note for Guillem Jover's patch

sched_setscheduler.2

Michael Kerrisk

Document 2.6.39 changes to rules governing changes from SCHED_IDLE policy

Since Linux 2.6.39, unprivileged processes under the SCHED_IDLE policy can switch to another nonrealtime policy if their nice value falls within the range permitted by their RLIMIT_NICE limit.

tkill.2

Michael Kerrisk

SEE ALSO: Add rt_sigqueueinfo (2)

btowc.3, wctob.3

Michael Kerrisk [Brian M. Carlson]

Add pointers to better, thread-safe alternative functions

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=606899>

fwide.3

Michael Kerrisk

Add _ISOC95_SOURCE to feature test macro requirements

Since glibc 2.12, _ISOC95_SOURCE can also be used to expose prototype of this function.

index.3

Michael Kerrisk [Jon Grant]

Fix text mentioning terminating null

pthread_sigqueue.3

Michael Kerrisk

Replace explicit mention of rt_tgsigqueueinfo() with SEE ALSO reference

sigqueue.3

Michael Kerrisk

Move this page to section 3

Now that the underlying system call rt_sigqueueinfo(2) is properly documented, move sigqueue() to Section 3, since

it is really a library function.

Michael Kerrisk

Update text in line with existence of new `rt_sigqueueinfo.2` page

`wcsnlen.3`

Jon Grant

Improve description of 'maxlen' argument

It's worth clarifying 'maxlen' is in wide-char units, not bytes.

`wprintf.3`

Michael Kerrisk

Add `_ISOC95_SOURCE` to feature test macro requirements

Since `glibc 2.12`, `_ISOC95_SOURCE` can also be used to expose prototype of these functions.

`feature_test_macros.7`

Michael Kerrisk

Document `_ISOC95_SOURCE`

`_ISOC95_SOURCE` was added in `glibc 2.12` as a means to expose C90 Amendment 1 definitions.

`ip.7`

Benjamin Poirier [Neil Horman]

Improve description of `IP_MTU_DISCOVER`

`signal.7`

Michael Kerrisk

SEE ALSO: Add `rt_sigqueueinfo(2)`

==== Changes in man-pages-3.35 =====

Released: 2011-10-04, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes and ideas that have been incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>

David Prévot <taffit@debian.org>

Denis Barbier <bouzim@gmail.com>

Eric W. Biederman <ebiederm@xmission.com>

Guillem Jover <guillem@hadrons.org>

Jon Grant <jg@jguk.org>

Kevin Lyda <kevin@ie.suberic.net>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Reuben Thomas <rrt@sc3d.org>

Apologies if I missed anyone!

New and rewritten pages

recvmmsg.2

Andi Kleen, Michael Kerrisk
New man page for recvmmsg(2)

setns.2

Eric W. Biederman
New manual page for setns(2)
Michael Kerrisk
Various improvements

Global changes

Various pages

Michael Kerrisk
Global fix: remove spaces around em-dash
Normal English typographical convention is not to have
spaces around em dashes.

Various pages

Michael Kerrisk
Global fix: s/null pointer/NULL pointer/

Various pages

Michael Kerrisk
Global fix: use ORing
Use "ORing", not "OR'ing", nor an italic ".IR OR ing".

Various pages

Michael Kerrisk
Global fix: consistent use of "null wide character"
Bring more consistency to the discussion of
"[terminating] null wide character"
by writing (at least in the initial use in a page)
"[terminating] null wide character (L\0)".

Various pages

Michael Kerrisk

Global fix: consistent use of "null byte"

Bring more consistency to the discussion of

"[terminating] null byte"

by writing (at least in the initial use in a page)

"[terminating] null byte ('\0')."

mount.2, prctl.2

Michael Kerrisk

s/task/thread/ for consistency with other pages

Changes to individual pages

lseek.2

Guillem Jover

CONFORMING TO: Note other systems that have SEEK_HOLE+SEEK_DATA

recv.2

Michael Kerrisk

Add mention of recvmsg(2)

recvmsg.2

Michael Kerrisk

SEE ALSO: add sendmsg(2)

send.2

Michael Kerrisk

CONFORMING TO: POSIX.1-2008 adds MSG_NOSIGNAL

sigwaitinfo.2

Michael Kerrisk

Note that attempts to wait for SIGKILL and SIGSTOP are silently ignored

stat.2

Michael Kerrisk

Note POSIX.1-2001 and POSIX.1-2008 requirements for lstat()

Michael Kerrisk

Regarding automounter action, add a reference to fstatat(2)

Michael Kerrisk

Clean up text describing which POSIX describes S_IF* constants

aio_cancel.3

Michael Kerrisk [Jon Grant]

Clarify meaning of "return status" and "error status"

gets.3

Michael Kerrisk

POSIX.1-2008 marks gets() obsolescent

The page formerly erroneously stated that POSIX.1-2008 removed the specification of this function.

mbsnrtowcs.3

Michael Kerrisk

CONFORMING TO: Add POSIX.1-2008

This function is specified in the POSIX.1-2008 revision.

regex.3

Michael Kerrisk [Reuben Thomas]

Change "terminating null" to "terminating null byte"

stpcpy.3

stpncpy.3

Mike Frysinger

Note that these functions are in POSIX.1-2008

Update the "CONFORMING TO" sections of these functions to note that they are now part of the POSIX.1-2008 standard.

stpncpy.3

Michael Kerrisk

Change "terminating null" to "terminating null byte"

strcpy.3

Mike Frysinger

SEE ALSO: Add stpncpy(3)

strdup.3

Michael Kerrisk

CONFORMING TO: strdup() is in POSIX.1-2008

wcpcpy.3

wcpncpy.3

wcsnlen.3

wcsnrtombs.3

Michael Kerrisk

CONFORMING TO: Add POSIX.1-2008

These functions are specified in the POSIX.1-2008 revision.

proc.5

Eric W. Biederman

Document /proc/[pid]/ns/

Michael Kerrisk

Some edit's to Eric Biederman's /proc/[pid]/ns/ additions

capabilities.7

Michael Kerrisk

List setns(2) as an operation allowed by CAP_SYS_ADMIN

==== Changes in man-pages-3.36 =====

Released: 2012-02-27, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes and ideas that have been incorporated in changes in this release:

Alain Benedetti <alainb06@free.fr>
carado <carado@savhon.org>
Christoph Hellwig <hch@lst.de>
Clemens Ladisch <clemens@ladisch.de>
David Prévot <taffit@debian.org>

Salvo Tomaselli <tiposchi@tiscali.it>
Simone Piccardi <piccardi@truelite.it>
Slaven Rezić <srezic@iconmobile.com>
starlight <starlight@binnacle.cx>
Stephan Mueller <stephan.mueller@atsec.com>
Vijay Rao <vijay@portuosus.com>
Walter Haidinger <walter.haidinger@gmx.at>
Walter Harms <wharms@bfs.de>
Yang Yang <wdscxsj@gmail.com>

Apologies if I missed anyone!

New and rewritten pages

sendmmsg.2

Michael Kerrisk [Stephan Mueller]

New page for sendmmsg(2)

Some pieces inspired by an initial attempt by Stephan Mueller.

Newly documented interfaces in existing pages

fallocate.2

Lucian Adrian Grijincu

Document FALLOC_FL_PUNCH_HOLE

FALLOC_FL_PUNCH_HOLE was added in Linux 2.6.38,
for punching holes in the allocated space in a file.

Changes to individual pages

dup.2

Michael Kerrisk

SYNOPSIS: Add "#include <fcntl.h>" for O_* constants

fallocate.2

Michael Kerrisk

Substantial restructuring of DESCRIPTION

The addition of a second class of operation ("hole punching")
to the man page made it clear that some significant restructuring
is required. So I substantially reworked the page, including the
preexisting material on the default "file allocation" operation.

Michael Kerrisk [Josef Bacik]

Add further details for FALLOC_FL_PUNCH_HOLE

Michael Kerrisk

ERRORS: Add EPERM error case for FALLOC_FL_PUNCH_HOLE

fork.2

Michael Kerrisk

NOTES: Describe clone() call equivalent to fork()

fsync.2

Christoph Hellwig

Various improvements

- explain the situation with disk caches better
- remove the duplicate fdatasync() explanation in the NOTES
section
- remove an incorrect note about fsync() generally requiring two
writes
- remove an obsolete ext2 example note
- fsync() works on any file descriptor (doesn't need to be

writable); correct the EBADF error code explanation

Michael Kerrisk [Guillem Jover]

Note that some systems require a writable file descriptor

An edited version of Guillem Jover's comments:

[While the file descriptor does not need to be writable on Linux] that's not a safe portable assumption to make on POSIX in general as that behavior is not specified and as such is implementation-specific. Some Unix systems do actually fail on read-only file descriptors, for example [HP-UX and AIX].

mount.2

Michael Kerrisk [Junjiro Okajima]

Removed erroneous statement about MS_RDONLY and bind mounts

open.2

Jessica McKellar

Fix grammar in O_DIRECT description

Some small grammar fixes to the O_DIRECT description.

pipe.2

Michael Kerrisk [Salvo Tomaselli]

SYNOPSIS: Add "#include <fcntl.h>" for O_* constants

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=659750>

sched_rr_get_interval.2

Clemens Ladisch

Update notes on modifying quantum

Since Linux 2.6.24, it is no longer possible to modify the SCHED_RR quantum using setpriority(2). (Slight edits to Clemens' patch by mtk.)

Michael Kerrisk

Reordered various pieces of text

Michael Kerrisk

Reworded text of ESRCH error

send.2

Michael Kerrisk

Add mention of sendmmsg(2)

sync.2

Michael Kerrisk [Simone Piccardi]

PROTOTYPE: Fix return type of syncfs()

vfork.2

Michael Kerrisk [starlight]

Clarify what is duplicated in the child

Add some words to make it clear to the reader that vfork(), like fork(), creates duplicates of process attributes

in the child.

Michael Kerrisk

Note clone() flags equivalent to vfork()

Michael Kerrisk [starlight, Mike Frysinger]

Add some notes on reasons why vfork() still exists

Michael Kerrisk [starlight]

Clarify that calling *thread* is suspended during vfork()

Michael Kerrisk

CONFORMING TO: Note that POSIX.1-2001 marked vfork() obsolete

gets.3

Michael Kerrisk

Document C11 and glibc 2.16 changes affecting gets()

pthread_sigmask.3

Michael Kerrisk [Pat Pannuto]

Fix comment that was inconsistent with code in example program

sem_wait.3

Walter Harms

EXAMPLE: Remove extraneous line of output from shell session

wcsnrtombs.3

wcsrtombs.3

wcstombs.3

Michael Kerrisk

Fix-ups for e9c23bc636426366d659809bc99cd84661e86464

core.5

Michael Kerrisk [Junjiro Okajima]

Document %E specifier for core_pattern

passwd.5

Michael Kerrisk [Walter Haidinger]

s/asterisk/asterisk (*)/ to improve clarity

Michael Kerrisk

Correct note on passwd field value when shadowing is enabled

When password shadowing is enabled, the password field contains an 'x' (not '*').

proc.5

Elie De Brauer

Fix description of fourth field of /proc/loadavg

Signed-off-by: Elie De Brauer <eliedebrauer@gmail.com>

resolv.conf.5

Michael Kerrisk [Slaven Rezic]

Describe syntax used for comments

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=656994>

feature_test_macros.7

Michael Kerrisk

Document _ISOC11_SOURCE

inotify.7

Michael Kerrisk [Yang Yang]

Note that 'cookie' field is set to zero when unused

man.7

Michael Kerrisk

Various fixes for description of NAME section

As noted by reporter:

- * The code sample given for the NAME section is incomplete because the actual content sample is not given.
- * Additionally, the description assumes that the item described is a command, which need not be the case.
- * The command makewhatis is not present on my system; the documented tool to create the whatis database is called mandb.
- * The description on .SH NAME in man(7) should either copy the relevant paragraph of lexgrog(1) or refer to it.

===== Changes in man-pages-3.37 =====

Released: 2012-03-06, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes and ideas that have been incorporated in changes in this release:

Denys Vlasenko <dvlasenk@redhat.com>

Mark R. Bannister <cambridge@users.sourceforge.net>

Michael Kerrisk <mtk.manpages@gmail.com>

Oleg Nesterov <oleg@redhat.com>

Tejun Heo <tj@kernel.org>

Apologies if I missed anyone!

New and rewritten pages

getent.1

Mark R. Bannister

New page to document 'getent' binary provided by glibc

Changes to individual pages

bdflush.2

Michael Kerrisk

Note that bdflush() is deprecated, and does nothing

nfsservctl.2

Michael Kerrisk

Note that this system call was removed in Linux 3.1

ptrace.2

Denys Vlasenko [Oleg Nesterov, Tejun Heo]

add extended description of various ptrace quirks

Changes include:

s/parent/tracer/g, s/child/tracee/g - ptrace interface now is sufficiently cleaned up to not treat tracing process as parent.

Deleted several outright false statements:

- pid 1 can be traced
- tracer is not shown as parent in ps output
- PTRACE_ATTACH is not "the same behavior as if tracee had done a PTRACE_TRACEME": PTRACE_ATTACH delivers a SIGSTOP.
- SIGSTOP _can_ be injected.
- Removed mentions of SunOS and Solaris as irrelevant.
- Added a few more known bugs.

Added a large block of text in DESCRIPTION which doesn't focus on mechanical description of each flag and operation, but rather tries to describe a bigger picture. The targeted audience is a person which is reasonably knowledgeable in Unix but did not spend years working with ptrace, and thus may be unaware of its quirks. This text went through several iterations of review by Oleg Nesterov and Tejun Heo.

This block of text intentionally uses as little markup as possible, otherwise future modifications to it will be very hard to make.

Michael Kerrisk

Global clean-up of page

- * Wording and formatting fixes to existing text and Denys Vlasenko's new text.
- * Various technical amendments and improvements to

Denys Vlasenko's new text.

* Added FIXME for various problems with the current text.

Michael Kerrisk

Integrated changes after further review from Denys Vlasenko

syscalls.2

Michael Kerrisk

Note that nfsservctl(2) was removed in Linux 3.1

Note that bdflush(2) is deprecated

capabilities.7

Michael Kerrisk

Add CAP_WAKE_ALARM

Michael Kerrisk

Add various operations under CAP_SYS_ADMIN

Add perf_event_open(2) to CAP_SYS_ADMIN

Add VM86_REQUEST_IRQ vm86(2) command to CAP_SYS_ADMIN

Update CAP_NET_ADMIN with notes from include/linux/capability.h

Add nfsservctl(2) to CAP_SYS_ADMIN

Michael Kerrisk

Add ioctl(FIBMAP) under CAP_SYS_RAWIO

Michael Kerrisk

Add virtual terminal ioctl(s) under CAP_SYS_TTY_CONFIG

Michael Kerrisk

Update CAP_NET_RAW with notes from include/linux/capability.h

Michael Kerrisk

Add F_SETPIPE_SZ case to CAP_SYS_RESOURCE

Add POSIX messages queues queues_max case to CAP_SYS_RESOURCE

Update CAP_SYS_RESOURCE with notes from include/linux/capability.h

Michael Kerrisk

SEE ALSO: Add libcap(3)

ld.so.8

Michael Kerrisk

Add --audit command-line option

Apologies if I missed anyone!

New and rewritten pages

get_nprocs_conf.3

Beas Petr

New page documenting get_nprocs_conf(3) and get_nprocs(3)

Michael Kerrisk

Some additions and improvements

malloc_get_state.3

Michael Kerrisk

New page documenting malloc_get_state(3) and malloc_set_state(3)

mallopt.3

Michael Kerrisk

New man page for mallopt(3)

mtrace.3

Michael Kerrisk

Complete rewrite of page, adding much more detail

scandirat.3

Mark R Bannister

New page for scandirat(3) (new in glibc 2.15)

Newly documented interfaces in existing pages

posix_memalign.3

Michael Kerrisk

Document aligned_alloc(3)

aligned_alloc() is new in C11.

Michael Kerrisk

Document pvalloc(3)

qsort.3

Mark R Bannister

Add documentation of qsort_r(3)

Ben Bacarisse

Improvements to Mark R Bannister's qsort_r() patch

Michael Kerrisk

Add VERSIONS section for qsort_r()

New and changed links

aligned_alloc.3

Michael Kerrisk

New link to posix_memalign.3

get_nprocs.3

Beas Petr

Link to new get_nprocs_conf.3 page

malloc_set_state.3

Michael Kerrisk

Link to new malloc_get_state.3 page

pvalloc.3

Michael Kerrisk

New link to posix_memalign.3

Global changes

Various pages

Michael Kerrisk

Global formatting fix: balance .nf/.fi pairs

Various pages

Michael Kerrisk

Global fix: place sections in correct order

Various pages

Michael Kerrisk [Justin T Pryzby]

Global fix: Remove duplicated words

Remove instances of duplicate words found using Justin's
grep-fu:

```
for f in man?/*.[1-9]; do
  grep -HE '([[alpha:]]{2,}+)\1 "$f" |
  grep -Evw '(proc|hugetlbfs|XXX*|root|long) *\1';
done | grep -E --colo '([[alpha:]]{2,}+)\1'
```

Various pages

Michael Kerrisk

Correct order of SEE ALSO entries

Changes to individual pages

futimesat.2

Michael Kerrisk

PROTOTYPE: Correct header file and feature test macro requirements

keyctl.2

Bjarni Ingi Gislason

Strip trailing tabs from source line

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=664688>

ptrace.2

Denys Vlasenko

Document PTRACE_GETEVENTMSG for PTRACE_EVENT_EXEC

Denys Vlasenko

Various fixes to recent updates of this page

symlinkat.2

Michael Kerrisk [Eric Blake]

PROTOTYPE: Correct header file

syscalls.2

Michael Kerrisk

Remove unimplemented system calls from main syscall list

The unimplemented system calls are in any case noted lower down
in the page. Also: rearrange the text describing the unimplemented
system calls.

Michael Kerrisk

Note a few system calls that were removed in Linux 2.6

Michael Kerrisk

Add `process_vm_readv(2)` and `process_vm_writev(2)`

`unlinkat.2`

Michael Kerrisk [Eric Blake]

PROTOTYPE: Correct header file

Michael Kerrisk

PROTOTYPE: Add `<fcntl.h>` for `AT_*` constants

`utimensat.2`

Michael Kerrisk

PROTOTYPE: Add `<fcntl.h>` for `AT_*` constants

`copysign.3`

Michael Kerrisk [Tolga Dalman]

DESCRIPTION: Add a couple of examples

`malloc.3`

Michael Kerrisk

NOTES: Add a short discussion of arenas

Michael Kerrisk

Replace discussion of `MALLOC_CHECK_*` with pointer to `mallopt(3)`

Michael Kerrisk

SEE ALSO: Add `mtrace(3)`

SEE ALSO: add `malloc_get_state(3)`

`posix_memalign.3`

Michael Kerrisk

Rename `memalign()` argument

Rename "boundary" to "alignment" for consistency
with `posix_memalign()`.

Michael Kerrisk

Improve discussion of feature test macros and header files for `valloc(3)`

`rtnetlink.3`

Kirill Brilliantov [Sergei Zhirikov]

Fix example code, `rta_len` assignment should use `RTA_LENGTH()`

See also <http://bugs.debian.org/655088>

`scandir.3`

Mark R Bannister

SEE ALSO: Add `scandirat(3)`

`sigqueue.3`

Nix

Remove `rt_sigqueueinfo` from TH line

`rt_sigqueueinfo()` now has its own manual page, so should not

be listed in the .TH line of this page.

tzset.3

Peter Schiffer

Correct description for Julian 'n' date format

The Julian 'n' date format counts starting from 0, not 1.

Michael Kerrisk

Add some clarifying remarks to discussion of Julian day formats

packet.7

Michael Kerrisk [Iain Fraser]

Fix comment on 'sll_hatype' field

tcp.7

Michael Kerrisk [Artyom Pervukhin]

Correct RFC for TIME_WAIT assassination hazards

===== Changes in man-pages-3.39 =====

Released: 2012-04-17, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Abhijith Das <adas@redhat.com>

Ricardo Catalinas Jiménez <jimenezrick@gmail.com>
Simone Piccardi <piccardi@truelite.it>
Tetsuo Handa <penguin-kernel@i-love.sakura.ne.jp>
<who@connect.carleton.ca>

Apologies if I missed anyone!

New and rewritten pages

malloc_trim.3

Michael Kerrisk

New man page for malloc_trim(3)

malloc_usable_size.3

Michael Kerrisk

New man page for malloc_usable_size(3)

Newly documented interfaces in existing pages

prctl.2

Cyrill Gorcunov

Document PR_SET_MM (new in Linux 3.3)

Michael Kerrisk

Various edits and improvements to Cyrill's patch

Changes to individual pages

epoll_create.2

Michael Kerrisk

Rework discussion of 'size' argument

Michael Kerrisk

Add .SS for description of epoll_create1()

epoll_wait.2

Michael Kerrisk [Armin Rigo]

Another thread can add to epoll instance while epoll_wait is blocked

See https://bugzilla.kernel.org/show_bug.cgi?id=43072

Michael Kerrisk

Clarify that epoll_pwait() blocks calling *thread*

A few wording improvements

fcntl.2

Michael Kerrisk [Mike Frylinger]

Note difference between glibc wrapper and underlying system call

The wrapper function has a 'flags' argument (which currently serves no purpose), while the underlying system call does not.

fcntl.2

Abhijith Das

Explain behaviour of F_GETLEASE during lease break

Michael Kerrisk [Eric Blake]

Change type of arg from "long" to "int"

Various fcntl(2) commands require an integral 'arg'.

The man page said it must be "long" in all such cases.

However, for the cases covered by POSIX, there is an explicit requirement that these arguments be "int".

Update the man page to reflect. Probably, all of the

other "long" cases (not specified in POSIX) should

be "int", and this patch makes them so. Based on a

note from Eric Blake, relating to F_DUPFD_CLOEXEC.

gettimeofday.2

Michael Kerrisk

Reorganize content

The main change is to move the historical information about the 'tz_dsttime' to NOTES.

Michael Kerrisk [Felix]

Note that compiler issues warnings if 'tv' is NULL

mmap.2

Michael Kerrisk [Kevin O'Gorman]

Clarify that this system call should not be invoked directly

See https://bugzilla.kernel.org/show_bug.cgi?id=42892

Michael Kerrisk

Clarify NOTES discussion of mmap() versus mmap2()

poll.2

Michael Kerrisk [Michael Welsh Duggan]

Document negative value in 'fd' field

Michael Kerrisk

Document semantics of passing zero in 'events' field

ptrace.2

Denys Vlasenko

Various fixes

For some reason, the PTRACE_TRACEME paragraph talks about some general aspects of ptraced process behavior. It repeats the

"tracee stops on every signal" information even though that was

already explained just a few paragraphs before. Then it describes legacy SIGTRAP on `execve()`.

This patch deletes the first part, and moves the second part up, into the general `ptrace` description. It also adds "If `PTRACE_O_TRACEEXEC` option is not in effect" to the description of the legacy SIGTRAP on `execve()`.

The patch also amends the part which says "For requests other than `PTRACE_KILL`, the tracee must be stopped." - `PTRACE_ATTACH` also doesn't require that.

sigaction.2

Michael Kerrisk [Andreas Jaeger,]

Clarify that the use of `SI_SIGIO` is for Linux 2.2 only

See also http://sourceware.org/bugzilla/show_bug.cgi?id=6745

sigprocmask.2

Mike Frysinger

ERRORS: add `EFAULT`

times.2

Michael Kerrisk [Simone Piccardi]

ERRORS: Add `EFAULT`

div.3

Michael Kerrisk [Reuben Thomas]

CONFORMING TO: Add `C99`

fread.3

Regid Ichira

Clarify further that return value is number of items, not bytes

See also <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=665780>

getaddrinfo.3

Michael Kerrisk [Jak]

Correct type of `ai_addrlen` field

malloc.3

Michael Kerrisk

SEE ALSO: add `malloc_usable_size(3)`

SEE ALSO: Add `malloc_trim(3)`

mallopt.3

Michael Kerrisk

Fix text describing `M_PERTURB` and `free()`

SEE ALSO: Add `malloc_trim(3)`

memchr.3

Michael Kerrisk [Reuben Thomas]

Remove mention of terminating null in description of rawmemchr()

perror.3

Michael Kerrisk [Jesus Otero]

Note that use of 'sys_errlist' is deprecated

rcmd.3

Michael Kerrisk

glibc eventually added a declaration of iruserok() in version 2.12

sysconf.3

Michael Kerrisk [Ricardo Catalinas Jiménez]

Add mention of _SC_SYMLOOP_MAX

nologin.5

Michael Kerrisk [Tetsuo Handa]

nologin must not only exist, but **be readable** to be effective

nsswitch.conf.5

Mark R Bannister

Significant rewrites and improvements

This patch applies to nsswitch.conf.5 in man-pages-3.36.

My changes almost completely rewrite large sections of the man page. They are needed to add clarity, correct grammar, reduce confusion, and bring up-to-date with the latest glibc. I have checked the man page against the nss source code in glibc 2.14.90.

Historical notes are demoted to the footer.

The rewrite makes the man page much clearer to understand, more authoritative, and easier to read.

Michael Kerrisk

Light edits to Mark Bannister's changes

capabilities.7

Michael Kerrisk

Add prctl(PR_SET_MM) to CAP_SYS_RESOURCE

epoll.7

Michael Kerrisk

Some minor clarifications at start of DESCRIPTION

netlink.7

Jeff Mahoney [Petr Gajdos]

Note cases where nonprivileged users can use netlink multicast groups

See also https://bugzilla.novell.com/show_bug.cgi?id=754611

unix.7

Michael Kerrisk [Tetsuo Handa]

Add a detail on autobind feature

ld.so.8

Jonathan Nieder [Reuben Thomas]

Document effect of hwcaps on search path

Wording by Aurelien Jarno from Debian glibc's r4701 (2011-06-04).

Addresses <http://bugs.debian.org/622385>

==== Changes in man-pages-3.40 =====

Released: 2012-04-27, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Alexey Toptygin <alexeyt@freeshell.org>

Bernhard Walle <bernhard@bwalle.de>

Brian F. G. Bidulock <bidulock@openss7.org>

John Sullivan <jsrhz@kanargh.force9.co.uk>

Jon Grant <jg@jguk.org>

lepton <ytht.net@gmail.com>

Marcel Holtmann <marcel@holtmann.org>

Michael Kerrisk <mtk.manpages@gmail.com>

Mike Frysinger <vapier@gentoo.org>

Petr Baudis <pasky@ucw.cz>

Simon Paillard <spillard@debian.org>

Stefan Puiu <stefan.puiu@gmail.com>

Ulrich Drepper <drepper@gmail.com>

Vadim Mikhailov <vadim.mikhailov@gmail.com>

Apologies if I missed anyone!

New and rewritten pages

process_vm_readv.2

Mike Frysinger, Christopher Yeoh, Michael Kerrisk

New page for process_vm_readv(2) and process_vm_writew(2)

mcheck.3

Michael Kerrisk

New man page for mcheck(3) and related functions

Also describes mcheck_check_all(3), mcheck_pedantic(3),
and mprobe(3)

Newly documented interfaces in existing pages

rcmd.3

Michael Kerrisk

Document "_af" variants of these functions

Document rcmd_af(), rresvport_af(), iruserok_af(), ruserok_af().

Also some restructuring and other clarifications.

rexec.3

Michael Kerrisk

Document rexec_af()

New and changed links

iruserok_af.3

rcmd_af.3

rresvport_af.3

ruserok_af.3

Michael Kerrisk

New links to rcmd.3

rexec_af.3

Michael Kerrisk

New link to rexec.3

Changes to individual pages

clock_getres.2

Michael Kerrisk

Clarify difference between CLOCK_MONOTONIC and CLOCK_MONOTONIC_RAW
Note interactions of these two clocks with discontinuous
adjustments to the system time and NTP/adjtime(2).

fallocate.2

Michael Kerrisk [John Sullivan]

Fix description of ENOSYS and EOPNOTSUP errors
As reported in https://bugzilla.redhat.com/show_bug.cgi?id=680214

fchmodat.2

Michael Kerrisk [Mike Frylinger]

Improve discussion of difference between wrapper and underlying syscall

gettimeofday.2

Michael Kerrisk

gettimeofday() is affected by discontinuous jumps in the system time
Advise reader to use clock_gettime(2), if they need a
monotonically increasing time source.

Michael Kerrisk

SEE ALSO: Add clock_gettime(2)

prctl.2

Michael Kerrisk

Add PR_TASK_PERF_EVENTS_DISABLE and PR_TASK_PERF_EVENTS_ENABLE
Add some basic documentation of these operations, with a pointer to
tools/perf/design.txt for more information.

Michael Kerrisk [Marcel Holtmann]

Amend details of PR_SET_PDEATHSIG

ptrace.2

Michael Kerrisk [Mike Frylinger]

Note SPARC deviation with respect to get/set regs
SPARC reverses the use of 'addr' and 'data' for
PTRACE_GETREGS, PTRACE_GETFPREGS, PTRACE_SETREGS,
and PTRACE_SETFPREGS.

send.2

Stefan Puiu

Document EACCES error case for UDP

sigaction.2

Michael Kerrisk

Remove mention of raise(3) for SI_USER
For a long time now, glibc's raise(3) didn't yield SI_USER
for the signal receiver, so remove mention of raise(3)

here. The user can deduce the details, if needed, by looking at the recently updated raise(3) page.

aio_cancel.3

Michael Kerrisk [Jon Grant]

Rewrite RETURN VALUE section to be clearer

aio_init.3

Michael Kerrisk [Jon Grant]

Remove extraneous "POSIX" from NAME section

btree.3

dbopen.3

hash.3

mpool.3

recno.3

Michael Kerrisk [Brian M. Carlson]

Note that glibc no longer provides these interfaces

glibc stopped providing these interfaces with v2.2.

Nowadays, the user that finds these pages probably wants the libdb API, so note this in the page.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=337581>

fopen.3

Michael Kerrisk

BUGS: Note limitation on number of flag characters parsed in 'mode'

Michael Kerrisk

Note that 'c' and 'e' flags are ignored for fdopen()

Determined from reading libio/iofdopen.c.

Michael Kerrisk

Document ",ccs=string" feature of 'mode' for fopen()/freopen()

getgrnam.3

Michael Kerrisk [Ulrich Drepper]

Fix discussion of _SC_GETGR_R_SIZE_MAX

The value is not meant to be a maximum (as was specified in SUSv3) but an initial guess at the required size (as specified in SUSv4).

getpwnam.3

Michael Kerrisk [Ulrich Drepper]

Fix discussion of _SC_GETPW_R_SIZE_MAX

The value is not meant to be a maximum (as was specified in SUSv3) but an initial guess at the required size (as specified in SUSv4).

malloc.3

mallopt.3

mtrace.3

Michael Kerrisk

SEE ALSO: add mcheck(3)

memchr.3

Michael Kerrisk

Clarify description, omitting mention of "strings" and "characters"

The existing text slipped into talking about characters and strings, which could mislead readers into thing that, for example, searches for the byte '\0' are treated specially.

Therefore, rewrite in terms of "bytes" and "memory areas".

At the same time, make a few source file clean-ups.

mkstemp.3

Michael Kerrisk

Add "mkstemp" and "mkostemp" to NAME line

posix_openpt.3

Michael Kerrisk [Vadim Mikhailov]

Add some details on use of the slave pathname

An explicit pointer to ptsname(3) is useful, as is a note of the fact that the slave device pathname exists only as long as the master device is held open.

raise.3

Michael Kerrisk

Add some notes on underlying system call that is used

rcmd.3

Michael Kerrisk

Add some details of the rresvport() 'port' argument

resolver.3

Petr Baudis

Note that many options are documented in resolv.conf(5)

scandir.3

Michael Kerrisk [Daniel J Blueman]

Improve EXAMPLE source code: s/0/NULL/ in scandir() call

strchr.3

James Hunt

Explain behavior when searching for '\0'

strerror.3

Eric Blake [Stefan Puiu]

Improve strerror_r() description

POSIX requires that perror() not modify the static storage returned by strerror(). POSIX 2008 and C99 both require that strerror() never return NULL (a strerror() that always returns "" for all inputs is valid for C99, but not for POSIX).

http://sourceware.org/bugzilla/show_bug.cgi?id=12204 documents glibc's change to come into compliance with POSIX regarding strerror_r() return value. The GNU strerror_r() use of 'buf' was confusing - I ended up writing a test program that proves that 'buf' is unused for valid 'errno', but contains truncated "unknown message" for out-of-range 'errno'.

See also <http://austingroupbugs.net/view.php?id=382>

Bernhard Walle

Correct description of error return for XSI strerror_r()

Michael Kerrisk [Eric Blake]

Note how to use 'errno' to detect errors when calling strerror()

Michael Kerrisk [Jon Grant]

Add an example of the kind of string returned by strerror()

resolv.conf.5

Petr Baudis

Document "single-request" option

inotify.7

Michael Kerrisk

Note buffer size that guarantees being able to read at least one event

James Hunt

Correct description of size of inotify_event structure

iso_8859-1.7

Eugen Dedu

Add "-" for SOFT HYPHEN

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=156154>

netdevice.7

Brian F. G. Bidulock

Document some SIOC configuration ioctls

This patch adds common but missing SIOC configuration ioctls to the netdevice.7 manual pages that are not documented anywhere else. SIOCSIFPFLAGS and SIOCGIFPFLAGS are linux-specific. Flag values come from Linux 2.6.25 kernel headers for sockios. The others are standard BSD ioctls that have always been implemented by Linux and were verified from inspecting netdevice.c kernel code.

socket.7

Michael Kerrisk [Alexey Toptygin]
Correct description of SO_BROADCAST

tcp.7
lepton
Correct description for TCP_MAXSEG on modern kernel

strcpy.3
strdup.3
strftime.3
strlen.3
strnlen.3
strpbrk.3
strspn.3
strtok.3
strxfrm.3

Michael Kerrisk [Andries E. Brouwer]

Clarify that these functions operate on bytes, not (wide) characters

Change 'character(s)' to 'byte(s)' to make clear that these functions operate on bytes, not wide / UTF8 characters.

(POSIX uses 'byte(s)' similarly, to make this point.)

icmp.7
ipv6.7
packet.7
raw.7
rtnetlink.7
unix.7
x25.7

Michael Kerrisk

Remove names of constants from NAME line

Some of the sockets/network protocol pages included names of the corresponding address family constants in the NAME line, but this wasn't done consistently across all pages, and probably it adds little value in those pages that did do this. So, remove these constants from those pages that have them in the NAME section.

Changes to individual pages

clock_getres.2

Michael Kerrisk [Josh Triplett]

Expand description of CLOCK_REALTIME

Make it clear that this clock may be discontinuous, and is affected by incremental NTP and clock_adjtime(2) adjustments.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=540872>

epoll_wait.2

Michael Kerrisk

Clarify that 'timeout' is a *minimum* interval

Make it clear that 'timeout' is a minimum interval; the actual interval will be rounded up to the system clock granularity, and may overrun because of kernel scheduling delays.

execve.2

Michael Kerrisk

Rewording to deemphasize libc5 details

fork.2

Mike Frysinger

ERRORS: add ENOSYS

Can occur on, for example, non-MMU hardware.

getcpu.2

Mike Frysinger

Add RETURN VALUE and ERRORS sections

Michael Kerrisk

Refer reader to NOTES for more info about 'tcache'

Michael Kerrisk

DESCRIPTION: reword a sentence to be clearer

io_cancel.2

io_destroy.2

io_getevents.2

io_setup.2

io_submit.2

Michael Kerrisk

Rewrite to focus on system call API

Rewrite to focus on the system call interface, adding some notes on the libaio wrapper differences.

See the following mail:

2012-05-07 "aio manuals", linux-man@vger

<http://thread.gmane.org/gmane.linux.man/1935/focus=2910>

Other minor rewrites.

mount.2

Michael Kerrisk

Comment out an old Linux libc detail

open.2

Nick Piggin [KOSAKI Motohiro, Jan Kara, Hugh Dickins]

Describe race of direct I/O and fork()

Rework 04cd7f64, which didn't capture the details correctly.

See the April/May 2012 linux-man@ mail thread "[PATCH]

Describe race of direct read and fork for unaligned buffers"

<http://thread.gmane.org/gmane.linux.kernel.mm/77571>

poll.2

Michael Kerrisk

Clarify that 'timeout' is a **minimum** interval

Make it clear that 'timeout' is a minimum interval; the actual interval will be rounded up to the system clock granularity, and may overrun because of kernel scheduling delays.

Michael Kerrisk

Clarify discussion of wrapper function emulation

Clarify that glibc (as well as old libc) provides emulation using select(2) on older kernels that don't have a poll() system call.

Michael Kerrisk

Make the meaning of a zero timeout explicit

Clarify that timeout==0 causes an immediate return, even if no file descriptors are ready.

pread.2

Michael Kerrisk [Kasper Dupont]

BUGS: Note O_APPEND + pwrite() does the wrong thing

See https://bugzilla.kernel.org/show_bug.cgi?id=43178

recvmsg.2

Michael Kerrisk

Clarify that 'timeout' is a **minimum** interval

Make it clear that 'timeout' interval will be rounded up to the system clock granularity, and may overrun because of kernel scheduling delays.

select.2

Michael Kerrisk

Clarify that 'timeout' is a **minimum** interval

Make it clear that 'timeout' is a minimum interval; the actual interval will be rounded up to the system clock granularity,

and may overrun because of kernel scheduling delays.

Michael Kerrisk

Expand description of the self-pipe trick

Michael Kerrisk

Add further details on pselect6() system call that underlies pselect()

semop.2

Michael Kerrisk

Clarify that 'timeout' of semtimedop() is a **minimum** interval

Make it clear that 'timeout' interval will be rounded up to the system clock granularity, and may overrun because of kernel scheduling delays.

signal.2

Michael Kerrisk

Note that 'sig_t' requires _BSD_SOURCE

Also remove some old Linux libc details

sigwaitinfo.2

Michael Kerrisk

Clarify that 'timeout' of sigtimedwait() is a **minimum** interval

Make it clear that 'timeout' is a minimum interval; the actual interval will be rounded up to the system clock granularity, and may overrun because of kernel scheduling delays.

stat.2

Bjarni Ingi Gislason

Formatting fixes

From "groff -ww" (or "man --warnings=w ..."):

warning: around line 442: table wider than line width

GNU man uses line length of 78.

Use text blocks. Two spaces between sentences or better: start each sentence in a new line.

syscalls.2

Bjarni Ingi Gislason

Formatting fixes

From "groff -ww ..." (or "man --warnings=w ..."):

warning: around line 157: table wider than line width

Have to use text blocks. Move some text to its correct column. Split text to two columns to avoid hyphenation.

sysinfo.2

Michael Kerrisk

Remove reference to obsolete libc5

syslog.2

Michael Kerrisk

Remove some details about obsolete Linux libc

aio_cancel.3

aio_error.3

aio_fsync.3

aio_read.3

aio_return.3

aio_suspend.3

aio_write.3

Michael Kerrisk

ERRORS: Add/update ENOSYS error

aio_cancel.3

Michael Kerrisk

Clarify what happens when a request isn't successfully canceled

Michael Kerrisk

Add pointers to aio(7) and sigevent(7)

dbopen.3

Michael Kerrisk

SYNOPSIS: Add header file <fcntl.h>

Upstreamed from Debian, and consistent with FreeBSD

dbopen(3) man page.

fmemopen.3

Michael Kerrisk

Note details of POSIX.1-2008 specification of 'b' in 'mode'

Michael Kerrisk [Rich Felker]

BUGS: fmemopen() doesn't correctly set file position in some cases

If 'mode' is append, but 'size' does not cover a null byte in 'buf', then fmemopen() incorrectly sets the initial file position to -1, rather than the next byte after the end of the buffer.

See http://sourceware.org/bugzilla/show_bug.cgi?id=13151

Michael Kerrisk

BUGS: fmemopen() incorrectly handles size==0 case

If size is zero, fmemopen() fails, This is surprising behavior, and not specified in POSIX.1-2008.

See http://sourceware.org/bugzilla/show_bug.cgi?id=11216

Reported-by; Alex Shinn <alexshinn@gmail.com>

Michael Kerrisk

BUGS: Note silent ABI change for fmemopen() in glibc 2.9

Michael Kerrisk [Rich Felker]

BUGS: Append mode does not force writes to append

Append mode correctly sets the initial offset but does not force subsequent writes to append at end of stream.

See http://sourceware.org/bugzilla/show_bug.cgi?id=13152

Michael Kerrisk [Eric Blake]

BUGS: Note inconsistent treatment of 'b' in 'mode'

fopen() permits, for example, both "w+b" and "wb+", but only the latter is meaningful to fmemopen().

See http://sourceware.org/bugzilla/show_bug.cgi?id=12836

fopencookie.3

Michael Kerrisk [Petr Baudis]

Correct description of return for user-supplied 'write' function

See http://sourceware.org/bugzilla/show_bug.cgi?id=2074

getaddrinfo.3

Jean-Michel Vougrère

Note that AI_ADDRCONFIG is not affected by loopback addresses

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=660479>

iconv.3

Michael Kerrisk

Upstream useful NOTE from Debian

Warn the reader that the pointer arguments can't be interpreted as C style strings. Also, note possible alignment requirements for the referenced bytes sequences,

Michael Kerrisk

Write a better paragraph introducing iconv() and its arguments

isgreater.3

Michael Kerrisk [Vincent Lefevre]

Clarify that the arguments to these macros must be real-floating

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=609033>

lio_listio.3

Michael Kerrisk

Clarify that async notification occurs when *all* I/Os complete

makedev.3

Michael Kerrisk

SYNOPSIS: Correct return types of major() and minor()

See https://bugzilla.redhat.com/show_bug.cgi?id=754188

Reported-by; Zdenek Kabelac <zkabelac@redhat.com>

malloc.3

Michael Kerrisk

SEE ALSO: Add malloc_info(3)

malloc_get_state.3

Michael Kerrisk

Fix wordos in function names in NAME line

mallopt.3

Michael Kerrisk

Fix example program

The example code was a version that was not consistent with the shell output shown on the page.

Reported-by: Simon Paillard <spillard@debian.org>

Michael Kerrisk

Restore accidentally omitted line in shell session

Michael Kerrisk

SEE ALSO: Add malloc_stats(3)

mmap64.3

Michael Kerrisk

Change target of link to mmap.2 (was mmap2.2)

Upstreamed from Red Hat / Fedora

realpath.3

Michael Kerrisk [Casper Dik]

Remove note about Solaris possibly returning a relative path

syslog.3

Michael Kerrisk [Ralph Corderoy]

Document behavior when 'ident' argument to openlog() is NULL

See <https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/382096>

Michael Kerrisk

Update CONFORMING TO for POSIX.1-2008

POSIX.1-2008 doesn't change any details, but make that more explicit.

undocumented.3

Michael Kerrisk

Remove some functions that have been documented

sd.4

Michael Kerrisk

Remove reference to nonexistent scsi(4) page

Upstreamed from RedHat / Fedora

sk98lin.4

Michael Kerrisk [Stephen Hemminger]

Note that this driver was removed in 2.6.28

See <https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/528020>

passwd.5

Michael Kerrisk

Upstream pieces from Red Hat/Fedora

Note mention of empty password field.

Add description of "*NP*" in password field.

Michael Kerrisk

Various minor fixes and improvements

proc.5

Michael Kerrisk

Note that CAP_SYS_ADMIN processes can override file-max

Upstreamed from red Hat / Fedora

Michael Kerrisk

Document /proc/[pid]/cgroup

Upstreamed from Red Hat / Fedora

resolv.conf.5

Michael Kerrisk

Take a Debian improvement into upstream

tzfile.5

Michael Kerrisk

Mention timezone directories in DESCRIPTION

Note that timezone files are usually in /usr/lib/zoneinfo
or /usr/share/zoneinfo.

Michael Kerrisk

Drop SYNOPSIS

The SYNOPSIS doesn't correspond to a user-visible file.

Michael Kerrisk

SEE ALSO: Add pointer to glibc source file timezone/tzfile.h

Michael Kerrisk

SEE ALSO: add tzset(3) and tzselect(8)

ascii.7

Bjarni Ingi Gislason

Indent for "troff" makes table too wide

Fix following from "groff -t -ww ...":

warning: around line 53: table wider than line width

Extra indent for "troff" makes the table look misplaced
(default "ps" output).

cp1251.7

Bjarni Ingi Gislason

table too wide

From "nroff -ww -t ...":

warning: around line 44: table wider than line width

Columns are made narrower (column gutter decreased).

ipv6.7

Stefan Puiu

Add ENODEV error for bind() to link-local IPv6 address

signal.7

Michael Kerrisk [Simone Piccardi]

Clarify that SIGLOST is unused

Michael Kerrisk

Comment out crufty BUGS text on SIGLOST

It must be a very long time since the statement there about SIGLOST was true. (The text seems to date back to 1996.)

Michael Kerrisk

Update architectures for tables of signal numbers

utf-8.7

Brian M. Carlson

Two clarifications

This patch clarifies that 0xc0 and 0xc1 are not valid in any UTF-8 encoding[0], and it also references RFC 3629 instead of RFC 2279.

[0] In order to have 0xc0, you'd have to have a two-byte encoding with all the data bits zero in the first byte (and thus only six bits of data), which would be an ASCII character encoded in the non-shortest form. Similarly with 0xc1.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=538641>

ldconfig.8

nscd.8

Michael Kerrisk

Remove path prefix from NAME line

Command names shown in NAME are normally just the basename, not the full pathname of the command.

==== Changes in man-pages-3.42 =====

Released: 2012-08-14, Konolfingen

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

<socketpair@gmail.com>

Apologies if I missed anyone!

Global changes

Various pages

Sami Kerola

Global fix: use UR macro where applicable

The syntax .UR http://example.com paired with .UE will create

links which one can interact, if the pager allows that. One way to see the effect is ask the man(1) command to use browser display, e.g.:

```
man -H man7/uri.7
```

("\" is optional groff syntax to permit hyphenless line breaks.)

Changes to individual pages

ldd.1

Michael Kerrisk

Add security note on untrusted executables

See also <http://www.catonmat.net/blog/ldd-arbitrary-code-execution/>
and

<http://tldp.org/HOWTO/Program-Library-HOWTO/shared-libraries.html>

clone.2

Michael Kerrisk

Rewrite discussion of sys_clone

futex.2

Consolidate error descriptions to ERRORS

Michael Kerrisk

Various wording fix-ups

Michael Kerrisk

Fix description of EINVAL error

The current text seems incorrect. Replace with a more general description.

sgetmask.2
spu_create.2
spu_run.2
subpage_prot.2
sysctl.2
tkill.2

Michael Kerrisk

Add note to SYNOPSIS that there is no glibc wrapper for system call

Reduce the chance that the reader may be misled into thinking that there is a wrapper function for this system call by noting explicitly in the SYNOPSIS that there is no glibc wrapper and pointing the reader to NOTES for further details.

ioprio_set.2

Colin McCabe

Clarify the multithreaded behavior of ioprio_set(2)

Michael Kerrisk [, Kalle Olavi Niemitalo]

Document who==0 for IOPRIO_WHO_PROCESS and IOPRIO_WHO_PGRP

For IOPRIO_WHO_PROCESS, who==0 means operate on the caller.

For IOPRIO_WHO_PGRP, who==0 means operate on the caller's process group.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=652443>

migrate_pages.2

Michael Kerrisk [Christoph Lameter, JoonSoo Kim]

Fix description of return value

mount.2

Michael Kerrisk

For MS_REMOUNT, source is ignored

mprotect.2

Michael Kerrisk [Rasmus Villemoes]

'addr' argument is not const

As reported by Rasmus:

Both my system's man-pages (3.22) and the latest online (3.41) show:

```
int mprotect(const void *addr, size_t len, int prot);
```

as the prototype for mprotect(2). However, POSIX [1] and the actual sys/mman.h (on all the systems I checked) do not have the const qualifier on the first argument.

msgctl.2

semctl.2

shmctl.2

svipc.7

Michael Kerrisk

Don't mention that ipc_perm is defined in <sys/ipc.h>

There's no need to mention that the 'ipc_perm' structure is defined in <sys/ipc.h>. That's an implementation detail, and furthermore <sys/ipc.h> is itself included by the other System V IPC header files. The current text might lead the reader to conclude that they must include <sys/ipc.h>, which is not the case (it is required neither on Linux, nor by the standards).

msgctl.2

msgget.2

msgop.2

semctl.2

semget.2

semop.2

shmctl.2

shmget.2

Michael Kerrisk

NOTES: <sys/types.h> and <sys/ipc.h> aren't strictly needed

Add text to NOTES to say that the <sys/types.h> and <sys/ipc.h> header files aren't required by Linux or the standards, but may be needed for portability to old systems.

ptrace.2

Denys Vlasenko

Explain WNOHANG behavior and EINTR bug

I didn't like the "SIGKILL operates similarly, with exceptions" phrase (if it's different, then it's not "similar", right?),

and now I got around to changing it. Now it says simply:
"SIGKILL does not generate signal-delivery-stop and therefore
the tracer can't suppress it."

Replaced "why WNOHANG is not reliable" example with a more
realistic one (the one which actually inspired to add this
information to man page in the first place): we got
ESRCH - process is gone! - but waitpid(WNOHANG) can still
confusingly return 0 "no processes to wait for".

Replaced "This means that unneeded trailing arguments may
be omitted" part with a much better recommendation
to never do that and to supply zero arguments instead.
(The part about "undocumentedness" of gcc behavior was bogus,
btw - deleted).

Expanded BUGS section with the explanation and an example
of visible strace behavior on the buggy syscalls which
exit with EINTR on ptrace attach. I hope this will lead
to people submitting better bug reports to lkml about
such syscalls.

seteuid.2

Michael Kerrisk

Note glibc version where seteuid() implementation changed

In glibc 2.2/2.3, seteuid() switched from setregid() to setresgid().

set_tid_address.2

Michael Kerrisk

Rename 'ctid' argument for consistency with clone(2) page

Michael Kerrisk

Some rewordings and minor clarifications

sigwaitinfo.2

Michael Kerrisk [Daniel Zingaro]

Some wording clarifications

Mainly rewording things like "is delivered" to "becomes pending",
which is more accurate terminology.

syscall.2

Michael Kerrisk

Add some more details to the description of syscall(2)

And add another example of using syscall() to the program example.

syscalls.2

Michael Kerrisk

Add kcmp(2)

Michael Kerrisk

Move discussion of `set_zone_reclaim(2)` out of main table
This system call was never visible to user space, so it makes sense to move it out of the main table of system calls into the notes below the table.

getifaddrs.3

Michael Kerrisk [Adrian Dabrowski]

Note that `ifa_addr` and `ifa_netmask` can be NULL

readdir.3

Michael Kerrisk [Jan Engelhardt]

Handle -1 error from `pathconf()` in example code snippet

Improve the example demonstrating allocation of a buffer for `readdir_r()` to handle -1 error return from `pathconf()`.

Otherwise, naive readers may think that `pathconf()` return value can be used without checking.

realpath.3

Shawn Landden

Use past tense with ancient history (`libc4`, `libc5`)

regex.3

Michael Kerrisk

Correct SEE ALSO reference to glibc manual "regex" section

rtime.3

Michael Kerrisk [Jan Engelhardt]

Fix broken pointer cast in example code

sem_close.3

sem_destroy.3

sem_getvalue.3

sem_init.3

sem_open.3

sem_post.3

sem_unlink.3

sem_wait.3

sem_overview.7

Michael Kerrisk

Note that "cc -pthread" is required; "-lrt" no longer works

See <https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/874418>

sigwait.3

Michael Kerrisk

Reword "is delivered" to "becomes pending"

strcat.3

Michael Kerrisk

Add some text to emphasize the dangers of buffer overruns

Michael Kerrisk

NOTES: Add discussion of `strlcat()`

`strcpy.3`

Michael Kerrisk

Note that info is lost when `strncpy()` doesn't null terminate

Michael Kerrisk

Add some text to emphasize possibility of buffer runs with `strcpy()`

Michael Kerrisk

NOTES: Add a discussion of `strncpy()`

Inspired by <https://lwn.net/Articles/506530/>

Michael Kerrisk

Fix description of the null-byte padding performed by `strncpy()`

`tsearch.3`

Michael Kerrisk

NOTES: remove redundant discussion of unorthodox use of term "postorder"

This point is already covered at greater length in the main text of the page (See the piece "More commonly, ...").

Michael Kerrisk

Clarify use for first argument to the `twalk()` 'action' function

There's a number of details in POSIX that are omitted in the current version of this page.

Michael Kerrisk

Some wording fixes

`core.5`

Michael Kerrisk

Note effect of `madvise(2)` `MADV_DONTDUMP` flag

`capabilities.7`

Michael Kerrisk

Document `CAP_BLOCK_SUSPEND`

`glob.7`

Bjarni Ingi Gislason

Change 8 bit characters to 7 bit representation

Fixes rendering errors for accented 'a' characters.

Michael Kerrisk [Aaron Peschel]

Update `bash(1)` command used to obtain classical globbing behavior

The man page formerly noted the `bash(1)` v1 command to do this.

`iso_8859-1.7`

Bjarni Ingi Gislason

Explanation of `SOFT HYPHEN` and the code for it

<groff: iso_8859-2.7>:89: warning: can't find special character `shc'

This is the only "iso_8859-*.7" file that has this (now) undefined character. The code in column four in "iso_8859-1.7" is "0x2D" ("HYPHEN, MINUS SIGN" or "HYPHEN-MINUS") instead of "0xAD". See Debian bug 156154 (or package "manpages").

There should be an explanation for this graphic character and the code should be 0xAD in iso_8859-1.7 (as in all others), even though "[gn]roff" does not display a "HYPHEN" in that position of the table.

The line with "SOFT HYPHEN" gets a footnote and a short explanation.

mdoc.7

Bjarni Ingi Gislason

Fixing a warning and a table

Fis warning from "groff -ww ..." (or "man --warnings=w ..."):

```
<groff: mdoc.7>:294: warning:
tab character in unquoted macro argument
```

In one table the distance between columns is too small in the "ps" output. (Bug in the groff "doc.tmac" macro?)

mdoc.samples.7

Bjarni Ingi Gislason

Fix warnings from [ng]roff, corrections

From "man -ww ..." (groff -ww ...):

```
<standard input>:541: warning:
tab character in unquoted macro argument
[+3 similar warnings]
<standard input>:813: warning: macro `Pu' not defined
Usage: .Rv -std in sections 2 and 3 only (#1669)
mdoc warning: A .Bl directive has no matching .El (#1821)
```

String "Pu" defined as a row of punctuation characters.

".Bl" and ".El" fixed.

Some arguments, that start with a period or are the name of a macro, protected with "&".

Variable name for macro ".Rv" corrected.

netdevice.7

Bjarni Ingi Gislason

Line in table too long

Fix warning from "man ..." ("nroff -ww ..."):

```
nroff: netdevice.7: warning: around line 98:
```

table wider than line width

Fix: No right adjustment in text blocks in tables.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=673873>

netlink.7

Bjarni Ingi Gislason

Line in table is too long

Fix warning from "man ..." ("nroff -ww ..."):

```
nroff: netlink.7: warning: around line 195:
table wider than line width
```

Horizontal line incorporated into table.

No right adjustment of text blocks in tables.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=673875>

Simon Paillard [Herbert Xu]

Change description of "*_pid" fields to "Port ID"

As reported by Herbert Xu, these should not be considered as PIDs.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=383296>

rtnetlink.7

Bjarni Ingi Gislason

Line in table too long

Fix warning from "man ..." ("nroff -ww ..."):

```
nroff: rtnetlink.7: warning: around line 415:
table wider than line width
```

Column gutter reduced to fit line length.

Right adjustment in text blocks removed in tables.

Some header made centered in tables.

One table put on same page.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=674051>

socket.7

Martin H

Document SO_MARK socket option

Commit 4a19ec5800fc3bb64e2d87c4d9fdd9e636086fe0 in Jan 2008 added the new SO_MARK socket option.

This patch is based on text from the commit message.

See https://bugzilla.kernel.org/show_bug.cgi?id=16461.

svipc.7

Michael Kerrisk

SYNOPSIS: Remove include of <sys/types.h> and <sys/ipc.h>
Including <sys/types.h> and <sys/ipc.h> isn't needed on Linux
and isn't really relevant for the explanation on this page.

===== Changes in man-pages-3.43 =====

Released: 2012-10-05, Munich

Various pages

David Prévot [Michael Kerrisk]

Global fix: Various consistency fixes for SEE ALSO

Various pages

Michael Kerrisk

Global fix: use "Linux kernel source" consistently

Rather than "kernel source".

Various pages

Michael Kerrisk

Global fix: disable justification and hyphenation in SEE ALSO

For a better visual result, disable justification and hyphenation
in SEE ALSO where page names are long.

syscalls.2

uname.2

boot.7

Michael Kerrisk

Global fix: s/OS/operating system/

Changes to individual pages

epoll_wait.2

Michael Kerrisk [Fredrik Arnerup]

Describe timeout limitation in kernels < 2.6.37

As reported by Fredrik (and as far as I can tell the problem

went back to 2.6.0):

The timeout argument has an upper limit. Any values above that limit are treated the same as -1, i.e. to wait indefinitely.

The limit is given by:

```
#define EP_MAX_MSTIMEO min(1000ULL * MAX_SCHEDULE_TIMEOUT / HZ, \
(LONG_MAX - 999ULL) / HZ)
```

That is, the limit depends on the size of a long and the timer frequency. Assuming the long is never smaller than 32 bits and HZ never larger than 1000, the worst case is 35 minutes. I think this should be mentioned under "BUGS".

Although this is likely to be fixed in the future (<http://lkml.org/lkml/2010/8/8/144>), the problem exists in at least 2.6.14 - 2.6.35. I don't know if select(2) and poll(2) are affected.

https://bugzilla.kernel.org/show_bug.cgi?id=20762

Michael Kerrisk

Add pointer to select(2) for discussion of close in another thread

getitimer.2

Michael Kerrisk [Trevor Woerner]

Note Linux's odd handling of the new_value==NULL case

Michael Kerrisk [Trevor Woerner]

Fix types used to declare fields in timeval struct

keyctl.2

David Prévot

Reorder SEE ALSO, without .br

poll.2

Michael Kerrisk

Add pointer to select(2) for discussion of close in another thread

select.2

Michael Kerrisk [Stephane Fillod]

Note behavior if monitored file descriptor is closed in another thread

Executive summary: a sane application can't rely on any particular behavior if another thread closes a file descriptor being monitored by select().

See https://bugzilla.kernel.org/show_bug.cgi?id=40852

Michael Kerrisk

Clarify equivalent pselect() code in terms of threads

s/sigprocmask/pthread_sigmask/

semop.2

Michael Kerrisk

Recast discussion of blocking behavior in terms of threads
semop() blocks the calling thread, not the process.

Michael Kerrisk

SEE ALSO: Add clone(2)

Give reader a clue about CLONE_SYSVSEM.

shutdown.2

Michael Kerrisk [Eric Dumazet]

Document EINVAL error (and associated bug)

Eric Dumazet noted that EINVAL was not documented. Some further digging shows that it's also not diagnosed consistently.

See https://bugzilla.kernel.org/show_bug.cgi?id=47111.

sigaction.2

Michael Kerrisk

Tweak SA_RESETHAND description

timer_settime.2

Michael Kerrisk

Small rewording around discussion of pointer arguments

wait4.2

Adrian Bunk

Note that these functions are nonstandard and recommend alternatives

Some edits to Adrian's patch by mtk.

Michael Kerrisk

CONFORMING TO: Note SUS details for wait3()

gnu_get_libc_version.3

Michael Kerrisk

Remove unneeded "#define _GNU_SOURCE" from SYNOPSIS

pthread_kill.3

pthread_sigqueue.3

Michael Kerrisk

Remove wording "another"

Writing "another thread" in these pages implies that these functions can't be used to send a signal to the calling thread itself, which is of course untrue.

sigvec.3

Michael Kerrisk

Add "int" arg to sv_handler definition in sigvec structure

Michael Kerrisk

Fix small error in discussion of blocking of signals

The signal that causes the handler to be invoked is blocked, but saying "by default" implies that this can be changed via the API. It cannot. (One needs sigaction(2) for that.)

syslog.3

Simon Josefsson

Remove (apparently bogus) text claiming LOG_AUTH is deprecated
LOG_AUTH is in POSIX, and widely available. There seems to be no basis to the claim it is deprecated.

Quoting Simon:

I cannot find any other source that claim LOG_AUTH is deprecated in any way. LOG_AUTH is distinct from LOG_AUTHPRIV. The GNU C Library manual only documents LOG_AUTH. The header files contains both without any comment. Common systems like Debian appear to refer to both auth and authpriv facilities in syslog configurations. Popular daemons appear to use both facilities. Both facilities are discussed in several RFCs.

See https://bugzilla.kernel.org/show_bug.cgi?id=46091

ttynam.3

Michael Kerrisk

SEE ALSO: Add ctermid(3)

proc.5

Michael Kerrisk

Clarify header file related to 'flags' field of /proc/PID/stat

Michael Kerrisk [Frédéric Brière]

Update description of 'starttime' field of /proc/PID/stat

The unit of measurement changed from jiffies to clock ticks in Linux 2.6.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=675891>

Michael Kerrisk

Document /proc/sys/kernel/kptr_restrict

Michael Kerrisk [Kees Cook]

Document /proc/sys/fs/protected_symlinks

Based on text in Documentation/sysctl/fs.txt by Kees Cook

Michael Kerrisk [Kees Cook]

Document /proc/sys/fs/protected_hardlinks

Based on text in Documentation/sysctl/fs.txt by Kees Cook

capabilities.7

Michael Kerrisk

Document interaction of CAP_SYSLOG and /proc/sys/kernel/kptr_restrict

ip.7

Michael Kerrisk

SEE ALSO: Add ipv6(7)

SEE ALSO: Add icmp(7)

man-pages.7

Michael Kerrisk

Add some advice about disabling hyphenation in SEE ALSO

ld.so.8

Michael Kerrisk

Describe interpretation of slashes in dependency strings

Michael Kerrisk

Repeat note that LD_LIBRARY_PATH is ignored in privileged programs

This point is already noted when discussing search order for libraries, but it's worth repeating under the specific discussion of LD_LIBRARY_PATH further down the page.

Michael Kerrisk

Add some details for LD_PRELOAD

Note that LD_PRELOAD list separator can be space or colon

===== Changes in man-pages-3.44 =====

Released: 2012-11-07, Barcelona

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Bert Hubert <bert.hubert@netherlabs.nl>

David Prévot <taffit@debian.org>

James Youngman <jay@gnu.org>

Kees Cook <keescook@chromium.org>

Lars Wirzenius <liw@iki.fi>

Lucas De Marchi <lucas.de.marchi@gmail.com>

Michael Kerrisk <mtk.manpages@gmail.com>

Rusty Russell <rusty@rustcorp.com.au>

Simon Paillard <spaillard@debian.org>

Thomas Habets <thomas@habets.se>

Apologies if I missed anyone!

New and rewritten pages

delete_module.2

Michael Kerrisk

Rewrite to Linux 2.6+ reality

Michael Kerrisk

Change license and copyright

There is now nothing left of the original FSF-copyrighted page. So, change the copyright and license.

Michael Kerrisk [Lucas De Marchi, Rusty Russell]

Substantial reorganization after comments from Rusty Russell

Rusty notes that O_NONBLOCK is almost always used in practice. Therefore, it would be better to reorganize the page to consider that "the default".

init_module.2

Michael Kerrisk

Rewrite to Linux 2.6+ reality

Michael Kerrisk

Change copyright and license

Little of the original page now remains. Change copyright and license

Michael Kerrisk [Rusty Russell]

Changes after review comments from Rusty Russell

Kees Cook

Add various pieces describing Linux 2.6+ behavior

Pieces take from, or inspired by, a patch sent by Kees.

getauxval.3

Michael Kerrisk

Document getauxval() function added in glibc 2.16

Global changes

Various pages

Michael Kerrisk

Global fix: Use consistent capitalization in NAME section

The line(s) in the NAME section should only use capitals where English usage dictates that. Otherwise, use lowercase throughout.

Various pages

Michael Kerrisk

Global fix: "userspace" ==> "user space" or "user-space"

Existing pages variously use "userspace" or "user space".

But, "userspace" is not quite an English word.
So change "userspace" to "user space" or, when used
attributively, "user-space".

Changes to individual pages

clock_getres.2

clock_nanosleep.2

Michael Kerrisk

Linking with -lrt is no longer needed from glibc 2.17 onward

create_module.2

Michael Kerrisk

Note that this system call is present only in kernels before 2.6

Michael Kerrisk

Note that ENOSYS probably indicates kernel 2.6+

execve.2

Michael Kerrisk

Document treatment of PR_SET_PDEATHSIG on execve()

Michael Kerrisk

Document treatment of SECBIT_KEEP_CAPS securebits flag on execve()

fork.2

Michael Kerrisk

Note treatment of default timer slack value on fork()

getdomainname.2

Simon Paillard [Lars Wirzenius]

Point out that these calls relate to NIS, not DNS

See <http://bugs.debian.org/295635>

get_kernel_syms.2

Michael Kerrisk

Note that this system call is present only in kernels before 2.6

ipc.2

Michael Kerrisk

Update note on architectures that don't have ipc()

Replace mention of ia64 with x86-64 and ARM.

link.2

Michael Kerrisk

Add EPERM error triggered by /proc/sys/fs/protected_hardlink

prctl.2

Michael Kerrisk

Mention Documentation/prctl/no_new_privs.txt for PR_SET_NO_NEW_PRIVS

Kees Cook

update seccomp sections for mode 2 (BPF)

This adds a short summary of the arguments used
for "mode 2" (BPF) seccomp.

Michael Kerrisk

Small improvements to PR_SET_SECCOMP discussion

Note type of 'arg3' for SECCOMP_MODE_FILTER.

Add pointer to Documentation/prctl/seccomp_filter.txt.

Michael Kerrisk

Note 'seccomp' semantics with respect to fork(), execve(), and prctl()

Michael Kerrisk

Document PR_SET_TIMERSLACK and PR_GET_TIMERSLACK

Michael Kerrisk

Reword PR_SET_NAME and PR_GET_NAME in terms of threads

Plus tfix

Kees Cook

document PR_SET_NO_NEW_PRIVS, PR_GET_NO_NEW_PRIVS

This adds a short description of the no_new_privs bit,
as described in Documentation/prctl/no_new_privs.txt.

ptrace.2

Michael Kerrisk

Clarify that some operations are not present on all architectures

PTRACE_GETREGS, PTRACE_SETGREGS, PTRACE_GETFPREGS,

and PTRACE_GETSPREGS are not present on all architectures.

PTRACE_SYSEMU and PTRACE_SYSEMU_SINGLESTEP are present only
on x86.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=122383>

query_module.2

Michael Kerrisk

Add a few words clarifying reference to /sys/module

Michael Kerrisk

Note that this system call is present only in kernels before 2.6

Michael Kerrisk

Note that ENOSYS probably indicates kernel 2.6+

Michael Kerrisk

SEE ALSO: Add modinfo(8) and lsinfo(8)

Michael Kerrisk

Move some information in NOTES to VERSIONS

socketcall.2

Michael Kerrisk

Update note on architectures that don't have socketcall()

Replace mention of ia64 with x86-64 and ARM.

times.2

Thomas Habets

Recommend `clock_gettime(2)` as alternative to `times(2)`

`clock_getcpuclockid.3`

Michael Kerrisk

Linking with `-lrt` is no longer needed from `glibc 2.17` onward

`fts.3`

Simon Paillard [James Youngman]

Improve description of physical vs. logical tree walking

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=633505>

`getenv.3`

Michael Kerrisk

SEE ALSO: add `getauxval(3)`

`proc.5`

Michael Kerrisk

Document `/proc/meminfo`

Info mostly taken from `Documentation/filesystems/proc.txt`
and `Documentation/vm/hugetlbpage.txt`.

Michael Kerrisk

Default for `/proc/sys/fs/protected_{hardlinks,symlinks}` is now 0

The default setting of 1 in `/proc/sys/fs/protected_hardlinks`
and `/proc/sys/fs/protected_symlinks` caused one too many
breakages for Linus's taste, so commit `561ec64ae67e` changed
the default for both files to 0.

Note system call error yielded by `/proc/sys/fs/protected_symlinks`

Note that violating 'protected_symlinks' restrictions
causes system calls to fail with the error `EACCES`.

Michael Kerrisk

Since Linux 2.6.27, `/proc/sys/kernel/modprobe` depends on `CONFIG_MODULES`

`ipv6.7`

Bert Hubert

Document `IPV6_RECVPKTINFO`

`man-pages.7`

Michael Kerrisk

Note rules for capitalization in `NAME` section

`time.7`

Michael Kerrisk

Add a subsection on timer slack

`ld.so.8`

Michael Kerrisk

SEE ALSO: add getauxval(3)

===== Changes in man-pages-3.45 =====

Released: 2012-12-21, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>
Cyril Hrubis <chrubis@suse.cz>
David Prévot <taffit@debian.org>

Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Rens van der Heijden <rens.vanderheijden@uni-ulm.de>
Simon Paillard <spaillard@debian.org>
Thierry Vignaud <thierry.vignaud@gmail.com>
Trevor Woerner <twoerner@gmail.com>
YOSHIFUJI Hideaki <yoshifuji@linux-ipv6.org>

Apologies if I missed anyone!

New and rewritten pages

s390_runtime_instr.2

Jan Glauber

New page for s390-specific s390_runtime_instr(2)

if_nameindex.3

YOSHIFUJI Hideaki

Document if_nameindex(3) and if_freenameindex(3)

Michael Kerrisk

Edits, improvements and corrections to Hideaki's page

Michael Kerrisk

Add an example program

if_nametoindex.3

YOSHIFUJI Hideaki

New page documenting if_nametoindex(3) and if_indeXToname(3)

New and changed links

if_freenameindex.3

Michael Kerrisk

New link to if_nameindex.3

if_indeXToname.3

Michael Kerrisk

New link to if_nametoindex.3

Global changes

sysconf.3

cciss.4

Michael Kerrisk

Global fix: s/runtime/run time/

Changes to individual pages

clone.2

Michael Kerrisk

Since 2.6.30, CLONE_NEWIPC also supports POSIX message queues

delete_module.2

Michael Kerrisk

Small rewording of description of effect of O_TRUNC

getrlimit.2

Michael Kerrisk [Trevor Woerner]

Document Linux's nonstandard treatment of RLIMIT_CPU soft limit

Upon encountering the RLIMIT_CPU soft limit when a SIGXCPU handler

has been installed, Linux invokes the signal handler *and* raises

the soft limit by one second. This behavior repeats until the limit is encountered. No other implementation that I tested (Solaris 10, FreeBSD 9.0, OpenBSD 5.0) does this, and it seems unlikely to be POSIX-conformant. The (Linux-specific) RLIMIT_RTTIME soft limit exhibits similar behavior.

Michael Kerrisk

Point reader at discussion of /proc/[pid]/limits in proc(5)

io_getevents.2

Michael Kerrisk

io_getevents() may cause segfault when called with invalid ctx_id

For reference see: <http://marc.info/?l=linux-aio&m=130089887002435&w=2>

recv.2

Michael Kerrisk [Eric Dumazet]

UNIX domain sockets support MSG_TRUNC since 3.4

sendmmsg.2

Elie De Brauwier

Add example program for sendmmsg()

stat.2

Simon Paillard

Clarify description of EOVERFLOW error

The EOVERFLOW error is not only for st_size, but also inode and block size fields. See glibc source file sysdeps/unix/sysv/linux/xstatconv.c and kernel source file fs/stat.c. Also, fix bit/byte confusion

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=604928>

syscalls.2

Michael Kerrisk

Update various references to "i386" to "x86"

Michael Kerrisk

Add s390_runtime_instr(2)

sysctl.2

Michael Kerrisk

Mention CONFIG_SYSCTL_SYSCALL

Michael Kerrisk

Calls to sysctl() log warnings to the kernel log since 2.6.24

syslog.2

Michael Kerrisk

Substantially reorganize discussion of commands

Make the layout of the discussion of the commands more readable.

Michael Kerrisk

Add kernel symbolic 'type' names

Michael Kerrisk

Clarify SYSLOG_ACTION_SIZE_UNREAD semantics

SYSLOG_ACTION_SIZE_UNREAD returns the number of bytes available for reading via SYSLOG_ACTION_READ.

Michael Kerrisk

Clarify where SYSLOG_ACTION_READ_ALL places data it reads

Michael Kerrisk

Clarify semantics of SYSLOG_ACTION_CLEAR

The SYSLOG_ACTION_CLEAR command (5) does not really clear the ring buffer; rather it affects the semantics of what is returned by commands 3 (SYSLOG_ACTION_READ_ALL) and 4 (SYSLOG_ACTION_READ_CLEAR).

Michael Kerrisk

Clarify discussion of privileges for commands 3 and 10

Michael Kerrisk

Add mention of CONFIG_LOG_BUF_SHIFT

wait.2

Michael Kerrisk

BUGS: Document odd waitid() behavior when 'infof' is NULL

getifaddr.3

Michael Kerrisk [Julien Cristau]

Update description of ifa_data to Linux 2.6+ reality

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=526778>

memcmp.3

Michael Kerrisk [Jon Grant]

Enhance RETURN VALUE text and remove redundant text from DESCRIPTION

Note that sign of result equals sign of difference between first two bytes that differ (treated as "unsigned char")."

mkstemp.3

Michael Kerrisk [Florian Weimer]

Deemphasize discussion of mode 066 in glibc 2.0.6

Glibc 2.0.6 is now so ld that the discussion of details of that version can be deemphasized placing just under NOTES.

See https://bugzilla.kernel.org/show_bug.cgi?id=51811

strcmp.3

Michael Kerrisk [Jon Grant]

Enhance RETURN VALUE text and remove redundant text from DESCRIPTION

Note that sign of result equals sign of difference between first two bytes that differ (treated as "unsigned char")."

ttyname.3

Michael Kerrisk

Fix confused text in ERRORS

The existing text suggested that the ERRORS applied only for ttyname_r(). However, 2 of the 3 errors can occur for ttyname().

undocumented.3

Michael Kerrisk

Remove some now documented functions

proc.5

Michael Kerrisk [Jim Paris]

Correct description of SwapFree in /proc/meminfo

Michael Kerrisk

Note change of /proc/[pid]/limits file permissions in 2.6.36

resolv.conf.5

Simon Paillard

Document IPv6 format for nameserver

See: <http://bugs.debian.org/610036>

capabilities.7

Michael Kerrisk [Rens van der Heijden]

Correct URL for POSIX.1e draft

ipv6.7

Gao Feng

Add description of getsockopt() for IPV6_MTU

In IPv4, IP_MTU is only supported by getsockopt.

In IPv6, we can use IPV6_MTU to set socket's MTU, but the return value of getsockopt() is the path MTU.

rtnetlink.7

Michael Kerrisk [Julien Cristau]

Update description of IFLA_STATS to Linux 2.6+ reality

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=526778>

socket.7

Michael Kerrisk [YOSHIFUJI Hideaki]

Document 'sockaddr' and 'sockaddr_storage' types

Andi Kleen

Explain effect of SO_SNDTIMEO for connect()

When SO_SNDTIMEO is set before connect(), then connect() may return EWOULDBLOCK when the timeout fires.

==== Changes in man-pages-3.46 =====

Released: 2013-01-27, Canberra

Apologies if I missed anyone!

New and rewritten pages

kcmp.2

Cyrill Gorcunov, Michael Kerrisk

New page for kcmp(2)

Newly documented interfaces in existing pages

init_module.2

Michael Kerrisk [Kees Cook, Rusty Russell, Lucas De Marchi]

Document finit_module(2)

Rusty Russell [Lucas De Marchi, Kees Cook]

Document finit_module() 'flags' argument

Document MODULE_INIT_IGNORE_MODVERSIONS and
MODULE_INIT_IGNORE_VERMAGIC. (Some edits by mtk.)

New and changed links

finit_module.2

Michael Kerrisk

New link to init_module.2

__after_morecore_hook.3

__free_hook.3

__malloc_initialize_hook.3

__memalign_hook.3

__realloc_hook.3

Michael Kerrisk

New link to malloc_hook.3

Global changes

Various pages

Michael Kerrisk

Global fix: s/tty/terminal/

Changes to individual pages

clone.2

Michael Kerrisk

Add kernel versions for various CLONE_* constants

Michael Kerrisk

CLONE_NEWIPC governs mechanisms that don't have filesystem pathnames

Michael Kerrisk

CLONE_NEWIPC doesn't mount the POSIX MQ file system

Michael Kerrisk

Add an example program (CLONE_NEWUTS)

Michael Kerrisk

Some reworking of CLONE_NEWIPC text

No substantial content changes.

Michael Kerrisk

SEE ALSO: add kcmp(2)

SEE ALSO: add setns(2)

fallocate.2

Michael Kerrisk

FALLOC_FL_* flags are defined in glibc only since 2.18

getxattr.2

removexattr.2

setxattr.2

Michael Kerrisk [Andrew Perepechko,]

Note that ENOATTR is a synonym for ENODATA

Various people have pointed out that strace(1) shows ENODATA for the case where the named attribute does not exist, or the process has no access to this attribute. ENODATA and ENOATTR are in fact defined as synonyms. Point this out in the man page, so that people understand the strace(1) info.

See https://bugzilla.kernel.org/show_bug.cgi?id=51871

getxattr.2

listxattr.2

removexattr.2

setxattr.2

Michael Kerrisk

Put errors under ERRORS section

The errno values on these pages were listed in a nonstandard way under the RETURN VALUE section. Put them in ERRORS sections.

init_module.2

Michael Kerrisk [Rusty Russell]

ERRORS: Add errors for module signatures (EBADMSG, ENOKEY)

link.2

mkdir.2

mknod.2

open.2

rename.2

symlink.2

write.2

mkfifo.3

Mark Hills

Document EDQUOT error

The return error EDQUOT is not documented in open(2), write(2), symlink(2) etc.

Whether inodes or disk blocks are required for each function is something I based on received wisdom and BSD documentation, rather than tracing the code to the kernel. For symlink(2) this certainly depends on the file system type.

listxattr.2

Michael Kerrisk [Theodore Ts'o]

Fix RETURN VALUE description

On success, 0 may be returned, so change wording from "positive number" to "nonnegative number".

outb.2

Michael Kerrisk

Add SYNOPSIS

prctl.2

Kees Cook

Document PR_SET_PTRACER

Document the Yama LSM's prctl handler that allows processes to declare ptrace restriction exception relationships via PR_SET_PTRACER.

Michael Kerrisk

Make it explicit that PR_SET_PTRACER replaces previous setting
The attribute is a scalar, not a list.

Shawn Landden

Document EINVAL error for PR_SET_PTRACER

Michael Kerrisk

Document PR_GET_TID_ADDRESS

ptrace.2

Michael Kerrisk

Document PTRACE_O_EXITKILL

Michael Kerrisk

Place PTRACE_SETOPTIONS list in alphabetical order

query_module.2

Michael Kerrisk

Must be called using syscall(2)

Yes, the call is way obsolete, but add this info for completeness.

recvmsg.2

Elie De Brauer

Add/correct kernel version info for recvmsg() and MSG_WAITFORNONE

This patch isolates the since/version related fixes as requested.

This change introduces the following delta:

- * The page states it was added in 2.6.32 but it is only added 2.6.33 (ref: http://kernelnewbies.org/Linux_2_6_33)
- * The MSG_WAITFORONE flag was in turn only added in 2.6.34 (ref: http://kernelnewbies.org/Linux_2_6_34)

Elie De Brauwer

Add an example program

setns.2

Michael Kerrisk

Add example program

sigaction.2

Michael Kerrisk [Zsbán Ambrus]

Note feature test macro requirements for 'siginfo_t'

See https://bugzilla.kernel.org/show_bug.cgi?id=52931

syscalls.2

Michael Kerrisk

Add kern_features(2)

Michael Kerrisk

Add utrap_install(2)

Sparc-specific, present since ancient times

Michael Kerrisk

Add finit_module(2)

sysctl.2

Michael Kerrisk [Garrett Cooper]

ERRORS: EACCES as a synonym for EPRM

See https://bugzilla.kernel.org/show_bug.cgi?id=46731

and <http://thread.gmane.org/gmane.linux.ltp/11413/focus=957635>

From: Garrett Cooper <yanegomi <at> gmail.com>

Subject: Re: [LTP] [PATCH] sysctl03: sysctl returns EACCES after 2.6.33-rc1

Newsgroups: gmane.linux.kernel, gmane.linux.ltp

Date: 2010-03-04 18:35:33 GMT

unshare.2

Michael Kerrisk

Update NOTES on unimplemented flags

Michael Kerrisk

Fix text problems in description of CLONE_FS

Michael Kerrisk

SEE ALSO: add kcmp(2)

SEE ALSO: add setns(2)

Michael Kerrisk

Reorder CLONE_NEWUTS entry in list

difftime.3

Michael Kerrisk [Michal Gorny]

Remove crufty text about 'time_t' on "other systems"

Back in 2006, some text came in via Debian patches that seems crufty. Remove it.

See https://bugzilla.kernel.org/show_bug.cgi?id=46731

getaddrinfo.3

getnameinfo.3

Michael Kerrisk [Peter Budny]

Fix some confused references to function names

See https://bugzilla.kernel.org/show_bug.cgi?id=52741

getspnam.3

Michael Kerrisk [Wolfgang Rohdewald]

ERRORS: Add EACCES

See https://bugzilla.kernel.org/show_bug.cgi?id=52681

__setfpucw.3

Michael Kerrisk

Add proper page cross refs for alternate functions

core.5

proc.5

Kees Cook

Clarify suid_dumpable versus core_pattern

In Linux 3.6, additional requirements were placed on core_pattern when suid_dumpable is set to 2. Document this and include commit references.

Justin Lebar

statm's "shared" field refers to pages backed by files

I noticed that statm's "shared" field doesn't match the sum of all the "shared" entries in smaps [1].

The kernel docs explain that statm's "shared" field is "number of pages that are shared (i.e. backed by a file)" [2]. smaps appears to call a page shared if it's mapped by at least two processes, which explains this discrepancy.

I'm not a kernel hacker, but it appears to me they do mean "i.e." and not "e.g." in the statm description: In fs/proc/task_mmu.c::task_statm, I see

```
*shared = get_mm_counter(mm, MM_FILEPAGES);
```

Here's a patch which updates the man page to match the (hopefully correct) kernel docs.

shells.5

Michael Kerrisk

Add /etc/bash to list of example shells

ttytype.5

Michael Kerrisk

Add proper xref for termcap and terminfo pages

capabilities.7

Michael Kerrisk

Add `kcmp(2)` under `CAP_SYS_PTRACE`

man-pages.7

Michael Kerrisk

Update description of Section 7

===== Changes in man-pages-3.47 =====

Released: 2013-02-12, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

David Prévot <taffit@debian.org>
D. Barbier <bouzim@gmail.com>
Lennart Poettering <lennart@poettering.net>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Peter Schiffer <pschiffe@redhat.com>
Radek Pazdera <rpazdera@redhat.com>
Reuben Thomas <rrt@sc3d.org>
Shawn Landden <shawnlandden@gmail.com>
Simon Paillard <spaillard@debian.org>
Vince Weaver <vweaver1@eecs.utk.edu>

Apologies if I missed anyone!

New and rewritten pages

perf_event_open.2

Vincent Weaver

New page documenting perf_event_open(2)

pthread_setname_np.3

Chandan Apsangi, Michael Kerrisk

New page for pthread_setname_np(3) and pthread_getname_np(3)

sln.8

Michael Kerrisk [Peter Schiffer]

New page documenting the 'sln' command provided by glibc
Inspired by a Red Hat downstream page, but with rather
more detail.

Newly documented interfaces in existing pages

prctl.2

Michael Kerrisk [Shawn Landden, Lennart Poettering]

Document PR_SET_CHILD_SUBREAPER and PR_GET_CHILD_SUBREAPER

ip.7

Radek Pazdera

Add source-specific multicast sockopts

This patch adds documentation of several source-specific multicast socket options that were added to kernel with implementation of IGMPv3 in 2.5.68.

The following socket options were added:

IP_ADD_SOURCE_MEMBERSHIP

IP_DROP_SOURCE_MEMBERSHIP

IP_BLOCK_SOURCE

IP_UNBLOCK_SOURCE

IP_MSFILTER

Pages moved across sections

getcontext.3

Michael Kerrisk

This page really belongs in Section 3 (moved from Section 2)

getdtablesize.3

Michael Kerrisk

Move from Section 2

New and changed links

getcontext.2

Michael Kerrisk

Make link to page moved into Section 3

getdtablesize.2

Michael Kerrisk

Link to renamed getdtablesize.3

setcontext.2

Michael Kerrisk

Modify link to point to Section 3

pthread_getname_np.3

Michael Kerrisk

New link to new pthread_setname_np.3

setcontext.3

Michael Kerrisk

Link to getcontext page renamed into Section 3

Changes to individual pages

fallocate.2

Michael Kerrisk

SEE ALSO: add fallocate(1)

flock.2

Michael Kerrisk

SEE ALSO: add flock(1)

fork.2

Michael Kerrisk

SEE ALSO: add exit(2)

getpriority.2

Michael Kerrisk

BUGS: note that nice value is per-thread on Linux

getrlimit.2

Michael Kerrisk

SEE ALSO: add prlimit(1)

gettid.2

Michael Kerrisk

SEE ALSO: add various system calls that use thread IDs

ioprio_set.2

Michael Kerrisk

SEE ALSO: add ionice(1)

sched_setaffinity.2

Michael Kerrisk

SEE ALSO: add taskset(1)

sched_setparam.2

Michael Kerrisk

Scheduling policy and parameters are per-thread on Linux

Direct the reader to the discussion in sched_setscheduler(2).

sched_setscheduler.2

Michael Kerrisk

Scheduling policy and parameters are per-thread on Linux

Michael Kerrisk

SEE ALSO: add chrt(1)

setsid.2

Michael Kerrisk

SEE ALSO: add setsid(1)

shmop.2

Michael Kerrisk [Peter Schiffer]

ERRORS: Add EIDRM

Taken from Red Hat downstream patch

sigaction.2

makecontext.3

Michael Kerrisk

Change getcontext/setcontext page ref to Section 3

signal.2

Michael Kerrisk [Reuben Thomas]

Clarify System V vs BSD semantics for signal()

syscalls.2

Michael Kerrisk

The list on this page is not just syscalls common to all platforms

Michael Kerrisk

Add perfctr(2)

Add ppc_rtas(2)

Michael Kerrisk

Add kernel version number of utrap_install(2)

unimplemented.2

Michael Kerrisk [Peter Schiffer]

Remove mention of kernel version number in DESCRIPTION

inet.3

Michael Kerrisk [Peter Schiffer]

Fix error in EXAMPLE using inet_aton()

See https://bugzilla.redhat.com/show_bug.cgi?id=837090

Patch taken from Red Hat downstream.

posix_fallocate.3

Michael Kerrisk

SEE ALSO: add fallocate(1)

regex.3

Reuben Thomas

Clarify details of matching

The first is that it's far from clear that the end points of the complete string match are stored in the zero'th element of the `regmatch_t` array; secondly, the phrase "next largest substring match" is positively misleading, implying some sort of size ordering, whereas in fact they are ordered according to their appearance in the regex pattern.

scanf.3

Michael Kerrisk

Clarify meaning of "string conversions" for 'm' modifier

Mike Frysinger

Update %a vs %m documentation

POSIX.1-2008 adopted the 'm' flag for dynamic allocation. Update page to cover it and relegate the glibc-specific 'a' flag to NOTES.

strtol.3

Michael Kerrisk [Peter Schiffer]

Replace some bogus text about "thousands separator"

See https://bugzilla.redhat.com/show_bug.cgi?id=652870

sysconf.3

Michael Kerrisk [Peter Schiffer]

Use "_SC_PAGESIZE" consistently on page

`s/_SC_PAGE_SIZE/_SC_PAGESIZE/` in one instance.

From Red Hat downstream patch.

nscd.conf.5

Peter Schiffer

Add max-db-size and auto-propagate descriptions, default values, + misc

- * added missing valid services (services and netgroup)

- * added many default values for options

- * reordered options according to the nscd.conf file (logical order)

- * added 2 missing options: max-db-size and auto-propagate

nsswitch.conf.5

Peter Schiffer

Mention `initgroups db`

proc.5

Michael Kerrisk

Document `/proc/profile`

Michael Kerrisk [Peter Schiffer]

Update /proc/sys/fs/file-nr to include Linux 2.6 details

Michael Kerrisk

Clarify relationship between file-max and file-nr

The third value in /proc/sys/fs/file-nr is the same as the value in /proc/sys/fs/file-max.

Michael Kerrisk

Note message written to kernel log when file-max limit is hit

Info from Documentation/sysctl/fs.txt.

Michael Kerrisk

Mention lscpu(1) under discussion of /proc/cpuinfo

resolv.conf.5

Michael Kerrisk [Peter Schiffer]

Document "single-request-reopen" option

Taken from Red Hat downstream patch

See https://bugzilla.redhat.com/show_bug.cgi?id=717770

See <http://thread.gmane.org/gmane.linux.man/3161>

utmp.5

Michael Kerrisk

SEE ALSO: add utmpdump(1)

cpuset.7

Simon Paillard

Add missing 'cpuset.' prefix for some flags

See kernel commit e21a05cb408bb9f244f11a0813d4b355dad0822e

svipc.7

Michael Kerrisk

SEE ALSO: add ipcmk(1), ipcrm(1), ipcs(1)

termio.7

Michael Kerrisk

SEE ALSO: add reset(1), setterm(1), stty(1), tty(4)

ld.so.8

Michael Kerrisk [Peter Schiffer]

LD_VERBOSE does not work with ld.so --list and --verify

From Red Hat downstream patch

See https://bugzilla.redhat.com/show_bug.cgi?id=532629

Michael Kerrisk

SEE ALSO: add sln(8)

zdump.8

Michael Kerrisk [Peter Schiffer]

Bring up to date with zdump --help

Patch taken from Red Hat downstream.

===== Changes in man-pages-3.48 =====

Released: 2013-03-05, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Andrey Vagin <avagin@openvz.org>
Aristeu Rozanski <aris@ruivo.org>
Colin Walters <walters@verbum.org>
Cyril Hrubis <chrubis@suse.cz>
Cyrill Gorcunov <gorcunov@openvz.org>
Daniel P. Berrange <berrange@redhat.com>
David Prévot <taffit@debian.org>
D. Barbier <bouzim@gmail.com>
Denys Vlasenko <vda.linux@googlemail.com>
Flavio Leitner <fbl@redhat.com>

Ivana Varekova <varekova@redhat.com>
Kai Kunschke <kai@kunfoo.org>
Marcela Maslanova <mmaslano@redhat.com>
Marc Lehmann <debian-reportbug@plan9.de>
Marshel Abraham <Marshel.Abraham@in.bosch.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Nathan Stratton Treadway <kernelbugs@nathanst.com>
Pavel Emelyanov <xemul@parallels.com>
Peter Schiffer <pschiffe@redhat.com>
Simon Heimberg <simohe@besonet.ch>
Simon Paillard <spillard@debian.org>
Török Edwin <edwintorok@gmail.com>
Ulrich Drepper <drepper@redhat.com>
Zack Weinberg <zackw@panix.com>

Apologies if I missed anyone!

New and rewritten pages

getunwind.2

Marcela Maslanova

New page documenting getunwind(2)

Taken from Red Hat downstream man pages set

Michael Kerrisk

Much rewriting

Some text taken from arch/ia64/kernel/unwind.c.

perfmonctl.2

Ivana Varekova

New page documenting IA-64-specific perfmonctl(2)

Taken from Red Hat downstream man pages

Michael Kerrisk

Rework discussion of PFM_CREATE_CONTEXT

Add VERSIONS and CONFORMING TO

Note that there is no glibc wrapper

Remove PFM_CREATE_EVTSETS, PFM_DELETE_EVTSETS, PFM_GETINFO_EVTSETS

These don't exist, and it appears they never have.

Fix argument types for PFM_WRITE_PMCS, PFM_WRITE_PMDS, PFM_READ_PMDS

The types that were being used don't exist!

Briefly document PFM_GET_FEATURES, PFM_DEBUG, PFM_GET_PMC_RESET_VAL

gai.conf.5

Ulrich Drepper

New page documenting gai.conf

Taken from Red Hat downstream pages

nss.5

Ulrich Drepper

New page describing nss.conf

Newly documented interfaces in existing pages

clock_getres.2

Cyril Hrubis

Document CLOCK_REALTIME_COARSE and CLOCK_MONOTONIC_COARSE

Cyril Hrubis

Document CLOCK_BOOTTIME

Michael Kerrisk

Some improvements to CLOCK_BOOTTIME description

ptrace.2

Denys Vlasenko

Document PTRACE_GETREGSET, PTRACE_SETREGSET, PTRACE_SEIZE, and friends

Document PTRACE_GETREGSET, PTRACE_SETREGSET,

PTRACE_SEIZE, PTRACE_INTERRUPT, and PTRACE_LISTEN.

New and changed links

fattach.2

fdetach.2

getmsg.2

isastream.2

putmsg.2

Michael Kerrisk [Peter Schiffer]

New link to unimplemented.2

Taken from Red Hat downstream.

See https://bugzilla.redhat.com/show_bug.cgi?id=436407

Global changes

Many pages

Michael Kerrisk

Global fix: remove unneeded double quotes in .SH headings

Many pages

Michael Kerrisk

Global fix: remove unneeded double quotes in .SS headings

Many pages

Michael Kerrisk

Global fix: use consistent capitalization in .SS headings

Capitalization in .SS sections across pages (and sometimes even within a single page) is wildly inconsistent. Make it consistent.

Capitalize first word in heading, but otherwise use lower case, except where English usage (e.g., proper nouns) or programming language requirements (e.g., identifier names) dictate otherwise.

Many pages

Michael Kerrisk [Denys Vlasenko]

Remove double blank lines in output

Various pages

Michael Kerrisk

Fix order of SH sections

Changes to individual pages

accept.2

Michael Kerrisk

NAME: Add "accept4"

access.2

Colin Walters

Note that access() may also fail for FUSE

Since in some cases (e.g. libguestfs's guestmount) it also has the semantics where files can appear owned by root, but are actually mutable by the user, despite what one might infer from the Unix permissions.

getpeername.2

Michael Kerrisk [Kai Kunschke]

Clarify semantics of getpeername() for datagram sockets

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=674034>

getuid.2

Michael Kerrisk

Remove duplicate section heading

mmap.2

Cyril Hrubis

Add note about partial page in BUGS section

This adds a note about Linux behavior with partial page at the end of the object. The problem here is that a page that contains only part of a file (because the file size is not multiple of PAGE_SIZE) stays in page cache even after the mapping is unmapped and the file is closed. So if some process dirties such page, other mappings will see the changes rather than zeroes.

Michael Kerrisk [Török Edwin]

Some 'flags' values require a feature test macro to be defined

Add text to NOTES noting that some MAP_* constants are defined only if a suitable feature test macro is defined.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=542601>

Cyril Hrubis

Document EOVERFLOW error

open.2

Michael Kerrisk

Clarify list of file creation flags

POSIX.1-2008 TC1 clarified this, so that O_CLOEXEC,

O_DIRECTORY, and O_NOFOLLOW are also in this list.

prctl.2

Cyrill Gorcunov

Add some details for PR_GET_TID_ADDRESS

read.2

Michael Kerrisk [Zack Weinberg]

Clarify interaction of count==0 and error checking
POSIX deliberately leaves this case open, so the man
page should be less specific about what happens.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=533232>

Michael Kerrisk [Marc Lehmann]

Remove crufty text about O_NONBLOCK on files
See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=700529>

Michael Kerrisk

Clarify details for seekable files

unimplemented.2

Michael Kerrisk [Peter Schiffer]

Add various STREAMS interfaces to NAME
Taken from Red Hat downstream.

See https://bugzilla.redhat.com/show_bug.cgi?id=436407

cexp2.3

Michael Kerrisk

Still does not exist in glibc 2.17

exit.3

Michael Kerrisk

Note that a call to `execve()` clears exit handler registrations

getaddrinfo.3

Michael Kerrisk

SEE ALSO: `Add gai.conf(5)`

malloc_trim.3

Michael Kerrisk

Remove duplicate section title

printf.3

Marshall Abraham [Graham Gower, Graham Gower]

Fix error handling in example code
See https://bugzilla.kernel.org/show_bug.cgi?id=23282

pthread_yield.3

Michael Kerrisk [Aristeu Rozanski]

Add `_GNU_SOURCE` feature test macro to SYNOPSIS

resolver.3

resolv.conf.5

Michael Kerrisk [Nathan Stratton Treadway, Simon Heimberg]

RES_DEBUG is only available if glibc is compiled with debug support

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=692136>

and https://bugzilla.kernel.org/show_bug.cgi?id=43061

strtol.3

Michael Kerrisk [Peter Schiffer]

Remove crufty text from previous fix

core.5

Michael Kerrisk

Document CONFIG_COREDUMP

capabilities.7

Andrey Vagin

Nonexistent bits are no longer shown as set in /proc/PID/status Cap*

inotify.7

Michael Kerrisk

A monitoring process can't easily distinguish events triggered by itself

ip.7

Flavio Leitner [Peter Schiffer]

Improve explanation about calling listen() or connect()

man-pages.7

Michael Kerrisk

Describe rules for capitalization in .SS headings

rtnetlink.7

Pavel Emelyanov

Add info about ability to create links with given index

Since kernel v3.7 the RTM_NEWLINK message now accepts nonzero

values in ifi_index field. Mention this fact in the respective

rtnetlink.7 section.

socket.7

Pavel Emelyanov

SO_BINDTODEVICE is now readable

SO_BINDTODEVICE is readable since kernel 3.8.

==== Changes in man-pages-3.49 =====

Released: 2013-03-10, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Michael Kerrisk <mtk.manpages@gmail.com>

Global changes

The goal of the changes below to consistently format copyright and license information in the comments in the page source at the top of each page. This allows for easy scripting to extract that information. Following these changes the comments the top of the page source should now consistently have the form:

```
.\" <copyright info, possibly spread over several lines>
.\"
.\" %%LICENSE_START(<license-type>)
.\" <license text>
.\" %%LICENSE_END
.\" <other comments>
```

Note that the 'license-type' is merely descriptive. Its purpose is to simplify scripting for the purpose of gathering statistics on types of licenses used in man-pages. It is NOT a statement about the actual licensing of the page; that license is contain INSIDE the LICENSE_START...LICENSE_END clause.

All pages

Michael Kerrisk

Add a LICENSE_START()...LICENSE_END clause in source at top of each page that encapsulates the license text.

Michael Kerrisk

Put copyright info at top of page, followed by blank line and LICENSE

Various pages

Michael Kerrisk

Update info in source comments on where to get a copy of the GPL

Various pages

Michael Kerrisk

Remove "Hey Emacs" comment in page source

Only certain pages have this; there is no consistency, so remove it from all pages

Michael Kerrisk

Remove "-*- nroff -*-" comment at top of source

===== Changes in man-pages-3.50 =====

Released: 2013-03-15, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Andrey Vagin <avagin@openvz.org>
Bernhard Kuemel <bernhard@bksys.at>
Elie De Brauwier <eliedebrauwier@gmail.com>
Erik Saule <erik.saule@bmi.osu.edu>
Florian Weimer <fweimer@bfc.de>
Friedrich Delgado Friedrichs <friedel@nomaden.org>
Jonathan Nieder <jrnieder@gmail.com>
Jose Luis Domingo Lopez <debian@24x7linux.com>
Mark R Bannister <mark@proseconsulting.co.uk>
Michael Kerrisk <mtk.manpages@gmail.com>
Sam Varshavchik <mrsam@courier-mta.com>
Simon Paillard <spillard@debian.org>

Apologies if I missed anyone!

New and rewritten pages

canonicalize_file_name.3

Michael Kerrisk

Rewrite page, adding much more detail

Global changes

Various pages

Michael Kerrisk

Global fix: s/END_LICENSE/LICENSE_END/

Various pages

Michael Kerrisk

Global fix: s/bitmask/bit mask/

Changes to individual pages

getent.1

Mark R Bannister

netgroup description incorrectly refers to initgroups

capget.2

Michael Kerrisk

Update URL for libcap

fork.2

Michael Kerrisk

Port access permission bits (ioperm()) are turned off in the child

futex.2

Michael Kerrisk

'timeout' is a minimum duration that the call will wait, not a maximum

ioperm.2

Michael Kerrisk

Note that iopl() level of 3 is needed to access ports

Michael Kerrisk

'num' is *bits* not bytes!

Michael Kerrisk

Linux 2.6.8 lifted the port limit to 65,536

See <http://article.gmane.org/gmane.linux.kernel/202624/>

From: Stas Sergeev <stsp@aknet.ru>

Subject: [patch][rfc] Larger IO bitmap

Date: 2004-05-07 19:55:03 GMT

Michael Kerrisk

ioperm() operates on the calling *thread* (not process)

Michael Kerrisk

Clarify meaning of 'turn_on' argument

Plus form formatting fixes.

Michael Kerrisk

Clarify that default state of permission bits in child is off

Michael Kerrisk

NOTES: add mention of /proc/ioports

Michael Kerrisk

SEE ALSO: add outb(2)

iopl.2

Michael Kerrisk

CAP_SYS_RAWIO is required to *raise* the I/O privilege level

Michael Kerrisk

Clarify that the two least significant bits of 'level' are what matter

Michael Kerrisk

SEE ALSO: add outb(2)

syscalls.2

Michael Kerrisk

Add version information for all (other) syscalls

Michael Kerrisk

Add perfmonctl(2)

futimes.3

Michael Kerrisk [Jonathan Nieder]

ERRORS: Add ENOSYS for lutimes()

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=620746>

getpass.3

Michael Kerrisk [Erik Saule]

Suggest use of the ECHO flag as an alternative

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=644261>

realpath.3

Michael Kerrisk

Document GNU extensions for EACCES and ENOENT errors

stdarg.3

Michael Kerrisk [Friedrich Delgado Friedrichs]

Describe va_copy()

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=575077>

termios.3

Michael Kerrisk [Bernhard Kuemel]

Mention that noncanonical mode does not do input processing

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=643854>

random.4

Elie De Brauwer

Document write and document the ioctl interface of /dev/random

The update consists out of two parts:

- a minor thing which just documents what happens if a write to /dev/(u)random is performed, which is used in the example script but not explicitly mentioned.
- the other (biggest) part is the documentation of the ioctl() interface which /dev/(u)random exposes. This ioctl() lives in drivers/char/random.c and the primitives can be found in include/linux/random.h

One comment remains, there used to be an RNDGETPOOL ioctl() which disappeared in v2.6.9. I found two patches on the net:

- <http://www.kernel.org/pub/linux/kernel/people/akpm/patches/2.6/2.6.8.1/2.6.8.1-mm4/broken-out/dev-random-remove-rndgetpool-ioctl.patch>

- <https://lkml.org/lkml/2004/3/25/168>

But as far as I can tell the first one got applied but the 2nd one seems more correct. The result is that even today one can still find traces of the RNDGETPOOL ioctl() in the header files. Is this there for historical reasons or because it might break userspace, even though using it will just give an EINVAL.

bootparam.7

Jose Luis Domingo Lopez

Document 'rootfstype' option

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=182014>

capabilities.7

Michael Kerrisk

Add various pieces under CAP_SYS_RAWIO

Info obtained by grepping the kernel source.

Michael Kerrisk

Add CAP_SYS_RESOURCE /proc/PID/oom_score_adj case

netlink.7

Andrey Vagin

Add a note about broadcast messages to multiple groups

socket.7

Michael Kerrisk [Florian Weimer]

Define _GNU_SOURCE to obtain the definition of 'struct ucred'

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=572210>

==== Changes in man-pages-3.51 =====

Released: 2013-04-17, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Andreas Jaeger <aj@suse.de>

Andrew Clayton <andrew@digital-domain.net>

Brian M. Carlson <sandals@crustytoothpaste.net>

Changhee Han <ch0.han@lge.com>

Cyril Hrubis <chrubis@suse.cz>
Damien Grassart <damiengrassart@gmail.com>
David Prévot <taffit@debian.org>
Denis Barbier <bouzim@gmail.com>
Jeff Moyer <jmoyer@redhat.com>
Krzysztof Konopko <krzysztof.konopko@gmail.com>
Kyle McMartin <kyle@mcmartin.ca>
Mark H Weaver <mhw@netris.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Nicolas Hillegeer <nicolas@hillegeer.com>
Pavel Emelyanov <xemul@parallels.com>
Peter Schiffer <pschiffe@redhat.com>
Radek Pazdera <rpazdera@redhat.com>
Ralph Loader <suckfish@ihug.co.nz>
Simon Paillard <spaillard@debian.org>
The Wanderer <wanderer@fastmail.fm>

Apologies if I missed anyone!

Newly documented interfaces in existing pages

sched_rr_get_interval.2

Michael Kerrisk

Document /proc/sys/kernel/sched_rr_timeslice_ms

proc.5

Pavel Emelyanov

Document /proc/[pid]/map_files directory

This directory was added in Linux v3.3 and provides info about files being mmap-ed in a way very similar to how /proc/[pid]/fd works.

v2: Added examples of how links look like and noted dependency on kernel config option CONFIG_CHECKPOINT_RESTORE.

Michael Kerrisk

Document /proc/sys/kernel/shm_rmid_forced

capabilities.7

Michael Kerrisk

Document /proc/sys/kernel/cap_last_cap

Global changes

Various pages

Michael Kerrisk

Global fix: fix placement of word "only"

Various pages

Simon Paillard

License headers: consistent format

Various pages

Michael Kerrisk

Global fix: s/since kernel/since Linux/

Various System V IPC pages in Section 2

Michael Kerrisk

Add "System V" to .TH line and text

Make it clear that these pages relate to System V IPC,
not POSIX IPC.

Changes to individual pages

access.2

Michael Kerrisk [The Wanderer]

Clarify RETURN VALUE for F_OK

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=705293>

alarm.2

Michael Kerrisk

Correct the description of behavior when 'seconds' is 0

clone.2

Michael Kerrisk [Peter Schiffer]

Add prototype for syscall to SYNOPSIS

And further clarify the distinction between the system call
and the wrapper function in the introductory text.

Michael Kerrisk

Update feature test macro requirements

The requirements quietly changed in glibc 2.14

See also http://www.sourceware.org/bugzilla/show_bug.cgi?id=4749

Michael Kerrisk [Mike Frysinger]

Clarify differences between clone2() syscall and wrapper function

Michael Kerrisk [Mike Frysinger]

Note those architectures where the sys_clone argument order differs

Michael Kerrisk [Mike Frysinger]

Add short subsection noting that blackfin, m68k, and sparc are different

Michael Kerrisk

Move clone2() text to subsection in description

The description of ia64 clone2() should follow the discussion of the raw system call interface.

Michael Kerrisk

Change subhead for ia64 discussion

getcpu.2

Michael Kerrisk

Recommend that 'tcache' should be specified as NULL nowadays

io_cancel.2

Jeff Moyer, Michael Kerrisk [Cyril Hrubis]

Improve description

io_destroy.2

Jeff Moyer

Improve description

The description was rather vague, citing a "list of I/O contexts" and stating that it "can" cancel outstanding requests. This update makes things more concrete so that the reader knows exactly what's going on.

io_getevents.2

Jeff Moyer

The 'timeout' argument is not updated

I looked back through the kernel code, and the timeout was never updated in any case. I've submitted a patch upstream to change the comment above io_getevents.

io_setup.2

Jeff Moyer

Clarify nr_events

nr_events is technically the number of completion events that can be stored in the completion ring. The wording of the man page: "capable of receiving at least nr_events" seems dubious to me, only because I worry that folks might interpret that to mean 'nr_events' total, instead of 'nr_events' concurrently.

Further, I've added information on where to find the per-user limit on 'nr_events', /proc/sys/fs/aio-max-nr. Let me know if you think that is not relevant.

listxattr.2

Michael Kerrisk

Explain use of 'size' argument

lseek.2

Michael Kerrisk [Andreas Jaeger]

`_GNU_SOURCE` must be defined to get `SEEK_DATA` and `SEEK_HOLE` definitions

See http://sourceware.org/bugzilla/show_bug.cgi?id=15312

`mmap.2`

Michael Kerrisk

Add pointers to relevant `/proc` files described in `proc(5)`

`posix_fadvise.2`

`pread.2`

`readahead.2`

`sync_file_range.2`

`truncate.2`

Michael Kerrisk

Refer to `syscall(2)` for ABI semantics on certain 32-bit architectures

Also: in `sync_file_range.2` and `posix_fadvise.2` remove description of conventional calling signature as flawed, and in `posix_fadvise.2`, de-emphasize focus on ARM, and rather phrase as a more general discussion of certain architectures.

`readdir.2`

Michael Kerrisk

`readdir(2)` doesn't exist on x86-64

`semop.2`

Michael Kerrisk

Clarify the discussion of 'semadj'

`shmctl.2`

Michael Kerrisk

Refer to `proc(5)` for description of `/proc/sys/kernel/shm_rmid_forced`

`syscall.2`

Changhee Han

Add notes that caution users when passing arguments to `syscall()`

For example, passing 'long long' on ARM-32 requires special treatment.

Mike Frysinger [Michael Kerrisk]

Document the exact calling convention for architecture system calls

Mike Frysinger [Kyle McMartin]

Add PA-RISC details under calling conventions

Michael Kerrisk [Mike Frysinger]

Refine discussion of ARM and other ABIs

`syscalls.2`

Michael Kerrisk

Update kernel version number at start of list

`umask.2`

Michael Kerrisk

SEE ALSO: [add acl\(5\)](#)

unshare.2

Michael Kerrisk

Update feature test macro requirements

The requirements quietly changed in glibc 2.14

See also http://www.sourceware.org/bugzilla/show_bug.cgi?id=4749

fopencookie.3

Michael Kerrisk [Ralph Loader]

Correct definition of `cookie_io_functions_t`

pthread_setname_np.3

Andrew Clayton

The thread argument is passed in by value

readdir.3

seekdir.3

telldir.3

Michael Kerrisk

Eliminate the implication that these functions deal with "offsets"

The directory position dealt with by the `readdir()` and `friends` is not a simple file offset in modern file systems. Typically, it is some kind of cookie value. Add text and make other changes to these pages to eliminate the implication that this is an offset, and warn the reader that directory positions should be treated strictly as opaque values.

In the process, rename the 'offset' argument of `seekdir(3)` to 'loc', and add some text to `readdir(3)` to note that the 'd_off' field is the same value returned by `telldir(3)` at the current directory position.

See also <https://lwn.net/Articles/544298/>

scalb.3

Mark H Weaver

Fix prototypes for `scalbf()` and `scalbl()`

sched_getcpu.3

Michael Kerrisk

Update feature test macro requirements

The requirements quietly changed in glibc 2.14

See also http://www.sourceware.org/bugzilla/show_bug.cgi?id=4749

ualarm.3

Michael Kerrisk [Nicolas Hillegeer]

Add note on the behavior when 'usecs' is zero

POSIX.1-2001 does not specify the behavior in this case and no other system that I checked documented the behavior.

Probably, most or all systems do what Linux does in this case: cancel any pending alarm, just as alarm(0) does.

Add that info in NOTES.

elf.5

Mike Frysinger

Add byte positions for all EI_XXX fields

When describing e_ident, most of the EI_XXX defines mention the exact byte number. This is useful when manually hacking an ELF with a hex editor. However, the last few fields don't do this, which means you have to count things up yourself.

Add a single word to each so you don't have to do that.

proc.5

Michael Kerrisk

Refer to sched_rr_get_interval(2) for info on sched_rr_timeslice_ms

Since Linux 3.9, /proc/sys/kernel/sched_rr_timeslice_ms can be used to change the SCHED_RR quantum.

Michael Kerrisk

SEE ALSO: Add sysctl(8)

Krzysztof Konopko

Simplify the example of printing out environ

The binutils package contains a very handy utility to print out null-byte delimited strings from a file. This can replace a rather complex expression with cat(1) provided as an example for printing out /proc/[pid]/environ.

Michael Kerrisk

Update /proc/PID/maps example

Update to 64-bit example that includes "[heap]", "[stack], and "[vdso]"

Michael Kerrisk

Formatting fixes for /proc/PID/maps

Mike Frysinger

Document the "pathname" field of /proc/PID/maps

Michael Kerrisk

Add reference to capabilities(7) for /proc/sys/kernel/cap_last_cap

Michael Kerrisk

/proc/PID/maps: add a reference to mmap(2)

ip.7

Radek Pazdera

Document IP_MULTICAST_ALL

This commit adds documentation for the IP_MULTICAST_ALL socket option.

The option was added to the Linux kernel in 2.6.31:

Author Nivedita Singhvi <niv@us.ibm.com>
Commit f771bef98004d9d141b085d987a77d06669d4f4f

The description is based on a previous one [3] posted by the original author of the code -- Nivedita, but it is slightly re-worded.

I tested it myself and it works as described.

References:

- [1] http://lxr.free-electrons.com/source/net/ipv4/ip_sockglue.c#L972
- [2] <http://lxr.free-electrons.com/source/net/ipv4/igmp.c#L2267>

units.7

Brian M. Carlson

units should use an actual μ

The units(7) man page uses an ASCII u in place of the actual Greek letter mu. Since we're in the twenty-first century, with UTF-8-compatible terminals and terminal emulators, we should use the actual letter μ instead of an ASCII approximation.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=704787>

===== Changes in man-pages-3.52 =====

Released: 2013-07-04, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Adrian Bunk <bunk@kernel.org>

Simone Piccardi <piccardi@truelite.it>
Simon Paillard <spaillard@debian.org>
Vince Weaver <vincent.weaver@maine.edu>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

Newly documented interfaces in existing pages

perf_event_open.2

Vince Weaver

Add PERF_IOC_FLAG_GROUP documentation

The perf_event_open() ENABLE/DISABLE/RESET ioctls can take an argument, PERF_IOC_FLAG_GROUP. This wasn't documented at all until about a year ago (despite the support being there from the beginning) so I missed this when initially writing the man page.

socket.7

Pavel Emelyanov, Michael Kerrisk

Document SO_PEEK_OFF option

Since Linux 3.4 there appeared an ability to specify the offset in bytes from which the data will be MSG_PEEK-ed. Describe this socket option in the socket(7) page, where all the other socket options are described.

Global changes

Various pages

Michael Kerrisk

Convert inline formatting (`\fX...\fP`) to dot-directive formatting

readdir.2

asprintf.

getline.3

getlogin.3

pthread_setname_np.3

readdir.3

strerror.3

Michael Kerrisk [Jon Grant]

Clarify that terminating null byte is `'\0'`

Changes to individual pages

execve.2

Peter LaDow

Add `envp` to the Linux notes about NULL pointers

During the review of static analysis results, we discovered a functional, but non-portable, use of `execve()`. For example:

```
char *cmd[] = { "/path/to/some/file", NULL };
execve(cmd[0], cmd, NULL);
```

The call succeeds. Yet, the static analysis tool (rightly) pointed out that `envp` could be dereferenced. But digging into `glibc` and the kernel, it appears that like `argv`, `envp` when NULL is treated as if it were an empty list.

So, to clear things up, I'm submitting this patch to update the man page to indicate that `envp` is treated like `argv`.

fallocate.2

Michael Kerrisk

RETURN VALUE: mention that `'errno'` is set on error

io_setup.2

Cyril Hrubis [Jeff Moyer]

Clarify the `nr_events` parameter

Currently the `io_setup.2` man page describes what the kernel really does, i.e., that the resulting context may be able to hold more than the `'nr_event's` operations because the memory allocated in kernel is rounded to be multiple of page size.

It is better not to expose this implementation detail and

simply state that the resulting context is suitable for
'nr_events' operations.

perf_event_open.2

Vince Weaver

Clarify the perf_event_open() wakeup_events/wakeup_watermark fields

Clarify the perf_event_open() wakeup_events/wakeup_watermark fields a bit, based on info from kernel commit cfeb1d90a1b1.

Vince Weaver

Update to match the Linux 3.10 release

This patch updates the perf_event_open() documentation to include new interfaces added in the 3.10 kernel.

It also documents a few [To be documented] instances left over from the 3.7 kernel.

Vince Weaver

Small correction to description of 'flags' argument

prctl.2

Michael Kerrisk

Note equivalents of PR_SET_NAME

pthread_setname_np() and pthread_getname_np() and /proc/self/task/TID/comm provide access to the same attribute.

pread.2

Michael Kerrisk []

pread() and pwrite() are especially useful in multithreaded applications

recv.2

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

semctl.2

Michael Kerrisk [Simone Piccardi]

'sem_nsems' is 'unsigned long' since Linux 2.4

shmget.2

Michael Kerrisk

Rewrite RETURN VALUE and mention that 'errno' is set on error

sigaction.2

Michael Kerrisk [Brian Norris]

RETURN VALUE: mention that 'errno' is set on error

signal.2

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

sigpending.2

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

sigprocmask.2

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

sigsuspend.2

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

syscall.2

Mike Frysinger

Document s390/s390x calling convention

a64l.3

Peng Haitao

ATTRIBUTES: Note function that is not thread-safe

The function l64a() is not thread safe.

abs.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions abs(), labs(), llabs() and imaxabs() are thread-safe.

aio_error.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function aio_error() is thread safe.

aio_return.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function aio_return() is thread safe.

alloca.3

Adrian Bunk

Correct information on getting non-inlined version with gcc+glibc

- remove the incorrect information that -fno-builtin would help
- add -std=c11 to the list of strict options
- emphasize more that both the gcc option and not including alloca.h are needed
- add the #ifdef from the glibc alloca.h to make the situation clearer

bindresvport.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

Before glibc 2.17, bindresvport() is not thread-safe.

Since glibc 2.17, it is thread-safe, the patch can refer to URL:

<http://sourceware.org/git/?p=glibc.git;a=commit;h=f6da27e53695ad1cc0e2a9490358decbbdff5e5>

canonicalize_file_name.3

Michael Kerrisk

Put CONFORMING TO section in right location

catgets.3

Michael Kerrisk [Jon Grant]

Clarify that null byte is '\0'

ceil.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions ceil(), ceilf() and ceill() are thread safe.

cimag.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions cimag(), cimagf() and cimagl() are thread safe.

clock_getcpuclockid.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function clock_getcpuclockid() is thread safe.

conj.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions conj(), conjf() and conjl() are thread safe.

crypt.3

Peng Haitao

ATTRIBUTES: Note function that is not thread-safe

The function crypt() is not thread safe.

ctermid.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function ctermid() is thread safe with exceptions.

dirfd.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

drand48.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

The functions drand48(), erand48(), lrand48(), nrand48(), mrand48(), jrand48(), srand48(), seed48() and lcong48() are not thread safe.

ecvt.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

The functions ecvt() and fcvt() return a string located in a static buffer which is overwritten by the next call to the functions, so they are not thread-safe.

encrypt.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

The functions encrypt() and setkey() are not thread safe.

ether_aton.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

The functions ether_aton() and ether_ntoa() are not thread safe.

fcloseall.3

Peng Haitao

ATTRIBUTES: Note function that is not thread-safe

The function fcloseall() is not thread safe.

ferror.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions ferror(), clearerr(), feof() and fileno() are thread safe.

fgetgrent.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

fgetpwent.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

fgetwc.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

fmtmsg.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

Before glibc 2.16, fmtmsg() is not thread-safe.

Since glibc 2.16, it is thread-safe, the patch can refer to URL:

<http://sourceware.org/git/?p=glibc.git;a=commit;h=7724defcf8873116fe4efab256596861eef21a94>

fputwc.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

getdate.3

Peng Haitao

ATTRIBUTES: Note functions that are and aren't thread-safe

getgrent.3

Peng Haitao

ATTRIBUTES: Note function that is not thread-safe

The function getgrent() is not thread safe.

getgrnam.3

Peng Haitao

ATTRIBUTES: Note functions that are and aren't thread-safe

getline.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

getlogin.3

Peng Haitao

ATTRIBUTES: Note function that is not thread-safe

The function getlogin() is not thread safe.

The function cuserid() is thread-safe with exceptions.

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

getpass.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

getpwent.3

Peng Haitao

ATTRIBUTES: Note function that is not thread-safe

The function getpwent() is not thread safe.

getpwnam.3

Peng Haitao

ATTRIBUTES: Note functions that are and aren't thread-safe

getspnam.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

gettyent.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

getusershell.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

The functions getusershell(), setusershell() and endusershell() are not thread safe.

getutent.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

hsearch.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

hsearch.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

The functions hsearch(), hcreate() and hdestroy() are not thread-safe.

localeconv.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

The function localeconv() returns a pointer to a structure which might be overwritten by subsequent calls to localeconv() or by calls to setlocale(), so it is not thread-safe.

Peng Haitao

Add RETURN VALUE section

malloc_info.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

mblen.3

Peng Haitao

ATTRIBUTES: Note function that is not thread-safe

The function mblen() is not thread safe.

mbrlen.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `mbrlen()` is thread safe with exceptions.

`mbrtowc.3`

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `mbrtowc()` is thread safe with exceptions.

`mktemp.3`

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

`modf.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `modf()`, `modff()` and `modfl()` are thread safe.

`popen.3`

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

`pthread_attr_setinheritsched.3`

Michael Kerrisk

Note the scheduling attributes affected by this function

`pthread_attr_setschedparam.3`

`pthread_attr_setschedpolicy.3`

`pthread_attr_setscope.3`

Michael Kerrisk [Manuel Traut, Siddhesh Poyarekar]

The inherit-scheduler attribute must be set to `PTHREAD_EXPLICIT_SCHED`

In order for the attributes set by these functions to have an effect, the caller must use `pthread_attr_setinheritsched(3)` to set the inherit-scheduler attribute of the attributes object to `PTHREAD_EXPLICIT_SCHED`.

`ptsname.3`

Peng Haitao

ATTRIBUTES: Note function that is not thread-safe

The function `ptsname()` is not thread safe.

`putenv.3`

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

`putpwent.3`

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

qecvt.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe
The functions qecvt() and qfcvt() are not thread-safe.

random.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

Michael Kerrisk

Add EINVAL error for setstate()

Michael Kerrisk

BUGS: initState() does not return NULL on error

http://sourceware.org/bugzilla/show_bug.cgi?id=15380

random_r.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

readdir.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

The data returned by readdir() may be overwritten by subsequent calls to readdir() for the same directory stream, so it is not thread-safe.

re_comp.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

The functions re_comp() and re_exec() are not thread safe.

rexec.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

The functions rexec() and rexec_af() are not thread safe.

round.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions round(), roundf() and roundl() are thread safe.

scalbn.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions scalbn(), scalbnf(), scalbnl(), scalbln(), scalblnf() and scalblnl() are thread safe.

scandir.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

siginterrupt.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

signbit.3

Peng Haitao

ATTRIBUTES: Note macro that is thread-safe

The macro signbit() is thread safe.

sigsetops.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

stdio_ext.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

The functions __fbufsize(), __fpending(), __fpurge() and __fsetlocking() are not thread safe.

strdup.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

strerror.3

Peng Haitao

ATTRIBUTES: Note function that is not thread-safe

The function strerror() is not thread safe.

strftime.3

Michael Kerrisk

Clarify details of return value

Michael Kerrisk

BUGS: 'errno' is not set if the result string would exceed 'max' bytes

strtok.3

Peng Haitao

ATTRIBUTES: Note function that is not thread-safe

The function strtok() is not thread safe.

Michael Kerrisk [Georg Sauthoff]

Add more detail on the operation of strtok()

Add a number of missing details on the operation of strtok()

tempnam.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

timegm.3

Jérémie Galarneau

copy the string returned by getenv()

The example of a portable version of timegm() uses the string returned by getenv() after calling setenv() on the same environment variable. The tz string may be invalid as per getenv.3:

"The string pointed to by the return value of getenv() may be statically allocated, and can be modified by a subsequent call to getenv(), putenv(3), setenv(3), or unsetenv(3)."

tmpnam.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function tmpnam() is thread safe with exceptions.

trunc.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions trunc(), truncf() and trunci() are thread safe.

ttyname.3

Michael Kerrisk

ATTRIBUTES: Note functions that are and aren't thread-safe

ttyslot.3

Michael Kerrisk

ATTRIBUTES: Note functions that are not thread-safe

usleep.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

wcsdup.3

Michael Kerrisk

RETURN VALUE: mention that 'errno' is set on error

core.5

Michael Kerrisk

Implicitly adding the PID to a core filename was dropped in 2.6.27

proc.5

Michael Kerrisk

Document /proc/[pid]/fd/ anon_inode symlinks

Mike Frysinger

Document /proc/[pid]/fd/ symlinks a bit more
Describe the type:[inode] syntax used in this dir

bootparam.7

Michael Kerrisk [Dan Jacobson]

Remove outdated text on LILO and LoadLin

Strike the discussion of LILO and LoadLin, which
are long obsolete, and make a brief mention of GRUB.

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=604019>

Regid

Remove mention of the deprecated rdev(8)

The deprecated rdev(8) command was removed from util-linux in 2010.

See <https://git.kernel.org/?p=utils/util-linux/util->

[linux.git;a=commit;h=a3e40c14651fccf18e7954f081e601389baefe3f0](https://git.kernel.org/?p=utils/util-linux/util-linux.git;a=commit;h=a3e40c14651fccf18e7954f081e601389baefe3f0)

Andrea Remondini

Document the 'resume' boot parameter

inotify.7

Michael Kerrisk [Jon Grant]

Clarify that null byte is '\0'

iso_8859-2.7

Eric S. Raymond

Remove incorrect reference to nonexistent groff glyph `\[shc]`

The reference incorrectly attempted to duplicate an
actual soft hyphen (hex 0xad) just before it in the file.

man-pages.7

Peng Haitao

Add description of "ATTRIBUTES"

"ATTRIBUTES" section can mention thread safety,
cancellation safety, and `async-cancel-safety`.

socket.7

Michael Kerrisk

Note that 'optval' for socket options is an 'int' in most cases

tcp.7

Michael Kerrisk

Note that 'optval' for socket options is an 'int' in most cases

udp.7

Michael Kerrisk

Note that 'optval' for socket options is an 'int' in most cases

==== Changes in man-pages-3.53 =====

Released: 2013-07-31, Munich

Contributors

open.2

Michael Kerrisk [Geoffrey Thomas]

Remove warning that O_DIRECTORY is only for use with opendir(3)

O_DIRECTORY can also be used with, for example, O_PATH.

perf_event_open.2

Vince Weaver

Improve PERF_SAMPLE_BRANCH_STACK documentation

Vince Weaver

Fix indentation of the MMAP layout section

The indentation of the MMAP layout section wasn't quite right.

I think this improves things but I admit I'm not an expert at the

low-level indentation directives.

Vince Weaver

Update PERF_IOC_FLAG_GROUP info

It turns out PERF_IOC_FLAG_GROUP was broken from 75f937f24bd9

(in Linux 2.6.31, the initial perf_event release) until

724b6daa1 (Linux 3.4).

I've done some extensive kernel source code digging plus running tests of various kernels and I hope the info presented is accurate now.

(Patch edited somewhat by mtk.)

Vince Weaver

Improve sysfs files documentation

This improves the documentation of the various perf_event_open()-related sysfs files.

ptrace.2

Denys Vlasenko [Oleg Nesterov, Dmitry V. Levin]

If SEIZE was used, initial auto-attach stop is EVENT_STOP

For every PTRACE_O_TRACEfoo option, mention that old-style SIGSTOP is replaced by PTRACE_EVENT_STOP if PTRACE_SEIZE attach was used.

Mention the same thing again in the description of PTRACE_EVENT_STOP.

Denys Vlasenko [Oleg Nesterov, Dmitry V. Levin]

Mention that PTRACE_PEEK* libc API and kernel API are different

Denys Vlasenko [Oleg Nesterov, Dmitry V. Levin]

Clarify PTRACE_INTERRUPT, PTRACE_LISTEN, and group-stop behavior

readlink.2

Michael Kerrisk

Document use of empty 'pathname' argument

Michael Kerrisk

Change error check in example program from "< 0" to "== -1"

Chuck Coffing

Fix possible race condition in readlink.2 example

I noticed that the example in the readlink.2 man pages does error checking for a race condition that would cause the value of the symbolic link to get larger. However, it doesn't handle the opposite case, in which the value gets shorter. (The NULL terminator is always set at the old, longer offset.) This could cause the program to operate on uninitialized data.

setpgid.2

Michael Kerrisk [Graud]

s/SIGTSTP/SIGTTIN/ when discussing reads from terminal

See https://bugzilla.kernel.org/show_bug.cgi?id=60504

clog2.3

Michael Kerrisk

Note that these functions are still not present in glibc 2.17

dirfd.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function dirfd() is thread safe.

div.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions `div()`, `ldiv()`, `lldiv()` and `imaxdiv()` are thread safe.

fabs.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions `fabs()`, `fabsf()` and `fabsl()` are thread safe.

fdim.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions `fdim()`, `fdimf()` and `fdiml()` are thread safe.

fflush.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function `fflush()` is thread safe.

finite.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions `finite()`, `finitef()`, `finitel()`, `isinf()`, `isinff()`, `isinfl()`, `isnan()`, `isnanf()` and `isnansl()` are thread safe.

flockfile.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions `flockfile()`, `ftrylockfile()` and `funlockfile()` are thread safe.

floor.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions `floor()`, `floorf()` and `floorl()` are thread safe.

resolv.conf.5

Simon Paillard

Explain how to set empty domain
See <http://bugs.debian.org/463575>

capabilities.7

Michael Kerrisk

Add `open_by_handle_at(2)` under `CAP_DAC_READ_SEARCH`

inotify.7

Michael Kerrisk [Felix Schulte]

Clarify description of `IN_MOVED_FROM` and `IN_MOVED_TO`

man-pages.7

Michael Kerrisk

DESCRIPTION should note versions for new interface features or behavior

udp.7

Benjamin Poirier

Add missing #include directive

Using the UDP_CORK socket option documented in udp.7 requires including <netinet/udp.h>.

ld.so.8

Michael Kerrisk

Rework rpath token expansion text

Michael Kerrisk

Describe \$PLATFORM rpath token

Michael Kerrisk

Describe \$LIB rpath token

Michael Kerrisk

Document LD_BIND_NOT

Michael Kerrisk [Simon Paillard]

Add reference to pthreads(7) in discussion of LD_ASSUME_KERNEL

==== Changes in man-pages-3.54 =====

Released: 2013-09-17, Munich

Contributors

Zsbán Ambrus <ambrus@math.bme.hu>

Apologies if I missed anyone!

Newly documented interfaces in existing pages

ioctl_list.2

Zsbán Ambrus

Document FAT_IOCTL_GET_ATTRIBUTES

The attached patch adds four ioctls from linux/msdos_fs.h to the
ioctl_list(2) manpage.

The ioctl FAT_IOCTL_GET_ATTRIBUTES reads FAT attributes of a
file a mounted vfat file system. I tested this on Linux
2.6.33, an example script can be found at
http://www.perlmonks.com/?node_id=832623

Global changes

Various pages

Michael Kerrisk

Global fix: s/file system/filesystem/

Notwithstanding 24d01c530c5a3f75217543d02bf6712395e5f90c,

"filesystem" is the form used by the great majority of man pages outside the man-pages project and in a number of other sources, so let's go with that.

Changes to individual pages

access.2

J. Bruce Fields

Fix outdated NFS information

Note that NFS versions since version 3 support an "access" call so that the client doesn't have to guess permissions or ID mapping on its own.

(See RFC 1813 sections 1.7 and 3.3.4.)

adjtimex.2

Michael Kerrisk

SEE ALSO: Add adjtimex(8)

clock_getres.2

Michael Kerrisk [Rodrigo Campos]

Note circumstances in which "SMP" note applies.

Michael Kerrisk

Add kernel version for CLOCK_*_CPUTIME_ID

CLOCK_PROCESS_CPUTIME_ID and CLOCK_THREAD_CPUTIME_ID appeared in 2.6.12.

Michael Kerrisk

Add VERSIONS section

futex.2

Michael Kerrisk

The 'timeout' can be rounded upwards by clock granularity and also overrun

kill.2

Michael Kerrisk

Small improvements to text on historical rules for permissions

nfsservctl.2

Michael Kerrisk

Note commands that were only in Linux 2.4.x and earlier

open.2

Robert Harris

Add mmap(2) to list of calls that fail when given an O_PATH descriptor

Doug Goldstein

Add EINVAL to errors list

EINVAL can be returned by open(2) when the underlying filesystem doesn't support O_DIRECT. It is documented in the NOTES section but this patch adds it to the list of possible errors.

perf_event_open.2

Vince Weaver

PERF_SAMPLE_BRANCH_STACK updates

This started out as just adding the new perf_event_open features from Linux 3.11 (which was the addition of transactional memory defines for PERF_SAMPLE_BRANCH_STACK samples) but turned into a general cleanup of the PERF_SAMPLE_BRANCH_STACK documentation.

The main clarification is that at least one of the non-privilege values must be set or else perf_event_open() will return an EINVAL error.

Michael Kerrisk

Reorder text describing fields of 'perf_event_header' structure
Place the fields with the shorter descriptions first, to make the information easier to read.

poll.2

Michael Kerrisk

Clarify wording of 'timeout' as a "minimum" interval

sched_setaffinity.2

Michael Kerrisk [Christos Tsopokis]

Clarify that these system calls affect a per-thread attribute

sched_setparam.2

Michael Kerrisk

Clarify that this system call applies to threads (not processes)

sched_setscheduler.2

Michael Kerrisk

Clarify that this system call applies to threads (not processes)

select.2

Michael Kerrisk [G.raud]

Clarify wording of 'timeout' as a "minimum" interval

setfsuid.2

Michael Kerrisk [Oleg Nesterov]

Clarify description of return value

More clearly describe the weirdness in the return value of this system call, and note the problems it creates in BUGS

Michael Kerrisk

Correct header file in SYNOPSIS

Michael Kerrisk

Refer to setsuid(2) for an explanation of why setfsgid() is obsolete

Michael Kerrisk

Wording improvements

setsuid.2

Michael Kerrisk [Oleg Nesterov]

Clarify description of return value

More clearly describe the weirdness in the return value of this system call, and note the problems it creates in BUGS

Michael Kerrisk [Chen Gang]

Clarify historical details and note that setsuid() is obsolete

Michael Kerrisk

Wording improvements

Michael Kerrisk

Correct header file in SYNOPSIS

sigwaitinfo.2

Michael Kerrisk

Clarify wording of 'timeout' as a "minimum" interval

syscall.2

Johan Erlandsson

Add missing argument in example

Johan Erlandsson

Correct registers for arm/EABI

Registers was off by one.

Reference:

<http://www.arm.linux.org.uk/developer/patches/viewpatch.php?id=3105/4>

See also:

<http://peterdn.com/post/e28098Hello-World!e28099-in-ARM-assembly.aspx>

<https://wiki.debian.org/ArmEabiPort>

http://en.wikipedia.org/wiki/Calling_convention#ARM

wait.2

Michael Kerrisk [Hannes Landeholm]

Add details on the fifth argument provided by raw waitid() system call

See https://bugzilla.kernel.org/show_bug.cgi?id=60744

clock.3

Michael Kerrisk

clock() switched from using times(2) to clock_gettime() in glibc 2.18

drand48_r.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions drand48_r(), erand48_r(), lrand48_r(),

`nrand48_r()`, `mrnd48_r()`, `jrnd48_r()`, `srnd48_r()`, `seed48_r()`,
and `lcong48_r()` are thread safe.

`fma.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `fma()`, `fmaf()` and `fmal()` are thread safe.

`fmax.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `fmax()`, `fmaxf()` and `fmaxl()` are thread safe.

`fmin.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `fmin()`, `fminf()` and `fminl()` are thread safe.

`fpclassify.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `fpclassify()`, `isfinite()`, `isnormal()`, `isnan()`, and
`isinf()` are thread safe.

`frexp.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `frexp()`, `frexpf()` and `frexpl()` are thread safe.

`gethostbyname.3`

Michael Kerrisk [Jon Grant]

`gai_strerror()` is the modern replacement for `herror()` and `hstrerror()`

Michael Kerrisk

Update feature test macro requirements for `herror()` and `hstrerror()`

Michael Kerrisk

Add feature test macro requirements for `h_errno`

`ilogb.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `ilogb()`, `ilogbf()` and `ilogbl()` are thread safe.

`ldexp.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `ldexp()`, `ldexpf()` and `ldexpl()` are thread safe.

`lrint.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions lrint(), lrintf(), lrintl(), llrint(), llrintf(), and llrintl() are thread safe.

lround.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions lround(), lroundf(), lroundl(), llround(), llroundf() and llroundl() are thread safe.

lseek64.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function lseek64() is thread safe.

mbsinit.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function mbsinit() is thread safe.

nextafter.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions nextafter(), nextafterf(), nextafterl(), nexttoward(), nexttowardf() and nexttowardl() are thread safe.

posix_memalign.3

Michael Kerrisk [Will Newton]

'errno' is indeterminate after a call to posix_memalign()

Michael Kerrisk [Will Newton]

Clarify wording on "return value" when size==0

printf.3

Christopher Hall

Correctly describe the meaning of a negative precision

The printf(3) manpage says that a negative precision is taken to be zero, whereas printf(3p) says that a negative precision is taken as if the precision were omitted. glibc agrees with the latter (POSIX) specification.

Test code:

```
printf("%f\n",42.0); // "42.000000"  
printf("%. *f\n",0,42.0); // "42"  
printf("%. *f\n",-1,42.0); // "42.000000"
```

This patch corrects the explanation to match what actually happens.

rewinddir.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function rewinddir() is thread safe.

rint.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions nearbyint(), nearbyintf(), nearbyintl(), rint(),
rintf() and rintl() are thread safe.

seekdir.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function seekdir() is thread safe.

telldir.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function telldir() is thread safe.

wctomb.3

Peng Haitao

ATTRIBUTES: Note function that is not thread-safe
The function wctomb() is not thread safe.

wavelan.4

Michael Kerrisk [Elie De Brauwert]

This driver disappeared in 2.56.35

dir_colors.5

Michael Kerrisk [Stas]

Add various synonyms

See <http://bugs.debian.org/553477>

Simon Paillard [Stas]

Add keywords SUID, SGID, STICKY, STICKY_OTHER_WRITABLE, OTHER_WRITABLE

See <http://bugs.debian.org/553477>

See ls.c and dircolors.c in coreutils

proc.5

Peter Schiffer

Document /proc/[pid]/io file

Attempt to document fields in the /proc/[pid]/io file, based on
the Documentation/filesystems/proc.txt. The text will probably
need some grammar corrections.

Michael Kerrisk [Marko Myllynen]

/proc/sys/fs/inode-max went away in Linux 2.4

Also, the 'preshrink' field in /proc/sys/fs/inode-state became a dummy value in Linux 2.4.

See https://bugzilla.kernel.org/show_bug.cgi?id=60836

Michael Kerrisk [A. Costa]

Note block size used by /proc/partitions

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=666972>

Michael Kerrisk

Add rationale on drop_caches and note that it can hurt performance

See also <http://lwn.net/Articles/562211/>

bootparam.7

Michael Kerrisk [Eugen Dedu]

Remove "lilo" entries from SEE ALSO

See <http://bugs.debian.org/604019>

inotify.7

Michael Kerrisk

SEE ALSO: add inotifywait(1) and inotifywatch(1)

ip.7

Simon Paillard

IP_MULTICAST_IF setsockopt recognizes struct mreq (compatibility)

Kernel added compatibility only recently in

3a084ddb4bf299a6e898a9a07c89f3917f0713f7

See: <http://bugs.debian.org/607979>

standards.7

Michael Kerrisk

Add mention of SUSv4-TC1 (POSIX.1-2013)

==== Changes in man-pages-3.55 =====

Released: 2013-12-12, Christchurch

janh <a0vhv@t-online.de>

Apologies if I missed anyone!

Global changes

assert.3

assert_perror.3

rexec.3

rpc.3

Michael Kerrisk [Jon Grant]

Reword a sentence to use more gender-neutral language

Changes to individual pages

execve.2

Michael Kerrisk

'arg...' for interpreter scripts starts with argv[1]

fallocate.2

Christoph Hellwig

Clarify the zeroing behavior

fallocate() zeroes only space that did not previously contain
data, but leaves existing data untouched.

futex.2

Rodrigo Campos

Fix link to Rusty's futex example library

When I asked to webmaster@kernel.org, Konstantin Ryabitsev answered that the ".nl." is "an obsolete scheme and really should be changed to just ftp.kernel.org".

getgroups.2

Michael Kerrisk

Note that NGROUPS_MAX is defined in <limits.h>

Michael Kerrisk

Clarify that `sysconf(_SC_NGROUPS_MAX)` is a run-time technique

Michael Kerrisk

Document `/proc/sys/kernel/ngroups_max`

ioctl.2

Michael Kerrisk [KOSAKI Motohiro, David Gibson]

'request' argument is typed as 'unsigned long' in glibc

See https://bugzilla.kernel.org/show_bug.cgi?id=42705

perf_event_open.2

Vince Weaver

Linux 3.12 rdpmc/mmap

It turns out that the `perf_event` mmap page `rdpmc/time` setting was broken, dating back to the introduction of the feature. Due to a mistake with a bitfield, two different values mapped to the same feature bit.

A new somewhat backwards compatible interface was introduced in Linux 3.12. A much longer report on the issue can be found here:

<https://lwn.net/Articles/567894/>

Vince Weaver

Linux 3.12 adds `PERF_SAMPLE_IDENTIFIER`

A new `PERF_SAMPLE_IDENTIFIER` sample type was added in Linux 3.12.

Vince Weaver

E2BIG documentation

The following documents the E2BIG error return for `perf_event_open()`.

I actually ran into this error the hard way and it took me half a day to figure out why my `->size` value was changing.

Vince Weaver

Linux 3.12 adds `PERF_EVENT_IOC_ID`

A new `perf_event` related `ioctl`, `PERF_EVENT_IOC_ID`, was added in Linux 3.12.

Vince Weaver

`PERF_COUNT_SW_DUMMY` support

Support for the `PERF_COUNT_SW_DUMMY` event type was added in

Linux 3.12.

Vince Weaver [Andreas Sandberg]

PERF_EVENT_IOC_PERIOD update

The PERF_EVENT_IOC_PERIOD ioctl was broken until 2.6.36,
and it turns out that the ARM architecture has some
differing behavior too.

pipe.2

Trevor Bramwell

Fix error in example program

poll.2

Michael Kerrisk [Paolo Bonzini]

Clarify meaning of events==0

events==0 does not mean that revents is always returned as
zero. The "output only" events (POLLHUP, POLLERR, POLLNVAL)
can still be returned.

See https://bugzilla.kernel.org/show_bug.cgi?id=61911

readlink.2

Michael Kerrisk [Yuanhang Zheng]

Fix typo in error message in example program

recv.2

Michael Kerrisk

Remove out-of-date statement that UNIX domain does not support MSG_TRUNC
Should have removed that sentence as part of
commit a25601b48b822eb1882ae336574b8d062a17e564

sched_get_priority_max.2

Michael Kerrisk

Add SCHED_IDLE to discussion

send.2

Michael Kerrisk

RETURN VALUE: these calls return number of bytes (not characters) sent

setreuid.2

Michael Kerrisk

Small clarification to description of when saved set-user-ID is set

sigpending.2

Michael Kerrisk

Note treatment of signals that are blocked *and* ignored

stat.2

Michael Kerrisk

Note filesystem support for nanosecond timestamps

Add some detail on which native filesystems do and don't support nanosecond timestamps.

Michael Kerrisk

Cosmetic reworking of timestamp discussion in NOTES

Michael Kerrisk [Yang Yang]

Update discussion of nanosecond timestamps

The existing text describes the timestamp fields as 'time_t' and delegates discussion of nanosecond timestamps under NOTES. Nanosecond timestamps have been around for a while now, and are in POSIX.1-2008, so reverse the orientation of the discussion, putting the nanosecond fields into DESCRIPTION and detailing the historical situation under NOTES.

symlink.2

Michael Kerrisk

Further fine tuning of argument names

Follow-up to f2ae6dde0c68448bec986d12fe32268a2c98bfd9

See https://sourceware.org/bugzilla/show_bug.cgi?id=16073

Michael Kerrisk [Fabrice Bauzac]

Give arguments of symlink() more meaningful names

adjtime.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function adjtime() is thread safe.

alloca.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function alloca() is thread safe.

asinh.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions asinh(), asinhf() and asinhl() are thread safe.

atan.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions atan(), atanf() and atanl() are thread safe.

atof.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function atof() is thread safe with exceptions.

atoi.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions

The functions atoi(), atol() and atoll() are thread safe with exceptions.

bcmp.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function bcmp() is thread safe.

bcopy.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function bcopy() is thread safe.

bsd_signal.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function bsd_signal() is thread safe.

bzero.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function bzero() is thread safe.

cbrt.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions cbrt(), cbrtf() and cbrtl() are thread safe.

copysign.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions copysign(), copysignf() and copysignl() are thread safe.

cos.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions cos(), cosf() and cosl() are thread safe.

cproj.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions cproj(), cprojf() and cprojl() are thread safe.

creal.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions `creal()`, `crealf()` and `creall()` are thread safe.

daemon.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function `daemon()` is thread safe.

des_crypt.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions `ecb_crypt()`, `cbc_crypt()` and `des_setparity()` are thread safe.

difftime.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function `difftime()` is thread safe.

dysize.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function `dysize()` is thread safe.

erf.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions `erf()`, `erff()` and `erfl()` are thread safe.

erfc.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions `erfc()`, `erfcf()` and `erfc1()` are thread safe.

euidaccess.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions `euidaccess()` and `eaccess()` are thread safe.

expm1.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions `expm1()`, `expm1f()` and `expm1l()` are thread safe.

fexecve.3

Michael Kerrisk

POSIX.1-2008 specifies `fexecve()`

Michael Kerrisk

Explain the use and rationale of `fexecve()`

ftime.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `ftime()` is thread safe.

ftok.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `ftok()` is thread safe.

ftw.3

Michael Kerrisk

`nftw()` visits directories with `FTW_D` if `FTW_DEPTH` was not specified

Michael Kerrisk

Explain probable cause of `FTW_NS`

futimes.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `futimes()` and `lutimes()` are thread safe.

getaddrinfo.3

Michael Kerrisk

Explain one use case for `AI_ADDRCONFIG`

Michael Kerrisk

Highlight difference in `ai_flags` when `hints==NULL`

NOTES already described how `glibc` differs from `POSIX`.

Add a pointer to that text from the point in `DESCRIPTION` where `hints==NULL` is discussed.

kcmp.3

Shawn Landden

Reword slightly awkward section

malloc.3

Greg Price

Scale back promises of alignment

It's not true that the return value is suitably aligned for "any variable"; for example, it's unsuitable for a variable like

```
float *x __attribute__((__vector_size__(32)));
```

which requires 32-byte alignment. Types like this are defined in

<`avxintrin.h`>, and with 16-byte alignment in <`emmintrin.h`> and

<`xmmintrin.h`>, so the application programmer need not even know

that a `vector_size` attribute has been applied.

On an x86 architecture, a program that loads from or stores to a

pointer with this type derived from malloc can crash because GCC generates an aligned load/store, like MOVDQA.

The C99 standard (TC3, as of N1256) does say the return value is suitably aligned for "any type of object". The C11 standard (as of N1570) revises this to any type with "fundamental alignment", which means an alignment "supported by the implementation in all contexts", which I suppose tautologically includes aligning malloc/realloc return values.

The actual behavior of current glibc malloc is to align to the greater of $2 * \text{sizeof}(\text{size}_t)$ and `__alignof__` (long double), which may be one bit greater than this commit promises.

mq_receive.3

Michael Kerrisk [janh]

`msg_len` must be greater than *or equal to* `mq_msgsize`

See https://bugzilla.kernel.org/show_bug.cgi?id=64571

setenv.3

Michael Kerrisk

Clarify that `setenv()` returns success in the `overwrite==0` case

sigsetops.3

Michael Kerrisk [Robert P. J. Day]

Add 'const' to `sigisemptyset()`, `sigorset()`, `sigandset()` declarations

Michael Kerrisk

Rework text describing `sigisemptyset()`, `sigorset()`, and `sigandset()`

statvfs.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `statvfs()` and `fstatvfs()` are thread safe.

stdarg.3

Peng Haitao

ATTRIBUTES: Note macros that are thread-safe

The macros `va_start()`, `va_arg()`, `va_end()` and `va_copy()` are thread safe.

termios.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `tcgetattr()`, `tcsetattr()`, `tcsendbreak()`, `tcdrain()`, `tcflush()`, `tcflow()`, `cfmakeraw()`, `cfgetispeed()`, `cfgetospeed()`, `cfsetispeed()`, `cfsetospeed()` and `cfsetspeed()` are thread safe.

ungetwc.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function ungetwc() is thread safe.

unlockpt.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function unlockpt() is thread safe.

usleep.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function usleep() is thread safe.

wcpcpy.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function wcpcpy() is thread safe.

wscasecmp.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function wscasecmp() is thread safe with exceptions.

wscat.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function wscat() is thread safe.

wchr.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function wchr() is thread safe.

wscmp.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function wscmp() is thread safe.

wscopy.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function wscopy() is thread safe.

wscspn.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wscspn()` is thread safe.

`wcslen.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wcslen()` is thread safe.

`wcsncasecmp.3`

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function `wcsncasecmp()` is thread safe with exceptions.

`wcsncat.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wcsncat()` is thread safe.

`wcsncmp.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wcsncmp()` is thread safe.

`wcsncpy.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wcsncpy()` is thread safe.

`wcsnlen.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wcsnlen()` is thread safe.

`wcspbrk.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wcspbrk()` is thread safe.

`wcsrchr.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wcsrchr()` is thread safe.

`wcsspn.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `wcsspn()` is thread safe.

`wcsstr.3`

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function wcsstr() is thread safe.

wcstoimax.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions

The functions wcstoimax() and wctoumax() are thread safe with exceptions.

wcstok.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function wcstok() is thread safe.

wcswidth.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function wcswidth() is thread safe with exceptions.

wctrans.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function wctrans() is thread safe with exceptions.

wctype.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function wctype() is thread safe with exceptions.

wcwidth.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function wcwidth() is thread safe with exceptions.

wmemchr.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function wmemchr() is thread safe.

wmemcmp.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function wmemcmp() is thread safe.

wmemcpy.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function wmemcpy() is thread safe.

wmemmove.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function wmemmove() is thread safe.

wmemset.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function wmemset() is thread safe.

tty_ioctl.4

Michael Kerrisk [Liu Jiaming]

Note that 'arg' should be 0 in the usual case when using TIOCSCTTY

Michael Kerrisk

Rework text on root to discuss just in terms of capabilities

proc.5

Michael Kerrisk

Document /proc/sys/kernel/ngroups_max

capabilities.7

Michael Kerrisk

Fix 2 version numbers under "Effect of user ID changes on capabilities"

feature_test_macros.7

Michael Kerrisk

Add _ISOC11_SOURCE to example program

tcp.7

Michael Kerrisk

Fix (nontrivial) wordo in discussion of MSG_TRUNC
s/MSG_PEEK/MSG_TRUNC/

ld.so.8

Michael Kerrisk [Alfred Agrell]

Fix crufty wording in one sentence

==== Changes in man-pages-3.56 =====

Released: 2014-01-11, Christchurch

In memory of Doris Church (1939-2013)

Apologies if I missed anyone!

New and rewritten pages

fgetc.3
gets.3
David Malcolm

Split gets(3) to isolate unsafe gets(3) to a page on its own
Currently man3/gets.3 documents various safe I/O functions, along
with the toxic "gets" function.

At the risk of being melodramatic, this strikes me as akin to
storing rat poison in a food cabinet, in the same style of
packaging as the food, but with a post-it note on it saying
"see warnings below".

I think such "never use this" functions should be quarantined
into their own manpages, rather than listing them alongside
sane functions.

The attached patch does this for "gets", moving the documentation
of the good functions from man3/gets.3 into man3/fgetc.3,
updating the SO links in the relevant functions to point at the
latter.

It then rewrites man3/gets.3 to spell out that "gets" is toxic
and should never be used (with a link to CWE-242 for good
measure).

Michael Kerrisk [Andre Majorel]
Tweaks to David Malcolm's patch

vdso.7

Mike Frysinger
New page documenting the vDSO mapped into each process by the kernel

Newly documented interfaces in existing pages

reboot.2

Elie De Brauwer
Document LINUX_REBOOT_SW_SUSPEND

New and changed links

fgets.3

getc.3

getchar.3

ungetc.3

Michael Kerrisk
Adjust links to gets(3) to point to fgetc(3)

Global changes

Various pages

Michael Kerrisk

Global fix of "NULL pointer"

Change "NULL pointer" to "NULL" or null pointer".

POSIX uses the term "null pointer", not "NULL pointer".

Various pages

Michael Kerrisk

Stylistic changes to code example

For ease of reading, don't embed assignments inside if().

Various pages

Michael Kerrisk

Replace uses of "i.e.," in main text with "that is" or similar

Usual man-pages style is to use "i.e." only within
parenthetical expressions.

Various pages

Michael Kerrisk

Replace uses of "e.g." in main text with "for example" or similar

Usual man-pages style is to use "e.g." only within
parenthetical expressions.

Various pages

Michael Kerrisk

Add "Program source" subheading under EXAMPLE

Various pages

Michael Kerrisk

Add "static" to global variables and functions in example program

Changes to individual pages

clock_getres.2

Michael Kerrisk [Nadav Har'El]

Improve description of CLOCK_PROCESS_CPUTIME_ID

See https://bugzilla.kernel.org/show_bug.cgi?id=67291

close.2

Michael Kerrisk [P?draig Brady]

Note that errors from close() should be used only for diagnosis

In particular, retrying after EINTR is a bad idea.

See <http://austingroupbugs.net/view.php?id=529>

See <http://thread.gmane.org/gmane.comp.lib.glibc.alpha/37702>

Subject: [RFC][BZ #14627] Make linux close errno to EINPROGRESS
when interrupted in signal.

execve.2

Michael Kerrisk [Marco Dione]

Add further cases to EFAULT error

See https://sourceware.org/bugzilla/show_bug.cgi?id=16402

perf_event_open.2

Vince Weaver [Sudhanshu Goswami]

Clarify issues with the disabled bit

Clarify the perf_event_open behavior with respect to the disabled
bit and creating event groups.

Vince Weaver [Sudhanshu Goswami]

Clarify issues with the exclusive bit

Warn that using the perf_event_open "exclusive" bit, while
it might seem like a good idea, might lead to all 0 results
in some common usage cases.

reboot.2

Elie De Brauwer

Mention RB_POWER_OFF

The manpage did not mention RB_POWER_OFF which is the glibc
symbolic name for LINUX_REBOOT_CMD_POWER_OFF.

```
$ cd /usr/include
```

```
$ cat x86_64-linux-gnu/sys/reboot.h | grep POWER_OFF
```

```
define RB_POWER_OFF    0x4321fedc
```

Elie De Brauwer

Add "Linux" to kernel version numbers

Michael Kerrisk

Add RB_SW_SUSPEND synonym

Michael Kerrisk

Add RB_KEXEC synonym

setpgid.2

Michael Kerrisk [Joseph S. Myers]

BSD getpgrp() and setpgrp() go away in glibc 2.19

socket.2

Michael Kerrisk [Dongsheng Song]

Remove crufty statement that AF_INET does not support SOCK_SEQPACKET
Linux AF_INET supports SOCK_SEQPACKET via SCTP.

syscall.2

Mike Frysinger

Fix ia64 registers

The original list of registers was created by confusing strace source code--this is for parsing legacy 32-bit code (which is dead and no one cares). Update the list to reflect native ia64 syscall interface.

syscall.2

syscalls.2

getauxval.3

Mike Frysinger

Add references to new vdso(7) page

utimensat.2

Michael Kerrisk

Small wording improvement for times!=NULL case

dlopen.3

Michael Kerrisk [Mike Frysinger]

Update remarks on cast needed when assigning dlsym() return value
POSIX.1-2013 eases life when casting the dlsym() return value to a
function pointer

Michael Kerrisk [Stephen Kell]

Fix description of dli_sname

See https://sourceware.org/bugzilla/show_bug.cgi?id=16262

getline.3

Michael Kerrisk [Luke Hutchison]

Correct description of how '*n' is used when '*lineptr' == NULL

See https://sourceware.org/bugzilla/show_bug.cgi?id=5468

Michael Kerrisk

Remove SEE ALSO reference to unsafe gets(3)

mcheck.3

Simon Paillard [Raphael Geissert]

typo in compiler flag

See <http://bugs.debian.org/732464>

mkstemp.3

Michael Kerrisk [Janne Blomqvist]

Better describe 'flags' that can be specified for mkostemp()

printf.3

Michael Kerrisk [Arif Zaman]

Fix memory leak in snprintf() example

See <http://stackoverflow.com/questions/19933479/snprintf-man-page-example-memory-leak>

pthread_kill.3

Michael Kerrisk [Mathieu Desnoyers]

POSIX.1-2008 removes ESRCH

POSIX.1-2001 mistakenly documented an ESRCH error, and
POSIX.1-2008 removes this error. Glibc does return
this error in cases where it can determine that a thread ID
is invalid, but equally, the use of an invalid thread ID
can cause a segmentation fault.

puts.3

Michael Kerrisk

SEE ALSO: replace reference to gets(3) with fgets(3)

scanf.3

Michael Kerrisk [Ondrej Bilka]

Improve discussion of obsolete 'a' dynamic allocation modifier

setjmp.3

Michael Kerrisk [Joseph S. Myers]

BSD setjmp() semantics go away in glibc 2.19

sigpause.3

Michael Kerrisk [Joseph S. Myers]

BSD sigpause() goes away in glibc 2.19

Michael Kerrisk

Correct feature text macro requirements

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function sigpause() is thread safe.

sigqueue.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function sigqueue() is thread safe.

sigwait.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function sigwait() is thread safe.

sin.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions sin(), sinf() and sinl() are thread safe.

sincos.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions sincos(), sincosf() and sincosl() are thread safe.

string.3

Moritz 'Morty' Strübe

Add short description of the functions

It is helpful to have a short description about what the different functions in string.h do.

Michael Kerrisk

Fixes and enhancements to Moritz Strübe's patch

strptime.3

Michael Kerrisk [Mathieu Malaterre, Simon Paillard]

Add number ranges to comments in 'tm' structure

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=729570>

Michael Kerrisk

Point to ctime(3) for more details on 'tm' structure

Michael Kerrisk

Some rewording and reorganization

strsep.3

Michael Kerrisk

Clarify description

The use of "symbols" in the existing description is confusing; it's "bytes". Other fixes as well.

strspn.3

Michael Kerrisk [Mathieu Malaterre]

Improve description in NAME

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=723659>

strstr.3

Michael Kerrisk

Clarify RETURN VALUE: s/substring/located substring/

sysv_signal.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function sysv_signal() is thread safe.

tan.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions tan(), tanf() and tanl() are thread safe.

tanh.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions tanh(), tanhf() and tanhl() are thread safe.

toascii.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function toascii() is thread safe.

toupper.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions
The functions toupper() and tolower() are thread safe with exceptions.

towctrans.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function towctrans() is thread safe.

tolower.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions
The function tolower() is thread safe with exceptions.

towupper.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions
The function towupper() is thread safe with exceptions.

ualarm.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function ualarm() is thread safe.

wcpncpy.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function wcpncpy() is thread safe.

proc.5

Michael Kerrisk [Sworddragon2]

Fix formula for CommitLimit under /proc/meminfo
See https://bugzilla.kernel.org/show_bug.cgi?id=60991

credentials.7

Michael Kerrisk

List APIs that operate on process groups

Michael Kerrisk

Add details on controlling terminal and foreground/background jobs

feature_test_macros.7

Michael Kerrisk

Document _DEFAULT_SOURCE

Michael Kerrisk [Joseph S. Myers]

From glibc 2.19, _BSD_SOURCE no longer causes __FAVOR_BSD

Starting with glibc 2.19, _BSD_SOURCE no longer causes BSD definitions to be favored in cases where standards conflict.

libc.7

Mike Frysinger

SEE ALSO: add various entries

man-pages.7

Michael Kerrisk [Mike Frysinger]

Add STYLE GUIDE section

Incorporate some of the existing material in the page into the STYLE GUIDE, and add a lot more material, mainly drawn from the "Global changes" sections in the release changelogs.

Michael Kerrisk

Add historical note on reason for use of American spelling

Michael Kerrisk [Mike Frysinger]

Various improvements to style guide

packet.7

Willem de Bruijn [Daniel Borkmann]

Document fanout, ring, and auxiliary options

This patch adds descriptions of the common packet socket options

PACKET_AUXDATA, PACKET_FANOUT, PACKET_RX_RING, PACKET_STATISTICS, PACKET_TX_RING

and the ring-specific options

PACKET_LOSS, PACKET_RESERVE, PACKET_TIMESTAMP, PACKET_VERSION

Michael Kerrisk

Add kernel version numbers for PACKET_VERSION and PACKET_TIMESTAMP

ld.so.8

Michael Kerrisk [Matthias Klose]

Default output file for D_DEBUG is stderr not stdout

See https://sourceware.org/bugzilla/show_bug.cgi?id=6874

==== Changes in man-pages-3.57 =====

Released: 2014-01-24, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>
Andre Majorel <aym-xunil@teaser.fr>
Andrey Vagin <avagin@openvz.org>
Andy Lutomirski <luto@amacapital.net>
Axel Beckert <abe@debian.org>
Bernhard Walle <bernhard@bwalle.de>
Brandon Edens <bedens@fitbit.com>
Eliezer Tamir <eliezer.tamir@linux.intel.com>
Gioele Barabucci <gioele@svario.it>
Ian Abbott <abbotti@mev.co.uk>
Jerry Chu <hkchu@google.com>
Jonas Jonsson <jonas@websystem.se>
Marc Lehmann <debian-reportbug@plan9.de>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Peng Haitao <penght@cn.fujitsu.com>
Reuben Thomas <rrt@sc3d.org>
Simone Piccardi <piccardi@truelite.it>
Simon Paillard <spillard@debian.org>
Thomas Posch <man-pages@online.posch.name>
Tilman Schmidt <tilman@imap.cc>
Vince Weaver <vincent.weaver@maine.edu>
Yuri Kozlov <yuray@komyakino.ru>
<socketpair@gmail.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages

msgop.2

Michael Kerrisk
Document MSG_COPY

open.2

Michael Kerrisk, Andy Lutomirski
Document O_TMPFILE
O_TMPFILE is new in Linux 3.11

perf_event_open.2

Vince Weaver [Andi Kleen]
PERF_SAMPLE_TRANSACTION support in Linux 3.13

The following patch adds descriptions of the new perf_event_open.2
PERF_SAMPLE_TRANSACTION sample type as added in Linux 3.13.

The descriptions are based on information provided by Andi Kleen,
both in the e-mail

[PATCH 1/6] perf, core: Add generic transaction flags v5

sent to the linux-kernel list as well as an e-mail

[PATCH] Document transaction flags in perf_event_open manpage

sent to the linux-man list.

The implementation is based heavily on the Intel Haswell
processor. Documentation can be found at this page:
<http://software.intel.com/en-us/blogs/2013/05/03/intelr-transactional-synchronization-extensions-intelr-tsx-profiling-with-linux-0>

as well as in section 18.11.5.1 of volume 3 of the
Intel 64 and IA-32 Architecture Software Developer's Manual.

ptrace.2

Andrey Vagin

Add description for PTRACE_PEEKSIGINFO

Retrieve signals without removing them from a queue.

Andrey Vagin

Add description for PTRACE_GETSIGMASK and PTRACE_SETSIGMASK

These two commands allow to examine and change mask of blocked
signals.

socket.7

Eliezer Tamir

Add description for SO_BUSY_POLL

Add description for the SO_BUSY_POLL socket option.

tcp.7

Michael Kerrisk [Jerry Chu]

Document TCP_USER_TIMEOUT

Text slightly adapted from Jerry Chu's (excellent) commit
message (commit dca43c75e7e545694a9dd6288553f55c53e2a3a3).

Michael Kerrisk

Document TCP_CONGESTION

Global changes

Various pages

Michael Kerrisk

Reword to avoid use of "etc."

Various pages

Peng Haitao [Andre Majorel]

Make wording around thread-safety and setlocale() more precise

getdate.3

strptime.3

locale.5

Michael Kerrisk

Replace "weekday" with less ambiguous language

Notwithstanding POSIX's use of the term "weekday", in everyday English, "weekday" is commonly understood to mean a day in the set [Monday..Friday] (vs one of the "weekend" days).

Changes to individual pages

epoll_wait.2

Michael Kerrisk [Jonas Jonsson]

Clarify wording of EINTR error

See https://bugzilla.kernel.org/show_bug.cgi?id=66571

faccessat.2

Michael Kerrisk

Note that the system call takes only three arguments

fallocate.2

Michael Kerrisk

Note filesystems that support FALLOC_FL_PUNCH_HOLE operation

fcntl.2

Michael Kerrisk

BUGS: The O_SYNC and O_DSYNC flags are not modifiable using F_SETFL

Michael Kerrisk

Add subsections under BUGS

There's several bugs listed. It's helpful to mark them separately.

Michael Kerrisk

POSIX.1 specifies F_SETOWN and F_GETOWN for sockets/SIGURG

getrlimit.2

Michael Kerrisk []

Note that rlim_cur can be set lower than current resource consumption

getsockopt.2

Michael Kerrisk

SEE ALSO: add ip(7) and udp(7)

keyctl.2

Michael Kerrisk

SEE ALSO: mention Documentation/security/keys.txt

linkat.2

Michael Kerrisk

Add ENOENT for O_TMPFILE created with O_EXCL

Michael Kerrisk

ERRORS: Add EINVAL

lseek.2

Michael Kerrisk

Note which filesystems support SEEK_HOLE/SEEK_DATA

msgop.2

Michael Kerrisk

Note that MSG_EXCEPT is Linux-specific

open.2

Michael Kerrisk

Update CONFORMING TO

Add POSIX.1-2008. Add mention of O_TMPFILE.

Update text on various flags that were added in POSIX.1-2008, and whose definitions can, since glibc 2.12, be obtained by suitably defining `_POSIX_C_SOURCE` or `_XOPEN_SOURCE`

Michael Kerrisk

Add pointer in description to BUGS, for O_ASYNC limitation

Michael Kerrisk

Remove crufty duplicate text on modifying file status flags

ptrace.2

Michael Kerrisk

Add details to descriptions of PTRACE_GETSIGMASK and PTRACE_SETSIGMASK

select.2

Michael Kerrisk [Marc Lehmann]

RETURN VALUE: Fix discussion of treatment of file descriptor sets

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=574370>

syscalls.2

Michael Kerrisk

Remove madvise1() from main list

madvise1() is one of the system calls that was never implemented, and listed toward the bottom of the page.

timer_create.2

Michael Kerrisk

Add pointer to proc(5) for info on /proc/[pid]/timers

unlinkat.2

Michael Kerrisk [Mike Frysinger:]

ERRORS: Add EISDIR

See https://bugzilla.kernel.org/show_bug.cgi?id=29702

ferror.3

Michael Kerrisk

clearerr(), feof(), and ferror() are also POSIX-conformant

Michael Kerrisk [Reuben Thomas]

CONFORMING TO: add fileno()

gets.3

Ian Abbott

SEE ALSO: add fgets(3)

mq_receive.3

mq_send.3

Michael Kerrisk [Simone Piccardi]

SYNOPSIS: s/unsigned/unsigned int/

printf.3

Michael Kerrisk

Small reorganization of text in EXAMPLE

rand.3

Michael Kerrisk

s/unsigned/unsigned int/ in example

stpcpy.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function stpcpy() is thread safe.

stpncpy.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function stpncpy() is thread safe.

strcat.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions strcat() and strncat() are thread safe.

strchr.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions strchr(), strrchr() and strchmul() are thread safe.

strcmp.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions strcmp() and strncmp() are thread safe.

strftime.3

Brandon Edens

Change "week day" to "day of week"

See https://bugzilla.kernel.org/show_bug.cgi?id=68861

strstr.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function strstr() is thread safe.

The function strcasestr() is thread safe with exceptions.

strtod.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions

The functions strtod(), strtodf() and strtold() are thread safe with exceptions.

strtoimax.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions

The functions strtoimax() and strtoumax() are thread safe with exceptions.

strtol.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions

The functions strtol(), strtoll() and strtob() are thread safe with exceptions.

tcgetpgrp.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions tcgetpgrp() and tcsetpgrp() are thread safe.

tcgetsid.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function tcgetsid() is thread safe.

core.5

Bernhard Walle

Mention that %E exists since Linux 3.0

'%E' in the 'core_pattern' has been introduced in kernel commit 57cc083ad9e1bfeeb4a0ee831e7bb008c8865bf0 which was included in version 3.0. Add that information to the manual page.

filesystems.5

Michael Kerrisk [Axel Beckert]

Add reference to proc(5) for more details on /proc/filesystems

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=735590>

locale.5

Michael Kerrisk

SEE ALSO: add locale(7)

proc.5

Michael Kerrisk

Document /proc/[pid]/timers

Michael Kerrisk

Update discussion of wchan

Remove crufty reference to /etc/psdatabase in /proc/PID/stat.

Add /proc/PID/wchan.

See <https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/737452>

environ.7

Michael Kerrisk [Gioele Barabucci]

Correct reference to locale(7) (not locale(5))

locale(7) is the right place for details of the LC_* environment variables.

See <http://bugs.debian.org/638186>

Michael Kerrisk

Improve references for discussion of locale environment variables

Michael Kerrisk

SEE ALSO: add catopen(3)

Michael Kerrisk

SEE ALSO: add locale(5)

man-pages.7

Michael Kerrisk

Prefer "usable" over "useable"

netdevice.7

Tilman Schmidt

Document SIOCGIFCONF case ifc_req=NULL

Add the missing description of the possibility to call SIOCGIFCONF

with `ifc_req==NULL` to determine the needed buffer size, as described in <http://lkml.indiana.edu/hypermail/linux/kernel/0110.1/0506.html> and verified against source files `net/core/dev_ioctl.c` and `net/ipv4/devinet.c` in the current kernel git tree. This functionality has been present since the beginning of the 2.6 series. It's about time it gets documented.

While I'm at it, also generally clarify the section on `SIOCGIFCONF`.

standards.7

Michael Kerrisk

Enhance description of V7

Michael Kerrisk

Add C11

tcp.7

Michael Kerrisk

Describe format of `tcp_*_congestion_control` /proc files

Describe format of `tcp_allowed_congestion_control` and `tcp_available_congestion_control`.

===== Changes in man-pages-3.58 =====

Released: 2014-02-11, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

<socketpair@gmail.com>

<ayjj_8109@qq.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages

pipe.2

Michael Kerrisk

Document the pipe2() O_DIRECT flag added in Linux 3.4

packet.7

Daniel Borkmann

Document PACKET_QDISC_BYPASS

New in Linux 3.14.

Global changes

Various pages

Simon Paillard

Formatting fix: add space between function and () if BR or IR

Detected through the regex:

```
git grep -P '\.(BR|IR) [\w]*([\d]*)$'
```

Various pages

Simon Paillard

Formatting fix: add space between word and punctuation if BR or IR

Detected through the regex:

```
git grep -P '\.(BR|IR) [^ ]*[\.,.]$'
```

Could probably be extended to match more cases and fix in perl.

Various pages

Michael Kerrisk

Use Oxford comma

gettid.2

restart_syscall.2

passwd.5

socket.7

Michael Kerrisk

Fix order of SEE ALSO entries

Changes to individual pages

epoll_wait.2

Michael Kerrisk [Network Nut]

Remove word "minimum" from the description of 'timeout'

epoll_wait.2

poll.2

select.2

Michael Kerrisk

Go into more detail on timeout and when call will cease blocking

getxattr.2

listxattr.2

removexattr.2

setxattr.2

Michael Kerrisk [Fabrice Bauzac]

Correct header file is <sys/xattr.h> (not <xattr/xattr.h>)

See https://bugzilla.kernel.org/show_bug.cgi?id=70141

msgctl.2

Cyril Hrubis

Add note about ignored arg to IPC_RMID

prctl.2

Michael Kerrisk []

PR_SET_PDEATHSIG value is preserved across execve(2)

recv.2

Michael Kerrisk

Rework and reorganize the text in various parts of the page.

Isolate details specific to recv() vs recvfrom() vs recvmsg()

Place details specific to each system call under a separate subheading.

Rework discussion of 'src_addr' and 'addrlen' for recvfrom()

Add description of 'buf' and 'len' in recvfrom() section

'addrlen' should be 0 (*not* NULL) when 'src_addr' is NULL

Improve text describing recvfrom() call that is equivalent to recv()

Michael Kerrisk []

Describe the various cases where the return value can be 0

shmctl.2

Michael Kerrisk

Note that 'buf' is ignored for IPC_RMID

symlinkat.2

Michael Kerrisk

Make argument names consistent with symlink(2) page

isalpha.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions isalnum(), isalpha(), isascii(), isblank(),
isctrnl(), isdigit(), isgraph(), islower(), isprint(),
ispunct(), isspace(), isupper() and isxdigit() are thread safe.

isatty.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function isatty() is thread safe.

isgreater.3

Peng Haitao

ATTRIBUTES: Note macros that are thread-safe

The macros isgreater(), isgreaterequal(), isless(),
islessequal(), islessgreater() and isunordered() are thread safe.

iswalnum.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function iswalnum() is thread safe with exceptions.

iswalpha.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function iswalpha() is thread safe with exceptions.

iswblank.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function iswblank() is thread safe with exceptions.

iswcntrl.3

Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions

The function iswcntrl() is thread safe with exceptions.

lockf.3

Michael Kerrisk [Simone Piccardi]

Fix incorrect argument mentioned under EINVAL error

pthread_kill.3

Michael Kerrisk

Add feature test macro requirements

pthread_sigmask.3

Michael Kerrisk

Add feature test macro requirements

strtoul.3

Peng Haitao

ATTRIBUTES: Note functions that are thread safe with exceptions

The functions strtoul(), strtoull() and strtouq() are thread safe with exceptions.

nscd.conf.5

Peter Schiffer

Add note about default values

proc.5

Michael Kerrisk

SEE ALSO: Add some further kernel Documentation/sysctl files

man-pages.7

Michael Kerrisk

ATTRIBUTES sections come after VERSIONS

Peng Haitao has consistently ordered the ATTRIBUTES after VERSIONS, so adjust the text in man-pages.7

vdso.7

Michael Kerrisk

Add words "virtual dynamic shared object" in DESCRIPTION

New and rewritten pages

A note from Christoph Hellwig prompted me to perform a task that has been queued for a while: merging the text of the man pages for the `at(23)` ("directory file descriptor") APIs into their corresponding

traditional pages. When the `*at(2)` pages were originally written (mostly in 2006), the APIs were not part of POSIX and (in most cases) were not available on other systems. So, it made some sense to wall them off into their own separate pages. Eight years later, with the APIs now all in POSIX (except `scandirat()`), it is much more sensible to document the newer APIs alongside their traditional counterparts, so that the newer APIs are not "hidden", and the reader can more easily see the differences between the APIs.

Thus, the text of 14 pairs of pages has been merged, and the "merged from" pages have been converted to links to the "merged to" pages. Along the way, a few other fixes were made to the pages, as noted below.

One page that did not undergo such a change was `utimensat(2)`, which is different enough from `utime(2)` that it warrants a separate page. Unlike the other `*at()` pages, the `utimensat(2)` page was also already self-contained, rather than defining itself in terms of differences from `utime(2)` as the other `*at()` pages did.

`access.2`

Michael Kerrisk

Merge text from `faccessat(2)`

Michael Kerrisk

Remove `faccessat()` race warning

That point is already covered in existing text in this page.

Michael Kerrisk

`access()` also conforms to POSIX.1-2008

`chmod.2`

Michael Kerrisk

Merge text from `fchmodat(2)`

Michael Kerrisk

Use argument name 'pathname' throughout page

(Some APIs were using 'path' while others used 'pathname')

Michael Kerrisk

CONFORMING TO: `chmod()` and `fchmod()` are also in POSIX.1-2008

`chown.2`

Michael Kerrisk

Merge text of `fchownat(2)`

Michael Kerrisk

`AT_EMPTY_PATH` is Linux-specific and requires `_GNU_SOURCE`

Michael Kerrisk

Use argument name 'pathname' throughout page

(Some APIs were using 'path' while others used 'pathname')

Michael Kerrisk

Remove sentence that `fchownat()` is present on Solaris

That point was only really relevant before fchownat() was standardized in POSIX.1.2008.

Michael Kerrisk

CONFORMING TO: chown(), fchown(), lchown() are in POSIX.1-2008

link.2

Michael Kerrisk

Merge text of linkat(2)

Michael Kerrisk

CONFORMING TO: link() is in POSIX.1-2008

Michael Kerrisk

AT_EMPTY_PATH is Linux-specific and requires _GNU_SOURCE

mkdir.2

Michael Kerrisk

Merge text of mkdirat(2)

Michael Kerrisk

CONFORMING TO: mkdir() is in POSIX.1-2008

mknod.2

Michael Kerrisk

Merge text of mknodat(2)

Michael Kerrisk

CONFORMING TO: mknod(2) is in POSIX.1-2008

open.2

Michael Kerrisk

Merge text from openat(2)

Michael Kerrisk

Remove sentence that openat() is present on Solaris

That point was only really relevant before openat() was standardized in POSIX.1.2008.

readlink.2

Michael Kerrisk

Merge text of readlinkat(2)

Michael Kerrisk

CONFORMING TO: readlink() is in POSIX.1-2008.

Michael Kerrisk

Use argument name 'pathname' throughout page

(Some APIs were using 'path' while others used 'pathname')

rename.2

Michael Kerrisk

Merge text of renameat(2)

Michael Kerrisk

CONFORMING TO: rename(2) is in POSIX.1-2008

stat.2

Michael Kerrisk

Merge text from fstatat(2)

Michael Kerrisk

AT_EMPTY_PATH and AT_NO_AUTOMOUNT are Linux-specific
These flags require _GNU_SOURCE.

Michael Kerrisk

Use argument name 'pathname' throughout page
(Some APIs were using 'path' while others used 'pathname')

Michael Kerrisk

Remove sentence that fstatat() is present on Solaris
That point was only really relevant before fstatat() was
standardized in POSIX.1.2008.

Michael Kerrisk

CONFORMING TO: stat(), fstat(), lstat() are specified in POSIX.1-2008

symlink.2

Michael Kerrisk

Merge text of symlinkat(2)

Michael Kerrisk

CONFORMING TO: symlink() is in POSIX.1-2008

unlink.2

Michael Kerrisk

Merge text of unlinkat(2)

Michael Kerrisk

Remove sentence that unlinkat() is present on Solaris
That point was only really relevant before unlinkat() was
standardized in POSIX.1.2008.

Michael Kerrisk

CONFORMING TO: unlink() is in POSIX.1-2008

mkfifo.3

Michael Kerrisk

Merge text of mkfifoat(3)

Michael Kerrisk

CONFORMING TO: mkfifo() is in POSIX.1-2008

scandir.3

Michael Kerrisk

Merge text of scandirat(3)

Michael Kerrisk

Update feature test macro requirements
The FTM requirements changed in glibc 2.10.

Michael Kerrisk

Remove libc4/libc5 note under CONFORMING TO
No-one much cares about Linux libc these days.

Michael Kerrisk

Put detail about alphasort under a NOTES heading

This text was under CONFORMING TO, which made no sense.

Michael Kerrisk

Rework CONFORMING TO text

Newly documented interfaces in existing pages

prctl.2

Kir Kolyshkin

Document PR_SET_MM options in Linux 3.5

Some of the PR_SET_MM options were merged to vanilla kernel later, and appeared in Linux 3.5. Those are:

- PR_SET_MM_ARG_START
- PR_SET_MM_ARG_END
- PR_SET_MM_ENV_START
- PR_SET_MM_ENV_END
- PR_SET_MM_AUXV
- PR_SET_MM_EXE_FILE

socket.7

Neil Horman

Document the SO_RXQ_OVFL socket option

Michael Kerrisk

Add kernel version number for SO_RXQ_OVFL

New and changed links

facestat.2

Michael Kerrisk

Convert to link to access.2

fchmodat.2

Michael Kerrisk

Convert to link to chmod.2

fchownat.2

Michael Kerrisk

Convert to link to chown.2

fstatat.2

Michael Kerrisk

Convert to link to stat.2

linkat.2

Michael Kerrisk

Convert to link to link.2

mkdirat.2

Michael Kerrisk

Convert to link to mkdir.2

mknodat.2

Michael Kerrisk

Convert to link to mknod.2

openat.2

Michael Kerrisk

Convert to link to open.2

readlinkat.2

Michael Kerrisk

Convert to link to symlink.2

renameat.2

Michael Kerrisk

Convert to link rename.2

symlinkat.2

Michael Kerrisk

Convert to link to symlink.2

unlinkat.2

Michael Kerrisk

Convert to link to unlink.2

mkfifoat.3

Michael Kerrisk

Convert to link to mkfifo.3

scandirat.3

Michael Kerrisk

Convert to link to scandir.3

Changes to individual pages

alarm.2

Michael Kerrisk

Note semantics of alarm with respect to fork() and execve()

fcntl.2

Michael Kerrisk

Warn that F_GETLK info may already be out of date when the call returns

intro.2

Michael Kerrisk

Describe policy on documenting differences between syscall and glibc API

mmap2.2

Michael Kerrisk

Reword note on glibc mmap() wrapper invocation of mmap2()

Michael Kerrisk

This system call does not exist on x86-64

msgctl.2

Michael Kerrisk

ERRORS: add EPERM for unprivileged attempt to set msg_qbytes > MSGMNB

prctl.2

Michael Kerrisk [Xiawei Chen]

Clarify that PR_GET_TIMERSLACK is returned as the function result

Michael Kerrisk

Clarify that PR_GET_SECCOMP is returned as function result

Michael Kerrisk

Clarify that PR_GET_NO_NEW_PRIVS is returned as function result

ptrace.2

Michael Kerrisk [Andrew Hunter]

Make it clearer that glibc and syscall APIs differ for PTRACE_PEEK*

Thanks to Denys Vlasenko's additions in 78686915aed6bd12

this page does note that the glibc API for PTRACE_PEEK*

differs from the raw syscall interface. But, as the report

at https://bugzilla.kernel.org/show_bug.cgi?id=70801 shows,

this information could be more obvious. This patch makes its so.

sgetmask.2

Michael Kerrisk

Note that these system calls don't exist on x86-64

swapon.2

Michael Kerrisk

Split EINVAL cases into separate entries under ERRORS

Michael Kerrisk

Add EINVAL error for invalid flags to swapon()

syscalls.2

Michael Kerrisk

SEE ALSO: add intro(2)

umount.2

Michael Kerrisk

Split EINVAL cases into separate items

Michael Kerrisk

ERRORS: Add EINVAL case that was new in 2.6.34

utime.2

Michael Kerrisk

Add note that modern applications probably want utimensat(2) etc.

crypt.3

Michael Kerrisk [KOSAKI Motohiro]

ERRORS: Add EINVAL and EPERM errors

See https://bugzilla.kernel.org/show_bug.cgi?id=69771

getifaddrs.3

Michael Kerrisk

Enhance example program

Print statistics for AF_PACKET interfaces.

Add missing feature test macro definition.

Reformat output.

iswctype.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function iswctype() is thread safe.

sem_post.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function sem_post() is thread safe.

sem_unlink.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function sem_unlink() is thread safe.

sem_wait.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions sem_wait(), sem_trywait() and sem_timedwait() are thread safe.

setbuf.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions setbuf(), setbuffer(), setlinebuf() and setvbuf()

are thread safe.

strlen.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function strlen() is thread safe.

strnlen.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function strnlen() is thread safe.

strpbrk.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function strpbrk() is thread safe.

strsep.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function strsep() is thread safe.

swab.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function swab() is thread safe.

resolv.conf.5

Carlos O'Donnell

DESCRIPTION: mention that the data is trusted

In a recent discussion about DNSSEC it was brought to my attention that not all system administrators may understand that the information in /etc/resolv.conf is fully trusted.

The resolver implementation in glibc treats /etc/resolv.conf as a fully trusted source of DNS information and passes on the AD-bit for DNSSEC as trusted.

This patch adds a clarifying sentence to make it absolutely clear that indeed this source of information is trusted.

ascii.7

Michael Kerrisk [Sulaiman Mustafa]

Fix rendering of single quote (decimal character 39)

Michael Kerrisk

SEE ALSO: add utf-8(7)

Michael Kerrisk [Duncan de Wet]

Remove mention of ISO 8859-1 as being the default encoding on Linux

packet.7

Neil Horman

Document PACKET_FANOUT_QM fanout mode

Michael Kerrisk

Add kernel version for PACKET_FANOUT_QM

Daniel Borkmann

Improve PACKET_QDISC_BYPASS description

socket.7

Michael Kerrisk

Add kernel version number for SO_BUSY_POLL

==== Changes in man-pages-3.62 =====

Released: 2014-03-11, Munich

Michael Kerrisk

Document LC_PAPER

Michael Kerrisk

Document LC_TELEPHONE

Removed Pages

sync.8

Michael Kerrisk [Christoph Hellwig, Pádraig Brady]

Sometime in the 20th century (before my watch), a sync(8) page into man-pages. It documents the sync command from "fileutils", which long ago become coreutils, and the piece under NOTES note some behavior of sync(2) that ceased to be true many years ago. The man-pages project generally focuses on only Linux kernel and (g)libc interfaces, so this sync(8) page doesn't really belong. Furthermore, coreutils has a sync(1) page which covers the same command. After discussions on the coreutils list, I've decided to retire this page from man-pages.

Changes to individual pages

clone.2

Michael Kerrisk

Note that CLONE_THREAD also in effect requires CLONE_VM

stat.2

Michael Kerrisk [Marius Gaubas]

Warn the reader that the 'stat' structure definition is not precise
Padding fields aren't shown, and the order of fields varies
somewhat across architectures.

gethostbyname.3

Michael Kerrisk

Remove redundant FTM requirements

`_GNU_SOURCE` implies `_SVID_SOURCE` and `_BSD_SOURCE`, so

`_BSD_SOURCE || _SVID_SOURCE || _GNU_SOURCE`

is the same as

`_BSD_SOURCE || _SVID_SOURCE`

getutmp.3

Michael Kerrisk

Clarify/simplify 'n_sep_by_space'

Michael Kerrisk

LC_TIME: document 'cal_direction' and 'date_fmt'

Michael Kerrisk

Clarify 'p_sep_by_space'

feature_test_macros.7

Michael Kerrisk

_BSD_SOURCE and _SVID_SOURCE are deprecated in glibc 2.20

Michael Kerrisk

_GNU_SOURCE implicitly defines other macros

Saying that _GNU_SOURCE has the "effects of" other macros is not quite precise.

Michael Kerrisk

Reword glibc version for _ISOC95_SOURCE

Michael Kerrisk

_ISOC99_SOURCE also exposes C95 definitions

Michael Kerrisk

_ISOC11_SOURCE implies the effects of _ISOC99_SOURCE

Michael Kerrisk

Note version number for _POSIX_C_SOURCE >= 200112L implies C99/C95

_POSIX_C_SOURCE >= 200112L causes C95 definitions to be exposed only since glibc 2.12 and C99 definitions only since 2.10.

Michael Kerrisk

_XOPEN_SOURCE may implicitly define _POSIX_SOURCE and _POSIX_C_SOURCE

Michael Kerrisk

Reword glibc version for _ISOC99_SOURCE

Michael Kerrisk

Rework discussion of _ISOC99_SOURCE

Michael Kerrisk

Improve discussion of _DEFAULT_SOURCE

Michael Kerrisk

_POSIX_C_SOURCE >= 200112L implies C95 and C95 features

==== Changes in man-pages-3.63 =====

Released: 2014-03-18, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Carlos O'Donnell <carlos@redhat.com>
Christoph Hellwig <hch@infradead.org>
Corrado Zoccolo <czoccolo@gmail.com>
Gregory P. Smith <gps@google.com>
Joseph S. Myers <joseph@codesourcery.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Peng Haitao <penght@cn.fujitsu.com>
Phillip Susi <psusi@ubuntu.com>
Robert P. J. Day <rpjday@crashcourse.ca>
Stefan Puiu <stefan.puiu@gmail.com>
Zhu Yanhai <zhu.yanhai@gmail.com>

Apologies if I missed anyone!

New and rewritten pages

duplocale.3

Michael Kerrisk

New page documenting duplocale(3)

newlocale.3

Michael Kerrisk [Mike Frysinger]

New page documenting newlocale(3) and freelocale(3)

towlower.3

Michael Kerrisk

Largely rewrite description of towlower() to be simpler and clearer

toupper.3

Michael Kerrisk

Largely rewrite description of toupper() to be simpler and clearer

uselocale.3

Michael Kerrisk

New page documenting uselocale(3)

Newly documented interfaces in existing pages

open.2

Michael Kerrisk

Document O_DSYNC and rewrite discussion of O_SYNC

isalpha.3

Michael Kerrisk

Document the "_l" locale APIs

The GNU C library v2.3 added some locale APIs, most of which were later specified in POSIX.1-2008, namely:

isalnum_l()

isalpha_l()

isblank_l()

isctrl_l()

isdigit_l()

isgraph_l()

islower_l()

isprint_l()

ispunct_l()

isspace_l()

isupper_l()

isxdigit_l()

isascii_l()

Also update and correct various pieces in CONFORMING TO (and remove a few crufty old pieces there).

strerror.3

Michael Kerrisk

Document strerror_l()

toupper.3

Michael Kerrisk

Document toupper_l() and tolower_l()

towlower.3

Michael Kerrisk

Document towlower_1()

toupper.3

Michael Kerrisk

Document toupper_1()

proc.5

Michael Kerrisk

Document /proc/sys/kernel/random/uuid

locale.7

Michael Kerrisk

Document LC_ADDRESS

Document LC_IDENTIFICATION

Document LC_MEASUREMENT

Document LC_NAME

Document LC_PAPER

Document LC_TELEPHONE

New and changed links

freelocale.3

Michael Kerrisk

New link to new newlocale.3 page

isalnum_1.3

isascii_1.3

isblank_1.3

iscntrl_1.3

isdigit_1.3

isgraph_1.3

islower_1.3

isprint_1.3

ispunct_1.3

isspace_1.3

isupper_1.3

isxdigit_1.3

Michael Kerrisk

New links to isalpha.3

tolower_1.3

toupper_1.3

Michael Kerrisk

New links to toupper.3

towlower_1.3

Michael Kerrisk

New link to towlower.3

toupper_1.3

Michael Kerrisk

New link to toupper.3

Global changes

Various pages

Michael Kerrisk

Global change: "upper case" ==> "uppercase", "lower case" ==> lowercase"

Changes to individual pages

mount.2

Michael Kerrisk

SEE ALSO: add blkid(1)

msgop.2

Michael Kerrisk

Document two MSG_COPY failure modes

Since Linux 3.14, the kernel now diagnoses two errors when using msgrcv() MSG_COPY:

* MSG_COPY must be specified with IPC_NOWAIT

* MSG_COPY can't be specified with MSG_EXCEPT

open.2

Michael Kerrisk

Organize some material under additional subheadings in NOTES

There's an amorphous mass of material under NOTES. Structure it with some subheadings, and do a little reorganizing.

Michael Kerrisk

Add other system calls and functions that are like openat()

fanotify_mark(2), name_to_handle_at(2), and scandirat(3) have a directory file descriptor argument for the same reason as openat().

Also: reword the rationale for the *at() functions somewhat.

Michael Kerrisk

Clarify ELOOP error interaction with O_PATH

readahead.2

Phillip Susi [Corrado Zoccolo, Gregory P. Smith, Zhu Yanhai, Michael Kerrisk, Christoph Hellwig]

Don't claim the call blocks until all data has been read

The readahead(2) man page was claiming that the call blocks until all data has been read into the cache. This is incorrect.

See https://bugzilla.kernel.org/show_bug.cgi?id=54271

stat.2

Michael Kerrisk

SEE ALSO: add ls(1) and stat(1)

fts.3

Christoph Hellwig [Michael Kerrisk]

The fts(3) API does not work with LFS builds

As pointed out during a recent discussion on libc-hacker the fts(3) APIs can't be used with large file offsets:

https://sourceware.org/bugzilla/show_bug.cgi?id=15838

mbrtowc.3

mbsnrtowcs.3

mbsrtowcs.3

mbtowc.3

Michael Kerrisk

Add entries in SEE ALSO

Mainly inspired by the POSIX pages.

mbsinit.3

Michael Kerrisk

SEE ALSO: add mbrlen(3), mbrtowc(3), and wctomb(3)

mbsrtowcs.3

wcsrtombs.3

Michael Kerrisk

SEE ALSO: add mbsinit(3)

mbstowcs.3

Michael Kerrisk [Stefan Puiu]

Add example program

And add some SEE ALSO entries

memcmp.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function memcmp() is thread safe.

memcpy.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function memcpy() is thread safe.

memfrob.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function memfrob() is thread safe.

memmem.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function memmem() is thread safe.

memmove.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function memmove() is thread safe.

memcpy.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions memcpy() and wmemcpy() are thread safe.

memset.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function memset() is thread safe.

strerror.3

Michael Kerrisk

CONFORMING TO: strerror() and strerror_r() are in POSIX.1-2008

Michael Kerrisk

Add SS heading for strerror_r()

toupper.3

Michael Kerrisk

Rewrite to more explicitly bring locales into the discussion

Michael Kerrisk

Retitle BUGS section to NOTES

These are not really bugs, just background info.

wcrtomb.3

wcsnrtombs.3

wcsrtombs.3

wcstombs.3

wctomb.3

Michael Kerrisk

SEE ALSO: add various entries

Mainly inspired by POSIX

core.5

Mike Frysinger [Michael Kerrisk]
Document core_pattern %d specifier
Document %P core_pattern specifier
Michael Kerrisk
Rearrange core_pattern specifiers alphabetically

locale.5

Michael Kerrisk
SEE ALSO: add newlocale(3) + duplocale(3)

feature_test_macros.7

Michael Kerrisk [Joseph S. Myers]
Remove mention of bogus _ISOC95_SOURCE macro
The _ISOC95_SOURCE macro is defined in <features.h>, but it does nothing. So remove discussion of it, and move some of the discussion of C95 under the _ISOC99_SOURCE subhead.
Michael Kerrisk [Carlos O'Donnell]
Add packaging note for _BSD_SOURCE/_SVID_SOURCE/_DEFAULT_SOURCE
To compile warning-free across glibc < 2.20 and glibc >= 2.20 code may be to define both _DEFAULT_SOURCE and either _BSD_SOURCE or _SVID_SOURCE.
Michael Kerrisk
Reword description of C90

locale.7

Michael Kerrisk
Add subsection on POSIX.1-2008 (originally GNU) extensions to locale API
Michael Kerrisk
Remove reference to LI18NUX2000
LI18NUX2000 is difficult to even find these days, and in any case this page does not document gettext(), so notes about gettext() in the CONFORMING TO section here make no sense.
Michael Kerrisk
SEE ALSO: add mbstowcs(3) and wctombs(3)
SEE ALSO: add newlocale(3) + duplocale(3)

man-pages.7

Michael Kerrisk
Add preferred term "superblock"
Michael Kerrisk
Add preferred terms "uppercase" and "lowercase"

==== Changes in man-pages-3.64 =====

Released: 2014-04-06, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Abhay Sachan <sachan.abhay@gmail.com>
Alexey Samsonov <samsonov@google.com>
Andrey Vagin <avagin@openvz.org>
Aneesh Kumar K.V <aneesh.kumar@linux.vnet.ibm.com>
Christoph Hellwig <hch@infradead.org>
David Prévot <taffit@debian.org>
Eric Dumazet <edumazet@google.com>
Eric W. Biederman <ebiederm@xmission.com>
Jan Kara <jack@suse.cz>
Kir Kolyshkin <kir@openvz.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
NeilBrown <neilb@suse.de>
Peng Haitao <penght@cn.fujitsu.com>
Peter Hurley <peter@hurleysoftware.com>
Petr Gajdos <pgajdos@suse.cz>
Robert P. J. Day <rpjday@crashcourse.ca>
Vince Weaver <vincent.weaver@maine.edu>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages

open_by_handle_at.2

Michael Kerrisk [Mike Frysinger, Neil Brown, Aneesh Kumar K.V,
Christoph Hellwig]

New page describing name_to_handle_at(2) and open_by_handle_at(2)

inotify.7

Michael Kerrisk

Rewrite introductory section

Reorganize "Limitations and caveats" subsection

Michael Kerrisk

Further describe the race when adding a watch to a new subtree

Michael Kerrisk

Directory renames may invalidate multiple paths cached by application

Michael Kerrisk

Add paragraph on cache consistency checking

Michael Kerrisk

Mention cache rebuilding to handle overflow events

Michael Kerrisk

Moving an object to another filesystem generates `IN_DELETE_SELF`

Michael Kerrisk [Jan Kara]

Add text on dealing with `rename()` events

Michael Kerrisk

Note rationale and consequences of event coalescing

Michael Kerrisk [Eric W. Biederman]

Inotify doesn't work for remote and pseudo filesystems

Michael Kerrisk

Add some examples of events generated by various system calls

Michael Kerrisk

BUGS: `IN_ONESHOT` does now cause `IN_IGNORED` when the watch is dropped

A silent change as a result of the fanotify work in kernel 2.6.36.

Michael Kerrisk

Note that `IN_DELETE_SELF` will be followed by `IN_IGNORED`

Michael Kerrisk

Note that `IN_UNMOUNT` will be followed by an `IN_IGNORED` event

Michael Kerrisk

Inotify does not report events for `mmap(2)` and `msync(2)`

Michael Kerrisk

Add examples of syscalls that trigger `IN_ATTRIB`

Michael Kerrisk

Add some examples of syscalls that trigger `IN_MODIFY`

Michael Kerrisk

`execve(2)` also generates `IN_ACCESS`

Michael Kerrisk

Add examples of syscalls that trigger `IN_CREATE`

Newly documented interfaces in existing pages

`perf_event_open.2`

Vince Weaver [Michael Kerrisk]

Document the `PERF_FLAG_FD_CLOEXEC` flag

The Linux 3.14 release adds support for the `PERF_FLAG_FD_CLOEXEC` flag.

`feature_test_macros.7`

Michael Kerrisk

Document `_LARGEFILE_SOURCE`

tcp.7

Michael Kerrisk [Eric Dumazet]

Document /proc/sys/net/ipv4/tcp_autocorking

Text heavily based on Documentation/networking/ip-sysctl.txt

New and changed links

name_to_handle_at.2

Michael Kerrisk

New link to new open_by_handle_at(2) page

Global changes

fmemopen.3

getaddrinfo.3

mq_notify.3

offsetof.3

aio.7

Michael Kerrisk

Print size_t/ssize_t values using %z printf() modifier

There are fewer and fewer systems these days that don't support the %z specifier mandated in C99. So replace the use of %ld/%lu + (long) cast with %zd/%zu.

Changes to individual pages

bdflush.2

fsync.2

sync.2

Kir Kolyshkin

SEE ALSO: remove update(8) reference

Remove reference to update(8) man page, since there is no such page. This is an ancient BSD leftover I believe.

chown.2

Michael Kerrisk

Note that 'dirfd' can be AT_FDCWD when AT_EMPTY_PATH is used

getxattr.2

Abhay Sachan

Fix RETURN VALUE description

A EA can have length zero.

inotify_add_watch.2

Michael Kerrisk

ERRORS: add ENAMETOOLONG

inotify_init.2

Michael Kerrisk

Add pointer to inotify(7)

link.2

Michael Kerrisk

When AT_EMPTY_PATH is specified, 'olddirfd' must not refer to a directory

mmap.2

Andrey Vagin

The file descriptor for a file mapping must be readable

There is no difference between MAP_SHARED and MAP_PRIVATE.

open.2

Michael Kerrisk

SEE ALSO: add open_by_name_at(2)

perf_event_open.2

Vince Weaver

Document PERF_EVENT_IOC_PERIOD behavior change

Linux 3.14 (in commit bad7192b842c83e580747ca57104dd51fe08c223)

changes the perf_event PERF_EVENT_IOC_PERIOD ioctl() behavior

on all architectures to update immediately, to match the behavior

found on ARM.

stat.2

Michael Kerrisk

Note that 'dirfd' can be AT_FDCWD when AT_EMPTY_PATH is used

syscalls.2

Michael Kerrisk

Add sched_getattr() and sched_setattr()

And update kernel version to 3.14

abort.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function abort() is thread safe.

confstr.3

Michael Kerrisk

SEE ALSO: add getconf(1), fpathconf(3), sysconf(3), pathconf(3)

exit.3

Peng Haitao

ATTRIBUTES: Note function that is not thread-safe

The function `exit()` is not thread safe.

fenv.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `feclearexcept()`, `fegetexceptflag()`, `feraiseexcept()`, `fesetexceptflag()`, `fetestexcept()`, `fegetround()`, `fesetround()`, `fegetenv()`, `fehldexcept()`, `fesetenv()`, `feupdateenv()`, `feenableexcept()`, `fedisableexcept()` and `fegetexcept()` are thread safe.

fpathconf.3

Michael Kerrisk

SEE ALSO: `add confstr(3)`

fseek.3

Michael Kerrisk [Petr Gajdos]

Document `EINVAL` error for negative file offset

fseeko.3

Michael Kerrisk

Add feature test macro requirements

fts.3

Michael Kerrisk [Mike Frysinger]

Remove mention of "32-bit systems" in `BUGS`

fwide.3

wprintf.3

Michael Kerrisk [Robert P. J. Day]

Remove mention of bogus `_ISOC95_SOURCE` feature test macro

getline.3

Alexey Samsonov

Caller should free the allocated buffer even if `getline()` failed

Relevant discussion in `glibc bugzilla`:

https://sourceware.org/bugzilla/show_bug.cgi?id=5666

getloadavg.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `getloadavg()` is thread safe.

getpt.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `getpt()` is thread safe.

`if_nametoindex.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `if_nametoindex()` and `if_indextoname()` are thread safe.

`index.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `index()` and `rindex()` are thread safe.

`mkfifo.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `mkfifo()` and `mkfifoat()` are thread safe.

`netlink.3`

Michael Kerrisk

SEE ALSO: make the reference for `libnetlink` the `libnetlink(3)` man page

`random.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `random()`, `srandom()`, `initstate()` and `setstate()` are thread safe.

`random_r.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `random_r()`, `srandom_r()`, `initstate_r()` and `setstate_r()` are thread safe.

`sigvec.3`

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `sigvec()`, `sigblock()`, `sigsetmask()` and `siggetmask()` are thread safe.

The macro `sigmask()` is thread safe.

`sysconf.3`

Michael Kerrisk

SEE ALSO: add `confstr(3)`

`termios.3`

Michael Kerrisk [Peter Hurley]

Fix error in discussion of MIN > 0, TIME == 0 noncanonical mode

As reported by Peter Hurley, for the MIN > 0, TIME == 0 case:

read() may unblock when MIN bytes are available but return up to the 'count' parameter if more input arrives in between waking and copying into the user buffer.

...

read() may also *_not_* return until MIN bytes have been received, even if 'count' bytes have been received.

Michael Kerrisk

Add a note on interaction of O_NONBLOCK with noncanonical MIN/TIME

POSIX leaves the behavior open.

Michael Kerrisk

Clarify termination conditions for MIN > 0, TIME > 0

Michael Kerrisk

Clarify behavior if data is available before noncanonical read()

Michael Kerrisk

Add descriptive titles to noncanonical read() cases

symlink.7

Michael Kerrisk

Add subsection on opening a symbolic link with O_PATH

Michael Kerrisk

name_to_handle_at(2) and open_by_handle_at(2) optionally follow symlinks

Michael Kerrisk

Mention use of readlink(2) to read contents of a symlink

==== Changes in man-pages-3.65 =====

Released: 2014-04-20, Munich

Apologies if I missed anyone!

New and rewritten pages

inet_net_pton.3

Michael Kerrisk

New page describing inet_net_pton(3) and inet_net_ntop(3)

Newly documented interfaces in existing pages

fallocate.2

Michael Kerrisk, Namjae Jeon [Christoph Hellwig, Dave Chinner]

Document FALLOC_FL_COLLAPSE_RANGE

prctl.2

Michael Kerrisk [Alex Thorlton]

Document PR_SET_THP_DISABLE and PR_GET_THP_DISABLE

proc.5

Michael Kerrisk

Document /proc/[pid]/stack

Michael Kerrisk

Document /proc/[pid]/clear_refs

New and changed links

inet_net_ntop.3

Michael Kerrisk

New link to new inet_net_pton.3

Changes to individual pages

fcntl.2

Michael Kerrisk

Note the race when O_CLOEXEC is used at same time as fork()+execve()

madvise.2

Michael Kerrisk

SEE ALSO: see prctl(2)

Because of PR_SET_THP_DISABLE.

mlock.2

Michael Kerrisk

Describe treatment of MCL_FUTURE during fork(2) and execve(2)

msync.2

Michael Kerrisk [Richard Hansen, Greg Troxel]

Warn that one of MS_SYNC or MS_ASYNC is required

open.2

Michael Kerrisk

Add more detail on the race that O_CLOEXEC is designed to avoid

Michael Kerrisk [Matthew Dempsky]

Remove crufty text stating that O_DIRECTORY is Linux-specific

Michael Kerrisk

Note which filesystems support O_TMPFILE

perf_event_open.2

Vince Weaver [Michael Kerrisk]

Clarify EACCES and EPERM errors

Clarify the reasons for EACCES and EPERM errors.

Vince Weaver [Michael Kerrisk]

Make the ERRORS section more comprehensive.

Determined both by code inspection and by writing a large number of test programs.

personality.2

Michael Kerrisk

Available execution domains are listed in <sys/personality.h>

Michael Kerrisk

Fix discussion of return value

prctl.2

Michael Kerrisk

ERRORS: document EINVAL for PR_GET_NO_NEW_PRIVS

ERRORS: document EINVAL for PR_SET_PDEATHSIG
ERRORS: document EINVAL for PR_SET_TIMING
ERRORS: document EINVAL for PR_SET_DUMPABLE
ERRORS: document EINVAL for PR_SET_NO_NEW_PRIVS

shmget.2

Michael Kerrisk

Rewrite description of SHMMNI default value

Michael Kerrisk

Note default value of SHMMAX

Note default value for SHMALL

byteorder.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions htonl(), htons(), ntohl() and ntohs() are thread safe.

fexecve.3

Michael Kerrisk [Steven Stewart-Gallus]

If 'fd' is a close-on-exec file descriptor for a script, fexecve() fails

See https://bugzilla.kernel.org/show_bug.cgi?id=74481

ffs.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions ffs(), ffs1() and ffsll() are thread safe.

getauxval.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function getauxval() is thread safe.

getcontext.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions getcontext() and setcontext() are thread safe.

getsubopt.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function getsubopt() is thread safe.

getutmp.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions getutmp() and getutmpx() are thread safe.

inet.3

Michael Kerrisk

Note success and error return for inet_aton()

inet.3

Michael Kerrisk [Craig McQueen]

The form 'a.b' if is suitable for Class A addresses (not class C)

Michael Kerrisk

SEE ALSO: add inet_net_pton(3)

makecontext.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions makecontext() and swapcontext() are thread safe.

pthread_attr_setdetachstate.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_attr_setdetachstate() and pthread_attr_getdetachstate() are thread safe.

pthread_attr_setguardsize.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_attr_setguardsize() and pthread_attr_getguardsize() are thread safe.

sigsetops.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions sigemptyset(), sigfillset(), sigaddset(), sigdelset(), sigismember(), sigisemptyset(), sigorset() and sigandset() are thread safe.

proc.5

Petr Gajdos

Improve /proc/[pid]/smaps entries description

Michael Kerrisk

/proc/PID/smaps is present only if CONFIG_PROC_PAGE_MONITOR

Michael Kerrisk

Note kernel version for /proc/sys/kernel/{shmall,shmmax}

Michael Kerrisk

Note kernel version for /proc/sys/kernel/{msgmax,msgmnb}

capabilities.7

Michael Kerrisk

SEE ALSO: add capsh(1)

libc.7

Michael Kerrisk
Add musl libc

Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages

fanotify_init.2

Heinrich Schuchardt, Michael Kerrisk

New page documenting fanotify_init(2)

fanotify_mark.2

Heinrich Schuchardt, Michael Kerrisk

New page documenting fanotify_mark(2)

sched_setscheduler.2

Michael Kerrisk

Page rewritten

Stripped out the general scheduling material, which moved to sched(7), and rewrote much of the remainder.

Changed copyright and license since pretty much all of the content was or is written by mtk.

fanotify.7

Heinrich Schuchardt, Michael Kerrisk

New page providing overview of the fanotify API

sched.7

Michael Kerrisk

New page providing an overview of the scheduling APIs

Most of this content derives from sched_setscheduler(2). In preparation for adding a sched_setattr(2) page, it makes sense to isolate out this general content to a separate page that is referred to by the other scheduling pages.

Newly documented interfaces in existing pages

fallocate.2

Lukas Czerner [Michael Kerrisk]

Document FALLOC_FL_ZERO_RANGE

FALLOC_FL_ZERO_RANGE was added in Linux 3.14, for zeroing ranges in the allocated space in a file.

rename.2

Miklos Szeredi [Michael Kerrisk]

Document renameat2() system call added in Linux 3.15

shmop.2

Michael Kerrisk

Document SHM_EXEC

Changes to individual pages

flock.2

Michael Kerrisk

Employ term "open file description" in DESCRIPTION

And include reference to open(2) for an explanation of the term.

getpriority.2

Michael Kerrisk

SEE ALSO: add sched(7)

getsockopt.2

Carsten Andrich

SEE ALSO: add packet(7)

link.2

Michael Kerrisk [Steven Stewart-Gallus]

Document ENOENT error for linkat()

See https://bugzilla.kernel.org/show_bug.cgi?id=73301

msgget.2

Michael Kerrisk

Reword EEXIST error

msgop.2

Michael Kerrisk

Note capability required to raise MQ size beyond MSGMNB

msync.2

Michael Kerrisk [Heinrich Schuchardt]

s/flushes... back to disk/flushes... back to filesystem/

nice.2

Michael Kerrisk

SEE ALSO: add sched(7)

open.2

Peter Schiffer

Update note on alignment of user buffer and file offset for O_DIRECT

The sentence in open(2) man page in notes for O_DIRECT flag:

"Under Linux 2.6, alignment to 512-byte boundaries suffices."

is not universally correct. The alignment is a property of the storage, for example, 4k-sector drives with no 512 byte sector emulation will be unable to perform 512-byte direct I/O.

Michael Kerrisk

Note some of the various synonyms for "open file description"

Michael Kerrisk

Remove repetitious text on use of `fcntl()` to change file status flags

`open_by_handle_at.2`

Michael Kerrisk

Mention FreeBSD analogs

`posix_fadvise.2`

Michael Kerrisk [Eric Siegerman]

Fix wording error under "Architecture-specific variants"

See https://bugzilla.kernel.org/show_bug.cgi?id=75431

`process_vm_readv.2`

Michael Kerrisk [Stijn Hinterding]

Add feature test macro requirements

The `_GNU_SOURCE` FTM must be defined.

`read.2`

Michael Kerrisk

BUGS: detail nonatomicity bug with respect to file offset updates

This bug was fixed in Linux 3.14, with commit

`9c225f2655e36a470c4f58dbbc99244c5fc7f2d4`

See also <http://thread.gmane.org/gmane.linux.kernel/1649458>

`sched_get_priority_max.2`

Michael Kerrisk

Small changes consistent with migration of content to `sched(7)`

`sched_rr_get_interval.2`

Michael Kerrisk

Small changes consistent with migration of content to `sched(7)`

`sched_setaffinity.2`

Michael Kerrisk

Small changes consistent with migration of content to `sched(7)`

`sched_setparam.2`

Michael Kerrisk

Small changes consistent with migration of content to `sched(7)`

`sched_yield.2`

Michael Kerrisk

Small changes consistent with migration of content to `sched(7)`

`semget.2`

Michael Kerrisk

Consolidate discussion on noninitialization of semaphores

The fact that `semget()` does not initialize the semaphores

in a new set was covered in two places (in DESCRIPTION and BUGS). Consolidate these into one place (in NOTES) and also point out that POSIX.1-2008 says that a future version of the standard may require an implementation to initialize the semaphores to 0.

Michael Kerrisk

Clarify SEMMNS versus SEMMSL*SEMMNI

Michael Kerrisk

Rework EINVAL text a little

Michael Kerrisk

Clarify wording for EEXIST error

shmget.2

Manfred Spraul

Clarify SHMALL

The default for SHMALL is a limit of 8 GB, regardless of PAGE_SIZE. The current documentation does not mention that and is therefore more difficult to understand than necessary.

Manfred Spraul

Correct math error

2097152 is 2^{21} , not 2^{20} .

Michael Kerrisk

Reword EEXIST error

Michael Kerrisk

Clarify one of the EINVAL cases

Michael Kerrisk

Note that SHM_NORESERVE is a Linux extension

Michael Kerrisk [Simon Paillard]

Fix kernel version numbers in discussion of SHMALL

Michael Kerrisk

Rework EINVAL text

Michael Kerrisk

Move and rework discussion of mode bits

Michael Kerrisk

Reword description of O_EXCL

shmop.2

Michael Kerrisk

Move fork(2), execve(2), _exit(2) discussion to NOTES

Michael Kerrisk

Add subheads for shmat() and shmdt()

Michael Kerrisk

Rework discussion of SHM_RDONLY and SHM_REMAP into list format

Michael Kerrisk

Structure the attach cases as a list

sigaction.2

Alan Curry

Fix bad cross reference (times(2) not time(2))

The system call that reports child CPU usage is times(2),
not time(2).

symlink.2

Michael Kerrisk [Steven Stewart-Gallus]

Document ENOENT error for symlinkat()

See https://bugzilla.kernel.org/show_bug.cgi?id=73301

syscalls.2

Michael Kerrisk

Add renameat2()

And bump kernel version.

write.2

Michael Kerrisk

BUGS: detail nonatomicity bug with respect to file offset updates

This bug was fixed in Linux 3.14, with commit

9c225f2655e36a470c4f58dbbc99244c5fc7f2d4

See also <http://thread.gmane.org/gmane.linux.kernel/1649458>

pthread_attr_setinheritsched.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_attr_setinheritsched() and

pthread_attr_getinheritsched() are thread safe.

pthread_attr_setschedparam.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_attr_setschedparam() and

pthread_attr_getschedparam() are thread safe.

pthread_attr_setschedpolicy.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_attr_setschedpolicy() and

pthread_attr_getschedpolicy() are thread safe.

pthread_attr_setscope.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_attr_setscope() and pthread_attr_getscope()

are thread safe.

pthread_attr_setstack.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `pthread_attr_setstack()` and `pthread_attr_getstack()` are thread safe.

`sched_getcpu.3`

Michael Kerrisk

SEE ALSO: add `sched(7)`

`termios.3`

Michael Kerrisk [Yuri Kozlov]

Rework intro text for `'c_oflag'`

Michael Kerrisk

OFDEL is in POSIX.1-2001, so remove "(Not in POSIX)" text

`proc.5`

Jan Moskyto Matejka [Randy Dunlap]

Improve description of `/proc/stat` `'intr'` field

The sum at the beginning of line `"intr"` includes also unnumbered interrupts.

`packet.7`

Carsten Andrich [Neil Horman]

Improve `sockopt` documentation for packet sockets

Carsten Andrich [Willem de Bruijn]

`PACKET_LOSS` has inverse meaning

Stefan Puiu [Daniel Borkmann, Carsten Andrich]

Status in `PACKET_RX_RING` is actually a bit mask

Michael Kerrisk [Carsten Andrich]

SEE ALSO: add `/tools/testing/selftests/net/psock_tpacket.c`

==== Changes in man-pages-3.67 =====

Released: 2014-05-21, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Andy Lutomirski <luto@amacapital.net>

Aurelien Jarno <aurelien@aurel32.net>

Bill Allombert <ballombe@debian.org>

Christoph Hellwig <hch@infradead.org>

Davidlohr Bueso <davidlohr@hp.com>

Heinrich Schuchardt <xypron.glpk@gmx.de>

Ingo Schwarze <schwarze@usta.de>
Jan Kara <jack@suse.cz>
Jon Grant <jg@jguk.org>
Juri Lelli <juri.elli@gmail.com>
Lucas De Marchi <lucas.demarchi@profusion.mobi>
Michael Kerrisk <mtk.manpages@gmail.com>
Peng Haitao <penght@cn.fujitsu.com>
Peter Zijlstra <peterz@infradead.org>
Rasmus Villemoes <rv@rasmusvillemoes.dk>
Sam Varshavchik <mrsam@courier-mta.com>
Simon Paillard <spillard@debian.org>
Steven Stewart-Gallus <sstewartgallus00@mylangara.bc.ca>
Török Edwin <edwin@etorok.net>
William Morriss <wjmelements@gmail.com>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages

sched_setattr.2

Michael Kerrisk, Peter Zijlstra [Juri Lelli]

New page describing sched_setattr(2) and sched_getattr(2)

system.3

Michael Kerrisk

Rewrote large parts of the page and added a number of details

Newly documented interfaces in existing pages

sched.7

Peter Zijlstra, Michael Kerrisk [Juri Lelli]

Document SCHED_DEADLINE

New and changed links

renameat2.2

Michael Kerrisk

New link to rename.2

sched_getattr.2

Michael Kerrisk

New link to new sched_setattr

Changes to individual pages

bind.2

Michael Kerrisk

ERRORS: Add EADDRINUSE for ephemeral port range exhaustion

chown.2

Michael Kerrisk

NOTES: Add some subheadings

connect.2

Michael Kerrisk [William Morriss]

ERRORS: Add EADDRNOTAVAIL for ephemeral port range exhaustion

Verified from testing and the kernel source.

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=745775>

Michael Kerrisk

Remove mention of ip_local_port_range under EAGAIN error

create_module.2

delete_module.2

init_module.2

query_module.2

Michael Kerrisk [Lucas De Marchi]

Clarify glibc header file declaration/ABI wrapper details

create_module(), delete_module(), init_module(), and

query_module() are not declared in header files, but

through an accident of history glibc provides an ABI

for them that it continues to maintain, for

compatibility reasons.

execve.2

Michael Kerrisk [Steven Stewart-Gallus]

Note SIGKILL case when execve() fails beyond the point of no return

Michael Kerrisk

NOTES: Add a subheading and reorder paragraphs

fanotify_init.2

Heinrich Schuchardt [Michael Kerrisk]

Document range of permitted flags for event_f_flags

With a new patch included in the mm tree, event_f_flags is

checked for allowable values.

fcntl.2

Michael Kerrisk

Add "file locking" subheading under NOTES

fork.2

Michael Kerrisk

ERRORS: SCHED_DEADLINE tasks can fail with EAGAIN
SCHED_DEADLINE tasks can fail with EAGAIN unless the
reset-on-fork flag is set.

futex.2

Michael Kerrisk

Note that there is no glibc wrapper

getpriority.2

Rasmus Villemoes

Fix prototypes for getpriority() and setpriority()
The who argument has type id_t (which happens to be u32 on linux).

get_robust_list.2

Rasmus Villemoes

Add <sys/types.h> to synopsis of get_robust_list()
If one were to implement wrappers for [gs]et_robust_list() using the
given prototypes, one would also have to include sys/types.h to get
a definition of size_t.

getrusage.2

Michael Kerrisk [Bill Allombert]

_GNU_SOURCE must be defined to obtain RUSAGE_THREAD definition
See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=746569>

link.2

open.2

Andy Lutomirski [Michael Kerrisk]

Update AT_EMPTY_PATH and O_PATH documentation

listen.2

Michael Kerrisk

ERRORS: Add EADDRINUSE for ephemeral port range exhaustion

mbind.2

Rasmus Villemoes

Fix prototype for mbind(2)
The nmask argument is const. The return type in numaif.h is long.
(Well, at least <numaif.h> says nmask is const. The current kernel
does not define it as a const argument, but sys_mbind() only
passes it to get_nodes(), which does treat it as const.)

msgop.2

Davidlohr Bueso [Michael Kerrisk]

Enhance description of "full queue" criteria

poll.2

Rasmus Villemoes

Add `<signal.h>` to synopsis for `ppoll()`

One needs to `#include <signal.h>` to get the definition of the type (`sigset_t`) of the mask argument to `ppoll()`.

readlink.2

Rasmus Villemoes

Fix return type of `readlinkat()`

recv.2

Michael Kerrisk

Clarify details of `msg_name` and `msg_namelen` fields

recvmmsg.2

Michael Kerrisk

Describe timeout bug

See https://bugzilla.kernel.org/show_bug.cgi?id=75371
and <http://thread.gmane.org/gmane.linux.man/5677>

remap_file_pages.2

Andy Lutomirski [Christoph Hellwig, Andy Lutomirski]

`remap_file_pages()` has no benefit for real files

Linux commit `3ee6dafc677a68e461a7ddafc94a580ebab80735` caused `remap_file_pages` to be emulated when used on real file.

sched_get_priority_max.2

Michael Kerrisk

'policy' can also be `SCHED_DEADLINE`

sched_setaffinity.2

Rasmus Villemoes

Fix prototype for `sched_setaffinity()`

The mask argument is `const`.

sched_setparam.2

Michael Kerrisk

ERRORS: mark errors that apply just for `sched_setparam()`

Michael Kerrisk

ERRORS: Add `EINVAL` for invalid arguments

Michael Kerrisk

SEE ALSO: add `sched_setattr(2)`

sched_setscheduler.2

Michael Kerrisk

ERRORS: mark errors that apply just to `sched_setscheduler()`

Michael Kerrisk

ERRORS: add EINVAL case for pid < 0

Michael Kerrisk

ERRORS: separate out EINVAL cases

semget.2

Michael Kerrisk

NOTES: Add subheadings and reorder paragraphs

semop.2

Rasmus Villemoes

Fix prototypes for semop() and semtimedop()

The nsops arguments have type size_t, not unsigned, and the timeout argument of semtimedop() is const.

Michael Kerrisk

NOTES: Add a subheading

send.2

Michael Kerrisk

Add details on various 'msghdr' fields

Michael Kerrisk

ERRORS: Add EAGAIN for ephemeral port range exhaustion

Michael Kerrisk

Add some subheadings under DESCRIPTION

shmget.2

Michael Kerrisk

NOTES: Add a subheading

stat.2

Michael Kerrisk [Aurelien Jarno]

Describe feature test macro requirements for file type test macros

See <https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=728240>

Michael Kerrisk

Update FTM requirements for lstat()

Michael Kerrisk

Split discussion of 'st_mode' fields into type and permissions

Michael Kerrisk

Move text on S_I*() macros to follow text on S_I* macros

That ordering is more logical

stime.2

Rasmus Villemoes

Fix prototype for stime()

The argument is const, both according to the actual header files and according to <<http://www.sco.com/developers/devspecs/vol11a.pdf>>.

syscall.2

Rasmus Villemoes

Fix prototype for syscall()

The first argument and the return value of syscall() has type long,
not int.

getopt.3

Michael Kerrisk

EXAMPLE: Add subheadings to distinguish the two example programs

malloc.3

Michael Kerrisk

Reword text referring to mallopt(3)

Linux libc is no longer "recent"; drop mention of it.

pthread_attr_setinheritsched.3

pthread_attr_setschedparam.3

pthread_attr_setschedpolicy.3

pthread_setaffinity_np.3

pthread_setschedparam.3

pthread_setschedprio.3

pthread_yield.3

pthreads.7

Michael Kerrisk

Change references to "sched_setscheduler(2)" to "sched(7)"

Change consistent with the fact that the scheduling overview
page is now sched(7) not sched_setscheduler(2).

pthread_attr_setstackaddr.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_attr_setstackaddr() and
pthread_attr_getstackaddr() are thread safe.

pthread_attr_setstacksize.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_attr_setstacksize() and
pthread_attr_getstacksize() are thread safe.

pthread_kill.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_kill() is thread safe.

pthread_kill_other_threads_np.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_kill_other_threads_np() is thread safe.

pthread_self.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_self() is thread safe.

pthread_setcancelstate.3

Michael Kerrisk

Add paragraph breaks to "Asynchronous cancelability" subsection

pthread_setcancelstate.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_setcancelstate() and pthread_setcanceltype() are thread safe.

Michael Kerrisk

NOTES: Add some subheadings

pthread_setschedparam.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_setschedparam() and pthread_getschedparam() are thread safe.

pthread_setschedprio.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_setschedprio() is thread safe.

pthread_sigmask.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_sigmask() is thread safe.

pthread_sigqueue.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_sigqueue() is thread safe.

pthread_testcancel.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_testcancel() is thread safe.

pthread_yield.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_yield() is thread safe.

remquo.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions `remquo()`, `remquof()` and `remquol()` are thread safe.

rtime.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `rtime()` is thread safe.

sched_getcpu.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function `sched_getcpu()` is thread safe.

stpcpy.3

Ingo Schwarze

Note some history of `stpcpy()`

Quoting Ingo:

I just noticed that the `stpcpy(3)` manual contains a speculation that appears to be untrue on closer investigation: That function did not originate in MS DOS, but in Lattice C on AmigaDOS.

Here is a patch against the git master HEAD to fix that, and add some more historical information. To provide some background and allow you to more easily verify the correctness of the patch, i'm appending my mail to misc@openbsd.org, where i'm giving some more details about the history and pointing to some primary sources. That mail also contains the (similar, but shorter) patch i just committed to the OpenBSD manual page.

strcasemp.3

Michael Kerrisk [Aurelien Jarno, Török Edwin]

Explain why `strcasemp()+strncasemp()` are also declared in `<string.h>`

See <http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=729436>

strcpy.3

Michael Kerrisk

NOTES: Add a subheading

fd.4

Michael Kerrisk [Sam Varshavchik]

Fix floppy disk device names

The naming convention shown in the page was ancient.

Now, the page is consistent with `Documentation/devices.txt`

(where it is noted that "The use of the capital letters

D, H and E for the 3.5" models have been deprecated, since

the drive type is insignificant for these devices"

proc.5

Michael Kerrisk

Document /proc/timer_stats

Michael Kerrisk

(Briefly) document /proc/timer_list

Michael Kerrisk

Add /proc/sys/kernel/{sched_rt_period_us,sched_rt_runtime_us}

Reference sched(7) for an explanation of these two files

capabilities.7

Michael Kerrisk

Mention sched_setattr(2) under CAP_SYS_NICE

cpuset.7

Michael Kerrisk

SEE ALSO: add sched(7)

credentials.7

Michael Kerrisk

Mention sched_getattr() as a place where credentials are checked

fanotify.7

Heinrich Schuchardt [Jan Kara]

BUGS: error events can be lost when reading from fanotify FD

Michael Kerrisk [Heinrich Schuchardt]

Fix description of FAN_EVENT_NEXT()

FAN_EVENT_NEXT() does not update 'meta'; rather, it returns a pointer to the next metadata structure. In addition, generally rework the description to be a bit clearer and more detailed.

Heinrich Schuchardt

Document FAN_EVENT_METADATA_LEN

ip.7

Michael Kerrisk

Note cases where an ephemeral port is used

Michael Kerrisk

Remove BUGS text on glibc failing to declare in_pktinfo

Michael Kerrisk

Clarify 'ip_local_port_range' and mention the term "ephemeral ports"

Michael Kerrisk

Note some more details about assignment of ephemeral ports

Michael Kerrisk

BUGS: ephemeral port range exhaustion is diagnosed inconsistently

Different system calls use different 'errno' values to diagnose exhaustion of the ephemeral port range.

sched.7

Michael Kerrisk

Document sched_rt_period_us and sched_rt_runtime_us /proc files
And rework and relocate the text on dealing with runaway
real-time processes.

Michael Kerrisk

Mention sched_setattr(2) in list of APIs that can change policies

Michael Kerrisk

sched_setattr(2) can also be used to set 'nice' value

Michael Kerrisk

Remove mention of sched_setscheduler() when talking about sched_priority

There are nowadays multiple ways to set sched_priority (and
in fact there always were, since we also had sched_setparam(2)).

Michael Kerrisk

SEE ALSO: Add Documentation/scheduler/sched-design-CFS.txt

Michael Kerrisk

Don't mention sched_setscheduler(2) in discussions of setting policies
In a couple of places, sched_setscheduler(2) is mentioned as the
way of setting policies. But now there is sched_setattr(2) as
well, rewrite the text in a more generic way.

Michael Kerrisk

Rework summary text describing sched_setattr(2) and sched_getattr(2)
Note that these APIs are a superset of sched_setscheduler(2)
and sched_getscheduler(2).

Michael Kerrisk

Remove crufty text relating to sched_setscheduler()
All of the removed text is in sched_setscheduler(2) and
should have been trimmed from this page.

Michael Kerrisk

SEE ALSO: Mention more files in Documentation/scheduler/ directory

==== Changes in man-pages-3.68 =====

Released: 2014-05-28, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Alastair McKinstry <mckinstry@computer.org>

Carsten Grohmann <carstengrohmann@gmx.de>

Colin Williams <colinwilliams1968@gmail.com>

Heinrich Schuchardt <xypron.glpk@gmx.de>

Lars Wirzenius <liw@iki.fi>

Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Peng Haitao <penght@cn.fujitsu.com>
Rasmus Villemoes <rv@rasmusvillemoes.dk>
Richard Braakman <richard.braakman@jollamobile.com>
Simon Paillard <spillard@debian.org>

Apologies if I missed anyone!

New and rewritten pages

localedef.1

Marko Myllynen, Richard Braakman, Alastair McKinstry, Lars Wirzenius

New page for localedef(1)

Add new page based on Debian localedef(1) page.

New and changed links

procfs.5

New link to proc.5

Since the term "procfs" is widely used, it seems reasonable to have a link from that name to proc(5).

Changes to individual pages

locale.1

Marko Myllynen

Provide a step-by-step example of how to use a custom locale

Marko Myllynen

Use LC_TELEPHONE instead of LC_MESSAGES in the example
yesstr/nostr in LC_MESSAGES are planned to be changed at some
point [1], so it's better to provide an example which won't
be obsoleted by that change.

[1] https://sourceware.org/bugzilla/show_bug.cgi?id=16975

adjtimex.2

Michael Kerrisk

Add feature test macro requirements

clone.2

Michael Kerrisk

ERRORS: add cross-reference to fork(2) for explanation of EAGAIN

fork.2

Michael Kerrisk

ERRORS: add pid_max and threads-max to EAGAIN

And rewrite text to be the same as pthread_create(3).

getrlimit.2

Michael Kerrisk

RLIMIT_NPROC is not enforced if CAP_SYS_ADMIN or CAP_SYS_RESOURCE

remap_file_pages.2

Rasmus Villemoes

Fix prototype

The pgoff argument has type size_t, not ssize_t (and in the kernel it is unsigned long).

set_mempolicy.2

Rasmus Villemoes

Fix prototype for set_mempolicy(2)

The nodemask argument is const. The return type in numaif.h is long.

swapon.2

Rasmus Villemoes

Remove header from synopsis

The <asm/page.h> header is not readily available, and the comment seems to indicate that it is for getting PAGE_SIZE. But it is never mentioned why one would need to know that, and it is in any case better obtained using sysconf(), provided by <unistd.h>.

a64l.3

Rasmus Villemoes

Fix prototype for a64l()

The argument is const, both according to POSIX and the glibc headers.

adjtime.3

Rasmus Villemoes

Add required header

The prototype for adjtime(3) is declared in <sys/time.h>.

argz_add.3

Rasmus Villemoes

Fix prototypes

Update the prototypes of argz_{delete,extract,next} to agree with glibc headers and manual.

bstring.3

Rasmus Villemoes

Fix prototypes

The length parameter `n` has type `size_t` in `bcmp()`, `bcopy()` and `bzero()`.

envz_add.3

Rasmus Villemoes

Fix prototypes

The `envz_len` parameters for `envz_entry()` and `envz_get()` are not passed by reference.

fpathconf.3

Rasmus Villemoes

Fix prototype

The path argument to `pathconf()` is `const`.

fseek.3

Rasmus Villemoes

Fix prototype

The `pos` argument to `fsetpos()` is `const`.

gcvt.3

Rasmus Villemoes

Fix prototype

The `ndigit` parameter to `gcvt()` has type `int`.

getaddrinfo_a.3

Rasmus Villemoes

Fix prototype

The pointer arguments to `gai_suspend()` are `const`.

getauxval.3

Rasmus Villemoes

Fix permissions

There doesn't seem to be any reason for `getauxval.3` to be executable...

getnameinfo.3

Rasmus Villemoes

Fix prototype

The `hostlen` and `servlen` parameters have type `socklen_t`.
(The types changed in glibc 2.2)

Michael Kerrisk

Note types of `'hostlen'`; and `'servlen'` in glibc < 2.2

getrpercent.3

Rasmus Villemoes

Fix prototype

The argument to `getrpcbyname()` is `const`.

`getrpcport.3`

Rasmus Villemoes

Add `#include` and fix prototype

The prototype for `getrpcport()` is obtained by `#include'ing` `<rpc/rpc.h>`. Also, update its prototype.

`getspnam.3`

Rasmus Villemoes

Fix prototype

The struct `spwd` argument to `putspent()` is `const`.

`getutent.3`

Rasmus Villemoes

Fix prototypes

The arguments to `getutid()`, `getutline()`, and `pututline()` are `const`.

`inet.3`

Rasmus Villemoes

Fix prototype

The parameters to `inet_makeaddr` have type `in_addr_t`.

`inet_net_pton.3`

Rasmus Villemoes

`srcfix`, `cfix`

Use a consistent style throughout the man-pages.

`key_setsecret.3`

Rasmus Villemoes

Fix prototypes

Remove `const` qualifiers from arguments to `key_decryptsession`, `key_encryptsession`, and `key_setsecret`.

`makecontext.3`

Rasmus Villemoes

Fix prototype

The second argument to `swapcontext()` is `const`.

`makedev.3`

Rasmus Villemoes

Fix prototype

`gnu_dev_makedev`, and hence its trivial macro wrapper `makedev`, takes two unsigned int parameters; this is consistent with it being the inverse of `(gnu_dev_)major/minor`, which return unsigned int.

`malloc_trim.3`

Rasmus Villemoes

Fix prototype

As mentioned further down, `malloc_trim` returns an integer.

`mq_getattr.3`

Rasmus Villemoes

Fix prototype

The `newattr` parameter to `mq_setattr` is `const`.

`newlocale.3`

Marko Myllynen

List all available category masks

Michael Kerrisk

Add `LC_ALL_MASK` description

`nl_langinfo.3`

Marko Myllynen

Expand the example code a bit

Better illustrate querying elements from different categories.

`perror.3`

Rasmus Villemoes

Fix declaration

The elements of the array `sys_errlist` are also `const`.

`pthread_attr_setaffinity_np.3`

`pthread_attr_setdetachstate.3`

`pthread_attr_setguardsize.3`

`pthread_attr_setinheritsched.3`

`pthread_attr_setschedparam.3`

`pthread_attr_setschedpolicy.3`

`pthread_attr_setscope.3`

`pthread_attr_setstack.3`

`pthread_attr_setstackaddr.3`

`pthread_attr_setstacksize.3`

Rasmus Villemoes

Constify parameters

Each of the `pthread_attr_get*` functions extract some piece of information from a `pthread_attr_t`, which is passed by `const` reference. Add the `const` keyword to the prototypes of these functions.

`pthread_cleanup_push_defer_np.3`

Michael Kerrisk [Rasmus Villemoes]

Add feature test macro requirements

`pthread_create.3`

Michael Kerrisk [Carsten Grohmann]

Add pid_max limit to EAGAIN error cases

pthread_equal.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_equal() is thread safe.

pthread_exit.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_exit() is thread safe.

pthread_getcpuclockid.3

Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function pthread_getcpuclockid() is thread safe.

pthread_setaffinity_np.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_setaffinity_np() and pthread_getaffinity_np() are thread safe.

pthread_setconcurrency.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions pthread_setconcurrency() and pthread_getconcurrency() are thread safe.

pthread_setname_np.3

Rasmus Villemoes

Fix prototype

The name parameter of pthread_getname_np is an output parameter and hence not const.

pthread_setschedparam.3

Rasmus Villemoes

Fix prototypes

Add return type for pthread_{s,g}etschedparam.

pthread_setschedprio.3

Rasmus Villemoes

Fix prototype

Add return type for pthread_setschedprio.

pthread_sigqueue.3

Rasmus Villemoes

Add missing #include <signal.h>

rcmd.3

Rasmus Villemoes

Fix prototypes

Unlike the BSDs, the second argument of `rcmd()` and `rcmd_af()` has type `unsigned short`.

The first argument of `iruserok_af()` has type `const void*`.

re_comp.3

Rasmus Villemoes

Fix prototypes

`re_comp` and `re_exec` take `const char*` arguments.

resolver.3

Rasmus Villemoes

Fix prototypes and extern-declaration

Fix `const`- and signedness of various `char*` parameters.

Also, there is no "struct state", but `_res` is a struct `__res_state`. (Actually, `_res` is `errno`-like in that it is really a macro expanding to `(*__res_state())`.)

rexec.3

Rasmus Villemoes

Fix prototypes

The `user`, `passwd` and `cmd` arguments to `rexec` and `rexec_af` are all `const`.

rtime.3

Rasmus Villemoes

Replace header

The header `<rpc/des_crypt.h>` does not provide `rtime()`; `<rpc/auth_des.h>` does, as is also implied in both the `NOTES` and `EXAMPLE` sections.

scandir.3

Rasmus Villemoes

Fix prototypes

The `alphasort` and `versionsort` functions take arguments of type `const struct dirent**`, not `const void*`.

setlocale.3

Michael Kerrisk [Marko Myllynen]

Simplify locale category listing and add GNU-specific locale categories

Some information that was here will move to `locale(7)`.

Marko Myllynen

Remove now obsolete `NOTES` section

setnetgrent.3

Rasmus Villemoes

Fix prototype

The buflen argument to getnetgrent_r has type size_t.

sigvec.3

Rasmus Villemoes

Fix prototype

The vec argument to sigvec is const.

tsearch.3

Rasmus Villemoes

Fix prototype

The rootp argument to tfind is "void * const *",
not "const void **".

core.5

Michael Kerrisk

Core dump files are nowadays core.pid by default

locale.5

Marko Myllynen

Document mon_grouping and grouping properly

Michael Kerrisk

Note default value for 'first_workday'

Michael Kerrisk [Marko Myllynen]

Add brief descriptions of collating-element and collating-symbol

Marko Myllynen

t_fmt_ampm is needed only for locales that employ AM/PM convention

Michael Kerrisk [Marko Myllynen]
